Counsel for the Respondents

TABLE OF CONTENTS

INTRODUCTION

1. This is the Brief and Authorities in reply to the Respondents' interlocutory application to strike and/or summarily dismiss the Applicants' Amended Originating Application.

2. In order to succeed in its Application, the Respondents would require this court to deny its constitutionally protected jurisdiction to support the rule of law. The Alberta Court of Appeal framed a superior court's jurisdiction as follows:

> [14] But maintaining the integrity of the system of administrative justice is not the only value at play. Judicial review was originally formulated by the common law courts in support of the rule of law, a constitutional principle of the first order. Indeed, the Supreme Court of Canada has noted that this principle is so important, that it might well be unconstitutional for a legislative body to attempt to abolish judicial review: *Crevier v Attorney General of Quebec*, 1981 CanLII 30 (SCC), [1981] 2 SCR 220 at p. 236; *Dunsmuir v New Brunswick*, 2008 SCC 9 at paras. 31, 52, [2008] 1 SCR 190.

Edmonton East (Capilano) Shopping Centres Limited v Edmonton (City), 2015 ABCA 85; overturned 2016 SCC 47 on different grounds [Tab 1]

3. The Respondents have placed considerable weight on two arguments that they submit support their application to strike:

    a. Despite being enforced by the Respondents for 44 years and incorporated into *ALSA* regulations, the 1976 *A Coal Development Policy for Alberta* (the "**Coal Policy**") is unenforceable policy and its rescission is not justiciable; and

    b. The *Alberta Land Stewardship Act* ("***ALSA***") is inapplicable and contains language in section 15 removing this court's jurisdiction to review the rule of law.

4. The Respondents' submissions cannot succeed.

5. The Applicants' claim is reviewable by this Court. The Coal Policy was adopted by the Respondents following extensive consultation and it was followed and relied upon for 44 years. The Coal Policy has since been incorporated into the *South Saskatchewan Regional Plan* ("***SSRP***"), the *Livingstone-Porcupine Hills Sub-Regional Integrated Resource Plan* ("***LPHP***") and the *Livingstone-Porcupine Hills Land Footprint Management Plan* ("***LPHFP***") (collectively, the "***Plans***"). Both the *SSRP* and the *LPHP* are enforceable

regulations pursuant to the express provisions of *ALSA*. The *LPHFP* was continued and remains active pursuant to the express provisions of the *SSRP*.

6. The language in section 15 of *ALSA* can be interpreted in one of two ways. First, as a privative clause. If the Court interprets section 15 as a privative clause, then pursuant to the Supreme Court of Canada decision in *Canada (Minister of Citizenship and Immigration) v Vavilov*, section 15 has no utility.

7. The other way to interpret section 15 of *ALSA* is to close this Court's jurisdiction to its constitutionally protected function of supporting the rule of law. That argument must fail.

8. Otherwise, the Coal Policy represents a 'true incorporation' into the *Plans*. Using accepted rules of statutory interpretation, the Respondents were required to abide by the express provisions in *ALSA* prior to rescinding the Coal Policy.

9. In applying to summarily dismiss, the Respondents' base their position on a cherry-picked portion of the record without providing the rest of the record to the Applicants or the court. Even undertakings taken under advisement following cross examination of the Respondents' witness have not been produced.

10. The Respondents' approach is patently unfair and completely ignores the role of the Record of Proceedings in ensuring government accountability and meaningful judicial review.

FACTS

a) A Note on the Parties' Ability to Rely Upon Facts

11. The Respondents have presented two bases to strike the Applicants' Amended Originating Application.

12. First, the Respondents have alleged that the Amended Originating Application discloses no cause of action pursuant to *Rule* 3.68(2)(b). Evidence is not permitted in support of that Application. The facts as stated in the Amended Originating Application are presumed to be true and the Court is required to assess whether there is a cause of action based upon those facts.

Alberta Rules of Court, Alta Reg 124/2010 at Rule 3.68(3) [***ARC***] [Tab 2]

13. Second, the Respondents have alleged that the Court has no jurisdiction (justiciable or non-justiciable) to consider the matters raised in the Applicants' Amended Originating Application pursuant to *Rule* 3.68(2)(a). Evidence is permitted to establish whether the Court has jurisdiction.

14. The parties are permitted to rely upon any facts associated with the Respondents' Application for Summary Dismissal.

b) The Role of the Environment Conservation Authority

15. In the early 1970s, the Government of Alberta began a four-year period of consultation and study on development in the Eastern Slopes. The consultations were conducted by the Environment Conservation Authority (the "**Authority**") and were done "to identify the priorities and concerns of Albertans for the region".

Affidavit of David Luff, sworn and filed November 17, 2020 at para 11

16. The Authority "was established as a Crown Corporation under the *Environment Conservation Amendment Act, 1977*." The Authority's role is described as follows:

> At the time it was established, the Environment Conservation Authority was without precedent, either within or outside Alberta. In its initial incarnation through *An Act respecting Environment Conservation, 1970* (S.A. 1970, chapter 36), the Environment Conservation Authority was responsible for conducting continual reviews of policies and programs of the Government and government agencies on matters pertaining to environment conservation, and for investigating into and reporting on matters pertaining to environment conservation at the request of the Lieutenant Governor. As well, they were able to inquire into issues relating to environment conservation, and to hold hearings to receive briefs and submissions about matters relating to environment conservation, making their recommendations to the Lieutenant Governor. The Authority became a corporation under the *Department of the Environment Act, 1971* (S.A. 1971, chapter 24, section 18), reporting to the Minister of the Environment. The Authority's functions continued when the Environment Conservation Authority became the Environment Council of Alberta in 1977 through the *Environment Conservation Amendment Act*, which effectively renamed the Environment Conservation Act the *Environment Council Act*. The mandate remained virtually unchanged, the major change being with regards to the structure of the board, which was replaced with a permanent Chief Executive Officer and temporary panels.

Environment Council of Alberta, ***Environment Council of Alberta records,*** online: Heritage Resources Management Information System - Provincial Archives of Alberta <https://hermis.alberta.ca/paa/Reports/ViewReport.aspx?ObjectID=GR0053.0001F&dv=True&deptID=1&ReportType=PDF>. [Tab 3]

17. The Authority was first established by *The Environment Conservation Act*. The purpose of the Authority was set out in section 7 of the Act. Section 7 makes clear that the Authority's express purpose is to "matters pertaining to environment conservation". The Authority was under the purview of the Lieutenant Governor in Council.

An Act Respecting Environment Conservation, 1970 c 36 [Tab 4]

18. *The Environment Conservation Act* was amended in 1972. The amendments subjected the Authority to the Minister of the Environment, newly established the previous year (1971) pursuant to *The Department of Environment Act*.[1]

The Environment Conservation Amendment Act, Ch 38 [Tab 5]
The Department of Environment Act, Ch 24 [Tab 6]

19. One of the Authority's earliest acts was to develop a "method by which resources were to be managed by the Government of Alberta in the Eastern Slopes Region".

Affidavit of David Luff, *supra* at para 14

20. To accomplish its statutory mandate, the Authority began public consultations in 1973 "in order to identify the priorities and concerns of Albertans for the region". The consultations were titled *Land Use and Development in the Eastern Slopes* (the "**Hearings**").

Affidavit of David Luff, *supra* at para 11

21. The Hearings were transcribed and are available for review in a ten-volume series. Each volume in the series represents a unique location in which the hearings were held. For example, Part I in the series is the record of hearings in Coleman, Alberta conducted June 11 and 12, 1973.

Affidavit of David Luff, *supra* at Ex 'A'

[1] The Authority appears to have been continued at least until 1984 when the *Environment Council Act* was enacted, continuing the Authority pursuant to section 3.

Environment Council Act, Chap E-13 [Tab 7]

22. The Hearings are remarkable in both their scope and relevance to current issues.

23. Mr. Luff's Affidavit attaches three volumes most relevant to the Applicants—Coleman (Part I), Lethbridge (Part II) and portions of Calgary (Part IIIB). Those portions of the Hearings concern land use around the Applicants' grazing leases and in the South Saskatchewan region.

24. The Authority heard from a variety of constituents, including first nations, coal development proponents, environmental NGOs and ranchers. It received written and oral submissions from those groups and persons interested in development along the Eastern Slopes. At the commencement of the record of proceedings, the Authority noted as follows:

> …land in the Eastern Slopes is now used or is proposed for use for such purposes as tourism, urban development, forest utilization, mineral resources industries, surface mining, oil and gas development, underground coal mining, agriculture, watershed conservation, domestic water supplies, hydroelectric power developments, wildlife and fishing management, wilderness and natural areas, institutional use by charitable, religious and other groups, archaeological sites, research, Indian reservations and national and provincial parks.
>
> …
>
> In order to publicly explore these interests and discover the concerns they generate, the Environment Conservation Authority was requested on behalf of the Government of Alberta to hold comprehensive and wide-ranging hearings on land Use and Resource Development in the Eastern Slopes.
>
> …
>
> A total of 308 submissions was made as well as 14 commercial recreational proposals.

Affidavit of David Luff, *supra* at Ex 'A' p iii and XV

25. Although the scope assigned to the Hearings is itself notable, most significant is likely the issues considered in the Hearings. In brief, the same issues considered by the Hearings remain issues today.

26. The Applicants outlined two concerns they have with coal development in their grazing allotments: water allocation and non-aquatic environmental impacts. Those two concerns were repeated in almost every submission in the Hearings. Then, as now, water allocation and loss of native grasses were of significant concern to those making submissions.

8

Affidavit of Macleay E Blades, sworn July 12, 2020, filed July 14, 2020 at paras 20 – 27
Affidavit of John Smith, sworn September 14, 2020 and filed September 18, 2020 at para 5

27. As a result of the Hearings, the Authority issued 232 recommendations. The following year, in 1974, the Authority conducted a review of coal mining in the Eastern Slopes. The report and recommendations were published as *Review of Coal Exploration Policies and Programs in the Eastern Slopes of Alberta: Report and Recommendations* (the "**Review**").

Affidavit of David Luff, *supra* at Ex 'B'

28. The Review was a direct result of the Hearings:

> In the summer of 1974…a resolution was passed in which the Public Advisory Committee on the Environment urgently requested the Environment Conservation Authority to fulfill its statutory duties and conduct a review of the Coal Exploration Permit Program, dating from the announcement of the Eastern Slopes Hearing.

Affidavit of David Luff, *supra* at Ex 'B' at p 4

29. The Review's recommendations range from the specific (reclamation of water ways following coal exploration) to the general (the role of the Energy Resources Conservation Board in permitting coal projects).

c) The Applicants' Role in Developing the Coal Policy

30. Although there is no evidence the Applicants themselves directly contributed to the Hearings or the Coal Policy's development, their interests were represented throughout. The area subject to their grazing leases were considered in at least the following submissions:

a. Ken Dezall, Cowley, Alberta: "This brief is confined to my own views and opinions about the forestry or trunk road";

Affidavit of David Luff, *supra* at Ex 'A' p 31

b. C. H. Allen, Crowsnest Guest Ranch: "At this time, we also propose an area on the north side of Highway #3, bordered on the south and north by the Crowsnest Forest Reserve, on the east by the Kananaskis Highway and the west by the B.C. border";

Affidavit of David Luff, *supra* at Ex 'A' p 91-1

c. Charlie Russell, Pincher Creek, Alberta: "My name is Charlie Russell and I am a member of the ranching community";

Affidavit of David Luff, *supra* at Ex 'A' p 95

d. Andy Russell, Foothills Protection Association: "I speak on behalf of the Foothills Protective Association which is concerned with the surface rights of land. So I too represent ranchers…In the case of strip mines, to claim that reclamation is possible is purely theoretical because it has not been proven possible…"; and

Affidavit of David Luff, *supra* at Ex 'A' p 102

e. M. Edey, The Stampede Ranch: "We have a very direct interest in the future of the Eastern Slope as our ranches border this area, therefore any major change in policy has a direct bearing on our operation…We just represent the people who graze the upper Highwood, that is in the corridor on the headwaters of the Highwood. They are Mr. Dave Deeble, our ranching company and the Eden Valley Indian people.".

Affidavit of David Luff, *supra* at Ex 'A' p 365-1, 366

31. The Applicants' interests were represented and spoken to in the course of the Hearings. Specifically, the Stampede Ranch, in representing the interests of ranchers "who graze the upper Highwood", would have represented the grazing allotments and leases the Applicants now hold.

Affidavit of Macleay E Blades, *supra* at paras 11 and 12
Affidavit of John Smith, *supra* at para 4

d) Developing the Coal Policy

32. It was within the context of the Hearings and the Review that the Department of Energy and Natural Resources released a "statement of a coal development policy for Alberta", i.e. the Coal Policy.

Affidavit of Macleay E Blades, sworn July 12, 2020, filed July 14, 2020 at Ex 'A', p i

33. The Coal Policy is best divided into two categories: unenforceable statements of policy and enforced directives.

34. In the latter category of enforced directives were the following: a) a royalty regime that was put in place "without change for a ten-year period" and b) the "classification [of] Provincial lands into four categories with respect to coal exploration and development".

Affidavit of Macleay E Blades, *supra* at Ex 'A' at p 9 – 11, 14 – 18 and A1 – A2

35. The royalty regime issued by the Coal Policy appears to have been in place until September 18, 1992. On that date, the Respondents issued Information Letter 92-21 establishing a new royalty regime. The new regime appears to have been established by the adoption of a new set of regulations, bearing the same name as the former regulations. Section 12 of the new *Coal Royalty Regulation* expressly repealed the former *Coal Royalty Regulations*.

Coal Royalty Regulation, AR 295/1992 at s 12 [Tab 8]

36. The former *Coal Royalty Regulations* were filed just over one month from the release of the Coal Policy. The regulations adopt the royalty rate set out in the Coal Policy as well as other elements of the Coal Policy.

Coal Royalty Regulations, Alta Reg 193/176 [Tab 9]
Regulations Act, Index of Regulations, December 31, 1991 at p 42 [Tab 10]

37. The second enforced directive in the Coal Policy are the coal categories. The categories divided the Eastern Slopes into four distinct regions. Each category established different criteria relating to exploring and developing coal resources.

38. In brief, the four categories were as follows:

    a. Category 1: "no exploration or commercial development will be permitted";

    b. Category 2: "limited exploration is desirable and may be permitted under strict control but in which commercial development by surface mining will not normally be considered at the present time";

    c. Category 3: "exploration is desirable and may be permitted under appropriate control but in which development by surface or underground mining or in-situ operations will be approved subject to proper assurances respecting protection of the environment and reclamation of disturbed lands"; and

d. Category 4: "exploration may be permitted under appropriate control and in which…mining…may be considered".

Affidavit of Macleay E Blades, *supra* at Ex 'A' at p 14 – 18

39. Like the royalty regime, the coal categories were enforced.

i) Directive 061

40. *Directive 061: How to Apply for Government Approval of Coal Projects in Alberta* appears to have been adopted in September 1978 by the Energy Resources Conservation Board (the "**ERCB**").

Transcript of Questioning of Michael Moroskat, held December 21, 2020 and yet unfiled at Ex 'A', p 8

41. The Alberta Energy Regulator (the "**AER**") implemented Directive 061 June 17, 2013 when it succeeded the ERCB. The AER's jurisdiction to implement Directive 061 is borne out of the regulator's general powers set out in section 9 of the *Coal Conservation Act*. For example, section 9 provides that:

> 9(1) The Regulator may make rules
>
> …
>
> (d) restricting or prohibiting the development of a mine, mine site, coal processing plant or in situ coal scheme at any point within a stated distance of a boundary, road, road allowance, lake, river, stream, pipeline or other public or private works;
>
> …
>
> (u) generally, prescribing measures to conserve coal or to prevent its waste or improvident disposition, and stipulating any other provisions reasonably incidental to the efficient development of mines, mine sites, coal processing plants and in situ coal schemes, and to production from them;

Coal Conservation Act, RSA 2000, c C-17 at s 9 [***Coal Conservation Act***] [Tab 11]

42. The coal categories were incorporated into Directive 061 and governed the approval process by which coal projects were approved within the four regions.

ii) Alberta Energy

43. In addition to enforcement mechanisms with the AER, the Coal Policy was enforced by Alberta Energy. Under cross examination, the Respondents' affiant, Michael Moroskat, testified that the coal categories were relied upon to decide "how [the Respondents] issue tenure" and restrictions on accepting new lease "applications for coal".

Transcript of Questioning of Michael Moroskat, *supra* at P 7 L 7 – P 13 L 4

44. Mr. Moroskat testified that the Respondents specifically enforced the Coal Policy as follows:

> Page 12
>
> Q So the coal policy was relied upon to establish databases to not issue mineral leases for Category 1 lands. That's correct?
>
> A It was used to establish a restriction to restrict the issuance of coal rights in those areas, yes.
>
> Q Okay, and then for category 2 lands, you referenced 'published information letters'. Do you recall that?
>
> A I do, yeah.
>
> Q And you said, we issue published information letters to restrict mineral development in Category 2 lands. Do you recall that?
>
> A Yes.

Transcript of Questioning of Michael Moroskat, *supra* at P 12 L 7 – 19

45. The Respondents' authority to restrict coal rights is born out of sections 21 and 24 of the *Coal Conservation Act*. Those provisions make the Lieutenant Governor in Council's authorization a condition precedent to obtaining a permit from the AER.

Coal Conservation Act, *supra* at s 21 and 24 [Tab 11]
L. Douglas Rae, ***The Legal Framework for Coal Development in Alberta***, [Vol XX No 1 1982] at p 124 [***Rae***] [Tab 12]

iii) Overall Regulatory Process

46. The proposed intervenors, Atrum Coal Limited and Elan Coal Ltd., filed the Affidavit of Tony Mauro in support of their Application to intervene. Mr. Mauro swore as follows:

19. Accordingly, the Coal Policy permitted limited coal exploration in Category 2 lands but 'normally' would not consider commercial development by surface mining. To develop the Elan Project, Atrum would have required an exemption under the Coal Policy.

Affidavit of Tony Mauro, sworn December 14, 2020 at para 19

47. The procedure for obtaining an exemption outlined by Mr. Mauro is consistent with the Coal Policy. As noted by the Coal Policy itself:

> The government will consider documented applications for reclassification of lands from any interested person…

Affidavit of Macleay E Blades, *supra* at Ex 'A' p 17

48. Directive 061 provided the method to obtain a reclassification.

Transcript of Questioning of Michael Moroskat, *supra* at Ex 'A' p 9 – 10

e) Rescinding the Coal Policy

49. On May 15, 2020 Alberta Energy rescinded the Coal Policy.

Affidavit of Macleay E Blades, *supra* at Ex 'C'
Affidavit of Michael Moroskat, sworn November 30, 2020 at Ex 'B'

50. The fact that the Coal Policy, active and relevant for 44 years, was rescinded on the Friday of the May long weekend in the middle of a global pandemic (as courts sat silent and judicial processes largely waned), sits in stark contrast to the effort taken by the Authority in conducting the Hearings upon which the Coal Policy was adopted.

51. An example of the effort at consultation made by the Authority in 1973 is the following hearing notice:

> As background to the hearings the Environment Conservation Authority released a series of 12 Information Bulletins; five of these pertained specifically to the separate watershed basins and were prepared by the individual planning commissions.
>
> Hearings were held (during June and July of 1973) in each of the watershed basins as well as in the five major cities.

Affidavit of David Luff, *supra* at Ex 'A' p iv

52. Alberta Energy was directed to rescind the Coal Policy pursuant to a March 31, 2020 decision of the Honourable Minister Savage. On that date, Minister Savage communicated the direction to Alberta Energy by checking the box for 'Option A':

> Option A: The Minister directs Alberta Energy to rescind the 1976 coal policy immediately, and undertake a 120 day process to resolve existing held coal lease applications before issuing newly available coal rights.

Affidavit of Micheal Moroskat, sworn November 30, 2020 at Ex 'A'

53. Nine days later, on April 08, 2020, the AER rescinded Directive 061. The AER announced its decision by issuing Bulletin 2020-07.

Transcript of Questioning of Michael Moroskat, *supra* at Ex 'B' and 'C'

54. The Coal Policy rescission appears coordinated with the AER's decision to rescind Directive 061. For example, the only individual Mr. Moroskat remembered contacting following the Coal Policy rescission was Shaunna Cartwright, director with the AER responsible for coal:

> Page 68
>
> Q You recall providing evidence earlier about a Shaunna Cartwright?
>
> A Yes.
>
> Q And you phoned her to advise of the decision once a decision to rescind the policy was made?
>
> A That is what I recall. As I recall, I phoned her to let her know that a decision was made.
>
> Q Okay. Who is Ms. Cartwright?
>
> A I can't recall her specific title, but she's, I believe, a director with the AER responsible for coal in some respect of, like, our policy or an advisory capacity of some sort. I -- I -- I don't recall her specific job title and -- and roles.
>
> …
>
> Q Okay. So what was discussed on this phone call with Ms. Cartwright, then?
>
> A To my recollection, it was just simply that -- that the policy -- a decision had been made to rescind the coal policy.
>
> Q And why did you decide to phone her? Why not, for example, phone my clients?

A The AER is a -- has an active role in regulating coal development, and we often communicate between each other on a number of issues.

Transcript of Questioning of Michael Moroskat, *supra* at P 68 L 4 – P 71 L 15

55. The relationship between the AER and Alberta Energy on the topic of rescinding the Coal Policy remains a mystery. That part of the record is incomplete and unavailable to the parties as at the date this Brief was filed.

56. The decision to rescind the Coal Policy contains two variables requiring analysis: who made the decision and what are the reasons for the decision. Each will be analyzed in turn.

i) Who Made the Decision to Rescind the Coal Policy?

57. The decision to rescind the Coal Policy was announced in the Respondents' Coal information Bulletin 2020-23. The Information Bulletin was authorized by Martin J. Chamberlain, Q.C., Deputy Minister of Energy Policy. The Information Bulletin states that the Coal Policy "has been rescinded effective June 1, 2020." No other context as to the decision maker was provided by Mr. Chamberlain.

Affidavit of Macleay E Blades, *supra* at Ex 'B'

58. It appears that Minister Savage also had a role to play in rescinding the Coal Policy. Her decision "directs Alberta Energy to rescind" the Coal Policy. The act of rescinding the Coal Policy therefore remained with Alberta Energy, as delegated by the Minister[2].

Affidavit of Michael Moroskat, *supra* at Ex 'A'

59. Finally, only three options were provided to Minister Savage, each of which rescinds the Coal Policy. Mr. Moroskat testified that he did not know who made the decision to only present options A, B or C to Minister Savage.

Transcript of Questioning of Michael Moroskat, *supra* at P 55 L 5 – 10

ii) What are the Reasons for the Decision to Rescind the Coal Policy?

60. Each decision maker has relied upon separate reasons to rescind the Coal Policy.

[2] Note that this evidence is unavailable to the Respondents in establishing whether the Deputy Minister properly delegated her authority. See *Rule* 3.68(3).

61. In rescinding the Coal Policy, Mr. Chamberlain states:

> The coal categories are no longer required for Alberta to effectively manage Crown coal leases, or the location of exploration and development activities, because of decades of improved policy, planning, and regulatory processes.

Affidavit of Macleay E Blades, *supra* at Ex 'B'

62. That is the extent of the reasons provided by Mr. Chamberlain.

63. By contrast, when Minister Savage made her decision to direct Alberta Energy to rescind the Coal Policy, it was based upon the following advice:

> Despite existing land use policies, there is a risk that rescission could result in policy gaps because several Integrated Resource Plans that remain active within the Eastern Slopes rely on the coal categories to establish baseline conditions (mostly in the South Saskatchewan Region, but also a portion of the Upper Athabasca Region).
>
> > The full extent of the policy gap risk will not be quantified until Alberta Energy completes its review of the coal categories with input from Environment and Parks. This work is expected to be complete in summer 2020.

Affidavit of Michael Moroskat, *supra* at Ex 'A' p 2

64. Mr. Moroskat testified that he was unaware whether the work to determine the full extent of the policy gap risk was ever completed.

Transcript of Questioning of Michael Moroskat, *supra* at P 26 L 12 – 22

65. The reasons for decision sit in contrast to each other. Where Mr. Chamberlain says, "the coal categories are no longer required", the Minister notes that the "rescission could result in policy gaps".

66. Silent in either decision are details relating to consultations or why the decision was made not to consult. Mr. Moroskat testified that he was "not aware of any consultation regarding rescinding the coal policy".

Transcript of Questioning of Michael Moroskat, *supra* at P 58 L 14 – 18

67. Mr. Moroskat's statement on consultation, however, stands in contrast to his other testimony:

Page 62

A I can't recall any specific meetings, but I know they happened fairly regularly. As a matter of – of our business, the department staff meet with a wide variety of stakeholders that we have that are related to our business. So I -- I don't recall the specifics of any one meeting.

Q But there were multiple meetings – multiple letters, multiple meetings?

A There would've been multiple meetings with multiple companies on a variety of different subjects, yes.

Q Including the rescission of the coal policy?

A I'm not aware of one that specifically focused on the rescission of the coal policy, but concerns that industry has with the coal policy would've come up in these discussions.

Transcript of Questioning of Michael Moroskat, *supra* at P 62 L 9 – 23

68. The Respondents had "multiple" discussions with rescission advocates. Prior to rescinding the Coal Policy, the Respondents never contacted the Applicants or any of the intervenors supportive of the Applicants' position.

Transcript of Questioning of Michael Moroskat, *supra* at P 65 L 2 – 26
Affidavit of MacLeay E Blades, *supra* at para 17
Affidavit of John Smith, *supra* at para 5(c)

69. The basis for the Respondents' decision not to contact the Applicants or the various intervenors is contained in the Advice to Minister:

> However, [rescinding the Coal Policy] will draw criticism from environmental groups and other user groups active within Alberta's Eastern slopes, particularly if the decision is made without prior public consultation.

Affidavit of Michael Moroskat, *supra* at Ex 'A' p 2

70. The Respondents pre-determined the result of public consultation. They held that the Applicants would be critical of the decision and therefore (this Court may infer) determined there was no merit in pursuing public consultation.

71. Had they consulted with the Applicants, the Respondents may have discovered that they are generally not opposed to development and are supportive of sustainable development and exploration generally. Rather, the Applicants are concerned that the planned development is neither sustainable nor merited on their grazing allotments.

Affidavit of Macleay E Blades, *supra* at para 19
Affidavit of John Smith, *supra* at paras 12 – 13

72. Any chance of consultation and creating a framework knowing the Applicants' positions was taken away by the Respondents' unilateral decision to pre-determine the results of consultation.

iii) Conclusion on Rescission

73. The Respondents have argued that rescission was done because the Coal Policy was no longer necessary. This submission is made despite the Respondents' not knowing the policy gaps that were in place when the policy was rescinded.

74. However, one crucial fact cannot be emphasized enough. Before rescission, the Applicants' properties and grazing leases were secure. There was no exploration and there was no prospect of development.

Affidavit of Macleay E Blades, *supra* at para 15
Affidavit of John Smith, *supra* at para 11

75. Since the Coal Policy was rescinded, the Applicants' properties and grazing leases are now subject to exploration and the prospect of significant development—development not characterized by shaft mines with restricted impact on surface rights but instead open pit mines where mountains are scraped off the surface of land and replaced with 250 meter pits.

Affidavit of Macleay E Blades, *supra* at paras 15 – 18
Affidavit of John Smith, *supra* at para 11

76. The before and after change affecting the Applicants is something that cannot be ignored, despite the Respondents' best attempts to do so in their submissions. Above all else, it is that fact that makes the rescission justiciable and reviewable by this Court.

ISSUES

77. The following issues are before this Court:

    a. Whether the decision to rescind the Coal Policy is justiciable having regard to:

i. Whether the rescission was based in law;

ii. Whether the Applicants are directly affected; and

iii. Whether the Applicants had a legitimate expectation of procedural fairness;

b. Whether *ALSA* applies to the Coal Policy;

c. Whether the Respondents acted in accordance with the express requirements of *ALSA* when rescinding the Coal Policy; and

d. Whether, notwithstanding *ALSA*, the Respondents' had the authority to unilaterally rescind the Coal Policy.

78. The issues are framed by the Respondents' underlying Applications to summarily dismiss and strike the Applicants' claim.

LAW & ANALYSIS

Issue #1: Whether the Decision is Justiciable

79. The role of courts in judicial review is to ensure that the executive has acted reasonably, "i.e. within a range of acceptability and defensibility":

> [78] In judicial review, the reviewing courts are in the business of enforcing the rule of law, one aspect of which is "executive accountability to legal authority" and protecting "individuals from arbitrary [executive] action": *Reference Re Secession of Quebec*, 1998 CanLII 793 (SCC), [1998] 2 S.C.R. 217, 161 D.L.R. (4th) 385 at paragraph 70. Put another way, all holders of public power are to be accountable for their exercises of power, something that rests at the heart of our democratic governance and the rule of law: *Slansky* at paras. 313-315.
>
> ***Tsleil-Waututh Nation v. Canada (Attorney General)***, 2017 FCA 128 at para 78 [Tab 13]

80. Judicial review, however, is "subject to any concerns about justiciability". If a government decision is not "justiciable", courts will properly not exercise their discretionary powers to judicially review it.

81. The distinction between justiciable and non-justiciable is stated as follows:

> [J]usticiability may be defined as a set of judge-made rules, norms and principles delineating the scope of judicial intervention in social, political and economic life. In short, if a subject-matter is held to be suitable for judicial determination, it is said to be justiciable; if a subject-matter is held not to be suitable for judicial determination, it is said to be non-justiciable. The criteria used to make this determination pertain to three factors: (1) the capacities and legitimacy of the judicial process, (2) the constitutional separation of powers and (3) the nature of the dispute before the court.

Mathur v Ontario, 2020 ONSC 6918 at para 103 (citing: Sossin, D., *Boundaries of Judicial Review: The Law of Justiciability in Canada*, 2nd ed. (Toronto: Carswell, 2012)) [Tab 14]

82. The first step in determining whether the decision to rescind the Coal Policy was justiciable is to establish the correct test for justiciability.

a) Test for Justiciability

83. In *Black v Canada (Prime Minister)*, the Ontario Court of Appeal articulated the distinction between justiciable and non-justiciable (political) decisions. The Court was asked to judicially review a decision by the then Prime Minister of Canada to intervene with the Queen to block the Applicant/Appellant's appointment as a "peer" in the United Kingdom. Being so appointed would have permitted the Appellant from sitting in the House of Lords. The Court ultimately held that justiciable decisions are those that are not "purely political":

> [50] At the core of the subject matter test is the notion of justiciability. The notion of justiciability is concerned with the appropriateness of courts deciding a particular issue, or instead deferring to other decision-making institutions like Parliament. See *Canada (Auditor General) v. Canada (Minister of Energy, Mines & Resources)*, 1989 CanLII 73 (SCC), [1989] 2 S.C.R. 49, 61 D.L.R. (4th) 604; *Thorne's Hardware Ltd. v. R.*, 1983 CanLII 20 (SCC), [1983] 1 S.C.R. 106, 143 D.L.R. (3d) 577. Only those exercises of the prerogative that are justiciable are reviewable. The court must decide "whether the question is purely political in nature and should, therefore, be determined in another forum or whether it has a sufficient legal component to warrant the intervention of the judicial branch": *Reference re Canada Assistance Plan (British Columbia)*, 1991 CanLII 74 (SCC), [1991] 2 S.C.R. 525 at p. 545, 58 B.C.L.R. (2d) 1.
>
> [emphasis added]

Black v Canada (Prime Minister), 2001 CanLII 8537 (ON CA) at paras 1 and 50 [***Black***] [Tab 15]
Canada (Prime Minister) v Khadr, 2010 SCC 3 at para 35 [***Khadr***] [Tab 16]
Engel v Alberta (Executive Council), 2019 ABQB 490 at paras 75 – 79 [Tab 17]

84. The Court in *Black* adopted the following test to determine justiciability:

> [51] Under the test set out by the House of Lords, the exercise of the prerogative will be justiciable, or amenable to the judicial process, if its subject matter affects the rights or legitimate expectations of an individual. Where the rights or legitimate expectations of an individual are affected, the court is both competent and qualified to judicially review the exercise of the prerogative.
>
> [emphasis added]

Black, *supra* at para 51 [Tab 15]
Stagg v Canada (Attorney General), [2019] FC 630 at para 50 [***Stagg***] [Tab 18]
Tesla Motors Canada ULC v Ontario (Ministry of Transportation), [2018] OJ No 4394 at paras 43 – 47 [***Tesla Motors***] [Tab 19]

85. More recently, the Supreme Court of Canada in *Highwood Congregation of Jehovah's Witnesses (Judicial Committee) v Wall* favoured a contextual approach to determining justiciability:

> [34] There is no single set of rules delineating the scope of justiciability. Indeed, justiciability depends to some degree on context, and the proper approach to determining justiciability must be flexible. The court should ask whether it has the institutional capacity and legitimacy to adjudicate the matter: see *Sossin*, at p. 294. In determining this, courts should consider "that the matter before the court would be an economical and efficient investment of judicial resources to resolve, that there is a sufficient factual and evidentiary basis for the claim, that there would be an adequate adversarial presentation of the parties' positions and that no other administrative or political body has been given prior jurisdiction of the matter by statute" (*ibid*.).

Highwood Congregation of Jehovah's Witnesses (Judicial Committee) v. Wall, 2018 SCC 26 at para 34 [***Wall***] [Tab 20]

86. Following the decision in *Wall*, the "directly affected" test articulated in *Black* appears to no longer be valid. Rather, the Supreme Court of Canada appears to have expanded justiciable decisions by shifting the focus away from a party's rights and instead focusing on a) the nature of the claim being raised and b) a Court's competence to adjudicate that claim.

Wall, *supra* at para 34 [Tab 20]

87. The Applicants submit that this contextual approach is consistent with the Supreme Court of Canada decision in *Khadr*. In that decision, the Supreme Court of Canada considered whether the Canadian government was required to request Mr. Khadr's return to Canada following his detention in Guantanamo Bay, Cuba.

Khadr, *supra* at para 1 [Tab 16]

88. In determining whether the relief requested by Mr. Khadr was justiciable, the Court focused not on whether Mr. Khadr was directly affected by the government's decision, but instead focused on whether:

    a. The remedy sought "is sufficiently connected to the breach"; and

    b. The remedy sought is "a judicial one which vindicates the right while invoking the function and powers to a court".

Khadr, *supra* at paras 29 and 33 [Tab 16]

89. Focusing on the claim and a court's ability to accede to an applicant's requested relief instead of whether an applicant is directly affected is supported by the wider jurisprudence.

90. In *Stagg*, the Court held as follows:

> "…[W]here "high policy" issues are not at stake, 'the executive of the prerogative will be justiciable, or amenable to the judicial process, if its subject matter affects the rights or legitimate expectations of an individual' (*Black v Chretien*, at paras 246-247) … [T]he evolution of administrative law in recent decades has resulted in a widening of the grounds on which administrative decisions may be reviewed. Thus, the decisive factor is not the political implications of the matter or the decision's discretionary component, but the fact that the question "has a sufficient legal component to warrant the intervention of the judicial branch": *Reference Re Canada Assistance Plan (BC)*; see also Lorne M. Sossin, *Boundaries of Judicial Review: The Law of Justiciability in Canada*, 2nd ed (Toronto: Carswell, 2012)".

91. In *Hupacasath First Nation v Canada (Minister of Foreign Affairs)*, the Federal Court of Appeal held as follows:

> 63 Whether the question before the Court is justiciable bears no relation to the source of the government power: *R. v. Ministry of Defence*, *ex parte Smith*, [1995] 4 All E.R. 427, aff'd [1996] Q.B. 517, [1996] 1 All E.R. 257 (C.A.). For some time now, it has been accepted that for the purposes of judicial review there is no principled distinction between legislative sources of power and prerogative sources of power: Council of Civil Service Unions, supra. I agree with the following passage from Lord Roskill's speech in that case (at page 417 A.C.):
>
> > If the executive in pursuance of the statutory power does an act affecting the rights of the citizen, it is beyond question that in principle the manner of the exercise of that power may be challenged on one or more...grounds... If the

> executive instead of acting under a statutory power acts under a prerogative power...I am unable to see...that there is any logical reason why the fact that the source of the power is the prerogative and not statute should deprive the citizen of that right of challenge to the manner of its exercise which he would possess were the source of the power statutory. In either case the act in question is the act of the executive.
>
> 64 I also agree with the Court of Appeal for Ontario in *Black*, supra at paragraph 44 that "the source of the power -- statute or prerogative -- should not determine whether the action complained of is reviewable."

Hupacasath First Nation v Canada (Foreign Affairs and International Trade Canada), 2015 FCA 4, at paras 59 – 70 [***Hupacasath***] [Tab 21]

92. Finally, in considering the current test for justiciability, the Federal Court recently held as follows:

> (2) Law of Justiciability
>
> (a) Test for Justiciability
>
> 27 Justiciability is concerned with the Court's proper role within Canada's constitutional framework and the "time-honoured" demarcation of powers between the Courts and the other branches of government. It relates to the subject matter of a dispute and whether the issue is appropriate for a Court to decide *(Highwood Congregation of Jehovah's Witnesses (Judicial Committee) v Wall*, 2018 SCC 26 at para 32 [*Highwood*]; *Hupacasath First Nation v Canada (Foreign Affairs and International Trade Canada)*, 2015 FCA 4 at para 62 [*Hupacasath*]). The inquiry into justiciability was described in *Canada (Auditor General) v Canada (Minister of Energy, Mines & Resources)*, [1989] 2 SCR 49 at 90-91, as:
>
> > 50 ... first and foremost, a normative inquiry into the appropriateness as a matter of constitutional judicial policy of the courts deciding a given issue, or instead, deferring to other decision making institutions of the polity.
>
> 28 In *Boundaries of Judicial Review: The Law of Justiciability in Canada*, Lorne M. Sossin defines justiciability as:
>
> > ... a set of judge-made rules, norms and principles delineating the scope of judicial intervention in social, political and economic life. In short, if a subject-matter is held to be suitable for judicial determination, it is said to be justiciable; if a subject-matter is held not to be suitable for judicial determination, it is said to be non-justiciable.
> >
> > [Lorne M Sossin, *Boundaries of Judicial Review: The Law of Justiciability in Canada*, 2nd ed (Toronto: Carswell, 2012) at 7 [*Sossin*], cited in *Highwood*, above at para 33]

> 29 The question to be decided is whether the Court has the institutional capacity and legitimacy to adjudicate the matter. Or, more generally, is the issue one that is appropriate for a Court to decide (*Highwood* at paras 32, 34). The terms "legitimacy" and "capacity" can also be understood as the "appropriateness" and "ability" of the Court to deal with a matter (*Hupacasath*, above at para 62).
>
> 30 There is no single set of rules delineating the scope of justiciability, the approach to which is flexible and to some degree contextual. Courts have often inquired whether there is a sufficient legal component to warrant judicial intervention, "[s]ince only a court can authoritatively resolve a legal question, its decision will serve to resolve a controversy or it will have some other practical significance" (*Highwood* at para 34; *Reference Re Canada Assistance Plan (BC)*, [1991] 2 SCR 525 at 546).
>
> 31 In determining whether it has the institutional capacity and legitimacy to adjudicate the matter, the Supreme Court in *Highwood* provides that a Court should consider that the matter before it "would be an economical and efficient investment of judicial resources to resolve, that there is a sufficient factual and evidentiary basis for the claim, that there would be an adequate adversarial presentation of the parties' positions and that no other administrative or political body has been given prior jurisdiction of the matter by statute" (*Sossin*, above at 294, cited in *Highwood* at para 34).

Luciuk (Guardian ad litem of) v. Canada, 2020 FC 1008 at paras 26 – 38 [*Luciuk*] [Tab 22]

93. On the issue of whether pure government policy was justiciable, the Court in *Luciuk* held that "to engage the Court's adjudicative functions, the question must be one that can be resolved by the application of law".

Luciuk, *supra* at para 34 [Tab 22]

94. The Applicants submit that the test for justiciability requires a Court to examine the remedy sought by an applicant to determine whether it is one in which a Court may review. Consistent with the narrow scope of justiciable decisions (discussed immediately below), the Court may consider numerous factors to determine whether the context within which a decision was made is justiciable.

95. It should, however, not be lost on this Court that a consistent holdover from the decision in *Black* is that if a decision directly affects a party, that decision is justiciable.

b) The Scope of Justiciable Decisions

96. At paragraph 43 of their submissions, the Respondents cited the Ontario Divisional Court in *Hamilton-Wentworth* as limiting the scope of prerogative powers subject to judicial review.

Following the Ontario Court of Appeal's ruling in *Black v Chretien* the holding from *Hamilton-Wentworth* is no longer valid.

97. The Ontario Superior Court of Justice in *Tesla Motors* recently reviewed the holdings from *Hamilton-Wentworth* and *Black v Chretien*, concluding as follows:

> [46] Under this test, matters of high policy i.e. purely political matters, like a decision to sign a treaty, or to declare war, or to cancel a subsidy program, affect no one's individual rights or legitimate expectations and, as such, are not subject to judicial review. I would add that, like the decision to cancel windmill subsidies in *Skypower*, the decision to cancel the cap-and-trade program and the electric car subsidy program are such decisions. At the opposite end of the spectrum, Justice Laskin [in *Black v Chretien*] referred to more mundane executive decisions such as issuing a passport. He wrote:
>
> > A passport is the property of the Government of Canada, and no person, strictly speaking, has a legal right to one. However, common sense dictates that a refusal to issue a passport for improper reasons or without affording the applicant procedural fairness should be judicially reviewable.
>
> [47] I note that in *Hamilton-Wentworth*, the Divisional Court had determined that the "doctrine of legitimate expectations" was not itself a basis to make government decisions justiciable. It is apparent that *Black* has changed the law in that regard and narrowed the class of non-justiciable activities to those which do not affect the rights or reasonable expectations of a person. The doctrine of legitimate expectations, as recognized in *Black*, does not create substantive rights. That is, as noted above, no one has a right to receive government subsidies generally. But, as found by the Court of Appeal, in appropriate cases the court will review executive action taken "**for improper reasons or without affording the applicant procedural fairness**."
>
> [**emphasis in original**]
>
> [emphasis added]

Tesla Motors, *supra* at paras 46 – 47 [***Tesla Motors***] [Tab 19]

98. *Tesla Motors* summarized the executive decisions not subject to judicial review: declarations of war, cancelling subsidies or signing treaties. They are decisions that do not affect a specific individual's rights.

Tesla Motors, *supra* at para 46 [Tab 19]
Black, *supra* at para 52 [Tab 15]

99. In furtherance to the above, the decision in *Hamilton-Wentworth* is distinguishable. It was decided on the basis that a Court will not interfere with policy decisions concerning funding.

100. In *Bowman v Ontario (Minister of Children, Community and Social Services)*, the Court relied on *Hamilton-Wentworth* and distinguished *Tesla* on the basis that *Tesla* involved regulatory details on how the funding program was going to operate, not the decision to cancel a program itself.

Bowman v Ontario (Minister of Children, Community and Social Services), 2019 ONSC 1064 at para 48 [***Bowman***] [Tab 23]

101. In both *Hamilton-Wentworth* and *Bowman*, the Courts held that they had no authority to quash the government's decision because overturning the decision would require the government to continue spending money.

Bowman, *supra* at para 38 [Tab 23]

102. In the case at bar, the Applicants' seek remedies requiring the Respondents to adhere to their responsibilities under *ALSA* and their common law right to procedural fairness, founded in legitimate expectation.

103. Non-justiciable decisions are narrow and narrowing. So called matters of "high policy" (non-justiciable) are few.[3] This statement of law is supported in *Tesla Motors* and in the wider jurisprudence. In the recent decision of *Mathur v Ontario*, the Ontario Superior Court of Justice held as follows:

> [121] The Applicants also submit that non-justiciable cases are rare, especially when Charter rights are involved. They cite *Chaoulli v. Québec (Attorney General)*, 2005 SCC 35, [2005] 1 S.C.R. 791, a case I will discuss further below, where the Supreme Court stated, at para. 107:

[3] "High policy" decisions are still justiciable, insofar as they relate to constitutional rights: see *Guérin v Canada (Attorney General)* at para 34. The Supreme Court of Canada has repeatedly noted the import of environmental concerns. In *British Columbia v Canadian Forest Products Ltd.*, the Court held that: "…[A]s the Court observed *in R v Hydro-Quebec*, legal measures to protect the environment 'relate to a public purpose of superordinate importance.'" In *Friends of the Oldman River Society v Canada (Minister of Transport)*, the Court held: "[t]he protection of the environment has become one of the major challenges of our time." When determining the justiciability of the Coal Policy rescission, the import placed on environmental matters generally should not be lost on this Court, particularly with clear authority permitting judicial review of high policy on Charter challenges.

British Columbia v Canadian Forest Products Ltd., [2004] SCC 38 at para 7 [Tab 24]
R v Hydro-Quebec, [1997] 3 SCR 213 [Tab 25]
Friends of the Oldman River Society v Canada (Minister of Transport), [1992] 1 SCR 3 at p 16 [Tab 26]
Guérin v. Canada (Attorney General), 2018 FC 94 at para 34 [Tab 27]

> The fact that the matter is complex, contentious or laden with social values does not mean that the courts can abdicate the responsibility vested in them by our Constitution to review legislation for Charter compliance when citizens challenge it. In such circumstances, it is the court's obligation to decide the matter.
>
> …
>
> [125] As the Federal Court of Appeal has noted, the category of non-justiciable cases is very small: *Hupacasath First Nation*, at para. 67. The court also noted that even in judicial reviews of subordinate legislation motivated by economic considerations and other difficult public interest concerns, courts will still assess the acceptability and defensibility of government decision-making, often granting the decision-maker a "very large margin of appreciation": *Hupacasath First Nation*, at para. 67.
>
> [emphasis added]

Mathur v Ontario, *supra* at paras 121 – 140 [Tab 14]
Stagg, *supra* at para 50 [Tab 18]

104. The Court in *Mathur v Ontario* ultimately concluded that Applications for judicial review are "*prima facie* justiciable".

Mathur v Ontario, *supra* at paras 140 [Tab 14]

c) The Decision to Rescind is Different from Other Non-Justiciable Actions

105. The Respondents have relied upon the Supreme Court of Canada decision in *Knight v Imperial Tobacco Canada Ltd.* as supporting their submission that the decision to rescind the Coal Policy is non-justiciable.[4] That decision is, however, distinguishable.

Knight v Imperial Tobacco Canada Ltd., 2011 SCC 42 at paras 72 – 96 [***Knight***] [Tab 28]

106. In *Knight*, the Defendant, Imperial Tobacco Canada Ltd., issued a third party proceeding against the Government of Canada, alleging that if the tobacco companies were held liable to the Plaintiffs, they were entitled to compensation from the Government of Canada for negligent misrepresentation, negligent design and failure to warn.

Knight, *supra* at para 2 [Tab 28]

107. The Court ultimately held as follows:

[4] See paragraph 42 of the Respondents' submissions.

> [95] In short, the representations on which the third-party claims rely were part and parcel of a government policy to encourage people who continued to smoke to switch to low-tar cigarettes. This was a "true" or "core" policy, in the sense of a course or principle of action that the government adopted. The government's alleged course of action was adopted at the highest level in the Canadian government, and involved social and economic considerations. Canada, on the pleadings, developed this policy out of concern for the health of Canadians and the individual and institutional costs associated with tobacco-related disease. In my view, it is plain and obvious that the alleged representations were matters of government policy, with the result that the tobacco companies' claims against Canada for negligent misrepresentation must be struck out.

Knight, *supra* at para 87 [Tab 28]

108. The decision in *Knight* is distinguishable to the case at bar. The Applicants are not seeking compensation for negligent misrepresentation; rather, they are seeking judicial review of a decision in which they had a statutory right to consultation as well as a legitimate expectation of consultation. Further, in differentiating a pure public policy decision from a discretionary decision, the Court in *Knight* held as follows:

> [88] Policy, used in this sense, is not the same thing as discretion. Discretion is concerned with whether a particular actor had a choice to act in one way or the other. Policy is a narrow subset of discretionary decisions, covering only those decisions that are based on public policy considerations, like economic, social and political considerations. Policy decisions are always discretionary, in the sense that a different policy could have been chosen. But not all discretionary decisions by government are policy decisions.
>
> [emphasis added]

Knight, *supra* at para 88 [Tab 28]

109. In the case at bar, the Coal Policy was a discretionary decision pursuant to the *Coal Conservation Act*. Ministers used their discretion granted under the Act to provide authorization to coal development in accordance with the Coal Policy.

110. Another decision deemed non-justiciable is *Tanudjaja v Canada (Attorney General)* from the Ontario Court of Appeal. In *Tanudjaja*, the Court held that the remedy sought "did not challenge a specific state action or a specific law":

> [19] I would uphold the motion judge's conclusion that this application is not justiciable. In essence, the application asserts that Canada and Ontario have given insufficient priority to issues of homelessness and inadequate housing.

…

> [27] In this case, unlike in *PHS Community Services* (where a specific state action was challenged) and *Chaoulli* (where a specific law was challenged) there is no sufficient legal component to engage the decision-making capacity of the courts.

Tanudjaja v. Canada (Attorney General), 2014 ONCA 852 at paras 19 – 36 [***Tanudjaja***] [Tab 29]

111. In the case at bar, unlike in *Tanudjaja*, there is a specific decision that is being challenged: the rescission to the Coal Policy. Further, there is sufficient legal component to the challenge. Not only was the Coal Policy enforced through the Minister's discretionary powers in the *Coal Conservation Act*, the Coal Policy was also enforced by the AER and, as will be discussed below, within various regional plans adopted under *ALSA*, the amendments of which required, *inter alia*, consultation.

112. In another recent decision, the Federal Court in *La Rose v Canada* considered the justiciability of a Statement of Claim challenging the Government of Canada's response to climate change. The Court in *La Rose* held as follows:

> [33] Policy and political questions are not a bar to judicial involvement, however, "[s]ome questions are so political that courts are incapable or unsuited to deal with them, or should not deal with them in light of the time-honoured demarcation of powers between the courts and other branches of government" (*Hupacasath* at para 62). Questions in the realm of policy and political issues must be demonstrably unsuitable for adjudication (*Sossin* at 162):
>
> > Political questions, therefore, must demonstrably be unsuitable for adjudication. These will typically involve moral, strategic, ideological, historical or policy considerations that are not susceptible to resolution through adversarial presentation of evidence or the judicial process. Justiciable questions and political questions lie at opposing ends of a jurisdiction spectrum.
>
> [34] To engage the Court's adjudicative functions, the question must be one that can be resolved by the application of law.

La Rose v. Canada, 2020 FC 1008 at paras 33 – 34 [***La Rose***] [Tab 30]
Hupacasath, *supra* at paras 59 – 70 [Tab 21]

113. The Court in *La Rose* determined that the claim was non-justiciable: "The Plaintiffs' position fails on the basis that there are some questions that are so political that the Courts

are incapable or unsuited to deal with them." This determination is distinguishable from the case at bar, given the overtly political and non-legal issues before the Court in *La Rose*.

La Rose, *supra* at para 44 [Tab 30]

d) The Decision to Rescind is Justiciable

114. The case at bar is distinguishable from others in which the courts have ultimately ruled were non-justiciable. The Applicants submit that three features of the Coal Policy rescission make that decision justiciable:

a. The Coal Policy is based in law;

b. The Coal Policy affects the Applicants; and

c. The Applicants had a legitimate expectation of consultation.

115. It is the Applicants' submission that any one of the above factors make the decision to rescind the Coal Policy justiciable. Each factor will be analyzed in turn.

i) The Coal Policy and Its Rescission are Based in Law

116. The contextual approach embedded within the test for justiciability necessitates that any analysis begin with examining whether an impugned decision is based in law, meaning whether there is a legal component to the decision that is reviewable by a court.

Highwood, *supra* at para 34 [Tab 20]

117. In *Tesla Motors*, the impugned Minister was vested with a purely discretionary authority to subsidize "specific projects the Minister considers to be of provincial significance".

Tesla Motors, *supra* at para 7 [Tab 19]

118. The discretionary power granted the Minister in *Tesla Motors* is akin to the purely discretionary power to approve or refuse coal development under the *Coal Conservation Act*.

Coal Conservation Act, *supra* at s 21 and 24 [Tab 11]
Rae, *supra* at p 124 [Tab 12]

119. In *Tesla Motors*, the Minister applied its discretion to grant funding to electric cars priced lower than $75,000.

Tesla Motors, *supra* at para 9 [Tab 19]

120. In the case at bar, the Minister applied its discretion to grant authorizations in accordance with the coal categories under the Coal Policy.

Rae, *supra* at p 124 [Tab 12]
Affidavit of Tony Mauro, *supra* at para 19
Transcript of Questioning of Michael Moroskat, *supra* at P 7 L 7 – P 13 L 4

121. In *Tesla Motors*, the Minister decided to end funding for electric cars. However, the Minister announced that it was creating a transition period to permit subsidies for certain cars. The criteria for funding excluded Tesla.

Tesla Motors, *supra* at para 11 [Tab 19]

122. The Court in *Tesla Motors* characterize the Minister's decision to rescind funding and establish a transition period as follows:

> 39 But then the cabinet or the Minister made a third decision. They actually established the terms and conditions of the electric vehicle subsidy transition. They looked at the program under the environmental regime and under the power to set terms and conditions in the *Public Transportation and Highway Improvement Act* and they designed program terms so as to include only franchised dealers and to exclude Tesla.
>
> 40 In my view, in setting the operative terms of the transition program, the government changed its role from policy-setting at a high level of abstraction to executive program administration. Cabinet descended from its high core policy role as priority-setter into the field of discretionary decision-maker under the environmental regulatory regime and discretionary term-setter under s. 118 (2) of the *Public Transportation and Highway Improvement Act*. It effectively told the Ministry to design a program to exclude from environmental subsidies non-franchise dealers i.e. Tesla. [footnote omitted] It is the legality of that decision under the *Public Transportation and Highway Improvement Act* and the applicable environmental laws that is the subject of this application.

Tesla Motors, *supra* at paras 39 – 40 [Tab 19]

123. The circumstances in *Tesla Motors* are analogous to the case at bar. The Minister directed Alberta Energy to rescind the Coal Policy. In so doing, the Minister and Alberta Energy established new terms and conditions by which the Minister's discretionary authority would

operate. Those terms included a 120-day moratorium on new coal applications and an alteration to the exercise of the Minister's discretion.

124. Potentially most damning is the Minister's June 4, 2020 correspondence to Mr. Blades. In that correspondence, the Minister:

a. Acknowledges that projects are proceeding as a result of the rescission: "As you know, a number of projects to extract and export the province's bituminous coal are either pursuing drilling exploration programs or going through the regulatory approval process"; and

b. Acknowledges consulting with the AER: "I consulted with the AER regarding your concerns and am pleased to provide you with the following information about the application review process…"

Affidavit of Macleay E Blades, *supra* at Ex 'E'

125. By re-writing the Minister's discretion, the Respondents "changed [their] role from policy setting at a high level of abstraction to executive program administration".

Tesla Motors, *supra* at para 40 [Tab 19]

126. There are additional indicia that the decision to rescind the Coal Policy is based in law.

127. The Coal Policy was enforced by the Respondents for 44 years. It was not a policy that changed each time a new government came to power[5]–rather, it was continuously enforced during its 44-year history.

128. The Coal Policy was considered by the Alberta Energy and Utilities Board (the "**EUB**") decision relating to the Cheviot Coal Project.[6] In *Cheviot*, the EUB considered an Application for an approval under section 23 of the former *Coal Conservation Act*, the same provision as section 23 in the current *Coal Conservation Act*.

Coal Conservation Act, RSA 1980, c C-14 at s 23 and 24 [Tab 31]

[5] Respondents' submissions at paragraph 45.
[6] The Applicants understand the decision was judicially reviewed and quashed on different grounds but have not been able to find record of that review.

Coal Conservation Act, *supra* at s 23 and 24 [Tab 11]

129. In considering whether to grant an approval, the EUB was required to consider the Coal Policy, holding that a "fundamental principle of the" Coal Policy was to restrict development based on the ability to reclaim any disturbed land. The EUB noted that the method by which the government chose to determine development restrictions was by application of the Coal Policy.

Cardinal River Coals Ltd. (Cheviot Coal Project), Decision 97-08 at 1.2.1, 6.1.1 and 6.1.3 [***Cheviot***] [Tab 32]

130. The EUB in *Cheviot* ultimately held that the lands considered for development "were classified under the *Coal Conservation Act* as Category 4 lands". The only relationship between the Coal Policy and the *Coal Conservation Act* is the exercise of the Minister's discretion to authorize a coal development under section 24 of the Act. That authorization is a precondition to approving a coal development.

Cheviot, *supra* at 6.1.1 [Tab 32]
Coal Conservation Act, *supra* at s 24 [Tab 11]

131. The EUB ultimately found that the Cheviot Coal Project was "consistent with the Alberta coal Development Policy" and determined that an approval was merited.

Cheviot, *supra* at 6.1.3 [Tab 32]

132. The Applicants have noted above the other methods the Coal Policy has been enforced, namely Directive 061 and the Respondents' 44 years of enforcing the statement under section 24 of the *Coal Conservation Act*. These methods are in addition to the various regional plans that have incorporated the Coal Policy, discussed further below.

133. This 44-year history of enforcement confirms that the Coal Policy is based in law. Its rescission is therefore also necessarily based in law. It is not a political decision, nor is the Court "incapable" of reviewing the government's decision to rescind the policy. By altering the exercise of the Minister's discretion, the Respondents have descended into the fray and changed their role from "from policy-setting at a high level of abstraction to executive program administration".

Tesla Motors, *supra* at para 39 [Tab 19]
La Rose, *supra* at paras 33 – 34 [Tab 30]

ii) The Decision Affects the Applicants

134. Keeping within the four corners of the test set out in *Black*, the decision to rescind the Coal Policy "affects the rights or legitimate expectations" of the Applicants. Those rights are affected in a way that is different from every other Albertan.

135. Category 2 lands now subject to development are literally in the Applicants' backyard. The project proposed by Atrum Coal Ltd. is situated on a geological formation known as Cabin Ridge; Cabin Ridge forms the backdrop to Mr. Blades's property and is situated within his grazing allotment.

Affidavit of Macleay E Blades, *supra* at Ex 'M', 'N' and 'O'

136. The Respondents have not argued that the Applicants don't have standing, likely conceding that issue.

137. There are two types of standing available to a party: private interest standing or public interest standing. In this case, the Applicants' standing is founded in private interest standing.

138. The test for private interest standing is the same for justiciability: whether a party has "a personal basis where [their] legal rights have been or are likely to be affected" [emphasis added].

Alberta (Attorney General) v Malin, 2016 ABCA 396 at paras 18 – 49 [Tab 87]

139. The supreme Court of Canada adopted the following test for private interest standing:

> A person is not interested within the meaning of the rule, unless he is likely to gain some advantage, other than the satisfaction of righting a wrong, upholding a principle or winning a contest, if his action succeeds or to suffer some disadvantage, other than a sense of grievance or a debt for costs, if his action fails.

Finlay v Canada (Minister of Finance), [1986] 2 SCR 607 at paras 17 – 22 [***Finlay***] [Tab 88]

140. In this case, there is little doubt that the Applicants would meet the threshold for standing. By analogy, the issue for which they seek standing must also be justiciable because both standing and justiciability rely on the same finding of fact: whether the issue directly

affects the party. By not contesting the Applicants' standing, the Respondents must be seen to have also conceded the issue of justiciability.

141. What is more, and an issue that will be covered further below under 'legitimate expectation', the Respondents met, discussed and consulted with Atrum Coal Ltd. prior to coming to their decision to rescind the Coal Policy.

Transcript of Questioning of Michael Moroskat, *supra* at P 64 L 7 – 13

142. The Respondents knew that rescinding the Coal Policy would directly affect Atrum Coal Ltd. They are the proponents behind the Cabin Ridge project. That is why they met with them to discuss the rescission. In so doing, the Respondents acknowledged the obvious: that the rescission also directly affects the project's opponents, in this case the Applicants. The Applicants' *inter alia* property rights are clearly affected by the rescission.

iii) The Decision Breached the Applicants' Legitimate Expectations

143. Remaining within the four corners of the test for justiciability established in *Black*, the decision to rescind the Coal Policy breached the Applicants' legitimate expectations of procedural fairness.

144. In this case, the Applicants were never consulted, their perspectives were never sought and they were never notified that a decision removing all protections over their grazing leases and adjacent landholdings was made.

Transcript of Questioning of Michael Moroskat, *supra* at P 58 L 14 – 18 and P 65 2 – 26
Affidavit of Macleay E Blades, *supra* at para 17
Affidavit of John Smith, *supra* at para 6(c)

145. By contrast, the Respondents had numerous meetings to discuss the rescission with rescission proponents, including Atrum Coal Ltd. The Respondents also took the steps of coordinating their decision to rescind with the AER.

Transcript of Questioning of Michael Moroskat, *supra* at P 64 L 7 – 13

146. The extensive consultation that went into creating the Coal Policy is an important fact militating in favour of procedural fairness in rescinding the document.

147. These facts suggest a legitimate expectation for consultation.

148. The doctrine of legitimate expectation was aptly summarized by Justice Romaine in *Calgary (City) v Alberta (Municipal Government Board)*:

> [33] [I]n *Baker v. Canada (Minister of Citizenship and Immigration)*…the Supreme Court of Canada commented on the doctrine of legitimate expectations, at para. 26:
>
> > [...] the legitimate expectations of the person challenging the decision may also determine what procedures the duty of fairness requires in given circumstances. Our Court has held that, in Canada, this doctrine is part of the doctrine of fairness or natural justice, and that it does not create substantive rights [citations omitted]. As applied in Canada, if a legitimate expectation is found to exist, this will affect the content of the duty of fairness owed to the individual or individuals affected by the decision. If the claimant has a legitimate expectation that a certain procedure will be followed, this procedure will be required by the duty of fairness: [citations omitted]. Similarly, if a claimant has a legitimate expectation that a certain result will be reached in his or her case, fairness may require more extensive procedural rights than would otherwise be accorded [citations omitted]. Nevertheless, the doctrine of legitimate expectations cannot lead to substantive rights outside the procedural domain....
>
> [34] The doctrine of legitimate expectations provides that a certain process will be followed rather than assuring a particular result. Further, in certain cases, more extensive procedural rights are afforded, however, the doctrine of legitimate expectations does not produce or deal with substantive rights. Put another way, a decision maker's discretion to reach a certain result is unfettered by the doctrine of legitimate expectations. Examples of procedural rights arising from this doctrine include the right to make representations and the right to be consulted: *Moreau-Bérubé v. New Brunswick (Judicial Council)...The City cites Edison v. Canada*…at para. 23 which confirms that legitimate expectations arise "where an individual relies on procedural norms established by past practice or published guidelines...".
>
> …
>
> [155] The legitimate expectations of the City do not give rise to a right to a particular substantive result or determination by the MGB, but rather enhanced procedural rights: *Moreau-Bérubé*, *Baker*.
>
> [emphasis added]

Calgary (City) v Alberta (Municipal Government Board), 2010 ABQB 719 at paras 33 – 35 and 154 – 157 [Tab 33]
Bowman, *supra* at paras 44(b), 46 and 48 [Tab 23]
Agraira v. Canada (Public Safety and Emergency Preparedness), 2013 SCC 36 at paras 93 – 97 [Tab 34]

149. Justice Romaine held that the City was relying on the doctrine of legitimate expectation substantively. Legitimate expectation may only be applied procedurally such that a party has a legitimate expectation that, for example, it will be consulted prior to a decision.

150. The doctrine that legitimate expectation does not create substantive rights is widely accepted. What the doctrine does permit is for a court to "review executive action taken 'for improper reasons or without affording the applicant procedural fairness.'"

Tesla Motors, *supra* at paras 46 – 47 [Tab 19]

151. Legitimate expectation applies to delegated legislative powers, such as those delegated powers under review in the case at bar. In *Apotex Inc. v Canada (Attorney General)*, the Federal Court of Appeal held as follows:

> [126] Therefore, in the absence of binding authority to the contrary, I conclude that the doctrine of legitimate expectations applies in principle to delegated legislative powers so as to create participatory rights when none would otherwise arise, provided that honouring the expectation would not breach some other legal duty, or unduly delay the enactment of regulations for which there was a demonstrably urgent need (see *R. v. Lord Chancellor's Department, ex parte Law Society* (Q.B.D. Crown Office List; June 22, 1993; CO/991/93)).
>
> [127] A court may set aside, or declare invalid, subordinate legislation made in breach of a legal duty to consult: *R v Secretary of State for Health, ex p US Tobacco International Inc*, [1992] 1 All ER 212 (Q.B.D.), at page 225. For this purpose it should not matter whether the duty arose from statute or by virtue of a promise that created a legitimate expectation of consultation…

Apotex Inc. v. Canada (Attorney General), [2000] 4 FC 264 (FCA) at paras 126 – 127 [Tab 35]
Czerwinski v Mulaner, 2007 ABQB 536 at paras 31 – 32 [Tab 36]

152. An expectation of procedural fairness may legitimately arise in one of two ways: "by an express promise made by a public authority responsible for the decision, or by a regular course of conduct that shows a well-defined practice of consultation".

Office and Professional Employees' Int'l Union et al v B.C. Hydro et al, 2004 BCSC 422 at paras 111 – 113 [Tab 37]

153. In the case at bar, the Applicants rely upon the latter in establishing their legitimate expectation of procedural fairness. Factors creating this legitimate expectation include:

a. The commitment to an "integrated review" of the coal categories in the *SSRP* and *LPHFP*;

b. The consistent 44-year enforcement of the Coal Policy;

c. The effect of the decision to rescind the Coal Policy on the Applicants;

d. The extensive consultation and review that took place in creating the Coal Policy;

e. That the grazing leases now controlled by the Appellants were represented in the Hearings which ultimately led to the Coal Policy;

f. Consultation prior to the adoption of other land use policies, such as the *Plans*; and

g. Consultation by the Respondents with other actors, including Atrum Coal Ltd. and the AER.

154. Each of these factors militate in favour of a legitimate expectation of procedural fairness on the part of the Applicants. The Respondents provided none.

e) Conclusion on Justiciability

155. The decision to rescind the Coal Policy is justiciable and therefore reviewable by this Court.

156. The scope of decisions that do not meet the threshold of justiciable is narrow and narrowing. In this instance, there are numerous bases supporting the justiciability of the decision: its legal framework, the direct effect on the Applicants and the Applicants' legitimate expectations.

Issue #2: Whether ALSA *is Applicable to the Decision*

157. The Applicants' *ALSA* claim has two components:

a. The decision to rescind the Coal Policy nullified and therefore effectively amended provisions of the Plans that adopted the Coal Policy and committed to a review of the Coal Policy; and

b. The amendments to the *SSRP* and *LPHFP* violated sections 4, 5 and 13 of *ALSA*, thereby making the decision to rescind *ultra vires* the Respondents.

158. The results of these two components are as follows:

a. The Coal Policy should be considered to remain in effect in the South Saskatchewan region because of the nature of the SSRP's references to the Coal Policy and because the Respondents lacked authority to amend those references; and

b. The amendments are *ultra vires*, notwithstanding the relevant parts of the SSRP are non-binding.

159. The Applicants submit that if *ALSA* is another basis for making the rescission justiciable.

a) LPHP

160. The *LPHP* was incorporated into the *SSRP* as follows:

> The following Integrated Resource Plans have provided resource objectives and operational guidance within their planning areas for over 30 years. These plans have represented the Government of Alberta's resource management policy for public lands and resources within the defined area and have been intended to be a guide for decision-makers. They will remain in effect until they have been reviewed for their relevance and incorporated as appropriate under the implementation strategies of this regional plan or future subregional or issue-specific plans within the region:
>
> …
>
> - Livingstone Porcupine Hills Subregional Integrated Resource Plan
>
> …
>
> Provisions of the plans that have already been incorporated into the regulatory system, as amended or replaced from time to time, will continue to provide operational guidance. Decisions on Crown lands shall be aligned with the regional plan to achieve the regional outcomes established in the plan.
>
> The Government of Alberta recognizes that a coherent planning hierarchy from regional plans, to subregional, issue-specific and local plans is necessary to ensure efficiencies, effectiveness and clarity for decisionmakers, stakeholders and Albertans. Implementation of the SSRP will involve delivering on this intent, recognizing that there are legacy plans (e.g., Integrated Resource Plans) to incorporate into new subregional or issue specific plans.

Affidavit of Macleay E Blades, *supra* at Ex 'G' p 4 – 5

161. The Applicants contend that the *LHPH* is truly incorporated into the *SSRP*. The effect of true incorporation is detailed below.

b) Differences between Binding and Non-Binding ALSA *Plans*

162. The *SSRP* states that its "Regulatory Details" section is legally binding, but that all its other parts—including the Implementation Plan—are "not intended to have binding legal effect and are statements of policy to guide the Crown, decision-makers and local government bodies..."

Affidavit of Macleay E Blades, *supra* at Ex 'G' p 8, 42 and 164

163. In its broadest sense, government "policy" refers to a generally applicable rule, principle, or objective. Under this definition, the issuance of a permit to a specific party is not a policy, because the permit itself is not generally applicable. However, the reasons for issuing the permit may include policy that was previously developed or that was developed in that permit proceeding. For example, if the permit is to emit a carcinogenic air pollutant at a specified level, subject to monitoring and other conditions, the permit may be based on a policy prescribing an acceptable level of risk, and a policy prescribing an acceptable frequency for monitoring the emission levels.

Knight, *supra* at para 87 [Tab 28]

164. Statements of government policy can occur in different types of instruments—statutes, regulations, decisions in proceedings and in other government documents.

Canada (Minister of Citizenship and Immigration) v Vavilov, 2019 SCC 65 at para 130 [***Vavilov***] [Tab 38]

Ruth Sullivan, ***Statutory Interpretation***, 3d ed (Toronto, Ontario: Irwin Law, 2016) at p 11 – 12 [***Sullivan***] [Tab 39]

165. The *ultra vires* concept is one aspect of the legally enforceable character of statutes and regulations. If a front-line decision (e.g., issuance of a permit) is subject to a statute or regulation, and the decision conflicts with the statute or regulation, a court may exercise its discretion to judicially review the decision and vacate it on *ultra vires* grounds.

166. 'Legislative policies' are clear rules of conduct enforceable like regulations. Part 3.13 of the Coal Policy is an example of this type of policy, because it contains rules clearly precluding coal exploration and development on Category 1 lands and coal development on Category 2 lands.

167. Non-binding policies, like legislative policies', can still have significant legal and practical implications. A front-line decision that fails to follow an applicable policy is indicative that the decision is 'unreasonable' or 'incorrect' and therefore might not pass judicial scrutiny. The higher the level of government official who adopted the policy, the more weight the policy has as a benchmark of the reasonableness for front-line decisions.

Vavilov, *supra* at paras 94, 130 and 303 [Tab 38]
Mathur v Ontario, *supra* at para 67 [Tab 14]
Sullivan, *supra* at p 11 – 12 [Tab 39]
Manitoba Metis Federation Inc. v. The Government of Manitoba et al., 2018 MBQB 131 at para 65 [Tab 40][7]

168. The coal categories are an example of the importance of non-binding government policy. In 44 years, the coal categories were honoured by the province's coal leasing and regulatory officials. This is true even though the coal policy is not a legally binding regulation.

169. Under subsection 13(1) of *ALSA*, a regional plan is an "expression of the public policy of the Government and therefore the Lieutenant Governor in Council has exclusive and final jurisdiction over its contents." Subsection 13(2) adds that regional plans are "legislative instruments and, for the purposes of any other enactment, are considered to be regulations."

Alberta Land Stewardship Act, SA 2009, c A-26.8 at s 13 [***ALSA***] [Tab 41]

170. Read by themselves, these provisions suggest that regional plans are legally binding. However, in the 2011 amendments to *ALSA*, the Legislature added subsection 13(2.1) which states that, "[n]otwithstanding subsection (2)," a regional plan may state which of its parts are "enforceable as law" and which parts are "statements of public policy or a direction of the Government that is not intended to have binding legal effect."

[7] The Court held that the government policy lacked clear criteria to review the challenged government decision to forego entering into funding agreements. The rationale implies that had the policy contained clear criteria, it may have been a basis to review the government's decision.

ALSA, *supra* at s 13 [Tab 41]
Tokio Marine & Nichido Insurance Company v Security National Insurance Company, 2020 ABCA 402 at para 99 [Tab 42]

171. Use of the term 'notwithstanding' in legislative drafting denotes priority: the provision containing the term 'notwithstanding' generally has priority over other provisions.

Sullivan, at p 326 [Tab 39]
Rizzo & Rizzo Shoes Ltd. (Re), [1998] 1 RCS 27 at para 21 [Tab 43]

172. The binding/non-binding distinction in subsection 13(2.1) suggests the Legislature was referring to the general distinction between policies, which are generally non-binding, and regulations, which are generally binding. Importantly, nothing in *ALSA* subsection 13(2.1) suggests that the non-binding policy portions of regional plans were meant to have less legal and practical import than any other government policy.

ALSA, *supra* at s 13 [Tab 41]
Sullivan, *supra* at p 11 – 12 [Tab 39]

173. Rather, non-binding policy portions of regional plans have more weight than other policies adopted under other acts. As noted above, under *ALSA* s. 13(1), all regional plans are "an expression of the public policy of the Government" [emphasis added]. The *Interpretation Act* sets out that references to 'government' means 'Her Majesty in right of Alberta'.

Interpretation Act, RSA 2000, c I-8 at s 28(1)(r) [Tab 44]

174. Policies contained in regional plans are government-wide policies, rather than just departmental, divisional or office policies. Similarly, subsection 13(2) states that regional plans are "legislative instruments". This is further basis of the Legislature's sense of the importance of regional plans.

ALSA, *supra* at s 13 [Tab 41]

175. Notably, the characterizations in subsection 13(1) and (2) apply, on their face, to all "regional plans". There is no exemption from those characterizations, for the portions of regional plans that are non-binding under subsection 13(2.1).

ALSA, *supra* at s 13 [Tab 41]

176. Similarly, section 62 of *ALSA* provides a process for any person to complain, to the Land Use Secretariat, that a regional plan "is not being complied with." Nowhere does this section indicate that it is inapplicable to the portions of regional plans designated as non-binding statements of policy, under section 13(2.1) of the Act. This section is yet another indication of the Legislature's view that even the policy portions of regional plans are important.

ALSA, *supra* at s 62 [Tab 41]

177. Finally, the *SSRP* itself makes it clear that its non-binding portions must still be considered by municipal and provincial regulators even though they are non-binding. This intent is shown in section 4(1) of the *SSRP's* Regulatory Details section, which requires local governments and provincial "decision-makers" to "consider" the *SSRP's* non-binding policy portions, including the Implementation Plan, when they are "carrying out any function in respect of the powers, duties and responsibilities" in the South Saskatchewan region.[8]

Affidavit of Macleay E Blades, *supra* at Ex 'G' p 8

178. The above interpretation of *ALSA* meets fundamental rules of statutory interpretation. It incorporates long standing principles that planning documents created through a consultative process, like the *Plans*, carry weight akin to "quasi constitutional documents" when they are arrived at through consultation.

Old St. Boniface Residents Assn. Inc. v. Winnipeg (City), [1990] 3 SCR 1170 at p 1207 (dissent) [Tab 45]
Reference Re Canada Assistance Plan (B.C.), [1991] 2 SCR 525 at p 561 – 564 [Tab 46]

179. It provides a purposive approach "with consideration of the legislative intent" (see also the Hansard discussion below).

Nature Conservancy of Canada v Waterton Land Trust Ltd, 2014 ABQB 303 at para 385 [Tab 47]

[8] The Regulatory Details are the binding portions of the *SSRP*. 'Decision-maker' is defined in *ALSA* as "a person who, under an enactment or regulatory instrument, has authority to grant a statutory consent, and includes a decision-making body".

ALSA, *supra* at s 2(1)(e) [Tab 41]

c) The Coal Policy in the Plans[9]

180. There are two methods by which a legal instrument can be incorporated into a document: incorporation for background purposes and incorporation by reference. The Supreme Court of Canada described the distinction as follows:

> Some documents are simply mentioned in legislative instruments; they need not be consulted before the operation of the instrument in question can be understood. Others are "incorporated by reference" in the sense that they are an integral part of the primary instrument as if reproduced therein. It is this latter type of incorporation that can be termed "true incorporation" and that potentially attracts translation obligations under s. 23.

Reference re Manitoba Language Rights, 1992 CanLII 115 (SCC), [1992] 1 SCR 212 at p 228 [Tab 48]

181. The Coal Policy is 'truly incorporated' into the *Plans* because the document needs to be consulted before the legislative instrument can be understood. Consider, for example, the following reference in the *LPHP*:

> All proposals for coal exploration and development must be processed in accordance with A Coal Development Policy for Alberta.

Affidavit of Macleay E Blades, *supra* at Ex 'F' p 26

182. When a "true incorporation" occurs, the referenced source is considered part of the legal instrument referencing it, as if the referenced source had been copied word for word into the referencing instrument. This rule is reflected in the Latin maxim: "*verba relata hoc maxime operantur per referentiam rit it eis inesse videntur* (words to which reference is made in an instrument have the same operation as if they were inserted in the instrument referring to them)."

Tsai v Atlas Anchor Systems (BC) Ltd., 2016 BCPC 406 at paras 26 – 31 [***Tsai***] [Tab 49]
R v St Lawrence Cement Inc, 2002 CanLII 45010 (ONCA) at paras 14 and 18 [***St Lawrence***] [Tab 50]
R v Sims, 2000 BCCA 437 (CanLII) at para 20 [Tab 51]

[9] This analysis is similarly applicable to the *LPHP*'s incorporation into the *SSRP*.

183. Through true incorporation, the referenced source takes on the legal character of the referencing instrument, for purposes of that instrument. The effect is to elevate "a direction or policy to the status of a law or regulation".

NOV Enerflow ULC (NOV Pressure Pumping ULC) v Enerflow Industries Inc, 2020 ABQB 347 at para 505 [Tab 52]
St Lawrence, *supra* at paras 14 and 18 [Tab 50]

184. Section 33 of the *Interpretation Act* supports this judicial rule: if an "enactment provides that another enactment of Alberta, Canada or another province or territory applies, it applies with the necessary changes and so far as it is applicable."

Interpretation Act, *supra* at s 33 [Tab 44]

185. This interpretive rule applies to references in statutes, regulations, contracts, by-laws and other legal instruments. The referenced sources do not have to have the same legal status, on their own, as the instrument referencing them.

UBC v Assn of Administrative and Prof Staff on Behalf of Bill Wong, 2006 BCCA 491 at paras 30 – 31 [Tab 53]
Tsai, *spura* at paras 26 – 31 [Tab 49]
R v Blackbird, 2003 CanLII 72340 (ON SC) at p 6 [***R v Blackbird***] [Tab 54]

186. There are two types of true incorporations. A "rolling" or "ambulatory" reference to a source is to the most current version of that source. By contrast, "fixed" or "static" references are to a specific publication of the referenced source. Absent specific wording indicating a rolling reference (e.g., "as amended from time to time"), a reference to a source is generally construed to be a fixed or static reference to that source.[10]

Cobb v Long Estate, 2017 ONCA 717 at para 118 [Tab 55]
R v Blackbird, *supra* at p 6 [Tab 54]
St Lawrence, *supra* at para 20 [Tab 50]
Mainwaring v Mainwaring, [1942] 2 DLR 377 (BCCA) at p 377 and 380 [Tab 56]

[10] Section 31 of the *Interpretation Act* creates an ambulatory presumption. That section, however, only applies to "enactments" and not to legislative tools generally.

Interpretation Act, *supra* at s 31 [Tab 44]
587901 Alberta Ltd. v. Calgary (City), 2007 ABCA 421 at paras 18 – 19 [Tab 61]

187. When one instrument incorporates a section of another instrument by reference, that referenced section remains in effect for purposes of the referencing instrument, even if the referenced section is repealed.[11]

E.A. Driedger, ***Construction of Statutes***, 1st ed (Toronto, Butterworths, 1974) at p 189 – 190 and supplement at p 23 [***Construction of Statutes***] [Tab 57]
Wilson v Albert, [1943] 3 DLR 129 (ABCA) at p 133 [***Wilson v Albert***] [Tab 58]
R v C (WJ), 2008 MBCA 11 (CanLII) at paras 26 – 37 [***R v C (WJ)***] [Tab 59]
Bow Valley Husky (Bermuda) Ltd v Saint John Shipbuilding Ltd (No. 3), 1992 CanLII 7090 (NL CA) at para 108 [***Bow Valley Husky (Bermuda) Ltd***] [Tab 60]
St Lawrence, *supra* at para 20 [Tab 50]

188. For example, if a regulation incorporates by reference a specific edition of an industry association's code of practice. The regulation's reference is still in effect even if the association repeals that edition. In other words, while the association has authority to repeal its own code, it lacks authority to repeal the regulation's reference to that code.

d) References to the Coal Policy in the Plans

189. The *SSRP* refers to the Coal Policy both directly, and indirectly (through its references to sub-regional IRPs which in turn reference the Coal Policy).

i) References to the Coal Policy in the LPHP *and* LPHFP

190. Page 61 of the *SSRP* reads as follows:

> Currently in the region, there are a number of **Integrated Resource Plans**, a number of **Public Land Use Zones**, **surface requirements** under the *Public Lands Act*; **subsurface restrictions** on sales of mineral rights; and **voluntary practices** such as integrated land management to support minimizing land disturbance. The Integrated Resource Plans will remain in effect until they have been reviewed for their relevance and incorporated as appropriate under the implementation strategies of this regional plan or future subregional or issue-specific plans within the region.
>
> [emphasis added]
>
> [**emphasis in original**]

[11] Section 36(2) of the *Interpretation Act* rebuts this rule. Section 36(2), however, only applies to references to "a repealed statute or regulation" and requires substituted provisions. In the case of the Coal Policy, no substitute has been adopted nor is the policy a "repealed statute or regulation".

Interpretation Act, *supra* at s 36 [Tab 44]

191. The reference to the Integrated Resource Plans is a true incorporation into the *SSRP*.

192. Section 10 of *ALSA* supports the submission that the Integrated Resource Plans are true incorporations into the *SSRP*. Section 10 expressly authorizes regional plans to provide for the development of sub-regional and issue-specific plans, and to authorize a "Designated Minister" to "adopt by incorporation or reference, rules, a code of practice, guidelines, best practices or any other instrument on matters described in the regional plan for the purpose of advancing or implementing an objective or policy in the regional plan." Under section 10(3), when such a sub-regional plan (or issue-specific plan or adopted source) comes into effect, it "becomes part of the regional plan that authorized it…"

ALSA, *supra* at s 10 [Tab 41]

193. Two of the *SSRP*'s sub-regional IRPs refer to the Coal Policy. At page 26, the *LPHP* states that "[a]ll proposals for coal exploration and development must be processed in accordance with" the Coal Policy. The *LPHP* lists this rule as one of three "broad resource management guideline" for minerals. The *LPHP* (p. 3) defines a "resource management guideline" as a "statement of direction which guides resource use and management action toward the achievement of resource management objectives."

Affidavit of Macleay E Blades, *supra* at Ex 'F' p 3 and 26

194. Similarly, page 19 of the Ghost River IRP lists the following, as one of several "Broad resource management objectives and guidelines": "All proposals for coal exploration and Development will be processed in accordance with A Coal Development Policy for Alberta (1976)."

Forestry, Lands, and Wildlife (1986-1993), ***Ghost River Sub-Regional Integrated Resource Plan***, (7 June 1988), online: Alberta Government <https://open.alberta.ca/dataset/f7a84ed9-612f-4f34-9dc3-99680f3d833a/resource/bdd76c75-5ed4-4ecd-b9d3-31e9f5d0b48b/download/1988-ghostriversubregionalplan-1988.pdf >. at p 19 [Tab 62]

195. The Integrated Resource Plans are true, static incorporations of the Coal Policy. Through its incorporation, the SSRP has indirectly incorporated the Coal Policy by reference.

ii) References to the Coal Policy in the SSRP

196. Page 61 of the SSRP states that the sub-regional Integrated Resource Plans will "remain in effect" pending a future "review". The *SSRP* then explains that this review:

> will include direction for key industrial sectors such as coal, oil and gas, industrial minerals and aggregates. **As part of reviewing and incorporating the Integrated Resource Plans, the government will integrate a review of the coal categories, established by the 1976 A Coal Development Policy for Alberta to confirm whether these land classifications specific to coal exploration and development should remain in place or be adjusted. The review of the coal categories will only be for the South Saskatchewan planning region. The intent is for the SSRP and implementation strategies of the regional plan or future associated subregional or issue-specific plans within the region to supersede the coal categories for the purposes of land use decisions about where coal exploration and development can and cannot occur in the planning region**.
>
> [emphasis in original]
>
> [**emphasis added**]

Affidavit of Macleay E Blades, *supra* at Ex 'G' p 61

197. This reference on page 61 has two salient aspects. First, there is a clear commitment to review the coal categories in an integrated process that includes the previously mentioned review of the Integrated Resource Plans. This is a cabinet-level commitment because it is in the *SSRP*—a regulation, approved by cabinet and considered a statement of Alberta government policy.

198. Second, the reference reflects an intention that the coal categories—as adopted in 1976—will remain in effect (for purposes of the South Saskatchewan region) pending that integrated review. This intent is implicit in the *SSRP*'s commitment to review the coal categories. This review would be pointless if the coal categories had already been rescinded before the review had started. This intent is confirmed by the stated purposes of the integrated review—to decide whether the coal categories should "remain in place or be adjusted" (not rescinded) and whether future *SSRP* implementation strategies or issue-specific plans or sub-regional Integrated Resource Plans should "supersede" the coal categories.

199. The term "remain in place" would be meaningless if the coal categories could be rescinded before the integrated review was conducted. Similarly, there would be no point determining whether issue-specific or sub-regional plans should "supersede" the coal

categories, unless the *SSRP* considered those categories as staying in effect pending their integrated review.

200. As with the *SSRP*'s reference to the sub-regional Integrated Resource Plans, the *SSRP*'s intent that the coal categories "remain in place" pending the integrated review is not simply descriptive. Rather, this intent makes sense only if it is considered a true, static incorporation of the coal categories by reference.

e) Effect of the Rescission on the SSRP*'s references to the Coal Policy*

201. If one instrument has a true, static incorporation of a second instrument by reference, that incorporation remains in effect even if the second instrument has been lawfully repealed.

Construction of Statutes, *supra* at p 189 – 190 and supplement at p 23 [Tab 57]
Wilson v Albert, *supra* at p 133 [Tab 58]
R v C (WJ), *supra* at paras 26 – 37 [Tab 59]
Bow Valley Husky (Bermuda) Ltd, *supra* at para 108 [Tab 60]
St Lawrence, *supra* at para 20 [Tab 50]

202. Applying this rule here, the coal categories should be considered to still be in effect in the South Saskatchewan region, because of the *SSRP*'s direct and indirect incorporations of the coal categories by reference (pending an integrated review that has not yet occurred). Under this rule of construction, Alberta Energy's rescission of the coal policy does not affect the *SSRP*'s incorporation of the Coal Policy by reference. This outcome is especially true given that the Respondents lack authority to amend the *SSRP*, as explained below.

f) The Respondents' Decision is Ultra Vires

203. The Applicants submit that the Coal Policy remains active within the South Saskatchewan region. In this, the Applicants would concur with the Respondents that the rescission did not amend the *Plans*. They will accordingly seek a further amendment to their Amended Originating Application to provide as a remedy sought a declaration by this Court that the coal categories remain in effect in the *SSRP*.

204. However, in the alternative, should this Court conclude that rescission also rescinded the references to the Coal Policy in the *Plans*, that decision is *ultra vires* because it was done contrary to the express requirements in *ALSA*.

205. An enactment is amended when the substance of the rule is changed. The Applicants submit that the effect of rescinding the Coal Policy amended the *Plans*. Amendments were described in *Sullivan* as follows:

> Amending legislation adds new provisions to the statute book or substitutes new provisions for existing ones. Insofar as the new provisions make substantive changes to the law, they operate as amendments rather than re-enactments.

Sullivan, *supra* at p 22 – 25 [Tab 39]

206. An example in *Sullivan* of an amendment is the act of adding the words "gender, sexual orientation" to an enumerated ground of discrimination in human rights legislation.

207. The Applicants submit that the effect of rescinding the Coal Policy in the *Plans* was to amend them. The substance of the *Plans* has now changed because:

a. The coal categories can no longer either "remain in place or be adjusted";

b. They can no longer be reviewed; and

c. Energy projects are no longer subject to the coal categories.

208. Each of the foregoing are examples of how the coal categories were incorporated into the *Plans*.

209. The Applicants submit that *ALSA* contains two express requirements before a regional plan can be amended: *who* can adopt or amend a regional plan and *how* can a regional plan be amended.

i) The Who Requirement

210. *ALSA* section 4(1) sates that the Lieutenant Governor in Council (Cabinet) "may make or amend regional plans for planning regions." No other provision of *ALSA* authorizes anyone

other than cabinet to amend a regional plan or authorizes cabinet to delegate its amendment authority to anyone else.[12]

ALSA, *supra* at s 4 [Tab 41]

211. Cabinet has sole authority to amend regional plans. This is confirmed by section 13(1), which states: a regional plan is an "expression of the public policy of the Government and therefore" cabinet has "exclusive and final jurisdiction over its contents". This section's reference to cabinet's "exclusive" authority suggests that cabinet cannot even delegate its authority to adopt and amend regional plans.[13]

ALSA, *supra* at s 13 [Tab 41]

ii) The How Requirement

212. *ALSA* has several requirements for how a regional plan can be amended. Under section 5 of the Act, before a regional plan can be amended, the Stewardship Minister must ensure that "appropriate consultation" on a proposed amendment has occurred and must provide cabinet with a report of the consultation, and the proposed amendment must be tabled before the Legislature.

ALSA, *supra* at s 5 [Tab 41]

g) ALSA*'s Amendment Requirements are Binding, Even for Amendments to Non-Binding Portions of Regional Plans*

213. If a single Minister amended a regional plan without conducting public consultation, the Minister's actions would be *ultra vires ALSA*. First, they lack the express authority to amend. Second, they failed to abide by the *inter alia* consultation requirement.

---

[12] *ALSA* section 8(2)(m)(i) allows a regional plan to delegate authority under the plan "except authority … to make a regional plan or amend a regional plan…" *ALSA* sections 26, 52, and 53 enable cabinet to delegate functions under specific sections of the act to the Stewardship Minister, but none of those functions include adopting or amending a regional plan.

ALSA, *supra* at s 8, 26, 52 and 53 [Tab 41]

[13] Section 21(2) of the *Interpretation Act* states that statutory words "empowering a person to do something" include "a person acting for that person or appointed to act in the office" and that person's "deputy or a person appointed as that person's acting deputy". It is unclear whether this section gives cabinet authority to delegate its amendment power under *ALSA* section 4(1). However, even if it does, there is no indication that the Respondents were "acting for cabinet" or otherwise appointed by cabinet to act for it.

Interpretation Act, *supra* at s 21(2) [Tab 44]

52

214. *ALSA* is binding even if the regional plan's contents that were amended are non-binding policy under *ALSA* subsection 13(2.1). The *ALSA* requirements in ss. 4, 5 and 13(1) apply, on their face, to all parts of all regional plans. Nowhere do these requirements distinguish between parts of regional plans that are designated as binding and parts that are non-binding, under section 13(2.1) of the Act.

215. A plain reading of these sections suggests that only Cabinet can amend the policy portions of regional plans and only following the consultation requirements in those sections and introduction to the Legislature.

216. There is a significant distinction between the *ALSA* requirements for cabinet approval and consultation, which are binding, and the content of regional plans, some of which can be non-binding. This distinction is meaningful because, as with policies generally, even non-binding parts of regional plans matter (discussed above). This is especially true for non-binding parts of regional plans given that, as discussed above, they are policy expressions of the entire provincial government and are "legislative instruments" and "regulations" for purposes of other enactments.

ALSA, *supra* at s 13 [Tab 41]

217. The cabinet approval requirements in sections 4 and 13 were in the original version of *ALSA*, but not the consultation requirements.

Alberta Land Stewardship Amendment Act, 2011, SA 2011, c 9 at s 5 and 10 [Tab 89]
Alberta Land Stewardship Act, SA 2009, c A-26.8 (amended May 13, 2011) at s 1, 4, 5 and 13 [Tab 90]

218. The Hansard debates on the 2011 *ALSA* amendments indicate that there was considerable public distrust and dissatisfaction with the top-down approach reflected in these provisions. In response, the Legislature retained the cabinet-level approval, but added the public consultation process in a new version of section 5. There do not appear to be any Hansard statements addressing the interplay of those consultation requirements and the non-binding policy features enabled by new subsection 13(2.1).

Alberta, Legislative Assembly, ***Hansard***, 27th Leg, 4th Sess, (March 8 – May 10, 2011), at 252-53 (Mason), 882 (Anderson), 883-84 (Taylor), 879 (MacDonald), 912 (Swan), 914-15 (Hinman), 921 (Blakeman), 923 (Kang), 924 (Blakeman), 932 (Hinman), 939-40 (Notley) and 946 (Hinman), 1073 (Kang), 1077-78 (Hinman), 1079-80 (Anderson), and 1082 (Notley)
SA 2011, c 9, s 5 [Tab 63]

219. However, the Hansard debates have numerous statements attesting to the importance of the new consultation requirements. The comments of Minister Knight, Sustainable Resource Minister at the time, are noteworthy.

220. Minister Knight acknowledged the "concern" that a regional plan could be "established without consultation" but he assured that, under Bill 10, "[b]efore a plan or an amendment is made…that consultation is most certainly required. So, there's a legal requirement for consultation." He added later that, under Bill 10, *ALSA*:

> [M]ost certainly creates some new checks and balances for cabinet, and it starts with the requirement to consult. It moves into an era, I think, where we'll be placing draft plans before the Legislative Assembly before they can be approved by the cabinet.

Alberta, Legislative Assembly, ***Hansard***, 27th Leg, 4th Sess, (March 8 – May 10, 2011), at 248, ibid at 251 (Berger), 878 (Knight), 911 (Danyluk), 917 (Ouelette), 938-39 (Campbell), and 1072 (Chase) [Tab 63]

221. These Hansard statements, and the Legislature's insistence on retaining the cabinet-level approval element, suggest that courts should be especially careful to avoid construing them in a way that renders them meaningless or that reduces their applicability. Treating these requirements as optional, for amendments to non-binding portions of regional plans, would render these *ALSA* requirements meaningless.

222. If *ALSA*'s "who and how" requirements were inapplicable to the non-binding parts of a regional plan then any provincial Minister (or possibly any assistant deputy minister) could, without conducting any consultation, unilaterally delete the entire text of the *SSRP*, except the *SSRP*'s Regulatory Details section. This scenario flies in the face of cabinet's "exclusive jurisdiction" over regional plans, as provided in *ALSA* sections 4 and 13(1), and the above-noted Hansard statements stressing the importance of the consultation requirements in *ALSA* section 5.

223. By contrast, and in response to the Respondents' submissions, enforcing these requirements would not render *ALSA* section 13(2.1) meaningless, because that section relates only to the content of regional plans; it does not purport to address who can adopt and amend that content and the consultation procedures that apply when it is amended.

i) Other Noteworthy Amendments to ALSA

224. In addition to the foregoing, Bill 10 amended *ALSA* by adding subsection 1(1) as the first provision in the Act's purpose clause.

225. The current iteration of the purpose clause outlines the following:

a. "The Government must respect the property and other rights of individuals and must not infringe those rights except with due process of law";

b. "To provide a means to plan for the future";

c. "To create legislation and policy that enable sustainable development"; and

d. To co-ordinate and given directions concerning, *inter alia*, environmental matters.

226. Purpose statements are fundamental to properly interpreting a statute:

> Like preambles, purpose statements reveal the purpose of legislation and draw attention to the principles and policies that should inform the exercise of discretion conferred by the Act. However, unlike preambles, purpose statements are set out in the body of the statute as a numbered provision (or part of a numbered provision), and they unquestionably form an integral part of the legislation in which they appear. They are to be relied on in every interpretive exercise.
>
> [emphasis added]

Sullivan, *supra* at p 165 – 167 [Tab 39]

227. The Respondents' ask this Court to interpret *ALSA* and the *Plans* in a manner that is contradictory to *ALSA*'s express purpose. The Coal Policy is the essence of long-term planning. Ignoring the *Plans* and rescinding the Coal Policy disregards the Applicants' property rights, both their real property and their grazing leases.

228. The Coal Policy had a fundamental role in the *Plans*. Its inclusion in the *Plans* was not by accident and ignoring its role in interpreting the *Plans* is contrary to the express purposes of *ALSA*.

h) Conclusion on ALSA*'s Applicability*

229. As a legislative instrument and a true incorporation, the Coal Policy is an integral piece to each of the *Plans*. Its unqualified rescission was *ultra vires* the Respondents because:

a. They failed to comply with the legislated requirements for amendments in *ALSA*; and

b. They do not have the delegated authority to amend the *Plans*.

230. The Hansard extracts add further weight to the Applicants' submissions in this regard. *ALSA* was meant to include the citizens of Alberta in any decision regarding regional plans. The Respondents breached their statutory obligations by running roughshod over the Legislature's intent.

231. Finally, this analysis is just as applicable to the non-binding portions of the *Plans* as it is to the binding portions. Any suggestion that the Legislature intended to allow a single Minister to amend an entire non-binding regional plan is erroneous.

Issue #3: Whether Alberta Energy had the Unilateral Authority to the Make the Decision

232. As noted above under Issue #2, the Respondents did not have the authority under *ALSA* to amend the *Plans*.

233. Even if *ALSA* is inapplicable, the Respondents still did not have the unilateral authority to rescind the Coal Policy.

234. When the Respondents rescinded the Coal Policy, they communicated that decision to the AER. The AER responded by rescinding Directive 061.

235. When the Respondents communicated their decision to the AER, they did so with the purpose of "ensuring the work of the [AER] is consistent with the programs, policies and work of the Government".

Responsible Energy Development Act, SA 2012 c R-17.3 at s 1(n) and 67 [***REDA***] [Tab 64]

236. If the purpose of rescinding the coal policy was to remove the applicability of the coal categories at the AER, then the decision to rescind was made subject to section 67 of *REDA*.

237. Under section 67 of the *Responsible Energy Development Act*, the "Minister" has the authority to "give directions" to the AER.

REDA, *supra* at s 1(n) and 67 [Tab 64]
Government Organization Act, RSA 2000, c G-10 at s 16 [***GOA***] [Tab 65]
Designation and Transfer of Responsibility Regulation, Alta Reg 44/2019 at s 9(3)(a) [Tab 66]

239. "Minister" in *REDA* incorporates section 16 of the *GOA*. Section 16(4) of the *GOA* reads:

> (4) Two or more Ministers may be given common responsibility for the same Act, and in that case any reference in the Act or a regulation under that Act to a Minister, the Minister's deputy or the Minister's department is to be read as a reference to any of those Ministers and their deputies and departments.

GOA, *supra* at s 16(4) [Tab 65]

240. In their submissions, the Respondents accept that directions given under section 67 need to be given "jointly with the Minister of Environment and Parks"[14]

241. At this stage, the nexus between the AER and the decision to rescind is unknown due to the unavailability of the record.

242. More importantly, in the case at bar, there is no basis to suggest that the Respondents acted jointly with the Minister of Environment and Parks. The decision to rescind was issued by Alberta Energy and the decision to direct Alberta Energy to rescind was issued by the Minister of Energy.

243. The evidence before this Court is that the Coal Policy was within the exclusive purview of the Minister of Environment and Parks. The Coal Policy was adopted due to the work done by the Authority, which was under the purview of the Department of Environment and the Minister of Environment at the time.

[14] Respondents' submissions at paragraph 31.

244. Whether the Minister of Energy may then issue a direction that fell within the exclusive purview of the Minister of Environment and Parks without consulting him or without his authorization is a justiciable issue that should not be decided without the benefit of a full and complete record.

245. Giorilyn Bruno noted that section 67 of *REDA* "leaves open significant questions about the scope, legal status, and procedural requirements of directives issued under section 67".

Giorilyn Bruno, ***Section 67 of the Responsible Energy Development Act: Seeking a Balance Between Independence and Accountability***, online: Alberta Law Review <https://www.albertalawreview.com/index.php/ALR/article/view/290/288>. at p 865 [Tab 67]

246. In this case, the direction issued to the AER appears designed to bring the AER into conformity with the government's decision to rescind. What is not clear, based on the current state of the record, is whether:

a. The decision to rescind was for the purposes of directing the AER to rescind mention of the coal categories in Directive 061;

b. The Minister of Environment and Parks had any participation in rescinding the Coal Policy or directing the AER; and

c. The Minister of Energy can rescind the Coal Policy without consulting the Minister of Environment and Parks.

247. One of the undertakings requested was that the Respondents provide the correspondence between them and the AER, as that correspondence is referenced in the Minister's decision. The Applicants submit that this correspondence is potentially a further indication of direction being provided the AER under section 67. A complete record is required in order to properly adjudicate this issue and the Applicants reserve the right to further amend the Amended Originating Application to allege failed compliance with section 67.

248. The Applicants submit that the Respondents acted without jurisdiction in rescinding the Coal Policy. Under section 67 of *REDA*, the Minister of Environment and Parks ought to have been part of the decision.

Issue #4: Test for Summary Dismissal and Its Applicability to the Respondents' Application

249. The foregoing sets out the Applicants' bases for its claim that the Coal Policy ought to be restored and the decision to rescind ought to be quashed.

250. In assessing whether any of the aforementioned grounds merit summary dismissal, this Court is required to consider a number of factors, including the overall merit of the Applicants' claims.

a) Standard of Review

251. The Applicants' Judicial Review Application is proceeding on procedural and substantive grounds; i.e. that the procedure used in making the decision failed to meet the requirements of transparency, fairness and consultation with all affected parties that would be expected in the circumstances of the rescission of the Coal Policy. The correctness/reasonableness dichotomy does not necessarily apply to procedural fairness. If a breach of procedural fairness exists, the decision will be set aside. Questions of *vires* arise that are jurisdictional in nature. The reasonableness standard of review does not empower statutory delegates to expand their powers Where a statutory delegate lacks the authority to make a decision that decision will necessarily be unreasonable.

252. The Applicants submit that the appropriate standard of review for procedural fairness is akin to correctness as are questions of *vires*. Any presumption of reasonableness concerning the merits of the decision is rebutted in the within case. Even on a reasonableness standard if a substantive decision is reached on an improper basis the decision cannot stand. This said the decision to rescind the Coal Policy also lacks the transparency, justifiability and intelligibility required by law.

i) Procedural Fairness

253. As your Lordship noted in *Calgary (City) v Renfrew Chrysler Inc*, the standard of review on questions of procedural fairness is "whether the conduct of the tribunal having regard to all of the circumstances, conformed to the standards expected". In this respect, either the procedure selected conformed to the standards expected, or it did not:

[20] Procedural fairness is not subject to assessment under the correctness versus reasonableness dichotomy discussed in *Dunsmuir v New Brunswick*, 2008 S.C.R. 190. Instead, the issue is whether the conduct of the tribunal having regard to all of the circumstances, conformed to the standards expected. In *Thomas v Alberta (Transportation and Safety Board*, 2003 ABCA 256 (Thomas) Paperny JA discussed the flexible nature of that standard, as follows:

> 61. The content of the duty of fairness is flexible and variable depending upon the context of the particular statute involved and the rights, privileges or interests affected. "[T]he purpose of the participatory rights contained within the duty is to ensure that administrative decisions are made using a fair and open procedure, appropriate to the decision being made and its statutory, institutional and social context, with an opportunity for those affected to put forward their views and evidence fully and have them considered by the decision-maker." *Baker v Canada (Minister of Citizenship and Immigration)*, 1999 CanLII 699 (SCC), [1999] 2 S.C.R. 817 at para 22.
>
> 62. The several criteria to determine what procedural rights the duty of fairness requires in the circumstances of the operation of this civil law program, as set out in *Baker* at paras. 23-28, include: (1) the nature of the decision being made and process followed in making it; (2) the nature of the statutory scheme and the terms of the statute pursuant to which the body operates; (3) the importance of the decision to the individual or individuals affected; (4) the legitimate expectations of the person challenging the decision; (5) the choices of procedure made by the agency itself. The list is not exhaustive.
>
> [emphasis added]

Calgary (City) v Renfrew Chrysler Inc, 2017 ABQB 197 at para 20 [Tab 68]
Vavilov, *supra* at para 23 [Tab 38]

254. So long as the decision to rescind is justiciable, the Applicants are owed a duty of procedural fairness. As noted in *Baker v Canada (Minister of Citizenship and Immigration)*, "the fact that a decision is administrative and affects 'the rights, privileges or interests of an individual' is sufficient to trigger the application of the duty of procedural fairness."

Baker v Canada (Minister of Citizenship and Immigration), [1999] 2 SCR 817 at para 20 [Tab 69]

255. In this case, the Respondents have acknowledged that no procedural fairness was provided to the Applicants on the basis no duty of fairness was owed.

256. As a result of the foregoing, conducting a *Baker* analysis into the extent of procedural fairness owed to the Applicants is unnecessary. If a duty is owed, then the Respondents have breached that duty.

257. In the alternative, and should this Court deem it necessary to conduct a *Baker* analysis, the Applicants submit as follows.

258. An inquiry into procedural fairness is contextual in nature. An inquiry into procedural fairness is "eminently variable, inherently flexible and context-specific" informed by the non-exhaustive list of factors identified in *Baker.*

Vavilov, *supra* at para 77 [Tab 38]

259. In the within matter the Respondents embark on what appears to be an extensive consultation process with the proponents of coal development. That choice of procedure by the Respondents, which also excluded any consultation whatsoever with the Applicants, goes beyond being inherently unfair bordering on egregious. The very individuals have made a livelihood on lands protected by the Coal Policy were give no notice and no opportunity to be heard.

Tesla, *supra* at para 63 – 64 [Tab 19]

260. The nature of the statutory scheme provided for in *ALSA*, inclusive of the regional plans, calls out for consultation with all stakeholders before amendments are made. Similar to the extensive consultation undertaken with the land owners and grazing lessees in the adoption of the Coal Policy, the Applicants had a legitimate expectation not only that they would be consulted, but also that if the Respondents chose to consult, as they appeared to have, it would not have been one-sided. The Applicants are the very group of persons whose property rights are directly impacted in the within case and were owed a duty of fairness.

ii) Standard of Review of the Decision

261. The Applicants have alleged that the decision to rescind ought to be quashed on its merits. The standard of review applicable to the Respondents' decision is correctness:

> [6] In my view, no deference is owed to the Minister as to the interpretation of the relevant provisions of the SARA or of the *Fisheries Act*. The Minister's interpretation of the Supreme Court's most recent pronouncements is erroneous as it fails to consider the context in which they were developed and the reasons which may warrant deference to an administrative tribunal when it interprets its enabling statute. The reasonableness standard of review does not apply to the interpretation of a statute by a minister responsible for its implementation unless Parliament has provided otherwise. I thus conclude – as did the Federal Court judge in this case – that where an application for judicial review of a decision as to the implementation of the SARA is based on an allegation that the Minister has misinterpreted a provision of the SARA – or of the *Fisheries Act* as it relates to the SARA – the Minister's interpretation must be reviewed on a standard of correctness. The courts owe no deference to the Minister in that respect.

Canada (Fisheries and Oceans) v. David Suzuki Foundation, 2012 FCA 40 at para 6 [***Georgia Straight***] [Tab 70]
Environmental Defence Canada v. Canada (Fisheries and Oceans), 2009 FC 878 at para 31 [Tab 71]

262. The recent Supreme Court of Canada decision in *Canada (Minister of Citizenship and Immigration) v Vavilov* does not change that correctness is the appropriate standard of review. First, the Court noted that the presumption towards reasonableness is rebuttable:

> [17] The presumption of reasonableness review can be rebutted in two types of situations...The second situation in which the presumption of reasonableness review will be rebutted is where the rule of law requires that the standard of correctness be applied. This will be the case for certain categories of questions, namely constitutional questions, general questions of law of central importance to the legal system as a whole and questions related to the jurisdictional boundaries between two or more administrative bodies. The general rule of reasonableness review, when coupled with these limited exceptions, offers a comprehensive approach to determining the applicable standard of review. As a result, it is no longer necessary for courts to engage in a "contextual inquiry" (*CHRC*, at paras. 45-47, see also *Dunsmuir*, at paras. 62-64; *McLean*, at para. 22) in order to identify the appropriate standard.

Vavilov, *supra* at para 17 [Tab 38]

263. Whether an issue on judicial review is a general question of law "both of central importance to the legal system as a whole and outside the adjudicator's specialized area of expertise" remains a basis for rebutting the presumption in favour of a reasonableness standard.

Vavilov, *supra* at paras 58 – 62 [Tab 38]

264. Questions of law of general importance are before this Court. They include:

a. Whether non-binding portions of regional plans are subject to *ALSA* requirements;

b. Whether subsections 13(1) and 15(3) of *ALSA* preclude this Court's jurisdiction to review decisions made under *ALSA*; and

c. Whether the Respondents had the authority to rescind the Coal Policy or otherwise effectively amend *ALSA*.

265. The Court noted that one key reason in favour of a presumption towards reasonableness is the "expertise" of administrative decision makers. As noted by the Court in *Georgia Straight*, the Respondents have no specialized expertise to make the decision to rescind the Coal Policy and they have no specialized expertise to answer the aforementioned questions.

Vavilov, *supra* at para 27 [Tab 38]
Georgia Straight, *supra* at para 6 [Tab 70]

266. Additionally, the issues before this court call into question the Respondents' jurisdiction to rescind the Coal Policy. The jurisdictional question arising requires the correctness standard because "the rule of law cannot tolerate conflicting orders and proceedings where they result in a true operational conflict between two administrative bodies, pulling a party in two different and incompatible directions". In this case, the issue of whether the Respondents properly overtook the jurisdiction of another Ministry (Parks and Environment) is a question of pure jurisdiction.

Vavilov, *supra* at paras 63 – 68 [Tab 38]

267. Finally, the reasons provided by the Respondents do not meet the standard articulated in *Vavilov*. The Court noted that:

> [98] …deference under the reasonableness standard is best given effect when administrative decision makers provide intelligible and transparent justification for their decisions, and when courts ground their review of the decision in the reasons provided": para. 54. Where a decision maker's rationale for an essential element of the decision is not addressed in the reasons and cannot be inferred from the record, the decision will generally fail to meet the requisite standard of justification, transparency and intelligibility.

Vavilov, *supra* at para 98 [Tab 38]

268. Vavilov also speaks to judicial review in the absence of reasons. A reviewing court should look to the record as a whole, which may allow the Court to discern the rationality for a decision:

> [137] … Conversely, even without reasons, it is possible for the record and the context to reveal that a decision was made on the basis of an improper motive or for another impermissible reason …
>
> …
>
> [138] … But it is perhaps inevitable that without reasons, the analysis will then focus on the outcome rather than the decision maker's reasoning process. This does not mean that reasonableness review is less robust in such circumstances, only that it takes a different shape.

Vavilov, *supra* at paras 137 – 138 [Tab 38]

269. Absent the full record it is submitted the Court should not entertain either of the Respondents' applications.

270. In the case at bar, the reasons provided by either decision maker leave much to the imagination. In the case of Alberta Energy, the single paragraph appears to base the decision on the apparent fact that the Coal Policy is somehow no longer required. This was contradicted by the Minister in her decision, which confirmed there will be gaps due to the rescission.

271. In the case of the Minister's decision to direct the rescission of the policy, there is no discussion on why the Minister decided to direct the rescission in the absence of any procedural fairness to those directly affected by her decision, namely the Applicants.

272. The reasons also suffer from a lack of transparency. As noted above, the reasons were released on the Friday of May long weekend in the middle of a global pandemic without notice to any affected party.

273. In short, the reasons do not meet the standard established by *Vavilov*, the result of which is that: "where reasons are provided but they fail to provide a transparent and intelligible justification as explained above, the decision will be unreasonable".

Vavilov, *supra* at para 136 [Tab 38]

274. The correct standard applicable to the merits of the decision to rescind is correctness. However, the Applicants note that even on a reasonableness standard, the Respondents failure to consider a subregional plan would be unreasonable following the regional plan's express incorporation of the subregional plan.

Fort McKay First Nation v Prosper Petroleum Ltd, 2020 ABCA 163 at paras 59 – 61 [Tab 72]

b) Role of the Stewardship Commissioner

275. The Respondents have relied upon section 15 of *ALSA* to submit that this Court lacks the jurisdiction to judicially review any decision related to *ALSA*. Insofar as that is the position articulated by the Respondents, it is unconstitutional.

Crevier v Attorney General of Quebec, [1981] 2 SCR 220 at p 236 [Tab 73]
Dunsmuir v New Brunswick, 2008 SCC 9 at paras 31 and 52 [Tab 74]
Capilano, *supra* at para 14 [Tab 1]

276. The requirement to obey the law extends to the highest reaches of government and no legislation can be shielded from judicial review. Devlin J. of this Court succinctly summarized the law as follows:

> [55] Elizabeth and the MSGC argue that section 245 absolutely precludes the Applicant taxpayers from challenging the legality of the Property Tax Bylaw, even for non-compliance with mandatory pre-conditions imposed by the enabling legislation. This interpretation asks what the legislature cannot give, namely insulation from judicial review of the basic legality of executive or legislative action. As the Supreme Court of Canada has commented:
>
> > The legislative branch of government cannot remove the judiciary's power to review actions and decisions of administrative bodies for compliance with the constitutional capacities of the government. Even a privative clause, which provides a strong indication of legislative intent, cannot be determinative in this respect (*Executors of the Woodward Estate v. Minister of Finance*, [1973] S.C.R. 120, at p. 127). The inherent power of superior courts to review administrative action and ensure that it does not exceed its jurisdiction stems from the judicature provisions in ss. 96 to 101 of the *Constitution Act, 1867*...: *Dunsmuir v New Brunswick*, 2008 SCC 9 at para 31.
>
> [56] Simply put, the Superior Courts always retain the constitutional power and obligation to ensure the foundational lawfulness of governmental actions. No legislation can abrogate this authority: *Crevier v Québec (Attorney General)*, [1981] 2 SCR 220 at 234-38; *Canada (Canadian Human Rights Commission) v Canada (Attorney General)*, 2018 SCC 31 at para 40; *Canada (Minister of Citizenship and Immigration) v Vavilov*, 2019 SCC 65 ["*Vavilov*"] at para 24.

[57] Even if section 245 were interpreted as erecting an absolute bar on parties such as the Applicants from challenging the lawfulness of bylaws which impact them, constitutionally it cannot have this effect. The Supreme Court of Canada has repeatedly made clear that:

> In the presence of a full privative clause, judicial review exists not by reason of the wording of the statute (which is, of course, fully preclusive) but because as a matter of constitutional law judicial review cannot be ousted completely...: *United Brotherhood of Carpenters and Joiners of America, Local 579 v Bradco Construction Ltd*, [1993] 2 SCR 316 at 333.

[58] The rationale underlying the courts' abiding jurisdiction to review state acts for foundational lawfulness was well-articulated by Stratas JA in *Fisher-Tennant v Canada (Minister of Citizenship and Immigration)*, 2018 FCA 132 at paras 23-24, where he explained that:

> 23 "L'etat, c'est moi" and "trust us, we got it right" have no place in our democracy. In our system of governance, all holders of public power, even the most powerful of them--the Governor-General, the Prime Minister, Ministers, the Cabinet, Chief Justices and puisne judges, Deputy Ministers, and so on--must obey the law: Reference re Secession of Quebec, [1998] 2 S.C.R. 217, 161 D.L.R. (4th) 385; United States v. Nixon, 418 U.S. 683 (1974); Marbury v. Madison, 5 U.S. 137 (1803); Magna Carta (1215), art. 39. From this, just as night follows day, two corollaries must follow. First, there must be an umpire who can meaningfully assess whether the law has been obeyed and grant appropriate relief. Second, both the umpire and the assessment must be fully independent from the body being reviewed...
>
> 24 Tyranny, despotism and abuse can come in many forms, sizes, and motivations: major and minor, large and small, sometimes clothed in good intentions, sometimes not. Over centuries of experience, we have learned that all are nevertheless the same: all are pernicious. Thus, we insist that all who exercise public power--no matter how lofty, no matter how important--must be subject to meaningful and fully independent review and accountability.

[59] Irrespective of the interpretation given it, section 245 of the *MSA* cannot have the effect of ousting this Court's jurisdiction to review a bylaw enacted under its delegated authority for compliance with the legal preconditions permitting that authority to flow-through to the delegate. Therefore, section 245 cannot bar this Application or deprive the Applicants of standing to bring it, irrespective of the interpretation given it.

Canadian Natural Resources Ltd. v Elizabeth Métis Settlement, 2020 ABQB 210 at paras 56 – 59 [Tab 75]

Fisher-Tennant v Canada (Minister of Citizenship and Immigration), 2018 FCA 132 at paras 23 – 24 [Tab 76]

Vavilov, *supra* at para 24 [Tab 38]

277. The Applicants will therefore not proceed with an analysis into whether this Court does not have the authority to review the Respondents compliance with *ALSA* because the Legislature is presumed to act within its constitutional authority.[15]

Sullivan, *supra* at p 307 – 310 [Tab 39]

278. The Applicants submit that, if constitutional, section 15 of *ALSA* is at most a privative clause. The Court in *Vavilov* held that because of the presumption towards reasonableness, "privative clauses serve no independent or additional function in identifying the standard of review". This is likely because there is only one reasonableness standard.

Vavilov, *supra* at paras 49 and 88 – 90 [Tab 38]

279. The role of the Stewardship Commissioner in section 15 bears mention. The proposed intervenor, Backcountry Hunters and Anglers, issued a complaint to the commissioner. The complaint was based upon the same grounds articulated in the present matter.

Affidavit of Neil Keown, sworn December 14, 2020 at paras 47 – 48 [Tab 77]

280. The Stewardship Commissioner has since issued a decision refusing jurisdiction over the complaint. The commissioner acted properly given the Applicants' concerns extend beyond issues relating to *ALSA*.

Decision of Stewardship Commissioner, December 22, 2020 [Tab 78]

281. Further, a review of section 15 of *ALSA* indicates that the section is intended to deal with operational or compliance aspects of *ALSA* and provide a right of complaint to the Stewardship Commissioner on such matters. It could never have been the intent that section 15 was to foreclose review by the Court for matters of *vires*, legality and interpretation of legislative authority.

---

[15] The Respondents have cited the Honourable Madam Jutsice Hunt McDonald's decision in *Keller v Municipal District of Bighorn No. 8* in supporting their submission that section 15 disposes of a court's ability to consider decisions under *ALSA*. The Applicants submit that her Ladyship's decision is incorrect insofar as it proposes to remove this Court's constitutional responsibility to review government acts. However, the decision is also distinguishable: the decision concerns the impact of conservation tools (such as transfer development credits) on the validity of municipal bylaws; there were no regional plans in existence at the time her Ladyship's decision was made; and the section 15 analysis was limited in scope. Finally, the section 15 analysis was *obiter*, as the decision was made on other grounds.

Keller v Municipal District of Bighorn No. 8, 2010 ABQB 362 [Tab 79]

c) Whether the Respondents Have Met the Test for Summary Adjudication

282. The Applicants advance the following grounds for judicial review: that the decision to rescind the Coal Policy was:

a. Unreasonable/incorrect on its merits;

b. *Ultra vires* the Respondents by operation of *ALSA*;

c. *Ultra vires* the Respondents by operation of *REDA*; and

d. Procedural unfair to the Applicants and breached the Applicants' legitimate expectation of procedural fairness.

283. The Alberta Court of Appeal articulated the following test for summary adjudication:

> [47] The proper approach to summary dispositions, based on the *Hryniak v Mauldin* test, should follow the core principles relating to summary dispositions, the standard of proof, the record, and fairness. The test must be predictable, consistent, and fair to both parties. The procedure and the outcome must be just, appropriate, and reasonable. The key considerations are:
>
> > a) Having regard to the state of the record and the issues, is it possible to fairly resolve the dispute on a summary basis, or do uncertainties in the facts, the record or the law reveal a genuine issue requiring a trial?
> >
> > b) Has the moving party met the burden on it to show that there is either "no merit" or "no defence" and that there is no genuine issue requiring a trial? At a threshold level the facts of the case must be proven on a balance of probabilities or the application will fail, but mere establishment of the facts to that standard is not a proxy for summary adjudication.
> >
> > c) If the moving party has met its burden, the resisting party must put its best foot forward and demonstrate from the record that there is a genuine issue requiring a trial. This can occur by challenging the moving party's case, by identifying a positive defence, by showing that a fair and just summary disposition is not realistic, or by otherwise demonstrating that there is a genuine issue requiring a trial. If there is a genuine issue requiring a trial, summary disposition is not available.
> >
> > d) In any event, the presiding judge must be left with sufficient confidence in the state of the record such that he or she is prepared to exercise the judicial discretion to summarily resolve the dispute.

Weir-Jones Technical Services Incorporated v Purolator Courier Ltd, 2019 ABCA 49 at para 47 [***Weir-Jones***] [Tab 80]

284. Two out of the four considerations outlined by the Court in *Weir-Jones* require a court to satisfy itself that it can confidently summarily adjudicate a matter given the record before it.

285. In this case, there is no record from the Respondents. This alone is grounds for refusing the Application, particularly since the Respondents have attempted to handcuff the Applicants' ability to respond by cherry-picking the record through Mr. Moroskat's Affidavit.

Warman v Law Society of Alberta, 2015 ABCA 368 at para 8 [Tab 81]
LNR v Mountview Pharma Corp, 2017 ABQB 730 at para 38 [Tab 82]

286. The only documents produced by the Respondents were selected from the record and sworn into Mr. Moroskat's Affidavit. Those documents are the two decisions from the Respondents.

287. There are instances when the dispute is "of such a nature that the parties must be allowed to access every procedural stage that the civil process offers and make unlimited use of it to ensure that justice is done. Disputes on complex material facts and those in which one or both of the parties do not abide by the rules or court orders are two obvious examples of this type of dispute." This is one such dispute.

Hannam v Medicine Hat School District No. 76, 2020 ABCA 343 at para 183 [Tab 83]

288. As at the date of this brief, the Respondents still have not furnished the undertakings from Mr. Moroskat's Questioning. The record is far from complete in other areas. There is insufficient information to adjudicate the following issues, *inter alia*:

a. Whether the Coal Policy was reviewed prior to rescission;

b. Adoption of the Coal Policy;

c. Consultation done before rescinding the Coal Policy;

d. Respondents' basis for not consulting the Applicants;

e. Involvement of the Minister of Environment and Parks in the rescission;

f. Current policy gaps and those policy gaps in place at the time of rescission;

g. Authority who drafted the Advice to Minister; and

h. Directions issued to the AER relating to rescission.

289. Assuming there is sufficient legal basis for the Applicants to proceed, there is insufficient factual basis for this Court to be able to make a determination.

290. The Record of Proceedings is one of the only pieces of evidence available to a court hearing a judicial review application. It is integral to making substantive determinations.

ARC, *supra* at Rule 3.22(a) [Tab 2]
Alberta's Free Roaming Horses Society v Alberta, 2019 ABQB 714 at paras 22 – 26 [Tab 84]

Issue #5: Test for Striking and Its Applicability to the Respondents' Application

291. The Applicants generally agree with the test for striking a pleading under *Rule* 3.68[16], except for the following: this Court cannot consider evidence when deciding under *Rule* 3.68(2)(b).

Manson (Estate) v Obsidian Energy Ltd, 2020 ABQB 370 at para 41 [Tab 85]
Kniss v Stenberg, 2014 ABCA 73 at para 21 [Tab 86]
ARC, *supra* at Rule 3.68 [Tab 2]

292. As noted above, the parties are only permitted to rely upon evidence to establish whether the within Action is justiciable. They are not permitted to rely upon evidence to determine if the Applicants' have a cause of action.

a) Whether the Applicants' are Foreclosed by ALSA

293. The Respondents are not permitted to rely upon evidence in support of their claim the Applicants are incapable of relying upon *ALSA*. They must rely upon the facts as stated in the Amended Originating Application.

[16] The Applicants agree that paragraphs 21 and 22 of the Respondents' submissions are proper.

294. The sole basis (as stated in the Respondents' Application) for submitting that there is no cause of action under *ALSA* is that "the Applicants are foreclosed by [*ALSA*] from bringing any proceeding in the nature of certiorari, prohibition or mandamus, or any application for declaratory relief".

295. The Applicants' bases for supporting their submission are as follows:

a. There is no requirement for the Coal Policy to remain in effect pending a review of the coal categories. This submission completely ignores the Integrated Resource Plans associated with the *SSRP*. The *SSRP* expressly requires those plans to remain in effect until further review. Further, one cannot review a document that has been rescinded. The clear implication is that the Coal Policy will remain in effect until the review is complete;

b. The Coal Policy references are in non-binding sections of the *SSRP*; therefore, they can be rescinded without consequence. This submission overrules the clear intent of *ALSA* to avoid top down government policy making. *ALSA* intended that regional plans be based on consultation. Interpreting *ALSA* such that non-binding portions of regional plans may be amended or rescinded without consultation completely disregards the Legislature's intent;

c. Section 15 of *ALSA* precludes judicial review. This submission was considered above. Any interpretation of *ALSA* precluding this Court from judicially review a decision under *ALSA* is unconstitutional. The only other interpretation is that section 15 is a privative clause, which no longer has any effect following *Vavilov*; and

d. The Deputy Minister did not make the decision. The Applicants have sworn into evidence the Advice to Minister. They cannot rely upon that evidence for supporting their contention that the Deputy Minister did not make the decision. Based on the facts deemed true in the Amended Originating Application, if the Deputy Minister decided to rescind the Coal Policy, he did so without authority.

b) Whether the Action is Justiciable

296. The Parties may rely upon evidence in establishing whether the Action is justiciable.

297. Based on the foregoing analysis under justiciability, the Applicants submit that the Action is justiciable.

298. If the Action is justiciable, then the Applicants were owed procedural fairness because they were directly affected by the decision.

CONCLUSION

299. As noted above, the Applicants advance the following grounds for judicial review: that the decision to rescind the Coal Policy was:

a. Unreasonable/incorrect on its merits;

b. *Ultra vires* the Respondents by operation of *ALSA*;

c. *Ultra vires* the Respondents by operation of *REDA*; and

d. Procedural unfair to the Applicants and breached the Applicants' legitimate expectation of procedural fairness.

300. Each ground is meritorious and founded in principles of justiciability.

301. Should this Court deem that the decision to rescind was justiciable and that section 15 of *ALSA* does not preclude judicial review, the Respondents' application to strike is necessarily defeated.

302. Should this Court find merit to the Applicants' claims and/or find that it is unable to determine the factual matrix underpinning the Respondents' decision to rescind, the Respondents' application to dismiss is necessarily defeated.

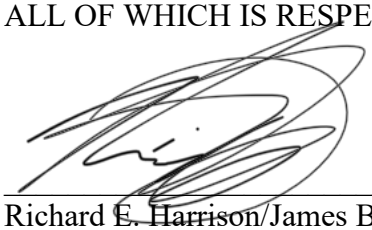
303. As remedies sought, the Applicants seek the following from this Court:

a. Amending their Amended Originating Application to allow the Applicants to add, as a remedy sought, a declaration that the Coal Policy remains in effect in the South Saskatchewan region;

b. Dismissal of the Respondents' Application to summarily dismiss or strike; and

c. Costs.

ALL OF WHICH IS RESPECTFULLY SUBMITTED THIS 11th DAY OF JANUARY, 2020.



Richard E. Harrison/James B. Laycraft, Q.C.[17]
Counsel for the Applicants (Respondents on this Application)

[17] Much of the analysis performed under Issue #2 was done by Michael Wenig, counsel for Backcountry Hunters and Anglers, and we credit him accordingly.

In the Court of Appeal of Alberta

Citation: Edmonton East (Capilano) Shopping Centres Limited v Edmonton (City), 2015 ABCA 85

Date: 20150227
Docket: 1303-0283-AC
Registry: Edmonton

2015 ABCA 85 (CanLII)

Between:

Edmonton East (Capilano) Shopping Centres Limited (as Represented by AEC International Inc.)

Respondent (Applicant)

- and -

The City of Edmonton

Appellant (Respondent)

- and -

The Assessment Review Board for the City of Edmonton

Respondent (Respondent)

and The Minister of Justice and Attorney General of Alberta

Not a Party to the Appeal (Respondent)

The Court:

The Honourable Mr. Justice Ronald Berger
The Honourable Mr. Justice Frans Slatter
The Honourable Madam Justice Patricia Rowbotham

Reasons for Judgment Reserved of the Honourable Mr. Justice Slatter
Concurred in by the Honourable Mr. Justice Berger
Concurred in by the Honourable Madam Justice Rowbotham

Appeal from the Order by
The Honourable Justice J.D. Rooke, Associate Chief Justice
Dated the 13th day of September, 2013
Filed on the 5th day of November, 2013
(2013 ABQB 526; Docket: 1103 13687)

2015 ABCA 85 (CanLII)

The implementation of direct appeals to the Court of Queen's Bench was undoubtedly a recognition of the fact that the "no appeal" provision previously in place did not prevent judicial review. Intermediate appeals to the Municipal Government Board were replaced by direct appeals to the Court of Queen's Bench, subject to the screening mechanism of "leave to appeal". Any decision of the Court would be subject to further appeal to the Court of Appeal.

[10] In accordance with the post-2010 regime, the appellant initially brought its complaint before the Assessment Review Board. The Court of Queen's Bench granted leave to appeal, and subsequently adjudicated the appeal on its merits. This appeal followed.

Standard of Review

[11] The day may come when it is possible to write a judgment like this without a lengthy discussion of the standard of review. Today is not that day.

[12] Judicial review has evolved, starting in the 1970s and 1980s, from its foundation in the idiosyncratic vagaries of the "prerogative writs" and the companion concept of "jurisdictional error". It evolved through a hoary "functional and pragmatic" search for an appropriate balancing of the role in the superior courts in the system of administrative justice. Today's philosophical foundation is "deference" and the companion "standard of review analysis".

[13] The concept of the "standard of review" is not a value unto itself. The underlying value is maintaining the integrity of the system of administrative justice, illustrated by the need to extend deference to the decisions of administrative tribunals: ***Canada (Minister of National Revenue) v JP Morgan Asset Management (Canada) Inc.***, 2013 FCA 250 at paras. 35-6, [2014] 2 FCR 557.

[14] But maintaining the integrity of the system of administrative justice is not the only value at play. Judicial review was originally formulated by the common law courts in support of the rule of law, a constitutional principle of the first order. Indeed, the Supreme Court of Canada has noted that this principle is so important, that it might well be unconstitutional for a legislative body to attempt to abolish judicial review: ***Crevier v Attorney General of Quebec***, [1981] 2 SCR 220 at p. 236; ***Dunsmuir v New Brunswick***, 2008 SCC 9 at paras. 31, 52, [2008] 1 SCR 190.

[15] There are other values at play, and a second one worth emphasizing is "legislative intent". The Supreme Court of Canada has stated on numerous occasions that the ultimate objective of the standard of review analysis is to ascertain the intent of the legislature:

> The central inquiry in determining the standard of review exercisable by a court of law is the legislative intent of the statute creating the tribunal whose decision is being reviewed. (***Pushpanathan v Canada (Minister of Citizenship and Immigration)***, [1998] 1 SCR 982 at para. 26)

Alberta Regulation 124/2010

Judicature Act

Alberta Rules of Court

Subdivision 2
Additional Rules Specific to Originating Applications for Judicial Review

Evidence on judicial review

3.22 When making a decision about an originating application for judicial review, the Court may consider the following evidence only:

(a) the certified copy of the record of proceedings of the person or body that is the subject of the application, if any;

Division 5
Significant Deficiencies in Claims

Court options to deal with significant deficiencies

3.68 **(1)** If the circumstances warrant and a condition under subrule (2) applies, the Court may order one or more of the following:

(a) that all or any part of a claim or defence be struck out;

(b) that a commencement document or pleading be amended or set aside;

(c) that judgment or an order be entered;

(d) that an action, an application or a proceeding be stayed.

(2) The conditions for the order are one or more of the following:

(a) the Court has no jurisdiction;

(b) a commencement document or pleading discloses no reasonable claim or defence to a claim;

(c) a commencement document or pleading is frivolous, irrelevant or improper;

(d) a commencement document or pleading constitutes an abuse of process;

(e) an irregularity in a commencement document or pleading is so prejudicial to the claim that it is sufficient to defeat the claim.

(3) No evidence may be submitted on an application made on the basis of the condition set out in subrule (2)(b).

(4) The Court may

(a) strike out all or part of an affidavit that contains frivolous, irrelevant or improper information;

(b) strike out all or any pleadings if a party without sufficient cause does not

(i) serve an affidavit of records in accordance with *rule 5.5*,

(ii) comply with *rule 5.10*, or

(iii) comply with an order under *rule 5.11*.

Creator

Environment Council of Alberta

Administrative history

Dates of Founding and/or Dissolution:
The Environment Council of Alberta was established as a Crown Corporation under the Environment Conservation Amendment Act, 1977 (S.A. 1977, chapter 66). As a result of the restructuring in 1994, the Environment Council of Alberta was phased out as an agency of the Department of Environmental Protection. The Environment Council Act was repealed by the Environmental Protection Statutes Repeal Act, 1995 (S.A. 1995, chapter 15), which came into force July 14, 1995.

Functional Responsibility:
At the time it was established, the Environment Conservation Authority was without precedent, either within or outside Alberta. In its initial incarnation through An Act respecting Environment Conservation, 1970 (S.A. 1970, chapter 36), the Environment Conservation Authority was responsible for conducting continual reviews of policies and programs of the Government and government agencies on matters pertaining to environment conservation, and for investigating into and reporting on matters pertaining to environment conservation at the request of the Lieutenant Governor. As well, they were able to inquire into issues relating to environment conservation, and to hold hearings to receive briefs and submissions about matters relating to environment conservation, making their recommendations to the Lieutenant Governor. The Authority became a corporation under the Department of the Environment Act, 1971 (S.A. 1971, chapter 24, section 18), reporting to the Minister of the Environment. The Authority's functions continued when the Environment Conservation Authority became the Environment Council of Alberta in 1977 through the Environment Conservation Amendment Act, which effectively renamed the Environment Conservation Act the Environment Council Act. The mandate remained virtually unchanged, the major change being with regards to the structure of the board, which was replaced with a permanent Chief Executive Officer and temporary panels.

Administrative Relationships:
Under the initial legislation, the Environment Conservation Authority was to report to the Lieutenant Governor. With the Environment Conservation Amendment Act, 1972 (S.A.1972, chapter 125), the Authority was instead to report to the Minister of the Environment. The Environment Council of Alberta continued to report to the Minister of the Environment.

Administrative Structure:
When first established, the Environment Conservation Authority consisted of three members, who were

appointed by the Lieutenant Governor (S.A. 1970, chapter 36, section 4.1). One of these would be designated chairman by the Lieutenant Governor, and another vice-chairman. The Environment Conservation Amendment Act, 1972 (S.A. 1972, chapter 38) increased the number to four members. The Environment Conservation Amendment Act, 1977 replaced the four members with a single permanent Chief Executive Officer to be appointed by the Lieutenant Governor in Council, and a succession of temporary panels for each public hearing.

Names of Corporate Bodies:
The Environment Council of Alberta was incorporated as a continuation of the Environment Conservation Authority. The Environment Conservation Authority was created under An Act respecting Environment Conservation, 1970 (S.A. 1970, chapter 36, section 4).

Names of Chief Officers:

W.R. Trost (chairman)	1970-1976
Julian Kinisky (acting chair)	1977
Margaret Noble (acting chair)	1977
Alistair D. Crerar (CEO)	1977-1988
Vacant	1989
Dr. Natalia Krawetz(CEO)	1989-1992
Vacant	1993
David Anderson (acting CEO)	1994-1995

CHAPTER 36

An Act respecting Environment Conservation

(*Assented to April 15, 1970*)

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of Alberta, enacts as follows:

Short title

1. This Act may be cited as *The Environment Conservation Act.*

Definitions

2. In this Act,

(*a*) "Authority" means the Environment Conservation Authority established under this Act;

(*b*) "Conservation and Utilization Committee" means the Conservation and Utilization Committee established under this Act;

(*c*) "government agency" means

(i) a corporation that is an agent of the Crown in right of Alberta, or

(ii) any corporation, commission, board or other body empowered to exercise quasi-judicial or governmental functions and whose members are appointed by an Act of the Legislature, the Lieutenant Governor in Council, or a Minister of the Crown, or any combination thereof;

(*d*) "natural resources" means land, plant life, animal life, water and air;

(*e*) "public advisory committee" means a public committee on environment conservation appointed by the Lieutenant Governor in Council under this Act.

Environment conservation

3. For the purposes of this Act, the following are matters pertaining to environment conservation:

(*a*) the conservation, management and utilization of natural resources;

(*b*) the prevention and control of pollution of natural resources;

(*c*) the control of noise levels resulting from commercial or industrial operations in so far as they affect the environment in the vicinity of those operations;

(*d*) economic factors that directly or indirectly affect the ability of persons to carry out measures that relate to the matters referred to in clauses (*a*), (*b*) and (*c*);

(*e*) any operations or activities, whether carried on for commercial or industrial purposes or otherwise,

(i) that adversely affect or are likely to adversely affect the quality or quantity of any natural resource, or

(ii) that destroy, disturb, pollute, alter or make use of a natural resource or are likely to do so;

(*f*) the preservation of natural resources for their aesthetic value;

(*g*) laws in force in Alberta that relate to or directly or indirectly affect natural resources.

Environment Conservation Authority

4. (1) There is hereby established the "Environment Conservation Authority" consisting of three members appointed by the Lieutenant Governor in Council.

(2) The Lieutenant Governor in Council shall designate one of the members of the Authority as chairman and another as vice-chairman.

(3) The vice-chairman is the acting chairman of the Authority in the event of the absence or inability to act of the chairman or in the event that the office of chairman is vacant.

(4) Members of the Authority

(*a*) shall be paid salaries in accordance with a schedule of salary rates prescribed by the Lieutenant Governor in Council, and

(*b*) shall be paid their reasonable travelling and living expenses while absent from their ordinary places of residence and in the course of their duties as members of the Authority, at rates prescribed by the Lieutenant Governor in Council.

(5) *The Public Service Pension Act* applies to the members of the Authority.

Meetings

5. (1) The Authority shall meet at the call of the chairman.

(2) Two members of the Authority constitute a quorum.

(3) The Authority may make rules respecting the calling of meetings of the Authority and the conduct of business thereat, and generally as to the conduct of the business and affairs of the Authority.

Employees

6. In accordance with *The Public Service Act, 1968* there may be appointed a secretary and any other employees as may be required for the purpose of providing clerical and secretarial services to the Authority.

Functions of Authority

7. (1) The Authority

(*a*) shall conduct a continuing review of policies and programs of the Government and government agencies on matters pertaining to environment conservation and shall report thereon to the Lieutenant Governor in Council;

(*b*) may inquire into any matter pertaining to environment conservation and make its recommendations and report thereon to the Lieutenant Governor in Council;

(*c*) shall, when required to do so by an order of the Lieutenant Governor in Council, inquire into any matter pertaining to environment conservation that is specified in the order and make its recommendations and report thereon to the Lieutenant Governor in Council;

(*d*) may require any officers or employees of any department of the Government or any government agency to provide information that, in the opinion of the Authority, is necessary for the purposes of enabling it to carry out its responsibilities;

(*e*) may, and when required to do so by an order of the Lieutenant Governor in Council shall, hold public hearings for the purpose of receiving briefs and submissions on any matter pertaining to environment conservation, and shall report thereon to the Lieutenant Governor in Council;

(*f*) may from time to time as it considers necessary, but at least once a year, hold joint meetings with the public advisory committees;

(*g*) may refer any matter pertaining to environment conservation to the Conservation and Utilization Committee for its recommendations and report thereon;

(*h*) may engage the services of persons having special technical or other knowledge in connection with an inquiry of any matter pertaining to environment conservation that the Authority has undertaken or proposes to undertake;

(*i*) in co-operation with and primarily through the medium of the Conservation and Utilization Committee, shall use its best efforts to achieve co-ordination of policies, programs and administrative procedures of the Government and government agencies relating to matters pertaining to environment conservation;

(*j*) shall make a report in each year to the Lieutenant Governor in Council

(i) summarizing generally its activities and affairs in the preceding year,

(ii) summarizing the recommendations made by it to the Lieutenant Governor in Council and to the Conservation and Utilization Committee in the preceding year, and

(iii) showing any reports or studies prepared in the preceding year at the request of the Lieutenant Governor in Council.

(2) When a report by the Authority under subsection (1), clause (*j*) is received by the Lieutenant Governor in Council, the President of the Executive Council shall lay a copy of it before the Legislative Assembly if it is then in session and if not, within 15 days after the commencement of the first session in the next ensuing year.

Conservation and Utilization Committee

8. (1) There is hereby established a committee called the "Conservation and Utilization Committee" consisting of not less than 12 members appointed by the Lieutenant Governor in Council in accordance with subsection (2).

(2) The members of the Conservation and Utilization Committee shall consist of employees of the Government or members or employees of a government agency with at least one member from each of the following, namely,

(*a*) the Department of Agriculture,

(*b*) the Department of Health,

(*c*) the Department of Highways and Transport,

(*d*) the Department of Industry and Tourism,

(*e*) the Department of Lands and Forests,

(*f*) the Department of Mines and Minerals,

(*g*) the Department of Municipal Affairs, and

(*h*) the Oil and Gas Conservation Board.

(3) The Lieutenant Governor in Council shall designate one of the members of the Committee as its chairman.

(4) Notwithstanding subsections (1) and (2), each member of the Conservation and Utilization Committee appointed under subsection (2) may appoint in writing a person to be an alternate member of the Committee to act in his stead as a member of the Committee in the event of his absence or inability to act.

Meetings

9. (1) The Conservation and Utilization Committee

(*a*) may appoint a vice-chairman, and

(*b*) may make rules governing the calling of its meetings, the conduct of its meetings and any other matters pertaining to the conduct of its business and affairs.

(2) A majority of the members of the Conservation and Utilization Committee or their respective alternate members constitutes a quorum.

Functions

10. The Conservation and Utilization Committee

(*a*) shall, at the direction of the Lieutenant Governor in Council, inquire into and study any matter pertaining to environment conservation and shall submit a report and recommendations thereon to the Lieutenant Governor in Council and to the Authority;

(*b*) shall be responsible for maintaining a continuing liaison between all departments of the Government and all government agencies for the purpose of co-ordinating the implementation of the programs of those departments and agencies on matters pertaining to environment conservation;

(*c*) shall, at the request of the Authority, hold a joint meeting with the Authority to discuss any matters pertaining to environment conservation.

(*d*) may appoint a sub-committee to conduct any specified inquiry or study in connection with an inquiry or study of a matter pertaining to environment conservation that the Committee itself has undertaken or has been required to undertake.

Public advisory committees

11. The Lieutenant Governor in Council may

(*a*) appoint one or more public advisory committees on environment conservation,

(*b*) prescribe the duties and functions of a public advisory committee, and

(*c*) prescribe the rates of remuneration to be paid to members of a public advisory committee for their travelling and living expenses incurred in the course of their duties as members of a committee.

Regulations

12. The Lieutenant Governor in Council may make regulations

(*a*) providing for any procedure or matter for the purpose of facilitating the functions of the Authority, the Conservation and Utilization Committee or a

public advisory committee and the relations between them, and

(*b*) providing for any other matter considered necessary to carry out the purposes of this Act.

Repeal

13. *The Utilization of Lands and Forests Act*, being chapter 354 of the Revised Statutes, is repealed.

Coming into force

14. This Act comes into force on July 1, 1970.

1972

CHAPTER 38

THE ENVIRONMENT CONSERVATION AMENDMENT ACT, 1972

(Assented to June 2, 1972)

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of Alberta, enacts as follows:

R.S.A. 1970, c. 125

1. The Environment Conservation Act is hereby amended.

Amends s. 2

2. Section 2 is amended

(a) by adding the following clause after clause (c):

(c1) "Minister" means the Minister of the Environment;

(b) by striking out clause (e) and by substituting the following:

(e) "public advisory committee" means a public committee on environment conservation appointed under section 11.

Amends s. 4

3. Section 4, subsection (1) is amended by striking out the words "three members" *and by substituting the words* "four members".

Amends s. 5

4. Section 5 is amended by striking out subsection (2) and by substituting the following:

(2) A quorum of the Authority shall consist of two members, one of whom shall be the chairman or the vice-chairman.

Amends s. 7

5. Section 7, subsection (1) is amended

(a) as to clause (a) by striking out the words "Lieutenant Governor in Council" *and by substituting the word* "Minister",

(b) by striikng out clause (b) and by substituting the following:

(b) may, after consultation with the Minister, inquire into any matter pertaining to environment conservation and make its recommendations and report thereon to the Minister;

(c) by striking out clause (e) and by substituting the following:

(e) may, and when required to do so by an order of the Lieutenant Governor in Council or of the Minister shall, hold public hearings for the purpose of receiving briefs and submissions on any matter pertaining to environment conservation, and shall report thereon to the Lieutenant Governor in Council and the Minister;

(d) as to clause (h) by adding after the words "the Authority" *the words* ", with the approval of the Minister,",

(e) as to clause (i) by striking out the words "in co-operation with and primarily",

(f) as to clause (j) by striking out the words "Lieutenant Governor in Council" *where they occur in the portion of the clause preceding subclause (i) and by substituting the word* "Minister",

(g) as to clause (j), subclause (iii) by adding at the end thereof the words "or of the Minister".

Amends s. 7

6. Section 7 is amended by striking out subsection (2) and by substituting the following:

(2) When a report by the Authority under subsection (1), clause (j) is received by the Minister, the Minister shall lay a copy of it before the Legislative Assembly if it is then in session and if not, within 30 days after the commencement of the first session in the next ensuing year.

Amends s. 8

7. Section 8, subsection (1) is amended by striking out the words "The Authority" *and by substituting the words* "Subject to the approval of the Minister, the Authority".

Amends s. 11

8. Section 11 is amended by adding after the words "The Authority" *the words* ", after consultation with the Minister,".

Coming into force

9. This Act comes into force on the day upon which it is assented to.

TAB 6

1971

CHAPTER 24

BILL 32

THE DEPARTMENT OF THE ENVIRONMENT ACT

(Assented to March 31, 1971)

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of Alberta, enacts as follows:

Definitions

1. In this Act

(a) "Authority" means the Environment Conservation Authority;

(b) "Co-ordinating Council" means the Natural Resources Co-ordinating Council;

(c) "Department" means the Department of the Environment;

(d) "government agency" means

(i) a corporation that is an agent of the Crown in right of Alberta, or

(ii) any corporation, commission, board or other body empowered to exercise quasi-judicial or governmental functions and whose members are appointed by an Act of the Legislature, the Lieutenant Governor in Council, or a Minister of the Crown, or any combination thereof;

(e) "Minister" means the Minister of the Environment;

(f) "natural resources" means land, plant life, animal life, water and air.

Environment conservation

2. For the purposes of this Act, the following are matters pertaining to the environment:

(a) the conservation, management and utilization of natural resources;

(b) the prevention and control of pollution of natural resources;

(c) the prevention of noise and the control of noise levels resulting from commercial or industrial operations in so far as they affect the environment in the vicinity of those operations;

(d) economic factors that directly or indirectly affect the ability of persons to carry out measures that relate to the matters referred to in clauses (a), (b) and (c);

(e) any operations or activities

(i) that adversely affect or are likely to adversely affect the quality or quantity of any natural resource, or

(ii) that destroy, disturb, pollute or alter or make use of a natural resource or are likely to do so;

(f) the preservation of natural resources for their aesthetic value;

(g) laws in force in Alberta that relate to or directly or indirectly affect the ecology of the environment or natural resources.

Establishment of Department

3. There shall be a department of the public service of the Province called the Department of the Environment over which shall preside the member of the Executive Council appointed by the Lieutenant Governor under the Great Seal of the Province as Minister of the Environment.

Employees

4. In accordance with The Public Service Act there shall be appointed a Deputy Minister of the Environment and such other employees as are required to carry on the business of the Department.

Services of experts, etc.

5. (1) The Minister may from time to time engage the services of experts or persons having special technical or other knowledge to advise him or to inquire into and report to him on matters under the Minister's administration.

(2) A person whose services are engaged under this section may be paid such remuneration and expenses as the Minister may prescribe.

Boards, committees and councils

6. (1) The Minister may establish such boards, committees or councils as he considers necessary or desirable to act in an advisory or administrative capacity in connection with any of the policies, programs, services or other matters under his administration.

(2) The Minister may, with respect to any board, committee or council established under this section,

(a) appoint or provide for the manner of appointment of its members,

(b) prescribe the term of office of any member,

(c) designate a chairman, vice-chairman and secretary, and

(d) authorize, fix and provide for the payment of remuneration and expenses to its members.

(3) A board, committee or council established pursuant to this section may make rules of procedure, subject to the approval thereof by the Minister, governing the calling of meetings, the procedure to be used at and conduct of the meetings, reporting and such other matters as required.

(4) A board, committee or council established pursuant to this section may exercise such powers and shall perform such duties and functions as the Minister may approve, confer or impose upon it.

Annual report

7. The Minister shall after the end of each year prepare a general report summarizing the transactions and affairs of the Department in that year and upon its completion, shall lay the report before the Legislative Assembly if it is then in session, and if not, within 15 days after the commencement of the first session next following the completion of the report.

Powers and duties of Minister

8. The Minister, in consultation with the Co-ordinating Council,

(a) is responsible for the co-ordination of the policies, programs and services of and administrative procedures of, departments of the Government and of government agencies in matters pertaining to the environment;

(b) may, as the representative of the Government of Alberta, maintain a continuing liaison with the Government of Canada and agencies thereof, the governments of other provinces and territories and agencies thereof, and municipal corporations in Alberta, in relation to matters under the administration of the Minister;

(c) may, on behalf of the Government of Alberta and with the approval of the Lieutenant Governor in Council, enter into an agreement relating to any matter pertaining to the environment with the Government of Canada, the government of any proince or territory of Canada, an agency of any of those governments, any municipal corporation in Alberta, or any other person;

(d) shall compile, study and assess information directly or indirectly related to matters pertaining to the environment with a view to using the results of such study and assessment for the purpose of better

carrying out his functions and responsibilities under this or any other Act and with a view to providing such information, or the results of such study and assessment, to departments of the Government and to government agencies, and to the public by way of publications, films, radio or television broadcasts or otherwise;

(e) may carry out research projects related to matters pertaining to the environment;

(f) shall conduct a continuing review of research related to any matter pertaining to the environment being carried out by the Government or government agencies or by others and shall promote the coordination of such research and of facilities used for such research;

(g) may enter into an agreement with any person to carry out a research project related to a matter pertaining to the environment;

(h) may make grants to any person or organization engaged in research in matters pertaining to the environment or in the promotion or encouragement of the improvement of the environment in Alberta or the prevention of the pollution, deterioration or impairment of the environment in Alberta;

(i) may, generally, do such acts as he considers necessary to promote the improvement of the environment for the benefit of the people of Alberta and future generations.

Acquisition of land

9. (1) The Minister may, with the approval of the Lieutenant Governor in Council, purchase any estate or interest in land and any personal property in conjunction therewith

(a) for the purpose of implementing or carrying out the provisions of any agreement or arrangement entered into between the Government of Canada and the Minister on behalf of the Government of Alberta, or

(b) for the purpose of any program or development project relating to the conservation, utilization or management of natural resources, or

(c) for the purposes of environmental conservation or improvement, the abatement or prevention of pollution of a natural resource, research or the disposal of toxic materials or for any other purpose in relation to a matter under the administration of the Minister.

(2) Land acquired under this section shall be under the administration of the Minister of Lands and Forests unless

the order of the Lieutenant Governor in Council specifies that it is under the administration of the Minister of the Environment.

Natural Resources Co-ordinating Council

10. (1) There is hereby established the "Natural Resources Co-ordinating Council" consisting of

(a) the Deputy Minister of the Environment, who shall be chairman,

(b) the Deputy Minister of Agriculture,

(c) a Deputy Minister of the Department of Health and Social Development designated by the Minister of Health and Social Development,

(d) the Deputy Minister of Highways and Transport,

(e) the Deputy Minister of Industry and Tourism,

(f) the Deputy Minister of Lands and Forests,

(g) the Deputy Minister of Mines and Minerals,

(h) the Deputy Minister of Municipal Affairs, and

(i) the chairman of the Energy Resources Conservation Board.

(2) Notwithstanding subsection (1), each member of the Co-ordinating Council may appoint in writing a person to be an alternate member of the Co-ordinating Council to act in his stead as a member of the Co-ordinating Council in the event of his absence or inability to act.

(3) The chairman of the Conservation and Utilization Committee shall be secretary of the Co-ordinating Council.

(4) The Co-ordinating Council

(a) may appoint a vice-chairman, and

(b) make rules governing the calling of its meetings, the conduct of its meetings and any other matters pertaining to the conduct of its business and affairs.

(5) A majority of the members of the Co-ordinating Council or their respective alternate members constitutes a quorum.

(6) The Co-ordinating Council

(a) may inquire into any matter pertaining to the environment,

(b) may review any policies, programs, services or administrative procedures of departments of the Government or of government agencies in matters pertaining to the environment,

and shall make its recommendations and report thereon to the Minister.

(7) The Co-ordinating Council may refer any matter pertaining to the environment to the Conservation and Utilization Committee for its recommendations and report thereon.

Conservation and Utilization Committee

11. (1) There is hereby established a committee called the "Conservation and Utilization Committee" consisting of not less than 12 members appointed by the Minister in accordance with subsection (2).

(2) The members of the Conservation and Utilization Committee shall consist of employees of the Government or members or employees of government agencies, with at least one member from each of the following, namely,

(a) the Department of Agriculture,

(b) the Department of the Attorney General,

(c) the Department of the Environment,

(d) the Department of Health and Social Development,

(e) the Department of Highways and Transport,

(f) the Department of Industry and Tourism,

(g) the Department of Lands and Forests,

(h) the Department of Mines and Minerals,

(i) the Department of Municipal Affairs,

(j) the Energy Resources Conservation Board, and

(k) the Research Council of Alberta.

(3) The Minister shall designate as chairman of the Committee one of the members who is an employee of the Department of the Environment.

(4) Notwithstanding subsections (1) and (2), each member of the Conservation and Utilization Committee appointed under subsection (2) shall appoint in writing a person to be an alternate member of the Committee to act in his stead as a member of the Committee in the event of his absence or inability to act.

(5) The Conservation and Utilization Committee

(a) shall, at the direction of the Co-ordinating Council, inquire into and study any matter pertaining to the environment, and

(b) shall submit its recommendations and report thereon to the Co-ordinating Council.

Restriction on powers

12. (1) Notwithstanding any other Act, the Lieutenant Governor in Council, upon the recommendation of the Minister, may by regulation require that the Minister of the Crown, government official or the government agency

specified therein shall not exercise any specified power in all or any specified part of Alberta unless

(a) the Minister of the Environment has first made a report to the Lieutenant Governor in Council as to the advisability of the action, having regard to its effects or possible effects on the environment, and

(b) the Lieutenant Governor in Council consents to the power being exercised.

(2) The Lieutenant Governor in Council, in giving any consent referred to in subsection (1), clause (b), may make the consent subject to such conditions as he may prescribe.

(3) The Minister, before making a report to the Lieutenant Governor in Council under subsection (1), clause (a), may refer the matter to the Authority or the Co-ordinating Committee for its report and recommendations thereon.

Plans for emergencies

13. The Minister may, in co-operation with representatives of other departments of the Government of Alberta and of government agencies and, where advisable, with other persons including representatives of other governments, municipal corporations or organizations, formulate plans for effective co-ordinated action in cases of emergency to prevent, alleviate, control or stop the destruction or loss of, or damage to, a natural resource or to human beings as a result of the pollution of a natural resource.

Declaration of state of emergency

14. (1) Upon the report of the Minister

(a) that circumstances exist whereby a natural resource in any part of Alberta has been or is being destroyed or damaged or is being or is likely to be polluted, and

(b) that urgent co-ordinated action is required for the purpose of preventing, alleviating, controlling or stopping the destruction, damage or pollution,

the Lieutenant Governor in Council may by order declare that a state of emergency exists with respect to those circumstances for the purposes of this section.

(2) Where the Lieutenant Governor in Council has made an order under subsection (1), the Minister or any employee of the Department authorized by him for the purpose, may

(a) require any officer or employee of the Government or a government agency to provide his services, or

(b) require any municipal corporation or any other corporation or organization to provide its services, or

(c) require any other person not exempted by the regulations to provide his services,

for the purposes of preventing, alleviating, controlling or stopping the destruction, damage or pollution referred to in the order.

(3) A person who refuses or neglects to comply with any request directed to him under subsection (2) is guilty of an offence and liable on summary conviction to a fine of not less than $25 and not more than $300 and in default of payment to imprisonment for a term of not more than 90 days or to both fine and imprisonment.

(4) The Lieutenant Governor in Council may make regulations

(a) exempting any persons or classes of persons from the operation of subsection (2), clause (c);

(b) prescribing rates of pay or remuneration to be paid to persons who provide services pursuant to subsection (2);

(c) prescribing the rates of remuneration to be paid to persons who furnish or permit the use of equipment pursuant to subsection (2).

(5) This section does not apply to the prevention, control and suppression of forest and prairie fires.

Restricted Development Areas

15. (1) The Lieutenant Governor in Council may by regulation establish any part or parts of Alberta as a "Restricted Development Area" (in this section called "the Area") upon the report of the Minister that the establishment of the Area is necessary in the public interest to co-ordinate and regulate the development and use of the Area for the purpose of

(a) preventing, controlling, alleviating or stopping the destruction, damage or pollution of any natural resources in the Area, or

(b) protecting a watershed in the Area, or

(c) retaining the environment of the Area in a natural state or in a state suitable for recreation or the propagation of plant or animal life, or

(d) preventing the deterioration of the quality of the environment of the Area by reason of the development or use of land in the Area incompatible with the preservation of that environment.

(2) Notwithstanding any other Act, where the Lieutenant Governor in Council establishes a Restricted Development Area, he may, in the same regulation or in any subsequent regulation, provide for

(a) the control, restriction or prohibition of any kind of use, development or occupation of land in the Area prescribed in the regulations;

(b) the control, restriction or prohibition of the exercise of any power specified in the regulations by any specified Minister of the Crown, government official or government agency;

(c) the removal of any buildings, improvements, materials or animals from the Area, and the payment of compensation by the Crown for any loss resulting therefrom;

(d) the control, restriction or prohibition of the dumping, deposit or emission within the Area of any substance specified in the regulations;

(e) the authorizing of the acquisition by purchase or expropriation by the Minister of any estate or interest in land in the Area;

(f) making any or all of the provisions of The Right of Entry Arbitration Act inapplicable to lands of the Crown in the Area;

(g) making any or all of the provisions of Part 3 of The Expropriation Procedure Act inapplicable to lands of the Crown in the Area;

(h) any other matter or thing necessary or incidental to the protection or improvement of the environment of the Area.

Stop orders

16. (1) Where the Minister is satisfied that any person

(a) has contravened or is contravening this Act or a regulation or order under this Act, or

(b) has contravened or is contravening any other Act or any regulation or order thereunder and the contravention, in the opinion of the Minister, is causing or is likely to cause the destruction, damage or pollution of a natural resource,

the Minister may issue an order (in this section called a "stop order") to that person in accordance with subsection (2).

(2) In a stop order, the Minister may require that the person to whom it is directed

(a) cease the contravention specified in the order, and

(b) stop any operations or shut down or stop the operation of any plant, equipment or structure either permanently or for a specified period,

and the stop order shall contain the reasons for making it.

(3) Not less than 48 hours after making a stop order, the Minister shall cause a copy of it to be served on the person to whom it is directed, and upon receipt of such copy, the person to whom the stop order is directed shall comply with the order forthwith.

(4) A person to whom a stop order is directed and who fails to comply with the order forthwith upon service of a copy of it upon him or subsequently, is guilty of an offence and liable on summary conviction to a fine of not more than $10,000 for each day that the offence continues or to a term of imprisonment of not more than 12 months or to both the fine and imprisonment.

(5) Where the person to whom a stop order is directed fails to comply with the order forthwith upon service of a copy of it upon him or subsequently, the Minister may apply to the Supreme Court of Alberta by way of originating notice of motion for an order of the Court directing that person to comply with the stop order.

(6) Where the person to whom a stop order is directed fails to comply with the stop order forthwith upon service of a copy of the order of the Supreme Court under subsection (5) upon him or subsequently,

(a) the failure to comply with the stop order may be dealt with by the Court as in the case of a civil contempt of the Court,

(b) an officer of the Department authorized by the Minister for the purpose and any other persons assisting that officer, may, without further leave of the Court and without incurring liability therefor, enter upon any land and do any acts that are necessary to carry out the stop order,

(c) the sheriff, the sheriff's bailiff and any other person under the written direction of the sheriff may assist the officer of the Department and other persons in enforcing their powers and duties under clause (b), and

(d) the Minister may recover by action any expenses incurred by the Government in carrying out the stop order pursuant to clause (b) from the person to whom the stop order was directed.

(7) A person to whom a stop order is directed may, within 15 days after service upon him of a copy of the stop order, appeal to the Minister in accordance with the regulations for an inquiry into the stop order.

(8) Where an appeal is made under subsection (7), the Minister shall refer the appeal and the stop order to the Authority for an inquiry.

(9) The Authority shall

(a) hold a hearing to inquire into all matters leading to the making of the stop order, and

(b) determine whether, in its opinion, there were sufficient grounds for the making of the stop order,

and upon completion of the inquiry the Authority shall report its findings to the Minister together with any recommendations it wishes to make in regard to the confirmation, amendment or revocation of the stop order.

(10) Upon receipt of the report of the Authority the Minister shall either confirm, amend or revoke the stop order and shall notify accordingly the person to whom it is directed.

(11) The Minister may

(a) amend a stop order if he considers it advisable in the circumstances to do so, or

(b) revoke a stop order,

and shall notify accordingly the person to whom the stop order was directed.

(12) This section applies whether or not the contravention of the Act, regulation or order concerned constitutes an offence, and whether or not a conviction has been adjudged for the offence.

(13) This section does not apply to contraventions of The Clean Air Act or The Clean Water Act or of regulations or orders under either of them.

Regulations

17. The Lieutenant Governor in Council may make regulations

(a) prohibiting, regulating or requiring the doing of any act for the purpose of preventing, alleviating or stopping soil erosion or anything detrimental to the protection or preservation of a watershed;

(b) requiring persons owning, possessing or having rights in respect of land to refrain from using that land in any manner detrimental to the environment of that land and other lands in the vicinity thereof;

(c) prescribing the duties of any person conducting sand or gravel removal operations, or any kind of operations that result in the destruction or disturbance of the surface of land, with respect to conservation of the soil and the reclamation of the surface of that land, and conferring powers on the Minister relating to such soil conservation and reclamation;

(d) controlling, restricting or prohibiting any actions of any person for the purpose of abating noise or controlling noise levels;

(e) authorizing the payment of compensation by the Crown to any person for loss or damage to that person as a result of the application of any regula-

tion under this Act to him or an order under this Act directed to him, prescribing the cases in which the compensation shall be paid and the loss or damage for which the compensation is to be paid, and conferring jurisdiction on the Supreme Court of Alberta, the district courts or the Public Utilities Board in connection with settlement of the compensation to be paid;

(f) authorizing the Minister to expropriate on behalf of the Crown any estate or interest in land if he considers it necessary to do so for the purpose of enforcing or carrying out the provisions of this Act or the regulations or an order under this Act;

(g) prohibiting or restricting the manufacture, sale or use of any substance that is or may be detrimental to the quality of the environment by reason of its toxicity or otherwise;

(h) prescribing procedures for the disposal of any substance that is or may be detrimental to the quality of the environment;

(i) providing the procedures in respect of appeals under section 16 and of inquiries held under that section;

(j) prescribing, with respect to any provision of any regulations under this Act, that its contravention constitutes an offence;

(k) prescribing penalties for offences against any regulations under this Act;

(l) empowering the Minister to prescribe forms for any document used in the course of administering this Act or any other Act administered by the Minister;

(m) generally, providing for any procedure or matter incidental to the carrying out of the provisions of this Act or any regulations under this Act.

Consequental Amendments

R.S.A. 1970, c. 125

18. The Environment Conservation Act is amended

(a) as to section 2 by striking out clause (b),

(b) as to section 7, clauses (g), (i) and (j) by striking out the words "Conservation and Utilization Committee" *wherever they occur and by substituting the words* "Department of the Environment",

(c) as to section 4, subsection (1) by adding after the words "there is hereby established" *the words* "a corporation called",

(d) by striking out sections 8, 9 and 10 and by substituting the following:

Banking arrangements

8. (1) The Authority may make such banking arrangements as are necessary for the carrying out of its duties and functions.

(2) The fiscal year of the Authority is the period from April 1st to the next succeeding March 31st.

(3) The Authority is in respect of its accounts and financial transactions subject to audit by the Provincial Auditor from time to time and at least once every year.

(4) The Provincial Treasurer shall pay to the Authority the moneys appropriated by the Legislature for the purposes of the Authority (except the moneys appropriated for the salaries payable to the members and employees of the Authority) in equal monthly instalments unless otherwise agreed between the Authority and the Provincial Treasurer.

(5) Subsistence and travelling allowances payable to the employees of the Authority under the regulations under The Public Service Act shall be paid by the Authority from its funds.

(e) as to section 11,

(i) by striking out the words "Lieutenant Governor in Council" *and by substituting the word* "Authority",

(ii) by adding the word "and" *at the end of clause (a) and by striking out the word* "and" *at the end of clause (b),*

(iii) by striking out clause (c),

(f) as to section 12

(i) in clause (a) by striking out the words ", the Conservation and Utilization Committee",

(ii) by striking out the word "and" *at the end of clause (a) and by adding after clause (a) the following:*

(a1) prescribing the rates of remuneration to be paid to members of a public advisory committee for their travelling and living expenses incurred in the course of their duties as members of a committee, and

R.S.A. 1970, c. 294

19. The Public Health Act is amended

(a) as to section 3, subsection (1), clause (b) by striking out the words "Division of Environmental Health of the Department of Health" *and by substituting the words* "Division of Pollution Control of the Department of the Environment",

(b) as to section 3 by striking out subsection (3) and by substituting the following:

(3) In accordance with The Public Service Act there shall be appointed a Director of the Provincial Laboratory of Public Health.

(c) by adding the following section after section 10:

Abatement of Nuisances

Abatement of nuisances

10.1 (1) The Provincial Board may inquire into and hear and determine any complaint made by or on behalf of any person in respect of a nuisance.

(2) The Provincial Board may make a report upon such complaint and as to what remedial measures, if any, that it considers are required in respect of the nuisance complained of.

(3) Where the report of the Provincial Board recommends the removal of any thing causing a nuisance or the abatement of a nuisance, the Minister or the complainant may apply to the Supreme Court or to a district court by way of originating notice of motion for an order

(a) for the removal of the cause of the nuisance or abatement of the nuisance in terms of the report of the Provincial Board, and

(b) to restrain the persons from continuing the nuisance, or any other persons from continuing the acts complained of, until the nuisance has been abated, or the cause of the nuisance removed, to the satisfaction of the Provincial Board.

(4) The judge may, upon the report of the Provincial Board, or upon such further evidence as he thinks necessary, make such order and on such terms and conditions as he considers proper.

Coming into force

20. This Act comes into force on April 1, 1971.

TAB 7

ENVIRONMENT COUNCIL ACT

CHAPTER E-13

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of Alberta, enacts as follows:

Definitions

1 In this Act,

(a) ''Council'' means the Environment Council of Alberta;

(b) ''government agency'' means

(i) a corporation that is an agent of the Crown in right of Alberta, or

(ii) a corporation, commission, board or other body empowered to exercise quasi-judicial or governmental functions and whose members are appointed by an Act of the Legislature, the Lieutenant Governor in Council, or a Minister of the Crown, or any combination of them;

(c) ''Minister'' means the Minister of the Environment;

(d) ''natural resources'' means land, plant life, animal life, water and air;

(e) ''public advisory committee'' means a public committee on environment conservation appointed under section 10.

RSA 1970 c125 s2;1971 c24 s18(a);1972 c38 s2;1977 c66 s4

Environment conservation

2 For the purposes of this Act, the following are matters pertaining to environment conservation:

(a) the conservation, management and utilization of natural resources;

(b) the prevention and control of pollution of natural resources,

(c) the control of noise levels resulting from commercial or industrial operations in so far as they affect the environment in the vicinity of those operations;

(d) economic factors that directly or indirectly affect the ability

of persons to carry out measures that relate to the matters referred to in clauses (a), (b) and (c);

(e) any operations or activities, whether carried on for commercial or industrial purposes or otherwise,

(i) that adversely affect or are likely to adversely affect the quality or quantity of any natural resource, or

(ii) that destroy, disturb, pollute, alter or make use of a natural resource or are likely to do so;

(f) the preservation of natural resources for their aesthetic value;

(g) laws in force in Alberta that relate to or directly or indirectly affect natural resources.

RSA 1970 c125 s3

Incorporation of council

3(1) The Environment Conservation Authority is continued as a corporation called the "Environment Council of Alberta" and consisting of the persons appointed from time to time by the Lieutenant Governor in Council as members of the Council.

(2) The Lieutenant Governor in Council

(a) shall designate one of the members as chief executive officer, and

(b) may prescribe the term of office of any of the members.

(3) The chief executive officer of the Council

(a) shall provide his services on a full-time basis, and

(b) may exercise the powers of the Council and shall perform the duties and functions of the Council other than those that are to be performed by a panel of the Council under section 4.

(4) The Minister may appoint a member of the staff of the Council as acting chief executive officer of the Council.

(5) In the event of the absence or inability to act of the chief executive officer of the Council, the acting chief executive officer may exercise the powers and shall perform the duties and functions of the chief executive officer except that the acting chief executive officer may not sit as a member of a panel of the Council in the stead of the chief executive officer.

(6) Members of the Council

(a) shall be paid remuneration at the rates prescribed by the Lieutenant Governor in Council, and

(b) shall be paid their reasonable travelling and living expenses

while absent from their ordinary places of residence and in the course of their duties as members of the Council, at the rates prescribed by the Lieutenant Governor in Council.

RSA 1970 c125 s4,1971 c24 s18(c),1972 c38 s3,1977 c66 s5

Panels of Council

4(1) The Lieutenant Governor in Council may constitute 3 or more members of the Council as a panel for the purpose of

(a) performing the duties and functions of the Council under an order of the Lieutenant Governor in Council made pursuant to section 7(1)(d),

(b) performing the duties and functions of the Council under the following provisions whenever an appeal and stop order is referred to the Council for an inquiry:

(i) section 10 of the *Beverage Container Act*,

(ii) section 14 of the *Clean Air Act*,

(iii) section 15 of the *Clean Water Act*,

(iv) section 17 of the *Department of the Environment Act*, or

(v) section 9 of the *Land Surface Conservation and Reclamation Act*,

or

(c) performing the duties and functions of the Council under an order of the Lieutenant Governor in Council made pursuant to the *Wilderness Areas Act*.

(2) When a panel of the Council is constituted under subsection (1), the Lieutenant Governor in Council

(a) shall designate one of the members of the panel, other than the chief executive officer of the Council, as its chairman, and

(b) may prescribe the name of the panel.

(3) Notwithstanding subsection (1), the chief executive officer of the Council is, by virtue of his office, a member and vice-chairman of each panel constituted under subsection (1).

(4) If at a meeting of a panel of the Council the chairman is absent or is unable to act, the chief executive officer of the Council, as vice-chairman of the panel, shall preside at that meeting.

(5) If at a meeting of a panel of the Council both the chairman of the panel and the chief executive officer of the Council are absent or unable to act, the remaining members of the panel shall elect one of their number to preside at that meeting.

(6) Any act done by a panel of the Council is the act of the Council.

RSA 1970 c125 ss4,5,1971 c24 s18,1972 c38 ss3,4,1977 c66 s5

Panel quorum and rules

5(1) A quorum of a panel of the Council consists of 2 members.

(2) Subject to the regulations, a panel of the Council may make rules respecting the calling of its meetings and the conduct of business at its meetings and generally as to the conduct of its business and affairs.

RSA 1970 c125 s5,1972 c38 s4,1977 c66 s6

Employees

6 In accordance with the *Public Service Act* there may be appointed a secretary and any other employees required for the purpose of providing clerical and secretarial services to the Council.

RSA 1970 c125 s6,1977 c66 s9

Functions of Council

7(1) The Council

(a) shall conduct a continuing review of policies and programs of the Government and government agencies on matters pertaining to environment conservation and shall report on them to the Minister;

(b) shall, on being requested to do so by the Minister, investigate any matter pertaining to environment conservation specified in the request and make its report on the matter to the Minister;

(c) may require any officers or employees of any department of the Government or any government agency to provide information that, in the opinion of the Council, is necessary for the purposes of enabling it to carry out its responsibilities;

(d) shall, on being requested to do so by an order of the Lieutenant Governor in Council, hold public hearings for the purpose of receiving briefs and submissions on the matter pertaining to environment conservation specified in the order, and shall make its report on the matter to the Lieutenant Governor in Council and the Minister;

(e) may from time to time as it considers necessary, but at least once a year, hold joint meetings with the public advisory committees;

(f) may refer any matter pertaining to environment conservation to the Department of the Environment for its recommendations and report on it;

(g) may engage the services of persons having special technical or other knowledge in connection with an inquiry of any matter pertaining to environment conservation that the Council, with the approval of the Minister, has undertaken or proposes to undertake;

(h) through the medium of the Department of the Environment,

shall use its best efforts to achieve co-ordination of policies, programs and administrative procedures of the Government and government agencies relating to matters pertaining to environment;

(i) shall make a report in each year to the Minister

(i) summarizing generally its activities and affairs in the preceding year, and

(ii) showing the reports made by it under clauses (b) and (e) in the preceding year.

(2) When a report by the Council under subsection (1)(i) is received by the Minister, the Minister shall lay a copy of it before the Legislative Assembly if it is then in session and if not, within 30 days after the commencement of the first session of the next ensuing year.

Coal Royalty Regulation, Alta Reg 295/1992

ALBERTA REGULATION 295/92

Mines and Minerals Act

COAL ROYALTY REGULATION

…

Repeal

12 The *Coal Royalty Regulations* (Alta. Reg. 193/76) are repealed.

TAB 9

ALBERTA REGULATION 193/76

(Filed July 22, 1976)

THE MINES AND MINERALS ACT

(O.C. 811/76)

Approved and Ordered,

W. A. McGILLIVRAY,

Administrator. Edmonton, July 20, 1976.

Upon the recommendation of the Honourable the Minister of Energy and Natural Resources, the Lieutenant Governor in Council, pursuant to section 78 of The Mines and Minerals Act, makes the regulations in the attached Appendix, being the Coal Royalty Regulations.

HUGH M. HORNER (Acting Chairman)

COAL ROYALTY REGULATIONS

1. The royalty to be computed, levied and collected by the Crown in right of Alberta on coal won, worked, recovered or obtained pursuant to an agreement granting coal rights shall be that part of the marketable coal or products of coal obtained from each coal project or new coal project during each calendar month calculated, free and clear of any deductions, in accordance with section 3 and Schedule A.

2. In these regulations,

(a) "coal" has the same meaning as given in The Coal Conservation Act;

(b) "coal mine" means any working from which coal is or could be extracted, whether commercially or otherwise, and includes an "open pit mine", a "strip mine" or an "underground mine" as those terms are defined in The Coal Conservation Act;

(c) "coal project" means any project for the extraction and recovery of coal approved by the Energy Resources Conservation Board as a coal project and includes

(i) a coal mine or mines located in Alberta,

(ii) any installation in Alberta for upgrading the quality of coal directly associated with a coal mine or mines, and

(iii) any coal storage and delivery facilities located in Alberta and directly associated with the coal mine or mines;

(d) "marketable coal" means coal that is suitable for the purposes of sale or consumption other than for consumption in the operation of a coal project or new coal project;

(e) "new coal project" means any expansion of a coal project which is considered by the Minister to result in production of coal from the coal project at a rate of 25 per cent or greater than the corresponding production prior to expansion.

(f) "ton" means 2,000 pounds.

3. (1) In this section "commencement date" means the first day of the month following the date determined by the Minister as the date on which a coal project or a new coal project has attained a cumulative production of marketable coal

(a) of 20 per cent of the annual production of marketable coal authorized pursuant to The Coal Conservation Act, or

(b) where the annual production is not specified pursuant to that Act, then at a cumulative production in an amount specified by the Minister.

(2) The Minister may determine for a coal project or a new coal project

(a) a commencement date or,

(b) a date prior to which the commencement date occurred.

(3) Where the Minister determines a commencement date or a date pursuant to subsection (2) for a coal project or a new coal project producing or capable of producing marketable coal at a rate of more than 100,000 tons in a calendar year, the royalty payable on the coal obtained from the coal project or the new coal project is

(a) with respect to each of the first twelve months after the commencement date, one-quarter of the percentage computed in accordance with Schedule A,

(b) with respect to each of the next twelve months after the twelve-month period in clause (a), one-half of the percentage computed in accordance with Schedule A,

(c) with respect to each of the next twelve months after the twelve-month period in clause (b), three-quarters of the percentage computed in accordance with Schedule A, and

(d) for each month thereafter, the percentage computed in accordance with Schedule A

of any marketable coal and other products obtained from the coal.

(4) Where the Minister determines a commencement date or a date pursuant to subsection (2) for a coal project or a new coal project producing or capable of producing marketable coal at a rate of 100,000 tons or less in a calendar year, the royalty payable on the coal obtained from the coal project or the new coal project is

(a) with respect to each of the first twelve months after the commencement date, 1.25 per cent,

(b) with respect to each of the next twelve months after the twelve-month period in clause (a), 2.5 per cent,

(c) with respect to each of the next twelve months after the twelve-month period in clause (b), 3.75 per cent, and

(d) for each month thereafter, 5 per cent

of any marketable coal and other products obtained from the coal.

(5) Notwithstanding subsections (3) and (4), where the Minister determines a commencement date after July 1, 1976, the royalty payable on coal obtained from any coal project or new coal project prior to the commencement date of that coal project or new coal project, shall be 1.25 per cent of the marketable coal and other products obtained from the coal.

(6) Where in his opinion it is necessary or desirable in the interests of conservation and the prevention of waste or the loss of recovery of marketable coal or products of the coal, the Lieutenant Governor in Council may by order

(a) prescribe a royalty payable with respect to the marketable coal or products of the coal that is less than the royalty that would otherwise be payable under these regulations, and

(b) prescribe the period in respect of which the order is to apply.

4. No royalty shall be payable on any coal or products obtained from coal used or consumed in the operation of a coal project or a new coal project.

5. Any sale of marketable coal or other products obtained from a coal project or a new coal project on a location, shall, until otherwise ordered by the Minister, include the royalty share thereof belonging to the Crown.

6. Where a coal project relates

(a) partly to the location of one or more agreements granting coal rights, and

(b) partly to coal rights held in fee simple,

the lessee shall determine, subject to the approval of the Minister, the portion of the production of marketable coal and other products attributable to the location or locations of the agreement.

7. The operator of a coal project shall, on or before the last day of each month following the month of production,

(a) file with the Department on forms prescribed by the Minister, a full report of the production and disposition of marketable coal and products of the coal and computation of royalty for that month, and

(b) remit to the Department the royalty payable for that month.

8. Where any question arises pertaining to the interpretation of these regulations, the decision of the Minister thereon is final.

9. These regulations apply with respect to coal and products of coal marketed in the month of July, 1976 and subsequent months.

SCHEDULE A

The rate of royalty for a month shall be calculated in accordance with the following equation:

$$X = K\left(1 - \frac{C}{R}\right)^2 \text{ or}$$

5 per cent,

whichever percentage is the greater

where X is the rate of royalty payable expressed as a percentage of marketable coal and products obtained from coal;

K is the project factor for a coal project or new coal project as determined in accordance with the following equation:

$$K = \frac{50}{1 + \frac{C}{R}\left(0.30\,\frac{I}{C} - 1\right)}$$

where I is the annual investment allowance of a coal project or new coal project;

C is the annual cost allowance of a coal project or new coal project;

R is the annual revenue from a coal project or a new coal project.

ALBERTA REGULATION 194/76

(Filed July 22, 1976)

THE MINES AND MINERALS ACT

(O.C. 812/76)

Approved and Ordered,

W. A. McGILLIVRAY,

Administrator. Edmonton, July 20, 1976.

Upon the recommendation of the Honourable the Minister of Energy and Natural Resources, the Lieutenant Governor in Council, pursuant to section 14, clause (g.4) and section 40 of The Mines and Minerals Act (as enacted by The Mines and Minerals Amendment Act, 1976), makes the regulations in the attached Appendix, being the Interest Rate Regulations.

HUGH M. HORNER (Acting Chairman)

INTEREST RATE REGULATIONS

1. For the purposes of section 40 of The Mines and Minerals Act, the rate of interest to be charged under that section shall be 11.25 per cent per annum.

2. These regulations apply with respect to money owing under any disposition in the month of July, 1976 and in subsequent months.

Rules

9 (1) The Regulator may make rules

(a) prescribing the manner in which an application under this Act or the rules is to be made;

(b) specifying the information that is to be included in or to accompany an application under this Act or the rules;

(c) requiring that an applicant deposit a specified performance bond with the Regulator as a guarantee of proper operations and prescribing the form of the deposits;

(c.1) requiring the holders of approvals for in situ coal schemes to provide to the Regulator deposits, letters of credit or other forms of security to guarantee the proper and safe suspension and abandonment of in situ coal schemes and the carrying out of any other activities necessary to ensure the protection of the public and the environment, including rules respecting the amount and form of those deposits, letters of credit and security and how they may be used, retained, forfeited and returned;

(d) restricting or prohibiting the development of a mine, mine site, coal processing plant or in situ coal scheme at any point within a stated distance of a boundary, road, road allowance, lake, river, stream, pipeline or other public or private works;

(e) restricting or prohibiting mining within any city, town or village or within a hamlet designated or continued under the *Municipal Government Act*;

(f) requiring notice to the Regulator, and Regulator approval, of

(i) a suspension of normal operations at a mine, mine site or coal processing plant, or

(ii) a resumption of operations in a previously closed or abandoned mine, mine site or coal processing plant;

(f.1) respecting the suspension and abandonment of in situ coal schemes, including, without limitation, rules respecting

(i) applications for suspension and abandonment,

(ii) the circumstances under which an in situ coal scheme must be suspended or abandoned,

(iii) the timing of the suspension or abandonment of an in situ coal scheme,

(iv) the manner in which suspension and abandonment are to be carried out, and

(v) measures required to ensure that

(A) an abandoned in situ coal scheme is left in a permanently safe and secure condition, and

(B) a suspended in situ coal scheme is left in a safe and secure condition;

(g) requiring the Regulator's approval of any mining machinery, transportation equipment and electric apparatus or devices intended for use in a mine or at a mine site;

(h) prescribing what inspections are to be made in a mine or at a mine site or an in situ coal scheme and by whom the inspections are to be carried out and reported;

(i) prescribing the data and samples that must be taken, the manner in which they are to be taken, and the methods by which samples are to be tested or analyzed;

(j) requiring the submission to the Regulator of samples, cores, test data, survey logs, geophysical logs and other relevant data or information;

(k) designating and registering coal seams, coal deposits, coal fields and coal-bearing zones;

(l) prescribing the manner in which measurements are to be taken and the units in which measurements are to be expressed;

(m) prescribing the manner and form of records to be kept, the persons by whom and the place at which they are to be kept, the length of time for which they are to be kept, and providing for their submission to the Regulator;

(n) specifying what reports are to be made, the persons who are to make them, the authority or person to whom they are to be submitted, the times at which they are to be made, and their form, nature and extent;

(o) specifying which records, reports or information submitted to, or otherwise acquired by, the Regulator under this Act shall be confidential, and when and to whom the information contained in them may be made available;

(p) with respect to small mines

(i) exempting small mines from the rules or any part of the rules, and

(ii) prescribing particular rules in respect of small mines;

(p.1) exempting all or parts of experimental in situ coal schemes from some or all of the provisions of this Act or the rules except provisions respecting the approval of experimental in situ coal schemes;

(q) prescribing the measures that the holder of a permit, licence or approval under this Act must take at a mine site, coal processing plant or in situ coal scheme to prevent pollution of air, water and land;

(r) prescribing the manner in which land and bodies of water disturbed by mine site development, mining, coal processing or in situ coal scheme development must be reclaimed or restored;

(r.1) respecting the entitlements that a person is required to hold to apply for a permit, licence or approval under this Act and prescribing other eligibility requirements for applying for or holding a permit, licence or approval under this Act;

(s) prescribing forms to be used under this Act or the rules;

(t) establishing a schedule of fees

(i) pertaining to an application under this Act or the rules,

(ii) for any map, report, document or other record of the Regulator, or

(iii) for any other service provided by the Regulator;

(u) generally, prescribing measures to conserve coal or to prevent its waste or improvident disposition, and stipulating any other provisions reasonably incidental to the efficient development of mines, mine sites, coal processing plants and in situ coal schemes, and to production from them;

(v) respecting compliance with and enforcement of ALSA regional plans.

(2) When rules pursuant to subsection (1) authorize the Regulator to issue a permit or licence or to approve an operation, the Regulator may prescribe particular conditions under which it grants the permit, licence or approval.

(3) Notwithstanding any rules under subsection (1)(b) that specify the information that must be included with or accompany an application under this Act or the rules, the Regulator may act on an application that does not contain all that information, or may require additional information.

(3.1) Rules made pursuant to subsection (1)(o) respecting confidentiality of records, reports or information submitted to or acquired by the Regulator under this Act prevail despite the *Freedom of Information and Protection of Privacy Act*.

(4) Where no form has been prescribed pursuant to subsection (1)(s) for use under this Act or the rules, the Regulator may accept any form or format of submission it considers adequate.

Part 4
Development, Operation and Abandonment of Mines

General

Authorization required

21(1) When an application is made under section 10(1)(b) with respect to a mine or proposed mine that is or will be capable of producing more than 45 000 tonnes of coal per year by normal operations, the Regulator shall not grant the permit unless the Lieutenant Governor in Council has first authorized the granting of the permit.

(2) The Lieutenant Governor in Council may make the Lieutenant Governor in Council's authorization under subsection (1) subject to any terms and conditions the Lieutenant Governor in Council considers necessary or desirable.

(3) The authorization of the Lieutenant Governor in Council is not required in respect of

(a) an amendment to a permit issued under this section, or

(b) a consolidation of a permit issued under this section and one or more amendments to that permit.

RSA 2000 cC-17 s21;2011 c11 s2(12);2012 cR-17.3 s86

Part 5
Operation and Abandonment of Coal Processing Plants

Coal processing plants

23(1) No person shall

(a) construct or begin operations at a new coal processing plant,

(b) resume operations at a previously shut-in or abandoned coal processing plant,

(c) resume normal operations at an extensively rebuilt, modified or re-equipped coal processing plant, or

(d) operate facilities directly connected with a coal processing plant,

without applying for, and obtaining, an approval from the Regulator.

(2) An application under subsection (1) shall include

(a) a map or plan showing the exact location of the coal processing plant and all connected facilities in relation to

(i) the mine or mines from which the plant draws coal,

(ii) all nearby bodies of water, and

(iii) inhabited buildings and other private or public works,

(b) an outline of what steps are proposed for controlling pollution from the coal processing plant and its connected facilities, and

(c) any further information the Regulator requires.

RSA 20000 cC-17 s23;2012 cR-17.3 s86

Authorizations and approvals required

24(1) No approval relating to a coal processing plant capable of treating more than 45 000 tonnes of coal per year by normal continuous working shall be issued by the Regulator pursuant to this Part unless the Lieutenant Governor in Council has first authorized the issue of the approval.

(2) The Lieutenant Governor in Council may make the Lieutenant Governor in Council's authorization under subsection (1) subject to any terms and conditions the Lieutenant Governor in Council considers necessary or desirable.

(3) The authorization of the Lieutenant Governor in Council is not required in respect of

(a) an amendment to an approval issued under this section, or

(b) a consolidation of an approval issued under this section and one or more amendments to that approval.

TAB 12

THE LEGAL FRAMEWORK FOR COAL DEVELOPMENT IN ALBERTA

L. DOUGLAS RAE*

This paper examines the legal and regulatory regime that has been developed by the government of the Province of Alberta in order to implement the specific aspects of the Alberta coal policy.

I. INTRODUCTION

In June of 1976 the government of the Province of Alberta, through the Department of Energy and Natural Resources, issued a landmark document which was to be the basis for coal development in the province from that time forward. Entitled "A Coal Development Policy for Alberta"[1] it is commonly referred to as the "coal policy". In the five years since the document's issuance, the Alberta government has, for the most part, implemented both the general and specific aspects of the policy. It is the purpose of this paper to outline the legislative and regulatory framework through which the coal policy is currently being implemented.

The coal policy purports to govern the extraction of coal resources by all methods, including surface mining, underground mining and *in situ* processes yet to be developed. It must be remembered that the coal policy not only governs the exploration for and extraction of coal resources, but also designates those areas which for the foreseeable future are to be untouched by coal development.

Coal deposits in Alberta underlie large areas of the plains, foothills and Rocky Mountains. The coal policy, as it relates to deposits found in the foothills and Rocky Mountains, must be applied in conjunction with the land use zones specified in "A Policy for Resource Management of the Eastern Slopes,"[2] which has direct impact on the manner and method of coal development in those areas.

It should be emphasized at the outset that the coal policy in both its theoretical basis and its implementation and administration was not designed to be a legal document, but rather an administrative one. While portions of it have been legislated into existence, many aspects of the coal policy are enforced through administrative dictates rather than through any legal sanctions. In many instances discretion and flexibility take precedence over legal rights.

The procedure for government consideration of applications for new coal developments is a four-step screening and evaluation process[3] consisting of the following:

1. Preliminary disclosure of a development proposal to the government and the government's initial response thereto.[4]

* Vice President Legal, Asamera Inc., Calgary.

1. Alberta. Department of Energy and Natural Resources, "A Coal Development Policy for Alberta" (15 June 1976).
2. Alberta. "A Policy for Resource Management of the Eastern Slopes" (July 1977).
3. *Supra* n. 1 at 4.
4. This is strictly an administrative procedure whereby the government through the Cabinet, has undertaken to advise a prospective developer at an early date whether it has any objections to his pursuing plans for the development. There is no legal requirement to make a preliminary disclosure, nor is there any obligation for the government to respond to it. Theoretically, a developer could proceed to apply for a mine permit even though he had been advised that the government would not approve it.

2. Disclosure and detailed description of the proposal by the applicant to the public.[5]

3. Consideration through a public hearing before the Energy Resources Conservation Board (E.R.C.B.) of the formal aspects of the application, including the basic technical application, the cost-benefit and social impact analysis, the environmental impact assessment and a land surface reclamation plan.[6]

4. A final decision by the Lieutenant Governor in Council in light of the findings of the E.R.C.B. and the various government departments concerned.[7]

It is not the purpose of this paper to conduct a detailed examination of the administrative process required for approval of a coal development project. This matter has been thoroughly covered in the E.R.C.B. publication entitled "How to Apply for Government Approval of Mining Activities in Alberta."[8]

II. ELEMENTS OF THE COAL POLICY

The coal policy consists of twenty-four specific elements:

A. *Protection of the Environment*

> The Government's environmental protection policy for surface and subsurface operations applies equally to public and private land, whether located on the Plains, in the Foothills or in the Mountains.
>
> The Government is committed to maintaining a balance between resource development and environmental protection in order to maintain a desirable quality of life for future Albertans.
>
> Reconnaissance surveys will only be permitted in environmentally sensitive areas under carefully controlled conditions. Detailed exploration and development operations will not be permitted in areas where the environment and plant and wildlife cannot be properly protected and where reclamation of any disturbed land is not possible.
>
> Environmental impact assessments will be required from those proposing major developments and these will be available to public scrutiny and discussion at both specially convened public disclosure meetings and formal public hearings conducted by the Energy Resources Conservation Board. All operations will be subject to the environmental standards and conditions of The Clean Air Act, The Clean Water Act, The Land Surface Conservation and Reclamation Act and The Water Resources Act. Approvals under environmental legislation will be granted only under conditions where all appropriate measures are taken for the protection of the environment and where environmental standards and criteria are not exceeded. A developer will be expected to absorb all costs attributable to his project of protecting the environment both during and upon completion of operations."[9]

As is the case with most matters concerning the biophysical environment in Alberta, the Department of the Environment has general jurisdiction over the environmental aspects of coal development. However, since the coal policy encourages a "one window" approach to the public hearing process and since this one window is before the

---

5. The coal policy states that this is "required", but there is no specific legislative authority to order such a public disclosure meeting. The author is not aware of any coal development proposals that have not been preceded by a public disclosure meeting.

6. The actual application for a mine permit is made to the E.R.C.B. pursuant to s. 10(1)(b) of The Coal Conservation Act, S.A. 1973, c.65, as am., and a hearing is held pursuant to s. 29 of The Energy Resources Conservation Act, S.A. 1971, c. 30, as am.. The public hearing is not mandatory.

7. This is only required for mines capable of producing more than 45,000 tonnes of coal per year. The Lieutenant Governor in Council can also attach conditions to his approval. *See* Coal Conservation Act, *id.*, s. 21.

8. Energy Resources Conservation Board, Guide G-2, "How to Apply for Government Approval of Mining Activities in Alberta" (September 1978).

9. *Supra* n. 1, s. 3.1.

E.R.C.B., that Board also has certain jurisdiction to consider matters concerning the environment, if not to rule upon them.[10] The Board, in effect, is delegated responsibility for devising and administering the ways and means required to ensure that environmental standards are met. The general nature of the respective mandates of the E.R.C.B. and the Department of the Environment has resulted in some dispute and confusion as to the respective jurisdictions of each body. They have consequently attempted to remedy the situation by reaching a ministerial accord whereby jurisdiction is "divvied-up".[11] In spite of this accord, clearly an interested third party could raise matters of an environmental nature at the E.R.C.B. hearing rather than relying upon the Department of the Environment, since this is the only public scrutiny of these matters and since environmental matters are within the jurisdiction of the E.R.C.B. The E.R.C.B. has oftentimes appointed a senior staff person of the Department of the Environment to sit on specific hearing panels.[12]

Some areas of the province are totally out of bounds to coal development.[13] The Land Surface Conservation and Reclamation Act gives the Minister of the Environment the power to remove specified areas from exploration potential.[14] As well, certain areas have already been removed by regulation from exploration potential.[15]

The environment protection portion of the coal policy is applicable to both public and privately owned land and both surface and subsurface disturbances. Since coal mines by their nature involve a disturbance to the land, they fall within the ambit of s. 23 of The Land Surface Conservation and Reclamation Act[16] by virtue of s. 3 of The Regulated Coal Surface

---

10. The Board is governed by the purposes of The Energy Resources Conservation Act, S.A. 1971, c. 30, as am., s. 2(d): "to control pollution and ensure environment conservation in the exploration for, processing, development and transportation of energy resources and energy"; by the purposes of The Coal Conservation Act, S.A. 1973, c. 65, as am., s. 4(e): "to assist the Government to control pollution and ensure environment conservation in the development of the coal resources of Alberta"; and by The Coal Conservation Regulations, Alta. Reg. 229/74, s. 25: "An operator shall institute and carry out a program of environment management, including pollution control and surface reclamation, satisfactory to the Board."

11. Alberta Environment, "Accord Between Alberta Environment and the ERCB on Procedures for Energy Related Projects that have a Significant Environmental Impact" (May 29, 1980). *See also* Energy Resources Conservation Board Informational Letter IL 80-19, "Environmental Impact Assessments."

12. *See* Energy Resources Conservation Board and Alberta Department of Environment, ERCB-AE Report 77-AA, *In The Matter Of Applications By Calgary Power Ltd. For The Extension Of The Highvale Mine And The Construction And Operation Of A Proposed South Sundance Thermal Power Plant* (August 1977).

13. *See* section M, *infra.*

14. The Land Surface Conservation and Reclamation Act, S.A. 1973, c. 34, as am., s. 10:
    The Minister may by order
    (a) establish specified areas within which any type of exploration operations may be prohibited or curtailed, or
    (b) establish specified areas within which any type of exploration operations may be prohibited during a specified period of the year.

    and *see also*

    Exploration Regulation, Alta. Reg. 423/78, s. 5(1):
    No person shall conduct a type of exploration within an area while that method of exploration is prohibited in that area by an order of the Minister of the Environment under section 10 of The Land Surface Conservation and Reclamation Act.

15. Exploration Regulation, Alta. Reg. 423/78, s. 4(1).

16. S.A. 1973, c. 34, as am.

Operations Regulations.[17] Consequently, a development and reclamation permit must be applied for, pursuant to s. 8 of The Regulated Coal Surface Operations Regulations,[18] prior to the commencement of any coal development. Procedurally, the development and reclamation permit is applied for at the same time as the actual mine permit is applied for.[19]

Under s. 8 of The Land Surface Conservation and Reclamation Act, the Minister of the Environment may order that an environmental impact assessment be conducted.[20] This is apparently the only authority for ordering the conduct of such assessments under provincial legislation.[21] Although the Department of the Environment has issued Environmental Impact Assessment Guidelines, currently under revision,[22] there is no legislation nor are there regulations governing the contents and the preparation of such assessments. The E.R.C.B. publication, "How to Apply for Government Approval of Mining Activities in Alberta,"[23] sets out the purpose of an environmental impact assessment: "The purpose of an EIA is to provide comprehensive information, to both the public and government, to allow early identification and resolution of potentially significant adverse environmental effects of the proposed development."[24] The coal policy states that such assessments will be made available to public scrutiny at the public disclosure meetings contemplated under the policy. However, not only is such public scrutiny of the impact assessments at these meetings not legislated, the holding of such disclosure meetings itself is not legislated. In practice environmental impact assessments have not always been available at these public disclosure meetings.[25] There have even been instances where the final form of environment impact assessment has not been available at the formal E.R.C.B. hearing.[26]

Coal mining operations in Alberta are subject to the pollution standards and emission limits established pursuant to The Clean Air Act and The Clean Water Act.[27] As well, the use of ground water and surface water resources is governed by The Water Resources Act and, when water is required in sufficient quantities, permits under that Act must be acquired.[28] It should be pointed out that The Clean Air Act and The Clean Water Act primarily provide for limitations of point specific effluent emissions. They do not expressly provide for "all appropriate measures"

28. R.S.A. 1970, c. 388, as am..

required for the protection of the environment, although there is a general ministerial discretionary authority under other legislation.[29]

The Clean Air Act requires a permit for construction of any coal processing plant.[30] Although processing plants must comply with the emission standards set by regulation, the Director of Standards and Approvals also has wide latitude to attach additional terms and conditions.[31] Subsequent to construction, a licence to operate is also required[32] and once again the Director of Standards and Approvals has wide discretion to impose terms and conditions.[33] The Minister of the Environment has the power to "issue a certificate of variance to vary a term, condition or requirement of a permit or licence or a requirement of the regulations".[34] The Director of Pollution Control also has the power to issue "emission control orders" where emission standards are being exceeded or where an air contaminant is likely to be detrimental to life or health or to adversely affect property.[35] An emission control order can be issued notwithstanding that a plant is operating pursuant to an operating licence.[36] Finally, the Minister of the Environment has wide discretion to issue a "stop order" pursuant to s. 7 of the Act. If the Act, Regulations, orders or directions of the Director of Pollution Control or a term or condition of a licence are being contravened, or if there is an immediate danger to human life or property, the Minister may shut down the operation of the plant. The issuance of stop orders is one area where elaborate appeal procedures have been set out in the legislation. In addition, practice has shown that the Minister of the Environment issues stop orders only as a last resort.[37]

---

29. *E.g.* the ability to attach conditions to a coal plant approval or to a development and reclamation approval.
30. S.A. 1971, c. 16, as am., s. 4.
31. *Id.*, s. 4(5).
32. *Id.*, s. 4.1.
33. *Id.*, s. 4.1(6).
34. *Id.*, s. 4.8(1):
    The Minister may issue a certificate of variance if he is of the opinion that
    (a) the plant, structure or thing is operating or is likely to operate in contravention of a term, condition or requirement of a permit or licence or a requirement of the regulations as a result of factors beyond the control of the applicant,
    (b) the variation is not likely to result in air pollution of a degree that could be detrimental to life or health or adversely affect property, and
    (c) a refusal to grant a certificate of variance would result in serious hardship to the applicant without an offsetting benefit to others.
35. *Id.*, s. 6.
36. *Id.*, s. 6(5).
37. It does not appear that a stop order has ever been issued for a coal processing plant operation. The Department of the Environment has implied that it will only issue a stop order when "the frequency of violations" is deemed excessive. (*See supra* n. 12 at 12-9) *See also* s. 9, Land Surface Conservation and Reclamation Act, *supra* n. 17, which provides for the issuance of a stop order where there are reasonably unforeseen "surface disturbance or other damage or consequences". However, it does not appear that a stop order can be issued for a violation of conditions imposed pursuant to ss. 21 or 24 of The Coal Conservation Act, *supra* n. 6. In other words, the Minister of the Environment may impose conditions but may not have the power to issue a stop order pursuant to s. 9 of The Land Surface Conservation and Reclamation Act if they are breached. In view of the wide latitude to direct reclamation procedures under Part 2 of The Land Surface Conservation and Reclamation Act, however, this inability to issue stop orders may not prove to be a serious impediment to ministerial discretion.

The Department of the Environment has authority to prepare and publish guidelines and standards for the construction and operation of coal processing plants.[38] It is not clear what status such guidelines and standards would have. It is also not clear whether a construction permit issued pursuant to s. 4 of the Act is the permission of the Director of Standards and Approvals required for the release of toxic air contaminants into the atmosphere.[39] Section 12 of The Clean Air (General) Regulations requires the reporting of uncontrolled or unauthorized releases of air contaminants. The Clean Air Regulations set forth the requirements for construction permits and operating licences necessary for compliance with the Act.

A permit under The Clean Water Act must be obtained by a coal processing plant.[40] As under The Clean Air Act, the Director of Standards and Approvals has wide latitude under The Clean Water Act.[41] Likewise, an operating licence is required and the Director of Standards and Approvals has broad discretionary powers.[42] "Certificates of variance", "water quality control orders" and "stop orders" are also provided for.[43] Section 9.1 prohibits the deposit of a deleterious substance in surface water, on a watercourse, or in any place where it may enter a watercourse or surface water. However, this section does not apply to an approval, permit or licence issued by the E.R.C.B..[44] Presumably, E.R.C.B. approvals for the mine and processing plant would therefore take a coal mine and processing plant outside the ambit of this section.[45] Section 12 of The Exploration Regulation[46] issued under The Mines and Minerals Act[47] also provides for a referral to the Department of the Environment if an exploration program involves a watercourse or water body.

The Department of the Environment has also issued the "Alberta Coal Mining Waste Water Effluent Guidelines."[48] They are to apply to all new coal mines. "Permits to construct or licences to operate under The Clean Water Act will be issued provided that the provisions of these guidelines have been considered and adequate waste water management provided to comply with the standards."[49] The guidelines are quite comprehensive and come complete with definitions. If clean water permits and licences are subject to these guidelines, one wonders why they have not been promulgated in regulation or legislative form. Presumably the guidelines

49. *Id.* Preface.

have been issued pursuant to s. 6 of The Clean Water (General) Regulations.[50]

In addition, ss. 30 and 31 of The Coal Conservation Regulations[51] empower the E.R.C.B. to direct the method of disposal of liquid and solid wastes. Should a conflict arise between an order of the Board in regard to waste disposal and a direction of the Department of the Environment, the E.R.C.B.'s statements and policies suggest that the Board would defer to the Department of the Environment.[52] It must be kept in mind that both the E.R.C.B. and the Department of the Environment can attach environmental conditions to a mine permit or a processing plant approval issued under The Coal Conservation Act.[53] The E.R.C.B. also has power to require security deposits in amounts up to $1,000 per acre directly affected by the proposed development.[54] These deposits can be utilized to ensure environmental protection.

Under the Historical Resources Act, the Minister of Culture may order proponents of a coal development to prepare historical resources impact assessments and to undertake directed conservation measures prior to development.[55] The E.R.C.B. Mining Guide, "How to Apply for Government Approval of Mining Activities in Alberta", sets out the purpose for the legislation and the contents that Alberta Culture feels should be in any historical resources impact assessment.[56]

---

50. *Supra* n. 45:
> The preparation, publication and sale of such criteria and guidelines with respect to the construction or operation of any water facility as the Minister thinks fit is authorized.

51. Alta. Reg. 229/74.

52. *Supra* n. 8. *See also* the Board's deferral to the Department of the Environment in regard to the siting of ancillary facilities.(*e.g.* Energy Resources Conservation Board and Alberta Department of Environment, ERCB-AE Report 79-AA, *In The Matter Of Applications By Alberta Power Limited, Forestburg Collieries Limited And Manalta Coal Ltd. For The Development Of The Sheerness Mine And The Construction And Operation Of A Proposed Sheerness Thermal Power Plant and In The Matter Of Applications By Edmonton Power For The Development Of The Genessee Mine And The Construction And Operation Of A Proposed Genessee Thermal Power Plant* (January 1979), s. 9.2. The Board in its findings will state how a particular concern can be alleviated, but does not always then attach an appropriate condition to the permit or approval. This may reflect a lack of confidence by the Board as to the extent of its jurisdiction.

53. S.A. 1973, c. 65, as am., ss. 23 and 24.

54. *See* Energy Resources Conservation Board Report No. 80-E, *Obed Marsh Coal Project, Hinton* (July 1980).

55. The Alberta Historical Resources Act, S.A. 1973, c. 5, as am., s. 22.

56. *Supra* n. 8, at 5-22:
> The intention is to stimulate conservation projects designed to locate, assess, recover, and record Alberta's historical, archeological, and paleontological resources.
>
> It is not the wish of the Heritage Resources Division of Alberta Culture to impede or halt any industrial development or other project, in pursuit of such conservation, although the Minister is empowered to do so should a valuable resource be threatened with destruction.
>
> In every instance, Culture wishes to encourage all proponents to ensure that their activities will not result in the destruction of valuable historic, archeological, or paleontological sites before these can be properly assessed and recorded.

Supra n. 8, at 7-6:
> The ERCB, and Alberta Culture through the Archeological Survey of Alberta, assume certain responsibilities in preserving significant archeological, historical, and paleontological resources that may otherwise be disturbed or destroyed by energy-related developments within the ERCB's jurisdiction, ...

In addition, the Department of Culture has issued "Interim Guidelines, Historical Resources Impact Assessments".[57] The legal status of these guidelines is unclear. The E.R.C.B. has also issued interim directives entitled, "Preservation of Archaeological, Paleontological and Historical Resources",[58] and has stated that it will require such surveys for all coal mine permit applications. After the proponent has advised the Director of the Archaeological Survey of Alberta of its assessment, the Director apparently will recommend the steps the proponent should take to ensure preservation and will entertain discussions with the proponent should the latter "consider the Director's recommendations impractical".[59] Only those site preservation measures that are agreed upon will definitely be included as conditions in any permit, licence or approval the E.R.C.B. may subsequently issue.[60] If, when proceeding with an authorized development, a previously unsuspected archaeological, historical or paleontological resource is encountered, the E.R.C.B. has stated that its staff should be notified, although there does not appear to be any obligation to do so. After examination of the site by the Director of the Archaeological Survey of Alberta, and where necessary, "the ERCB will then formally ensure compliance with the agreed upon measures by issuing a directive" to the proponent or by amending the subsisting permit, licence or approval.[61]

B. *Compatibility with other land uses*

> The Government recognizes the importance of Alberta's land resources for agriculture, recreation, forest products and wildlife, and is determined that proper attention be given to these alternative uses in the consideration of coal development projects. Some coal developments may be carried on with little disturbance of the land surface; others may involve the progressive disturbance of several square miles at any one time with reclamaton immediately to follow production operations. Only where the temporary withdrawal of the land from agricultural, recreational or other use for coal development is judged to be in the public interest, and where full reclamation is assured, will the Government authorize developments which would cause land disturbance.[62]

A basic premise behind both the Eastern Slopes policy[63] and the coal policy is the multiple use concept. In order for this concept to operate, only where the withdrawal of land from other uses for coal development is judged to be in the public interest and where full reclamation is assured, will the government authorize coal development which would cause land disturbance. Since permission to allow development of a major coal mine is subject to the approval of the Lieutenant Governor in Council,[64] he is the ultimate judge of the public interest in this regard.[65] Since surface coal mining in Alberta on a large scale is still in its infancy, what constitutes "full reclamation" is yet to be defined or evidenced by empirical data. The Department of the Environment, in its approval of reclamation plans to date, appears willing to accept scientific probabilities of full reclamation

65. However, the E.R.C.B. will make recommendations designed to minimize surface disburbance, *supra* n. 12 at 11-18.

rather than any "assured" full reclamation.[66] However, with the predicted widespread development of surface coal mining operations in areas of prime agricultural land, the issue of full reclamation will certainly have to be addressed further. Totally successful reclamation techniques in certain agricultural areas have yet to be established.[67]

Where existing or future land uses require ground water supplies, there does not appear to be any legal or technological guarantee of reinstatement of the underground aquifers. Nor does there appear to be provision for compensation for loss of ground water, although presumably the loss of ground water supplies would be reflected by a reduction in the market value of the land taken. However, if the land is not actually taken for the mine and ground water supplies are interrupted, there is no right to compensation.[68]

C. *Rights of owners of surface land*

The rights of the owners of surface land are recognized and will be respected along with those of owners or lessees of coal resources. Holders of rights to coal who do not own the surface will be expected to negotiate with the owners and occupants of the surface for consent to enter and for the temporary use of the land. Should negotiations fail, application may be made under the Surface Rights Act to the Surface Rights Board. The Board would hold a hearing on the application at which representations from the surface owner, lessee or occupant and any other interested party would be received. Where the Board grants a right of entry order it also determines what compensation should be paid and to whom. In determining the compensation the Board may consider a variety of matters, including the value of the land, the loss of use by the owner or occupant, adverse effects on the owner or occupant and damage to the land.[69]

The coal policy does not purport to alter the rights and procedures affecting private surface rights owners and occupants from that which already exists in regard to oil and gas well and pipeline operations. Holders of rights to coal are not only expected, but are obligated to negotiate with the owners and occupants of the surface if right of entry is desired.[70] If negotiations fail, right of entry can be obtained pursuant to the Surface Rights Act.[71] Where application is made to the Surface Rights Board for right of entry, a hearing before the Board is mandatory.[72] Compensation is determined pursuant to s. 23 of the Act.[73] The Board also has the right to arbitrate disputes between a mineral right owner and the owner or occupant of the surface for damage claims in amounts up to $2,000.[74] The Land Surface Conservation and Reclamation Council also

73. Although the E.R.C.B. has no jurisdiction over compensation, it does on occasion make its views known in this regard, *supra* n. 58 at 9-12.

74. *Id.*, s. 38. It appears that the E.R.C.B. does not feel that a county is entitled to compensation for or replacement of its roads that are lost to coal development, *see* Energy Resources Conservation Board and Alberta Department of Environment, ERCB-AE Report 78-AA, *In The Matter Of An Application By Forestburg Collieries Limited For A Permit To Develop And A Licence To Commence Mining Operations At A Mine Site near Halkirk* (June 1978) at 6-7.

has the power, with the consent of the parties concerned, to arbitrate damage claims.[75]

Recently conflicts have arisen between the owners of different subsurface rights.[76] Surface coal mines and oil and gas drilling cannot take place at the same time in the same area.[77] Notwithstanding ss. 25 and 26 of The Mines and Minerals Act, which state that a person who has the right to work a mineral may work through any other mineral in the same tract to the extent necessary to obtain his mineral without permission from or compensation to any other person,[78] it may be that at some point the Surface Rights Act will have to be utilized to compensate a mineral right owner who has suffered loss due to the actions of another mineral right owner. To date there have been no such claims for compensation and conflicts have either been resolved between the parties themselves or by the E.R.C.B.[79] Presently the Department of Energy and Natural Resources, in advertising sales notices of Crown petroleum and natural gas rights, identifies those lands subject to a mine permit issued by the E.R.C.B.[80] The E.R.C.B. also has new guidelines setting forth how these types of conflicts should be resolved.[81] These guidelines basically provide that well licences will not be granted in areas that are subject to a ten year mine plan in an approved mine site. The Department has stated that in appropriate circumstances oil and gas lease extensions pursuant to s. 12.1(1)f of The Mines and Minerals Act would be granted.

D. *Land surface reclamation*

The primary objective in land reclamation is to ensure that the mined or disturbed land will be returned to a state which will support plant and animal life or be otherwise productive or useful to man at least to the degree it was before it was disturbed. In many instances the land can be reclaimed to make it more productive, useful, or desirable than it was in its original state; every effort will be made towards this end.

The Land Surface Conservation and Reclamation Act requires the filing of an Environmental Impact Assessment as well as acceptable detailed mining and reclamation plans before approval to proceed with mining is granted. In addition, a security deposit based on the degree of disturbance and the quantity of coal produced will be required to ensure complete and satisfactory compliance with the regulations and approvals.

Land reclamation will include the contouring of the mined or disturbed lands, the replacement of the top soil, revegetation for soil stabilization, biological productivity and appearance, and suitable maintenance of the vegetation or, where appropriate, the conversion of the land to agricultural or other desirable use. Where applicable it will also include the replacement or rehabilitation of those facilities or features which were disrupted during the mining process and which are required to return the land to its former use. Since each reclamation program will be especially designed to suit the projected future use of the land, it will be necessary to establish this future use early in the review process. Representations will be invited from interested persons, especially any affected landowners and municipal governments.

> The Government will accelerate its current reclamation program on lands which were mined prior to effective reclamation legislation in 1973 with the objective of rendering the lands suitable for further beneficial uses. It will expect the coal industry to assist in this program.[82]

The purpose of the Alberta reclamation policy is not to restore the land to exactly the same contours, productivity, and so on that existed prior to the land being disturbed. Pursuant to s. 23 of The Land Surface Conservation and Reclamation Act, s. 3 of The Regulated Coal Surface Operations Regulations and The Land Conservation Regulations,[83] the opening up, operation, alteration, extension, or abandonment of a mine is designated a regulated surface operation. Approval to commence operations is required pursuant to s. 24 of the Act.[84] The Minister of the Environment has final approving authority over any such operation and may impose conditions as he sees fit.[85] This approval is presumably the development and reclamation approval that is provided for under The Regulated Coal Surface Operations Regulations.[86]

Applications for a development and reclamation approval go to the Development and Reclamation Review Committee established under Part 4 of The Land Conservation Regulations[87] to determine compliance with the regulations. This committee is composed of representatives from interested government departments. It examines "the general and overall impact of the proposed operation on the environment in relation to the Land Conservation Guidelines and the Development and Reclamation Guidelines . . . , the ability of the applicant to complete in a satisfactory manner, the proposed operation and any reclamation required in connection therewith, and the past performance of the applicant in respect of any prior operations or reclamation conducted by him".[88] The committee does have the power to recommend changes in the regulations or guidelines.[89] The committee also has authority to recommend a public meeting be held in regard to the application.[90] The Minister of the Environment or the

Chairman of the Land Conservation and Reclamation Council receives the recommendations of the Development and Reclamation Review Committee and either grants or refuses the development and reclamation approval.[91] Where "an operation will result in substantial permanent damage of sufficient magnitude to the environment" the Minister of the Environment may refuse the application or direct the operator to "undertake additional reclamation work to compensate for the loss of resources, especially recreation facilities and, if applicable, ungulate winter rangeland", or provide additional funding to the government for compensatory or amelioratory action.[92] Recreation facilities and ungulate winter rangeland have special importance attached to them through this regulation.[93]

A development and reclamation plan is mandatory[94] in order to obtain a development and reclamation approval and the required contents thereof are set forth in Part 5 of The Land Conservation Regulations[95] and Parts 3 and 4 of The Regulated Coal Surface Operations Regulations.[96] A development and reclamation plan would normally include reports on surface disturbance, geotechnical engineering, surface water management, groundwater management, water and air quality management and pollution control. Notwithstanding that the contents of all these reports are specifically set out in The Land Conservation Regulations,[97] an applicant may consult with the Department of the Environment in regard to what information or which reports, documents, maps and plans are necessary. The Chairman of the Land Conservation and Reclamation Council may then waive any of these requirements.[98] Since reclamation as a science is

98. *Supra* n. 86, s. 9.

relatively new in Alberta, the degree and methods of reclamation the Council requires are continually being modified.

The specifics of a land reclamation plan can also be gleaned from an analysis of the land reclamation "guidelines". The Development and Reclamation Review Committee has prepared a document entitled "Application Requirements for a Development and Reclamation Approval".[99] In addition, the Land Conservation and Reclamation Council has prepared "Guidelines for the Reclamation of Land Affected by Surface Disturbance".[100] In these latter guidelines it is reiterated that s. 35 of The Land Surface Conservation and Reclamation Act provides for the making of regulations, but in the absence of regulations s. 36 allows the Council to use other standards. It is the Council's "opinion that regulations at this point in time [presumably December 1977] would be too inflexible for satisfactory application and that more flexible guidelines would be more applicable".[101] These guidelines are to take the place of the regulations contemplated under s. 35. Reclamation criteria are set out in relative specificity. Although they are stated not to be regulations but only guidelines, the Council clarifies its position stating that the criteria "will be applied by the approving authorities under the Act and regulations".[102] The guidelines have as a reclamation goal "the return to, or the continuation or resumption of some appropriate land use upon the conclusion of the surface disturbance".[103] "Some appropriate land use" is presumably the "full reclamation" assured under the coal policy. An operator remains responsible for disturbed land until some indication is given that the reclamation desired is being effected; for example, productivity for agricultural land existing prior to the surface disturbance has been restored.

Although these guidelines do not have the status of legislation, it appears that they are being used as determinative of land reclamation plans. Since they are guidelines, they can be waived or varied at the discretion of the Land Conservation and Reclamation Council. It should be noted that the Council is not one body, but rather consists of different personnel depending on where the disturbance is located.[104] It is not known at this time whether the government intends to put into regulation form any of these guidelines.

Presumably the "facilities or features" the coal policy requires be replaced or rehabilitated would include man-made structures and buildings. The construction of buildings on reclaimed land, however, may prove to be a problem.[105] The future use of the land after reclamation must be established prior to any approval for disturbance being given. The degree to which uses other than the original land use will be permitted remains to be seen and will evolve through practice.

The specifics of the promised public representation include actual participation on the Development and Reclamation Council by local landowners and representatives of the municipal government in the case of lands located within the jurisdiction of a municipal government.[106]

If a party is not satisfied with the terms of his development and reclamation approval he may appeal it to the Minister of the Environment.[107] As well, the Development and Reclamation Review Committee is obligated to give reasons for any recommendation it makes.[108] This may enhance the exposure of such decisions to possible judicial review.

Section 12 of The Coal Conservation Act requires that a proposed scheme for reclamation be included in any mine permit application.[109] In practice, this is the same development and reclamation plan submitted to obtain development and reclamation approval. A mineral surface lease application must also provide for restoration.[110] At that stage of mine development, however, it is more likely that an applicant would already have his development and reclamation approval, thus fulfilling this requirement.

The Land Surface Conservation and Reclamation Act provides that surface rights in land cannot be surrendered until a reclamation certificate is issued by the Land Conservation and Reclamation Council.[111] The issuance or non-issuance of reclamation certificates can be appealed, including to the Court of Queen's Bench of Alberta, which hears the matter as a trial *de novo*.[112] Where reclamation has not been carried out satisfactorily, the Council may issue a reclamation order[113] directing proper reclamation, even if the owner or occupant of the surface of the land consents to the release of the operator.[114] The conditions under which the Council may issue a reclamation order are set out in s. 39 of the Act.[115] Interestingly, reclamation must be in accordance with the regulations that prescribe criteria or standards, but no reference is made to the use of guidelines in this regard.

111. *Supra* n. 75, s. 49.
112. *Supra* n. 75, ss. 56 and 57.
113. *Supra* n. 75, s. 53.
114. *Supra* n. 75, s. 52.
115. *Supra* n. 75, s. 39:
    (1) Where the Council is authorized to make a reclamation order under this Part, the order may direct the performance of any work that is necessary in the opinion of the Council to do any or all of the following in respect of the land that is the subject of the inquiry by the Council:
        (a) subject to subsection (3), to condition, maintain or reclaim the land or any part thereof, and land adjacent thereof, or
        (b) to destroy or prevent the growth of noxious weeds or weed seeds, or
        (c) to remove or remedy any hazard to human life, domestic livestock or wildlife, or to the conduct of agricultural or other operations, or
        (d) to install or repair any fence, gate, cattle guard, culvert or other thing.
    (2) A reclamation order shall specify the date by which the work is to be completed.
    (3) Where the regulations prescribe criteria or standards for, or the manner of carrying out, the conditioning, maintenance or reclamation of the land, the reclamation order shall be in accordance with the regulations.
    (4) A reclamation order shall be directed to the operator concerned.

A mineral surface lessee is required, prior to surrender of his lease, to "restore the leased area as nearly as possible to the same condition it was in at the time the application for the original lease was made, and such restoration shall be made to the satisfaction of the Minister".[116] In addition, the Minister of Energy and Natural Resources has the power to direct restoration. It would seem that it is the present intention of the government to have reclamation matters handled by the Department of the Environment, rather than the Department of Energy and Natural Resources and consequently this section may have fallen into disuse. The latter department does, however, play an active role in experimental reclamation test plots.

Part 7 of The Land Conservation Regulations provides for security deposits to ensure reclamation.[117] Where reclamation has been completed to the satisfaction of the land use officer the deposit is returned pursuant to s. 30 of the Act;[118] if the land has not been reclaimed all or part of the deposit may be retained. E.R.C.B. approval must be obtained before operations are suspended at a mine and part of this approval requires information as to the status of reclamation.[119] Annual status reports on reclamation must be given to the Land Conservation and Reclamation Council.[120]

In addition to the requirements for new mines the government has stated that it "will accelerate its current reclamation program on lands which were mined prior to effective reclamation legislation in 1973".[121] Under the Land Surface Conservation and Reclamation Act, provision is made for the reclaiming of lands to which the new legislation does not apply and that remain in need of reclamation.[122] Although the coal policy states that the coal industry is expected to assist in this program and although the legislation provides for this, to date such assistance has been merely voluntary on the coal industry's part, as the actual reclamation is being done at public expense and by public authorities.[123]

E. *Use of Alberta manpower, services, materials and equipment*

As a matter of policy the Government requires the maximum practical development and use of Alberta manpower, services, materials and equipment in all aspects of resource development, from initial planning and design through construction to final operation. Companies planning new coal developments must demonstrate that all efforts have been made to comply with the Government's policy in this regard.

This means, for example, that Alberta-based engineering and construction firms are to be given every opportunity to participate in the planning and conduct or operation of coal exploration and development projects, in the design and construction of equipment and plants, and in the related environmental protection and reclamation programs. Where local expertise is lacking or is only partly developed, developers will be expected to work with trade and professional associations and the Government to ensure that Albertans are given the opportunity to acquire the necessary skills and build their capability for future needs.

122. *Supra* n. 75, ss. 44 and 45.
123. Although apparently in the Crowsnest Pass area the government has used reclamation deposits for existing leases to reclaim old mine sites.

> The same principle applies to the provision of services, materials and equipment, including the design, construction and operation of facilities for manufacturing or fabricating essential materials and equipment in Alberta.[124]

The government has placed a major emphasis on this aspect of the coal policy. The prime method of ensuring compliance is through the Lieutenant Governor in Council's required approval for all coal mining operations over 45,000 tonnes per year and its ability to attach conditions thereto.[125] In addition, in deciding on the granting of any mine permit, the E.R.C.B. clearly wishes the applicant to make its plans in this regard known to it.[126] An examination of applications before the E.R.C.B. reveals examples of undertakings applicants are prepared to give in this regard.[127] The E.R.C.B. can then use its general jurisdiction to recommend approval conditions designed to implement this purpose of the coal policy.[128]

Unlike some other jurisdictions,[129] Alberta grants no express competitive advantage to Alberta companies. What constitutes "the max-

> The Board, with the approval of the Lieutenant Governor in Council, may make such just and reasonable orders or directions as may be necessary to effect the purposes of this Act but are not otherwise specifically authorized by this Act.

Supra n. 53, s. 14(c):

> Upon receiving an application under section 10, 11, or 13, the Board may, after considering the circumstances of the particular case, . . . grant a permit or licence or an amendment of a permit or licence, as the case may be, subject to such conditions, restrictions or stipulations as it may consider appropriate and set out in the permit or licence or amendment.

However, the Supreme Court of Canada has ruled that the E.R.C.B.'s authority to attach conditions is not unlimited. *See Athabasca Tribal Council* v. *Amoco Canada Petroleum Company Ltd. et al* unreported, (22 June 1981), 58-03; 3242-01 (S.C.C.)

129. *E.g.* Bill C-48, the proposed Canada Oil and Gas Act.

imum practical development and use" is at the discretion of the Lieutenant Governor in Council.

F. *Townsites and infrastructure*

> The Government is aware of the critical importance to any expansion of the coal industry of the availability of townsites, residences and commercial activities as well as schools, hospitals and community services. Also the Government is aware of the impact on a community of the kind of industrial development represented by the coal industry. The Government will encourage the improvement and growth of existing towns and facilities rather than the development of entirely new ones. It recognizes the weaknesses of "one-company" or even "one-resource" based communities and will promote economically feasible diversification wherever possible. The Government solicits the support of the coal industry in this regard and requests potential developers to propose projects which incorporate diversified activities. It agrees with the report of the Grande Cache Commission (Crump report) in recognizing that "reincarnation of the company town would ... be extremely unwise but the assumption of some of the financial risk of building the town by the compay might not be".[130]

The effect on townsites and infrastructures is always a prime concern of local residents when any major new coal mine or other industrial proposal is made for a location in proximity to what is usually a relatively small town. Oftentimes the majority of interventions at the E.R.C.B. hearing are concerned with matters of this nature.[131] Frequently the E.R.C.B. hearing is used as a public sounding board and as a perceived communication conduit to the relevant government departments that have jurisdiction in regard to infrastructure matters. The only jurisdiction of the E.R.C.B. to hear these concerns falls within its general "public interest" mandate, as there is no specific legislation directing it to examine such issues. On the other hand, the Lieutenant Governor in Council has on occasion attached conditions to its approvals that require "the assumption of some of the financial risk of building the town by the company."[132]

Unless it is a condition of a permit or approval, there are no legislated requirements for an applicant for a coal mine permit to provide assistance with development or expansion of infrastructure, such as schools, hospitals, and community services, other than by way of contributions through the existing property tax system. Recent examples of applicants undertaking to provide housing for workers have either been for planning reasons, for the development of the mine itself or at the request or admonition of the applicable government authorities. There is no express requirement for a mine applicant to provide such facilities.

A related problem arises due to the fact that coal mines are invariably located outside the boundaries of the local municipality which has to bear the brunt of housing and employee servicing costs required to enable construction and operation of the mine. This means that the sizeable prop-

---

130. *Supra* n. 1, s. 3.6.

131. *See* Obed Marsh Project, Application No. 790729, where seven out of twelve interventions emphasized the effect of the proposed coal mine on the local townsite and government infrastructure.

132. *See* the condition attached to Obed Marsh Project approval, O.C. 273/81:
> The Permittee shall satisfy the Minister of Municipal Affairs, the Minister of the Environment, the Minister of Transportation and the Minister of Energy and Natural Resources, prior to December 31, 1981, as to the plans of the Permittee with respect to
> (a) transportation services to and from the proposed development,
> (b) the housing of employees, and
> (c) the development of additional necessary infrastructure.

erty taxes arising from such a major industrial undertaking are for the most part outside the grasp of the municipality.[133]

The government does not intend to promote the creation of new company towns which would involve large government expenditures for creation of infrastructure, such as roads, municipal servicing, water and sewage treatment plants. In relation to the coal industry, the town of Grande Cache undoubtedly provides the best example of the government allowing and assisting in the creation of such a new town.[134] In addition to the government using its control of the permitting process as a means of discouraging new "one-company" or "one-resource" towns, development of such towns is also unlikely in view of the fact that governments are responsible for supplying the infrastructure for such a development and could simply refuse to supply these services to the mining operation, thus making it difficult and expensive to attract workers to the mine.[135]

G. *Transportation*

> The Government recognizes the vital role of transportation in the marketing of coal and will continue to support industries' efforts with the railways and the Government of Canada to ensure that planning and development of rail capacity keeps pace with needs and that freight rates are realistic. While some extension and upgrading of existing roads, bridges and railways will be inevitable, the Government believes that most of the desirable new developments can be approved for areas now reasonably well provided with transportation service. Where entirely new facilities are needed primarily for the use of a coal development, the Government would expect the developer to pay their full cost. In keeping with the concept of diversification of economic activity for improved stability of the towns which will serve the expanded coal industry, the transportation system will be developed having in mind diversified industrial growth.[136]

Currently the only method of transportation of coal outside of Alberta is by rail. Since the national railways fall under exclusive federal jurisdiction, the provincial government has little control over them, other than through financial contributions to the purchase of rolling stock or to actual rail lines (e.g. the Alberta Resources Railway), or representations it may make to the federal government. Significantly, the government has declined to offer the prospect of public financial contribution to rail line extensions to virgin coal areas similar to that which the Province of British Columbia has undertaken in northeastern British Columbia. The conclusion, therefore, is that in the field of rail transportation a coal

---

133. Except for the Industrial Tax Transfer Grant whereby contributions are made to the adjoining town or city from the pertinent municipal district, county or improvement district in which the development is located.

134. An interesting example of the opposite effect of a new coal mining proposal was the removal of the hamlet of Keephills due to the expansion of the Highvale mine.

135. In its 1973 review of the Alberta coal industry, Energy Resources Conservation Board, ERCB Report 74-E, *Review Of The Alberta Coal Industry 1973* (March 1974) the E.R.C.B. had the following to say at 12-5:

> From an overview of this study the Board also considers it necessary that closer attention be given to economic aspects of new coal developments. The Board recognizes that, in particular cases, major coal developments in the future may involve substantial Provincial commitments and expenditures by various levels of government and by private individuals, and that it would be in the public interest for the Government to have a reasonable assurance of the permanence and soundness of these investments. The Board believes that in such cases, it may be appropriate for the Lieutenant Governor in Council, under the provision of Section 24(1) of The Energy Resources Conservation Act, to request the Board to investigate the general economic feasibility of the proposed project and to advise the Government thereon. The requirement to provide a cost-benefit analysis is undoubtedly an outgrowth of this recommendation.

136. *Supra* n. 1, s. 3.7.

developer will have minimal involvement from the government of Alberta and the lack of legislation in this province reflects this absence of direct participation.

Freight rates for coal transportation are negotiated by the developer with either the Canadian National Railway or the Canadian Pacific Railway, both of which are governed by the federal Railway Act and the Canadian Transport Commission.[137] The government of the Province of Alberta has given no legislative indication as to how it intends that "the transportation system will be developed having in mind diversified industrial growth".

The government has, however, made provision for road transportation in its coal approval process. If a proposed project involves hauling coal on public roads the proponent is required to submit with his coal mine permit application a transportation impact assessment pursuant to the Public Highways Development Act.[138] The E.R.C.B. in its guide "How to Apply for Government Approval of Mining Activities in Alberta", has set forth the purpose and contents of a transportation impact assessment,[139] but there are no regulations concerning its content. The Board itself does not appear willing to assume a leading role in road planning for a coal development.[140]

In addition, Part 7 of The Exploration Regulation[141] provides for the protection of public roads during the exploration phase of coal development.

H. *Royalty on crown coal — taxes on freehold coal*

Alberta will levy a realistic royalty on all coal produced from Crown leases and will levy a property tax on coal contained in producing freehold properties.

A new schedule of royalties payable on all coal produced from Crown leases and used or marketed becomes effective July 1, 1976. Barring any major disruption of the economy or action of another government having a major impact upon revenues to the producer, the Government will plan to continue the use of the basic formula without change for a ten-year period.

Under The Mines and Minerals Act royalty is payable at the discretion of the Crown in kind as a percent of the quantity of coal used or marketed or in dollars as a percent of the deemed value of the coal used or the revenue received from the coal marketed. Where the Government is satisfied with the conditions of sale arranged by a lessee for the lessee's share of production, the Government may not take its royalty in kind and may request the lessee to market the royalty share of production along with the lessee share.

To recognize the high expenditures which must be made by a developer before revenues are produced, *there will be a "phase-in" period of 36 months from the start of commercial operations during which the rate of royalty will be increased in steps from a low initial level to the normal level.* The royalty will increase each 12 months over this period from 25 to 50, to 75 and finally to 100 percent of the normal level.

The *normal* royalty rate will be determined by a formula designed to ensure a fair share of revenues both to the developer and to the Alberta Crown under any reasonably foreseeable com-

138. R.S.A. 1970, c. 295, as am..

139. *Supra* n. 8 at 5-24:
Purpose of the TIA
The TIA is meant to provide the Government with information on
— any additional demand to be placed on existing roads
— the need to upgrade present roads
— the need for new transportation services
— any potential conflict between roads proposed by the applicant and existing or future public roads
— the proposed design of any junction or crossing of private and public roads.

140. *See supra* n. 52 at 17-6 and *supra* n. 74 at 6-7 et seq.

141. Alta. Reg. 423/78.

bination of investment level, operating costs, production levels and coal prices.

The formula will provide for a normal royalty rate which:

(a) will not seriously restrict the rate of return to the investor in viable projects when total revenues only marginally exceed costs,

(b) will provide the Crown with approximately a one-third share of the total revenue under circumstances where the total revenue sufficiently exceeds the costs to provide a rate of return to the developer adequate to stimulate further exploration and development, and

(c) will provide the Crown with an increasing share of the total revenue when the return to the developer exceeds the rate mentioned above.

Details of the formula are given in Appendix I.

To ensure that the people of Alberta receive appropriate revenue from those coal reserves which are privately held, the Government will act under the Freehold Mineral Taxation Act and, effective January 1, 1977 will levy a property tax on those coal resources which are generating revenues to their owners. The tax will be based upon an assessed value of freehold coal property. Details of the assessment procedure will be developed in the near future and presented in regulations.[142]

When the coal policy was announced in 1976, the new royalty structure was seen as one of the more significant weather vanes indicative of the directions the government of Alberta intended to take. Previously the royalty rates for coal were at a fixed rate per ton.[143] In its 1973 "Review of the Alberta Coal Industry",[144] the E.R.C.B. recommended higher royalty rates. The coal policy now provides for a sliding scale royalty which reaches significantly higher than what is provided for in British Columbia.[145] In effect, the government of Alberta has put the coal industry on notice that it sees no particular reason for haste in development of the industry in Alberta. Undoubtedly the province's current resource revenues and economic benefits arising from the petroleum and natural gas sector mitigate against the necessity of a rapidly expanding coal industry.

The royalty structure is set forth in The Coal Royalty Regulations.[146]

---

142. *Supra* n. 1, s. 3.8. (emphasis in original).

143. Ten cents per ton.

144. *Supra* n. 135.

145. British Columbia's royalty rate is twenty-five cents per ton for thermal coal and $1.25 per ton for metallurgical coal.

146. Originally Alta. Reg. 193/76, but the actual royalty schedule was changed by Alta. Reg. 232/78:

The rate of royalty for a month for all agreements granting coal rights shall be the greater of

(a) 5%, or

(b) the rate calculated in accordance with the following equation:

$$X = K\left(1 - \frac{C}{R}\right)^2,$$

where

X is the rate of royalty payable expressed as a percentage of marketable coal and products obtained from coal,

K is the project factor for a coal project or new coal project as determined in accordance with the following equation:

$$K = \frac{50}{1 + \frac{C}{R}\left(0.30\,\frac{I}{C} - 1\right)}$$

where

I is the annual investment allowance of a coal project or new coal project,

C is the annual cost allowance of a coal project or new coal project, and

R is the annual revenue from a coal project or new project,

but where "C" exceeds "R", $\frac{\text{"C"}}{R}$ is deemed to be 1."

One questions whether this royalty structure is as "realistic" and "fair" as the coal policy suggests it is.[147]

The government has given no indication as to whether it plans any significant changes in the royalty structure upon the conclusion of the ten year period it advised it was prepared to wait. To date the government has taken no royalty share in kind.[148] Undoubtedly, at least part of the reason for inclusion of a provision allowing the taking of royalty in kind is the prospect of a constitutional struggle similar to that in which the federal and Alberta governments engaged over petroleum and natural gas revenue sharing.

The thirty-six month royalty phase-in is provided for in s. 3 of The Coal Royalty Regulations.[149] In its application the royalty rate varies from a low of 5 percent to a maximum royalty of approximately 35 percent,

147. The actual royalty can be calculated as follows:

CALCULATION OF ROYALTY FOR
COAL PRODUCED FROM ALBERTA CROWN LEASES

1) CALCULATE – ANNUAL COST ALLOWANCE "C"

Operating Cost
Provision for Mine Closing
Indirect Costs
Ammortization of Capital Investment
Annual Cost Allowance "C"

2) CALCULATE – ALLOWED CUMULATIVE INVESTMENT "I"

Ammortization Base, Previous Year
Capital Additions
Inflation Adjustment
Less
Ammortization of Capital Investment
Plus
Provision for Working Capital
Allowed Cumulative Investment "I"

3) CALCULATE – ANNUAL REVENUE "R"

Total Revenue
Less
Ex. Mine Costs
Annual Revenue "R"

4) CALCULATE – PROJECT CHARACTERIZING FACTOR "K"

$$K = \frac{50}{1 + \frac{C}{R}(0.30\,\frac{I}{C} - 1)}$$

5) CALCULATE – ROYALTY "X"

$$X = K\left(1 - \frac{C}{R}\right)^2$$

The government has published "Interim Guidelines for the Calculation of Crown Royalty and Other Products" (1 July 1976).

148. *Supra* n. 146, s. 5, and *supra* n. 78, s. 31(4). Note, however, that there does not appear to be any Ministerial power to deem a market value for royalty calculation purposes, as is the case with petroleum and natural gas.

149. *Id.*.

however, the Lieutenant Governor in Council has the power to reduce the coal royalty below 5 percent.[150]

The provisions of the Freehold Mineral Taxation Act are designed to effectively mimic the current crown royalty for coal produced from freehold coal reserves, however, no regulations in this regard have been developed to date.[151]

Coal production, the disposition thereof and the value of sales must be reported monthly to the Department of Energy and Natural Resources[152] and the E.R.C.B.[153]

I. *Opportunity for equity participation by Albertans*

> The Government has recognized the need to provide individual Albertans with an opportunity to invest in the development of the Province's energy and natural resources through creation of the Alberta Energy Company. As a matter of principle it believes that Albertans should be able to participate in the equity ownership of such resource developments.
>
> The Government expects that many Albertans would welcome the opportunity to invest in the growth of Alberta's coal industry either directly or through the Alberta Energy Company. Consideration will therefore be given to the degree to which a developer proposes to provide this opportunity and, for developments involving Crown leases, project approval will be conditional upon the manner and degree of equity participation available to Albertans. It is assumed that such equity participation would commence immediately following project approval and would share in both the risk and profit.[154]

The Lieutenant Governor in Council, in considering for approval a coal mine permit application, attaches importance to the opportunities for equity participation by Albertans. To date the government has appeared to examine each application on its merits and has given no indication as to any formalized level of Alberta equity participation that it wishes to see in Alberta coal projects. In the Luscar Sterco (1977) Ltd. Coal Valley operation, for example, the Alberta Energy Company holds a 25 percent equity participation. More recently Union Oil Company of Canada Limited and Rescon Coal Holdings Ltd. received a coal mine permit for the Obed Marsh Thermal Coal Project. Rescon is a private Alberta company and Union, a public company holding 90 percent of the project at the time of the issuance of the mine permit, was approximately 13 percent Canadian owned. The Alberta equity participation is therefore not known, although Union did advise it had undertaken to offer participation to Albertans.[155]

There has been no direct or indirect expropriation of coal reserves in place, nor granting of such to Albertans, the Alberta government, the Alberta Energy Company nor to any Alberta crown corporation. It would

---

150. *Id.*, s. 3(6):
> Where in his opinion it is necessary or desirable in the interest of conservation and the prevention of waste or the loss of recovery of marketable coal or products of the coal, the Lieutenant Governor in Council may by order
> (a) prescribe a royalty payable with respect to the marketable coal or products of the coal that is less than the royalty that would otherwise be payable under these regulations, and
> (b) prescribe the period in respect of which the order is to apply.

151. Although assessment procedures are set forth in Part III of The Mineral Rights Assessment Regulations, Alta. Reg. 357/73. A freehold mineral tax apparently used to be levied, but was discontinued due to the minimal government revenues recovered.

154. *Supra* n. 1, s. 3.9.

155. Union Oil Company of Canada Limited, "Interim Report to Shareholders," (31 March 1981).

appear that the government is following its assumption that Alberta equity participation would share in both the risk and the profit.

In order to monitor the situation The Coal Conservation Act provides that if there is any change in ownership of a mine or of a coal processing plant, the E.R.C.B. must be notified.[156]

J. *Timing of developments*

> The Government recognizes that it may not be in Alberta's best interests that each major industrial development proceed within the time frame which the developer proposes and that some Government adjustment of the scheduling of projects may be necessary in recognition of such factors as the market situation, the assurance that Alberta's own requirements for coal are met, the prevention of a peaking of demand for capital available for Alberta projects, the supply for manpower, services, materials and equipment available in Alberta and the availability of adequate infrastructure. For these reasons the Government will exercise an overall control on the time when major coal (and other) developments are permitted to proceed.
>
> Should the Government find it desirable in the public interest to require the deferral of a proposed development meeting other requirements of this policy, lease rentals and work requirements on affected Crown properties would be suspended for the period of the deferral.[157]

The factors relevant to scheduling of projects as set out in the coal policy, for the most part are not reflected in any specific legislation or regulations. Presumably such factors would either be considered by the E.R.C.B. during the permitting process or by the Lieutenant Governor in Council prior to the approval of any permit.[158] To date the government has not refused to approve a mine permit in order to delay a coal project for any of the reasons set forth in the coal policy. However, in the case of the proposed Dodds Roundhill coal development in 1976, the government did make its apprehensions known, which undoubtedly was a factor in the developer not proceeding with the project.[159] As well, the E.R.C.B. has ruled on the timing of the development of the Sheerness, Genessee, and Keephills power projects, which in turn has affected the development of the mines supplying coal to these projects.[160] Should a project be deferred, The Mines and Minerals Act[161] permits the Minister to waive lease rentals and work requirements for the period of the deferral.

K. *Overall benefit to Alberta*

> A fundamental feature of the Government's policy is that no coal development will be permitted to proceed unless in its overall economic and social impact it is clearly beneficial to Alberta. This will be ensured by requiring that any proposal for a significant coal development be supported by a detailed Cost-Benefit and Social Impact Analysis which will be assessed by the appropriate departments and agencies of the Government and finally by the Executive Council. The analysis and assessment will incorporate the results of an Environmental Impact Assessment and will evaluate and weigh all significant direct and indirect benefits against all significant direct and indirect costs or adverse effects. Consideration will be given not only to those costs and benefits which are measurable in dollars but also to the more subjective, social costs and benefits.
>
> In order that consideration of proposals for development may proceed on a co-ordinated basis and that worthy projects will not be unduly delayed, an applicant for project approval will be required to file a Cost-Benefit and Social Impact Analysis, an Environmental Impact Assessment and a Development and Reclamation Plan simultaneously with the Technical Application under The Coal Conservation Act. The Environmental Impact Assessment and the Development and

160. *See* addendum to ERCB-AE Report 79-AA, *In the Matter of a Power Plant and Coal Mine at Genessee.*

161. *Supra* n. 78, s. 12.1(1)d.

Reclamation Plan will be reviewed by all concerned departments with the appraisal being co-ordinated by the Department of the Environment. The Department will also be responsible for considering the specific applications under the environmental legislation.

Appraisal of the Cost-Benefit and Social Impact Analysis will involve all concerned departments of the Government and the Energy Resources Conservation Board and will be co-ordinated by the Department of Energy and Natural Resources.[162]

The E.R.C.B. requires a cost-benefit and social impact analysis pursuant to its general purposes under s. 4 of The Coal Conservation Act.[163] To date there are no regulations setting forth the contents of such an analysis, however, the government has published "Guidelines for the Preparation of a Cost-Benefit and Social Impact Analysis".[164] The E.R.C.B. specifically addresses this document but it makes no decision on the matter; the Board only notifies the Department of Energy and Natural Resources as to its views on the entire cost-benefit and social impact analysis.[165] There would appear to be no legal obligation on an applicant to "evaluate and weigh *all* significant direct and indirect benefits against *all* significant direct and indirect costs or adverse effects".[166] Therefore determination of the adequacy of any such analysis is at the discretion of the particular body concerned with its review. Should the analysis be inadequate or should the development be found to not be clearly beneficial to Alberta, the Lieutenant Governor in Council could exercise his discretion and refuse to approve the mine permit.

The status of the cost-benefit and social impact analysis guidelines is not clear. Although they have no legislative sanction, a mine permit applicant can be requested to comply with the guidelines by the E.R.C.B. or the government. Should he not do so, the granting of a permit to the applicant may be placed in jeopardy. Conversely, the appropriate body has the administrative capability to ignore the guidelines should it feel that doing so is warranted. The issue can be contentious when an applicant is requested to include in his analysis data that he wishes to keep confidential from competitors, for example, mining costs. It does not appear that there is any impetus to give legislative sanction to the guidelines, even though a great number of these guidelines are currently applied without exception to all coal mine permit applications.

L. *Granting of rights to explore for coal*

Rights to explore for coal under public lands may be granted whether or not an applicant has the leasehold right to produce the coal from under the lands but will only be granted under conditions which will ensure no significant adverse environmental impact.

The right to enter on the surface of public lands is granted under The Public Lands Act; approval must be obtained from the Local Authority to use public roads or road allowances. Control of the actual exporation activity and all associated operations on public lands is exercised primarily through The Coal Conservation Act, The Geophysical Regulations (under various acts), and The Land Surface Conservation and Reclamation Act. The provisions of The Clean Air Act, The Clean Water Act, The Water Resources Act, The Forests Act 1971 and The Forest and Prairie Protection Act must also be complied with.

162. *Supra* n. 1, s. 3.11.

163. *Supra* n. 53.

164. Department of Energy and Natural Resources, "Guidelines for the Preparation of a Cost-Benefit and Social Impact Analysis" (September 1976).

165. *Supra* n. 8 at 7-6.

166. There is not even an express obligation to evaluate *some* of the benefits and costs. McIntyre Mines Ltd. did not submit any cost-benefit analysis for the expansion of its No. 9 mine nor did Forestburg Collieries Limited submit such in its 1978 mine expansion application.

> Rights to explore for coal under private lands (whether the coal is owned by the Crown or otherwise) may also be granted separately from the right to produce the coal. The right of entry to the surface must be negotiated with the surface owner. The actual exploration activity and associated operations in the field will be made subject to much the same control as on public lands.[167]

Under The Public Lands Act and its accompanying regulations[168] licences of occupation, as well as mineral surface leases, miscellaneous leases and easement agreements, can all be acquired. However, for preliminary exploration purposes the Department of Energy and Natural Resources will issue a letter of authority to enter on public lands and no formal request for such a letter is necessarily required. The Minister also has the right to refuse to accept applications for entry onto specific public lands or to refuse to issue licences of occupation.[169]

Except for specified exceptions a licence to conduct exploration is also required.[170] As well, the exploration program must be approved and no equipment can be operated without an exploration permit.[171] The exceptions where no exploration licence is required are set out in s. 2 of The Exploration Regulation.[172] Consent to explore must also be obtained from persons in occupation of the surface of the land.[173] Exploration restricted areas have been created in which no exploration, including the drilling of holes, may be conducted.[174] Other lands can also be removed from exploration potential pursuant to The Land Surface Conservation and Reclamation Act or pursuant to the designation of restricted development areas or water conservation areas.[175]

Where the method of exploration involves a surface disturbance, approval must be sought pursuant to Part II of The Regulated Coal Surface Operations Regulations.[176] Application is made to the E.R.C.B., which in turn forwards it to the Exploration Review Committee of the Land Conservation and Reclamation Council.[177] The Exploration Review Committee considers the application having regard to "the general and overall impact of the proposed exploration on the environment in relation to the Land Conservation Guidelines, the ability of the applicant to complete in a satisfactory manner the proposed exploration and any reclamation required in connection therewith, and the past performance of the applicant in respect of any prior exploration or development or reclamation conducted by him".[178]

For deeper drilling or major excavation, exploration approval must be obtained pursuant to Part II of The Coal Conservation Regulations.[179] Ex-

ploration that may affect any water resources, such as overburden drainage, depressurization of basal acquifers or diversion of surface or sub-surface water, requires an exploration permit under The Water Resources Act.[180]

When coal leases are acquired by public tender and a bonus is paid, exploration expenditures which are part of an exploration program approved by the E.R.C.B. can be applied against the bonus until it has been totally refunded.[181]

M. *Classification of lands for coal exploration and development*

Having regard to the questions of environmental sensitivity, alternate land uses, potential coal resources and the extent of existing development of townsites and transportation facilities, the Government has classified Provincial lands into four categories with respect to coal exploration and development:

Category 1 in which no exploration or commercial development will be permitted. This category includes National Parks, present or proposed Provincial Parks, Wilderness Areas, Natural Areas, Restricted Development Study Areas, Watershed Research Study Basins, Designated Recreation Areas, Designated Heritage Sites, Wildlife Sanctuaries, settled urban areas and major lakes and rivers. These are areas for which it has been determined that alternate land uses have a higher priority than coal activity. Category 1 also includes most areas associated with high environmental sensitivity; these are areas for which reclamation of disturbed lands cannot be assured with existing technology and in which the watershed must be protected.

Category 2 in which limited exploration is desirable and may be permitted under strict control but in which commerical [sic] development by surface mining will not normally be considered at the present time. This category contains lands in the Rocky Mountains and Foothills for which the preferred land or resource use remains to be determined, or areas where infrastructure facilities are generally absent or considered inadequate to support major mining operations. In addition this category contains local areas of high environmental sensitivity in which neither exploration or development activities will be permitted. Underground mining or *in-situ* operations may be permitted in areas within this category where the surface effects of the operation are deemed to be environmentally acceptable.

Category 3 in which exploration is desirable and may be permitted under appropriate control but in which development by surface or underground mining or *in-situ* operations will be approved subject to proper assurances respecting protection of the environment and reclamation of disturbed lands and as the provision of needed infrastructure is determined to be in the public interest. This category covers the Northern Forested Region and eastern portions of the Eastern Slopes Region shown in Map 1 of Appendix 2. It also includes Class 1 and Class 2 agricultural lands in the settled regions of the Province. Although lands in this category are generally less sensitive from an environmental standpoint than the lands in Category 2, the Government will require appropriate assurances, with respect to surface mining operations on agricultural lands, that such lands will be reclaimed to a level of productivity equal to or greater than that which existed prior to mining.

Category 4 in which exploration may be permitted under appropriate control and in which surface or underground mining or *in-situ* operations may be considered subject to proper assurances respecting protection of the environment and reclamation of disturbed lands. This category covers the parts of the Province not included in the other three categories.

Table 1 presents a summary of the classification system and the extent of exploration and development permitted in the four land categories. A further description of the Categories and two maps related to them are given in Appendix 2.

The Government emphasizes that the present classification, while based upon the best available knowledge, is subject to review in the light of changing knowledge and new technology related to environment protection, reclamation and mining methods. The Government will consider documented applications for reclassification of lands from any interested persons. Such applications should be addressed to the Minister of Energy and Natural Resources with a copy to the Minister of the Environment.

It is also important to note that lands in Category 2, 3 or 4 are not *automatically* open to exploration nor are lands in Category 3 or 4 *automatically* open to exploration and development. Each ap-

180. *Supra* n. 28.

181. *See* Energy and Natural Resources Information Letter 78-12.

plication for rights to explore, for leases to Crown coal rights and for authorization for development will be considered on its own merits through the procedure outlined in Section 4.1, 4.2 and 4.3. Particular care will be taken in the appraisal of applications for exploration or development in productive or potentially productive agricultural areas.[182]

The zoning system established by the coal policy is strictly internal to the Department of Energy and Natural Resources. No reference is made to it in any legislation or regulations. Administration and enforcement of the various zones centres on ministerial discretion.[183] As well, the majority of the lands falling within Category 1 are governed by legislation which already gives the government the power to restrict development[184] and the majority of all Category 2 lands are owned by the Crown as to both surface and mineral rights. Thus the government has the proprietary control necessary to implement the zoning system. The land use zoning in the coal policy also meshes closely with the zoning carried out under the

182. *Supra* n. 1, s. 3.13. Interestingly, the E.R.C.B. recital of the zoning policy in its Mining Guide (*supra* n. 8) has made slight changes to the explanation of the four categories.

183. *E.g.*, The Mines and Minerals Act, *supra* n. 78, ss. 12 and 12.1:
s. 12 (1) The Minister may restrict the dispostion or withdraw from disposition any mineral in any specified area in any manner he may consider warranted.
(2) During the period that a mineral is withdrawn from disposition pursuant to subsection (1), no person has the right to acquire that mineral in all or any part of the area specified.

s.12.1 (1) The Minister may
(a) exchange any Crown minerals for other minerals in Alberta;
(b) acquire by expropriation any estate or interest in mines or minerals where the Minister is of the opinion that any or any further exploration for or development of those mines or minerals is not in the public interest;
(c) accept the surrender of, cancel or refuse to renew an agreement as to all or part of the location where the Minister is of the opinion that any or any further exploration for or development of the mineral to which the agreement relates within that location or part thereof is not in the public interest, subject to the payment of compensation determined in accordance with the regulations for the lessee's interest under the agreement;
(d) order the remission of all or part of any rental, fee or other sum payable under this Act, the regulations or an agreement, with or without conditions;
(e) where any provision of this Act, the regulations or an agreement requires the doing of any act within a fixed period or at a fixed time, by order, with or without conditions, extend that period or fix another time by or on which that act is to be done, whether the period within which or the time by or on which the act ought to be done has or has not expired or arrived, as the case may be;
(f) where he receives evidence satisfactory to him that a lessee has been prohibited by circumstances beyond the lessee's control, other than financial circumstances, from conducting operations on his location, from time to time agree with the lessee to extend the term of the lessee's agreement for an additional period or periods not exceeding 5 years in the aggregate upon any condition specified by the Minister in the case of any extension;
(g) reinstate upon such terms and conditions he may prescribe, an agreement, a part of the location of an agreement or a zone in the location of an agreement, that has been surrendered, cancelled or forefeited, if application for the reinstatement is made
(i) within 30 days of the date of the surrender, cancellation or forefeiture, or
(ii) within 90 days of the date of the surrender, cancellation or forfeiture, where the surrender, cancellation or forfeiture was made in error;
(h) where he considers that the circumstances warrant it, agree with a lessee to grant an agreement to the lessee in substitution for an agreement held by the lessee.
(2) Within 60 days of the completion of an exchange under subsection (1), clause (a), the Minister shall cause to be published in the Gazette a notice stating the particulars of the exchange and the reason for the exchange.

184. *E.g.* The Wilderness Areas Act, S.A. 1971, c. 114, as am.; and The Provincial Parks Act, S.A. 1974, c. 51.

Eastern Slopes Policy.[185] Coal leases in Category 4 lands are presently available for disposition.[186]

Since the zoning system is not legislated, the appeal procedures set out in the coal policy are handled administratively. Questions such as who might be an interested person, what might be the consequences of an "unfair" administrative rejection of an appeal, or what were the original reasons for the particular zoning,[187] would therefore not seem to be answerable or reviewable by resort to the courts. The E.R.C.B. has, however, set out nine specific pieces of information required when any coal zoning appeal is taken.[188]

N. *Submission of results of exploration*

> The Coal Conservation Act and regulations under it require the full submission to the Energy Resources Conservation Board of the results of exploration activity. This includes samples, cores, test data, surveys logs [sic] and other relevant data or information. These data are of vital importance in appraising the extent of Alberta's coal reserves. This information is kept confidential for a period of time and then becomes available to the public.[189]

The E.R.C.B.'s jurisdiction in this regard comes from s. 4(g) of The Coal Conservation Act.[190] Part IV of The Coal Conservation Regulations sets out what is required to be submitted to the E.R.C.B.[191] Data regarding the

185. *Supra* n. 2.

186. *Supra* n. 181.

187. *E.g.* the Government has admitted that one of the factors influencing the original zoning was the location of coal reserves that were known at the time.

188. *Supra* n. 8 at 2-4:
Information Requirements for Applications for Reclassification of Lands Under the Coal Development Policy:
- A statement explaining the nature and purpose of the proposed reclassification.
- An overall statement of justification for the change, describing the economic and/or social benefits to the province should such a reclassification be approved.
- If a more protective classification is being requested, the applicant must submit sufficient background information to prove the significance of the area in both a regional and provincial context in order to justify the withdrawal of land and resources from future exploration or development.
- A statement of the exploration or development to take place including the reasons for selecting the particular site, the principal developer, a description of the specific activities to be undertaken on the land.
- A statement describing the timing of any exploration or development.
- A statement of present and possible land use conflicts, eg. timber, grazing, recreation, fisheries and wildlife, and how the conflicts will be resolved.
- A statement describing the known and foreseen environmental effects on the area, including impact on such things as water, soil, timber, vegetation and any measures that will be required to minimize any known or expected adverse effect.
- A statement describing the reclamation measures that will be taken when the activities are completed or terminated.
- A map(s) illustrating (scale – medium, eg. 1:50,000)
  - the location of the proposed reclassification by Quarter section, Township, Range, and Meridian.
  - the location of proposed and/or existing infrastructure such as roads, trails, and powerlines.
  - details of Crown leases and freehold coal lands ownership within the proposed exploration/mining area.

189. *Supra* n. 1, s. 3.14.

190. *Supra* n. 53:
The purposes of this Act are . . . (g) to provide for the recording, and for the timely and useful dissemination of data and information relating to exploration for coal and to the occurrence, reserves, quality, production, transportation, processing and use of coal in Alberta.

191. *Supra* n. 119, *see also supra* n. 8 at 3-13.

location and drilling of exploratory holes is available to the public immediately, while the logs, core segments, etc. therefrom are not available until two years from completion of the hole.[192] Data from infill holes are kept confidential for five years.[193] Special tests submitted to the Board are kept confidential until the Board decides their release is in the public interest.[194] However, an operator may request that all his exploration data be kept confidential.[195] The Board may use confidential information for certain specified purposes.[196] Certain information regarding surface disturbances must be submitted to the Land Conservation and Reclamation Council upon completion of an exploration program.[197]

O. *Restrictions on existing leases; lease purchase by the government*

> The Government recognizes that the restrictions now imposed on exploration and development in the areas classified as Category 1, 2 or 3 will affect persons holding Crown leases in areas in those categories and is prepared to purchase such leases for sums commensurate with expenditures which have been made with respect to them by the lessees. The Government requests holders of such leases in Category 1 to sell them back to the Government on this basis. Leases not sold will be subject to normal rental payments but will not be renewed on expiry of their terms.
>
> Holders of Crown leases in Categories 2 and 3 may also sell their leases back to the Government. Alternately, they may continue to hold them on payment of normal rentals, recognizing the restrictions on development, and may expect them to be renewed on application.
>
> Where the Government buys back Crown leases in areas in Categories 1, 2 or 3 it will do so on the basis of approved expenditures, adjusted to a current dollar basis, plus interest.
>
> Where freehold rights to coal and leases of such rights are affected by the restrictions on exploration and development imposed by Categories 1, 2 and 3, the Government is prepared to purchase the lessor rights on the same basis as for lessees of Crown rights.
>
> Where the Government purchases leases as described above the results of any exploration work done on the leases will immediately be released to the public.[198]

The buy-back is accomplished pursuant to s. 12.2(1) of The Mines and Minerals Act.[199] The amount of compensation is determined in accordance with The Mineral Rights Compensation Regulation.[200] Bonus application fees, rentals, exploration and development costs, plus interest for up to ten years, are all included in this compensation.[201] Since the regulations are phrased in the imperative it appears that the Minister is obligated to pay these amounts. Any party who has a lease repurchased or cancelled

---

also acquires a right of first refusal should the government decide to reissue the lease at some future date.[202] The Lieutenant Governor in Council may authorize the purchase of mineral rights in order to prevent environmental degradation or "inconsistent" use of land.[203] The government has stated that it would be willing to buy back any affected Crown leases if it rejects a development proposal at the preliminary disclosure stage.[204] However, it is not obligated to do so and it seems that there would be instances of rejection at the preliminary disclosure stage where the government would not offer to buy back the affected Crown leases, for example, if it was rejected by reason of failure of the applicant to comply with an approval requirement. In fact, in no instances would it appear that the government is obligated to buy back leases; its only obligation is to pay certain amounts once it has decided to repurchase the leases. The Mineral Rights Compensation Regulations,[205] in determining compensation, make no provision for an adjustment to a current dollar basis, as was the stated intention under the coal policy.

P. *Granting of leases for development*

> About 80 percent of the coal resources of Alberta are owned by the Crown in the right of Alberta. The remaining privately owned 20 percent are located mainly in the central and southern settled regions of the Province.
>
> Leases of Crown coal rights granting the right to produce the coal (subject to all applicable regulatory requirements) are issued under the provisions of The Mines and Minerals Act; such leases have an initial term of 21 years and require payment of an annual rental of $1 per acre per year.
>
> The Government has recognized that the leasing of Crown coal rights must accord with general land use and resource development policies applicable to all public lands in Alberta. Consequently since June, 1973 Crown coal leases have not been granted in areas such as the Eastern Slopes where long-term resource development policies have been under review. Elsewhere in the Province, leases of Crown coal rights have been granted only after review by an interdepartmental referral committee, and only in areas where it seems likely that exploration and development activities can meet strict environmental protection and reclamation standards.
>
> In keeping with this policy, new coal leases will be granted only in areas where a reasonable likelihood exists that commercial mining operations will be permitted in the foreseeable future, subject to normal approval and regulatory procedures. Time-dated applications for new leases in Category 2 or 3 lands will be received and given preference in the order of receipt if and when the lands are reclassified as Category 4 or a specific development is approved. The possible need for the issuance of exploration permits will be considered. . .
>
> New leases and renewals will be issued for initial or renewal terms of 15 years. The right of lease renewal will be assured to lease holders who commence or receive approval for commercial development. This will apply to all leases covered by the project approval. New leases and renewals will be subject to annual rental payments at the present rate of $1 per acre, but holders of them may be required to conduct satisfactory programs of detailed reserves appraisal unless commercial operations are underway. The results of the appraisal would be submitted both to the Department of Energy and Natural Resources and to the Energy Resources Conservation Board.[206]

Crown coal leases, as well as being subject to the terms specifically included in the document, are also subject to the provisions of The Mines and Minerals Act.[207] For anything but Category 4 lands, the Department

202. *Id.*, s. 8.

203. *Supra* n. 75, s. 14:
> The Lieutenant Governor in Council upon the recommendation of the Minister, may authorize the Minister of Energy and National Resources to acquire by expropriation any estate or interest in mines or minerals within, upon or under any land to prevent the environmental degradation or inconsistent use of that land as a result of the exploration for or recovery of those mine or minerals.

204. *Supra* n. 8 at 4-5.

205. *Supra* n. 200.

206. *Supra* n. 1, s. 3.16.

207. *Supra* n. 78.

of Energy and Natural Resources currently accepts applications for leases and time dates them, but does not issue coal leases. Where there is more than one interested party for a particular acreage, the Department has the discretion to lease the mineral interest by public tender.[208] It is not known whether the practice of time dating coal lease applications would give any party a priority right to the actual coal leases. The Minister, it seems, would still have the discretion to issue a particular coal lease to a party who was not the first to apply for it. In spite of the coal policy assurance of a renewal of leases in approved commercial developments, the government is under no obligation to renew coal leases.[209] On the other hand, a coal lease purports to grant the right to the coal that is the property of the Crown and not merely the right to produce the coal, as is usually the case with Crown mineral grants.[210]

No syndicate or other association of persons can acquire a lease in the name of that association unless it has been incorporated by or under an Act of the Province and approved by the Minister as an association that may hold the lease.[211] The Crown Mineral Disposition Review Committee established under Part II of The Land Conservation Regulations, prior to the disposition of any Crown mineral rights, reviews the surface of the lands and the lands adjacent thereto having regard to the nature of the proposed disposition and its effect or possible effect on the environment and subsequently recommends granting of the lease or refusal.[212]

Q. *Regulation to ensure safe and efficient development without waste*

In addition to ensuring against adverse environmental impact the Government, through the provisions of The Coal Conservation Act and The Coal Mines Safety Act, and regulations, orders, permits and licences under them, will ensure that all coal mining and processing operations are carried out with full regard for safety and industrial health, efficiency, and the maximum practical recovery without waste of the coal resources being tapped.

Proper operations are ensured not only by the requirements of regulations and orders and the conditions of permits and licences but by actual field inspection by trained personnel of the Energy Resources Conservation Board. These inspectors co-operate with personnel of the Department of the Environment and Energy and Natural Resources to ensure compliance with conditions relating to the protection of the environment and of the renewable resources.[213]

Pursuant to The Coal Conservation Act, the E.R.C.B. is to ensure the orderly, efficient and economic development of Alberta's coal resources in the public interest, to effect conservation and prevent waste of the coal resources of Alberta and to ensure the observance of safe and efficient practices in exploration for, mining, storing, processing and transporting coal.[214] In addition to the E.R.C.B. approval required to construct a mine and processing plant,[215] licenses are required from the E.R.C.B. to actually operate the mine and processing plant[216] and any facilities directly con-

They are generally renewed upon application if operation during the previous license period satisfies the Board in matters affecting safety and resource conservation. *Supra* n. 89 at 12-1.

nected with the coal processing plant.[217] If the Board feels that coal is not being recovered in accordance with good conservation practices and that it could be more efficiently recovered by other practical and reasonable mining or processing procedures, it may direct the holder of a permit, licence or approval to alter his program of development or operations accordingly.[218] The Board also has a more general jurisdiction to effect conservation under the Energy Resources Conservation Act.[219] In addition, the Lieutenant Governor in Council can reduce the Crown royalty where in his opinion it is necessary or desirable in the interests of conservation and the prevention of waste or the loss of recovery of marketable coal or products of coal.[220] Finally, the E.R.C.B. has an ultimate jurisdiction to make such orders and to attach such conditions to approvals as it feels necessary to effect the purposes of The Coal Conservation Act.[221] The Supreme Court of Canada has recently attempted to delineate the limits of this jurisdiction.[222]

As for safety in the minesite, Part IV of The Coal Mine Safety Regulations[223] sets out what has to be done in this regard. The Department of Labour now has jurisdiction over coal mine safety. New equipment, new blasting techniques, the location and use of explosives and detonators, magazines, man riding procedures, battery charging stations, diesel garages, and notice of commencement of operations all require approval.[224]

R. *Efficient use of coal in Alberta — maximum upgrading*

> In order to secure maximum benefit to Alberta from coal mining and processing activity, Government policy will require that so far as practical and beneficial to the Province, processing for the purpose of upgrading coal or any coal or any coal product to market specifications be undertaken in Alberta. This policy will apply to all types of coal as well as to secondary processing of all major products that are or may in future be obtained from coal by gasification, liquefaction or other forms of treatment.
>
> The extent of processing that should be undertaken in Alberta in connection with any particular development will be assessed under the provisions of The Coal Conservation Act, having regard both for market opportunities and for all relevant environmental, technical, economic and social aspects of the proposals. The Energy Resources Conservation Board will determine to what extent potentially useful by-products from any project, if not immediately saleable, should be stockpiled and conserved for future marketing.[225]

Except for the general purposes of The Coal Conservation Act,[226] there are no legislative requirements for upgrading of coal in Alberta. The application of this portion of the policy falls under the administrative discretion of the E.R.C.B. and the Lieutenant Governor in Council.

226. *Supra* n. 53, ss. 4(c) and (d).

S. *Appraisal and protection of Alberta's requirements*

The protection of a supply of coal of suitable quality and suitably located which may be recovered at reasonable cost and which is adequate for Alberta's present and all foreseeable future needs will be assured. This applies to requirements for present and future thermal power plants; future metallurgical operations; future other industrial requirements including petrochemical operations; future surface and *in-situ* gasification operations; and future coal liquefaction operations.

The protection will be assured under the provisions of The Coal Conservation Act by the Energy Resources Conservation Board through periodic assessments of Alberta's coal requirements made following pubic hearings and continuing appraisals of the proved and available reserves of coal in each of its major types. The Board will also ensure that the most appropriate deposits, having regard for location and costs, are made available for the generation of electric energy for Alberta. Permits for mining developments to serve markets outside Alberta will only be granted where it is found in the public interest, having regard to the present and future requirements for coal in Alberta.

If for the protection of Alberta's future requirements it should be found necessary to deny a proposed earlier development meeting other requirements of this policy, lease rentals and work requirements on affected Crown properties would be suspended until development was authorized.[227]

The E.R.C.B. carries out its periodic assessments of Alberta's coal requirements pursuant to section 4(b) of The Coal Conservation Act.[228] There are numerous requirements for operators to supply the E.R.C.B. with coal reserve information and data.[229]

Part 5.1 of The Coal Conservation Act sets out the details and necessity of obtaining an industrial development permit when coal is used as a raw material, reductant or fuel in any industrial or manufacturing operation. Small manufacturing operations and the production of electrical energy are excluded from the requirement to obtain an industrial development permit. No permit will be granted unless the Board determines that it is in the public interest to do so having regard to, among other considerations, the efficient use without waste of coal or products derived from coal and the present and future availability of coal in Alberta.[230]

The Board may, when requested to do so by the Lieutenant Governor in Council or upon its own motion, enquire into, examine, and investigate any matter referred to in s. 4, the purposes section of The Coal Conservation Act.[231] It may also hold an investigation into any matter connnected with the development and operation of a mine site, mine coal processing plant and connected facilities.[232] Finally, it may make enquiries and investigations and prepare studies and reports on any matter within the purview of any Act administered by it relating to energy resources and energy, and recommend to the Lieutenant Governor in Council such measures as it considers necessary or advisable in the public interest related to the exploration for, production, development, conservation, control, transportation, transmission, use and marketing of energy resources and energy.[233] It can be seen that the E.R.C.B. has wide ranging

227. *Supra* n. 1, s. 3.19.

228. *Supra* n. 53:
The purposes of this Act are . . . (b) to provide for appraisals of coal requirements in Alberta and in markets outside Alberta.

229. *E.g. supra* n. 53, s. 30 and *supra* n. 119, ss. 65 to 69.

230. *Supra* n. 53, s. 27.1(5); *see also* D. J. Jenkins, "Industrial Development Permits" (1979) 17 *Alta. L. Rev.* at 467.

231. *Supra* n. 53, s. 8.

232. *Id.*, s. 40.

233. *Id.*, s. 24.

inquisitorial and investigative powers in regard to energy in general and coal in particular.

T. *Supply for Canadian markets beyond Alberta*

> The Government recognizes that Alberta's coal resources will play an increasing important [sic] role in meeting essential energy demands in other parts of Canada. The Government will therefore be prepared under the provisions of The Coal Conservation Act to consider proposals for development of new coal mining and processing facilities that may from time to time be needed in order to help meet Canadian demands.
>
> Developments to meet Canadian markets beyond Alberta will be authorized only if they meet all normal requirements, are in the Alberta public interest and provided that they are compatible with the protection of Alberta's present and future requirements.
>
> To ensure stability of supply and avoid unduly rapid depletion of a particular grade of coal, or of a particular coal deposit, preference may be given to projects designed to produce and market an appropriate blend of different coals.[234]

There does not appear to be any specific legislative implementation of the government's concern regarding coal required to help meet Canadian demands. It is difficult to envision how the province could enact any such provisions without running the danger of overstepping the bounds of its provincial jurisdiction under the British North America Act.[235] On the other hand, from 1928 to 1971 federal subvention aid was used to offset part of Alberta coal production and transportation costs and so enable Canadian coal to compete against imported fuels in central Canadian markets.[236] To date there has been no practical experience with production and marketing of blends of different coals and the existing law does not reflect the stated government preference for such projects.

U. *Supply to foreign markets*

> Where it appears to be in the Alberta public interest, the Government will consider proposals for new coal mining and processing development from which thermal and metallurgical coal can be supplied to foreign markets under suitable contractual arrangement. These will be considered under the provisions of The Coal Conservation Act.
>
> Developments for foreign markets will also have to meet all normal requirements as described elsewhere and be compatible with the protection of Alberta's present and future requirements.[237]

It is interesting to note that the federal government to date has not enacted any legislation requiring government or National Energy Board approval of coal exports out of the country. What the Alberta government therefore approves and dictates through its various approval processes is the sole regulating factor for exports of Alberta coal out of the country.

V. *Pricing and marketing*

> It is not the Government's intention at this time to intervene in prices or other marketing arrangements determined by contract between the producer and buyer of coal, provided they are compatible with overall government policy and the provision of applicable legislation, regulations and orders. The Government will however require that provision be made, in all future contracts for the sale of coal for delivery outside the province, for price review and possible redetermination at two-year intervals. The Government will arrange for a regular confidential monitoring by the Department of Energy and Natural Resources or the Energy Resources Conservation Board of the prices of coal sold under contract for markets outside Alberta. Should a situation develop where in the Government's view a fair price is not being received for coal shipped from Alberta, the Government will intervene as appropriate.[238]

234. *Supra* n. 1, s. 3.20.
235. (U.K.) 30 Vict., c. 3.
236. *Supra* n. 135 at 2-8.
237. *Supra* n. 1, s. 3.21.
238. *Supra* n. 1, s. 3.22.

True to its word, the government has not intervened in prices and marketing arrangements. But it also has not insisted that all contracts for the sale of coal for delivery outside the province include price review and redetermination provisions at two year intervals.[239] A mine operator is obliged to report to the E.R.C.B. monthly raw coal production, disposition and the value of sales for each month.[240] However, the Board is required to keep confidential specific references to costs of production or processing and pricing.[241] When the government speaks of intervening if a fair price is not being received, it is probably referring to the Crown's right to take its royalty share in kind.[242] However, in view of the wide discretionary powers of both the government, through the Department of Energy and Natural Resources, and the E.R.C.B., there is virtually an unlimited number of other steps that it could take. As part of the technical mine permit application, the E.R.C.B. requires a general statement concerning marketing plans.[243] A typical example of the government's current thinking is the condition attached to the Obed-Marsh project approval that the permittee:[244]

> satisfy the Minister of Energy and Natural Resources that, at least six months prior to the date of start up of production, the price of any coal sold for use outside Alberta is generally compatible with the prices paid for similar types and qualities of coal used in Canada and elsewhere, and that appropriate provision has been made for the review and redetermination of prices in each contract for the sale of coal.

W. *Manpower training*

> In order to enable Albertans to avail themselves of employment and career opportunities in coal exploration and development activities, and to alleviate potentially serious shortages of qualified manpower the Government will keep itself informed on the projected manpower needs for the industry and take such measures as may be required to assure the adequacy of training facilities.
>
> The Government will expect the coal industry and related enterprises to develop or expand on-the-job training programs and to afford employees suitable opportunities of skill-upgrading programs.[245]

The government has not enacted any specific legislative requirements in regard to on-the-job training and skill upgrading programs in the coal industry.

X. *Research and development*

> The Government recognizes that efficient development and use of Alberta's coal resources will depend on continued and increased research and on the exchange of scientific and technical information with the coal industry and government agencies elsewhere.
>
> To help generate up-to-date information on the location, extent and characteristics of Alberta's coals, and to assist the development of new or improved technologies for extracting, processing, transporting and using the various kinds of coal found in the province, the Government will therefore continue to support resource appraisal programs by the Energy Resources Conservation Board and coal-related research projects at the Alberta Research Council. Through detailed discussions with industry, the Government will also assess what additional investigations and test facilities may from time to time be required to meet Alberta's needs and, where desirable, participate in specific studies and in the establishment of additional facilities.

239. Export coal contracts have been signed that do not provide for biannual price reviews.
240. *Supra* n. 119, ss. 68 and 69.
241. *Id.*, s. 61.
242. *Supra* n. 148.
243. *Supra* n. 8 at 5-8.
244. O.C. 273/81.
245. *Supra* n. 1, s. 3.23.

> The Government will take steps to ensure that Alberta is an active party to current and future international technology exchanges, and that relevant scientific and technical advances made elsewhere are available for detailed assessment and possible use in Alberta.[246]

Except for the information gathering and resource appraisal powers within the jurisdiction of the E.R.C.B.,[247] the government has not enacted any research and development legislation specifically concerning the coal industry.

III. CONCLUSION

The province of Alberta currently has in effect a comprehensive regulatory regime governing the coal industry. Prime responsibility for managing this regime lies with the Department of Energy and Natural Resources and the Energy Resources Conservation Board, and to a lesser extent the Department of the Environment. The focal point of the approval process is the mine permit application and hearing before the E.R.C.B., although ultimate responsibility for any major project lies with the Lieutenant Governor in Council.

It also can be seen that the government has basically chosen a method of administrative control of the industry through the Alberta public service and the executive branch. This decision is probably grounded on a number of factors, notably the historical development of our system of government, political ideology, the newness and potential for expansion of the coal industry in Alberta, the rapidly changing state of the art of coal technology, and the consequently perceived requirement for administrative flexibility and government intervention. As a result of this the industry, although highly regulated by government, is not based upon any cohesive set of legal rights; it is therefore "administered", rather than "regulated" in a legal sense.

On the other hand, in emphasizing the "one window" approach centered around the required E.R.C.B. hearing, and in directing that a number of other required approvals be examined at that hearing,[248] the Alberta regime has to a great extent established both the proponent's and the public's "right" to have decisions on the project made openly. The salient aspects of any new coal development cannot escape public scrutiny and debate in the E.R.C.B.'s forum.

Unfortunately, the openness of the real decision making may be more perceived than actual, in view of the E.R.C.B.'s limited jurisdiction and the wide scope for ministerial and Lieutenant Governor in Council discretion. At law this discretion is so broad that it can vary or overturn almost any decision or recommendation made at or arising out of the public hearing. Such discretion is shielded from public examination since there are few, if any, methods of review of these decisions other than political redress by elections, and since no reasons for the use of the discretion need be given. It may be the inarticulated premise of the Alberta regime that because decisions in regard to the coal industry have such a major impact on the whole province, they must be dealt with in their entirety by the political process and only in limited areas, through and subject to our legal system.

246. *Supra* n. 1, s. 3.24.

247. *E.g. supra* n. 229.

248. *E.g.* The environmental impact assessment and cost-benefit and social impact analysis are to be complete and before the Energy Resources Conservation Board for the public hearing, even though the E.R.C.B. is not the assessing body.

[76] An academic commentator expressed it this way:

> Without knowing the reasoning behind a decision, it is impossible for a judge to determine if it is founded upon arbitrary reasoning. Thus, in order for a judge to determine whether a decision maker acted lawfully, the decision maker must provide reasons adequate to allow a reviewing judge to determine why the decision maker made the decision they did and whether it followed explicit statutory requirements [or the basis for the decision must be apparent in the record]. If the judge cannot ascertain how the decision was made [even in light of the evidentiary record], then the court cannot fulfill this role and decisions made in violation of the rule of law may be sanctioned by the court.

(Paul A. Warchuk, "The Role of Administrative Reasons in Judicial Review: Adequacy and Reasonableness" (2016), 29 C.J.A.L.P. 87 at p. 113.)

[77] In support of its motion, the Tsleil-Waututh Nation forcefully and repeatedly makes the point about immunization. It cites the dissenting reasons of this Court in *Slansky*, above, correctly noting that the majority did not disagree with the propositions put on this point. *Slansky* put the point this way (at para. 276):

> If the reviewing court does not have evidence of what the tribunal has done or relied upon, the reviewing court may not be able to detect reversible error on the part of the tribunal. In other words, an inadequate evidentiary record before the reviewing court can immunize the tribunal from review on certain grounds.

[78] In judicial review, the reviewing courts are in the business of enforcing the rule of law, one aspect of which is "executive accountability to legal authority" and protecting "individuals from arbitrary [executive] action": *Reference Re Secession of Quebec*, [1998] 2 S.C.R. 217, 161 D.L.R. (4th) 385 at paragraph 70. Put another way, all holders of public power are to be

2017 FCA 128 (CanLII)

accountable for their exercises of power, something that rests at the heart of our democratic governance and the rule of law: *Slansky* at paras. 313-315. Subject to any concerns about justiciability, when a judicial review of executive action is brought the courts are institutionally and practically capable of assessing whether or not the executive has acted reasonably, *i.e.*, within a range of acceptability and defensibility. That assessment is the proper, constitutionally guaranteed role of the courts within the constitutional separation of powers: *Crevier v. A.G. (Québec) et al.*, [1981] 2 S.C.R. 220, 127 D.L.R. (3d) 1; *Dunsmuir*, above; *Hupacasath First Nation v. Canada (Foreign Affairs and International Trade Canada)*, 2015 FCA 4, 379 D.L.R. (4th) 737 at para. 66; *Habtenkiel v. Canada (Citizenship and Immigration)*, 2014 FCA 180 at para. 38; *Paradis Honey Ltd. v. Canada*, 2015 FCA 89, 382 D.L.R. (4th) 720 at para. 140. But, at least in the situation where the evidentiary record of the administrative decision-maker is not before the reviewing court in any way whatsoever—*i.e.,* there is not even a summary or hint of what was before the administrative decision-maker—or the record is completely lacking on an essential element, concerns about immunization of administrative decision-making can come to the fore.

[79] In this Court, administrative decision-makers whose decisions cannot be fairly evaluated because of a complete lack of anything in the record on an essential element—situations where in effect the administrative decision-maker says on an essential element, "Trust us, we got it right"—have seen their decisions quashed: see, *e.g.*, *Leahy* above at para. 137; *Kabul Farms Inc.* at paras. 31-39; *Canadian Association of Broadcasters v. Society of Composers, Authors and Music Publishers of Canada*, 2006 FCA 337, 54 C.P.R. (4th) 15 at para. 17. The test would seem to be that if a particular evidentiary record—even if bolstered by permissible inferences and any

SUPERIOR COURT OF JUSTICE - ONTARIO

RE: SOPHIA MATHUR, a minor by her litigation guardian Catherine Orlando, ZOE KEARY-MATZNER, a minor by her litigation guardian Anne Keary, SHAELYN HOFFMAN-MENARD, SHELBY GAGNON, ALEXANDRA NEUFELDT, MADISON DYCK and LINDSAY GRAY, Applicants/Responding Party

AND:

HER MAJESTY THE QUEEN IN RIGHT OF ONTARIO, Respondent/Moving Party

BEFORE: Justice Carole J. Brown

COUNSEL: Nader R. Hasan, Justin Safayeni, Spencer Bass, Fraser Andrew Thomson, and Danielle Gallant for the Applicants

S. Zachary Green and Padraic Ryan for the Respondent

HEARD: July 13, 2020

REASONS FOR DECISION

[1] The moving party, the Attorney General of Ontario ("**Ontario**"), brings this motion to strike out an application pursuant to Rule 21 of the *Rules of Civil Procedure*, R.R.O. 1990, Reg. 194, on the ground that it has no reasonable prospect of success.

[2] The Applicants seek declaratory and mandatory orders relating to Ontario's target and plan for the reduction of greenhouse gas ("**GHG**") emissions in the province by the year 2030. The Applicants submit that Ontario's target is insufficiently ambitious, and that Ontario's failure to set a more stringent target and a more exacting plan for combating climate change over the coming decade infringes the constitutional rights of youth and future generations.

[3] The issue to be determined by this Court is whether, pursuant to Rule 21, the Notice of Application (the "**Application**") should be struck. It must be determined whether it is plain and obvious, assuming the facts pleaded to be true, that the pleading discloses no reasonable cause of action.

2020 ONSC 6918 (CanLII)

BACKGROUND

Greenhouse Gas Emissions and Mitigating Climate Change

[4] The Court of Appeal for Ontario has noted that "there is no dispute that global climate change is taking place and that human activities are the primary cause": *Reference re Greenhouse Gas Pollution Pricing Act*, 2019 ONCA 544, 146 O.R. (3d) 65 ("***Carbon Pricing Reference***"), at para. 7. These activities, which include the combustion of fossil fuels like coal, natural gas and oil and its derivatives, release GHGs into the atmosphere. When incoming radiation from the Sun reaches the Earth's surface, it is absorbed and converted into heat. GHGs act like the glass roof of a greenhouse, trapping some of this heat as it radiates back into the atmosphere, causing surface temperatures to increase: *Carbon Pricing Reference*, at para. 7.

[5] At appropriate levels, GHGs are beneficial. They surround the planet like a blanket, keeping temperatures within limits at which humans, animals, plants, and marine life can live in balance: *Carbon Pricing Reference*, at para. 8.

[6] However, an excess level of GHGs in the atmosphere is problematic because it leads to global warming. Since the beginning of the industrial revolution in the 18th century, and more particularly since the 1950s, the level of GHGs in the atmosphere has been increasing at an alarming rate. As a result, the global average surface temperature has increased by approximately 1.0 degree Celsius above pre-industrial levels (*i.e.*, prior to 1850). It is estimated that by 2040, the global average surface temperature will have increased by 1.5 degrees Celsius: *Carbon Pricing Reference*, at paras. 8-9.

[7] Global warming is causing climate change and its associated impacts. The Court of Appeal accepted that "uncontested evidence" shows that climate change is causing or exacerbating: increased frequency and severity of extreme weather events (including droughts, floods, wildfires, and heat waves); degradation of soil and water resources; thawing of permafrost; rising sea levels; ocean acidification; decreased agricultural productivity and famine; species loss and extinction; and expansion of the ranges of life-threatening vector-borne diseases, such as Lyme disease and West Nile virus: *Carbon Pricing Reference*, at para. 11.

[8] The Court of Appeal also found that recent manifestations of the impacts of climate change in Canada include: major wildfires in Alberta in 2016 and in British Columbia in 2017 and 2018; and major flood events in Ontario and Québec in 2017, and in British Columbia, Ontario, Québec and New Brunswick in 2018. The recent major flooding in Ontario, Québec and New Brunswick in 2019 was likely also fueled by climate change: *Carbon Pricing Reference*, at para. 11.

[9] One of the main methods to mitigate climate change is through pricing GHG emissions. Carbon dioxide ("**CO_2**") is the most prevalent GHG emitted by human activities; pricing GHG emissions is therefore commonly known as "carbon pricing": *Carbon Pricing Reference*, at para. 7. A pan-Canadian working group notes that "[m]any experts regard carbon pricing as a necessary policy tool for efficiently reducing GHG emissions": *Carbon Pricing Reference*, at para. 27.

[10] The United Nations Intergovernmental Panel on Climate Change, an international body that draws on the world's leading experts to provide objective, scientific information relevant to

2020 ONSC 6918 (CanLII)

climate change, noted that global net anthropogenic CO_2 emissions must be reduced by approximately 45% below 2010 levels by 2030 and must reach "net zero" by 2050 in order to limit global average surface warming to 1.5 degrees Celsius and to avoid the significantly more deleterious impacts of climate change. Deep reductions in other GHG emissions will also need to occur in order to limit global average surface warming to 1.5 degrees Celsius: *Carbon Pricing Reference*, at para. 16.

[11] Since the early 1990s, there have been global initiatives to mitigate climate change. In 1992, growing international concern regarding the potential impacts of climate change led to the adoption of the United Nations Framework Convention on Climate Change (the "**UNFCCC**"). The objective of the UNFCCC is to "stabiliz[e] [...] greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system." Canada ratified the UNFCCC in December 1992 and it came into force on March 21, 1994. The UNFCCC has been ratified by 196 other countries: *Carbon Pricing Reference*, at para. 22.

[12] In December 1997, the parties to the UNFCCC adopted the Kyoto Protocol, which established GHG emissions reduction commitments for developed country parties. Canada ratified the Kyoto Protocol on December 17, 2002 and committed to reducing its GHG emissions for the years 2008 to 2012 to an average of 6% below 1990 levels. Canada did not fulfill its commitment and ultimately withdrew from the Kyoto Protocol in December 2012: *Carbon Pricing Reference*, at para. 23.

[13] In December 2015, the parties to the UNFCCC adopted the Paris Agreement. The parties committed to holding global warming to "well below" 2 degrees Celsius above pre-industrial levels and to making efforts to limit it to 1.5 degrees Celsius above pre-industrial levels. Canada ratified the Paris Agreement on October 5, 2016 and committed to reducing its GHG emissions by 30% below 2005 levels by 2030: *Carbon Pricing Reference*, at para. 25.

Efforts in Canada and Ontario to Mitigate Climate Change

[14] Following the adoption of the Paris Agreement in 2015, the Prime Minister of Canada met with all provincial and territorial Premiers to discuss strategies to mitigate climate change. It led to the formation of a Federal-Provincial-Territorial Working Group on Carbon Pricing Mechanisms, which was tasked with reporting on the role and effectiveness of carbon pricing in meeting Canada's emissions reduction commitments. The Working Group produced a report, which stated that economy-wide carbon pricing is the most efficient way to reduce emissions and that carbon pricing would be a foundational element of Canada's response to climate change. Based on this report, the federal government announced the Pan-Canadian Approach to Pricing Carbon Pollution. The stated goal is to ensure that carbon pricing mechanisms of gradually increasing stringency apply to all Canadian jurisdictions by 2018, either in the form of an explicit price-based system (*e.g.*, a "carbon tax") or a "cap and trade" system: *Carbon Pricing Reference*, at para. 27.

[15] On December 9, 2016, eight provinces, including Ontario, and the three territories adopted the Pan-Canadian Framework on Clean Growth and Climate Change. At that point, British

2020 ONSC 6918 (CanLII)

Columbia, Alberta, and Québec already had carbon pricing mechanisms, and Ontario had announced its intention to join the Québec/California cap and trade system: *Carbon Pricing Reference*, at para. 29.

[16] In the same year, Ontario enacted the *Climate Change Mitigation and Low-carbon Economy Act, 2016*, S.O. 2016, c. 7 ("***Climate Change Act***"). The Act established a cap and trade program, "a market mechanism […] intended to encourage Ontarians to change their behaviour by influencing their economic decisions that directly or indirectly contribute to the emission of greenhouse gas": see s.2(2).

[17] Section 6(1) of the *Climate Change Act* established three targets for reducing the amount of GHG from the amount of emissions in Ontario: a reduction of 15% by the end of 2020, a reduction of 37% by the end of 2030, and a reduction of 80% by the end of 2050, compared to levels calculated in 1990.

[18] Section 6(2) of the *Climate Change Act* provided that the Lieutenant Governor in Council may increase the targets in s. 6(1) through regulations.

[19] Section 6(4) of the *Climate Change Act* expressly referenced and calibrated Ontario's policy to comply with the UNFCCC's standards: "When increasing the targets specified in subsection (1) or establishing interim targets for the reduction of greenhouse gas emissions, the Lieutenant Governor in Council shall have regard to any temperature goals recognized by the Conference of the Parties established under Article 7 of the United Nations Framework Convention on Climate Change."

[20] Two years later, on June 21, 2018, the federal government enacted the *Greenhouse Gas Pollution Pricing Act,* S.C. 2018, c. 12, s.186 ("***Carbon Pricing Act***"), and established a federal GHG emissions pricing regime that ensured the existence of carbon pricing mechanisms throughout Canada. Provinces were also entitled to enact their own carbon pricing schemes that meet designated federal benchmarks.

[21] The federal *Carbon Pricing Act* became the subject of various court challenges throughout Canada. The Ontario government challenged the Act on the ground that it is unconstitutional. Ontario argued that Parliament is not entitled to regulate all activities that produce GHG emissions and that the jurisdiction Canada asserts under the *Carbon Pricing Act* "would radically alter the constitutional balance between federal and provincial powers": *Carbon Pricing Reference*, at para. 54.

[22] At the Court of Appeal for Ontario, Ontario submitted that it would continue to take its own approach to meet the challenge of reducing GHG emissions. It highlighted its own environmental plan, titled "Preserving and Protecting our Environment for Future Generations: A Made-in-Ontario Environment Plan", released in November 2018, which proposes to find ways to "slow down climate change and build more resilient communities to prepare for its effects": *Carbon Pricing Reference*, at paras. 55-57. This plan is the subject of this Application.

2020 ONSC 6918 (CanLII)

[23] On June 28, 2019, the Court of Appeal held that the *Carbon Pricing Act* is constitutional. The decision was appealed and recently heard at the Supreme Court of Canada. A decision is pending.

Ontario Revokes Cap and Trade

[24] In July 2018, Ontario revoked cap and trade and prohibited trading of emissions allowances. It introduced the *Cap and Trade Cancellation Act, 2018*, S.O. 2018, c. 13 ("***Cancellation Act***"), which is the focus of the Application.

[25] Section 16 of the *Cancellation Act* repeals the *Climate Change Act*.

[26] Section 3(1) of the *Cancellation Act* states: "The Government shall establish targets for the reduction of greenhouse gas emissions in Ontario and may revise the targets from time to time."

[27] Section 4(1) of the *Cancellation Act* states: "The Minister, with the approval of the Lieutenant Governor in Council, shall prepare a climate change plan and may revise the plan from time to time." Section 1(1) of the Act defines "Minister" as "the Minister of the Environment, Conservation and Parks or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*".

[28] Pursuant to s.4(1) of the *Cancellation Act*, the Ministry of the Environment, Conservation and Parks published a plan titled "Preserving and Protecting our Environment for Future Generations: A Made-in-Ontario Environment Plan" in November 2018 (the "**Plan**"). This is the same plan Ontario cited at the Court of Appeal for Ontario in the *Carbon Pricing Reference*.

[29] The Plan states that Ontario will reduce its GHG emissions by 30% below 2005 levels by 2030 (the "**Target**"). This is the same as the target adopted in the Paris Agreement. (The Applicants note that this Target represents a 15% decrease compared to the previous target set out in the *Climate Change Act*, as that was calibrated against the baseline of 1990, and the new Target is against the baseline of 2005. They submit that if 37% based on 1990 levels is adjusted to the 2015 level, it would be about 45%.)

[30] The Applicants, Ontario residents between the ages of 12 and 24, brought the Application to challenge Ontario's cancellation of the *Climate Change Act* and its newly-enacted Target contained in the Plan.

[31] The Applicants seek the following relief on behalf of their generation and future generations of Ontarians:

- A declaration, under s.52(1) of the *Constitution Act, 1982*, that the Target violates the rights of Ontario youth and future generations under ss.7 and 15 of the *Charter* in a manner that cannot be saved under s.1, and is therefore of no force and effect;

- A declaration, under s.52(1) of the *Constitution Act, 1982*, that the Target violates the unwritten constitutional principle that governments are prohibited from

2020 ONSC 6918 (CanLII)

engaging in conduct that will, or reasonably could be expected to, result in the future harm, suffering or death of a significant number of its own citizens;

- A declaration that s.7 of the *Charter* includes the right to a stable climate system, capable of providing youth and future generations with a sustainable future;

- A declaration, under s.52(1) of the *Constitution Act, 1982*, that ss.3(1) and/or 16 of the *Cancellation Act*, which repealed the *Climate Change Act* and allowed for the imposition of more lenient targets without mandating that they be set with regard to the Paris Agreement temperature standard or any kind of science-based process, violate ss.7 and 15 of the *Charter* in a manner that cannot be saved under s.1, and are of no force and effect;

- In the alternative, the same declaratory relief sought in the paragraphs above pursuant to s.24(1) of the *Charter* and/or this Court's inherent jurisdiction;

- An order that Ontario forthwith set a science-based GHG reduction target under s.3(1) of the *Cancellation Act* that is consistent with Ontario's share of the minimum level of GHG reductions necessary to limit global warming to below 1.5 degrees Celsius above pre-industrial temperatures or, in the alternative, well below 2 degrees Celsius (*i.e.*, the upper range of the Paris Agreement temperature standard); and

- An order directing Ontario to revise its climate change plan under s.4(1) of the *Cancellation Act* once it has set a science-based GHG reduction target.

[32] Ontario, the Respondent on the Application and the moving party on this motion, seeks to strike this Application in whole, pursuant to Rule 21.01(1)(b) of the *Rules*, on the ground that the Application discloses no reasonable cause of action.

[33] Just prior to the release of these reasons, the parties alerted me to the Federal Court decision of *La Rose v. Canada*, 2020 FC 1008, released on October 27, 2020. The *La Rose* action is similar to the Application, in that 15 plaintiffs, all children and youth from across Canada, launched a *Charter* claim under ss.7 and 15 to challenge the Government of Canada's "alleged conduct that the plaintiffs associate with GHG emissions" in Canada. The plaintiffs submitted that the increased emissions contributed to climate change.

[34] The Federal Court granted Canada's motion to strike the plaintiffs' Statement of Claim without leave to amend. The court found that the *Charter* claims were not justiciable and disclosed no reasonable cause of action. The court also found that the public trust doctrine, on which the plaintiffs relied, was justiciable, but did not disclose a reasonable cause of action. That doctrine is not at issue in the Rule 21 motion before this Court.

[35] Leaving aside the issue that *La Rose* does not bind this Court, that matter is distinguishable from the motion before this Court. The differences will be commented on throughout my reasons.

2020 ONSC 6918 (CanLII)

RULE 21

[36] Rule 21.01(1)(b) provides that a party may move before a judge to strike out a pleading on the ground that it discloses no reasonable cause of action or defence, and the judge may make an order or grant judgment accordingly.

[37] Under this Rule, a claim will only be struck if it is "plain and obvious, assuming the facts pleaded to be true, that the pleading discloses no reasonable cause of action." Another way of putting the test is that the claim has no reasonable prospect of success. Where a reasonable prospect of success exists, the matter should be allowed to proceed to trial: *R. v. Imperial Tobacco*, 2011 SCC 42, [2011] 3 S.C.R. 45, at para. 17.

[38] The Supreme Court has held that novelty alone is not a reason to strike a claim. As Wilson J. noted in *Hunt v. Carey Canada Inc*., [1990] 2 S.C.R. 959, at p. 980 [emphasis added]:

> [I]f there is a chance that the plaintiff might succeed, then the plaintiff should not be "driven from the judgment seat". Neither the length and complexity of the issues, the novelty of the cause of action, nor the potential for the defendant to present a strong defence should prevent the plaintiff from proceeding with his or her case. Only if the action is certain to fail because it contains a radical defect […] should the relevant portions of a plaintiff's statement of claim be struck out […].

[39] The nature of the "radical defect" required to justify striking out a claim was described in very narrow terms by Epstein J., as she then was, in *Dalex Co. v. Schwartz Levitsky Feldman* (1994), 19 O.R. (3d) 463 (S.C.), at para. 6:

> In order to foreclose the consideration of an issue past the pleadings stage, the moving party must show that there is an existing bar in the form of a decided case directly on point from the same jurisdiction demonstrating that the very issue has been squarely dealt with and rejected by our courts. Only by restricting successful attacks of this nature to the narrowest of cases can the common law have a full opportunity to be refined or extended […].

[40] More recently, McLachlin C.J. elaborated on the proper approach to novel claims in *Imperial Tobacco*, at para. 21:

> Valuable as it is, the motion to strike is a tool that must be used with care. The law is not static and unchanging. Actions that yesterday were deemed hopeless may tomorrow succeed. Before *Donoghue v. Stevenson*, [1932] A.C. 562 (H.L.) introduced a general duty of care to one's neighbour premised on foreseeability, few would have predicted that, absent a contractual relationship, a bottling company could be held liable for physical injury and emotional trauma resulting from a snail in a bottle of ginger beer. […] The history of our law reveals that often new developments in the law first surface on motions to strike or similar preliminary motions, like the one at issue in *Donoghue v. Stevenson.* Therefore, on a motion to strike, it is not determinative that the law has not yet recognized the particular claim. The court must rather ask whether, assuming the facts pleaded are true, there is a reasonable prospect that the claim will succeed. The approach

2020 ONSC 6918 (CanLII)

> must be generous and err on the side of permitting a novel but arguable claim to proceed to trial. [emphasis added]

[41] Ontario submits that the Application is "certain to fail" for four reasons: (1) the Application is not justiciable; (2) the Application is based on unprovable speculations about the future climate consequences of the Target; (3) there is no positive constitutional obligation on the Province to prevent harms associated with climate change; and (4) the Applicants have no standing to seek remedies for "future generations".

[42] In response, the Applicants submit: (1) the Application is justiciable; (2) the claims in the Application are capable of scientific proof; (3) the Application does not depend on positive obligations; and (4) the Applicants have standing on behalf of future generations.

[43] The overarching question that must be answered on this motion is whether this Application has a reasonable prospect of success on a full hearing. To answer this question, the following sub-questions must be addressed:

- Are the Target and the Plan reviewable by the courts?
- Are the claims in the Application capable of being proven?
- Is this matter justiciable? More specifically, do the *Charter* claims in the Application have a reasonable prospect of success?
- Does the Application depend on positive obligations on the Province?

[44] Once it is determined whether the Application has a reasonable prospect of success, three additional questions must be addressed:

- Do the Applicants have standing on behalf of future generations?
- What remedies are potentially available to the Applicants?
- Does this Court have jurisdiction to hear the Application?

ANALYSIS

A. Are the Target and the Plan reviewable by the courts?

[45] Ontario submits that if the Target and the Plan are not "law", then the court should not be making legal determinations about them (*i.e.*, they are not reviewable by the courts). It does not submit that the *Charter* does not apply to the Target and the Plan.

[46] Several sections of the *Cancellation Act* are especially relevant to this discussion [emphasis added]:

2020 ONSC 6918 (CanLII)

- Section 3(1): "The Government shall establish targets for the reduction of greenhouse gas emissions in Ontario and may revise the targets from time to time."

- Section 4(1): "The [Minister of the Environment, Conservation and Parks], with the approval of the Lieutenant Governor in Council, shall prepare a climate change plan and may revise the plan from time to time."

[47] As mentioned above, pursuant to s.4(1) of the *Cancellation Act*, the Ministry of the Environment, Conservation and Parks published a climate change plan (the Plan) in November 2018. Several sentences from the Plan are especially relevant to this discussion [emphasis added]:

- Page 3: "With hard work, innovation and commitment, we will ensure Ontario achieves emissions reductions in line with Canada's 2030 greenhouse gas reduction targets under the Paris Agreement."

- Page 18: "The following chapter of our environment plan acts as Ontario's climate change plan, which fulfills our commitment under the *Cap and Trade Cancellation Act, 2018*."

- Page 21: "Ontario will reduce its emissions by 30% below 2005 levels by 2030. This target aligns Ontario with Canada's 2030 target under the Paris Agreement. This is Ontario's proposed target for the reduction of greenhouse gas emissions, which fulfills our commitment under the *Cap and Trade Cancellation Act, 2018*."

- Page 22: "The policies within this plan will put us on the path to meet our 2030 target, and we will continue to develop and improve them over the next 12 years."

Position of the Parties

[48] Ontario submits that the Target, published in the Plan, is "an expression of the provincial government's intentions and aspirations" and therefore "not a legal instrument like a statute or regulation". Ontario disagrees with the Applicants' assertion that the Target "governs" the amount of GHG emissions in the province.

[49] Ontario argues that these "aspirational statements" can also be found in other provincial statutes, such as the *Poverty Reduction Act, 2009*, S.O. 2009, c. 10, which states in the Preamble: "A principal goal of the Government's strategy published on December 4, 2008 is to achieve a 25 per cent reduction in the number of Ontario children living in poverty within five years." Ontario argues that it does not follow that courts are empowered to make a declaration that the goal of reducing child poverty by 25% is unlawful because it is insufficiently ambitious, and that the Constitution requires that the Government must instead make its goal the reduction of child poverty by, for example, 50% or 75%, or the eradication of poverty altogether.

[50] Ontario further submits that the Target has no legal effect on anyone, as the Target itself does not change the law that governs the burning of natural gases, since there are other statutes,

2020 ONSC 6918 (CanLII)

regulations, and policies. Evaluating the Target's merits, therefore, is not a question with legal content, and, on that basis, the Application should be struck.

[51] Ontario also contends that the Plan is unlike a statute because it does not have a "fixed and definite meaning" and is unlike a regulation, which is similar to a statute that is enacted by the Lieutenant Governor in Council. The Plan is therefore more like a press release, a speech in the assembly, or a budget presentation. Ontario describes the Plan as essentially a tool "that lays out for the public in detail what the government intends to do."

[52] The Applicants submit that the Plan is "law" in that it is "promulgated pursuant to a statutory mandate [the *Cancellation Act*]". As excerpted above, the *Cancellation Act* requires the government to establish targets for the reduction of GHGs, and the Minister of the Environment, with the approval of the Lieutenant Governor in Council, shall prepare a climate change plan: see ss.3(1) and 4(1).

[53] The Applicants also point out that Ontario has, in other proceedings, relied heavily on the Plan's existence for the purpose of "justifying its conduct". In the *Carbon Pricing Reference* (reviewed above in the background section), Ontario relied on the Plan to argue that the province did not need a federal carbon tax because it had its own scheme. As the Court of Appeal outlined in the Positions of the Parties section of the reasons:

> [57] Ontario's environmental plan ("Preserving and Protecting our Environment for Future Generations: A Made-in-Ontario Environment Plan") [the Plan], released in November 2018, proposes to find ways to "slow down climate change and build more resilient communities to prepare for its effects", but it will do this in a "balanced and responsible" way, without placing additional burdens on Ontario families and businesses.
>
> [58] Ontario has committed to reducing its emissions by 30% below 2005 levels by 2030 [the Target], which aligns with Canada's target under the *Paris Agreement*. It will do so, for example, by updating its *Building Code*, O. Reg. 332/12, increasing the renewable content of gasoline, establishing emissions standards for large emitters, and reducing food waste and organic waste.

[54] The Applicants submit that the Respondent cannot, in one proceeding at the Court of Appeal, rely on the Plan to argue that there is no need for a federal carbon tax due to its own Plan and Target, while in this proceeding argue that the Plan is just a "glossy brochure", as Ontario described the Plan during oral submissions.

[55] The Applicants rely on *Greater Vancouver Transportation Authority v. Canadian Federation of Students*, 2009 SCC 31, [2009] 2 S.C.R. 295 ("***GVTA***"), to argue that the Target and the Plan are "law".

[56] In *GVTA*, the Supreme Court of Canada considered whether policies of transit authorities restricting advertising on the sides of buses were "law", for the purpose of satisfying the "prescribed by law" requirement in s.1 of the *Charter*. There are two considerations. First, the court must ask itself whether the government entity was authorized to enact the impugned policies and whether the policies are binding rules of general application. The court must then consider

2020 ONSC 6918 (CanLII)

whether the policies are sufficiently precise and accessible: at para. 50. Second, a distinction must be drawn between rules that are legislative in nature and rules that are administrative in nature: at para. 58. Administrative policies, intended for internal use within government as aids in the interpretation of regulatory powers, are often informal and inaccessible outside government, thereby not considered "law": at paras. 58-59, 63. Where a government policy is authorized by statute and sets out a general norm or standard that is meant to be binding and is sufficiently accessible and precise, the policy is legislative in nature and constitutes a limit that is "prescribed by law": at para. 65.

[57] The Applicants submit that the Plan is "law" because it is not internal policy. It is policy of general application that was made pursuant to delegated rule-making authority (s.4(1) of the *Cancellation Act* indicates that the Minister of Environment shall set a target). Ontario also sets out in the Plan that it is Ontario's fulfilment of the requirements under the *Cancellation Act*, making the Plan a "law".

[58] Ontario, in response, submits that the *Cancellation Act* empowered and required the Minister of Environment to make a plan and a target, not to establish rules. Ontario submits that both the Plan and the Target do not establish rules or affect the rights of any individuals. More importantly, the Plan and the Target do not themselves establish standards. For example, no GHG emitters are required to comply with any standards articulated in the Plan or the Target, as there are existing emission standards in Ontario to which GHG emitters are already subject.

Analysis and Conclusion

[59] *GVTA* has limited application on this motion as it is focused on whether a policy is "law" for the purpose of the s.1 test (*i.e.*, whether the policy is "prescribed by law"). At this stage of the proceedings, the question of whether the Target and Plan are "law" need not be answered.

[60] It is not disputed that the *Charter* applies to the Target and the Plan. Ontario merely argues that the Target and the Plan are not "law" and therefore not reviewable by the courts (*i.e.*, the court should not be making legal determinations about them). However, Ontario cannot escape judicial review for its preparation of the Plan and the Target simply by arguing that they are not law. The question of whether the Target and the Plan are "law" is therefore misguided.

[61] The fundamental question on this motion is whether the preparation of the Target and Plan is governmental action that is reviewable by the courts for compliance with the *Charter*. Later in these reasons, in the justiciability section, I discuss whether the matter as a whole is reviewable by the courts. At this juncture, I must first answer the threshold question of whether the Target and the Plan – both of which the Applicants argue violate their *Charter* rights – are reviewable by the courts.

[62] While Ontario argues that neither the Target nor the Plan "binds" anyone and is merely an "aspiration" that does not itself govern the amount of GHGs in the province, I am of the view that the preparation of the Target and the Plan is to be considered government action that is reviewable by the courts. There are three reasons for this.

2020 ONSC 6918 (CanLII)

[63] First, given that the Plan and Target are legislatively mandated by the Ontario legislature and sub-delegated to the Ministry of the Environment, Conservation and Parks and which is to be approved by the Lieutenant Governor in Council, it is a Cabinet decision. The Supreme Court has already found that Cabinet decisions are reviewable by the courts. In *Operation Dismantle*, [1985] 1 S.C.R. 441, the applicants alleged that the Government of Canada's decision to allow the U.S. to test cruise missiles in Canada violated s.7 of the *Charter*. The Supreme Court first considered whether this decision, made by the Government of Canada in relation to a matter of national defence and foreign affairs, is reviewable in the courts. Canada submitted that Cabinet decisions fell within the prerogative power of the Crown and that the *Charter*'s application must be restricted to the exercise of powers that derive directly from statute, not to an exercise of the royal prerogative, a source of power that exists independently of Parliament. The court disagreed with Canada and found that Cabinet decisions made pursuant to both statutory authority and the royal prerogative fall within the ambit of the *Charter* and are therefore reviewable by the courts: at para. 50.

[64] Second, the Plan and Target can be subject to judicial review because they resemble quasi-legislation or "soft law". Unlike executive legislation, quasi-legislation has a hortatory, rather than mandatory, effect on legal decision-making, notably those involving the imposition of sanctions. In other words, quasi-legislation offers advice about activities regulated by law (*e.g.*, agriculture, waste disposal). See: John Mark Keyes, *Executive Legislation*, 2nd ed. (Toronto: LexisNexis Canada, 2010), at p. 50.

[65] At the very least, the Target and the Plan can be considered quasi-legislation or "soft law" that guide internal policy making within the government. While the Target and the Plan may not directly control the emission of GHGs in Ontario, they do reflect the Province's intentions, which would presumably guide policy-making decisions. Indeed, the Plan, at p. 35, states that one of the action steps the Ministry of Environment will take is to make climate change a cross-government priority, which would include updating the Statement of Environmental Values to reflect Ontario's environmental plan. Statements of Environmental Values are prepared by applicable ministries in Ontario. Section 7 of the *Environmental Bill of Rights, 1993*, S.O. 1993, c. 28, states that these statements are to:

> (a) explain[] how the purposes of this Act [the *Bill of Rights*] are to be applied when decisions that might significantly affect the environment are made in the ministry; and
>
> (b) explain[] how consideration of the purposes of this Act should be integrated with other considerations, including social, economic and scientific considerations, that are part of decision-making in the ministry.

Section 11 of the *Bill of Rights* further states: "The minister shall take every reasonable step to ensure that the ministry statement of environmental values is considered whenever decisions that might significantly affect the environment are made in the ministry."

[66] Ontario has also indicated in another proceeding (the *Carbon Pricing Reference*) that federal policies should not apply to Ontario, as it already has its own provincial policy (the Plan). At the very least, this reflects the Province's intention of working toward meeting the Target. To

2020 ONSC 6918 (CanLII)

do so, Ontario might decide to reduce the emission of GHGs by sectors such as transportation, industrial, building heating, agriculture, and waste disposal activities, which Ontario indicated in its factum are responsible for the great majority of GHG emissions in the Province. As the Court of Appeal noted in the *Carbon Pricing Reference*, Ontario already had plans to update its *Building Code*: at para. 58. In other words, the Target and the Plan would guide Ontario's policy making such that the Province could meet the Target it outlines in the Plan.

[67] Although quasi-legislation may not have binding legal effect, it often has something approaching it, and recent cases suggest that courts are prepared to give quasi-legislation increasing significance in adjudicating disputes: Keyes, at p. 51. A long line of cases also suggests that quasi-legislation is judicially reviewable when a legitimate basis for review is presented: at p. 58. See, *e.g.*: *Canadian Association of Regulated Importers v. Canada (Attorney General)*, [1994] 2 F.C. 247 (F.C.A.); *Moresby Explorers Ltd. v. Canada (Attorney General)*, 2007 FCA 273, [2008] 2 F.C.R. 341; and *Ainsley Financial Corp. v. Ontario Securities Commission* (1994), 21 O.R. (3d) 104 (C.A).

[68] Lastly, the Plan and Target have the force of law and are therefore reviewable. In *Friends of the Oldman River Society v. Canada (Minister of Transport)*, [1992] 1 S.C.R. 3, the Supreme Court considered administrative guidelines issued under s. 6 of the *Department of the Environment Act*, R.S.C. 1985, c. E-10, which states:

> For the purposes of carrying out his duties and functions related to environmental quality, the Minister may, by order, with the approval of the Governor in Council, establish guidelines for use by departments, boards and agencies of the Government of Canada […]. [emphasis added]

[69] La Forest J. held that the section cited above authorized guidelines that have a mandatory effect:

> Here […] we are dealing with a directive that is not merely authorized by statute, but one that is required to be formally enacted by "order", and promulgated under s. 6 of the *Department of the Environment Act*, with the approval of the Governor in Council. That is in striking contrast with the usual internal ministerial policy guidelines intended for the control of public servants under the minister's authority. To my mind this is a vital distinction. […]

[70] I have noted above that the Plan and the Target are akin to guidelines, in that they are quasi-legislation that could potentially guide internal policy-making decisions. The fact that they are statutorily mandated by the *Cancellation Act* suggests that they are more than just internal ministerial policy guidelines. La Forest J.'s comments above strongly suggest that the Target and the Plan would therefore have the force of law: they are authorized and required by statute, promulgated under ss.3(1) and 4(1) of the *Cancellation Act*, and required the approval of the Lieutenant Governor in Council.

[71] For all three reasons above, I find that the Target and the Plan are reviewable by the courts, regardless of whether they are considered "law" for the purpose of a *Charter* analysis. I leave the

2020 ONSC 6918 (CanLII)

question of whether they are considered "law" to the application judge, if s/he deems it necessary to answer the question.

B. Are the claims in the Application capable of being proven?

[72] Generally, a motion to strike proceeds on the basis that the facts pleaded are true, unless they are manifestly incapable of being proven: *Imperial Tobacco*, at para. 22. Facts that are "manifestly incapable of being proven" include "bald conclusory statements of fact, unsupported by material facts": *Trillium Power Wind Corporation v. Ontario (Natural Resources)*, 2013 ONCA 683, 117 O.R. (3d) 721, at para. 31.

[73] The long-standing rule that facts pleaded in a statement of claim must be taken as proven was first enunciated in *Attorney General of Canada v. Inuit Tapirisat of Canada*, [1980] 2 S.C.R. 735, at p. 740:

> As I have said, all the facts pleaded in the statement of claim must be deemed to have been proven. On a motion such as this a court should, of course, dismiss the action or strike out any claim made by the plaintiff only in plain and obvious cases and where the court is satisfied that "the case is beyond doubt": [citation omitted].

[74] In *Operation Dismantle*, cited and discussed above, the Supreme Court heard an appeal on a motion to strike, in which the plaintiffs alleged that Canada's decision to allow the U.S. to test its air-launched cruise missile in Canada violated the *Charter*. The court wrestled with the rule in *Inuit Tapirisat* and the majority departed from that rule at para. 27:

> We are not, in my opinion, required by the principle enunciated in *Inuit Tapirisat*, *supra*, to take as true the appellants' allegations concerning the possible consequences of the testing of the cruise missile. The rule that the material facts in a statement of claim must be taken as true for the purpose of determining whether it discloses a reasonable cause of action does not require that allegations based on assumptions and speculations be taken as true. The very nature of such an allegation is that it cannot be proven to be true by the adduction of evidence. It would, therefore, be improper to accept that such an allegation is true. No violence is done to the rule where allegations, incapable of proof, are not taken as proven.

[75] Ultimately, the court concluded that the causal link between the actions of the Canadian government and the alleged violation of the plaintiffs' rights under the *Charter* was simply too uncertain, speculative, and hypothetical to sustain a cause of action: *Operation Dismantle*, at para. 3.

[76] *Operation Dismantle* is relevant to this Application as Ontario alleges that the facts pled by the Applicants cannot be taken as true and that their case is founded on speculative apprehensions about the link between the Target set by Ontario and harms that will be suffered by future generations.

[77] The Applicants argue that the facts in their pleadings are all capable of scientific proof and therefore not based on assumption or speculation.

2020 ONSC 6918 (CanLII)

The Law

[78] It is helpful to first review the facts in *Operation Dismantle* to understand why the court found the plaintiffs' claim to be "uncertain, speculative and hypothetical": at para. 3.

[79] In *Operation Dismantle*, the plaintiffs sought (i) a declaration that Canada's decision to permit the testing of the cruise missile was unconstitutional; (ii) injunctive relief to prohibit the testing; and (iii) damages.

[80] The court outlined the relevant portions of the plaintiffs' statement of claim at para. 4:

> The plaintiffs state and the fact is that the testing of the cruise missile in Canada is a violation of the collective rights of the plaintiffs and their members and all Canadians, specifically their right to security of the person and life in that:
>
> > (a) the size and eventual dispersion of the air-launched cruise missile is such that the missile cannot be detected by surveillance satellites, thus making verification of the extent of this nuclear weapons system impossible;
> >
> > (b) with the impossibility of verification, the future of nuclear weapons' control and limitation agreements is completely undermined as any such agreements become practically unenforceable;
> >
> > (c) the testing of the air-launched cruise missiles would result in an increased American military presence and interest in Canada which would result in making Canada more likely to be the target of a nuclear attack;
> >
> > (d) as the cruise missile cannot be detected until approximately eight minutes before it reaches its target, a "Launch on Warning" system would be necessary in order to respond to the cruise missile thereby eliminating effective human discretion and increasing the likelihood of either a pre-emptive strike or an accidental firing, or both;
> >
> > (e) the cruise missile is a military weapon, the development of which will have the effect of a needless and dangerous escalation of the nuclear arms race, thus endangering the security and lives of all people.

[81] The court noted that to succeed, the plaintiffs must show that they had some chance of proving that the action of the Canadian government had caused a violation or a threat of violation of their rights under the *Charter*: at para. 10. In other words, the plaintiffs would have to demonstrate that the testing of the cruise missile would cause an increase in the risk of nuclear war: at para. 15. The court ultimately found that the plaintiffs could not establish the link between the Cabinet decision to permit the testing of the cruise missile and the increased risk of nuclear war: at para. 15.

[82] The court then ruled that the plaintiffs' claim essentially rested on an if-then assumption – *i.e.*, if the Canadian government allowed the U.S. government to test the cruise missile system

2020 ONSC 6918 (CanLII)

in Canada, then there would be an increased risk of nuclear war: at para. 16. However, this assumption was contingent upon the possible reactions of the nuclear powers to the testing of the cruise missile in Canada and was based on major assumptions as to how foreign powers would react: at para. 19.

[83] The court focused on the fact that the claims were based on foreign policy decisions and found that they were speculative:

- Since the foreign policy decisions of independent and sovereign nations are not capable of prediction, on the basis of evidence, to any degree of certainty approaching probability, the nature of such reactions can only be a matter of speculation; the causal link between the decision of the Canadian government to permit the testing of the cruise and the results that the appellants allege could never be proven: at para. 18.

- The parties make two assumptions with regard to the reaction of foreign powers: first, that they will not develop new types of surveillance satellites or new methods of verification, and second, that foreign powers will not establish new modes of co-operation for dealing with the problem of enforcement: at para. 19.

- Even if the testing results in an increased American military presence and interest in Canada, to say that this would make Canada more likely to be the target of a nuclear attack is to assume certain reactions of hostile foreign powers to such an increased American presence. Given the impossibility of determining how an independent sovereign nation might react, it can only be a matter of hypothesis whether an increased American presence would make Canada more vulnerable to nuclear attack. It would not be possible to prove it one way or the other: at para. 20.

- The plaintiffs assume that foreign states will not develop their technology in such a way as to meet the requirements of effective detection of the cruise and that there will therefore be an increased likelihood of a pre-emptive strike or an accidental firing, or both. Again, this assumption concerns how foreign powers are likely to act in response to the development of the cruise: at para. 21.

- The plaintiffs assert that the development of the cruise will lead to an escalation of the nuclear arms race. This again involves speculation based on assumptions as to how foreign powers will react: at para. 22.

- Exactly what the Americans will decide to do about development and deployment of the cruise missile, whether tested in Canada or not, is a decision that they, as an independent and sovereign nation, will make for themselves. Even with the assistance of qualified experts, a court could only speculate on how the American government may make this decision, and how important a factor the results of the testing of the cruise in Canada will be in that decision: at para. 24.

2020 ONSC 6918 (CanLII)

[84] A concurring opinion by Wilson J. departed slightly from the majority. Wilson J. followed the rule in *Inuit Tapirisat*, noting, at para. 78:

> It has been suggested [by the majority], however, that the plaintiffs' claim should be struck out because some of the allegations contained in it are not matters of fact but matters of opinion and that matters of opinion, being to some extent speculative, do not fall within the principle that the allegations of fact in the statement of claim must be taken as proved. I cannot accept this proposition since it appears to me to imply that a matter of opinion is not subject to proof. What we are concerned with for purposes of the application of the principle is, it seems to me, "evidentiary" facts. These may be either real or intangible.

[85] Wilson J. advocated for a more flexible approach to evidence and to the taking of the facts alleged as proven, *i.e.*, not dismissing the facts simply because they are a matter of opinion. However, she ultimately found that the facts could not constitute a violation of s. 7 of the *Charter.* Later in these reasons, I will elaborate on Wilson J.'s discussion of the standard required to prove causation in a s.7 claim.

Position of the Parties

[86] Ontario submits that the Applicants' burden is to prove that Ontario's target for the reduction of GHG emissions by the year 2030 will cause or contribute to future harms claimed. They also submit that the allegations in the Application are "manifestly incapable of being proven".

[87] Ontario also submits that this Application raises the same problems of proof as *Operation Dismantle*: it is not possible for this Court, even with the best available evidence, to do more than speculate upon the likelihood that the catastrophic climate scenarios pleaded will come to pass unless Ontario's Target is struck down or amended.

[88] During oral submissions, Ontario emphasized the global aspect of GHG reduction, which it argued involves "coordination problems with a variety of other jurisdictions, both national and subnational" and that "these are the kind of things that cannot be established through evidence", as "[t]here isn't sufficient probability."

[89] Notably, Ontario does not argue that climate change itself is speculative. It also does not contest the fact of anthropogenic climate change or the desirability of taking action to mitigate the adverse effects of climate change. However, it submits that the Application rests on a "chain of speculative assumptions, none of which is provable with evidence in court":

- that the actual GHG emissions in the Province of Ontario in the year 2030 will not be different from the current Target;
- that the Plan and the Target will not themselves change before the year 2030;
- that the climate policies of the Canadian federal government applicable in Ontario will have no effect (positive or negative) on GHG emissions in Ontario or on the future impact of the climate on Ontario's residents;

2020 ONSC 6918 (CanLII)

- that the impact on the climate of meeting Ontario's Target will not be offset (either positively or negatively) by the climate policies of and GHG emissions from other jurisdictions in Canada and throughout the world;

- that the catastrophic climate effects foretold by the Applicants for future generations can be avoided or mitigated at all by any target adopted today by the Government of Ontario; and

- that the future impacts of climate change on the health and well-being of Ontario residents, considered in conjunction with all other factors affecting the future health and well-being of future residents (including advances in medicine, engineering and climate mitigation), can be predicted with reasonable accuracy today on the available evidence.

2020 ONSC 6918 (CanLII)

[90] The Applicants submit that Ontario's "chain of speculative assumptions" is flawed for two reasons. First, they submit that it is Ontario's position that is speculative, as Ontario suggests that the actual GHG emissions may differ from the Target, or that the Target may change before 2030, despite the fact that Ontario is in a position to control emissions through the Plan and that there is no date for revisiting the Target. They note further that Ontario ignores the fact that GHGs being released today pursuant to the Target will remain in the atmosphere and are part of the problem.

[91] The Applicants also submit that Ontario's assertion that the catastrophic effects of climate change cannot be avoided or mitigated at all by any GHG reduction target is itself speculative. The Applicants point to the Plan itself, which states that the people of Ontario have "played an important role in fighting climate change and mitigating the threats to our prosperity and way of life"; that by reducing emissions, Ontario will "maintain… a healthy environment" and "slow down climate change"; and that Ontario's actions "are important in the global fight to reduce emissions" (citing p. 17-18 of the Plan).

[92] The Applicants submit generally that Ontario cannot escape judicial review by arguing that the Application is based on theories about future events. They maintain that on Ontario's logic, the Target could never be subject to scrutiny until it is too late, when catastrophic climate change is irreversible. By extension, any constitutional challenge to legislation encompassing future harms would automatically fail because that law could theoretically change before the harms fully materialize.

[93] Additionally, the Applicants submit that the Application asks for something concrete and cognizable that can be determined with reference to "scientifically known and knowable standards" and expert evidence. They submit that experts can determine the specific amount of megatons to which Ontario must limit its emissions, in conformity with a scientifically specific standard that is not vague or amorphous.

[94] Lastly, the Applicants cite decisions in other countries to demonstrate that their claim is capable of scientific proof. For example, in *Urgenda et al. v. The State of the Netherlands (Ministry of Infrastructure and the Environment),* 19/00135 (Hoge Raad), the Supreme Court of the Netherlands affirmed that reduction in emissions was necessary for the Dutch government to

protect human rights. The court recognized that "each additional molecule of GHG in the atmosphere causes a demonstrable increase in the harm, with a single molecule of carbon dioxide causing a warming effect." Citing other decisions in the U.S., New Zealand, Australia, and Colombia, the Applicants argue that many countries have already found causal links between local government policies, emissions levels, and increased risks of harm from climate change, regardless of the emissions of other nations.

2020 ONSC 6918 (CanLII)

Analysis and Conclusion

[95] At this stage of the proceedings, the facts in the Applicants' claim should be deemed to have been proven, pursuant to *Inuit Tapirisat*. Unlike the facts claimed in *Operation Dismantle*, I am satisfied, for the purposes of this Rule 21 motion, that the facts in the Applicants' pleadings are capable of scientific proof. As the Applicants pointed out during oral submissions, "whether or not we succeed is going to be a matter for a trier of fact" and based on the full evidentiary record. I agree with that statement.

[96] In contrast to fear of missile testing leading to nuclear war, I am satisfied, again for the purposes of this Rule 21 motion, that it is not plain and obvious that scientific evidence cannot be marshalled to establish that GHG emissions cause harm. As well, I am satisfied that appropriate levels of global GHG emissions can be established through scientific evidence, based on the past and projected emission levels. In their Notice of Application, the Applicants cite various facts that are capable of scientific proof and about which courts are capable of making determinations, based on expert evidence, including the following:

- The total level of CO_2 in the atmosphere is rising and is now around 410 ppm, compared to the approximately 280 ppm level that was present through the relatively stable climate of the last 10,000 years;

- The buildup of CO_2 and other GHGs in the atmosphere has warmed the planet by approximately 1 degree Celsius on average since the pre-industrial period, with global temperature now increasing at the rate of 0.2 degree Celsius per decade;

- If all human-caused GHG emissions ceased immediately, the Earth's climate would still heat up by several tenths of a degree Celsius because of the latency time between GHG accumulation in the atmosphere and warming in the Earth's climate system;

- The Target allows for 30 megatonnes more in annual GHG pollution by 2030 than the 2030 target that was previously in place, or a total of 190 megatonnes of GHGs into the atmosphere's CO_2 stock between 2018 and 2030;

- The Target's annual increase of 30 megatonnes is equal to the annual emissions of more than 7 million passenger vehicles;

- Ontario has warmed about twice as fast as the global average since the pre-industrial period, at approximately 1.7 degrees Celsius; Ontario will continue to experience the impacts of global warming at an above-average rate;

- Devastating impacts of climate change will become more pronounced in Ontario as the Earth's climate warms to levels approaching and exceeding 2 degrees Celsius above pre-industrial levels;

- Canada's share of the remaining global carbon budget is (at most) 2,000 megatonnes of CO_2, in order to likely avoid the catastrophic consequences of global temperatures rising beyond 1.5 degrees Celsius above pre-industrial levels; and

- Under the Target, Ontario's total CO_2 emissions from now until 2030 will be 1,670 megatonnes, or between 250-363% greater than Ontario's share of the global carbon budget, and almost *all* of Canada's budget.

[97] In the *Carbon Pricing Reference*, the Court of Appeal for Ontario observed that various findings and standards can be projected or predicted with scientific accuracy. For example, the court found [emphasis added]:

- "[…T]he global average surface temperature has increased by approximately 1.0 degree Celsius above pre-industrial levels (*i.e.*, prior to 1850). It is estimated that by 2040, the global average surface temperature will have increased by 1.5 degrees Celsius.": at para. 9;

- "It is predicted that temperatures in Canada will continue to increase at a rate greater than the rest of the world.": at para. 10;

- "This global warming is causing climate change and its associated impacts. The uncontested evidence before this Court shows that climate change is causing or exacerbating: [various examples of the impact of climate change]": at para. 11; and

- "The United Nations Intergovernmental Panel on Climate Change recently reported that global net anthropogenic CO_2 emissions must be reduced by approximately 45 percent below 2010 levels by 2030, and must reach "net zero" by 2050 in order to limit global average surface warming to 1.5 degrees Celsius and to avoid the significantly more deleterious impacts of climate change. […]": at para. 16.

These examples demonstrate that unlike the assumptions in *Operation Dismantle* that cannot be predicted with scientific accuracy, it is probable, with evidence, that many of the Applicants' claims are capable of proof.

[98] As an additional example, in *Energy Probe v. Canada (Attorney General)* (1989), 68 O.R. (2d) 449 (C.A.), the Court of Appeal for Ontario held that a non-governmental organization may be able to prove that Ontario's lax liability standards provided nuclear power operators with

2020 ONSC 6918 (CanLII)

incentive to increase production of reactors, at the expense of greater risk of harm to the public. In the following paragraphs, the Court of Appeal distinguished the case from *Operation Dismantle*:

> [41] I see a difference between the level of speculation and ability to predict a result dependent upon actions of foreign governments [referring to *Operation Dismantle*], and the "speculation" here, which involves the impact of our tort laws upon industry and standards of care in a particular industry. If I were presented with an expert opinion which stated: "toys are safer for children today than they were 15 years ago, and it is because of the increasing awareness of tort liability," I would give that *prima facie* credence. It might not be proven; there may be regulatory rules that have led to the apparent result but, tested as a triable issue, the nexus between the allegation and the conclusion is very different from that between testing missiles and nuclear war. […]
>
> [42] I am not persuaded that the expert evidence in this case could not be translated into a finding of fact by a trial Judge associating exposure to liability with standard of care for the purpose of making the declaration which is sought. […]
>
> [43] It is therefore my conclusion that the appellants have "some chance of proving" that the Act [*Nuclear Liability Act*, R.S.C. 1985, c. N-28] violates rights protected by s. 7 of the *Charter*.

[99] Similarly, in this case, there is a difference between the level of speculation and ability to predict a result dependent upon actions of foreign governments and the facts pleaded here, which are capable of scientific proof. At this stage of the proceedings, therefore, it is premature to find that the Applicants' claim is "manifestly incapable of being proven", as expert evidence can be, and I understand will be, tendered to demonstrate the validity of the Applicants' claim.

[100] I note, additionally, that *Operation Dismantle* was recently considered in a climate change context in *La Rose*, where the Federal Court disagreed with Canada's submission that the plaintiffs' claim was speculative, which would also apply to this Application:

> [74] The Defendants [Canada] further allege that the *Charter* claims are speculative because they are incapable of proof, owed to the cumulative and global nature of climate change. Climate change is driven from historical and global human activities and requires a comprehensive, international approach to address. In this way, the Defendants liken the current case to *Operation Dismantle*, where a "sufficient causal link" could not be established. In *Operation Dismantle*, the Federal Cabinet's decision to approve cruise missile testing could not be linked to the result the appellants were alleging – the increased threat of nuclear war. This amounted to speculation, which could never be proven (*Operation Dismantle* at para. 18).
>
> [75] I cannot find that there is no reasonable prospect of success on the basis of the speculation arguments alone. Unlike the speculation inherent in the assumption in *Operation Dismantle* - that the reaction of foreign powers to cruise missile testing will increase the risk of nuclear war, the Plaintiffs in this case are alleging that Canada's role in

2020 ONSC 6918 (CanLII)

> climate change has led to the alleged harms. Canada has a role in GHG emissions that is more than speculative in this current case. [emphasis added]

[101] Lastly, there exists an international body, established by the United Nations, the mission of which is to provide scientific information on climate change, further suggesting that the Applicants' claims are potentially capable of scientific proof. The United Nations Intergovernmental Panel on Climate Change is "the leading world body for assessing the most recent scientific, technical, and socio-economic information produced worldwide relevant to understanding climate change, its impacts and potential future risks, and possible response options": *Reference re Greenhouse Gas Pollution Pricing Act*, 2019 SKCA 40, [2019] 9 W.W.R. 377, at para. 16.

[102] As mentioned above, for the purposes of this motion, the facts pleaded in the Applicants' claim are to be taken as proven. I am satisfied that the claims in this Application are not "manifestly incapable of being proven" or as speculative as Ontario asserts. It is probable that they are capable of being scientifically proven. These facts are, by no means, as "uncertain, speculative and hypothetical" as the ones in *Operation Dismantle*, which mostly depended on the reaction of different nations to missile testing in Canada. I am satisfied that this Application meets the threshold of "capable of proof", leaving the question of whether the Applicants are able to prove their claims to the application judge, who will be presented with a full evidentiary record. Concluding, for the purposes of this Rule 21 motion, that the Application is capable of scientific proof, I will elaborate later in these reasons the Applicants' evidentiary burden under s.7 and s.15 to establish causation.

C1. Is this matter justiciable?

The Law

[103] When courts are asked to adjudicate matters of complex public policy, the question of whether the matter is justiciable may arise. In *Boundaries of Judicial Review: The Law of Justiciability in Canada*, 2nd ed. (Toronto: Carswell, 2012), Dean Lorne Sossin (as he then was) defines "justiciability" as follows:

> [J]usticiability may be defined as a set of judge-made rules, norms and principles delineating the scope of judicial intervention in social, political and economic life. In short, if a subject-matter is held to be suitable for judicial determination, it is said to be justiciable; if a subject-matter is held not to be suitable for judicial determination, it is said to be non-justiciable. The criteria used to make this determination pertain to three factors: (1) the capacities and legitimacy of the judicial process, (2) the constitutional separation of powers and (3) the nature of the dispute before the court: at p. 7.

[104] The doctrine of justiciability is largely focused on an inquiry into the "appropriateness" of judicial adjudication. As stated in *Canada (Auditor-General) v. Canada (Minister of Energy, Mines & Resources)*, [1989] 2 S.C.R. 49, "[a]n inquiry into justiciability is, first and foremost, a normative inquiry into the appropriateness as a matter of constitutional judicial policy of the courts

2020 ONSC 6918 (CanLII)

deciding a given issue, or instead deferring to other decision-making institutions of the polity": at pp. 90-91.

[105] The doctrine of justiciability ensures respect for the functional separation of powers among the legislative and judicial branches of government in Canada. As Dean Sossin (as he then was) observes:

> First, as a non-democratic (some would say anti-democratic) institution, courts do not have the resources or expertise to competently establish what policy or law best advances the public interest. Second, the legitimacy of judicial decision-making is more difficult to sustain where it appears that the judge is substituting her preferences for those of the legislative or executive branches: Sossin, at pp. 204-05.

[106] In *Operation Dismantle*, Wilson J. was careful to note that the wisdom of a government's legislative and policy choices could not be made the subject of a legal claim. However, she also emphasized that when *Charter* rights are violated, the court is obliged to review the governmental action:

> [63] It might be timely at this point to remind ourselves of the question the Court is being asked to decide. It is, of course, true that the federal legislature has exclusive legislative jurisdiction in relation to defence under s. 91(7) of the *Constitution Act, 1867* and that the federal executive has the powers conferred upon it in ss. 9-15 of that Act. Accordingly, if the Court were simply being asked to express its opinion on the wisdom of the executive's exercise of its defence powers in this case, the Court would have to decline. It cannot substitute its opinion for that of the executive to whom the decision-making power is given by the Constitution. Because the effect [emphasis in original] of the appellants' action is to challenge the wisdom of the government's defence policy, it is tempting to say that the Court should in the same way refuse to involve itself. However, I think this would be to miss the point, to fail to focus on the question which is before us. The question before us is not whether the government's defence policy is sound but whether or not it violates the appellants' rights under s. 7 of the *Charter of Rights and Freedoms*. This is a totally different question. I do not think there can be any doubt that this is a question for the courts. […]
>
> [64] I would conclude, therefore, that if we are to look at the Constitution for the answer to the question whether it is appropriate for the courts to "second guess" the executive on matters of defence, we would conclude that it is not appropriate. However, if what we are being asked to do is to decide whether any particular act of the executive violates the rights of the citizens, then it is not only appropriate that we answer the question; it is our obligation under the *Charter* to do so.

[107] Ontario relies heavily on two cases to argue that the Application is not justiciable: *Tanudjaja v. Canada (Attorney General)*, 2014 ONCA 852, 123 O.R. (3d) 161 ("***Tanudjaja (ONCA)***"), aff'ing *Tanudjaja v. Attorney General (Canada)*, 2013 ONSC 5410, 116 O.R. (3d) 574 ("***Tanudjaja (SCJ)***"), and *Friends of the Earth v. Canada (Governor in Council)*, 2008 FC 1183, [2009] 3 F.C.R. 201, aff'd 2009 FCA 297, leave to appeal refused, [2010] S.C.C.A. No. 33469,

2020 ONSC 6918 (CanLII)

the latter of which I will address later in these reasons. I will summarize *Tanudjaja (ONCA)* prior to outlining the parties' positions on it.

[108] In *Tanudjaja*, the Court of Appeal for Ontario upheld this Court's decision to strike out an application for non-justiciability. The application alleged that the action and inaction on the part of Canada and Ontario resulted in homelessness and inadequate housing. The trial judge described the application as follows:

> The Application is premised on an obligation said to be imposed, by the *Charter of Rights and Freedoms*, on the government of Canada and the government of Ontario […] to put in place policies and strategies that ensure that affordable, adequate and accessible housing is available for all Ontarians and Canadians. The Application relies on s. 7 (life, liberty and security of the person) and s. 15 (equal protection and equal benefit of the law without discrimination) of the *Charter* which, it alleges, have been breached. The breaches, as identified in the Application, arise out of changes to legislative policies, programs and services which are said to have resulted in increased homelessness and inadequate housing. The Application states that, beginning in the mid-1990's, both Canada and Ontario took decisions which have eroded access to affordable housing. It is said that these decisions were made, and the program changes which implemented them put in place, without appropriately addressing their impact on homelessness and inadequate housing and without ensuring that alternative measures have been provided to protect vulnerable groups from these effects. The Application seeks a broad set of remedies, including declarations that the failure of both Canada and Ontario to implement effective national and provincial policies to reduce and eliminate homelessness and inadequate housing has violated the rights of the applicants under s. 7 and s. 15 of the *Charter.* As remedial measures, the Application seeks mandatory orders that such strategies be developed and implemented "in consultation with affected groups" and include "timetables, reporting and monitoring regimes, outcome measurements and complaints mechanisms". The Application requests that the Court remain "…seized of supervisory jurisdiction to address concerns regarding implementation of the order": *Tanudjaja (SCJ)*, at para. 2.

[109] Notably, the applicants in *Tanudjaja* did not

> expressly […] challenge […] any particular legislation, nor do they allege that the particular application of any legislation or policy to any individual has violated his or her constitutional rights. They do not point to a particular law which they say "in purpose or effect perpetuates prejudice and disadvantage to members of a group on the basis of personal characteristics within s. 15(1)". They do not identify any particular law which violates the s. 7 right to life, liberty and security of the person. Rather, they submit that the social conditions created by the overall approach of the federal and provincial governments violate their rights to adequate housing.: *Tanudjaja (ONCA)*, at para. 10.

[110] The Court of Appeal found *Tanudjaja* to be non-justiciable because the claims were problematic and there was no sufficient legal component to anchor the analysis. The court noted:

2020 ONSC 6918 (CanLII)

- The application did not challenge a specific state action or a specific law; there is therefore no sufficient legal component to engage the decision-making capacity of the courts: *Tanudjaja (ONCA)*, at para. 27.

- The diffuse and broad nature of the claims does not permit an analysis under s. 1 of the *Charter*. As indicated in *R. v. Oakes*, [1986] 1 S.C.R. 103, in the event of a violation of a right guaranteed by the *Charter*, the legislation will nonetheless be sustained if the objective of the legislation is pressing and substantial, the rights violation is rationally connected to the purpose of the legislation, the violation minimally impairs the guaranteed right, and the impact of the infringement of the right does not outweigh the value of the legislative object. In this application, in the absence of any impugned law, there is no basis to make that comparison: *Tanudjaja (ONCA)*, at para. 32.

- There is no judicially discoverable and manageable standard for assessing whether housing policy is adequate or whether insufficient priority has been given in general to the needs of the homeless. This is not a question that can be resolved by application of law, but rather it engages the accountability of the legislatures. Issues of broad economic policy and priorities are unsuited to judicial review. Here the court is not asked to engage in a "court-like" function but rather to embark on a course more resembling a public inquiry into the adequacy of housing policy: *Tanudjaja (ONCA)*, at para. 33.

[111] Neither party made submissions on *La Rose*, but that action was struck for reasons similar to those in *Tanudjaja*. Like the *Tanudjaja* applicants, the *La Rose* plaintiffs did not challenge specific governmental actions. Instead, they challenged Canada's "Impugned Conduct", which involved the following actions and inactions on the part of the government:

- Continuing to cause, contribute to and allow a level of GHG emissions incompatible with a Stable Climate System;

- Adopting GHG emission targets that are inconsistent with the best available science about what is necessary to avoid dangerous climate change and restore a Stable Climate System;

- Failing to meet the Defendants' own GHG emission targets; and

- Actively participating in and supporting the development, expansion and operation of industries and activities involving fossil fuels that emit a level of GHGs incompatible with a Stable Climate System: *La Rose*, at para. 8.

[112] Because of the "undue breadth and diffuse nature of the Impugned Conduct" above, the *La Rose* court found the action to be non-justiciable as a result: at para. 41.

2020 ONSC 6918 (CanLII)

Position of the Parties

[113] Ontario submits that this Application is not justiciable because a court should not involve itself in the review of actions or decisions of the Executive or Legislative branches where the subject matter of the dispute is either inappropriate for judicial involvement or where the court lacks the capacity to properly resolve it. Ontario submits that the questions in this Application are simply unsuitable for adjudication in court.

[114] As mentioned earlier, Ontario also relies on *Friends of the Earth* to argue that this Application is not justiciable. That case largely focused on the Canadian government's actions after Parliament enacted the *Kyoto Protocol Implementation Act*, S.C. 2007, c. 30 ("***KPIA***"). The *KPIA* requires the Minister of the Environment to prepare an annual Climate Change Plan that describes "the measures to be taken [by the federal government] to ensure that Canada meets its [Kyoto] obligations". When the federal government released a plan that was allegedly inadequate for meeting the obligations, the environmental organization Friends of the Earth brought a challenge.

[115] The Federal Court found the challenge to be non-justiciable and held that the court had no role to play in reviewing "the reasonableness of the government's response to Canada's Kyoto commitments within the four corners of the *KPIA*": *Friends of the Earth*, at para. 46. The court further held that "[w]hile the failure of the Minister to prepare a Climate Change Plan may well be justiciable, an evaluation of its content is not": at para. 34. In other words, the *KPIA* comprised many "policy-laden considerations which are not the proper subject matter for judicial review": at para. 40.

[116] Ontario relies on *Friends of the Earth* to argue that this Application is similarly non-justiciable. In its factum, Ontario argues that the Target is analogous to statements of public policy objectives, such as those found in the *Poverty Reduction Act, 2009*, cited and discussed above, which states in the preamble: "A principal goal of the Government's strategy published on December 4, 2008 is to achieve a 25 per cent reduction in the number of Ontario children living in poverty within five years."

[117] Ontario also argues that *Friends of the Earth* is very similar to this case, because just as there were no objective legal criteria which could be applied in *Friends of the Earth* to allow the court to determine whether Canada's plan provided for an "equitable distribution of reduction levels among the sectors of the economy that contribute to greenhouse gas emissions", so too there are no legal criteria that could allow this Court to adjudicate the Applicants' claim for a mandatory order that "Ontario forthwith set a science-based GHG reduction target under s.3(1) of the *CTCA* that is consistent with Ontario's share of the minimum level of GHG reductions necessary to limit global warming to below 1.5°C." It submits further that determining "Ontario's share" of global GHG emissions should be determined based on population, gross domestic product, emissions since Confederation or over any other period of time, economic efficiency, or diplomatic strategy, which are all questions outside the court's institutional capacity.

[118] Ontario also relies heavily on *Tanudjaja*, where the court found the application to be "demonstrably unsuitable for adjudication" as there was not a "sufficient legal component to

2020 ONSC 6918 (CanLII)

anchor the analysis": *Tanudjaja (ONCA)*, at paras. 35-36. Ontario submits that this Application is similar to the one in *Tanudjaja*, as plans to deal with global climate change are unsuited to judicial review. It submits that climate change plans are even less suitable for judicial review than housing policy, because while provincial housing policy is at least largely confined within provincial boundaries, climate change is notoriously planetary in scope.

[119] The Applicants submit that their Application is different from the one in *Tanudjaja*, as it is aimed at a number of very specific measures – both legislation and policies passed pursuant to legislation – taken by Ontario. The Applicants submit that the majority in *Tanudjaja (ONCA)* left the door open by noting that "[t]his is not to say that constitutional violations caused by a network of government programs can never be addressed, particularly when the issue may otherwise be evasive of review": *Tanudjaja (ONCA)*, at para. 29. The Applicants submit that that is precisely what this Application is premised on: a myriad of government decisions, programs, and conduct contribute to climate change in various ways and would otherwise be evasive of review. They submit that the Target is the coordinating mechanism and guiding principle underlying all of these elements; it is therefore not plain and obvious that this case is not justiciable. I accept the Applicants' submissions on this point.

[120] Generally, the Applicants submit that the questions raised in the Application are well within this Court's institutional capacity. The questions all concern the alleged pressing threat to constitutional rights posed by Ontario's failure to act in order to protect its population from climate change, which are precisely the type of issue that engages this Court's obligation to interpret and apply the *Charter*.

[121] The Applicants also submit that non-justiciable cases are rare, especially when *Charter* rights are involved. They cite *Chaoulli v. Québec (Attorney General)*, 2005 SCC 35, [2005] 1 S.C.R. 791, a case I will discuss further below, where the Supreme Court stated, at para. 107:

> The fact that the matter is complex, contentious or laden with social values does not mean that the courts can abdicate the responsibility vested in them by our Constitution to review legislation for *Charter* compliance when citizens challenge it. In such circumstances, it is the court's *obligation* to decide the matter.

[122] The Applicants also cite the Federal Court of Appeal, which has stated that "*Charter* cases are justiciable regardless of the nature of the government action": *Hupacasath First Nation v. Canada (Minister of Foreign Affairs)*, 2015 FCA 4, 379 D.L.R. (4th) 737, at para. 61.

[123] Additionally, the Applicants disagree with Ontario's assertion that the Application will take this Court beyond its institutional capacity because, as Ontario asserts, the relief sought does not encompass judicially manageable standards. They submit that a "science-based GHG reduction target", a "stable climate system", and a "sustainable" future for youth and future generations are all standards based on a globally-recognized body of scientific research and prescriptive standards that make them both judicially manageable and discoverable. This Court will have the benefit of international scientific guidance, as well as expert evidence, when hearing the Application on its merits. These standards are unlike the ones in *Tanudjaja*, where the claimants sought recognition of a right to "adequate" housing and argued that federal and provincial governments gave the issue

2020 ONSC 6918 (CanLII)

"insufficient priority". The Applicants submit that these standards were not judicially discoverable or manageable because they were infused with subjective considerations and unmoored from any standard that could be established through evidence. These are unlike the science of climate change, which they submit is likely one of the most thoroughly researched issues in recent scientific history, with thousands of scientists from all over the world assessing not only its causes, trajectory and consequences, but also the necessary GHG emission reductions to avoid the most catastrophic results.

[124] Lastly, the Applicants submit that courts in Canada and around the world have adjudicated similar issues and courts have ruled on questions involving a government's constitutional and legal obligations as regards GHG reductions. They cite cases from the Québec Superior Court (*Environnement Jeunesse c. Procureur Général du Canada*, 2019 QCCS 2885), the Dutch *Urgenda* decision (cited above), and other cases from the High Court in New Zealand, Australia, Lahore High Court in Pakistan, and Colombia.

Analysis and Conclusion

[125] As the Federal Court of Appeal has noted, the category of non-justiciable cases is very small: *Hupacasath First Nation*, at para. 67. The court also noted that even in judicial reviews of subordinate legislation motivated by economic considerations and other difficult public interest concerns, courts will still assess the acceptability and defensibility of government decision-making, often granting the decision-maker a "very large margin of appreciation": *Hupacasath First Nation*, at para. 67.

[126] As indicated above, I have already found that Cabinet decisions are justiciable and reviewable. As Wilson J. eloquently summarized in *Operation Dismantle*, where a *Charter* challenge is involved, "it is not only appropriate that we answer the question; it is our obligation under the *Charter* to do so": at para. 64.

[127] Other courts have also noted the special status of a *Charter* claim in the context of a review of government action and the courts' role in ensuring the validity of government action.

[128] Lederer J., for example, noted in *Tanudjaja (SCJ)*, at para. 139: "There is no doubt that an application that involves allegations of breaches of the *Charter* is justiciable."

[129] In *Turp v. Canada*, 2012 FC 893, [2014] 1 F.C.R. 439, the Federal Court considered a challenge of the Canadian government's decision to withdraw from the Kyoto Protocol in 2011. The court found the matter to be non-justiciable but noted that a *Charter* challenge would have rendered it justiciable: at para. 18.

[130] Similarly, in *Friends of the Earth*, on which Ontario relies, the court expressed doubts that the court has any role to play in controlling or directing the other branches of government in the conduct of their legislative and regulatory functions outside of the constitutional context: at para. 40.

2020 ONSC 6918 (CanLII)

[131] Ontario states that the task of dealing with global climate change is an "enormously complex issue unsuited to judicial review" and that the Target falls within the realm of public policy that is inappropriate for judicial involvement.

[132] I have already found above that the Target and Plan are not pure policy decisions. However, I also note that this Application is very different from those in *Tanudjaja* and *La Rose*. In *Tanudjaja*, the applicants "did not challenge a specific state action or a specific law": *Tanudjaja (ONCA)*, at para. 27. In *La Rose*, the court noted that the plaintiffs were essentially challenging "Canada's overall approach to climate policy": at para. 22. Here, the Applicants are challenging very specific governmental actions and legislation. They are challenging policy decisions that were translated into law – in the form of the *Cancellation Act* – and by state action – in that the Ministry of Environment set the Target, pursuant to the *Cancellation Act*.

[133] Indeed, the *La Rose* court did not foreclose the possibility that policy can be justiciable, noting, "Policy choices must be translated into law or state action in order to be amenable to *Charter* review and otherwise justiciable": at para. 38 (also see discussion at para. 45).

[134] Additionally, both *Friends of the Earth* and *Tanudjaja* suggest that a matter is not non-justiciable simply because it may involve another branch of government.

[135] In fact, Dean Sossin (as he then was), in *Boundaries of Judicial Review*, suggests that the judge in *Friends of the Earth* should not have invoked the doctrine of justiciability due to concern over another branch of government relating to implementing a remedy. He also notes that the judge rejected an approach that would allow the court to separate the *KPIA* policy imperatives into justiciable and non-justiciable components: Sossin, at p. 247.

[136] Further, as the majority in *Tanudjaja (ONCA)* noted at para. 35:

> I add that complexity alone, sensitivity of political issues, the potential for significant ramifications flowing from a court decision and a preference that legislatures alone deal with a matter are not sufficient on their own to permit a court to decline to hear a matter on the ground of justiciability: see, for example, *Chaoulli*, at para. 107.

[137] Lastly, while social and economic rights are not the main focus of the Application, they are collateral issues that are raised. As Feldman J.A. noted in her dissent in *Tanudjaja (ONCA),* justiciability of social and economic rights is an open question:

> [79] [Dean Sossin] then concludes that the justiciability of social and economic rights under the *Charter* is an open question:
>
> > It is striking that, despite the rich jurisprudence which has developed under the *Charter*, such uncertainty remains with respect to a question of fundamental importance to the scope of judicial review of government action. For the moment, the justiciability of social and economic rights under the *Charter* remains an open question. [Sossin, at p. 244]
>
> […]

2020 ONSC 6918 (CanLII)

> [81] In *Gosselin*, the Supreme Court did not hold that claims for social and economic rights under the *Charter* were non-justiciable. As a result, courts should be extremely cautious before foreclosing any enforcement of these rights. In my view, to strike a serious *Charter* application at the pleadings stage on the basis of justiciability is therefore inappropriate. [emphasis added]

[138] Dean Sossin has also noted that the extent to which social and economic rights are incorporated into the Canadian Constitution remains unsettled: Sossin, at p. 242. Social and economic rights are wide-ranging and may include rights to adequate nutrition, clothing, housing, health, education, and welfare: Sossin, at p. 242. This further suggests that the courts have the institutional competence to determine these types of matters.

[139] To summarize, this Application is different from the ones considered in *Friends of the Earth*, *Tanudjaja*, and *La Rose*. As noted above, *Friends of the Earth* did not consider the government's action in the constitutional context. While the claim in *Tanudjaja* was based on the *Charter*, it failed to identify specific government conduct that led to a *Charter* violation. Rather, as the court pointed out, the application was largely focused on seeking recognition of an explicit positive obligation on the province to implement effective national and provincial strategies to reduce and eliminate homelessness and inadequate housing. In *La Rose*, the plaintiffs did not challenge any specific legislation or governmental action. Leaving the question of positive obligations to later in these reasons, this Application is different, as it challenges specific government conduct (preparation of the Target and the Plan) and legislation (the *Cancellation Act*).

[140] This Application is, therefore, based on the foregoing, *prima facie* justiciable. The focus must now shift to whether there is any reasonable prospect that the *Charter* claims made by the Applicants can succeed.

C2. Do the *Charter* claims in the Application have a reasonable prospect of success?

a. Section 7: Life, Liberty, and Security

The Claim as Pleaded

[141] The Applicants pleaded the following facts in the Notice of Application, which, for the purpose of this motion, are taken as proven, as discussed above and pursuant to *Inuit Tapirisat*.

[142] The Applicants submit that there are myriad ways that climate change impacts the health, lives, liberty, and livelihood of current and future generations of Ontarians. They submit that if global warming exceeds 1.5 degrees Celsius above pre-industrial temperatures, the impacts of climate change in Ontario will include (but will not be limited to):

- An increase in the frequency and intensity of acute extreme heat events, resulting in an increase in fatalities, serious illness, and severe harm to human health;
- An increase in overall temperatures and heat waves, resulting in an increase in fatalities, serious illness, and severe harm to human health;

2020 ONSC 6918 (CanLII)

- An increase in the spread of infectious diseases such as Lyme disease and West Nile Virus, resulting in an increase in fatalities, serious illness, and severe harm to human health;

- An increase in the frequency and intensity of fire activity (including forest wildfires), resulting in an increase in fatalities, serious illness, displacement, and severe harm to human health;

- An increase in the frequency and intensity of flooding and other extreme weather events, resulting in an increase in fatalities, serious illness, displacement, and severe harm to human health;

- An increase in the spread of harmful algal blooms in water that Ontarians use for drinking and recreational purposes, with a resulting increase in serious illness, loss of livelihood, and severe harm to human health;

- An increase in exposure to contaminants such as mercury through food webs, with a resulting increase in severe harm to human health and negative impact on food security and sovereignty of certain Ontario communities;

- An increase in harms to Indigenous peoples, including increased impacts on health, access to essential supplies, ability to carry out traditional activities, loss of livelihood, and displacement; and

- An increase in serious psychological harms and mental distress resulting from the impacts of climate change, including but not limited to, the impacts set out in the paragraphs above.

[143] The Applicants submit that the Target violates the rights of Ontario's youth under s.7 of the *Charter* by compromising their right to life, liberty, and security of the person, in a serious and pervasive manner that does not accord with the principles of fundamental justice. Their Notice of Application outlines the following:

- The Target is inadequate to hold global average temperature increases to 1.5 or 2 degrees Celsius above pre-industrial levels and thereby avoid catastrophic climate change impacts. The Target will ensure a higher level of GHG emissions that will cause or contribute to death, serious illness, and severe harm to the health of Ontario's youth and future generations, interfering with their right to life and security of the person.

- The Target violates the right to liberty of Ontario's youth and future generations because the impacts of climate change interfere with their ability to choose where to live, their right to personal autonomy, and their right to make other decisions of fundamental importance.

2020 ONSC 6918 (CanLII)

- The Target will materially increase the risk that Ontario's youth and future generations will suffer from the many harmful impacts of climate change.

[144] The Applicants submit that the Respondent's deprivation of the rights to the life, liberty, and security of Ontario's youth and future generations is not in accordance with the principles of fundamental justice in the following ways:

- The Target is grossly disproportionate to Ontario's stated objective of taking proactive action to address climate change, given the severity and extent of the harm caused by a high level of GHG emissions.

- The Target is arbitrary. Ontario's objective in adopting the Target was to take proactive action to address climate change. The Target bears no relation to and is inconsistent with that objective.

- To the extent Ontario may rely on economic justifications, the justifications ring hollow, and Ontario's inaction on climate change now will prove to be increasingly costly to Ontarians in the future.

Section 7 Jurisprudence and Analysis

[145] Section 7 of the *Charter* provides:

> Everyone has the right to life, liberty and security of the person and the right not to be deprived thereof except in accordance with the principles of fundamental justice.

[146] The constituent elements of a claim under s. 7 of the *Charter* were recently summarized succinctly by the Court of Appeal in *Bedford v. Canada (Attorney General)*, 2012 ONCA 186, 109 O.R. (3d) 1:

> [88] [Section] 7 creates a single constitutional right: the right not to be deprived of life, liberty and security of the person except in accordance with the principles of fundamental justice. There is no free-standing right to life, liberty and security of the person: [citation omitted]. Legislation that limits the right to life, liberty and security of the person will attract s. 7 scrutiny. It will, however, survive that scrutiny and avoid judicial nullification unless it is shown to be contrary to the principles of fundamental justice.
>
> [89] An applicant alleging a breach of s. 7 must demonstrate on the balance of probabilities that (1) the challenged legislation interferes with or limits the applicant's right to life, or the right to liberty, or the right to security of the person; and (2) that the interference or limitation is not in accordance with the principles of fundamental justice. […]

[147] On its face, the Application engages each of the s.7 rights: life, liberty, and security.

2020 ONSC 6918 (CanLII)

Life Interest

[148] Since the enactment of the *Charter* in the early 1980s, s.7 jurisprudence has traditionally been tied to the penal system or the administration of justice. However, s.7 jurisprudence has since expanded into broader matters of social policy, starting with cases like *Chaoulli*, cited above: see J. Hendry, "Section 7 and Social Justice" (2009-10) 27 Nat'l J. Const. L. 93.

[149] In *Chaoulli*, the Supreme Court ruled that Québec statutes prohibiting private medical insurance in the face of long wait times violated the *Québec Charter of Human Rights and Freedoms*, C.Q.L.R. c. C-12. *Chaoulli* was one of the first cases that greatly expanded the understanding of the "life" interest in s.7 jurisprudence.

[150] This expanded understanding of s.7 was once again apparent in *Canada (Attorney General) v. PHS Community Services Society*, 2011 SCC 44, [2011] 3 S.C.R. 134 ("***PHS***"). The PHS Society operated Insite, a supervised drug injection site, in Downtown Eastside Vancouver, an area racked by high drug use. To operate, Insite was obliged to apply for renewable exemptions from the federal Minister of Health, as the *Controlled Drugs and Substances Act*, S.C. 1996, c. 19, prohibits the possession and trafficking of controlled substances. In 2008, the Minister of Health did not extend the exemption. The Supreme Court found that the Minister's failure to grant the exemption limited Insite users' s.7 *Charter* rights and breached the principles of fundamental justice. The life interest was engaged as clients of Insite were deprived of potentially lifesaving medical care: at para. 91.

[151] The expansion of the concept of right to life continued. In a case challenging the prohibition of assisted suicide, *Carter v. Canada (Attorney General)*, 2015 SCC 5, [2015] 1 S.C.R. 331, the Supreme Court summarized, at para. 62:

> This Court has most recently invoked the right to life in *Chaoulli* [citation omitted], where evidence showed that the lack of timely health care could result in death [citation omitted], and in *PHS*, where the clients of Insite were deprived of potentially lifesaving medical care [citation omitted]. In each case, the right was only engaged by the threat of death. In short, the case law suggests that the right to life is engaged where the law or state action imposes death or an increased risk of death on a person, either directly or indirectly. […]

[152] In a non-*Charter* context, the Supreme Court has also acknowledged that "certain forms and degrees of environmental pollution can directly or indirectly, sooner or later, seriously harm or endanger human life and human health": see *Ontario v. Canadian Pacific Ltd*., [1995] 2 S.C.R. 1031, at para. 55; *R. v. Hydro-Québec*, [1997] 3 S.C.R. 213, at para. 127.

[153] The excerpt in *Carter* above suggests that right to life is engaged in this Application, as the Applicants argue that Ontario's actions in repealing the *Climate Change Act* and setting an inadequate Target increase the risk of death of Ontario's youth and future generations.

2020 ONSC 6918 (CanLII)

Liberty Interest

[154] Section 7's liberty interest is about more than physical freedom. The Supreme Court has found that "liberty" is engaged where state compulsions or prohibitions affect important and fundamental life choices: *Blencoe v. British Columbia (Human Rights Commission)*, 2000 SCC 44, [2000] 2 S.C.R. 307, at para. 49. This interest also protects "the right to make fundamental personal choices free from state interference": *Blencoe*, at para. 54. In *Carter*, the Supreme Court also stated: "concerns about autonomy and quality of life have traditionally been treated as liberty and security rights": at para. 62.

[155] Additionally, in *Godbout v. Longueuil (City)*, [1997] 3 S.C.R. 844, the Supreme Court found that the right to choose where to establish one's home falls within the scope of the liberty interest guaranteed by s.7 of the *Charter*, since this right to choice is so fundamentally or inherently personal such that, by its very nature, it implicates basic choices going to the core of what it means to enjoy individual dignity and independence: at para. 66.

[156] The Applicants submit in their Notice of Application that impacts of climate change will interfere with the Applicants' ability to choose where to live. On its face, that engages the "liberty" interest in s.7.

Security Interest

[157] Section 7's security interest is grounded in the idea of personal autonomy and protects both physical and psychological integrity. In *Carter*, the Supreme Court found that this interest is engaged when the state interferes with "an individual's physical or psychological integrity, including any state action that causes physical or serious psychological suffering": at para. 64. To trigger protection under the psychological branch of security of the person, the Supreme Court outlined in *New Brunswick (Minister of Health and Community Services) v. G. (J.)*, [1999] 3 S.C.R. 46, at para. 60:

> For a restriction of security of the person to be made out, then, the impugned state action must have a serious and profound effect on a person's psychological integrity. The effects of the state interference must be assessed objectively, with a view to their impact on the psychological integrity of a person of reasonable sensibility. This need not rise to the level of nervous shock or psychiatric illness, but must be greater than ordinary stress or anxiety. [emphasis added]

[158] In another context, the Supreme Court has also acknowledged that security of the person encompasses the right to be free from prospective harm. In other words, security of the person "must encompass freedom from the threat of physical punishment or suffering as well as freedom from such punishment itself": *Singh v. Minister of Employment and Immigration*, [1985] 1 S.C.R. 177, at p. 207.

[159] The Applicants, in their Notice of Application, submit that Ontario's inadequate Target could further contribute to climate change, which could lead to an increase in serious psychological harm and mental distress resulting from the impacts of climate change. While the Applicants will

2020 ONSC 6918 (CanLII)

need to establish at the merits hearing that this harm is "greater than ordinary stress or anxiety", the Application, at this stage of the proceedings, *prima facie* engages the security interest in s.7.

Principles of fundamental justice

[160] The s.7 rights of life, liberty, and security of the person may only be infringed upon if in accordance with the principles of fundamental justice. The Supreme Court, in *Canada (Attorney General) v. Bedford,* 2013 SCC 72, [2013] 3 S.C.R. 1101, noted at para. 105:

> The overarching lesson that emerges from the case law is that laws run afoul of our basic values when the means by which the state seeks to attain its objective is fundamentally flawed, in the sense of being arbitrary, overbroad, or having effects that are grossly disproportionate to the legislative goal. To deprive citizens of life, liberty, or security of the person by laws that violate these norms is not in accordance with the principles of fundamental justice.

[161] The Supreme Court also emphasized that courts are not to consider competing social interests or public benefits conferred by the impugned law. These competing moral claims and broad societal benefits are more appropriately considered at the stage of justification under s.1 of the *Charter*: *Carter*, at para. 79, citing *Bedford*, at paras. 123 and 125.

[162] The Supreme Court outlined the basic principles of arbitrariness, overbreadth, and gross disproportionality in *Bedford* [emphasis in original]:

> [111] Arbitrariness asks whether there is a direct connection between the purpose of the law and the impugned effect on the individual, in the sense that the effect on the individual bears some relation to the law's purpose. There must be a rational connection between the object of the measure that causes the s. 7 deprivation, and the limits it imposes on life, liberty, or security of the person [citation omitted]. A law that imposes limits on these interests in a way that bears *no connection* to its objective arbitrarily impinges on those interests. […]
>
> [112] Overbreadth deals with a law that is so broad in scope that it includes *some* conduct that bears no relation to its purpose. […] At its core, overbreadth addresses the situation where there is no rational connection between the purposes of the law and *some*, but not all, of its impacts. […]
>
> [120] Gross disproportionality asks a different question from arbitrariness and overbreadth. It targets the second fundamental evil: the law's effects on life, liberty or security of the person are so grossly disproportionate to its purposes that they cannot rationally be supported. The rule against gross disproportionality only applies in extreme cases where the seriousness of the deprivation is totally out of sync with the objective of the measure. […]

[163] The Application has identified that the Target and ss.3(1) and/or 16 of the *Cancellation Act* were arbitrary and grossly disproportionate. Accordingly, for the purposes of the Rule 21 motion,

2020 ONSC 6918 (CanLII)

I will proceed on the basis that the Applicants have properly pleaded breaches of two principles of fundamental justice.

Flexibility of s.7 and the Evidentiary Burden

[164] In *Blencoe*, a decision that first outlined the scope of s.7, the Supreme Court emphasized the flexible nature of this *Charter* section at para. 188:

> We must remember though that s. 7 expresses some of the basic values of the *Charter*. It is certainly true that we must avoid collapsing the contents of the *Charter* and perhaps of Canadian law into a flexible and complex provision like s. 7. But its importance is such for the definition of substantive and procedural guarantees in Canadian law that it would be dangerous to freeze the development of this part of the law. The full impact of s. 7 will remain difficult to foresee and assess for a long while yet. Our Court should be alive to the need to safeguard a degree of flexibility in the interpretation and evolution of s. 7 of the *Charter*. […]

[165] In a climate change context, Rennie J.A., speaking for a unanimous Federal Court of Appeal in *Kreishan v. Canada (Citizenship and Immigration)*, 2019 FCA 223, 438 D.L.R. (4th) 148, stated at para. 139:

> I am cognizant of the fact that section 7 is not frozen in time, nor is its content exhaustively defined, and that it may, some day, evolve to encompass positive obligations – possibly in the domain of social, economic, health or climate rights. [Emphasis added]

[166] With that in mind, at this stage of the proceedings, it is not apparent that the Application cannot succeed. That being said, the Applicants will have a high evidentiary burden at the merit hearing. This still does not suggest that the Applicants cannot succeed.

[167] *Operation Dismantle*, discussed above, was one of the first s.7 cases that the Supreme Court heard, and the court wrestled with the standard to be applied to causation. The court noted that to succeed, the applicant must show that they have some chance of proving that the action of the Canadian government caused a violation or a threat of violation of their rights under the *Charter*: at para. 10. Applied to this case, Ontario submits that the Applicants' burden is to prove that Ontario's target for the reduction of GHG emissions by the year 2030 will cause or contribute to future harms.

[168] Wilson J.'s concurring opinion in *Operation Dismantle* suggests that the Applicant could potentially meet this burden. Wilson J. advocated for a more flexible approach to evidence required to prove causation. Departing from the majority, she held that "matters of opinion" can still be subject to proof through "evidentiary" facts. She then elaborated on different types of "facts" and provided examples where "opinions" can be proven [emphasis added]:

> [78] […] What we are concerned with for purposes of the application of the principle [in *Inuit Tapirisat*] is, it seems to me, "evidentiary" facts. These may be either real or intangible. Real facts are susceptible of proof by direct evidence. Intangible facts, on the other hand, may be proved by inference from real facts or through the testimony of experts.

2020 ONSC 6918 (CanLII)

> Intangible facts are frequently the subject of opinion. The question of the probable cause of a certain result is a good illustration and germane to the issues at hand. […] Indeed, even a finding that an event "would cause" a certain result in the future is a finding of intangible fact. […]
>
> [79] In my view, several of the allegations contained in the statement of claim [in *Operation Dismantle*] are statements of intangible fact. Some of them invite inferences; others anticipate probable consequences. They may be susceptible to proof by inference from real facts or by expert testimony or "through the application of common sense principles": [citation omitted]. We may entertain serious doubts that the plaintiffs will be able to prove them by any of these means. It is not, however, the function of the Court at this stage [motion to strike] to prejudge that question.

[169] More recently, in *Bedford*, the Supreme Court also held that a more flexible standard of causation, the "sufficient causal connection" standard, should prevail. As the court noted:

> [75] I conclude that the "sufficient causal connection" standard should prevail. This is a flexible standard, which allows the circumstances of each particular case to be taken into account. Adopted in *Blencoe* [citation omitted], and applied in a number of subsequent cases […], it posits the need for "a sufficient causal connection between the state-caused [effect] and the prejudice suffered by the [claimant]" for s. 7 to be engaged (*Blencoe*, at para. 60 (emphasis added)).
>
> [76] A sufficient causal connection standard does not require that the impugned government action or law be the only or the dominant cause of the prejudice suffered by the claimant, and is satisfied by a reasonable inference, drawn on a balance of probabilities ([citation omitted]). A sufficient causal connection is sensitive to the context of the particular case and insists on a real, as opposed to a speculative, link. […]

[170] In addition to affirming a flexible standard, *Bedford* also encouraged the use of expert witnesses to present social science evidence, which is included in the Application. Part of the Applicants' case depends on social and legislative facts, in addition to facts that are based on science. Social and legislative facts are facts about society at large, established by complex social science evidence: *Bedford*, at para. 48. The *Bedford* court noted that the use of social science evidence in *Charter* litigation has evolved significantly, and the Supreme Court has expressed a preference for social science evidence to be presented through an expert witness: at para. 53.

[171] As I have indicated above, this Application is capable of scientific proof and the Applicants have already included many facts based on scientific and social science findings. Pursuant to *Bedford*, the assessment of expert evidence relies heavily on the trial judge: at para. 53. The Applicants should therefore be afforded the opportunity to present their complete evidence in front of the application judge, especially in light of the flexible standard used to establish causation in a s.7 claim.

2020 ONSC 6918 (CanLII)

b. Section 15: Equality

The Claim as Pleaded

[172] The Applicants submit that the Target violates s.15 of the *Charter* because Ontario's youth and future generations:

- are a uniquely vulnerable population by virtue of their age and, for some, their inability to influence political decisions at the ballot box;
- will be disproportionately impacted by the devastating impacts of climate change, which will significantly increase in severity and intensity as the years progress;
- are among those who will suffer the most from the climate change impacts, including, but not limited to, extreme heat events, warming temperatures and heat waves, infectious diseases, fires, flooding, algal blooms, toxic contamination, and mental health challenges; and
- will have their pre-existing vulnerability and disadvantage heightened as a result of the impacts stated above.

[173] Ontario submits that the essence of the Applicants' discrimination claim is that Ontario residents of the future will suffer more harm than those of the present or of the past. Ontario submits that even if this could be proven, it is a temporal distinction, not one based upon enumerated or analogous grounds in the *Charter*.

[174] In response, the Applicants submit that they are particularly vulnerable because of the cumulative and compounding impacts of climate change that will play out over years and therefore impact them longer and more acutely. In addition, the Applicants submit that the specific physiological and psychological characteristics of young people would make them particularly susceptible to the negative health impacts of climate change.

Section 15 Jurisprudence and Analysis

[175] Section 15 (1) of the *Charter* provides:

> Every individual is equal before and under the law and has the right to the equal protection and equal benefit of the law without discrimination and, in particular, without discrimination based on race, national or ethnic origin, colour, religion, sex, age or mental or physical disability.

[176] In *Kahkewistahaw First Nation v. Taypotat,* 2015 SCC 30, [2015] 2 S.C.R. 548, at paras. 19-20, the Supreme Court identified two steps to the equality analysis under s.15(1):

> a) does the impugned law, on its face or in its impact, create a distinction based on enumerated or analogous grounds; and

2020 ONSC 6918 (CanLII)

> b) if so, does the law fail to respond to the actual capacities and needs of the members of the group and instead impose burdens or deny a benefit in a manner that has the effect of reinforcing, perpetuating, or exacerbating disadvantage?

[177] Section 15 claims are typically fact-driven and highly contextual. The Supreme Court has noted that these claims are inherently comparative, in that claimants have to establish distinctive treatment (or effect) based on a prohibited ground: *Withler v. Canada (Attorney General)*, 2011 SCC 12, [2011] 1 S.C.R. 396, at para. 62.

[178] The Applicants' s. 15 claim highlights the vulnerability of the Applicants by virtue of their age: some of them do not have the right to vote; most, if not all, of them will be proportionately affected by impacts of climate change and will suffer the most of all generations; but more importantly, these impacts will exacerbate their pre-existing vulnerability and disability.

[179] On the first stage of the test, the Applicants clearly identify an alleged distinction based on an enumerated ground, age. The second stage of the test, which generally answers the question of whether the distinction is discriminatory, is less straightforward.

[180] The Applicants' claim is essentially one of "adverse effects" or "adverse impact" discrimination, *i.e.*, indirect discrimination. In such cases, it is alleged that a particular law or rule, while neutral on its face, has a disproportionate adverse impact on a group characterized by a prohibited (enumerated or analogous) ground of discrimination: *Eldridge v. British Columbia (Attorney General)*, [1997] 3 S.C.R. 624, at paras. 60-63.

[181] The Supreme Court has noted the difficulty of identifying indirect discrimination:

> In some cases, identifying the distinction will be relatively straightforward, because a law will, on its face, make a distinction on the basis of an enumerated or analogous ground (direct discrimination). […] In other cases, establishing the distinction will be more difficult, because what is alleged is indirect discrimination: that although the law purports to treat everyone the same, it has a disproportionately negative impact on a group or individual that can be identified by factors relating to enumerated or analogous grounds. […] In that kind of case, the claimant will have more work to do at the first step. Historical or sociological disadvantage may assist in demonstrating that the law imposes a burden or denies a benefit to the claimant that is not imposed on or denied to others. The focus will be on the effect of the law and the situation of the claimant group: *Withler*, at para. 64.

[182] The Supreme Court has also long noted the importance of substantive equity when considering whether there has been discrimination. Indeed, formal equality has been squarely rejected by the Supreme Court of Canada in favour of a substantive equality analysis: see *Québec (Attorney General) v. Alliance du personnel professionnel et technique de la santé et des services sociaux,* 2018 SCC 17, [2018] 1 S.C.R. 464 ("***Alliance***"); *Québec v. A*, 2013 SCC 5, [2013] 1 S.C.R. 61; *Centrale des syndicats du Québec v. Québec (Attorney General)*, 2018 SCC 18, [2018] 1 S.C.R. 522, *Withler*; *Taypotat*.

[183] In *Andrews v. Law Society of British Columbia,* [1989] 1 S.C.R. 143, McIntyre J. anticipated the dangers of formal equality, in which likes are treated alike, at p. 165:

2020 ONSC 6918 (CanLII)

> In simple terms, then, it may be said that a law which treats all identically and which provides equality of treatment between "A" and "B" might well cause inequality for "C", depending on differences in personal characteristics and situations. To approach the ideal of full equality before and under the law […,] the main consideration must be the impact of the law on the individual or the group concerned. Recognizing that there will always be an infinite variety of personal characteristics, capacities, entitlements and merits among those subject to a law, there must be accorded, as nearly as may be possible, an equality of benefit and protection and no more of the restrictions, penalties or burdens imposed upon one than another. In other words, the admittedly unattainable ideal should be that a law expressed to bind all should not because of irrelevant personal differences have a more burdensome or less beneficial impact on one than another. [emphasis added]

[184] More recently, in *Alliance*, Abella J. noted: "when the government passes legislation in a way that perpetuates historic disadvantage for protected groups, regardless of who caused their disadvantage, the legislation is subject to review for s. 15 compliance": at para. 41.

[185] Pre-existing disadvantage plays an important role in the substantive equality analysis. Indeed, while the equality analysis is inherently comparative, *disadvantage* rather than *distinction* lies at its heart: *Single Mothers' Alliance of BC Society v. British Columbia*, 2019 BCSC 1427, at para. 129. As articulated by Abella J. in *Québec v. A*, at para. 332:

> The root of s. 15 is our awareness that certain groups have been historically discriminated against, and that the perpetuation of such discrimination should be curtailed. If the state conduct widens the gap between the historically disadvantaged group and the rest of society rather than narrowing it, then it is discriminatory.

[186] Whether the Applicants are able to meet the second stage of the s.15 test outlined above remains to be seen. However, I am unable to say, at this stage, that the Applicants' claim under s.15 of the *Charter* has no prospect of success.

[187] First, it is acknowledged that evidentiary challenges for claimants may be more apparent in claims of "adverse effect" or "adverse impact" discrimination. To date, few decisions of the Supreme Court have dealt with adverse effect discrimination, perhaps because of the significant practical difficulties involved in adducing sufficient evidence to demonstrate adverse impacts on particular groups: see *Symes v. Canada*, [1993] 4 S.C.R. 695. However, where adverse impact claims have succeeded under the *Charter*, they have been based on self-evident societal patterns amenable to judicial notice, such as the disadvantage faced by deaf persons seeking to access medical services without the aid of sign language interpretation: see *Eldridge*, cited above. The adverse effects of climate change on younger generations – who presumably would have more years to live than current generations – may be considered self-evident, especially if the Applicants are able to present evidence of historical or sociological disadvantage that the Applicants have experienced as a result of their age.

[188] Second, it is not apparent that the Applicants cannot prove that Ontario's conduct widens the gap between the disadvantaged group (the Applicants, youth and future generations) and the rest of society (adults and current generations) rather than narrowing it, pursuant to Abella J.'s

2020 ONSC 6918 (CanLII)

comments in *Québec v. A*, cited above, particularly in light of the courts' shift to substantive, rather than formal, equality analysis.

[189] A liberal reading of the Applicants' Notice of Application suggests that they intend to prove, with admissible evidence, that Ontario's actions will have a disproportionate impact on youth and future generations by putting them at an increased risk of various health problems due to their age, an enumerated ground. Just as in the case of the Applicants' s.7 claim, the novelty of the s.15 claim will not prevent the claims from proceeding unless it can be established that the claim is unsustainable, which is not the case here.

D. Does the Application depend on a positive obligation on the Province?

[190] Ontario argues that even if the claim were justiciable and if it were possible to prove future harms, the Application must fail because it is premised on a legal theory that Ontario is constitutionally obliged to take positive steps to redress the future harms of climate change – *i.e.*, the Application is premised on a "positive obligation" on the state. They submit that the province has no constitutional obligation to take positive steps.

The Law

[191] In a labour rights case, *Dunmore v. Ontario (Attorney General)*, 2001 SCC 94, [2001] 3 S.C.R. 1016, the Supreme Court considered the nature of positive and negative obligations in the context of s.2(d) of the *Charter* (freedom of association). The court noted that "positive obligations may be required 'where the absence of government intervention may in effect substantially impede the enjoyment of fundamental freedoms'": at para. 25. "Negative obligations" are generally understood to mean "that Parliament and the provincial legislatures need only refrain from interfering (either in purpose or effect) with protected associational activity [that guarantees fundamental freedoms]": at para. 19.

[192] One year later, in *Gosselin v. Québec (Attorney General)*, 2002 SCC 84, [2002] 4 S.C.R. 429, the Supreme Court left the door open for positive obligations on the state in the context of s.7. *Gosselin* centered around a claim under s.7 for a right to an adequate level of social assistance in Québec, as the province excluded citizens under age 30 from receiving full social security benefits. While the majority rejected the *Charter* challenge, McLachlin C.J. noted the following regarding positive obligations [emphasis added]:

> [82] <u>One day s. 7 may be interpreted to include positive obligations.</u> To evoke Lord Sankey's celebrated phrase in *Edwards v. Attorney-General for Canada* [citation omitted], the *Canadian Charter* must be viewed as "a living tree capable of growth and expansion within its natural limits": [citation omitted]. <u>It would be a mistake to regard s. 7 as frozen</u>, or its content as having been exhaustively defined in previous cases. In this connection, LeBel J.'s words in *Blencoe* [citation omitted] are apposite:
>
> > We must remember though that s. 7 expresses some of the basic values of the *Charter*. It is certainly true that we must avoid collapsing the contents of the *Charter* and perhaps of Canadian law into a flexible and complex provision like s. 7. But its importance is such for the definition of substantive and procedural

2020 ONSC 6918 (CanLII)

> guarantees in Canadian law that it would be dangerous to freeze the development of this part of the law. The full impact of s. 7 will remain difficult to foresee and assess for a long while yet. Our Court should be alive to the need to safeguard a degree of flexibility in the interpretation and evolution of s. 7 of the *Charter*.
>
> The question therefore is not whether s. 7 has ever been — or will ever be — recognized as creating positive rights. Rather, the question is whether the present circumstances warrant a novel application of s. 7 as the basis for a positive state obligation to guarantee adequate living standards.
>
> [83] I conclude that they do not. With due respect for the views of my colleague Arbour J. [dissenting], I do not believe that there is sufficient evidence in this case to support the proposed interpretation of s. 7. I leave open the possibility that a positive obligation to sustain life, liberty, or security of the person may be made out in special circumstances. However, this is not such a case. The impugned program contained compensatory "workfare" provisions and the evidence of actual hardship is wanting. The frail platform provided by the facts of this case cannot support the weight of a positive state obligation of citizen support.

[193] In the context of s.15, the Supreme Court found a "duty to take positive action" as early as 1997. In *Eldridge*, cited above, the Supreme Court found that the failure to provide services to deaf clients at a hospital was an omission that violated the claimant's *Charter* rights and ordered the provision of that service: at para. 80. The Court of Appeal for Ontario, in *Ferrel v. Ontario (Attorney General of)* 1998, 42 O.R. (3d) 97 (C.A.), a case Ontario cites, noted that *Eldridge* stands for the proposition that "the Supreme Court of Canada has left open the possibility, in some cases, that s. 15(1) may oblige the state to take positive actions to ameliorate the symptoms of systemic or general inequality": at para. 43.

Position of the Parties

[194] The Applicants submit that this is not a case of positive obligation, as "typical" positive rights cases seek relief that requires the government to take on spending or other obligations to improve a certain social welfare problem they did not create (*e.g.*, the homelessness problem in *Tanudjaja*). On the other hand, in this Application, the government is acting to cause the harm in question. By lowering the target for Ontario, the government is essentially authorizing, incentivizing, and itself creating the very GHGs that are the cause of the alleged *Charter* violations in the Application. The Applicants emphasize that none of the relief sought addresses specifically how the government should go about achieving the appropriate level of emissions reductions, meaning there is "very little in the way of positive obligations in the classic sense".

[195] Alternatively, the Applicants submit that even if this were a positive obligation case, it is a case that involves a "special circumstance", pursuant to *Gosselin*. They submit that as multiple appellate courts have already recognized, climate change is an existential threat. In this fundamental way, the issues and relief sought in this Application engage the very precondition to the enjoyment of all fundamental freedoms, making it unlike any of the cases Ontario cites. With

2020 ONSC 6918 (CanLII)

climate change, the stakes could not be higher, and action is required at the governmental level in order to avoid its catastrophic impacts.

[196] In response, Ontario submits that no matter what the Applicants call it, what they really seek in this case is "a Plan and a Target that has a different number". Essentially, Ontario argues, the Applicants want the government to take a positive step to put in a different number for the Target and then meet that number. In other words, the Application entails "a duty to take steps to combat the adverse effects of climate change in the future by doing something today", no matter how the Applicants phrase it.

[197] Ontario largely relies on five cases to argue that (a) the *Charter* does not impose positive obligation on the state to take steps to address harms or to prevent future harms, and (b) Ontario does not have a constitutional obligation to do so in the first place. I will summarize these cases and outline the parties' positions on them: (1) *Ferrel*, cited above; (2) *Flora v. Ontario Health Insurance Plan*, 2008 ONCA 538, 91 O.R. (3d) 412; (3) *Tanudjaja (SCJ)*, cited above; (4) *Barbra Schlifer*, 2014 ONSC 5140, 121 O.R. (3d) 733; and lastly, (5) *ETFO et al. v. Her Majesty the Queen*, 2019 ONSC 1308, 144 O.R. (3d) 347. These cases discuss either s.7 or s.15, but Ontario argues that for the sake of this argument, the principles apply equally.

1. *Ferrel v. Ontario* (1998)

[198] *Ferrel* is a s.15 case that challenged the Ontario legislature's repeal of an act that comprised various employment equity provisions. The repealed Act imposed an obligation on employers to work toward the goal of a workplace that reflected the various groups that make up Ontario society: at para. 7. The Court of Appeal for Ontario rejected the challenge as it found that there was no constitutional obligation to enact the repealed Act in the first place, and s.15 does not impose the obligation on the state to do so.

[199] Ontario cites *Ferrel* for two propositions. First, in cases where there is no obligation to enact an act in the first place, the legislature, as the Court of Appeal wrote, is "free to return the state of the statute book to what it was before the [repealed Act], without being obligated to justify the repealing statute under s.1 of the *Charter*": at para. 36. Second, Ontario relies on the Court of Appeal's comments on the dangers of imposing a positive obligation on the state:

> [48] Finally, if it is thought that s. 15(1) imposes an obligation to enact employment equity legislation, what is the nature and scope of the obligation? A court is not competent to answer this question in a satisfactory way. It is a question that is not justiciable. Legislatures require substantial freedom in designing the substantive content, procedural mechanisms, and enforcement remedies in legislation of this kind. They are the appropriate branch of government to make these decisions, not courts working from the general terms of s. 15(1).
>
> [49] In this vein, what would be the constitutional minimum content of employment equity legislation? […] Considerations of this nature are further indications that it would not be sensible to interpret s. 15(1) as imposing an obligation to enact laws the constitutional adequacy of which would be subject to judicial review under the *Charter*.

2020 ONSC 6918 (CanLII)

[200] The Applicants submit that *Ferrel* does not apply to the case at bar because the issue was about systemic discrimination in the employment context, which is not conduct that Ontario authorized or created. That makes it different than this case, where Ontario is actively authorizing and creating the very emissions that are causing harm.

2. *Flora v. OHIP* (2008)

[201] *Flora* centered on whether s.7 imposes an obligation on the government to fund life-saving surgery. In that case, Mr. Flora challenged a regulation that prevented him from recovering from the Ontario Health Insurance Plan ("**OHIP**") his half-million-dollar expenditure on a procedure that saved his life. The procedure had to be performed at a privately-funded hospital in the United Kingdom because it was not approved in Ontario and was therefore not an "insured service" for the purposes of reimbursement.

[202] Mr. Flora submits that his rights under s.7 were deprived because Ontario repealed an older law that would have paid for his treatment. The court relied on *Ferrel*, discussed above, and held that a *Charter* violation cannot be grounded on a mere change in law: *Flora*, at para. 104.

[203] Mr. Flora, relying on *Chaoulli*, cited and discussed above, argued that s. 7 imposes positive obligations on the state to fund the surgery. The Court of Appeal distinguished *Chaoulli*, stating that it was not a positive obligation case, as the claimants there did not seek an order requiring the government to fund their private health care or to spend more money on health care: *Flora*, at para. 107.

[204] The Court of Appeal, citing *Chaoulli*, held that because the *Charter* does not confer a freestanding constitutional right to health care, the Ontario government, in the case of OHIP, has "elect[ed] to provide a financial benefit that is not otherwise required by law": at para. 108. The court therefore concluded, at para. 108:

> On the law at present, the reach of s. 7 does not extend to the imposition of a positive constitutional obligation on the Ontario government to fund out-of-country medical treatments even where the treatment in question proves to be life-saving in nature.

[205] Ontario cites *Flora* for the proposition that if there was no requirement to enact a protective measure in the first place, there cannot be a constitutional requirement not to repeal it.

[206] The Applicants, citing *Chaoulli*, submit that even if the *Charter* does not confer a freestanding constitutional right to a safe environment, Ontario must still ensure that the scheme it put in place to protect against climate change complies with the *Charter*, as it acted to do in the first place: see *Chaoulli*, at para. 104.

[207] They also submit that *Flora* does not apply to the case at bar because the underlying issue in *Flora* was about Ontario residents with diseases or disabilities that required medical treatment, which the Province was, once again, not responsible for.

2020 ONSC 6918 (CanLII)

3. *Tanudjaja v. Ontario* (SCJ) (2013)

[208] On the issue of positive obligation, Ontario cited this Court's decision in *Tanudjaja*, as the Court of Appeal's decision did not address this issue after finding the application not justiciable.

[209] Early in the reasons, the Court found that "[t]here cannot be a breach of the *Charter* that is based on the assertion of a positive obligation on the state to provide for life, liberty and the security of the person and there is no general obligation that all people will be treated equally": at para. 26.

[210] The applicants in *Tanudjaja (SCJ)* argued that they should have the chance to present a full evidentiary record to demonstrate that their case could be a "special circumstance" as outlined in *Gosselin.* That position was rejected, the Court stating:

> [56] It proposes that every time an application raises the prospect of a positive requirement being imposed on government in order to enforce compliance with s. 7 of the *Charter*, it will have to be the subject of a full hearing. The facts, as asserted, are to be taken as proved and, as a result of the decision in *Gosselin*, it will never be plain and obvious that the case cannot succeed. This is said to be so even in the face of the many cases that, in the years since *Gosselin* was decided, considered but have not recognized a positive obligation on the state to act to protect rights under s. 7.
>
> […]
>
> [58] […] As of this moment, there is no positive obligation placed on Canada or Ontario, arising out of an allegation of a breach of s. 7 of the *Charter*, having been found to apply in circumstances such as this. To the contrary, *Clark* and *Masse* [two cases similar to the one before Lederer J.] demonstrate the opposite. It may be that values, attitudes and perspectives will change, but this evolution is not sufficient to trigger reconsideration in the lower courts [….]

[211] Citing the paragraph above, Ontario submits that the test on a motion to strike cannot be premised on the fact that one day the law may change, as that would mean that all claims can survive a motion to strike.

[212] I note, as an aside, that the comments on positive obligation, set forth at para. 210 above, were heavily criticized by Feldman J.A. in her dissent at the Court of Appeal, an issue the majority did not address. Feldman J.A. observed that the Court in *Tanudjaja* "erred in stating that the s.7 jurisprudence on whether positive obligations can be imposed on governments to address homelessness is settled": at para. 52. Feldman J.A. further stated, at para. 56:

> While recognizing that the majority in *Gosselin* did not foreclose the possibility that, in "special circumstances" in a future case, a court could find that s. 7 imposes positive obligations on government, the motion judge nevertheless concluded the opposite.

[213] As with other cases, the Applicants submit that the underlying issue in *Tanudjaja*, homelessness, was not a problem or predicament that Ontario authorized or created.

2020 ONSC 6918 (CanLII)

4. *Barbra Schlifer Commemorative Clinic v. Canada* (2014)

[214] In *Barbra Schlifer*, the applicant, a specialized clinic for women who experience violence, challenged amendments to the *Firearms Act, 1995*, S.C. 1995, c. 39, which repealed the long-gun registry system that required the registration of non-restricted firearms. The applicants submit that the registry system protected against the risk of harm, and repealing the registry was contrary to ss.7 and 15.

[215] In that case, Morgan J. first stated that for a s.7 challenge to succeed, there must be *some* state-imposed burden or state-implemented deprivation of rights: at para. 22 [emphasis in original]. In other words, there must be some sort of state intervention.

[216] Applying *Barbra Schlifer*, Ontario argues that the only "state intervention" that is challenged here is the Target, and questions whether the Target itself creates risk and whether it is considered "state intervention". Ontario submits that if it is not state intervention, then the risk does not fall within the government's constitutional responsibilities.

[217] Morgan J. continued, stating that the *Charter* does not impose a positive obligation on the government to enact particular protective measures against the risk of firearm use or to maintain them once enacted. Ontario relies on this as another example of this Court finding that a positive example did not exist.

[218] The Applicants submit that there are at least two ways this Application is different from the one in *Barbra Schlifer*. First, they maintain that the only constitutional focus in *Barbra Schlifer* was a repeal, whereas here, Ontario put in place a legislative scheme with a target that allows for a dangerously high level of emissions. Second, Morgan J. found the connection between the state conduct and the non-state conduct (*i.e.*, violence perpetrated by persons with firearms) to be remote: see para. 31. The Applicants point out that, once again, in *Barbra Schlifer*, the government did not authorize the conduct that caused harm, but here, Ontario established a target that essentially allows GHG emitters to continue to emit GHGs into the atmosphere, thereby causing harm.

[219] The Applicants also point out that *Barbra Schlifer* did survive a motion to strike: see *Barbra Schlifer Commemorative Clinic v. HMQ Canada*, 2012 ONSC 5271.

5. *ETFO v. Ontario* (2019)

[220] Ontario cites *ETFO* as a more recent case that affirms *Flora* and *Ferrel* and one that largely supports their position. In *ETFO*, the Elementary Teachers' Federation of Ontario brought an application for judicial review at the Divisional Court to challenge Ontario's 2018 decision to issue a directive requiring Ontario's teachers to teach the sex education curriculum in place from 2010 to 2015 ("2010 curriculum"), instead of the new curriculum in place between 2015 and 2018 ("2015 curriculum"). The 2010 curriculum does not include topics that were in the 2015 curriculum, such as consent, specific names for body parts, gender identify and sexual orientation, online behaviour and cyberbullying, and sexually transmitted infections. The applicants submit that the directive infringes the *Charter* rights of teachers (s.2(b), right to freedom of expression), students (ss.7 and 15(1)), and parents (ss.7 and 15(1)).

2020 ONSC 6918 (CanLII)

[221] The court found that a *Charter* challenge cannot be made out in *ETFO*. On the s.7 issue, the court noted: "a change in the law or government policy alone does not constitute deprivation of a right even if the previous law provided greater life, liberty or security of the person": at para. 139, citing *Flora* and *Barbra Schlifer.* On s.15, the court wrote, at para. 152:

> A section 15(1) *Charter* challenge cannot be based on the removal or omission of learning objectives referable to the 2015 Curriculum. As we have noted previously, that curriculum does not enjoy *Charter* protection: [citation omitted]. A *Charter* infringement cannot be grounded on a mere change in the law nor on a change of curriculum, even a change that no longer provides a benefit from the earlier curriculum.

[222] The court then cited, with approval, Ontario's summary of cases on this point, at para. 153:

> In a long line of *Charter* s. 15 cases, Ontario courts have held that "in the absence of a constitutional right that requires the government to act in the first place, there can be no constitutional right to the continuation of measures voluntarily taken, even where those measures accord with or enhance *Charter* values." These *Charter* s. 15 cases include *Ferrel* (repeal of employment equity statute), *Lalonde* (closing a Francophone hospital), *Barbra Schlifer* (repeal of long-gun registry), *Tanudjaja* (reduction in housing programs), and *Irshad* (restricting OHIP eligibility). In every case, persons who benefitted from the previous law or policy alleged that its removal or replacement had a discriminatory effect. In every case, the Court rejected this argument.

[223] The Applicants do not dispute that the legislature is entitled to change its approach, but emphasizes that its actions must still be constitutionally compliant: *Alliance*, cited above, at para. 36. They submit that in this case, constitutional compliance requires Ontario to reduce its share of GHG emissions to protect its citizens based on internationally accepted science on the impacts of climate change, rather than imposing an inadequate and dangerous Target.

Analysis and Conclusion

[224] As the Applicants submit, the thrust of Ontario's submissions is that if there is no constitutional basis for the government to act in the first place, then repeal of legislation cannot, in and of itself, be unconstitutional.

[225] Ontario's line of reasoning assumes that the province is not constitutionally obliged to take positive steps to redress the future harms of climate change. However, that assumption is not clear at this stage of the proceedings. Cases such as *Gosselin* and *Eldridge*, discussed above, suggest that under very specific circumstances, a positive constitutional duty can be found. Also, the Applicants are seeking relief not only for the repeal of the *Climate Change Act* but also for the setting of the new Target by Ontario.

[226] The Applicants submit that if Ontario chose to put in a scheme to protect against climate change, it must do so in a way that complies with the *Charter*. It is of note that in *La Rose*, on this point, the court noted: "[…] when policy choices are translated into law or state action, that resulting law or state action must not infringe the constitutional rights of the Plaintiffs": at para. 45. In other words, once Ontario chose to translate policy choices into law and state action, which

2020 ONSC 6918 (CanLII)

I have found to be the case here, Ontario has a responsibility to ensure that the same law and state action do not infringe the constitutional rights of Ontario residents.

[227] I note further that cases cited by Ontario were addressed on their merits, after the court had carefully considered the factual context and the full merits of the novel legal propositions put forward by the various applicants. A motion to strike is not the appropriate forum to make judicial findings on the complex issue of positive obligations. The Applicants should therefore be given the chance to make full submissions at a merits hearing.

[228] Additionally, the cases cited by Ontario are all judicial statements in contexts very different from the case before this Court. It is not clear that a case for positive obligation cannot be made out in the climate change context, and it is especially unclear if this Application could be a "special circumstance" described in *Gosselin* without the benefit of a full record.

[229] In fact, "special circumstance" has been considered in a climate change context in *La Rose*, where the court emphasized that it would be a mistake to regard s.7 as frozen. The court noted that the plaintiffs in that action "have pleaded facts that may support the existence of 'special circumstances'" and rejected Canada's argument that the plaintiffs' claim discloses no reasonable cause of action on the basis of a positive obligation alone: at para. 72.

[230] Indeed, in *Tanudjaja (SCJ)*, Lederer J. specifically stated that the application did not meet the "special circumstance" test in *Gosselin* because a right to housing had already been argued before the courts in previous cases: at para. 54.

[231] Similarly, in *Ferrel*, a case that pre-dates *Gosselin*, the court, after reviewing various cases, noted that "the judicial statements clearly preponderate against concluding that s.15(1) imposes a positive obligation on legislatures to enact employment equity legislation": at para. 66 [emphasis added].

[232] *Flora*, as the Court of Appeal stated, is a case involving solely economic rights: at para. 106.

[233] To date, no *Charter* cases have arisen in the context of a positive constitutional obligation on the state to provide a stable climate system. However, as Rennie J.A. noted in *Kreishan*, cited above, s.7 jurisprudence may someday evolve to encompass positive obligations in the domain of climate rights.

[234] Indeed, as Feldman J.A. (dissenting) concluded in *Tanudjaja*, the question of whether "special circumstances" exist should not be determined on a motion to strike based on the pleadings alone, an issue the majority did not address:

> Whether a party characterizes the circumstances as "special" is not determinative. What matters is whether the court considers them sufficiently special. That can be determined only after a consideration of the full record, as well as the response from the governments. For example, in *Gosselin* […], the court stated that there was not enough evidence to support the proposed interpretation of s. 7: at para. 65.

2020 ONSC 6918 (CanLII)

[235] Additionally, the *La Rose* court, after finding that the plaintiffs might have been able to support the existence of "special circumstances", observed further:

> [65] […] I will offer some comments in regards to the Defendants' [Canada's] argument in relation to the positive rights framing of the section 7 *Charter* claim. I do not find this argument sufficient to find that the claim discloses no reasonable cause of action for the reasons below.
>
> [66] The Defendants assert that the Plaintiffs' section 7 *Charter* claim discloses no reasonable cause of action because the claim is seeking recognition of positive rights to the climate change policies preferred by the Plaintiffs. Section 7 of the *Charter* does not instill positive obligations, rather it is premised on the finding of a deprivation resulting from law or state action. The Defendants further indicate that the Plaintiffs' claim is not consistent with an incremental step in the evolution of section 7 *Charter* interpretation and that there is allegedly a lack of special circumstances in this case that would allow for a positive rights framing.
>
> [67] I am not prepared to find that the Plaintiffs would be unable to argue a negative rights claim or that they are otherwise barred from arguing a positive rights claim at this stage in the proceedings. Therefore, this argument has not been accepted as an additional basis for striking the section 7 *Charter* claim.

[236] I am satisfied that the issue of positive obligation should be decided on a full evidentiary record, and not at the Rule 21 stage.

[237] I am therefore not able to find, at this juncture, that the Application has no reasonable prospect of success.

E. Do the Applicants have standing on behalf of future generations?

[238] The Applicants consist of seven youths who are between the ages of 12 and 24 and reside in Ontario. They brought the Application to seek relief on behalf of their generation and of future generations of Ontarians.

[239] The Applicants were – and are – all involved with various climate change initiatives and activism:

- Sophia Mathur, who is 12 years old and lives in Sudbury, was the first youth outside of Europe to strike from school in solidarity with a global movement (started by Swedish youth activist Greta Thunberg) and has played an active role within the "Fridays for Future" movement in Ontario;
    - Zoe Keary-Matzner, who is 13 years old and lives in Toronto, has also been actively involved with the "Fridays for Future" movement in Ontario and has spoken at many climate change-related rallies, press conferences, and other events within Ontario;

2020 ONSC 6918 (CanLII)

- Shaelyn Hoffman-Menard, who is 22 years old and lives in Peterborough, has worked on issues of climate change, biodiversity, Indigenous-led conservation, youth and community engagement on environmental issues, and cultural and language revitalization initiatives;
- Shelby Gagnon, who is 23 years old and lives in Thunder Bay, has worked on Indigenous food sovereignty in northern Ontario communities and has taken local action to help her own community become more sustainable in response to climate change;
- Alexandra Neufeldt, who is 23 years old and lives in Ottawa, has been actively involved with Citizens Climate Lobby Canada through lobbying elected officials and doing public outreach to promote effective climate action;
- Madison Dyck, who is 23 years old and lives in Thunder Bay, has sailed through Lake Superior giving presentations on climate change impacts in surrounding communities and to youth; and
- Lindsay Gray, who is 24 years old, two-spirit, and lives in the Township of Tiny, is a community organizer focused on environmental, climate and Indigenous issues, including in their home community of Aamjiwnaang First Nation.

The Law

[240] On a preliminary motion to strike for lack of standing, the court should be prepared to terminate the application only in "very clear cases": *Sierra Club of Canada v. Canada (Minister of Finance)*, [1999] 2 F.C. 211, at para. 25. The court added:

> At this stage of the proceeding [a motion to strike], the Court may not have all the relevant facts before it, or the benefit of full legal argument on the statutory framework within which the administrative action in question was taken. To the extent that the strength of the applicant's case, and other factors, are relevant to the ground of discretionary standing, the Court may not be in a position to make a fully informed decision that would justify a denial of standing: at para. 25.

While *Sierra Club* was a judicial review decision, these principles have been adopted by Ducharme J. of this Court on a Rule 21 ruling: see *Fraser v. Canada* (Attorney General), [2005] O.J. No. 5580 (S.C.).

[241] The three-part test for granting discretionary standing in a public law case is outlined in *Canada (Attorney General) v. Downtown Eastside Sex Workers United Against Violence Society*, 2012 SCC 45, [2012] 2 S.C.R. 524: (1) whether the case raises a serious justiciable issue, (2) whether the party bringing the action has a real stake or a genuine interest in its outcome, and (3) whether, having regard to a number of factors, the proposed suit is a reasonable and effective means to bring the case to court: at para. 2. Courts are to exercise this discretion to grant or refuse standing in a "liberal and generous manner": at paras. 2 and 35.

[242] To constitute a "serious issue", the question raised must be a "substantial constitutional issue" or an "important one". The claim must be "far from frivolous", although courts should not

2020 ONSC 6918 (CanLII)

examine the merits of the case in more than a preliminary manner. In *Downtown Eastside*, the Supreme Court noted, at para. 42:

> Once it becomes clear that the statement of claim reveals at least one serious issue, it will usually not be necessary to minutely examine every pleaded claim for the purpose of the standing question.

[243] The third consideration, whether the proposed suit is a reasonable and effective means to bring the case to court, has often been expressed as a strict requirement. The court in *Downtown Eastside*, however, established a "flexible, discretionary and purposive approach to public interest standing", not applying this factor in a rigid manner: at paras. 44, 47. The court outlined some factors to be considered in granting or refusing standing, at para. 51:

- The plaintiff's capacity to bring forward a claim: the plaintiff's resources, expertise, and whether the issue will be presented in a sufficiently concrete and well-developed factual setting;

- Whether the case is of public interest: does it transcend the interests of those most directly affected by the challenged law or action? Does it provide access to justice for disadvantaged persons in society whose legal rights are affected?;

- Whether there are realistic alternative means that would favour a more efficient and effective use of judicial resources: are there other potential plaintiffs or parallel proceedings? In particular, courts should consider whether the plaintiff brings any particularly useful or distinctive perspective to the resolution of those issues. For example, even where there may be persons with a more direct interest in the issue, the plaintiff may have a distinctive and important interest different from them and this may support granting discretionary standing; and

- The potential impact of the proceedings on the rights of others who are equally or more directly affected: courts should pay special attention where private and public interests may come into conflict. (The court noted that the converse is also true: if those with a more direct and personal stake in the matter have deliberately refrained from suing, this may argue against exercising discretion in favour of standing.)

Position of the Parties

[244] Neither party disputes that the Applicants have public interest standing generally. The issue is whether the Applicants have standing on behalf of future generations.

[245] Ontario submits that the Applicants do not have standing on behalf of "people who do not yet exist." It submits that the category of "future generations" is too unbounded in scope to be amenable to a grant of public interest standing. It submits that granting this standing would take this Court's discretionary power "too far". It also notes that the Applicants did not attempt to explain why they are "better placed than anyone else" to represent the interests of future generations of Ontario residents.

2020 ONSC 6918 (CanLII)

[246] Citing *Downtown Eastside*, Ontario emphasizes that courts have been reluctant to grant public interest standing where "private and public interests may come into conflict." In this case, Ontario submits it would be impossible to determine if one such conflict exists, as the interests and wishes of future generations cannot be known.

[247] The Applicants submit that the issue of standing for future generations is a novel issue that should be determined on a full record. The Applicants note that their claim differs significantly from rights claims on behalf of unborn foetuses in the abortion context (*e.g.*, *Borowski v. Canada (Attorney General)*, [1989] 1 S.C.R. 342). The Applicants argue that they should be granted standing as future generations of Ontarians would not be able to bring the same case against a future Ontario government: the failure to reduce GHG emissions and consequent violations of their rights would already be "locked in" before their lifetime even began.

[248] Applying the test in *Downtown Eastside*, the Applicants submit, first, that this Application raises a serious justiciable issue. Second, the Applicants have demonstrated a serious and genuine interest in the subject matter of this Application. Further, this Application is a reasonable and effective way to bring various issues to the court because: (i) the claim at issue impacts all Ontario youth and future generations; (ii) the Applicants have the support of counsel with the expertise, resources, and commitment to bring this Application forward; and (iii) the Applicants are well-placed to bring this Application and it is unreasonable to expect that other children and young adults (or future generations) will bring a similar application at this point in time.

Analysis and Conclusion

[249] At this stage of the proceedings, it is not conclusive that the Applicants should not be granted standing on behalf of future generations. This Court is not able to review all the evidence or to benefit from full legal arguments on the impact of climate change on future generations. This is therefore not a "clear case" where this Court can find that the Applicants lack standing on behalf of future generations.

[250] At a preliminary level, the Applicants have met the test for standing on behalf of future generations:

- As I have found above, this case raises a serious justiciable issue and a substantial constitutional issue.

- The Applicants have demonstrated that they have a real stake and genuine interest in the Application's outcome, given their age and various examples of activism, as outlined above.

- The proposed suit is a reasonable and effective means to bring this Application to court. I have considered the following factors:

    i. Ecojustice, a Canadian environmental law charity, is counsel for the Applicants, which reflects the plaintiff's resources and expertise in

2020 ONSC 6918 (CanLII)

presenting these issues in a sufficiently concrete and well-developed factual context;

ii. This case is of public interest, in that it transcends the interests of all Ontario residents, not just the Applicants' generation or the ones that follow;

iii. Given their age, the Applicants do bring a useful and distinctive perspective to the resolution of the issues on this Application. There could very well be other persons with different interests in the issues, but the Applicants will provide a unique perspective as young Ontarians; and

iv. Granting the Applicants standing on behalf of future generations does not create a conflict between private and public interests or affect the rights of others who are equally or more directly affected by climate change. The Respondents have not demonstrated that there are parallel proceedings or that other parties with more direct and personal stakes in the matter have deliberately refrained from filing an application. As the Applicants have argued, future generations are unlikely to be able to bring the same suit as the Applicants against current or future Ontario governments, as the state of the world will likely be different. At this preliminary stage, granting the Applicants standing on behalf of future generations does not preclude future generations from bringing other climate change-related claims against the Ontario government at a future time.

[251] I note, additionally, that the Court of Appeal for Ontario has held that no injury needs to have been committed in order to determine standing as long as the claimants can show that a potential injury affected them:

> There is no suggestion that these appellants have suffered any present damage or losses that could be compensable in damages, their expressed purpose being to reduce the risk of a future nuclear incident and to assure compensation if one occurs. They invoke the preventative role of the declaratory judgment as referred to by Wilson J. in *Operation Dismantle*, [citation omitted] quoting from Edwin Borchard, *Declaratory Judgments* [citation omitted]:
>
> > [N]o 'injury' or 'wrong' need have been actually committed or threatened in order to enable the plaintiff to invoke the judicial process; he need merely show that some legal interest or right of his has been placed in jeopardy or grave uncertainty, by denial, by the existence of a potentially injurious instrument, by some unforeseen event or catastrophe the effect of which gives rise to dispute, or by the assertion of a conflicting claim by the defendant.

See *Energy Probe v. Canada (Attorney General)*, cited above, at para. 45.

[252] Ontario submits that the Applicants did not explain why they are "better placed than anyone else" to represent the interests of future generations of Ontario. Ontario did not provide jurisprudence to support that this is required for a determination of standing.

2020 ONSC 6918 (CanLII)

[253] As I have reviewed above in the sections discussing the Applicants' ss.7 and 15 claims, the Applicants have made various claims – which are deemed valid and proven at this point of the proceedings – that their, and future, generations will bear the brunt of various impacts of climate change. Future generations would not be able to bring the same claim against the current government for setting a Target that the Applicants deem inadequate. The Applicants therefore should be given standing for their generation, as well as for future generations.

2020 ONSC 6918 (CanLII)

F. What remedies are potentially available to the Applicants?

[254] In both written and oral submissions, Ontario took issue with two of the Applicants' relief sought. Specifically, it argues that the Applicants' request for orders requiring Ontario to set a "science-based GHG reduction target" in order to ensure a right to a "stable climate system" and a "sustainable future" for future generations are all matters that would take the court "well beyond its institutional capacity."

[255] *Canada (Prime Minister) v. Khadr*, 2010 SCC 3, [2010] 1 S.C.R. 44, cited in Feldman J.A.'s dissent in *Tanudjaja (ONCA)* at para. 85, should alleviate Ontario's concerns on this Application. In *Khadr*, the Supreme Court was required to consider whether a remedy sought was precluded as an option to the courts, as it touched on the Crown's prerogative power with respect to matters of foreign affairs. Mr. Khadr was a Canadian citizen who had been detained by the United States at Guantanamo Bay since he was apprehended as a minor in Afghanistan in 2002. Mr. Khadr turned to the judicial system to request that courts make an order compelling the Canadian government to request his repatriation to Canada.

[256] The Supreme Court concluded that the Canadian government's conduct in connection with Mr. Khadr's case did not conform to the principles of fundamental justice and violated his s.7 rights: *Khadr*, at paras. 24-26. The court ultimately held that it is possible to balance protection of *Charter* rights with Crown prerogative through declarations:

> [44] […] The record before us gives a necessarily incomplete picture of the range of considerations currently faced by the government in assessing Mr. Khadr's request. We do not know what negotiations may have taken place, or will take place, between the U.S. and Canadian governments over the fate of Mr. Khadr. […] It follows that in these circumstances, it would not be appropriate for the Court to give direction as to the diplomatic steps necessary to address the breaches of Mr. Khadr's *Charter* rights.
>
> […]
>
> [46] In this case, the evidentiary uncertainties, the limitations of the Court's institutional competence, and the need to respect the prerogative powers of the executive, lead us to conclude that the proper remedy is declaratory relief. A declaration of unconstitutionality is a discretionary remedy: *Operation Dismantle* [citation omitted]. It has been recognized by this Court as "an effective and flexible remedy for the settlement of real disputes": *R. v. Gamble* [citation omitted]. A court can properly issue a declaratory remedy so long as it has the jurisdiction over the issue at bar, the question before the court is real and not theoretical, and the person raising it has a real interest to raise it. Such is the case here.

[257] The *Khadr* case suggests that it is possible for courts to avoid venturing into questions of public policy – one of Ontario's assertions on this Application – by limiting the available remedy to declarations and by leaving it to the government to determine the best means forward.

[258] Indeed, applying *Khadr* to *Friends of the Earth*, Dean Sossin (as he then was) writes: "in light of *Khadr*, the better approach to have taken in the [...] case would have been to acknowledge the remedial limits on the court and issue declaratory relief": Sossin, at p. 247.

[259] In this case, the final decision as to any relief to be accorded rests with the application judge, but the Application should not be struck simply because the relief sought – or some of it – would take this Court beyond its institutional capacity.

G. Does this Court have jurisdiction to hear the Application?

[260] The final issue to be addressed is where this Application should be heard. Ontario submits that the Application is, at its core, an application for judicial review, as it challenges the lawfulness of the government's actions in preparing the Plan or establishing the Target under the *Cancellation Act*. The Applicants submit that the Application is, in substance, primarily a *Charter* challenge and not an application to review the Province's actions. I have already found that the Target and the Plan were statutorily mandated and reviewable by this Court.

[261] The Application is a *Charter* challenge. (See discussion in *Alford v. The Law Society of Upper Canada,* 2018 ONSC 4269, at para. 41.) First, the Applicants are seeking relief under s.52(1) of the *Constitution Act, 1982* and s.24(1) of the *Charter*, unlike the applicant in *Alford*, a case Ontario relies on. Second, by seeking various constitutional remedies, the Applicants are clearly doing more than "raising *Charter* issues in support of their arguments": *Williams v. Trillium Gift of Life Network*, 2019 ONSC 6159, at para. 35.

[262] I also rely on comments from this Court on this issue. In *Di Cienzo v. Attorney General of Ontario,* 2017 ONSC 1351, 138 O.R. (3d) 41, Belobaba J. held that while applications for declarations pursuant to s.51(1) of the *Constitution Act, 1982* can be heard in the Divisional Court, the Superior Court nonetheless maintains jurisdiction in such matters. In declining to transfer an application challenging a provincial regulation on constitutional grounds to the Divisional Court, Belobaba J. stated, at para. 3:

> In my view, the applicant is not in the "wrong court." The Superior Court of Justice as a court of general jurisdiction has long granted the declaration that is sought herein (that an impugned regulation is inconsistent with the *Charter of Rights* and is thus of no force or effect under s. 52(1) of the *Constitution Act*) and has done so either in an action or by way of a Rule 14.05 application. The fact that the Divisional Court on occasion has done this as well under the *JRPA* [*Judicial Review Procedure Act*] is not contested in this case and, in any event, is a matter that is best addressed by the Divisional Court. But the existence of a possible parallel route by way of judicial review does not nullify the Superior Court's well-established jurisdiction to hear a *Charter*-based constitutional challenge to subordinate legislation by way of a Rule 14.05 application. […]

2020 ONSC 6918 (CanLII)

[263] Another case, cited by Belobaba J., made similar comments regarding s.24(1) remedies:

> Declarations of unconstitutionality on *Charter* grounds, consequent to an application for a remedy under s. 24(1) of the *Charter* are, for the most part, obtained from a court of original jurisdiction — a trial court — by way of action, or […] by way of application […]: *Falkiner v. Ontario Ministry of Community and Social Services* (1996), 140 D.L.R. (4th) 115 (Ont. Div. Ct.), at para. 22.

[264] The Divisional Court is not a court of original or general jurisdiction; it is a statutory court that has "no inherent jurisdiction such as is vested in each individual Judge of the [Superior Court]": *Di Cienzo*, at para. 33, citing *Chramer et al. v. The Queen* (1974), 3 O.R. (2d) 602 (Div. Ct.), and *Marlatt v. Woolley* (2000), 129 O.A.C. 328 (Div. Ct.).

[265] I am satisfied that the Superior Court of Justice, therefore, is the appropriate venue to hear this *Charter*-based constitutional challenge.

DISPOSITION

[266] This is a novel application. At its core, it is about whether the Respondent, Ontario, violated the Applicants' ss.7 and 15 rights by repealing the *Climate Change Act* through the *Cancellation Act* and by setting a target for the reduction of GHG emissions that is insufficiently ambitious. As I have already found, both the preparation of the Plan and the repeal of the *Climate Change Act* by Ontario are governmental actions that are reviewable by the court for compliance with the *Charter.*

[267] For the reasons given above, I find that it is not plain and obvious that the Application discloses no reasonable cause of action or that it has no reasonable prospect of success.

[268] I thereby dismiss the motion of the Respondent, Ontario, seeking to strike out the Application under Rule 21.01(b).

COSTS

[269] I would strongly urge the parties to agree upon costs, failing which I would invite the parties to provide any costs submissions in writing, to be limited to five pages, including the costs outline. The submissions may be forwarded to my attention, through Judges' Administration at 361 University Avenue, within sixty days of the release of these Reasons.

Court of Appeal for Ontario,
Laskin, Goudge and Feldman JJ.A.
May 18, 2001

2001 CanLII 8537 (ON CA)

Courts--Jurisdiction--Provincial superior court having jurisdiction to grant declaratory relief against Prime Minister in respect of his exercise of honours prerogative of Crown --However, jurisdictional issue moot as exercise of honours prerogative is always beyond judicial review.

Crown--Crown prerogative--Granting of honours has not been displaced by statute in Canada and continues to be Crown prerogative--Advice by Prime Minister of Canada to Queen about conferral of honour on Canadian citizen constituting exercise of prerogative power of Crown which is not reviewable by courts.

The appellant, who was at the time a Canadian citizen, was nominated for appointment by the Queen as a peer. The nomination was accepted and recommended by the British Government. The Prime Minister of Canada intervened with the Queen to block the appellant's peerage, citing a contravention of Canadian law. He asserted that he had a right to block the appellant's nomination because of the Nickle Resolution, passed by the Canadian House of Commons in 1919, which requested the King to refrain from conferring titles on any of his Canadian subjects. The appellant's appointment as a peer was suspended or deferred. The appellant brought an action against the Prime

Minister for abuse of power, misfeasance in public office and negligence. He also sued the Government of Canada for negligent misrepresentation. The Prime Minister and the Attorney General of Canada brought a motion to dismiss the claims (except for the claim of negligent misrepresentation against the Government) on two grounds: first, that the claims were not justiciable and therefore disclosed no reasonable cause of action; and, second, that the Superior Court had no jurisdiction to grant declaratory relief against the respondents because that jurisdiction lay exclusively with the Federal Court. The motions judge held that the Superior Court had jurisdiction to entertain the appellant's claims. He dismissed the claims, holding that what was involved was an exercise of the Crown prerogative, non-reviewable in court. The appellant appealed on the issue of justiciability. The respondents cross-appealed on the jurisdiction of the Superior Court to grant declaratory relief.

Held, the appeal and the cross-appeal should be dismissed.

The Crown prerogative is the residue of discretionary or arbitrary authority, which at any given time is left in the hands of the Crown. It can be limited or displaced by statute. Once a statute occupies ground formerly occupied by the prerogative, the prerogative goes into abeyance. The granting of honours has never been displaced by statute in Canada and therefore continues to be a Crown prerogative in Canada.

Whether the Prime Minister exercised a prerogative power was a question of law. The court has the responsibility to determine whether a prerogative power exists and, if so, its scope and whether it has been superseded by statute. The motions judge was entitled to consider the legal character of the appellant's allegations even though the appellant did not expressly plead that the Prime Minister exercised the Crown prerogative.

Crown prerogative powers are not required to be exercised exclusively by the Governor General. As members of the Privy Council, the Prime Minister and other Ministers of the Crown may also exercise the Crown prerogative.

2001 CanLII 8537 (ON CA)

Whether one characterizes the Prime Minister's actions as communicating Canada's policy on honours to the Queen, giving her advice on the appellant's peerage or opposing the appellant's appointment, he was exercising the prerogative power of the Crown relating to honours. The honours prerogative is not limited to conferrals the Government of Canada or the Prime Minister might make. The honours prerogative also includes giving advice on, and even advising against, a foreign country's conferral of an honour on a Canadian citizen.

The controlling consideration in determining whether the exercise of a prerogative power is judicially reviewable is its subject matter. The exercise of the prerogative will be justiciable, or amenable to the judicial process, if its subject matter affects the rights or legitimate expectations of an individual. The exercise of the honours prerogative is always beyond the review of the courts. No important individual interests are at stake. The appellant's rights were not affected. No Canadian citizen has a right to an honour, and no Canadian citizen can have a legitimate expectation of receiving an honour. In Canada, the doctrine of legitimate expectations informs the duty of procedural fairness; it gives no substantive rights. Even if the doctrine of legitimate expectations could give substantive rights, neither the appellant nor any other Canadian citizen can claim a legitimate expectation of receiving an honour. The receipt of an honour lies entirely within the discretion of the conferring body. The disc retion to confer or refuse to confer an honour is the kind of discretion that is not reviewable by the court. In this case, the court has even less reason to intervene because the decision whether to confer a British peerage on the appellant rested not with the Canadian Prime Minister but with the Queen.

Once the Prime Minister's exercise of the honours prerogative was found to be beyond review by the courts, how the Prime Minister exercised the prerogative was also beyond review. Even if the advice was wrong or careless or negligent, even if his motives were questionable, they could not be challenged by judicial review.

2001 CanLII 8537 (ON CA)

Section 18(1) of the Federal Court Act, R.S.C. 1985, c. F-7 gives the Federal Court, Trial Division exclusive original jurisdiction to grant declaratory relief against any "federal board, commission or other tribunal". "Federal board, commission or other tribunal" is defined in s. 2(1) of the Act as meaning "any body or persons having, exercising or purporting to exercise jurisdiction or powers conferred by or under an Act of Parliament or by or under an order made pursuant to a prerogative of the Crown". The actions complained of by the appellant were not performed "by or under an Act of Parliament". The motions judge held that "an order" modifies both "by" and "under" in the definition. The Prime Minister did not exercise powers conferred by an order made pursuant to a prerogative of the Crown or exercise powers conferred under an order made pursuant to a prerogative of the Crown. The respondents submitted that "an order" modifies "under" but not "by". Under this interpretation, the Federal Court would have exclusive jurisdiction if the respondents exercised powers conferred by a prerogative of the Crown or exercised powers conferred under an order made pursuant to a prerogative of the Crown. However, a fair reading of s. 2(1) suggests that "an order made pursuant to" modifies both "by" and "under". Even if the respondents' interpretation was plausible, it collided with the principle that clear and explicit statutory language is required to oust the jurisdiction of provincial superior courts, which, unlike the Federal Court, are courts of inherent jurisdiction. Section 18(1) of the Act does not clearly and explicitly oust the jurisdiction of the Superior Court to grant declaratory relief in respect of the Prime Minister's exercise of the honours prerogative.

APPEAL from an order of LeSage C.J.S.C. (2000), 47 O.R. (3d)

2001 CanLII 8537 (ON CA)

532 (S.C.J.) striking out part of statement of claim as disclosing no reasonable cause of action; CROSS-APPEAL from an order that the Superior Court had jurisdiction to entertain the plaintiff's claims.

Alan J. Lenczner, Q.C., for appellant.
David W. Scott, Peter K. Doody and Jan Brongers, for respondents.

The judgment of the court was delivered by

LASKIN J.A.:--

A. Introduction

[1] The appellant Conrad Black wants to be appointed a peer in the United Kingdom, which would allow him to sit in the House of Lords. He alleges that Prime Minister Jean Chrtien intervened with the Queen to oppose his appointment and that, but for the Prime Minister's intervention, he would have received the honour and title of peer. Mr. Black has sued the Prime Minister for abuse of power, misfeasance in public office and negligence. He has sued the Government of Canada, represented by the Attorney General of Canada, for negligent misrepresentation. He seeks declaratory relief and damages of $25,000.

[2] The respondents Prime Minister Chrtien and the Attorney General of Canada brought a motion to dismiss all of Mr. Black's claims (except the claim for negligent misrepresentation against the Government) on two grounds: first, that the claims are not justiciable and therefore disclose no reasonable cause of action; and second, that the Superior Court has no jurisdiction to grant declaratory relief against the respondents because that jurisdiction lies exclusively with the Federal Court.

[3] In a decision reported as Black v. Canada (Prime Minister) (2000), 47 O.R. (3d) 532 (S.C.J.), LeSage C.J.S.C.

2001 CanLII 8537 (ON CA)

held that the Superior Court had jurisdiction to entertain Mr. Black's claims. However, the motions judge dismissed these claims, concluding at p. 544 that "[i]t is [the Prime Minister's] prerogative, non-reviewable in court, to give advice and express opinions on honours and foreign affairs . . . his actions and his reasons for giving that advice or expressing those opinions are not justiciable."

[4] Black appeals on the issue of justiciability and the respondents cross-appeal on the jurisdiction of the Superior Court to grant declaratory relief. Together, the appeal and the cross-appeal raise the following three issues:

(1) Is it plain and obvious that, in advising the Queen about the conferral of an honour on a Canadian citizen, the Prime Minister was exercising a prerogative power of the Crown?

(2) If so, is it plain and obvious that this exercise of the prerogative is not reviewable by the courts?

(3) If the Prime Minister's exercise of the prerogative is reviewable, does the Superior Court have jurisdiction to grant declaratory relief?

[5] For the reasons that follow, I would answer yes to all three questions. Because of my answers to the first two questions, I would dismiss Mr. Black's appeal. In my view, in advising the Queen about the conferral of an honour on a Canadian citizen, the Prime Minister was exercising his honours prerogative, a prerogative power that is beyond the review of the courts.

B. The Claim

[6] For the purpose of both the motion before LeSage C.J.S.C. and this appeal, the facts pleaded in Mr. Black's amended statement of claim must be taken as true and assumed to be proven. I will briefly summarize Mr. Black's pleading.

(a) The factual allegations

2001 CanLII 8537 (ON CA)

[7] In February 1999, the leader of the British Conservative Party advised Mr. Black that he intended to nominate him for appointment by the Queen as a peer. At the time, Mr. Black was a Canadian citizen ordinarily residing in England. The nomination was accepted and recommended by the British Government. The appointment would permit Mr. Black to use a title and sit in the House of Lords.

[8] On May 10, 1999, the British Government asked the Government of Canada to confirm the absence of a legal impediment to conferring a peerage on Mr. Black. On May 24, the Canadian High Commissioner in London spoke to Mr. Black. The Commissioner told Mr. Black that he had been advised by the Honours Committee of the Canadian Government that Mr. Black was not prevented from accepting a peerage by any statutory bar in Canada, though consultation between the United Kingdom and Canada was customary. Mr. Black claims that hundreds of honours, including more that 25 titular honours, have been bestowed on Canadians without objection by the Canadian Government. Some of those honours have been bestowed during Prime Minister Chrtien's term in office.

[9] On May 28, 1999, the Prime Minister of England, Mr. Blair, told Mr. Black that as long as he became a British citizen and did not use the title in Canada, the Canadian Government did not object to the peerage. The Canadian Government confirmed Prime Minister Blair's advice in a letter to the British Government dated June 9, 1999. The British High Commission received the same advice from Canada.

[10] Relying on this advice, Mr. Black immediately applied for, and on June 11, 1999 obtained, British citizenship. On June 14, Prime Minister Blair wrote Mr. Black confirming that his nomination as a peer was being forwarded to the Queen. Mr. Black was told that his appointment would be made on June 18, 1999.

[11] However, on June 17, Prime Minister Blair told Mr. Black that Prime Minister Chrtien had intervened with the Queen to oppose Mr. Black's peerage, citing a contravention of Canadian law. Prime Minister Chrtien asserted that he had a right to

2001 CanLII 8537 (ON CA)

block Mr. Black's nomination because of the Nickle Resolution passed by the House of Commons in 1919, which requested the King to refrain from conferring titles on any of his Canadian subjects. Later that day, Mr. Black telephoned Prime Minister Chrtien. The Prime Minister refused to change his position. He defended his actions by referring to the Nickle Resolution and the status of the monarchy in Canada. He added that he had not been kindly treated by the National Post, a newspaper published by Mr. Black. This was the third time in six months that the Prime Minister had expressed to Mr. Black his dissatisfaction with comments made about him in the National Post.

[12] Because of Prime Minister Chrtien's intervention with the Queen, Mr. Black's appointment as a peer was suspended or deferred "with considerable public embarrassment and inconvenience" to him. The Prime Minister later tried to justify his actions by referring to a Regulation passed in 1968 and a Policy issued in 1988.

(b) Canadian policy statements

[13] Mr. Black's amended statement of claim refers to three Canadian policy statements dealing with the granting of honours to Canadian citizens by foreign countries: the 1919 Nickle Resolution, the 1968 Regulation and the 1988 Policy.

[14] The Nickle Resolution passed by the House of Commons in 1919 asked the King "to refrain hereafter from conferring any title or honour or titular distinction upon any of your subjects domiciled or ordinarily resident in Canada . . .". The amended statement of claim states that Prime Minister Chrtien relied on the Nickle Resolution in opposing Mr. Black's appointment. However, Mr. Black pleads that the Nickle Resolution "had no legal effect on the prerogative of Her Majesty the Queen in Right of the United Kingdom" and "without the status of a statute . . . could not affect in any way the prerogative of Her Majesty the Queen". Mr. Black also pleads that the Nickle Resolution must yield to the Citizenship Act, R.S.C. 1985, c. C-29, which permits and recognizes dual citizenship with the United Kingdom. And, finally, Mr. Black pleads that he was a British citizen resident in the United

2001 CanLII 8537 (ON CA)

Kingdom before the Prime Minister intervened with the Queen.

[15] Mr. Black also alleges that Prime Minister Chrtien relied both on the 1968 Regulation and the 1988 Policy "after the fact" and that neither justified the Prime Minister's actions. The 1968 Regulation [See Note 1 at end of document] was issued by the Secretary of State Department, the 1988 Policy [See Note 2 at end of document] by the Clerk of the Privy Council. Both the Regulation and the Policy require foreign countries to obtain the Government of Canada's approval before awarding an order, a decoration or a medal to a Canadian citizen. And both the Regulation and the Policy state that the Government of Canada shall not grant approval for an award "that carries with it an honourary title or confers any precedence or privilege". However, s. 5 of the 1968 Regulation states that "approval is generally given to accept orders and decorations conferred on Canadian citizens who have dual nationality, provided acceptable evidence is offered that the recipient is ordinarily resident in or has a closer actual connection with the donor country."

(c) Relief sought

[16] In substance, Mr. Black seeks three declarations: first, a declaration that the Prime Minister and the Government of Canada had no right to advise the Queen not to confer an honour on a British citizen or a dual citizen; second, a declaration that the Prime Minister committed an abuse of power by intervening with the Queen to prevent him from receiving a peerage; and third, a declaration that the Government of Canada negligently misrepresented to Mr. Black that he would be entitled to receive a peerage if he became a dual citizen and refrained from using his title in Canada. Mr. Black also seeks damages of $25,000 against both respondents for abuse of power, negligence and negligent misrepresentation. The respondents acknowledge that the negligent misrepresentation claim against the Government of Canada can proceed to trial. However, they move to dismiss all other claims against the Government of Canada and all claims against the Prime Minister.

C. The Decision of the Motions Judge

2001 CanLII 8537 (ON CA)

[17] LeSage C.J.S.C. dealt first with the question whether the Superior Court had jurisdiction to grant declaratory relief against the Prime Minister and the Government of Canada. He held that it did. He concluded at p. 539 that Mr. Black's claim did not "come clearly or exclusively within the jurisdiction of the Federal Court (Trial Division)" under s. 18(1) of the Federal Court Act, R.S.C. 1985, c. F-7 because Prime Minister Chrtien did not act under an Act of Parliament or make any "order".

[18] The motions judge then considered whether Mr. Black's claims were justiciable. He concluded that they were not. He held that the justiciability of the Prime Minister's actions depended on how these actions were characterized. The motions judge characterized them as an exercise of the Crown prerogative in relation to the granting of honours or the giving of advice in foreign affairs. In his view, these actions came "within the political area of the prerogative that is not subject to review in the courts" (supra, at p. 541).

[19] The motions judge then looked separately at the claims in negligence and for abuse of power. He concluded that these claims could not succeed. Having found that Prime Minister Chrtien acted within his prerogative, the motions judge held that neither the improper exercise of that prerogative nor the wisdom of the Prime Minister's actions was justiciable. The motions judge therefore struck out all claims as non-justiciable, except the claim for negligent misrepresentation against the Government of Canada, which was permitted to proceed.

D. Discussion

[20] The respondents brought their motion under rule 21.01(1)(b) and rule 21.01(3)(a) of the Rules of Civil Procedure [R.R.O. 1990, Reg. 194]. Under rule 21.01(1)(b), the respondents contend that Mr. Black's claim, other than the negligent misrepresentation claim against the Government, discloses no reasonable cause of action. Under rule 21.01(3)(a), they contend that the Superior Court has no

2001 CanLII 8537 (ON CA)

jurisdiction to grant the declaratory relief Mr. Black requests.

[21] I will deal first with whether Mr. Black's claim discloses a reasonable cause of action. The test under rule 21.01(1)(b) is well established. The threshold is low. The court must assume that the facts pleaded are true. The court should strike out the statement of claim only if it is "plain and obvious" that the claim discloses no reasonable cause of action: "Neither the length and complexity of the issues, the novelty of the cause of action, nor the potential for the defendant to present a strong defence should prevent the plaintiff from proceeding with his or her case. Only if the action is certain to fail . . . should the relevant portions of a plaintiff's statement of claim be struck out": Hunt v. Carey Canada Inc., [1990] 2 S.C.R. 959 at p. 980, 49 B.C.L.R. (2d) 273. In applying this test, counsel for Mr. Black appropriately cautioned us not to give this statement of claim extra scrutiny because of who the parties are.

[22] The broad question raised by Mr. Black's pleading is whether it discloses a justiciable cause of action against the Prime Minister. As I stated earlier, this broad question divides into two issues: Is it plain and obvious that in advising the Queen about the conferral of an honour on a Canadian citizen, the Prime Minister was exercising a prerogative power? If so, is the exercise of this prerogative power reviewable by the courts?

First issue: Was the Prime Minister exercising a prerogative power?

[23] The motions judge concluded that the Prime Minister's communication with the Queen was an exercise of the prerogative power to grant honours and conduct foreign affairs. I agree with the motions judge that Prime Minister Chrtien was exercising a prerogative power, although I rest my own conclusion on the honours prerogative alone.

[24] Mr. Black submits that the motions judge erred in his conclusion for four reasons. First, because Mr. Black did not

2001 CanLII 8537 (ON CA)

plead that the Prime Minister exercised a Crown prerogative, the motions judge should not have concluded that he did. Second, in Canada the Prime Minister does not have the power to exercise the Crown prerogative, only the Governor General does. Third, the actions of Prime Minister Chrtien pleaded in the statement of claim were not an exercise of the Crown prerogative, in relation to either the granting of honours or the conduct of foreign affairs, but an unsolicited personal intervention in which the Prime Minister gave wrong legal advice. Fourth, in Canada the prerogative power to conduct foreign affairs has been displaced by the Department of Foreign Affairs and International Trade Act, R.S.C. 1985, c. E-22.

[25] To put these submissions in context, I will briefly review the nature of the Crown's prerogative power. According to Professor Dicey, the Crown prerogative is "the residue of discretionary or arbitrary authority, which at any given time is left in the hands of the Crown": Dicey, Introduction to the Study of the Law of the Constitution, 10th ed. (London: Macmillan, 1959) at p. 424. Dicey's broad definition has been explicitly adopted by the Supreme Court of Canada and the House of Lords. See Reference re Effect of Exercise of Royal Prerogative of Mercy Upon Deportation Proceedings, [1933] S.C.R. 269 at pp. 272-73, 59 C.C.C. 301, and Attorney General v. De Keyser's Royal Hotel, [1920] A.C. 508 at p. 526, [1920] All E.R. Rep. 80 (H.L.). See also Peter Hogg and Patrick Monahan, Liability of the Crown, 3rd ed. (Toronto: Carswell, 2000) at p. 15.

[26] The prerogative is a branch of the common law because decisions of courts determine both its existence and its extent. In short, the prerogative consists of "the powers and privileges accorded by the common law to the Crown": Peter Hogg, Constitutional Law in Canada, loose-leaf ed. (Toronto: Carswell, 1995) at 1.9. See also Proclamations Case (1611), 12 Co. Rep. 74, 77 E.R. 1352 (K.B.). The Crown prerogative has descended from England to the Commonwealth. As Professor Cox has recently observed, "it is clear that the major prerogatives apply throughout the Commonwealth, and are applied as a pure question of law": N. Cox, The Dichotomy of Legal Theory and Political Reality: The Honours Prerogative and Imperial Unity,

2001 CanLII 8537 (ON CA)

14 Australian Journal of Law and Society (1998-99) 15 at 19.

[27] Despite its broad reach, the Crown prerogative can be limited or displaced by statute. See Parliament of Canada Act, R.S.C. 1985, c. P-1, s. 4. Once a statute occupies ground formerly occupied by the prerogative, the prerogative goes into abeyance. The Crown may no longer act under the prerogative, but must act under and subject to the conditions imposed by the statute: Attorney General v. De Keyser's Royal Hotel, supra. In England and Canada, legislation has severely curtailed the scope of the Crown prerogative. Dean Hogg comments that statutory displacement of the prerogative has had the effect of "shrinking the prerogative powers of the Crown down to a very narrow compass" (supra). Professor Wade agrees:

> [I]n the course of constitutional history the Crown's prerogative powers have been stripped away, and for administrative purposes the prerogative is now a much-attenuated remnant. Numerous statutes have expressly restricted it, and even where a statute merely overlaps it the doctrine is that the prerogative goes into abeyance.

E.C.S. Wade, Administrative Law, 6th ed. (Oxford: Clarendon Press, 1988) at pp. 240-41.)

Nonetheless, as I will discuss, the granting of honours has never been displaced by statute in Canada and therefore continues to be a Crown prerogative in this country.

[28] I turn now to Mr. Black's submissions. Mr. Black did not plead that Prime Minister Chrtien exercised a prerogative power. Therefore, he first submits that on a rule 21.01(1)(b) motion, LeSage C.J.S.C. should not have characterized his allegations about the Prime Minister's actions as amounting to an exercise of the prerogative, and then used that characterization to strike out the amended statement of claim. If the Prime Minister is relying on the prerogative, he must plead it in his statement of defence.

[29] I disagree with this submission. As is evident from my earlier discussion, whether the Prime Minister exercised a

2001 CanLII 8537 (ON CA)

prerogative power is a question of law. The court has the responsibility to determine whether a prerogative power exists and, if so, its scope and whether it has been superseded by statute. Although Mr. Black did not expressly plead that the Prime Minister was exercising the Crown prerogative, the motions judge was entitled to consider the "legal character" of Mr. Black's allegations.

[30] That the motions judge was entitled to do so on a motion under rule 21.01(1)(b) is supported by the Supreme Court of Canada's decision in Operation Dismantle Inc. v. R., [1985] 1 S.C.R. 441, 13 C.R.R. 287. In that case, the plaintiffs pleaded that the decision of the federal Cabinet to allow the United States to test cruise missiles in Canada violated s. 7 of the Canadian Charter of Rights and Freedoms. The court struck out the claim, holding that it did not disclose a reasonable cause of action. The plaintiffs did not plead that in deciding to permit cruise missile testing the Cabinet was exercising the Crown prerogative. Nonetheless, both the Federal Court of Appeal and Wilson J., in her concurring judgment in the Supreme Court of Canada, held that [the] Cabinet's decision was an exercise of the Crown prerogative relating to national defence and foreign affairs. That finding alone did not insulate the Cabinet's decision from review under the Charter. But Wilson J.'s judgment shows that in determining whether a statement of claim discloses a reasonable cause of action, the court may consider whether, on the allegations pleaded, the defendant exercised a prerogative power.

[31] Mr. Black's second submission is that the Prime Minister cannot exercise the Crown prerogative. He submits that in Canada, only the Governor General can exercise the prerogative. I find no support for this proposition in theory or in practice. Admittedly, the Governor General is the Queen's permanent representative in Canada. The 1947 Letters Patent constituting the office of the Governor General of Canada [Canada Gazette, Part I, Vol. 81, p. 3104] is the instrument by which the Monarch delegates her prerogative powers for application in Canada. The Letters Patent empower[s] the Governor General "to exercise all powers and authorities lawfully belonging to Us in respect of Canada" (at para. II).

2001 CanLII 8537 (ON CA)

By convention, the Governor General exercises her powers on the advice of the Prime Minister or Cabinet. Although the Governor General retains discretion to refuse to follow this advice, in Canada that discretion has been exercised only in the most exceptional circumstances. See Pa ul Lordon, Q.C., Crown Law (Toronto: Butterworths, 1991) at p. 70.

[32] Still, nothing in the Letters Patent or the case law requires that all prerogative powers be exercised exclusively by the Governor General. As members of the Privy Council, the Prime Minister and other Ministers of the Crown may also exercise the Crown prerogative: see Lordon, supra, at p. 71. The reasons of Wilson J. in Operation Dismantle affirm that prerogative power may be exercised by cabinet ministers and therefore does not lie exclusively with the Governor General. Similarly, in England the prerogative "[was] gradually relocated from the Monarch in person to the Monarch's advisors or ministers. Hence it made increasing sense to refer to those powers as belonging to the Crown . . .": Bridgid Hadfield, "Judicial Review and the Prerogative Power" in M. Sunkin and S. Payne, The Nature of the Crown (Oxford: Oxford University Press, 1999) at p. 199. This gradual relocation of the prerogative is consistent with Professor Wade's general view of the Crown prerogative as an "instrument of government": Commentary on Dicey's Introduction to the Study of the Law of the Constitution, 9th ed. (London: Macmillan, 1950). The conduct of foreign affairs, for example, "is an executive act of government in which neither the Queen nor Parliament has any part": F.A. Mann, Foreign Affairs in English Courts (Oxford: Clarendon Press, 1986) at p. 2. See also Barton v. Commonwealth of Australia (1974), A.L.J.R. 161 at 172.

[33] Counsel for the respondents points out that if Mr. Black were correct, the Prime Minister -- whose powers are not enumerated in any statute -- would have no legal authority to speak for Canada on foreign affairs. This proposition is, on its face, absurd. I therefore reject Mr. Black's submission that only the Governor General can exercise prerogative powers in Canada. I conclude that the Prime Minister and the Government of Canada can exercise the Crown prerogative as well.

2001 CanLII 8537 (ON CA)

[34] Mr. Black's third submission is that even if the Prime Minister can exercise prerogative power relating to the granting of honours or the conduct of foreign affairs, on the facts pleaded in the amended statement of claim, Prime Minister Chrtien was doing neither. He was not deciding whether to grant Mr. Black an honour -- that decision rests with the Queen -- and he was not conducting foreign affairs. Instead, according to Mr. Black, Prime Minister Chrtien intervened personally with the Queen and gave unsolicited and wrong legal advice.

[35] In my view, however, whether one characterizes the Prime Minister's actions as communicating Canada's policy on honours to the Queen, giving her advice on Mr. Black's peerage, or opposing Mr. Black's appointment, he was exercising the prerogative power of the Crown relating to honours.

[36] Unquestionably, the granting of honours is the prerogative of the Crown. The Monarch is "the fountain, parent and distributor of honours, dignities, privileges and franchises": Joseph Chitty, A Treatise on the Law of the Prerogatives of the Crown: And the Relative Duties and Rights of the Subject (London: Butterworths and Son, 1820), at p. 6. Because no statute in Canada governs the conferral of honours, this prerogative has not been displaced by federal law. Nor has it been limited by the common law. As Hogg and Monahan, supra, observe at pp. 18-19, appointments and honours is one area in which the prerogative power "remains meaningful". Their view is consistent with the opinion of Lord Roskill in the important House of Lords decision, Council of Civil Service Unions v. Minister for the Civil Service, [1985] 1 A.C. 374, [1984] 3 All E.R. 935. In his speech in that case Lord Roskill said at p. 418 that the modern exercise of the prerogative includes "the making of treaties , the defence of the realm, the prerogative of mercy, the grant of honours, the dissolution of Parliament and the appointment of ministers as well as others . . .". (Emphasis added.)

[37] It is one thing to state that the honours prerogative still exists in Canada. However, one critical question on this

2001 CanLII 8537 (ON CA)

appeal is the scope of that power. Common sense dictates that, at a minimum, the honours prerogative includes the power to grant or refuse to grant an honour to a Canadian citizen. However, in my view the honours prerogative is much broader than that, and is not limited to conferrals the Government of Canada or the Prime Minister might make. The honours prerogative also includes giving advice on, even advising against, a foreign country's conferral of an honour on a Canadian citizen. If that were not so, the three Canadian policy statements on the granting of honours by foreign countries -- the 1919 Nickle Resolution, the 1968 Regulation and the 1988 Policy -- would be meaningless. Because these policy statements guide the exercise of Canada's honours prerogative, the exercise of the prerogative necessarily embraces the communication of these policies to a foreign country considering bestowing a title on a Canadian citizen. Furthermore, the authority to communicate that policy rests with the nation's leader, the Prime Minister.

[38] The policy statements show that Canada has chosen to exercise the honours prerogative differently from England. As we have seen, Canada calls for foreign countries to obtain the Government of Canada's approval before granting honours to Canadian citizens. The underlying rationale of these policies is egalitarianism. Canada disapproves of ranking its citizens according to status and lineage. In communicating Canada's policy to the Queen, in giving her advice on it, right or wrong, in advising against granting a title to one of Canada's citizens, the Prime Minister was exercising the Crown prerogative relating to honours.

[39] Mr. Black's argument appears to rest on the notion that Prime Minister Chrtien's communication with the Queen was grounded not in the prerogative but was a "personal intervention" motivated by a "personal vendetta". He argues that the exercise of a prerogative power is confined to powers and privileges unique to the Crown; powers and privileges enjoyed equally with private persons are not part of the prerogative. There are two answers to Mr. Black's argument. One answer is that the Prime Minister's authority is always derived from either a federal statute or the prerogative; it is never

2001 CanLII 8537 (ON CA)

personal in nature. See Dicey, supra, at p. 424 and Schreiber v. Canada (Attorney General), [2000] 1 F.C. 427 at p. 444, 174 F.T.R. 221. Here, Prime Minister Chrtien did not act under a statute; he therefore acted under the authority of the Crown prerogative.

[40] The other answer is that even if the Prime Minister does at times act as a private citizen of Canada, he could hardly be said to have been acting as one in this case. Private citizens cannot ordinarily communicate private advice to the Queen. Thus, even accepting Mr. Black's pleading, Prime Minister Chrtien's intervention with the Queen was not personal. Whatever his motivation, he was acting as the leader of this country, giving advice or communicating Canada's policy on honours to a foreign head of state.

[41] For these reasons, I conclude that it is plain and obvious the Prime Minister was exercising the Crown prerogative relating to the granting of honours. Because I am satisfied that the Prime Minister was exercising prerogative power relating to the granting of honours, it is unnecessary to consider the alternative basis for the motions judge's decision, the foreign affairs prerogative, or Mr. Black's submissions on it.

Second issue: Is the prerogative power exercised by the Prime Minister reviewable in the courts?

[42] This is the main question on this appeal. The motions judge concluded at p. 541 that Mr. Black's complaint about the Prime Minister was not justiciable. He wrote: "It is not within the power of the court to decide whether or not the advice of the PM about the prerogative honour to be conferred or denied upon Black was right or wrong. It is not for the court to give its opinion on the advice tendered by the PM to another country. These are non-justiciable decisions for which the PM is politically accountable to Parliament and the electorate, not to the courts."

[43] Mr. Black submits that the motions judge erred in concluding that Prime Minister Chrtien's exercise of the

2001 CanLII 8537 (ON CA)

honours prerogative was not reviewable by the court. The amended statement of claim pleads that the Prime Minister gave the Queen wrong legal advice, which detrimentally affected Mr. Black. Mr. Black argues that had the advice been given under a statutory power, it would have been subject to judicial review; it should similarly be subject to judicial review if given under a prerogative power.

[44] I agree with Mr. Black that the source of the power -- statute or prerogative -- should not determine whether the action complained of is reviewable. However, in my view, the action complained of in this case -- giving advice to the Queen or communicating to her Canada's policy on the conferral of an honour on a Canadian citizen -- is not justiciable. Even if the advice was wrong or given carelessly or negligently, it is not reviewable in the courts. I therefore agree with the motions judge's conclusion.

[45] Under the law that existed at least into the 1960s, the court's power to judicially review the prerogative was very limited. The court could determine whether a prerogative power existed and, if so, what its scope was, and whether it had been superseded by statute. However, once a court established the existence and scope of a prerogative power, it could not review how that power was exercised. See S. DeSmith, H. Woolf and J. Jowell, DeSmith, Woolf & Jowell's Principles of Judicial Review (London: Sweet & Maxwell, 1999) at p. 175 and De Keyser's Royal Hotel, supra. The appropriateness or adequacy of the grounds for its exercise, even whether the procedures used were fair, were not reviewable. The courts insisted that the source of the power -- the prerogative -- precluded judicial scrutiny of its exercise. The underlying rationale for this narrow review of the prerogative was that exercises of prerogative power ordinarily raised questions courts were not qualified or competent to answer.

[46] Even this narrow view of the court's role in reviewing the prerogative power now has to be modified in Canada because of the Canadian Charter of Rights and Freedoms. By s. 32(1)(a), the Charter applies to Parliament and the Government of Canada in respect of all matters within the authority of Parliament.

2001 CanLII 8537 (ON CA)

The Crown prerogative lies within the authority of Parliament. Therefore, if an individual claims that the exercise of a prerogative power violates that individual's Charter rights, the court has a duty to decide the claim. See Operation Dismantle, supra. However, Mr. Black does not assert any Charter claim.

[47] Apart from the Charter, the expanding scope of judicial review and of Crown liability make it no longer tenable to hold that the exercise of a prerogative power is insulated from judicial review merely because it is a prerogative and not a statutory power. The preferable approach is that adopted by the House of Lords in the Civil Service Unions case, supra. There, the House of Lords emphasized that the controlling consideration in determining whether the exercise of a prerogative power is judicially reviewable is its subject matter, not its source. If, in the words of Lord Roskill, the subject matter of the prerogative power is "amenable to the judicial process", it is reviewable; if not, it is not reviewable. Lord Roskill provided content to this subject matter test of reviewability by explaining that the exercise of the prerogative will be amenable to the judicial process if it affects the rights of individuals. Again, in his words at p. 417 A.C.:

> If the executive in pursuance of the statutory power does an act affecting the rights of the citizen, it is beyond question that in principle the manner of the exercise of that power may today be challenged on one or more of the three grounds which I have mentioned earlier in this speech. If the executive instead of acting under a statutory power acts under a prerogative power and in particular a prerogative power delegated to the respondent under article 4 of the Order in Council of 1982, so as to affect the rights of the citizen, I am unable to see, subject to what I shall say later, that there is any logical reason why the fact that the source of the power is the prerogative and not statute should today deprive the citizen of that right of challenge to the manner of its exercise which he would possess were the source of the power statutory. In either case the act in question is the act of the executive.

2001 CanLII 8537 (ON CA)

[48] In his speech in that case, Lord Diplock discussed two ways in which the exercise of a prerogative power may affect the rights of an individual: by altering the individual's legal rights and obligations or by affecting the individual's legitimate expectations. He stated at p. 408 A.C.:

> To qualify as a subject for judicial review the decision must have consequences which affect some person (or body of persons) other than the decision-maker, although it may affect him too. It must affect such other person either:
>
> (a) by altering rights or obligations of that person which are enforceable by or against him in private law; or
>
> (b) by depriving him of some benefit or advantage which either (i) he had in the past been permitted by the decision-maker to enjoy and which he can legitimately expect to be permitted to continue to do until there has been communicated to him some rational grounds for withdrawing it on which he has been given an opportunity to comment; or (ii) he has received assurance from the decision-maker [that the benefit or advantage] will not be withdrawn without giving him first an opportunity of advancing reasons for contending that they should not be withdrawn.

[49] I agree with the House of Lords that the proper test for the review of the exercise of the prerogative is the subject matter test. It is that test that I will endeavour to apply in this case.

[50] At the core of the subject matter test is the notion of justiciability. The notion of justiciability is concerned with the appropriateness of courts deciding a particular issue, or instead deferring to other decision-making institutions like Parliament. See Canada (Auditor General) v. Canada (Minister of Energy, Mines & Resources), [1989] 2 S.C.R. 49, 61 D.L.R. (4th) 604; Thorne's Hardware Ltd. v. R., [1983] 1 S.C.R. 106, 143 D.L.R. (3d) 577. Only those exercises of the prerogative that are justiciable are reviewable. The court must decide "whether the question is purely political in nature and should,

2001 CanLII 8537 (ON CA)

therefore, be determined in another forum or whether it has a sufficient legal component to warrant the intervention of the judicial branch": Reference re Canada Assistance Plan (British Columbia), [1991] 2 S.C.R. 525 at p. 545, 58 B.C.L.R. (2d) 1.

[51] Under the test set out by the House of Lords, the exercise of the prerogative will be justiciable, or amenable to the judicial process, if its subject matter affects the rights or legitimate expectations of an individual. Where the rights or legitimate expectations of an individual are affected, the court is both competent and qualified to judicially review the exercise of the prerogative.

[52] Thus, the basic question in this case is whether the Prime Minister's exercise of the honours prerogative affected a right or legitimate expectation enjoyed by Mr. Black and is therefore judicially reviewable. To put this question in context, I will briefly discuss prerogative powers that lie at the opposite ends of the spectrum of judicial reviewability. At one end of the spectrum lie executive decisions to sign a treaty or to declare war. These are matters of "high policy": R. v. Secretary of State for Foreign & Commonwealth Affairs, Ex p. Everett, [1989] 1 All E.R. 655 at p. 660, [1989] Q.B. 811, per Taylor L.J. Where matters of high policy are concerned, public policy and public interest considerations far outweigh the rights of individuals or their legitimate expectations. In my view, apart from Charter claims, these decisions are not judicially reviewable.

[53] At the other end of the spectrum lie decisions like the refusal of a passport or the exercise of mercy. The power to grant or withhold a passport continues to be a prerogative power. A passport is the property of the Government of Canada, and no person, strictly speaking, has a legal right to one. However, common sense dictates that a refusal to issue a passport for improper reasons or without affording the applicant procedural fairness should be judicially reviewable. This was the position taken by the English Court of Appeal in R. v. Secretary of State for Foreign & Commonwealth Affairs, Ex p. Everett, supra. Two passages from that case are worth highlighting. O'Connor L.J. wrote at p. 658 All E.R.:

2001 CanLII 8537 (ON CA)

> The judge held that the issue of a passport fell into an entirely different category. That seems common sense. It is a familiar document to all citizens who travel in the world and it would seem obvious to me that the exercise of the prerogative, because there is no doubt that passports are issued under the royal prerogative in the discretion of the Secretary of State, is an area where common sense tells one that, if for some reason a passport is wrongly refused for a bad reason, the court should be able to inquire into it. I would reject the submission made on behalf of the Secretary of State that the judge was wrong to review the case.

And Taylor L.J. wrote at p. 660 All E.R.:

> At the top of the scale of executive functions under the prerogative are matters of high policy, of which examples were given by their Lordships: making treaties, making law, dissolving Parliament, mobilising the armed forces. Clearly those matters, and no doubt a number of others, are not justiciable. But the grant or refusal of a passport is in a quite different category. It is a matter of administrative decision, affecting the rights of individuals and their freedom of travel. It raises issues which are just as justiciable as, for example, the issues arising in immigration cases.

[54] In today's world, the granting of a passport is not a favour bestowed on a citizen by the state. It is not a privilege or a luxury but a necessity. Possession of a passport offers citizens the freedom to travel and to earn a livelihood in the global economy. In Canada, the refusal to issue a passport brings into play Charter considerations; the guarantee of mobility under s. 6 and perhaps even the right to liberty under s. 7. In my view, the improper refusal of a passport should, as the English courts have held, be judicially reviewable.

[55] A similar view might also be taken of the exercise of the prerogative of mercy, still preserved in Canada by s. 749 of the Criminal Code, R.S.C. 1985, c. C-46. Though on one view

2001 CanLII 8537 (ON CA)

mercy begins where legal rights end, I think the prerogative of mercy should be looked at as more than a royal favour. The existence of this prerogative is the ultimate safeguard against mistakes in the criminal justice system and thus in some cases the Government's refusal to exercise it may be judicially reviewable. That was the view taken by the English Queen's Bench Division in Re Secretary of State for the Home Department, Ex p. Bentley, [1993] 4 All E.R. 442. There, the court held that the Home Secretary's decision not to grant a posthumous conditional pardon was judicially reviewable.

[56] Against the context of these cases I return to the issue raised in this appeal -- whether the action of the Prime Minister affected a right or legitimate expectation enjoyed by Mr. Black and is therefore judicially reviewable. This issue turns on how the subject matter of Prime Minister Chrtien's exercise of the honours prerogative is characterized. Mr. Black characterizes the subject matter of the Prime Minister's actions in one of two ways: first, as giving unsolicited and wrong legal advice to the Queen, which detrimentally affected Mr. Black; or second, as an administrative decision involving the improper interpretation and application of Canadian policy, the Nickle Resolution, to the granting of an honour. See also Hogg and Monahan, supra, at p. 20.

[57] In my opinion, these are not accurate characterizations of Prime Minister Chrtien's actions as pleaded in the amended statement of claim. Prime Minister Chrtien was not giving legal advice or making an administrative decision. Focusing on wrong legal advice or the improper interpretation of a policy misses what this case is about. As I see it, the action of Prime Minister Chrtien complained of by Mr. Black is his giving advice to the Queen about the conferral of an honour on a Canadian citizen. The Prime Minister communicated Canada's policy on honours to the Queen and advised her against conferring an honour on Mr. Black.

[58] So characterized, it is plain and obvious that the Prime Minister's exercise of the honours prerogative is not judicially reviewable. Indeed, in the Civil Service Unions case, Lord Roskill listed a number of exercises of the

2001 CanLII 8537 (ON CA)

prerogative power whose subject matters were by their very nature not justiciable. Included in the list was the grant of honours. He wrote, in a passage I have already referred to, at p. 418 A.C.:

> But I do not think that that right of challenge can be unqualified. It must, I think, depend upon the subject matter of the prerogative power which is exercised. Many examples were given during the argument of prerogative powers which as at present advised I do not think could properly be made the subject of judicial review. Prerogative powers such as those relating to the making of treaties, the defence of the realm, the prerogative of mercy, the grant of honours, the dissolution of Parliament and the appointment of ministers as well as others are not, I think, susceptible to judicial review because their nature and subject matter are such as not to be amenable to the judicial process. The courts are not the place wherein to determine whether a treaty should be concluded or the armed forces disposed in a particular manner or Parliament dissolved on one date rather than another.

(Emphasis added)

[59] Lord Roskill's opinion on the grant of honours was obiter in that case, and regardless of course, is not binding on this court. Moreover, including the grant of honours in a list of non-reviewable exercises of the prerogative has been criticized by some as overly broad. See Hogg and Monahan, supra, at p. 15 and Hadfield, supra, at p. 217. However, I agree with Lord Roskill. Holding that the exercise of the honours prerogative is always beyond the review of courts is not a departure from the subject matter test espoused by the House of Lords in the Civil Service Unions case. Rather, it is faithful to that test. See also Cox, supra, at p. 19.

[60] The refusal to grant an honour is far removed from the refusal to grant a passport or a pardon, where important individual interests are at stake. Unlike the refusal of a peerage, the refusal of a passport or a pardon has real adverse consequences for the person affected. Here, no important individual interests are at stake. Mr. Black's rights were not

2001 CanLII 8537 (ON CA)

affected, however broadly "rights" are construed. No Canadian citizen has a right to an honour.

[61] And no Canadian citizen can have a legitimate expectation of receiving an honour. In Canada, the doctrine of legitimate expectations informs the duty of procedural fairness; it gives no substantive rights: Baker v. Canada (Minister of Citizenship and Immigration), [1999] 2 S.C.R. 817, 174 D.L.R. (4th) 193 at pp. 838-42 S.C.R., pp. 212-14 D.L.R.. See also Civil Service Unions, per Lord Diplock at pp. 408-09 A.C. Here Mr. Black does not assert that he was denied procedural fairness. Indeed, he had no procedural rights.

[62] But even if the doctrine of legitimate expectations could give substantive rights, neither Mr. Black nor any other Canadian citizen can claim a legitimate expectation of receiving an honour. The receipt of an honour lies entirely within the discretion of the conferring body. The conferral of the honour at issue in this case, a British peerage, is a discretionary favour bestowed by the Queen. It engages no liberty, no property, no economic interests. It enjoys no procedural protection. It does not have a sufficient legal component to warrant the court's intervention. Instead, it involves "moral and political considerations which it is not within the province of the courts to assess". See Operation Dismantle, supra, per Wilson J. at p. 465 S.C.R.

[63] In other words, the discretion to confer or refuse to confer an honour is the kind of discretion that is not reviewable by the court. In this case, the court has even less reason to intervene because the decision whether to confer a British peerage on Mr. Black rests not with Prime Minister Chrtien, but with the Queen. At its highest, all the Prime Minister could do was give the Queen advice not to confer a peerage on Mr. Black.

[64] For these reasons, I agree with the motions judge that Prime Minister Chrtien's exercise of the honours prerogative by giving advice to the Queen about granting Mr. Black's peerage is not justiciable and therefore not judicially reviewable.

2001 CanLII 8537 (ON CA)

[65] Once Prime Minister Chrtien's exercise of the honours prerogative is found to be beyond review by the courts, how the Prime Minister exercised the prerogative is also beyond review. Even if the advice was wrong or careless or negligent, even if his motives were questionable, they cannot be challenged by judicial review. To paraphrase Dickson J. in Thorne's Hardware, supra, at p. 112 S.C.R.: "It is neither our duty nor our right" to investigate the Prime Minister's motives or his reasons for his advice. Therefore, the declaratory relief and the tort claims asserted by Mr. Black cannot succeed. For these reasons, I would dismiss his appeal.

Third issue: Does the Superior Court have jurisdiction to grant declaratory relief against the Prime Minister and the Government of Canada?

[66] Although raised only on the cross-appeal, the Superior Court's jurisdiction over Mr. Black's claim is a threshold issue. For that reason, and because it was fully argued, I will consider it in these reasons.

[67] Under the recent amendments to the Federal Court Act and the Crown Liability and Proceedings Act, R.S.C. 1985, c. C-50, the general rule is that the Federal Court and the courts of the provinces have concurrent jurisdiction to entertain claims for relief against the Crown. In their cross-appeal, however, the Prime Minister and the Government of Canada submit that even if Mr. Black's claims are justiciable, the Superior Court does not have jurisdiction to grant the declaratory relief he seeks because that jurisdiction rests exclusively with the Federal Court (Trial Division). The respondents ask us to dismiss Mr. Black's claims for declaratory relief under rule 21.01(3)(a) of the Rules of Civil Procedure. This rule permits a court to dismiss an action on the ground that "the court has no jurisdiction over the subject matter of the action." The motions judge concluded that the Superior Court had jurisdiction to entertain the claim against the Prime Minister. He also held that the Superior Court could deal with the claim against the Government of Canada because for the purpose of jurisdiction it was in the same position as the Prime Minister.

2001 CanLII 8537 (ON CA)

[68] The respondents rely on s. 18(1) of the Federal Court Act, which gives the Trial Division of the Federal Court exclusive original jurisdiction to grant declaratory relief against any "federal board, commission or other tribunal":

> 18(1) Subject to section 28, the Trial Division has exclusive original jurisdiction
>
> (a) to issue an injunction, writ of certiorari, writ of prohibition, writ of mandamus or writ of quo warranto, or grant declaratory relief, against any federal board, commission or other tribunal; and
>
> (b) to hear and determine any application or other proceeding for relief in the nature of relief contemplated by paragraph (a), including any proceeding brought against the Attorney General of Canada, to obtain relief against a federal board, commission or other tribunal.
>
> . . . . .
>
> (3) The remedies provided for in subsections (1) and (2) may be obtained only on an application for judicial review made under section 18.1.

Thus, the narrow question on this cross-appeal is whether the Prime Minister or the Government of Canada was acting as a federal board, commission or other tribunal.

[69] When the Federal Court Act was first enacted, the phrase "federal board, commission or other tribunal" was defined in s. 2 to mean a body exercising jurisdiction or powers conferred by or under an Act of Parliament:

> . . . any body or any person or persons having, exercising or purporting to exercise jurisdiction or powers conferred by or under an Act of Parliament, other than any such body constituted or established by or under a law of a province or any such person or persons appointed under or in accordance

2001 CanLII 8537 (ON CA)

with a law of a province or under section 96 of the Constitution Act, 1867.

However, in 1990, this definition was amended to include the exercise of power conferred by or under an order made pursuant to a prerogative of the Crown. Section 2 was replaced by a new definition in s. 2(1), which reads:

"federal board, commission or other tribunal" means any body or any person or persons having, exercising or purporting to exercise jurisdiction or powers conferred by or under an Act of Parliament or by or under an order made pursuant to a prerogative of the Crown, other than any such body constituted or established by or under a law of a province or any such person or persons appointed under or in accordance with a law of a province or under section 96 of the Constitution Act, 1867.

(Emphasis added)

[70] The respondents acknowledge that the actions complained of by Mr. Black were not performed "by or under an Act of Parliament". Even if Prime Minister Chrtien acted under the 1919 Nickle Resolution or the 1968 Regulation or the 1988 Policy, none of these policy statements gives powers conferred by or under a federal statute. Therefore, the Federal Court has exclusive jurisdiction only if Prime Minister Chrtien exercised powers conferred "by or under an order made pursuant to a prerogative of the Crown". LeSage C.J.S.C. concluded, and the respondents accept, that Prime Minister Chrtien did not make any order. What he did, according to the amended statement of claim, was intervene with the Queen to block Mr. Black's peerage or advise the Queen not to appoint Mr. Black. There was no "order".

[71] However, the phrase "by or under an order made pursuant to a prerogative of the Crown" admits of two possible interpretations. Under the first interpretation, advanced by Mr. Black and accepted by the motions judge, "an order" modifies both "by" and "under". Under this interpretation, the Federal Court (Trial Division) would have exclusive

2001 CanLII 8537 (ON CA)

jurisdiction if the Prime Minister exercised powers conferred by an order made pursuant to a prerogative of the Crown or exercised powers conferred under an order made pursuant to a prerogative of the Crown. As Prime Minister Chrtien did neither, under this interpretation, the Superior Court has jurisdiction to entertain Mr. Black's claim for declaratory relief.

[72] Under the second interpretation, advanced by the respondents, "an order" modifies "under" but not "by". Under this interpretation, the Federal Court would have exclusive jurisdiction if the respondents exercised powers conferred by a prerogative of the Crown or exercised powers conferred under an order made pursuant to a prerogative of the Crown. As the Prime Minister exercised a prerogative power, under this interpretation only the Federal Court (Trial Division) would have jurisdiction to grant declaratory relief, at least against him.

[73] The respondents submit that their interpretation is more plausible. They argue that the motions judge's interpretation of the Act is contrary to Parliament's intention to make the Federal Court the only forum for review of federal administrative action. They point out that under the motions judge's interpretation, if the prerogative were exercised pursuant to an order, it could only be reviewed by the Federal Court; but if the prerogative were exercised directly, that is, without an order, it could be reviewed by the Superior Court. The respondents contend that such a result is anomalous. And they point out that judicial review of administrative action does not depend on the existence of an order.

[74] One possible answer to the respondents' argument is that by defining "federal board, commission or other tribunal" in the way it did, Parliament intended that the exercise of the prerogative be immune from judicial review. However, accepting -- as I have -- that some prerogative powers are reviewable, the respondents' argument must yield to the wording and structure of s. 2(1) of the statute. A fair reading of s. 2(1) suggests that "an order made pursuant to" modifies both "by" and "under". This interpretation is supported by the parallel

2001 CanLII 8537 (ON CA)

structure of s. 2(1) -- "by or under an Act of Parliament" and "by or under an order made pursuant to a prerogative of the Crown". The former phrase must mean by an Act of Parliament or under an Act of Parliament; similarly, the latter phrase must mean by an order made pursuant to a prerogative of the Crown or under an order made pursuant to a prerogative of the Crown.

[75] Even if the respondents' interpretation is plausible, it collides with the principle that clear and explicit statutory language is required to oust the jurisdiction of provincial superior courts, which, unlike the Federal Court, are courts of inherent general jurisdiction. The Supreme Court of Canada articulated this principle in Ordon Estate v. Grail, [1998] 3 S.C.R. 437, 166 D.L.R. (4th) 193, where Iacobucci and Major JJ. wrote at p. 474 S.C.R.:

> As a statutory court, the Federal Court of Canada has no jurisdiction except that assigned to it by statute. In light of the inherent general jurisdiction of the provincial superior courts, Parliament must use express statutory language where it intends to assign jurisdiction to the Federal Court. In particular, it is well established that the complete ouster of jurisdiction from the provincial superior courts in favour of vesting exclusive jurisdiction in a statutory court (rather than simply concurrent jurisdiction with the superior courts) requires clear and explicit statutory wording to this effect. This latter principle finds early expression in the judgment in Peacock v. Bell (1677), 1 Wms. Saund. 73, 85 E.R. 84, at pp. 87-88:
>
> > And the rule for jurisdiction is, that nothing shall be intended to be out of the jurisdiction of a Superior Court, but that which specially appears to be so; and, on the contrary, nothing shall be intended to be within the jurisdiction of an Inferior Court but that which is so expressly alleged.
>
> This basic principle continues to be applied up to the present day . . .

Section 18(1) of the Federal Court Act does not clearly and

2001 CanLII 8537 (ON CA)

explicitly oust the jurisdiction of the Superior Court to grant declaratory relief in respect of the Prime Minister's exercise of the honours prerogative.

[76] Put differently, if Parliament has left a "gap" in its grant of statutory jurisdiction to the Federal Court, the institutional and constitutional position of provincial superior courts warrants granting them this residual jurisdiction over federal matters. See Canada (Human Rights Commission) v. Canadian Liberty Net, [1998] 1 S.C.R. 626, 50 C.R.R. (2d) 189. I therefore conclude that absent an order, the exercise of a prerogative power may be reviewable in the Superior Court. Thus, I agree with the motions judge and would dismiss the cross-appeal.

E. Conclusion

[77] I would dismiss the appeal with costs. I would also dismiss the cross-appeal with costs. I conclude by thanking counsel for their submissions. This case was exceptionally well-argued by both sides.

Appeal and cross-appeal dismissed.

ON APPEAL FROM THE FEDERAL COURT OF APPEAL

Constitutional law — Charter of Rights — Application — Canadian citizen detained by U.S. authorities at Guantanamo Bay — Canadian officials interviewing

EN APPEL DE LA COUR D'APPEL FÉDÉRALE

Droit constitutionnel — Charte des droits — Application — Citoyen canadien détenu par les autorités américaines à Guantanamo — Interrogatoire d'un détenu

2010 SCC 3 (CanLII)

detainee knowing that he had been subjected to sleep deprivation and sharing contents of interviews with U.S. authorities — Whether process in place at Guantanamo Bay at that time violated Canada's international human rights obligations — Whether Canadian Charter of Rights and Freedoms applies to conduct of Canadian state officials alleged to have breached detainee's constitutional rights.

Constitutional law — Charter of Rights — Right to life, liberty and security of person — Fundamental justice — Canadian citizen detained by U.S. authorities at Guantanamo Bay — Canadian officials interviewing detainee knowing that he had been subjected to sleep deprivation and sharing contents of interviews with U.S. authorities — Whether conduct of Canadian officials deprived detainee of his right to liberty and security of person — If so, whether deprivation of detainee's right is in accordance with principles of fundamental justice — Canadian Charter of Rights and Freedoms, s. 7.

Constitutional law — Charter of Rights — Remedy — Request for repatriation — Canadian citizen detained by U.S. authorities at Guantanamo Bay — Canadian officials interviewing detainee knowing that he had been subjected to sleep deprivation and sharing contents of interviews with U.S. authorities — Violation of detainee's right to liberty and security of person guaranteed by Canadian Charter of Rights and Freedoms — Detainee seeking order that Canada request his repatriation from Guantanamo Bay — Whether remedy sought is just and appropriate in circumstances — Canadian Charter of Rights and Freedoms, s. 24(1).

Courts — Jurisdiction — Crown prerogative over foreign relations — Courts' power to review and intervene on matters of foreign affairs to ensure constitutionality of executive action.

K, a Canadian, has been detained by the U.S. military at Guantanamo Bay, Cuba, since 2002, when he was a minor. In 2004, he was charged with war crimes, but the U.S. trial is still pending. In 2003, agents from two Canadian intelligence services, CSIS and DFAIT, questioned K on matters connected to the charges pending against him, and shared the product of these interviews with U.S. authorities. In 2004, a DFAIT official interviewed K again, with knowledge that he had been subjected by U.S. authorities to a sleep deprivation

par des responsables canadiens qui savaient qu'il avait été privé de sommeil et communication du contenu des interrogatoires aux autorités américaines — Le processus en place à Guantanamo à l'époque violait-il les obligations internationales du Canada en matière de droits de la personne? — La Charte canadienne des droits et libertés s'applique-t-elle à la conduite de responsables canadiens qui auraient violé les droits constitutionnels du détenu?

Droit constitutionnel — Charte des droits — Droit à la vie, à la liberté et à la sécurité de la personne — Justice fondamentale — Citoyen canadien détenu par les autorités américaines à Guantanamo — Interrogatoire d'un détenu par des responsables canadiens qui savaient qu'il avait été privé de sommeil et communication du contenu des interrogatoires aux autorités américaines — La conduite des responsables canadiens a-t-elle porté atteinte aux droits du détenu à la liberté et à la sécurité de sa personne? — Si oui, l'atteinte était-elle compatible avec les principes de justice fondamentale?— Charte canadienne des droits et libertés, art. 7.

Droit constitutionnel — Charte des droits — Réparation — Demande de rapatriement — Citoyen canadien détenu par les autorités américaines à Guantanamo — Interrogatoire d'un détenu par des responsables canadiens qui savaient qu'il avait été privé de sommeil et communication du contenu des interrogatoires aux autorités américaines — Violation des droits du détenu à la liberté et à la sécurité de sa personne garantis par la Charte canadienne des droits et libertés — Sollicitation par le détenu d'une ordonnance intimant au Canada de demander son rapatriement — La réparation demandée est-elle juste et convenable eu égard aux circonstances? — Charte canadienne des droits et libertés, art. 24(1).

Tribunaux — Compétence — Prérogative royale en matière de relations internationales — Pouvoir des tribunaux d'examiner les questions relatives aux affaires étrangères et d'intervenir à leur égard pour s'assurer de la constitutionnalité de l'action de l'exécutif.

K, un Canadien, est détenu à Guantanamo par les autorités militaires américaines depuis 2002. Il était alors mineur. En 2004, il a été accusé de crimes de guerre, mais le procès qu'il doit subir aux États-Unis est toujours pendant. En 2003, des agents des services de renseignements du SCRS et du MAECI ont interrogé K sur des sujets liés aux accusations portées contre lui et ont relayé l'information recueillie aux autorités américaines. En 2004, un responsable du MAECI a interrogé K une nouvelle fois, en sachant que les autorités

2010 SCC 3 (CanLII)

technique, known as the "frequent flyer program", to make him less resistant to interrogation. In 2008, in *Canada (Justice) v. Khadr* ("*Khadr 2008*"), this Court held that the regime in place at Guantanamo Bay constituted a clear violation of Canada's international human rights obligations, and, under s. 7 of the *Canadian Charter of Rights and Freedoms*, ordered the Canadian government to disclose to K the transcripts of the interviews he had given to CSIS and DFAIT, which it did. After repeated requests by K that the Canadian government seek his repatriation, the Prime Minister announced his decision not to do so. K then applied to the Federal Court for judicial review, alleging that the decision violated his rights under s. 7 of the *Charter*. The Federal Court held that under the special circumstances of this case, Canada had a duty to protect K under s. 7 of the *Charter* and ordered the government to request his repatriation. The Federal Court of Appeal upheld the order, but stated that the s. 7 breach arose from the interrogation conducted in 2004 with the knowledge that K had been subjected to the "frequent flyer program".

Held: The appeal should be allowed in part.

Canada actively participated in a process contrary to its international human rights obligations and contributed to K's ongoing detention so as to deprive him of his right to liberty and security of the person, guaranteed by s. 7 of the *Charter*, not in accordance with the principles of fundamental justice. Though the process to which K is subject has changed, his claim is based upon the same underlying series of events considered in *Khadr 2008*. As held in that case, the *Charter* applies to the participation of Canadian officials in a regime later found to be in violation of fundamental rights protected by international law. There is a sufficient connection between the government's participation in the illegal process and the deprivation of K's liberty and security of the person. While the U.S. is the primary source of the deprivation, it is reasonable to infer from the uncontradicted evidence before the Court that the statements taken by Canadian officials are contributing to K's continued detention. The deprivation of K's right to liberty and security of the person is not in accordance with the principles of fundamental justice. The interrogation of a youth detained without access to counsel, to elicit statements about serious criminal charges while knowing that the youth had been subjected to sleep deprivation and while knowing that the

américaines l'avaient soumis à une technique de privation de sommeil connue sous le nom de « programme grand voyageur », dans le but d'amoindrir sa résistance lors des interrogatoires. En 2008, dans *Canada (Justice) c. Khadr* (« *Khadr 2008* »), la Cour a conclu que le régime en place à Guantanamo constituait une violation manifeste des obligations internationales du Canada en matière de droits de la personne et, se fondant sur l'art. 7 de la *Charte canadienne des droits et libertés*, a ordonné au gouvernement canadien de communiquer à K les transcriptions des interrogatoires auxquels il avait été soumis par des agents du SCRS et du MAECI, ce qui fut fait. Après que K eut demandé à plusieurs reprises que le gouvernement canadien sollicite son rapatriement, le premier ministre a annoncé sa décision de ne pas le faire. K a alors présenté, à la Cour fédérale, une demande de contrôle judiciaire faisant valoir que la décision violait les droits qui lui sont garantis par l'art. 7 de la *Charte*. La Cour fédérale a conclu que, dans les circonstances particulières de l'espèce, le Canada avait l'obligation de protéger K en application de l'art. 7 de la *Charte* et a ordonné au gouvernement de demander son rapatriement. La Cour d'appel fédérale a confirmé l'ordonnance, mais a affirmé que l'atteinte à l'art. 7 découlait de l'interrogatoire mené en 2004 auquel on avait procédé en sachant que K avait été soumis au « programme grand voyageur ».

Arrêt : Le pourvoi est accueilli en partie.

Le Canada a activement participé à un processus contraire aux obligations internationales qui lui incombent en matière de droits de la personne et a contribué à la détention continue de K, de telle sorte qu'il a porté atteinte aux droits à la liberté et à la sécurité de sa personne que lui garantit l'art. 7 de la *Charte*, et ce, de manière incompatible avec les principes de justice fondamentale. S'il est vrai que la procédure à laquelle est soumis K a changé, la demande qu'il formule repose sur la série de faits déjà examinée dans *Khadr 2008*. Comme la Cour l'a conclu dans cet arrêt, la *Charte* s'applique à la participation de responsables canadiens à un régime jugé ultérieurement en violation de droits fondamentaux protégés par le droit international. Il existe un lien suffisant entre la participation du gouvernement au processus illégal et l'atteinte à la liberté et à la sécurité de K. Même si les États-Unis sont la source première de l'atteinte, il est raisonnable de déduire de la preuve non contredite portée à notre connaissance que les déclarations recueillies par des responsables canadiens contribuent à la détention continue de K. L'atteinte aux droits de K à la liberté et à la sécurité de sa personne n'est pas compatible avec les principes de justice fondamentale. Interroger un adolescent détenu sans qu'il ait pu consulter un avocat pour lui soutirer des déclarations

2010 SCC 3 (CanLII)

fruits of the interrogations would be shared with the prosecutors, offends the most basic Canadian standards about the treatment of detained youth suspects.

K is entitled to a remedy under s. 24(1) of the *Charter*. The remedy sought by K — an order that Canada request his repatriation — is sufficiently connected to the *Charter* breach that occurred in 2003 and 2004 because of the continuing effect of this breach into the present and its possible effect on K's ultimate trial. While the government must have flexibility in deciding how its duties under the royal prerogative over foreign relations are discharged, the executive is not exempt from constitutional scrutiny. Courts have the jurisdiction and the duty to determine whether a prerogative power asserted by the Crown exists; if so, whether its exercise infringes the *Charter* or other constitutional norms; and, where necessary, to give specific direction to the executive branch of the government. Here, the trial judge misdirected himself in ordering the government to request K's repatriation, in view of the constitutional responsibility of the executive to make decisions on matters of foreign affairs and the inconclusive state of the record. The appropriate remedy in this case is to declare that K's *Charter* rights were violated, leaving it to the government to decide how best to respond in light of current information, its responsibility over foreign affairs, and the *Charter*.

relatives à des accusations criminelles sérieuses, tout en sachant qu'il a été privé de sommeil et que les fruits des interrogatoires seraient communiqués aux procureurs américains, contrevient aux normes canadiennes les plus élémentaires quant aux traitements à accorder aux suspects adolescents détenus.

K a droit à une réparation en vertu du par. 24(1) de la *Charte*. La réparation demandée par K — une ordonnance intimant au Canada de demander son rapatriement — est suffisamment liée à la violation de la *Charte* survenue en 2003 et 2004 parce que les incidences de cette violation persistent jusqu'à présent et pourraient influer sur son procès lorsqu'il sera finalement tenu. Bien que le gouvernement doive disposer d'une certaine marge de manœuvre lorsqu'il décide de quelle manière il doit s'acquitter des obligations relevant de sa prérogative en matière de relations étrangères, l'exécutif n'est pas à l'abri du contrôle constitutionnel. Les tribunaux ont compétence, et sont tenus d'exercer cette compétence, pour déterminer si la prérogative invoquée par la Couronne existe véritablement et, dans l'affirmative, pour décider si son exercice contrevient à la *Charte* ou à d'autres normes constitutionnelles. Lorsque cela s'avère nécessaire, les tribunaux ont aussi compétence pour donner à la branche exécutive du gouvernement des directives spécifiques. En l'espèce, le juge de première instance s'est fondé sur des considérations erronées en ordonnant au gouvernement de demander le rapatriement de K, compte tenu de la responsabilité constitutionnelle de l'exécutif de prendre les décisions concernant les affaires étrangères et du dossier qui n'est pas suffisamment probant. La réparation appropriée, en l'espèce, consiste à déclarer que les droits de K garantis par la *Charte* ont été violés, et à laisser au gouvernement le soin de décider de quelle manière il convient de répondre à la lumière de l'information dont il dispose actuellement, de sa responsabilité en matière d'affaires étrangères et de la *Charte*.

THE COURT —

I. Introduction

[1] Omar Khadr, a Canadian citizen, has been detained by the United States government at Guantanamo Bay, Cuba, for over seven years. The Prime Minister asks this Court to reverse the decision of the Federal Court of Appeal requiring the Canadian government to request the United States to return Mr. Khadr from Guantanamo Bay to Canada.

John Norris, *Brydie Bethell* et *Audrey Macklin*, pour les intervenants Human Rights Watch, University of Toronto, Faculty of Law — International Human Rights Program et David Asper Centre for Constitutional Rights.

Version française du jugement rendu par

LA COUR —

I. Introduction

[1] Omar Khadr, un citoyen canadien, est détenu à Guantanamo (Cuba) par le gouvernement des États-Unis depuis plus de sept ans. Le premier ministre voudrait que la Cour infirme la décision par laquelle la Cour d'appel fédérale a ordonné au gouvernement canadien de demander aux États-Unis le rapatriement de M. Khadr au Canada.

2010 SCC 3 (CanLII)

[2] For the reasons that follow, we agree with the courts below that Mr. Khadr's rights under s. 7 of the *Canadian Charter of Rights and Freedoms* were violated. However, we conclude that the order made by the lower courts that the government request Mr. Khadr's return to Canada is not an appropriate remedy for that breach under s. 24(1) of the *Charter*. Consistent with the separation of powers and the well-grounded reluctance of courts to intervene in matters of foreign relations, the proper remedy is to grant Mr. Khadr a declaration that his *Charter* rights have been infringed, while leaving the government a measure of discretion in deciding how best to respond. We would therefore allow the appeal in part.

II. Background

[3] Mr. Khadr was 15 years old when he was taken prisoner on July 27, 2002, by U.S. forces in Afghanistan. He was alleged to have thrown a grenade that killed an American soldier in the battle in which he was captured. About three months later, he was transferred to the U.S. military installation at Guantanamo Bay. He was placed in adult detention facilities.

[4] On September 7, 2004, Mr. Khadr was brought before a Combatant Status Review Tribunal which affirmed a previous determination that he was an "enemy combatant". He was subsequently charged with war crimes and held for trial before a military commission. In light of a number of procedural delays and setbacks, that trial is still pending.

[5] In February and September 2003, agents from the Canadian Security Intelligence Service ("CSIS") and the Foreign Intelligence Division of the Department of Foreign Affairs and International Trade ("DFAIT") questioned Mr. Khadr on matters connected to the charges pending against him

[2] Pour les motifs exposés ci-après, nous estimons, à l'instar des juridictions inférieures, que les droits garantis à M. Khadr par l'art. 7 de la *Charte canadienne des droits et libertés* ont été violés. Nous arrivons toutefois à la conclusion que l'ordre donné par les tribunaux d'instances inférieures au gouvernement de demander le renvoi de M. Khadr au Canada ne constitue pas la réparation convenable de cette violation visée au par. 24(1) de la *Charte*. Conformément à la séparation des pouvoirs et à la réticence légitime des tribunaux à intervenir dans les questions relatives aux affaires étrangères, la réparation appropriée consiste à prononcer, en faveur de M. Khadr, un jugement déclaratoire confirmant la violation des droits qui lui sont garantis par la *Charte*, tout en laissant au gouvernement une certaine latitude pour décider de la manière dont il convient de répondre. Nous sommes donc d'avis d'accueillir le pourvoi en partie.

II. Le contexte

[3] M. Khadr était âgé de 15 ans lorsqu'il a été fait prisonnier par les forces américaines en Afghanistan, le 27 juillet 2002. Il lui est reproché d'avoir lancé une grenade qui a tué un soldat américain, lors du combat au cours duquel il a été capturé. Trois mois plus tard environ, il a été transféré aux installations militaires américaines à Guantanamo et placé dans un centre de détention pour adultes.

[4] Le 7 septembre 2004, M. Khadr a été traduit devant un tribunal d'examen du statut de combattant (*Combatant Status Review Tribunal*) qui a confirmé une décision antérieure selon laquelle il était un [TRADUCTION] « combattant ennemi ». Par la suite, il a été accusé de crimes de guerre et détenu en vue de la tenue d'un procès devant une commission militaire. Par suite de nombreux reports et obstacles de nature procédurale, ce procès est toujours pendant.

[5] En février et en septembre 2003, des agents du Service canadien du renseignement de sécurité (« SCRS ») et des membres de la Direction du renseignement extérieur du ministère des Affaires étrangères et du Commerce international (« MAECI ») ont interrogé M. Khadr sur des sujets

2010 SCC 3 (CanLII)

and shared the product of these interviews with U.S. authorities. In March 2004, a DFAIT official interviewed Mr. Khadr again, with the knowledge that he had been subjected by U.S. authorities to a sleep deprivation technique, known as the "frequent flyer program", in an effort to make him less resistant to interrogation. During this interview, Mr. Khadr refused to answer questions. In 2005, von Finckenstein J. of the Federal Court issued an interim injunction preventing CSIS and DFAIT agents from further interviewing Mr. Khadr in order "to prevent a potential grave injustice" from occurring: *Khadr v. Canada*, 2005 FC 1076, [2006] 2 F.C.R. 505, at para. 46. In 2008, this Court ordered the Canadian government to disclose to Mr. Khadr the transcripts of the interviews he had given to CSIS and DFAIT in Guantanamo Bay, under s. 7 of the *Charter*: *Canada (Justice) v. Khadr*, 2008 SCC 28, [2008] 2 S.C.R. 125 ("*Khadr 2008*").

liés aux accusations portées contre lui et ont relayé l'information recueillie aux autorités américaines. En mars 2004, un responsable du MAECI a interrogé M. Khadr une nouvelle fois, en sachant que les autorités américaines l'avaient soumis à une technique de privation de sommeil, connue sous le nom de « programme grand voyageur » (*frequent flyer program*), dans le but d'amoindrir sa résistance lors des interrogatoires. Durant cet interrogatoire, M. Khadr a refusé de répondre aux questions. En 2005, le juge von Finckenstein, de la Cour fédérale, interdisait par une injonction provisoire aux agents du SCRS et aux fonctionnaires du MAECI d'interroger M. Khadr de nouveau, « pour empêcher une éventuelle injustice grave » : *Khadr c. Canada*, 2005 CF 1076, [2006] 2 R.C.F. 505, par. 46. En 2008, notre Cour, se fondant sur l'art. 7 de la *Charte*, ordonnait au gouvernement canadien de communiquer à M. Khadr les transcriptions des interrogatoires auxquels il avait été soumis par des agents du SCRS et du MAECI à Guantanamo : *Canada (Justice) c. Khadr*, 2008 CSC 28, [2008] 2 R.C.S. 125 (« *Khadr 2008* »).

[6] Mr. Khadr has repeatedly requested that the Government of Canada ask the United States to return him to Canada: in March 2005 during a Canadian consular visit; on December 15, 2005, when a welfare report noted that "[Mr. Khadr] wants his government to bring him back home" (Report of Welfare Visit, Exhibit "L" to Affidavit of Sean Robertson, December 15, 2005 (J.R., vol. IV, at p. 534)); and in a formal written request through counsel on July 28, 2008.

[6] M. Khadr a demandé à plusieurs reprises que le gouvernement du Canada sollicite auprès des États-Unis son rapatriement au Canada : en mars 2005, lors d'une visite de responsables consulaires canadiens; le 15 décembre 2005, lorsqu'il a été indiqué dans un rapport sur le bien-être de M. Khadr que [TRADUCTION] « [ce dernier] veut que son gouvernement le ramène au pays » (*Rapport quant à une visite relative au bien-être*, pièce « L », jointe à l'affidavit de Sean Robertson, 15 décembre 2005 (D.C., vol. IV, p. 534)); et dans une demande écrite officielle présentée par l'intermédiaire de son avocat le 28 juillet 2008.

[7] The Prime Minister announced his decision not to request Mr. Khadr's repatriation on July 10, 2008, during a media interview. The Prime Minister provided the following response to a journalist's question, posed in French, regarding whether the government would seek repatriation:

[7] Le 10 juillet 2008, lors d'une conférence de presse, le premier ministre a annoncé sa décision de ne pas demander le rapatriement de M. Khadr. À une question que lui a posée une journaliste en français pour savoir si le gouvernement allait demander le rapatriement, il a répondu ceci :

[TRANSLATION] The answer is no, as I said the former Government, and our Government with the notification of the Minister of Justice had considered all these

La réponse c'est non. Comme je l'ai dit, l'ancien gouvernement et notre gouvernement, avec l'avis du ministère de la Justice, ont considéré toutes ces questions-là et la

2010 SCC 3 (CanLII)

issues and the situation remains the same. . . . We keep on looking for [assurances] of good treatment of Mr. Khadr.

(http://watch.ctv.ca/news/clip65783#clip65783, at 3'3", referred to in Affidavit of April Bedard, August 8, 2008 (J.R., vol. II, at pp. 131-32).)

[8] On August 8, 2008, Mr. Khadr applied to the Federal Court for judicial review of the government's "ongoing decision and policy" not to seek his repatriation (Notice of Application filed by the respondent, August 8, 2008 (J.R., vol. II, at p. 113)). He alleged that the decision and policy infringed his rights under s. 7 of the *Charter*, which states:

7. Everyone has the right to life, liberty and security of the person and the right not to be deprived thereof except in accordance with the principles of fundamental justice.

[9] After reviewing the history of Mr. Khadr's detention and applicable principles of Canadian and international law, O'Reilly J. concluded that in these special circumstances, Canada has a "duty to protect" Mr. Khadr (2009 FC 405, 341 F.T.R. 300). He found that "[t]he ongoing refusal of Canada to request Mr. Khadr's repatriation to Canada offends a principle of fundamental justice and violates Mr. Khadr's rights under s. 7 of the *Charter*" (para. 92). Also, he held that "[t]o mitigate the effect of that violation, Canada must present a request to the United States for Mr. Khadr's repatriation to Canada as soon as practicable" (para. 92).

[10] The majority judgment of the Federal Court of Appeal (*per* Evans and Sharlow JJ.A.) upheld O'Reilly J.'s order, but defined the s. 7 breach more narrowly. The majority of the Court of Appeal found that it arose from the March 2004 interrogation conducted with the knowledge that Mr. Khadr had been subject to the "frequent flyer program", characterized by the majority as involving cruel and abusive treatment contrary to the principles of fundamental justice: 2009 FCA 246, 310 D.L.R. (4th) 462. Dissenting, Nadon J.A. reviewed the many

situation reste la même. [. . .] Nous continuons à chercher des assurances de bon traitement de M. Khadr.

(http://watch.ctv.ca/news/clip65783#clip65783, à 3 min. 3 sec., auquel renvoie l'affidavit d'April Bedard, 8 août 2008 (D.C., vol. II, p. 131-132).)

[8] Le 8 août 2008, M. Khadr a présenté, à la Cour fédérale, une demande de contrôle judiciaire à l'égard de [TRADUCTION] « la décision et [de] la politique inchangée » (Avis de demande de l'intimé, 8 août 2008 (D.C., vol. II, p. 113)) du gouvernement de ne pas demander son rapatriement. Cette décision et cette politique violaient, selon lui, les droits qui lui sont garantis par l'art. 7 de la *Charte*, dont voici le texte :

7. Chacun a droit à la vie, à la liberté et à la sécurité de sa personne; il ne peut être porté atteinte à ce droit qu'en conformité avec les principes de justice fondamentale.

[9] Après avoir passé en revue l'historique de la détention de M. Khadr et les principes applicables du droit canadien et du droit international, le juge O'Reilly a conclu que, dans les circonstances particulières de l'espèce, le Canada avait « l'obligation de protéger » M. Khadr (2009 CF 405, [2009] A.C.F. nº 462 (QL)). Il a jugé que « [l]e refus constant du Canada de solliciter le rapatriement de M. Khadr est contraire à un principe de justice fondamental et porte atteinte aux droits que l'article 7 de la *Charte* lui garantit » (par. 92). En outre, il a conclu que « [p]our atténuer l'effet de cette atteinte, le Canada [devait] demander le plus tôt possible aux États-Unis de rapatrier M. Khadr » (par. 92).

[10] Les juges majoritaires de la Cour d'appel fédérale (les juges Evans et Sharlow) ont confirmé l'ordonnance du juge O'Reilly, tout en définissant cependant de façon plus étroite l'atteinte à l'art. 7. Ils ont jugé que cette atteinte découlait de l'interrogatoire de mars 2004 auquel on avait procédé en sachant que M. Khadr avait été soumis au « programme grand voyageur » qui, selon les juges majoritaires, constituait un traitement cruel et abusif contraire aux principes de justice fondamentale : 2009 CAF 246, [2009] A.C.F. nº 893 (QL).

2010 SCC 3 (CanLII)

steps the government had taken on Mr. Khadr's behalf and held that since the Constitution conferred jurisdiction over foreign affairs on the executive branch of government, the remedy sought was beyond the power of the courts to grant.

Le juge Nadon, dissident, a rappelé les nombreuses mesures que le gouvernement avait prises en faveur de M. Khadr. Il est arrivé à la conclusion que puisque la Constitution conférait à la branche exécutive du gouvernement la compétence en matière d'affaires étrangères, la réparation souhaitée allait au-delà de ce que les tribunaux avaient le pouvoir d'octroyer.

III. The Issues

III. Les questions en litige

[11] Mr. Khadr argues that the government has breached his rights under s. 7 of the *Charter*, and that the appropriate remedy for this breach is an order that the government request the United States to return him to Canada.

[11] M. Khadr soutient que le gouvernement a violé les droits que lui garantit l'art. 7 de la *Charte* et que la réparation convenable consiste à ordonner au gouvernement de demander aux États-Unis son rapatriement au Canada.

[12] Mr. Khadr does not suggest that the government is obliged to request the repatriation of all Canadian citizens held abroad in suspect circumstances. Rather, his contention is that the conduct of the government of Canada in connection with his detention by the U.S. military in Guantanamo Bay, and in particular Canada's collaboration with the U.S. government in 2003 and 2004, violated his rights under the *Charter*, and requires as a remedy that the government now request his return to Canada. The issues that flow from this claim may be summarized as follows:

[12] M. Khadr ne prétend pas que le gouvernement est tenu de demander le rapatriement de tous les citoyens canadiens détenus à l'étranger dans des circonstances suspectes. Il soutient plutôt que la conduite du gouvernement du Canada à l'égard de sa détention à Guantanamo par les autorités militaires américaines, et en particulier la collaboration du Canada avec le gouvernement américain en 2003 et 2004, a porté atteinte aux droits qui lui sont garantis par la *Charte*. Il exige en outre, à titre de réparation, que le gouvernement demande maintenant son rapatriement au Canada. Les questions soulevées par cette demande peuvent être résumées de la façon suivante :

A. Was There a Breach of Section 7 of the *Charter*?

A. Y a-t-il eu violation de l'art. 7 de la *Charte*?

1. Does the *Charter* apply to the conduct of Canadian state officials alleged to have infringed Mr. Khadr's s. 7 *Charter* rights?

1. La *Charte* s'applique-t-elle à la conduite des responsables canadiens qui, selon M. Khadr, ont porté atteinte aux droits que lui garantit l'art. 7 de la *Charte*?

2. If so, does the conduct of the Canadian government deprive Mr. Khadr of the right to life, liberty or security of the person?

2. Si tel est le cas, la conduite du gouvernement canadien porte-t-elle atteinte aux droits de M. Khadr à la vie, à la liberté ou à la sécurité de sa personne?

3. If so, does the deprivation accord with the principles of fundamental justice?

3. Si tel est le cas, cette atteinte est-elle compatible avec les principes de justice fondamentale?

2010 SCC 3 (CanLII)

B. Is the Remedy Sought Appropriate and Just in All the Circumstances?

[13] We will consider each of these issues in turn.

A. *Was There a Breach of Section 7 of the Charter?*

1. Does the Canadian *Charter* Apply to the Conduct of the Canadian State Officials Alleged to Have Infringed Mr. Khadr's Section 7 *Charter* Rights?

[14] As a general rule, Canadians abroad are bound by the law of the country in which they find themselves and cannot avail themselves of their rights under the *Charter*. International customary law and the principle of comity of nations generally prevent the *Charter* from applying to the actions of Canadian officials operating outside of Canada: *R. v. Hape*, 2007 SCC 26, [2007] 2 S.C.R. 292, at para. 48, *per* LeBel J., citing *United States of America v. Dynar*, [1997] 2 S.C.R. 462, at para. 123. The jurisprudence leaves the door open to an exception in the case of Canadian participation in activities of a foreign state or its agents that are contrary to Canada's international obligations or fundamental human rights norms: *Hape*, at para. 52, *per* LeBel J.; *Khadr 2008*, at para. 18.

[15] The question before us, then, is whether the rule against the extraterritorial application of the *Charter* prevents the *Charter* from applying to the actions of Canadian officials at Guantanamo Bay.

[16] This question was addressed in *Khadr 2008*, in which this Court held that the *Charter* applied to the actions of Canadian officials operating at Guantanamo Bay who handed the fruits of their interviews over to U.S. authorities. This Court held, at para. 26, that "the principles of international law and comity that might otherwise preclude application of the *Charter* to Canadian officials acting abroad do not apply to the assistance they gave to U.S. authorities at Guantanamo Bay", given holdings of the Supreme Court of the United

B. La réparation demandée est-elle convenable et juste eu égard à toutes les circonstances?

[13] Nous étudierons chacune de ces questions successivement.

A. *Y a-t-il eu violation de l'art. 7 de la Charte?*

1. La *Charte* canadienne s'applique-t-elle à la conduite des responsables canadiens qui, selon M. Khadr, ont porté atteinte aux droits que lui garantit l'art. 7 de la *Charte*?

[14] De manière générale, les Canadiens qui sont à l'étranger sont assujettis au droit du pays où ils se trouvent et ne peuvent pas se prévaloir des droits que leur garantit la *Charte*. Le droit international coutumier et le principe de la courtoisie entre les nations s'opposent, en règle générale, à l'application de la *Charte* aux actions des responsables canadiens en mission à l'étranger : *R. c. Hape*, 2007 CSC 26, [2007] 2 R.C.S. 292, par. 48, le juge LeBel citant *États-Unis d'Amérique c. Dynar*, [1997] 2 R.C.S. 462, par. 123. La jurisprudence prévoit une exception dans le cas d'une participation canadienne à des activités d'un État étranger ou de ses représentants qui sont contraires aux obligations internationales du Canada ou aux normes relatives aux droits fondamentaux de la personne : *Hape*, par. 52, le juge LeBel; *Khadr 2008*, par. 18.

[15] La question dont nous sommes saisis est donc celle de savoir si la règle excluant l'application extraterritoriale de la *Charte* empêche son application aux actions de responsables canadiens à Guantanamo.

[16] Statuant sur cette question dans *Khadr 2008*, la Cour a conclu que la *Charte* s'appliquait aux actions des responsables canadiens en mission à Guantanamo qui avaient transmis aux autorités américaines le fruit de leurs interrogatoires avec M. Khadr. La Cour a conclu, au par. 26, que « les principes du droit international et de la courtoisie entre les nations qui, dans d'autres circonstances, pourraient soustraire à l'application de la *Charte* les actes des responsables canadiens en mission à l'étranger ne s'appliquent pas à l'assistance fournie en l'espèce

2010 SCC 3 (CanLII)

States that the military commission regime then in place constituted a clear violation of fundamental human rights protected by international law: see *Khadr 2008*, at para. 24; *Rasul v. Bush*, 542 U.S. 466 (2004), and *Hamdan v. Rumsfeld*, 548 U.S. 557 (2006). The principles of fundamental justice thus required the Canadian officials who had interrogated Mr. Khadr to disclose to him the contents of the statements he had given them. The Canadian government complied with this Court's order.

[17] We note that the regime under which Mr. Khadr is currently detained has changed significantly in recent years. The U.S. Congress has legislated and the U.S. courts have acted with the aim of bringing the military processes at Guantanamo Bay in line with international law. (The *Detainee Treatment Act of 2005*, Pub. L. 109-148, 119 Stat. 2739, prohibited inhumane treatment of detainees and required interrogations to be performed according to the Army field manual. The *Military Commissions Act of 2006*, Pub. L. 109-366, 120 Stat. 2600, attempted to legalize the Guantanamo regime after the U.S. Supreme Court's ruling in *Hamdan v. Rumsfeld*. However, on June 12, 2008, in *Boumediene v. Bush*, 128 S. Ct. 2229 (2008), the U.S. Supreme Court held that Guantanamo Bay detainees have a constitutional right to *habeas corpus*, and struck down the provisions of the *Military Commissions Act of 2006* that suspended that right.)

[18] Though the process to which Mr. Khadr is subject has changed, his claim is based upon the same underlying series of events at Guantanamo Bay (the interviews and evidence-sharing of 2003 and 2004) that we considered in *Khadr 2008*. We are satisfied that the rationale in *Khadr 2008* for applying the *Charter* to the actions of Canadian officials at Guantanamo Bay governs this case as well.

aux autorités américaines à Guantanamo », étant donné les arrêts de la Cour suprême des États-Unis selon lesquels le régime de commission militaire alors en vigueur constituait une atteinte manifeste aux droits fondamentaux de la personne reconnus en droit international : *Khadr 2008*, par. 24; voir *Rasul c. Bush*, 542 U.S. 466 (2004), et *Hamdan c. Rumsfeld*, 548 U.S. 557 (2006). Selon les principes de justice fondamentale, les responsables canadiens qui avaient interrogé M. Khadr étaient donc tenus de lui révéler la teneur des déclarations qu'il leur avait faites. Le gouvernement canadien s'est conformé à l'ordonnance de la Cour.

[17] Nous constatons que le régime dans le cadre duquel M. Khadr est actuellement détenu a été modifié de façon notable au cours des dernières années. Le Congrès américain a adopté des lois et les tribunaux ont rendu des décisions visant à harmoniser les procédures militaires de Guantanamo avec le droit international. (La *Detainee Treatment Act of 2005*, Pub. L. 109-148, 119 Stat. 2739, interdit de soumettre les détenus à des traitements inhumains et exige que les interrogatoires soient menés en conformité avec le manuel de service de l'armée. Avec la *Military Commissions Act of 2006*, Pub. L. 109-366, 120 Stat. 2600, le législateur a tenté de légaliser le régime de Guantanamo après l'arrêt rendu par la Cour suprême des États-Unis dans l'affaire *Hamdan c. Rumsfeld*. Or, le 12 juin 2008, cette même cour a déclaré — dans *Boumediene c. Bush*, 128 S. Ct. 2229 (2008) — que les détenus de Guantanamo ont le droit constitutionnel de faire contrôler la légalité de leur détention par voie d'*habeas corpus*, et a annulé les dispositions de la *Military Commissions Act of 2006* qui avaient suspendu ce droit.)

[18] S'il est vrai que la procédure à laquelle est soumis M. Khadr a changé, la demande qu'il formule repose sur la série de faits survenus à Guantanamo — les interrogatoires et la communication d'éléments de preuve ayant eu lieu en 2003 et 2004 — que nous avons déjà examinée dans *Khadr 2008*. Nous sommes convaincus que les arguments sur lesquels nous nous sommes fondés dans cet arrêt pour conclure à l'application de la *Charte* aux actions de responsables canadiens à Guantanamo valent également pour la présente affaire.

2010 SCC 3 (CanLII)

2. Does the Conduct of the Canadian Government Deprive Mr. Khadr of the Right to Life, Liberty or Security of the Person?

[19] The United States is holding Mr. Khadr for the purpose of trying him on charges of war crimes. The United States is thus the primary source of the deprivation of Mr. Khadr's liberty and security of the person. However, the allegation on which his claim rests is that Canada has also contributed to his past and continuing deprivation of liberty. To satisfy the requirements of s. 7, as stated by this Court in *Suresh v. Canada (Minister of Citizenship and Immigration)*, 2002 SCC 1, [2002] 1 S.C.R. 3, there must be "a sufficient causal connection between [the Canadian] government's participation and the deprivation [of liberty and security of the person] ultimately effected" (para. 54).

[20] The record suggests that the interviews conducted by CSIS and DFAIT provided significant evidence in relation to these charges. During the February and September 2003 interrogations, CSIS officials repeatedly questioned Mr. Khadr about the central events at issue in his prosecution, extracting statements from him that could potentially prove inculpatory in the U.S. proceedings against him (CSIS Document, Exhibit "U" to Affidavit of Lt. Cdr. William Kuebler, November 7, 2003 (J.R., vol. II, at p. 280); Interview Summary, Exhibit "AA" to Affidavit of Lt. Cdr. William Kuebler, February 24, 2003 (J.R., vol. III, at p. 289); Interview Summary, Exhibit "BB" to Affidavit of Lt. Cdr. William Kuebler, February 17, 2003 (J.R., vol. III, at p. 292); Interview Summary, Exhibit "DD" to Affidavit of Lt. Cdr. William Kuebler, April 20, 2004 (J.R., vol. III, at p. 296)). A report of the Security Intelligence Review Committee titled *CSIS's Role in the Matter of Omar Khadr* (July 8, 2009), further indicated that CSIS assessed the interrogations of Mr. Khadr as being "highly successful, as evidenced by the quality intelligence information" elicited from Mr. Khadr (p. 13). These statements were shared with U.S. authorities and were summarized in U.S. investigative reports (Report of Investigative

2. La conduite du gouvernement canadien porte-t-elle atteinte aux droits de M. Khadr à la vie, à la liberté ou à la sécurité de sa personne?

[19] Les États-Unis détiennent M. Khadr en vue de lui faire subir un procès pour des accusations de crimes de guerre. Ils sont donc la source première de la privation de sa liberté et de la sécurité de sa personne. Toutefois, la demande de M. Khadr repose sur l'allégation selon laquelle le Canada a lui aussi contribué à l'atteinte passée et présente à sa liberté. Pour qu'il soit satisfait aux exigences de l'art. 7, il doit exister — comme l'a indiqué la Cour dans *Suresh c. Canada (Ministre de la Citoyenneté et de l'Immigration)*, 2002 CSC 1, [2002] 1 R.C.S. 3 — un « lien causal suffisant entre la participation de notre gouvernement et l'atteinte [à la liberté et à la sécurité de la personne] qui survient en bout de ligne » (par. 54).

[20] Le dossier indique que les interrogatoires menés par le SCRS et le MAECI ont fourni des éléments de preuve importants au sujet des accusations dont M. Khadr fait l'objet. Durant les interrogatoires menés en février et septembre 2003, des agents du SCRS ont interrogé M. Khadr à plusieurs reprises sur les faits essentiels en cause dans le cadre de la poursuite intentée contre lui. Ils lui ont en outre soutiré des déclarations potentiellement inculpatoires dans le cadre des instances introduites contre lui aux États-Unis (Document du SCRS, pièce « U », jointe à l'affidavit du Lt. Comm. William Kuebler, 7 novembre 2003 (D.C., vol. II, p. 280); Résumé de l'interrogatoire, pièce « AA », jointe à l'affidavit du Lt. Comm. William Kuebler, 24 février 2003 (D.C., vol. III, p. 289); Résumé de l'interrogatoire, pièce « BB », jointe à l'affidavit du Lt. Comm. William Kuebler, 17 février 2003 (D.C., vol. III, p. 292); Résumé de l'interrogatoire, pièce « DD », jointe à l'affidavit du Lt. Comm. William Kuebler, 20 avril 2004 (D.C., vol. III, p. 296)). Dans un rapport du Comité de surveillance des activités de renseignement de sécurité intitulé *Le rôle du SCRS dans l'affaire Omar Khadr* (8 juillet 2009), il est mentionné en outre que, selon le SCRS, les interrogatoires de M. Khadr ont été « très fructueu[x], comme le montrent les

2010 SCC 3 (CanLII)

Activity, Exhibit "AA" to Affidavit of Lt. Cdr. William Kuebler, February 24, 2003 (J.R., vol. III, at pp. 289 ff.)). Pursuant to the relaxed rules of evidence under the U.S. *Military Commissions Act of 2006*, Mr. Khadr's statements to Canadian officials are potentially admissible against him in the U.S. proceedings, notwithstanding the oppressive circumstances under which they were obtained: see *United States of America v. Jawad*, Military Commission, September 24, 2008, D-008 Ruling on Defense Motion to Dismiss — Torture of the Detainee (online: http://www.defense.gov/news/Ruling%20D-008.pdf). The above interrogations also provided the context for the March 2004 interrogation, when a DFAIT official, knowing that Mr. Khadr had been subjected to the "frequent flyer program" to make him less resistant to interrogations, nevertheless proceeded with the interrogation of Mr. Khadr (Interview Summary, Exhibit "DD" to Affidavit of Lt. Cdr. William Kuebler, April 20, 2004 (J.R., vol. III, at p. 296)).

renseignements secrets de qualité » qu'il a fournis (p. 14). Ces déclarations ont été communiquées aux autorités américaines et ont été résumées dans des rapports d'enquête américains (Rapport d'enquête, pièce « AA », jointe à l'affidavit du Lt. Comm. William Kuebler, 24 février 2003 (D.C., vol. III, p. 289 ff.)). Suivant les règles de preuve assouplies établies par la *Military Commissions Act of 2006* des États-Unis, les déclarations faites par M. Khadr aux responsables canadiens pourraient être admissibles dans le cadre des procédures intentées contre lui, en dépit des circonstances abusives dans lesquelles elles ont été obtenues : voir *United States of America c. Jawad*, commission militaire, 24 septembre 2008, Décision D-008 sur la requête en rejet présentée par la défense — Torture du détenu (en ligne : http://www.defense.gov/news/Ruling%20D-008.pdf). Les interrogatoires dont il a été question précédemment ont également préparé l'interrogatoire du mois de mars 2004 lors duquel un représentant du MAECI, sachant que M. Khadr avait été soumis au « programme grand voyageur » pour amoindrir sa résistance lors des interrogatoires, l'a néanmoins interrogé (Résumé de l'interrogatoire, pièce « DD », jointe à l'affidavit du Lt. Comm. William Kuebler, 20 avril 2004 (D.C., vol. III, p. 296)).

[21] An applicant for a *Charter* remedy must prove a *Charter* violation on a balance of probabilities (*R. v. Collins*, [1987] 1 S.C.R. 265, at p. 277). It is reasonable to infer from the uncontradicted evidence before us that the statements taken by Canadian officials are contributing to the continued detention of Mr. Khadr, thereby impacting his liberty and security interests. In the absence of any evidence to the contrary (or disclaimer rebutting this inference), we conclude on the record before us that Canada's active participation in what was at the time an illegal regime has contributed and continues to contribute to Mr. Khadr's current detention, which is the subject of his current claim. The causal connection demanded by *Suresh* between Canadian conduct and the deprivation of liberty and security of person is established.

[21] Celui qui sollicite une réparation fondée sur la *Charte* doit prouver la violation de celle-ci selon la prépondérance des probabilités (*R. c. Collins*, [1987] 1 R.C.S. 265, p. 277). Il est raisonnable de déduire de la preuve non contredite portée à notre connaissance que les déclarations recueillies par des responsables canadiens contribuent à la détention continue de M. Khadr, et ont ainsi une incidence sur ses droits à la liberté et à la sécurité. En l'absence d'éléments de preuve contraires (ou de dénégation réfutant cette inférence), nous concluons sur la foi du dossier dont nous sommes saisis que la participation active du Canada à un régime, illégal à l'époque, a contribué et continue de contribuer à la détention actuelle de M. Khadr, laquelle est l'objet de la demande sur laquelle nous sommes appelés à statuer. Le lien causal exigé par *Suresh* entre la conduite du Canada et la privation de la liberté et de la sécurité de la personne est établi.

2010 SCC 3 (CanLII)

3. Does the Deprivation Accord With the Principles of Fundamental Justice?

[22] We have concluded that the conduct of the Canadian government is sufficiently connected to the denial of Mr. Khadr's liberty and security of the person. This alone, however, does not establish a breach of Mr. Khadr's s. 7 rights under the *Charter*. To establish a breach, Mr. Khadr must show that this deprivation is not in accordance with the principles of fundamental justice.

[23] The principles of fundamental justice "are to be found in the basic tenets of our legal system": *Re B.C. Motor Vehicle Act*, [1985] 2 S.C.R. 486, at p. 503. They are informed by Canadian experience and jurisprudence, and take into account Canada's obligations and values, as expressed in the various sources of international human rights law by which Canada is bound. In *R. v. D.B.*, 2008 SCC 25, [2008] 2 S.C.R. 3, at para. 46, the Court (Abella J. for the majority) restated the criteria for identifying a new principle of fundamental justice in the following manner:

(1) It must be a legal principle.

(2) There must be a consensus that the rule or principle is fundamental to the way in which the legal system ought fairly to operate.

(3) It must be identified with sufficient precision to yield a manageable standard against which to measure deprivations of life, liberty or security of the person.

[24] We conclude that Canadian conduct in connection with Mr. Khadr's case did not conform to the principles of fundamental justice. That conduct may be briefly reviewed. The statements taken by CSIS and DFAIT were obtained through participation in a regime which was known at the time to have refused detainees the right to challenge the legality of detention by way of *habeas corpus*. It was also known that Mr. Khadr was 16 years old at the time

3. L'atteinte est-elle compatible avec les principes de justice fondamentale?

[22] Nous avons conclu à l'existence d'un lien suffisant entre la conduite du gouvernement canadien et la privation de la liberté et de la sécurité de sa personne subie par M. Khadr. Cela ne suffit cependant pas à établir une atteinte aux droits de ce dernier garantis par l'art. 7 de la *Charte*. En effet, pour prouver l'existence d'une atteinte, M. Khadr doit démontrer que la privation en question n'est pas compatible avec les principes de justice fondamentale.

[23] Les principes de justice fondamentale « se trouvent dans les préceptes fondamentaux de notre système juridique » : *Renvoi : Motor Vehicle Act (C.-B.)*, [1985] 2 R.C.S. 486, p. 503. Tirés de l'expérience et de la jurisprudence canadiennes, ils prennent en compte les obligations et les valeurs du Canada exprimées dans les diverses sources du droit international en matière de droits de la personne auxquelles le Canada est tenu de se conformer. Dans *R. c. D.B.*, 2008 CSC 25, [2008] 2 R.C.S. 3, par. 46, la Cour a réitéré, dans les termes suivants (sous la plume de la juge Abella qui a rédigé les motifs des juges majoritaires), les critères selon lesquels on peut confirmer l'existence d'un nouveau principe de justice fondamentale :

(1) Il doit s'agir d'un principe juridique.

(2) Il doit exister un consensus sur le fait que cette règle ou ce principe est essentiel au bon fonctionnement du système de justice.

(3) Ce principe doit être défini avec suffisamment de précision pour constituer une norme fonctionnelle permettant d'évaluer l'atteinte à la vie, à la liberté ou à la sécurité de la personne.

[24] Nous concluons que la conduite du Canada relative à la poursuite engagée contre M. Khadr a porté atteinte aux principes de justice fondamentale. Réexaminons brièvement cette conduite. Les déclarations recueillies par le SCRS et le MAECI ont été obtenues au moyen de la participation à un régime dont on savait à l'époque qu'il avait nié à des détenus le droit de contester la légalité de leur détention par voie d'*habeas corpus*. On savait

2010 SCC 3 (CanLII)

and that he had not had access to counsel or to any adult who had his best interests in mind. As held by this Court in *Khadr 2008*, Canada's participation in the illegal process in place at Guantanamo Bay clearly violated Canada's binding international obligations (*Khadr 2008*, at paras. 23-25; *Hamdan v. Rumsfeld*). In conducting their interviews, CSIS officials had control over the questions asked and the subject matter of the interviews (Transcript of cross-examination on Affidavit of Mr. Hooper, Exhibit "GG" to Affidavit of Lt. Cdr. William Kuebler, March 2, 2005 (J.R., vol. III, p. 313, at p. 22)). Canadian officials also knew that the U.S. authorities would have full access to the contents of the interrogations (as Canadian officials sought no restrictions on their use) by virtue of their audio and video recording (*CSIS's Role in the Matter of Omar Khadr*, at pp. 11-12). The purpose of the interviews was for intelligence gathering and not criminal investigation. While in some contexts there may be an important distinction between those interviews conducted for the purpose of intelligence gathering and those conducted in criminal investigations, here, the distinction loses its significance. Canadian officials questioned Mr. Khadr on matters that may have provided important evidence relating to his criminal proceedings, in circumstances where they knew that Mr. Khadr was being indefinitely detained, was a young person and was alone during the interrogations. Further, the March 2004 interview, where Mr. Khadr refused to answer questions, was conducted knowing that Mr. Khadr had been subjected to three weeks of scheduled sleep deprivation, a measure described by the U.S. Military Commission in *Jawad* as designed to "make [detainees] more compliant and break down their resistance to interrogation" (para. 4).

[25] This conduct establishes Canadian participation in state conduct that violates the principles of fundamental justice. Interrogation of a youth,

également que M. Khadr était alors âgé de 16 ans et qu'il n'avait pas pu consulter un avocat ou tout autre adulte qui aurait eu son intérêt à cœur. Comme l'a déclaré la Cour dans *Khadr 2008*, la participation du Canada à la procédure illégale engagée à Guantanamo contrevenait manifestement aux obligations internationales du Canada (*Khadr 2008*, par. 23-25; *Hamdan c. Rumsfeld*). En menant leurs interrogatoires, les agents du SCRS étaient ceux qui décidaient des questions posées et du sujet traité (Transcription du contre-interrogatoire relatif à l'affidavit de M. Hooper, pièce « GG », jointe à l'affidavit du Lt. Comm. William Kuebler, 2 mars 2005 (D.C., vol. III, p. 313, p. 22)). Les responsables canadiens savaient aussi que les autorités américaines auraient un accès illimité à la teneur des interrogatoires grâce aux enregistrements audio et vidéo qui en étaient faits, puisque les responsables canadiens n'ont pas cherché à en restreindre l'usage (*Le rôle du SCRS dans l'affaire Omar Khadr*, p. 12-13). Les interrogatoires visaient à recueillir des renseignements secrets et non pas à faire progresser une enquête criminelle. Même si, dans certains contextes, il peut exister d'importantes différences entre les interrogatoires menés en vue de colliger des renseignements secrets et ceux menés dans le cadre d'enquêtes criminelles, en l'espèce, ces différences perdent leur importance. Les responsables canadiens ont interrogé M. Khadr sur des sujets qui pourraient avoir permis de recueillir des éléments de preuve importants pour les procédures criminelles intentées contre lui, dans des circonstances où ces responsables savaient que M. Khadr était détenu pour une période indéterminée, qu'il était un adolescent et qu'il était seul durant les interrogatoires. En outre, l'interrogatoire mené en mars 2004 — au cours duquel M. Khadr a refusé de répondre aux questions — s'est déroulé alors qu'on savait que celui-ci avait été soumis à trois semaines de privation planifiée de sommeil, une mesure décrite par la commission militaire américaine dans *Jawad* comme visant à [TRADUCTION] « rendre [les détenus] plus dociles et à venir à bout de leur résistance à l'interrogatoire » (par. 4).

[25] Ces faits établissent la participation du Canada à une conduite étatique violant les principes de justice fondamentale. Le fait d'avoir interrogé un

2010 SCC 3 (CanLII)

to elicit statements about the most serious criminal charges while detained in these conditions and without access to counsel, and while knowing that the fruits of the interrogations would be shared with the U.S. prosecutors, offends the most basic Canadian standards about the treatment of detained youth suspects.

[26] We conclude that Mr. Khadr has established that Canada violated his rights under s. 7 of the *Charter.*

B. *Is the Remedy Sought Appropriate and Just in All the Circumstances?*

[27] In previous proceedings (*Khadr 2008*), Mr. Khadr obtained the remedy of disclosure of the material gathered by Canadian officials against him through the interviews at Guantanamo Bay. The issue on this appeal is whether the breach of s. 7 of the *Charter* entitles Mr. Khadr to the remedy of an order that Canada request of the United States that he be returned to Canada. Two questions arise at this stage: (1) Is the remedy sought sufficiently connected to the breach? and (2) Is the remedy sought precluded by the fact that it touches on the Crown prerogative power over foreign affairs?

[28] The judge at first instance held that the remedy sought was open to him. The Federal Court of Appeal held that he did not abuse his remedial discretion. On the basis of our answer to the second of the foregoing questions, we conclude that the trial judge, on the record before us, erred in the exercise of his discretion in granting the remedy sought.

[29] First, is the remedy sought sufficiently connected to the breach? We have concluded that the Canadian government breached Mr. Khadr's s. 7 rights in 2003 and 2004 through its participation

adolescent, pour lui soutirer des déclarations relatives aux accusations criminelles les plus sérieuses qui soient, alors qu'il était détenu dans ces conditions et qu'il ne pouvait pas consulter un avocat et même si l'on savait que les fruits des interrogatoires seraient communiqués aux procureurs américains, contrevient aux normes canadiennes les plus élémentaires quant aux traitements à accorder aux suspects adolescents détenus.

[26] Nous concluons que M. Khadr a établi que le Canada a enfreint les droits qui lui sont garantis par l'art. 7 de la *Charte.*

B. *La réparation demandée est-elle convenable et juste eu égard à toutes les circonstances?*

[27] Dans une instance antérieure (*Khadr 2008*), M. Khadr a obtenu, à titre de réparation, la communication de l'information recueillie contre lui par des responsables canadiens à la faveur d'interrogatoires ayant eu lieu à Guantanamo. Dans le présent pourvoi, il s'agit de savoir si la violation de l'art. 7 de la *Charte* permet à M. Khadr d'obtenir la réparation consistant en une ordonnance intimant au Canada de demander aux États-Unis son renvoi au Canada. Deux questions se posent à ce stade : (1) Existe-t-il un lien causal suffisant entre la violation et la réparation demandée? (2) Le fait que la réparation sollicitée touche la prérogative royale en matière d'affaires étrangères fait-il obstacle à cette réparation?

[28] Le juge de première instance a conclu qu'il pouvait accorder la réparation demandée. La Cour d'appel fédérale a estimé qu'il n'avait pas abusé de son pouvoir discrétionnaire en matière de réparation. Étant donné notre réponse à la seconde des questions énoncées précédemment, nous arrivons à la conclusion que, sur la foi du dossier dont nous sommes saisis, le juge de première instance a commis une erreur dans l'exercice de son pouvoir discrétionnaire en accordant la réparation demandée.

[29] Premièrement, la réparation demandée a-t-elle un lien suffisant avec la violation? Nous avons conclu que le gouvernement canadien a violé les droits garantis à M. Khadr par l'art. 7, en raison

2010 SCC 3 (CanLII)

in the then-illegal military regime at Guantanamo Bay. The question at this point is whether the remedy now being sought — an order that the Canadian government ask the United States to return Mr. Khadr to Canada — is appropriate and just in the circumstances.

[30] An appropriate and just remedy is "one that meaningfully vindicates the rights and freedoms of the claimants": *Doucet-Boudreau v. Nova Scotia (Minister of Education)*, 2003 SCC 62, [2003] 3 S.C.R. 3, at para. 55. The first hurdle facing Mr. Khadr, therefore, is to establish a sufficient connection between the breaches of s. 7 that occurred in 2003 and 2004 and the order sought in these judicial review proceedings. In our view, the sufficiency of this connection is established by the continuing effect of these breaches into the present. Mr. Khadr's *Charter* rights were breached when Canadian officials contributed to his detention by virtue of their interrogations at Guantanamo Bay knowing Mr. Khadr was a youth, did not have access to legal counsel or *habeas corpus* at that time and, at the time of the interview in March 2004, had been subjected to improper treatment by the U.S. authorities. As the information obtained by Canadian officials during the course of their interrogations may be used in the U.S. proceedings against Mr. Khadr, the effect of the breaches cannot be said to have been spent. It continues to this day. As discussed earlier, the material that Canadian officials gathered and turned over to the U.S. military authorities may form part of the case upon which he is currently being held. The evidence before us suggests that the material produced was relevant and useful. There has been no suggestion that it does not form part of the case against Mr. Khadr or that it will not be put forward at his ultimate trial. We therefore find that the breach of Mr. Khadr's s. 7 *Charter* rights remains ongoing and that the remedy sought could potentially vindicate those rights.

de sa participation, en 2003 et 2004, au régime militaire de Guantanamo, alors illégal. La question qui se pose à cette étape de l'analyse est celle de savoir si la réparation maintenant demandée — soit une ordonnance intimant au gouvernement canadien de demander aux États-Unis le renvoi de M. Khadr au Canada — est convenable et juste eu égard aux circonstances.

[30] Une réparation convenable et juste est « celle qui permet de défendre utilement les droits et libertés du demandeur » : *Doucet-Boudreau c. Nouvelle-Écosse (Ministre de l'Éducation)*, 2003 CSC 62, [2003] 3 R.C.S. 3, par. 55. Ainsi, M. Khadr doit tout d'abord réussir à établir l'existence d'un lien suffisant entre les violations de l'art. 7 survenues en 2003 et 2004 et l'ordonnance sollicitée dans le cadre de la demande de contrôle judiciaire qu'il a formulée. Selon nous, l'existence d'un lien suffisant est établie par le fait que les incidences de ces violations persistent jusqu'à présent. Les droits de M. Khadr garantis par la *Charte* ont été violés lorsque des responsables canadiens ont contribué à sa détention par les interrogatoires qu'ils ont menés à Guantanamo, tout en sachant qu'il était un adolescent, qu'il n'avait alors pas accès à un avocat ou à un recours en *habeas corpus* et qu'au moment où s'est déroulé l'interrogatoire du mois de mars 2004, il avait été soumis à des traitements inappropriés par les autorités américaines. Comme l'information recueillie par les responsables canadiens lors de leurs interrogatoires pourrait être utilisée dans le cadre des procédures américaines engagées contre M. Khadr, on ne peut pas dire que les effets des violations ont cessé. Ils se poursuivent à ce jour. Comme nous l'avons indiqué, il est possible que l'information obtenue par les responsables canadiens et transmise aux autorités militaires américaines fasse partie du dossier en vertu duquel il est actuellement détenu. La preuve dont nous disposons donne à penser que l'information en question était pertinente et utile. Les parties n'ont pas suggéré qu'elle ne fait pas partie du dossier colligé contre M. Khadr ou qu'elle ne sera pas produite lorsque son procès sera finalement tenu. Nous concluons donc que la violation des droits garantis à M. Khadr par l'art. 7 de la *Charte* est toujours en cours et que la réparation sollicitée pourrait défendre ces droits.

2010 SCC 3 (CanLII)

[31] The acts that perpetrated the *Charter* breaches relied on in this appeal lie in the past. But their impact on Mr. Khadr's liberty and security continue to this day and may redound into the future. The impact of the breaches is thus perpetuated into the present. When past acts violate present liberties, a present remedy may be required.

[31] Les actions à l'origine des violations de la *Charte* invoquées dans le présent pourvoi appartiennent au passé. Mais leurs effets sur la liberté et la sécurité de M. Khadr persistent à ce jour et pourraient avoir des répercussions à l'avenir. Les effets des violations se perpétuent ainsi dans le présent. Lorsque des actions passées violent des libertés actuelles, une réparation actuelle peut être requise.

[32] We conclude that the necessary connection between the breaches of s. 7 and the remedy sought has been established for the purpose of these judicial review proceedings.

[32] Nous concluons que le lien nécessaire entre les violations de l'art. 7 et la réparation demandée a été établi aux fins de la présente demande de contrôle judiciaire.

[33] Second, is the remedy sought precluded by the fact that it touches on the Crown prerogative over foreign affairs? A connection between the remedy and the breach is not the only consideration. As stated in *Doucet-Boudreau*, an appropriate and just remedy is also one that "must employ means that are legitimate within the framework of our constitutional democracy" (para. 56) and must be a "judicial one which vindicates the right while invoking the function and powers of a court" (para. 57). The government argues that courts have no power under the Constitution of Canada to require the executive branch of government to do anything in the area of foreign policy. It submits that the decision not to request the repatriation of Mr. Khadr falls directly within the prerogative powers of the Crown to conduct foreign relations, including the right to speak freely with a foreign state on all such matters: P. W. Hogg, *Constitutional Law of Canada* (5th ed. Supp.), at p. 1-19.

[33] Deuxièmement, le fait que la réparation demandée touche la prérogative royale en matière d'affaires étrangères fait-il obstacle à cette réparation? L'existence d'un lien entre la réparation et la violation n'est pas le seul facteur à prendre en considération. Comme l'énonce l'arrêt *Doucet-Boudreau*, la réparation convenable et juste est celle qui, en outre, « fait appel à des moyens légitimes dans le cadre de notre démocratie constitutionnelle » (par. 56) et doit être une réparation « judiciaire qui défend le droit en cause tout en mettant à contribution le rôle et les pouvoirs d'un tribunal » (par. 57). Le gouvernement fait valoir que la Constitution du Canada ne confère pas aux tribunaux le pouvoir d'exiger de la branche exécutive du gouvernement qu'elle fasse quoi que ce soit dans le domaine de la politique étrangère. Selon lui, la décision de ne pas demander le rapatriement de M. Khadr relève directement de la prérogative de la Couronne de conduire les relations internationales, prérogative qui comprend le droit de parler librement avec un État étranger de toutes ces questions : P. W. Hogg, *Constitutional Law of Canada* (5e éd. suppl.), p. 1-19.

[34] The prerogative power is the "residue of discretionary or arbitrary authority, which at any given time is legally left in the hands of the Crown": *Reference as to the Effect of the Exercise of the Royal Prerogative of Mercy Upon Deportation Proceedings*, [1933] S.C.R. 269, at p. 272, *per* Duff C.J., quoting A. V. Dicey, *Introduction to the Study*

[34] La prérogative royale est [TRADUCTION] « le résidu du pouvoir discrétionnaire ou arbitraire dont la Couronne est légalement investie à tout moment » : *Reference as to the Effect of the Exercise of the Royal Prerogative of Mercy Upon Deportation Proceedings*, [1933] R.C.S. 269, p. 272, le juge en chef Duff, citant A. V Dicey,

2010 SCC 3 (CanLII)

of the Law of the Constitution (8th ed. 1915), at p. 420. It is a limited source of non-statutory administrative power accorded by the common law to the Crown: Hogg, at p. 1-17.

[35] The prerogative power over foreign affairs has not been displaced by s. 10 of the *Department of Foreign Affairs and International Trade Act*, R.S.C. 1985, c. E-22, and continues to be exercised by the federal government. The Crown prerogative in foreign affairs includes the making of representations to a foreign government: *Black v. Canada (Prime Minister)* (2001), 199 D.L.R. (4th) 228 (Ont. C.A.). We therefore agree with O'Reilly J.'s implicit finding (paras. 39, 40 and 49) that the decision not to request Mr. Khadr's repatriation was made in the exercise of the prerogative over foreign relations.

[36] In exercising its common law powers under the royal prerogative, the executive is not exempt from constitutional scrutiny: *Operation Dismantle v. The Queen*, [1985] 1 S.C.R. 441. It is for the executive and not the courts to decide whether and how to exercise its powers, but the courts clearly have the jurisdiction and the duty to determine whether a prerogative power asserted by the Crown does in fact exist and, if so, whether its exercise infringes the *Charter* (*Operation Dismantle*) or other constitutional norms (*Air Canada v. British Columbia (Attorney General)*, [1986] 2 S.C.R. 539).

[37] The limited power of the courts to review exercises of the prerogative power for constitutionality reflects the fact that in a constitutional democracy, all government power must be exercised in accordance with the Constitution. This said, judicial review of the exercise of the prerogative power for constitutionality remains sensitive to the fact that the executive branch of government is responsible for decisions under this power, and that the executive is better placed to make such decisions

Introduction to the Study of the Law of the Constitution (8e éd. 1915), p. 420. Il s'agit d'une source limitée de pouvoir administratif ne découlant pas de la législation, que confère la common law à la Couronne : Hogg, p. 1-17.

[35] La prérogative royale en matière d'affaires étrangères n'a pas été supplantée par l'art. 10 de la *Loi sur le ministère des Affaires étrangères et du Commerce international*, L.R.C. 1985, ch. E-22, et continue d'être exercée par le gouvernement fédéral. Elle comprend le pouvoir de faire des observations à un gouvernement étranger : *Black c. Canada (Prime Minister)* (2001), 199 D.L.R. (4th) 228 (C.A. Ont.). Nous sommes donc d'accord avec la conclusion implicite du juge O'Reilly (par. 39, 40 et 49) selon laquelle la décision de ne pas demander le rapatriement de M. Khadr a été prise dans l'exercice de la prérogative en matière de relations étrangères.

[36] Lorsqu'il exerce les pouvoirs que lui confère la common law en vertu de la prérogative royale, l'exécutif n'est toutefois pas à l'abri du contrôle constitutionnel : *Operation Dismantle c. La Reine*, [1985] 1 R.C.S. 441. Certes, il revient à l'exécutif, et non aux tribunaux, de décider si et comment il exercera ses pouvoirs; mais les tribunaux ont indéniablement compétence pour déterminer si la prérogative invoquée par la Couronne existe véritablement et, dans l'affirmative, pour décider si son exercice contrevient à la *Charte* (*Operation Dismantle*) ou à d'autres normes constitutionnelles (*Air Canada c. Colombie-Britannique (Procureur général)*, [1986] 2 R.C.S. 539) — ils sont d'ailleurs tenus d'exercer cette compétence.

[37] Le pouvoir restreint dont jouissent les tribunaux pour contrôler la constitutionnalité de l'exercice de la prérogative royale tient au fait que, dans une démocratie constitutionnelle, tout pouvoir gouvernemental doit être exercé en conformité avec la Constitution. Cela dit, le contrôle judiciaire de l'exercice de la prérogative sur le plan de sa constitutionnalité demeure tributaire du fait que la branche exécutive du gouvernement est responsable des décisions relevant de ce pouvoir, et que

2010 SCC 3 (CanLII)

within a range of constitutional options. The government must have flexibility in deciding how its duties under the power are to be discharged: see, e.g., *Reference re Secession of Quebec*, [1998] 2 S.C.R. 217, at paras. 101-2. But it is for the courts to determine the legal and constitutional limits within which such decisions are to be taken. It follows that in the case of refusal by a government to abide by constitutional constraints, courts are empowered to make orders ensuring that the government's foreign affairs prerogative is exercised in accordance with the constitution: *United States v. Burns*, 2001 SCC 7, [2001] 1 S.C.R. 283.

[38] Having concluded that the courts possess a narrow power to review and intervene on matters of foreign affairs to ensure the constitutionality of executive action, the final question is whether O'Reilly J. misdirected himself in exercising that power in the circumstances of this case (*R. v. Bjelland*, 2009 SCC 38, [2009] 2 S.C.R. 651, at para. 15; *R. v. Regan*, 2002 SCC 12, [2002] 1 S.C.R. 297, at paras. 117-18). (In fairness to the trial judge, we note that the government proposed no alternative (trial judge's reasons, at para. 78).) If the record and legal principle support his decision, deference requires we not interfere. However, in our view that is not the case.

[39] Our first concern is that the remedy ordered below gives too little weight to the constitutional responsibility of the executive to make decisions on matters of foreign affairs in the context of complex and ever-changing circumstances, taking into account Canada's broader national interests. For the following reasons, we conclude that the appropriate remedy is to declare that, on the record before the Court, Canada infringed Mr. Khadr's s. 7 rights, and to leave it to the government to decide how best to respond to this judgment in light of

l'exécutif est mieux placé pour prendre ces décisions dans le cadre des choix constitutionnels possibles. Il faut que le gouvernement dispose d'une certaine marge de manœuvre lorsqu'il décide de quelle manière il doit s'acquitter des obligations relevant de sa prérogative : voir, p. ex., *Renvoi relatif à la sécession du Québec*, [1998] 2 R.C.S. 217, par. 101-102. Il appartient cependant aux tribunaux de fixer les limites légales et constitutionnelles à l'intérieur desquelles ces décisions doivent être prises. Ainsi, lorsqu'un gouvernement refuse de se conformer aux contraintes constitutionnelles, les tribunaux ont le pouvoir de rendre des ordonnances qui garantissent que la prérogative du gouvernement en matière d'affaires étrangères est exercée en conformité avec la Constitution : *États-Unis c. Burns*, 2001 CSC 7, [2001] 1 R.C.S. 283.

[38] Après avoir conclu que les tribunaux jouissent d'un pouvoir circonscrit pour examiner les questions relatives aux affaires étrangères et intervenir à leur égard — de façon à s'assurer de la constitutionnalité de l'action de l'exécutif — il nous reste une question à trancher : le juge O'Reilly s'est-il fondé sur des considérations erronées en exerçant ce pouvoir dans les circonstances de l'espèce? (*R. c. Bjelland*, 2009 CSC 38, [2009] 2 R.C.S. 651, par. 15; *R. c. Regan*, 2002 CSC 12, [2002] 1 R.C.S. 297, par. 117-118) (Par souci d'équité envers le juge du procès, nous précisons que le gouvernement n'a proposé aucune solution de rechange (motifs du juge du procès, par. 78).) Si sa décision est justifiable au regard du dossier et des principes de droit, la déférence nous oblige à ne pas intervenir. À notre avis, tel n'est toutefois pas le cas.

[39] Nous estimons tout d'abord que la réparation ordonnée par les juridictions d'instances inférieures accorde un poids insuffisant à la responsabilité constitutionnelle de l'exécutif de prendre des décisions concernant les affaires étrangères dans le contexte de circonstances complexes et en fluctuation constante, en tenant compte des intérêts nationaux plus larges du Canada. Pour les motifs suivants, nous concluons que la réparation appropriée consiste, d'une part, à déclarer que, selon le dossier dont la Cour est saisie, le Canada a porté

2010 SCC 3 (CanLII)

current information, its responsibility for foreign affairs, and in conformity with the *Charter.*

[40] As discussed, the conduct of foreign affairs lies with the executive branch of government. The courts, however, are charged with adjudicating the claims of individuals who claim that their *Charter* rights have been or will be violated by the exercise of the government's discretionary powers: *Operation Dismantle*.

[41] In some situations, courts may give specific directions to the executive branch of the government on matters touching foreign policy. For example, in *Burns*, the Court held that it would offend s. 7 to extradite a fugitive from Canada without seeking and obtaining assurances from the requesting state that the death penalty would not be imposed. The Court gave due weight to the fact that seeking and obtaining those assurances were matters of Canadian foreign relations. Nevertheless, it ordered that the government seek them.

[42] The specific facts in *Burns* justified a more specific remedy. The fugitives were under the control of Canadian officials. It was clear that assurances would provide effective protection against the prospective *Charter* breaches: it was entirely within Canada's power to protect the fugitives against possible execution. Moreover, the Court noted that no public purpose would be served by extradition without assurances that would not be substantially served by extradition with assurances, and that there was nothing to suggest that seeking such assurances would undermine Canada's good relations with other states: *Burns*, at paras. 125 and 136.

[43] The present case differs from *Burns*. Mr. Khadr is not under the control of the Canadian

atteinte aux droits garantis à M. Khadr par l'art. 7, et, d'autre part, à laisser au gouvernement le soin de décider de quelle manière il convient de répondre au présent arrêt à la lumière de l'information dont il dispose actuellement et de sa responsabilité en matière d'affaires étrangères et ce, en conformité avec la *Charte*.

[40] Comme nous l'avons indiqué, la conduite des affaires étrangères relève de la branche exécutive du gouvernement. Il incombe en revanche aux tribunaux de statuer sur les actions intentées par des individus qui estiment que l'exercice par le gouvernement de ses pouvoirs discrétionnaires a porté ou portera atteinte à leurs droits garantis par la *Charte* : *Operation Dismantle*.

[41] Dans certaines situations, les tribunaux peuvent donner à la branche exécutive du gouvernement des directives spécifiques sur des questions ayant trait à la politique étrangère. À titre d'exemple, la Cour a conclu, dans *Burns*, qu'il serait contraire à l'art. 7 d'extrader un fugitif du Canada sans demander à l'État requérant, et sans obtenir de lui, la garantie que la peine de mort ne sera pas infligée. Elle a dûment pris en compte le fait que la demande et l'obtention de telles assurances relevaient des relations étrangères du Canada. Elle a néanmoins ordonné au gouvernement de les demander.

[42] Les faits particuliers de l'affaire *Burns* justifiaient une réparation de nature plus spécifique. En effet, les fugitifs se trouvaient sous le contrôle des autorités canadiennes. Il était évident que les assurances conféreraient une protection efficace contre une violation éventuelle de la *Charte* : le Canada avait tout à fait le pouvoir de protéger les fugitifs contre une exécution possible. En outre, la Cour a signalé qu'aucun objectif d'intérêt public que servirait l'extradition sans assurances ne serait pas également servi de façon substantielle par une extradition assortie d'assurances; rien n'indiquait non plus que le fait de demander de telles assurances nuirait aux bonnes relations du Canada avec d'autres États : *Burns*, par. 125 et 136.

[43] La présente affaire est différente de *Burns*. L'intimé n'est pas sous le contrôle du gouvernement

2010 SCC 3 (CanLII)

government; the likelihood that the proposed remedy will be effective is unclear; and the impact on Canadian foreign relations of a repatriation request cannot be properly assessed by the Court.

[44] This brings us to our second concern: the inadequacy of the record. The record before us gives a necessarily incomplete picture of the range of considerations currently faced by the government in assessing Mr. Khadr's request. We do not know what negotiations may have taken place, or will take place, between the U.S. and Canadian governments over the fate of Mr. Khadr. As observed by Chaskalson C.J. in *Kaunda v. President of the Republic of South Africa*, [2004] ZACC 5, 136 I.L.R. 452, at para. 77: "The timing of representations if they are to be made, the language in which they should be couched, and the sanctions (if any) which should follow if such representations are rejected are matters with which courts are ill-equipped to deal." It follows that in these circumstances, it would not be appropriate for the Court to give direction as to the diplomatic steps necessary to address the breaches of Mr. Khadr's *Charter* rights.

[45] Though Mr. Khadr has not been moved from Guantanamo Bay in over seven years, his legal predicament continues to evolve. During the hearing of this appeal, we were advised by counsel that the U.S. Department of Justice had decided that Mr. Khadr will continue to face trial by military commission, though other Guantanamo detainees will now be tried in a federal court in New York. How this latest development will affect Mr. Khadr's situation and any ongoing negotiations between the United States and Canada over his possible repatriation is unknown. But it signals caution in the exercise of the Court's remedial jurisdiction.

[46] In this case, the evidentiary uncertainties, the limitations of the Court's institutional competence,

canadien; l'efficacité de la réparation proposée est incertaine; et la Cour n'est pas en mesure d'évaluer correctement les conséquences d'une demande de rapatriement sur les relations étrangères du Canada.

[44] Cela nous amène à notre deuxième objection : le caractère inadéquat du dossier. Celui dont nous disposons nous donne une image forcément incomplète de l'ensemble des considérations auxquelles le gouvernement fait actuellement face pour juger de la demande de M. Khadr. Nous ne savons pas quelles négociations ont pu avoir lieu, ou auront lieu, entre les gouvernements des États-Unis et du Canada sur le sort de M. Khadr. Comme l'a observé le juge en chef Chaskalson dans *Kaunda c. President of the Republic of South Africa*, [2004] ZACC 5, 136 I.L.R. 452, par. 77 : [TRADUCTION] « Le moment choisi pour présenter des observations, s'il y a lieu d'en présenter, les termes dans lesquels elles devraient être formulées, et les sanctions qui (le cas échéant) devraient suivre si lesdites observations sont rejetées, sont des questions que les tribunaux ne sont pas véritablement en mesure de trancher. » Dans les circonstances, il ne serait donc pas opportun que la Cour donne des directives quant aux mesures diplomatiques qu'il faudrait prendre pour remédier aux violations des droits de l'intimé garantis par la *Charte*.

[45] Bien que M. Khadr soit détenu à Guantanamo depuis plus de sept ans, la situation juridique difficile dans laquelle il se trouve continue d'évoluer. Selon les représentations des avocats lors de l'audition du présent pourvoi, le ministère de la Justice des États-Unis a décidé que M. Khadr sera jugé, comme prévu, par une commission militaire, même si d'autres détenus de Guantanamo subiront plutôt leur procès devant une cour fédérale à New York. On ignore quelle sera l'incidence de ces nouvelles circonstances sur la situation de M. Khadr et sur les négociations qui pourraient être en cours entre les États-Unis et le Canada quant à son possible rapatriement. Ces faits incitent toutefois la Cour à faire preuve de prudence dans l'exercice de son pouvoir de réparation.

[46] En l'espèce, les incertitudes au chapitre de la preuve, les limites de la compétence institutionnelle

2010 SCC 3 (CanLII)

and the need to respect the prerogative powers of the executive, lead us to conclude that the proper remedy is declaratory relief. A declaration of unconstitutionality is a discretionary remedy: *Operation Dismantle*, at p. 481, citing *Solosky v. The Queen*, [1980] 1 S.C.R. 821. It has been recognized by this Court as "an effective and flexible remedy for the settlement of real disputes": *R. v. Gamble*, [1988] 2 S.C.R. 595, at p. 649. A court can properly issue a declaratory remedy so long as it has the jurisdiction over the issue at bar, the question before the court is real and not theoretical, and the person raising it has a real interest to raise it. Such is the case here.

de la Cour et la nécessité de respecter les prérogatives de l'exécutif nous amènent à conclure que la réparation appropriée est de nature déclaratoire. Le jugement déclaratoire d'inconstitutionnalité est un redressement discrétionnaire : *Operation Dismantle*, p. 481, citant *Solosky c. La Reine*, [1980] 1 R.C.S. 821. Notre Cour a reconnu qu'il s'agit d'une « forme efficace et souple de règlement des véritables litiges » : *R. c. Gamble*, [1988] 2 R.C.S. 595, p. 649. Un tribunal peut, à juste titre, prononcer un jugement déclaratoire dans la mesure où il a compétence sur l'objet du litige, où la question dont il est saisi est une question réelle et non pas simplement théorique, et où la personne qui la soulève a véritablement intérêt à la soulever. C'est le cas en l'espèce.

[47] The prudent course at this point, respectful of the responsibilities of the executive and the courts, is for this Court to allow Mr. Khadr's application for judicial review in part and to grant him a declaration advising the government of its opinion on the records before it which, in turn, will provide the legal framework for the executive to exercise its functions and to consider what actions to take in respect of Mr. Khadr, in conformity with the *Charter.*

[47] La solution à la fois prudente pour l'instant et respectueuse des responsabilités de l'exécutif et des tribunaux consiste à ce que la Cour fasse droit en partie à la demande de contrôle judiciaire présentée par M. Khadr et prononce un jugement déclaratoire en sa faveur informant le gouvernement de son opinion sur le dossier dont elle est saisie, opinion qui fournira, pour sa part, à l'exécutif, le cadre juridique en vertu duquel il devra exercer ses fonctions et examiner les mesures qu'il conviendra de prendre à l'égard de M. Khadr, en conformité avec la *Charte.*

IV. Conclusion

IV. Conclusion

[48] The appeal is allowed in part. Mr. Khadr's application for judicial review is allowed in part. This Court declares that through the conduct of Canadian officials in the course of interrogations in 2003-2004, as established on the evidence before us, Canada actively participated in a process contrary to Canada's international human rights obligations and contributed to Mr. Khadr's ongoing detention so as to deprive him of his right to liberty and security of the person guaranteed by s. 7 of the *Charter*, contrary to the principles of fundamental justice. Costs are awarded to Mr. Khadr.

[48] Le pourvoi est accueilli en partie. La demande de contrôle judiciaire de M. Khadr est accueillie en partie. La Cour déclare que, compte tenu de la conduite de responsables canadiens lors d'interrogatoires menés en 2003 et 2004, telle qu'elle est établie par la preuve, le Canada a activement participé à un processus contraire aux obligations internationales qui lui incombent en matière de droits de la personne et a contribué à la détention continue de M. Khadr, de telle sorte qu'il a porté atteinte aux droits à la liberté et à la sécurité de sa personne que lui garantit l'art. 7 de la *Charte* et ce, de manière incompatible avec les principes de justice fondamentale. M. Khadr a droit aux dépens.

Appeal allowed in part with costs to the respondent.

James Prentice, PC, QC, As President of Executive Council of the Province of Alberta

Respondent

Reasons for Judgment
of the
Honourable Mr. Justice S.N. Mandziuk

I. Introduction

[1] The *Election Act*, RSA 2000, c E-1, was amended in 2011 by Bill 21, the *Election Amendment Act, 2011*, SA 2011, c 19, to add s 38.1. Section 38.1 specifies a time period during which provincial general elections are to be held in Alberta. It reads as follows:

> 38.1 (1) Nothing in this section affects the powers of the Lieutenant Governor, including the power to dissolve the Legislature, in Her Majesty's name, when the Lieutenant Governor sees fit.
>
> (2) Subject to subsection (1), general elections shall be held within the 3-month period beginning on March 1 and ending on May 31 in the 4th calendar year following polling day in the most recent general election.

Minister Olson did allude to the eventuality that an election could be held outside the Fixed Election Period. While it is unnecessary to comment on the Applicants' claim that the *Election Amendment Act, 2011* "was an elaborate deception, backed by deliberate lies", I cannot endorse the Applicants' claim that statements made in the Legislature represent a binding promise to Albertans. While departing from the spirit of the legislation may have political consequences, as acknowledged by Minister Olson in proposing second reading of the Bill on November 22, 2011, a promise or representation by government is not actionable or justiciable: ***Canadian Taxpayers Federation v Ontario***, 2004 CanLII 48177, 73 OR (3d) 621 at paras 51-71 (SC); ***Giacomelli v Canada (Attorney General)***, 2005 CanLII 49204, [2005] OJ No 5677 at para 9 (SC); ***Hogan v Newfoundland (Attorney General)***, 2000 NFCA 12, 183 DLR (4th) 225 at para 38; ***Reference Re Canada Assistance Plan***, [1991] 2 SCR 525 at paras 64, 72.

[74] Moreover, whether this amendment had the purpose argued by the Applicants, is not a justiciable issue.

[75] I agree with the Applicants that the courts are in the business of enforcing the rule of law, one aspect of which is "executive accountability to legal authority" and protecting "individuals from arbitrary [executive] action": ***Reference Re Secession of Quebec***, [1998] 2 SCR 217 at para 70. But, in rare cases, exercises of executive power are suffused with ideological, political, cultural, social, moral and historical concerns and assessing whether the executive has acted within a range of acceptability and defensibility is beyond the courts' ken or capability, and pushing courts beyond their proper role within the separation of powers: ***Operation Dismantle v Canada***, [1985] 1 SCR 441 at 459-460 and 465; ***Canada (Auditor General) v Canada (Minister of Energy, Mines and Resources)***, [1989] 2 SCR 49 at 90-91; ***Black***, at paras 50-51.

[76] In ***Khadr***, the Supreme Court of Canada discussed the limited role of the courts to review the exercise of Crown Prerogative, stating at para 37:

> The limited power of the courts to review exercises of the prerogative power for constitutionality reflects the fact that in a constitutional democracy, all government power must be exercised in accordance with the Constitution. This said, judicial review of the exercise of the prerogative power for constitutionality remains sensitive to the fact that the executive branch of government is responsible for decisions under this power, and that the executive is better placed to make such decisions within a range of constitutional options. The government must have flexibility in deciding how its duties under the power are to be discharged: see, e.g., *Reference re Secession of Quebec*, [1998] 2 S.C.R. 217, at paras. 101-2. But it is for the courts to determine the legal and constitutional limits within which such decisions are to be taken. It follows that in the case of refusal by a government to abide by constitutional constraints, courts are empowered to make orders ensuring that the government's foreign affairs prerogative is exercised in accordance with the constitution: *United States v. Burns*, [2001] 1 S.C.R. 283.

[77] The Applicants cite the Ontario Court of Appeal's decision in ***Black*** at paras 45-48 in support of their claim that the courts may review the exercise of Crown Prerogative. However, in ***Black***, the Court also clearly stated the following at para 58:

> So characterized, it is plain and obvious that the Prime Minister's exercise of the honours prerogative is not judicially reviewable. Indeed, in the *Civil Service*

2019 ABQB 490 (CanLII)

> *Unions* case, Lord Roskill listed a number of exercises of the prerogative power whose subject matters were by their very nature not justiciable. Included in the list was the grant of honours. He wrote, in a passage I have already referred to, at p. 418 A.C.:
>
> > But I do not think that that right of challenge can be unqualified. It must, I think, depend upon the subject matter of the prerogative power which is exercised. *Many examples were given during the argument of prerogative powers which as at present advised I do not think could properly be made the subject of judicial review. Prerogative powers such as those relating to* the making of treaties, the defence of the realm, the prerogative of mercy, the grant of honours, *the dissolution of Parliament* and the appointment of ministers as well as others are not, I think, susceptible to judicial review because their nature and subject matter *are such as not to be amenable to the judicial process.* The courts are not the place wherein to determine whether a treaty should be concluded or the armed forces disposed in a particular manner or Parliament dissolved on one date rather than another. (emphasis added)

[78] As the Applicants point out, ***Black*** was endorsed by the Supreme Court of Canada in ***Khadr*** (Applicants' brief para 37).

[79] Although ***Black*** is not binding on me, the Ontario Court of Appeal's reasoning is highly persuasive. I agree that the exercise of Crown Prerogative over the dissolution of the Legislature and the calling of an election is not amenable to judicial review.

[80] Having found that s 38.1 does not diminish the ability of a sitting Government, or rather of the Lieutenant Governor in Council, acting on the recommendation of the President of Executive Council, to call an election in its discretion, there is no remedy to grant.

[81] I will now address the s 3 *Charter* issues, in general and then in terms of Mr. Rigney's specific claim that his rights were breached.

C. Were Mr. Rigney's s 3 rights violated when the 2015 general election was held, outside of the Fixed Election Period?

Section 3 *Charter* Rights

[82] Section 3 of the *Canadian Charter of Rights and Freedoms* states:

> 3. Every citizen of Canada has the right to vote in an election of members of the House of Commons or of a legislative assembly and to be qualified for membership therein.

[83] In ***R v Big M Drug Mart Ltd***, [1985] 1 SCR 295 at 344, Dickson J (as he then was) stated: "[t]he interpretation [of a section of the *Charter*] should be ... a generous rather than a legalistic one, aimed at fulfilling the purpose of the guarantee and securing for individuals the full benefit of the *Charter*'s protection".

[84] In interpreting the scope of a *Charter* right, courts must adopt a broad and purposive approach that seeks to ensure that duly enacted legislation is in harmony with the purposes of the

Ottawa, Ontario, May 9, 2019

PRESENT: Mr. Justice Grammond

BETWEEN:

CHIEF JOHN STAGG, COUNCILLOR LEONARD SUMNER, COUNCILLOR OWEN STAGG IN THEIR PERSONAL CAPACITY AND AS REPRESENTATIVES OF THE DAUPHIN RIVER FIRST NATION, AND THE SAID DAUPHIN RIVER FIRST NATION AS REPRESENTATIVE FOR ALL ITS MEMBERS

Applicants

and

THE ATTORNEY GENERAL OF CANADA, THE HONOURABLE RALPH GOODALE, MINISTER OF PUBLIC SAFETY, THE HONOURABLE JANE PHILPOTT, MINISTER OF INDIGENOUS SERVICES CANADA, THE HONOURABLE CAROLYN BENNETT, MINISTER OF CROWN-INDIGENOUS RELATIONS AND NORTHERN AFFAIRS

Respondents

JUDGMENT AND REASONS

[1] In the spring of 2011, the Dauphin River First Nation [DRFN] was evacuated due to the flooding of its reserve lands. Many of its members have been forced to relocate temporarily in the Winnipeg area or elsewhere in Manitoba. The rebuilding of the community took longer than expected. Indigenous Services Canada [ISC], through a number of intermediaries, provided DRFN members with benefits aimed at securing alternative housing while waiting for new houses to be ready. In the summer of 2018, as new houses were ready or about to be ready for occupancy, it declared that the evacuation was over and terminated the evacuee benefits.

[2] DRFN objected to the termination of evacuee benefits and now seeks judicial review of that decision. It says that the 70 houses that have been built so far are insufficient to address the needs of the community and that there remain 45 evacuee families who have no home to return to when their benefits are terminated. It argues that when the community was evacuated, ISC promised that a house would be built for every evacuated family. It also argues that the decision was not made in a procedurally fair manner.

[3] The Attorney General, on its part, denies that such a promise was ever made. He adds that the termination of the evacuee benefits was reasonable, because DRFN now has more houses and a lower rate of occupancy than before the flood, even when the natural increase of its population is taken into account. The Attorney General also argues that the decision to provide or to terminate benefits is a prerogative decision that courts cannot review.

2019 FC 630 (CanLII)

[4] DRFN's application for judicial review is denied. The decision is not shielded from review because it is made under the royal prerogative or involved the allocation of public funds. However, the process leading to the decision complied with the requirements of procedural fairness. Most importantly, the decision was reasonable, as it took into account the collective needs of DRFN members. Given DRFN's role in allocating houses to its members, the decision-maker was not required to inquire into individual needs. Lastly, references to certain documents generated in the course of negotiations did not render the decision unreasonable.

2019 FC 630 (CanLII)

I. Background

[5] As usual, a proper understanding of the case requires a detailed analysis of the facts. But it is difficult to appreciate the relevance of certain facts unless one begins with a summary of legislation and policy in two areas that intersect in this case: the provision of housing and emergency management and assistance.

[6] In these reasons, I refer to the relevant government department as Indigenous Services Canada or ISC. ISC was formerly part of a larger department, most recently known as Aboriginal Affairs and Northern Development Canada.

A. *Housing for First Nations*

[7] Housing is a fundamental human need. In this regard, Article 11 of the *International Covenant on Economic, Social and Cultural Rights* recognizes "the right of everyone to an adequate standard of living … including … housing." In this country, however, housing is often

considered to be a private matter. Individuals are expected to find housing by themselves and to resort to their own resources to cover housing costs. Nevertheless, federal and provincial governments have adopted various strategies to make housing more affordable. At the federal level, the *National Housing Act*, RSC 1985, c N-11, aims to "promote housing affordability" through the provision of financing or various forms of subsidies. Most provinces regulate residential tenancies and provide housing subsidies or other forms of housing assistance to low-income families. See, for example, *The Housing and Renewal Corporation Act*, CCSM c H160.

2019 FC 630 (CanLII)

[8] Housing in First Nations communities is also provided through a combination of public and private initiative. Given the economic situation in many First Nations communities, as well as the constraints on private ownership flowing from the *Indian Act*, RSC 1985, c I-5, and other factors, public funding plays a more important role than in non-Indigenous communities. In many cases, such as in DRFN, First Nations build houses with whatever federal funding is available and rent them or simply allocate them to their members. Decisions regarding the allocation of housing are made by First Nations, either according to section 20 of the *Indian Act*, which deals with certificates of possession, through rental agreements or through more informal arrangements. The federal government plays no role in the allocation of housing in First Nations communities.

[9] While the federal government appears to accept the political responsibility to provide adequate housing to First Nation communities, the legal basis for the provision of that assistance is unclear. It may be, as DRFN suggested before me, that an obligation to provide housing flows from the treaty relationship between the Crown and many Indigenous peoples. DRFN, for one, is

a party to Treaty 2. In the Indigenous tradition, treaties were meant to establish a family relationship between treaty partners (*wahkohtowin*): Treaty Elders of Saskatchewan, *Our Dream Is That Our Peoples Will One Day Be Clearly Recognized As Nations* (Calgary: University of Calgary Press, 2000) at 33–36. Family members may have a duty to assist each other in times of need. Moreover, DRFN highlighted the fact that the availability of proper housing would be a prerequisite to the exercise of the harvesting rights enshrined in the treaties or in the *Constitution Act, 1930*. However, the evidentiary record in this case is insufficient to determine the existence and scope of a treaty right to housing.

2019 FC 630 (CanLII)

[10] Parliament has not enacted legislation that deals specifically with First Nations housing (see, in this regard, *Canada (Attorney General) v Simon*, 2012 FCA 312 at paras 4–6; Janna Promislow and Naiomi Metallic, "Realizing Aboriginal Administrative Law", in Colleen M Flood and Lorne Sossin, eds, *Administrative Law in Context*, 3rd ed (Toronto: Emond Montgomery, 2018) 87, 93–108). It appears that funding for housing is provided either by the Canadian Mortgage and Housing Corporation [CMHC] under the general provisions of the *National Housing Act*, or under policies of ISC. The relevant policies are not in evidence before me.

[11] It is common knowledge that the situation of housing in First Nations communities is particularly difficult, to the point that some speak of a crisis. More than twenty years ago, the Royal Commission on Aboriginal Peoples described the situation as follows:

> Aboriginal housing and community services are in a bad state, by all measures falling below the standards that prevail elsewhere in Canada and threatening the health and well-being of Aboriginal people. The inadequacy of these services is visible evidence of the

> poverty and marginalization experienced disproportionately by Aboriginal people. […]
>
> The problem is threefold: lack of adequate incomes to support the private acquisition of housing, absence of a functioning housing market in many localities where Aboriginal people live, and lack of clarity and agreement on the nature and extent of government responsibility to respond to the problem. […]
>
> (Canada, Royal Commission on Aboriginal Peoples, *Report of the Royal Commission on Aboriginal Peoples*, vol 3, *Gathering Strength* (Ottawa: Canada Communication Group 1996) at 341).

2019 FC 630 (CanLII)

[12] Indeed, it appears that there was a certain level of overcrowding at DRFN prior to the 2011 flood. The affidavits of Tanita and Alexis Cruly provide an illustration: the three Cruly sisters, two of whom were adults, lived in a three-bedroom house, together with their mother and stepfather, as well as the four-year old daughter of one of them. ISC has calculated that in 2011, the occupancy rate, that is, the number of residents per housing unit in DRFN, was 3.8. In comparison, the average occupancy rate for Manitoba First Nations was 5.4, while the overall average in Manitoba was 2.6.

B. *Emergency Assistance*

[13] Most Canadians would expect their governments to protect them in case of an emergency. Indeed, emergency planning has become a significant responsibility of all levels of government. Emergency planning includes prevention, preparedness, response when an emergency occurs and recovery.

[14] Recovering from an emergency may involve the reconstruction of communities and the temporary housing of persons who were evacuated. Those measures are critical for the persons

who are the most affected by an emergency. Despite their importance, however, there is no statutory right to these measures, as will become apparent from a review of the relevant legislation.

2019 FC 630 (CanLII)

[15] The federal *Emergency Management Act*, SC 2007, c 15, is a very short statute. It is based on the premise that emergency preparedness is a jurisdiction shared between the various levels of government in Canada. Section 4 sets out a number of responsibilities of the federal government with respect to emergencies. In particular, it empowers the federal government to declare that a provincial emergency is of "federal concern" and, upon such a declaration, to provide financial assistance to a province. Section 6 provides that federal ministers shall prepare emergency plans with respect to matters falling under their jurisdiction. Pursuant to that authority, ISC or its predecessors have set up an Emergency Management Assistance Program [EMAP].

[16] Manitoba's *Emergency Measures Act*, CCSM c E80, contains, among other things, provisions requiring government departments and local authorities to prepare emergency plans. It also provides for the declaration of a state of emergency and for exceptional powers to be exercised on such an occasion. Part IV of the Act relates to disaster assistance. Section 16.1 allows for the provision of disaster assistance in accordance with policies adopted by the government. It also states that such assistance is "gratuitous" and not subject to appeal, except to the Disaster Assistance Appeal Board created by section 17.

[17] We can now turn to the events that affected the Interlake region of Manitoba in 2011 and DRFN in particular.

C. *The 2011 Flood and Reconstruction Efforts*

[18] Flooding has been an issue in Manitoba for a long time. The provincial government is involved in managing water flows, preventing floods and mitigating flooding damage and has built a number of works to that end. One of them is the Portage Diversion, a canal that allows the diversion of excess water flows of the Assiniboine River into Lake Manitoba. The waters of Lake Manitoba flow into the Fairford River, then into Lake St. Martin, then into the Dauphin River, which exits in Lake Winnipeg. DRFN is located at the mouth of the Dauphin River in Lake Winnipeg.

[19] In the spring of 2011, a combination of factors led to record water levels in the Assiniboine River basin and elsewhere in Manitoba. In order to minimize the possibility of flooding along the Assiniboine, in particular in Winnipeg and the environs, the provincial government diverted considerable quantities of water into Lake Manitoba through the Portage Diversion. This had the effect of greatly increasing the flow of the Dauphin River. Major floods took place in the Interlake region. Several communities were badly damaged, including DRFN. DRFN describes the water management measures taken by the government of Manitoba as a conscious decision to sacrifice DRFN, and other communities in the region, in order to save Winnipeg and other densely populated areas.

2019 FC 630 (CanLII)

[20] In view of the impending flood, DRFN was evacuated in May 2011, and its members relocated, mostly in the Winnipeg area. Many, if not all of the 53 houses then existing in DRFN were destroyed or rendered inhabitable.

[21] In 2013, DRFN initiated an action against the federal government in the Manitoba Court of Queen's Bench, with respect to the losses sustained as a result of the 2011 flood. Little progress has been made in bringing this action to trial. The parties have preferred to negotiate a comprehensive settlement agreement [CSA]. Those negotiations have led to an agreement-in-principle [AIP] in 2017, but no CSA has been signed yet.

[22] Although no CSA has yet been signed, the federal government funded DRFN reconstruction efforts, with the participation of the government of Manitoba. Before the flood, there were 53 houses in DRFN: affidavit of Aaron O'Keefe, Respondent's Record [RR] at 8, para 21. The initial plan, which was the object of an agreement between DRFN and the government of Manitoba in 2014, provided for the installation of 41 pre-built houses. However, in 2016, as DRFN identified additional needs, the federal government agreed to fund the construction of 20 additional houses and the renovation of another one. And even those numbers were exceeded, as an additional seven houses were built with funding approved by CMHC. The construction of those houses was completed in the summer or fall of 2018. Hence, there are now 70 new houses in DRFN.

2019 FC 630 (CanLII)

[23] In addition, the federal government funded the reconstruction and the building of new collective infrastructure. As a result, DRFN now has a new band office, water and sewage system, health center and K-8 school.

2019 FC 630 (CanLII)

[24] Nevertheless, DRFN takes the position that this is insufficient to cover the housing needs of DRFN members. At meetings with ISC held in the fall of 2017, it asserted that 45 additional houses would be needed. It says that it came to this conclusion as a result of a needs assessment performed in 2017, which would explain that it had not taken this position earlier.

[25] A motion to certify a class action against the federal and Manitoba governments was also filed in the Manitoba Court of Queen's Bench. The motion was initially dismissed against Manitoba as the judge found that a class action was not the preferable procedure to address the members' claims: *Anderson v Manitoba*, 2014 MBQB 255 [*Anderson MBQB*]. The Court of Appeal, however, reversed that finding and certified the class action against Manitoba: *Anderson v Manitoba*, 2017 MBCA 14. I understand that this action has been settled, but both parties agree that this settlement has no bearing on the issues before me. In the same decision, the Court of Queen's Bench dismissed the claims against the federal government as disclosing no cause of action: *Anderson MBQB* at paragraphs 170–192. That finding was not appealed.

D. *The Evacuation Benefits*

[26] One sad consequence of emergencies such as the 2011 flood is that persons who have been evacuated are often unable to return to their homes until significant remedial or reconstruction work is completed. As a result, emergency measures programs often include

relocation assistance, aiming at providing evacuees with the means of living while their homes remain unavailable.

[27] Such assistance, which the parties have referred to as “evacuee benefits,” has been provided to DRFN members who were evacuated in 2011. For the purposes of this application, the precise scope of those benefits is immaterial. Affidavits sworn by five evacuees describe the monthly benefits as including the payment of rent directly to their landlords, for sums in the range of $800-$1200, as well as a cash payment for incidentals, in the range of $200-$300.

[28] The precise manner in which those benefits have been channelled to their recipients was made clear to DRFN only in the course of the present proceedings. The federal government adopted an order-in-council under the *Emergency Management Act* declaring the 2011 flood to be of national concern and authorizing payments to the province of Manitoba. As a result, the federal government made payments intended to cover, among other things, the payment of relocation assistance to both Indigenous and non-Indigenous Manitobans. The provincial government then contracted with a private non-governmental organization, initially the Manitoba Association of Native Firefighters and, starting in 2014, the Canadian Red Cross Society [Red Cross], for the actual delivery of assistance to the intended recipients. The lines of authority and accountability remain unclear. Thus, the federal government signed an agreement directly with the Red Cross in 2014. That agreement contains a statement of work that defines the services to be provided to the evacuees by reference to the provincial Disaster Financial Assistance Program. It also states that the Red Cross will seek reimbursement from the government of Manitoba. We do not know whether the benefits come within the purview of Manitoba’s

2019 FC 630 (CanLII)

Emergency Measures Act. Nevertheless, at the hearing of this application, counsel for the respondents admitted that the federal government is making decisions with respect to evacuee benefits and that the Red Cross would simply follow those decisions.

E. *The Challenged Decision*

[29] In the winter or early spring of 2018, ISC officials formed the view that DRFN had been restored to a state that allowed evacuees to return home. They asked DRFN to co-sign a letter to all evacuees informing them of the end of the evacuation and the termination of benefits. DRFN, however, declined to do so. As a result, ISC decided to terminate the evacuee benefits as of July 31, 2018. That decision was conveyed to DRFN members by letters from the Regional Director General, dated May 30, 2018, to each evacuee head of household. ISC says that most of those letters were received over the summer, with a few exceptions: affidavit of Aaron O'Keefe, RR at 15-16, paragraphs 43–44.

[30] DRFN objected to the termination of benefits, because of its view that 45 additional houses were needed to accommodate all evacuees, given the growth of community membership since the flood. That position was expressed, among other things, in a letter dated June 15, 2018, to then-Minister of ISC Jane Philpott. As a result of those representations, ISC agreed to delay the termination of evacuee benefits by one month, that is, benefits would end on August 31, 2018. ISC did not agree, however, to delay that termination indefinitely. That was confirmed by a letter of the Acting Regional Director General of ISC on August 23, 2018.

2019 FC 630 (CanLII)

[31] As further discussions did not result in an agreement, DRFN brought the present application on August 31, 2018, also seeking interim and interlocutory relief. During a telephone conference held on that day with the undersigned, counsel for the respondents agreed to provide evacuee benefits until September 30, 2018, on the understanding that a motion for interlocutory injunction would be heard before that date. Counsel for both parties later agreed that the benefits would be provided until a decision is made on the main application, which rendered the motion for an interlocutory injunction moot. At this time, only the benefits for the 45 evacuee heads of households who have not been allocated a house remain in issue. DRFN no longer challenges the termination of benefits for other evacuees.

[32] The parties do not agree as to what the decision under review exactly is. DRFN says that it is the letter dated August 23, 2018, because the decision made on May 24, 2018 had been "rescinded." The Attorney General, on its part, says that the decision to terminate benefits was made on May 24, 2018, and was never rescinded, only delayed. I agree with the latter view, because ISC never wavered in its intention to terminate the benefits, although it agreed to delay the implementation of the decision by one month. The fact that ISC refused to reconsider its decision does not amount to a new decision being made. I note that in spite of this, neither party suggested that an extension of time was needed.

[33] Perhaps because of the disagreement as to when the decision was made, the parties also disagree as to what constitutes the reasons for that decision. In this regard, we must not lose sight of the fact that the decision is not the result of an adjudicative process. Thus, this is a case in which we need to "look to the record" to find what those reasons are: *Newfoundland and*

2019 FC 630 (CanLII)

Labrador Nurses' Union v Newfoundland and Labrador (Treasury Board), 2011 SCC 62 at paragraph 15, [2011] 3 SCR 708 [*Newfoundland Nurses*]. This record includes not only the letters of May 24, 2018 and August 23, 2018, but also several iterations of a "decision note" prepared for the Regional Director General as well as additional information provided by ISC's affiants. From those sources, I find that the reasons for the decision challenged by this application include:

- "The construction of all new housing at Dauphin River to address the impacts of flooding should be completed by June 30, 2018" (May 30, 2018 letter);

- The construction of 70 houses for 234 evacuees would bring the occupancy rate to 3.34, well below the average for Manitoba First Nations, and below the occupancy rate in DRFN before the flood (April 26, 2018 decision note);

- "It is uncertain of how many of the 234 evacuees will move home as there is the potential of a large number of false evacuees on the current red cross evacuee list, as well as evacuees who may no longer want to return home to Dauphin River [sic]" (May 24, 2018 decision note);

- The cost, estimated at $11 million, of building an additional 43 houses, as well as the fact that $2 million was offered for new housing in 2018-19 (May 24, 2018 decision note);

2019 FC 630 (CanLII)

- "Dauphin River was originally supposed to demolish existing homes as new homes were being replaced; however the First Nation has been able to keep many of the existing homes which could accommodate future growth" (April 26, 2018 decision note);

- "The number of houses needed to address the impacts of the flood of 2011 was jointly agreed upon and acknowledged by Band Council Resolution, signed August 25, 2016 and in the Agreement of Principle signed May 10, 2017" (August 23, 2018 letter; also mentioned in the April 26, 2018 decision note).

2019 FC 630 (CanLII)

[34] Over the course of the proceedings, both parties made claims that certain documents, in particular the 2016 band council resolution [BCR] and the 2017 AIP, were covered by settlement privilege and were not admissible in evidence. However, as I explain later, the real thrust of those submissions is that the Regional Director General should not have taken those documents into account when making his decision, not that I should not look at them. Therefore, I have admitted those documents and I will deal with the settlement privilege claim when reviewing the merits.

II. Analysis

[35] The subject-matter of the present application for judicial review is the termination of the evacuee benefits. Yet, this issue cannot be entirely separated from the larger issue of the sufficiency of housing. Intuitively, the evacuation cannot be ended until every family is able to return to a repaired or a new house. But the lapse of time – seven years between the flood and the

decision challenged – made things more complicated. When DRFN was evacuated, one could have thought that a family was the group of persons who inhabited the same house. However, as time went by, as children became adults, as babies were born, as coupled formed or separated and as people passed away, the families of 2011 may not be the same as the families of 2018. Hence DRFN's claim that 45 more houses are needed to fulfil the needs of its members.

2019 FC 630 (CanLII)

[36] Resolving this issue is further complicated by the fact that the parties undertook reconstruction efforts before negotiating a comprehensive settlement of all issues arising from the flood. Thus, there is no agreement as to the number of houses to be built, nor as to the terms of the evacuee benefits program. There is no consensus on the metrics to be used to measure the needs of the community.

[37] This judgment is divided in three parts. I first need to address an objection raised by the Attorney General to this Court's jurisdiction and capacity to decide the matters at issue. I will explain why I find that the dispute is justiciable. I will then turn to the objections raised by DRFN to the process followed by ISC to make its decision. I will explain why those concerns are unfounded. I will then review the merits of the decision. Ultimately, I find that the decision was reasonable.

[38] At this juncture, I wish to make clear what this case is not about. This is not a claim for damages resulting from the flood. A class action to that effect was settled with Manitoba, and the claim against Canada will be decided by the Manitoba Court of Queen's Bench, on a more fulsome evidentiary record – unless, of course, the parties settle in the meantime. Neither is this a

claim based on a right to housing, whatever its source. The case was not argued on that basis and DRFN has not claimed any remedy regarding housing. And unlike *First Nations Child and Family Caring Society of Canada v Canada (Attorney General)*, 2016 CHRT 2, this is not a discrimination claim. No evidence was adduced for the purpose of showing that DRFN members were adversely treated on the basis of a prohibited ground of discrimination.

2019 FC 630 (CanLII)

A. *Jurisdiction, Justiciability and Standard of Review*

[39] Before dealing with the merits, I must address an objection raised by the Attorney General, who argues that the decision to terminate benefits is "not subject to judicial review." He says that the federal government has no legal obligation to provide evacuee benefits. The provision of those benefits would be an exercise of the royal prerogative, which would be subject to review on constitutional grounds only. The decision to provide such benefits would be a discretionary policy decision unsuitable for review by the courts.

[40] These arguments can be understood as a challenge either to this Court's jurisdiction or the justiciability of the matter. At the hearing, counsel for the Attorney General confirmed that he wished to advance both aspects of the argument. Nevertheless, whether viewed from the perspective of jurisdiction or justiciability, the argument fails.

[41] This Court's jurisdiction to review exercises of the royal prerogative is firmly established and, indeed, is expressly provided for in the definition of "federal board, commission or other tribunal" in section 2 of the *Federal Courts Act*, RSC 1985, c F-7: *Hupacasath First Nation v Canada (Foreign Affairs and International Trade Canada)*, 2015 FCA 4 at paragraphs 36–58

[*Hupacasath*]. Our Court has reviewed decisions that are generally understood to be made under the royal prerogative, such as the issuance of passports (for example, *Lipskaia v Canada (Attorney General)*, 2018 FC 789) or the conclusion or withdrawal from international treaties (*Hupacasath*; *Turp v Canada (Justice)*, 2012 FC 893, [2014] 1 FCR 439).

2019 FC 630 (CanLII)

[42] The Attorney General cited *Canada (Prime Minister) v Khadr*, 2010 SCC 3, [2010] 1 SCR 44 [*Khadr*], as authority for the proposition that courts have jurisdiction "to review exercises of the prerogative power for constitutionality" (at paragraph 37) but not otherwise. However, the Supreme Court's reference to judicial review on constitutional grounds is explained by the fact that the claim in that case was based on the Charter. It was not meant to exclude other grounds of review: *Hupacasath* at paragraph 61. (To the extent that *Hospitality House Refugee Ministry Inc v Canada (Attorney General)*, 2013 FC 543, says otherwise, it has been overtaken by *Hupacasath*.) As the Ontario Court of Appeal wrote in *Black v Canada (Prime Minister)* (2001), 199 DLR (4th) 228 at 245 [*Black*]: "the expanding scope of judicial review and of Crown liability make it no longer tenable to hold that the exercise of a prerogative power is insulated from judicial review merely because it is a prerogative and not a statutory power." (See also Patrice Garant, *Droit administratif*, 7th ed (Cowansville, Qc: Yvon Blais, 2017) at 45−49 [Garant, *Droit administratif*]; Peter W Hogg, *Constitutional Law of Canada*, 5th ed (Toronto: Thomson Reuters, 2007) (loose-leaf ed) at para 1.9 [Hogg, *Constitutional Law*].)

[43] Adopting the approach put forward by the Attorney General would cause significant practical problems. A precise definition of the royal prerogative would be needed, as this Court's jurisdiction would depend on the characterization of the source of the decision under review.

Yet, there is no agreement as to which decisions are made under the royal prerogative and which are made under another source of authority, as I will now demonstrate.

[44] The royal prerogative has been described as the "residue of discretionary or arbitrary authority, which at any given time is legally left in the hands of the Crown" (*Khadr* at paragraph 34). Descriptions of the royal prerogative usually focus on powers that relate to traditional State functions, such as defence, foreign affairs, honours and mercy, as well as a number of traditional immunities: see, for example, Craig Forcese, "The Executive, the Royal Prerogative, and the Constitution" in Peter Oliver, Patrick Macklem and Nathalie Des Rosiers, eds, *The Oxford Handbook of the Canadian Constitution* (Oxford: Oxford University Press, 2017) [Forcese, "The Executive"]; Philippe Lagassé, "Parliamentary and Judicial Ambivalence Towards Executive Prerogative Powers in Canada" (2012) 55 Canadian Public Administration 157 [Lagassé, "Prerogative Powers"]; Paul Lordon, *Crown Law* (Toronto: Butterworths, 1991) at 75−106; Garant, *Droit administratif* at 49-75.

[45] Yet, it has sometimes been suggested that the royal prerogative also includes powers held by the Crown as a natural person, such as the power to enter into contracts or the power to spend money. It is sometimes said that government spending programs that are not backed up by an elaborate statutory scheme are made under the prerogative: see, for example, *Canadian Doctors for Refugee Care v Canada (Attorney General)*, 2014 FC 651 at paragraphs 354–402, [2015] 2 FC 267. Such a characterization, however, is difficult to reconcile with the well-established rule to the effect that the government may not spend public money without Parliament's approval: *Financial Administration Act*, RSC 1985, c F-11, s 26. More generally, the very idea of royal

2019 FC 630 (CanLII)

prerogative suggests powers that are unavailable to natural persons. In this regard, Professor Hogg says (*Constitutional Law* at para 1.9):

> Powers or privileges enjoyed equally with private persons are not, strictly speaking, part of the prerogative. For example, the Crown has the power to acquire and dispose of property, and to enter into contracts, but these are not prerogative powers, because they are possessed by everyone.

2019 FC 630 (CanLII)

[46] It may also be difficult to determine whether the royal prerogative has been displaced by legislation: see, for example, the contrasting perspectives in Lagassé, "Prerogative Power" and Forcese, "The Executive." It would be highly inconvenient if this Court's jurisdiction depended on a detailed analysis of such a complex legal issue.

[47] In *Gestion Complexe Cousineau (1989) Inc v Canada (Minister of Public Works and Government Services)*, [1995] 2 FC 694 (CA), Justice Robert Décary of the Federal Court of Appeal warned against making this Court's jurisdiction dependent on fine distinctions regarding the source of authority for the decision reviewed (at 705):

> As between an interpretation tending to make judicial review more readily available and providing a firm and uniform basis for the Court's jurisdiction and an interpretation which limits access to judicial review, carves up the Court's jurisdiction by uncertain and unworkable criteria and inevitably would lead to an avalanche of preliminary litigation, the choice is clear. I cannot assume that Parliament intended to make life difficult for litigants.

[48] Thus, the better view is that the Crown is not acting under the royal prerogative when it sets up a spending program that is not supported by specific legislation, such as the emergency assistance program at issue here. And even if I were wrong in this conclusion, *Hupacasath* tells us that a decision made under the royal prerogative is not beyond this Court's jurisdiction.

[49] Nevertheless, the Attorney General's objection may be recast as a challenge to the justiciability of the matter, instead of a challenge to jurisdiction. Jurisdiction and justiciability are different concepts. In *Hupacasath*, Justice David Stratas of the Federal Court of Appeal explained the concept of justiciability in the following terms, at paragraphs 62 and 66:

> Justiciability, sometimes called the "political questions objection," concerns the appropriateness and ability of a court to deal with an issue before it. Some questions are so political that courts are incapable or unsuited to deal with them, or should not deal with them in light of the time-honoured demarcation of powers between the courts and the other branches of government.
>
> […]
>
> Usually when a judicial review of executive action is brought, the courts are institutionally capable of assessing whether or not the executive has acted reasonably, i.e., within a range of acceptability and defensibility, and that assessment is the proper role of the courts within the constitutional separation of powers […]. In rare cases, however, exercises of executive power are suffused with ideological, political, cultural, social, moral and historical concerns of a sort not at all amenable to the judicial process or suitable for judicial analysis. In those rare cases, assessing whether the executive has acted within a range of acceptability and defensibility is beyond the courts' ken or capability, taking courts beyond their proper role within the separation of powers. For example, it is hard to conceive of a court reviewing in wartime a general's strategic decision to deploy military forces in a particular way.

[50] The phrase "high policy" has sometimes been used to describe the kind of decisions that are not justiciable (Forcese, "The Executive," at 166). In contrast, where "high policy" issues are not at stake, "the exercise of the prerogative will be justiciable, or amenable to the judicial process, if its subject matter affects the rights or legitimate expectations of an individual" (*Black*, at 246–247). Although it was traditionally said that the wisdom of discretionary decisions is not a matter for the courts, the evolution of administrative law in recent decades has resulted in a

2019 FC 630 (CanLII)

widening of the grounds on which administrative decisions may be reviewed. Thus, the decisive factor is not the political implications of the matter or the decision's discretionary component, but the fact that the question "has a sufficient legal component to warrant the intervention of the judicial branch:" *Reference Re Canada Assistance Plan (BC)*, [1991] 2 SCR 525 at 545 [*Re Canada Assistance Plan*]; see also Lorne M Sossin, *Boundaries of Judicial Review: The Law of Justiciability in Canada*, 2nd ed (Toronto: Carswell, 2012).

[51] In this case, it is difficult to discern any "high policy" issues similar to those at stake in *Black* or *Operation Dismantle*. In spite of this, the Attorney General argues that the matter is not justiciable because no one has a right to emergency assistance, citing *Anderson MBQB*, at paragraph 173. Yet, the fact that there is no right in the strict sense does not make the matter non-justiciable. For example, even though no one has a right to a passport, the process by which decisions regarding passports are made is justiciable (*Black*, at 247) and this Court has often reviewed such decisions, as I noted above. Likewise, the fact that a payment is made *ex gratia* (that is, in the absence of an obligation in the strict sense) does not render a matter non-justiciable. When the government chooses to make *ex gratia* payments to a group of individuals, it may set out a process and substantive conditions. Compliance with that process and those conditions raises justiciable issues, as shown by a number of decisions from this Court: see, for example, *Kastner v Canada (Attorney General)*, 2004 FC 773; *Briand v Canada (Attorney General)*, 2018 FC 279.

[52] The Attorney General also argues that the decision challenged is not justiciable because it involves budgetary matters. Indeed, budgetary decisions may not always be justiciable, as the

2019 FC 630 (CanLII)

allocation of public money is a political matter involving choices that cannot be measured against any legal standard. Yet, the mere fact that a decision involves monetary benefits or has an impact on the public purse does not push it beyond the pale of justiciability. In general terms, a decision is less susceptible to be justiciable when its scope is broad. Purely operational decisions will usually be justiciable.

2019 FC 630 (CanLII)

[53] Here, the decision challenged does not pertain to the choice to create ISC's EMAP program nor to the scope or main parameters of the program. It is a decision that terminates the benefits provided to 45 families in the wake of a specific evacuation, on the basis, if I may summarize it that way, that the conditions that required the evacuation are no longer present. This is not the kind of decision that we would usually describe as a policy one. Courts are well-equipped to review such a decision to ensure that it was made in a procedurally fair manner and that it is reasonable. In this regard, an analogy may be drawn with *Tesla Motors Canada ULC v Ontario (Ministry of Transportation)*, 2018 ONSC 5062, where the precise manner in which an environmental subsidy program was terminated was held to be justiciable.

[54] This brings me to the selection of the standard of review. Where this Court reviews an administrative decision, even in a non-adjudicative context, there is a strong presumption that the decision can only be overturned if it is shown to be unreasonable: *Agraira v Canada (Public Safety and Emergency Preparedness)*, 2013 SCC 36 at paragraph 50, [2013] 2 SCR 559; *Barreau du Québec v Quebec (Attorney General)*, 2017 SCC 56 at paragraphs 15−16, [2017] 2 SCR 488.

[55] DRFN seeks to rebut the presumption by asserting that the decision-maker in this case has no specific expertise and that the rationale for deference is absent. I disagree. The decision challenged deals with the provision of services to members of First Nations. This is the daily work of ISC officials. They certainly have more knowledge and expertise regarding those matters than this Court. While the Regional Director General is not specifically empowered by legislation, he has the subject-matter expertise that underpins deference in judicial review. Although the precise context may have been different, this Court has reviewed decisions made by ISC or its predecessors with respect to funding decisions or the administration of service programs and concluded that the standard of review was reasonableness: *Pikangikum First Nation v Canada (Minister of Indian and Northern Affairs)*, 2002 FCT 1246; *Ermineskin v Canada*, 2008 FC 741 at paragraph 43; *Tobique Indian Band v Canada*, 2010 FC 67 at paragraph 56; *Kehewin Cree Nation v Canada*, 2011 FC 364 at paragraphs 16-18; *Thunderchild First Nation v Canada (Indian Affairs and Northern Development)*, 2015 FC 200 at paragraph 26.

[56] Relying on *Hupacasath* at paragraph 67, the Attorney General argues that decisions such as the one challenged can only be quashed in "egregious" cases. This, however, as *Hupacasath* made clear, does not amount to a different, more exacting standard of review. Reasonableness is still the standard. Rather, the use of that adjective highlights the difficulty that an applicant may face in attempting to show that a decision is unreasonable, where it is the result of the balancing of an array of policy considerations, rather than the product of the application of a well-defined legal rule to a particular set of facts.

2019 FC 630 (CanLII)

[57] With respect to issues of procedural fairness, no standard of review is applicable: *Canadian Pacific Railway Company v Canada (Attorney General)*, 2018 FCA 69 at paragraphs 54–56. The issue is "whether the procedure was fair having regard to all of the circumstances" (*ibid* at paragraph 54).

2019 FC 630 (CanLII)

B. *Procedural Fairness Issues*

[58] DRFN has advanced a wide number of grounds in support of its challenge to the decision. Those grounds overlap to a certain extent and they sometimes straddle the divide between process and substance. It is easier to deal first with the complaints regarding procedural fairness.

(1) Notice and Right of Appeal

[59] DRFN first claims that no notice was given to the individuals affected by the decision.

[60] In administrative law, the requirement to give notice is a component of procedural fairness. In an adjudicative context, notice must be given in order to enable the person concerned to participate in the hearing or other decision-making process. Thus, a notice must typically provide enough information about the "case to meet," so as to enable the person concerned to make meaningful submissions. It must give sufficient time to allow for preparation. Notice requirements are less stringent when a decision is not adjudicative in nature. Indeed, the requirements of procedural fairness vary according to the nature of the decision: *Baker v Canada (Minister of Citizenship and Immigration)*, [1999] 2 SCR 817 at paragraphs 21–28 [*Baker*]; *Canada (Attorney General) v Mavi*, 2011 SCC 30 at paragraph 39, [2011] 2 SCR 504 [*Mavi*].

[61] In this case, the requirement to give notice serves an additional purpose. Upon the termination of benefits, evacuees need to make alternative housing arrangements. The notice period provides the evacuees with some time to do this in an orderly manner. ISC recognized this purpose of the notice requirement in certain Frequently Asked Questions [FAQ] that it prepared for the evacuees or posted on its website. One of those FAQs, prepared in 2016, stated that "Evacuees will be provided at least 60 days' notice before benefits end."

2019 FC 630 (CanLII)

[62] With this in mind, I can now review the process by which notice was given to the evacuees. As early as February 2018, ISC staff indicated to DRFN's council and members that they intended to terminate the evacuee benefits in the next summer. As soon as the May 24, 2018 decision was made, letters were prepared for each evacuee. According to the affidavit of Aaron O'Keefe, all but six of those letters had been received by August 31, 2018. DRFN argues, however, that those letters were invalid or ineffective, as the decision that they conveyed – termination of the benefits as of July 31, 2018 – had been "rescinded." A new notice should have been given, says DRFN, when the decision to terminate the benefits on August 31, 2018 was made. As I explained above, this is based on a misapprehension of what constitutes the decision. The decision to terminate the benefits was made on May 24, 2018. That ISC chose to delay the implementation of that decision by one month does not invalidate the notices already given.

[63] In practice, it is the Red Cross, and not ISC, who had a monthly contact with the evacuees, for the purpose of paying the benefits. One troubling aspect of this case is the assertion, contained in the affidavits of Irene Stagg, Melodie Asham and Cherise Ross, that in July 2018, Red Cross personnel required the evacuees to sign a release to the effect that they

accepted that their benefits would end on August 31, 2018. The practice was not uniform, as Tanita and Alexis Cruly say, in their affidavits, that they have not been required to sign such documents. I have not seen those releases, as the affiants say that they were not given a copy. The Attorney General merely says that he is unaware of this situation and has apparently made no effort to investigate. In any event, he does not rely on any releases that might have been signed by the evacuees.

2019 FC 630 (CanLII)

[64] On the strength of *Mavi*, DRFN argues that ISC had a duty to give evacuees notice of the impending decision and, presumably, a right to make submissions showing why their benefits should not be cut. This assumes, however, that the impugned decision is made at the individual level. As I show below, however, the Regional Director General could reasonably terminate the DRFN benefits on a collective basis. Most importantly, the matter was dealt with collectively, in discussions between ISC staff and DRFN's council. The council was well aware of ISC's intentions as early as February 2018. ISC initially sought the collaboration of DRFN in communicating with evacuees, but DRFN declined to do so. In those discussions, there is no doubt that DRFN's council advocated on behalf of the individual evacuees. Indeed, the five evacuees who provided an affidavit stated that they "look to Chief and Council to be my advocate and to act in my best interests." In the specific circumstances of this case, I conclude that the discussions between ISC and DRFN's council constituted sufficient notice of the impending decision.

[65] DRFN also argues that the decision should be quashed because no right of appeal was provided to the evacuees. It notes that the FAQs prepared by ISC or posted on ISC's website

referred to a right to appeal. However, no information was ever given as to what that appeal process was and how an individual could initiate it. (No one appears to have drawn any connection with the appeal process provided for by section 17 of Manitoba's *Emergency Measures Act*.)

2019 FC 630 (CanLII)

[66] There was certainly room for improvement in this process, especially with respect to information regarding an appeal process. However, this does not invalidate the decision. There is no evidence that any evacuee actually sought to initiate an individual appeal. What would have happened then is speculation. Perhaps someone would have found what the appeal process was. We simply do not know. In any event, the matter was treated collectively through the present application for judicial review.

[67] Likewise, the requirement to sign a release, while most likely objectionable, does not invalidate the decision. As the releases are not before me, I cannot say whether they amounted to an invalid attempt to curtail the evacuees' right of appeal or other recourse. Moreover, they were obtained after the decision was made.

[68] With respect to the second purpose of giving notice in this case – allowing evacuees to make alternative arrangements – I conclude that ISC made reasonable efforts to notify all evacuees at least 60 days in advance of the termination of their benefits. Several evacuees may not have received the initial letters 60 days ahead of the July 31 deadline, but the extension to August 31 appears to have cured the problem for most of them. The fact that some letters were returned to ISC because evacuees changed their addresses without notifying ISC or the Red

Cross does not result in a breach of procedural fairness, given that ISC deployed other means to ensure that evacuees were made aware of the termination of the benefits.

[69] As a result of the passage of time, the notices given in the spring or summer of 2018 are no longer effective in ensuring that evacuees have adequate time to make alternative living arrangements. Thus, ISC will need to provide a new notice when this judgment is issued.

(2) Bias or Conflict of Interest

[70] DRFN says that the Regional Director of ISC was biased or in a conflict of interest, as he made the challenged decision while he also represented ISC in the negotiations for the conclusion of a CSA. I am unable to accede to that submission, because it overlooks the nature and the context of the function performed by the Regional Director General.

[71] It is trite law that the requirements of procedural fairness, including the requirement of impartiality, vary according to the context. In *Imperial Oil Ltd v Quebec (Minister of the Environment)*, 2003 SCC 58 at paragraph 31, [2003] 2 SCR 624 [*Imperial Oil*], Justice Louis LeBel wrote, for a unanimous Supreme Court:

> The extent of the duties imposed on the administrative decision-maker will then depend on the nature of the functions to be performed and on the legislature's intention. In each case, the entire body of legislation that defines the functions of an administrative decision-maker, and the framework within which his or her activities are carried on, will have to be carefully examined. The determination of the actual content of the duties of procedural fairness that apply requires such an analysis.

2019 FC 630 (CanLII)

[72] In that case, the Minister of the Environment had issued a remediation order against Imperial Oil with respect to lands that it had owned in the past. Imperial Oil argued that the Minister was biased, because the government was being sued by third parties in connection with the failure of past efforts to decontaminate that land. The Supreme Court held that this situation did not result in the Minister being biased. In making his order against Imperial Oil, the Minister was simply furthering the public interest.

2019 FC 630 (CanLII)

[73] Likewise, in the present case, the Regional Director General was not performing an adjudicative function. He oversees ISC's activities in Manitoba, which include the provision of housing and other infrastructure to Indigenous communities, as well as issues arising out of the 2011 flood. One must expect that he will be involved with respect to all issues affecting a First Nation. Thus, he will oversee the conduct of litigation and negotiations with a given First Nation and the provision of services to that same First Nation under existing programs or authorities. Given the nature of his functions, he will not be considered to be biased simply on account of the broad array of responsibilities that he exercises with respect to a particular First Nation.

(3) Legitimate Expectation

[74] DRFN argues that the decision breached a legitimate expectation arising out of promises repeatedly made by ISC since 2011. I disagree. As I explain below, the statements made by ISC do not have the full scope that DRFN seeks to impart to them. More fundamentally, the doctrine of legitimate expectations cannot create substantive rights.

[75] When reviewing the history of the discussions between DRFN and ISC since 2011, it should be borne in mind that the decision under review relates to the termination of evacuee benefits, not to the issue of the number of houses required to fulfil the needs of DRFN members. Yet, the two issues are often intertwined, as appears from the promises allegedly made by ISC. These alleged promises can be described by three statements: (1) the community will be rebuilt as it was before the flood or better; (2) a house will be built for every family; (3) every family will receive evacuee benefits until a house is ready for them. In their affidavits, DRFN representatives state that ISC repeatedly made promises (1), (2) and (3). ISC accepts that it made promise (1), but denies making promises (2) and (3).

[76] In their affidavits, DRFN representatives state that Ms. Anna Fontaine, then Regional Director General of AANDC (ISC's predecessor), made promise (2) at a meeting held in May 2011, just before DRFN was evacuated. Ms. Fontaine, in her affidavit, denies making that promise. She also denies that promise (1) was made in consideration of DRFN's consent to be flooded.

[77] On cross-examination, Mr. John Stagg, who is now chief of DRFN and who was present at some of those meetings, did not have a precise recollection of the sequence of events and what Ms. Fontaine said exactly. For example, he testified:

> 69 Q. And so can you recall the words that Anna Fontaine used which suggested that every evacuee who had a family would have a house made available for them?
>
> A. Well, from my understanding, that was always in my head, you know, every evacuee would get a home. But you know, like a lot has happened within the six, seven years.
>
> […]

2019 FC 630 (CanLII)

> 70 Q. […] And that's when you told me the promise was made by Anna Fontaine that every evacuee who had a family would have a house made available for them?
>
> A. Yes.
>
> 71 Q. Were those the exact words she used, or can you recall the words she used to get that across?
>
> A. No, I can't recall.

2019 FC 630 (CanLII)

[78] Mr. Stagg also described the promises made during that meeting in terms that are more compatible with promise (1) than with promise (2):

> 58 Q. Is it your evidence that you heard Anna Fontaine in the meeting that you did attend make the promises with respect to rebuilding your community on condition that the First Nation consented to water being diverted into the community?
>
> A. I didn't hear her say, like, in that way. I just heard her say, like, well, we'll rebuild your community, or even better. That's my answer.

[79] With respect to the benefits themselves, which are the subject of the alleged promise (3), Mr. Stagg said:

> 117 Q. So did Stephen Traynor [the Regional Director General] tell you that the evacuee benefits would continue until everyone had a house to go back to?
>
> A. Well, that's what I told him, so –
>
> 118 Q. So you told him. Did anyone from Canada tell you that?
>
> A. Not that I recall, no.
>
> 119 Q. Now Aaron O'Keefe, in his affidavit, has said that such a commitment was never made. Do you have a response to that evidence?
>
> A. Not at this time, no.

[80] Mr. Emery Stagg, who was chief at the time and who appears to have a better recollection of the events, described ISC's promises as follows:

> 19 Q. But what I would like to know is what [Ms. Fontaine] said to you. Did she ever say anything about flooding and devastating your community?
>
> A. When we were meeting she advised me that, Chief, whatever damages you incur in your First Nation will be replaced, or to a better quality, or better.
>
> […]
>
> 38 Q. Do you have a response to that evidence from Ms. Fontaine?
>
> A. […] And they told me, well, you know, there's going to be a big flood coming your way. And that's when I was told that whatever your losses are, we will replace anything that is damaged to equal or better than what your community had before.
>
> […]
>
> 43 Q. And, again, Anna Fontaine, in her affidavit, has said […] that she did not promise or suggest that a house would be built to offer to each evacuee household. Do you have a response to that?
>
> A. It was our, it was my belief at that time, as spokesman for the community, that anybody that had a house that was going to be affected by the flood would be replaced.
>
> […]
>
> 47 Q. Can you recall the words used by Anna Fontaine?
>
> A. When I was at that meeting she, I was sitting next to her and she said, Chief, whatever the losses are, we will replace all your housing and whatever infrastructure that is damaged.
>
> 48 Q. Did Anna Fontaine promise anything else?
>
> A. No.

[81] This review of the evidence leads me to find that any promise made by ISC representatives was along the lines of promise (1), namely, to rebuild the community as it was

2019 FC 630 (CanLII)

before the flood or better. There was never any specification of what "better" meant. In fairness to the witnesses, it may be that the difference between promises (1) and (2) was not clearly apparent in 2011. A promise that every family would obtain a house would be equivalent to a promise to rebuild the community as it was, provided that families are defined as the groups of persons who actually occupied houses before the flood. Under that assumption, Messrs. Stagg may have honestly rephrased or understood ISC's promise in terms of "every evacuee will have a house." This does not mean, however, that ISC made promise (2), committed to build a particular number of houses or undertook to build a house for every DRFN member who declares himself or herself to be a head of family.

2019 FC 630 (CanLII)

[82] I now turn to alleged promise (3) – that evacuated DRFN heads of families would receive benefits until a house is made available for them. As I mentioned above, ISC officials have denied making such a promise and DRFN representatives have not been able to say when, and by whom, such a promise would have been made. Nevertheless, DRFN points to two FAQs documents prepared by ISC, which would embody such a promise.

[83] The first document, which I will call the "paper FAQ," must have been prepared in early 2016, as it refers to events in the spring or summer of 2016 in the future tense. According to Chief Stagg, this FAQ was meant to update DRFN members, at a time when it was thought that a number of DRFN families could be repatriated to the first tranche of new housing in the following summer. This paper FAQ contains the following statements:

> **5. When will my evacuee benefits be cut off?**
>
> Once evacuees return to the reserve, and a home is ready for them, their evacuee benefits will end. Evacuees will be provided at least 60 days' notice before benefits end.

> **10. What happens if I want to return home but there is no house available? Who will work with me to resolve this issue?**
>
> 2011 flood evacuees are the priority to receive housing. Dauphin River First Nation will be provided with 41 homes as well as 6 CMHC homes for a total of 47 homes. At this time, there are 41 homes on site.
>
> The First Nation is responsible to allocate houses to families on the evacuee list and will be responsible for addressing issues that arise from allocation of houses. Additional homes maybe [*sic*] provided later subsequent to a Comprehensive Settlement Agreement.
>
> **14. What happens to me if the only reason why I am not prepared to move back is because there is no house available for me and my family?**
>
> Members are deemed to be evacuees until reasonable housing is offered.

[84] Another FAQ document, which I will call the "web FAQ," appears to have been available on ISC's website until mid-August 2018. The page is titled, "Information for 2011 Manitoba Flood Evacuees." It provides a general description of evacuee benefits, outlines eligibility criteria and defines the scope of the benefits by reference to provincial regulations. It outlines the role of the Red Cross and specifies that decisions regarding eligibility are made by ISC, not the Red Cross. This web FAQ does not contain any specific statements about the termination of evacuee benefits. It merely states that ISC will continue to work with the Red Cross "to ensure evacuees continue to receive services and support until they can safely return to their communities."

[85] When read globally, these FAQs do not address directly the matter at hand, namely the possibility of putting an end to the benefits where some families have not been allocated a house. The paper FAQ was mainly geared towards the logistics of a first wave of repatriation to DRFN.

2019 FC 630 (CanLII)

It expressly acknowledged that not everyone would obtain a house at that point in time. Additional housing was contemplated, but no specific promises were made. When that document was written, no one had apparently realized that the allocation of houses to evacuees would result in 45 families not having a house. Thus, the statement to the effect that members would be considered as evacuees until a house is offered to them must be read in light of the expectation that there would be a second tranche of houses. It is difficult to interpret it as an open-ended promise that benefits would continue until all housing needs, however defined, are satisfied. Likewise, the web FAQ does not deal in any level of detail with the issue of the end of the evacuation or the termination of benefits. While it refers to the concept of a "safe return home," it does not explain what this means when one family has become two (or more).

2019 FC 630 (CanLII)

[86] More generally, ISC could only make promise (3) – that benefits would run until everyone is offered a home – if promise (2) – that a home would be built for everyone – had already been made. I have shown above that this is not the case.

[87] In conclusion, I am unable to find that ISC made promises that were "clear, unambiguous and unqualified" (*Agraira v Canada (Public Safety and Emergency Preparedness)*, 2013 SCC 36 at paragraphs 95–96, [2013] 2 SCR 559 [*Agraira*]) so as to give rise to a legitimate expectation.

[88] In any event, the doctrine of legitimate expectations relates only to process and not to substance (*Re Canada Assistance Plan*, at 557; *Baker*, at paragraph 26; *Agraira*, at paragraph 97). In other words, even though the government makes a promise with respect to a particular outcome, it is not bound to deliver that outcome. Here, DRFN is invoking the doctrine of

legitimate expectations to produce a substantive result: because a promise was made that evacuee benefits would last until each family has its own house, ISC is bound to that promise. This is not a recognized application of the doctrine.

C. *Reasonableness of the Decision*

[89] That brings me to the crux of the matter, which is the reasonableness of the Regional Director General's decision to terminate evacuee benefits. I will analyze the arguments raised by DRFN in support of its allegation that the decision was unreasonable.

(1) Taking Into Consideration Privileged Documents

[90] DRFN first line of attack is that the decision should not have been based on documents that were produced in the course of negotiations aimed at reaching a comprehensive settlement and that were subject to privilege. The prominence given to that argument may derive from the fact that DRFN considers that the decision challenged was made only on August 23, 2018. The letter written on that day by the Acting Regional Director General referred to two documents that DRFN says are subject to privilege: a BCR adopted in August 2016, and an AIP signed in 2017 in view of a comprehensive settlement of all matters arising out of the 2011 flood. The decision note prepared in April 2018, also refers to the 2016 BCR and the 2017 AIP and it appears to have been a consideration in the Regional Director General's initial decision.

[91] Settlement privilege is "a common law rule of evidence that protects communications exchanged by parties as they try to settle a dispute" (*Union Carbide Canada Inc v Bombardier*

2019 FC 630 (CanLII)

Inc, 2014 SCC 35 at paragraph 31, [2014] 1 SCR 800 [*Union Carbide*]). Privilege is a rule of evidence. As such, it applies when a party seeks to introduce certain evidence in the context of judicial proceedings.

2019 FC 630 (CanLII)

[92] It can hardly be disputed that the 2017 AIP is a document that was prepared for the purposes of settling all the disputes that arose between DRFN and the federal government as a result of the 2011 flood. Moreover, the AIP itself states that it "does not create legally binding commitments" and participation in the negotiations does not "constitute an admission of fact or law with respect to any claim or issue." Every page of the AIP bears the mention "a without prejudice document, subject to settlement privilege."

[93] In my view, the 2016 BCR is also subject to settlement privilege. To understand why, one must bear in mind that since 2011, ISC has implemented or funded a number of reconstruction projects in spite of the fact that no comprehensive settlement had yet been concluded. The execution of the 2016 BCR was a requirement set by ISC for moving forward on one of those projects, the construction of 20 additional houses. While the Attorney General says that the approval of that project was distinct from the negotiation process, I am unable to dissociate them. The aim of the negotiation process was to settle all claims arising from the flood, including the funding of efforts to "build back better." Building 20 additional houses was an interim measure aimed at achieving part of what was negotiated before a comprehensive deal was struck.

[94] That, however, does not mean that settlement privilege precluded the Regional Director General from considering the 2016 BCR and the 2017 AIP in making the challenged decision.

Settlement privilege, as I mentioned above, is a rule of evidence. It applies when a negotiating party attempts to bring evidence of the negotiation before an independent decision-maker. Where a party to the negotiation is also in a position to make unilateral decisions with respect to issues that are related to the subject-matter of the negotiation, however, settlement privilege does not apply. Here, the Regional Director General, who was overseeing the negotiation, cannot in any meaningful sense be said to have brought evidence before himself when he took into consideration the 2016 BCR and the 2017 AIP. These were matters of which he already had knowledge. There is no issue of privilege.

2019 FC 630 (CanLII)

[95] Likewise, when DRFN applies for judicial review of a decision and argues that it improperly refers to the 2016 BCR and the 2017 AIP, it is difficult to see how the Court can discharge its review function without knowledge of the contents of those documents. In this regard, this case is similar to *Union Carbide*. In that case, it was held that there is an exception to settlement privilege where a party seeks to prove that a settlement was reached and what the terms of the settlement were. Then, by necessity, the court needs to see otherwise privileged documents in order to be able to decide the case. Likewise, in the instant case, it is necessary for me to see the 2016 BCR and 2017 AIP in order to decide the application.

[96] The real question, as I see it, is whether the contents of the negotiation were an irrelevant consideration that tainted the decision. In performing this analysis, I must heed the Supreme Court of Canada's guidance to the effect that administrative decisions must be read globally, having regard to elements of the record that may help understand the reasoning (*Newfoundland Nurses*, at paragraphs 13–17) and that judicial review is not a "line-by-line treasure hunt for

error" (*Communications, Energy and Paperworkers Union of Canada, Local 30 v Irving Pulp & Paper, Ltd*, 2013 SCC 34 at paragraph 54, [2013] 2 SCR 458).

[97] In the April 2018 decision note, references to the 2016 BCR and 2017 AIP are found in a section titled "Background." That section describes the history of the negotiations – also including a 2014 "agreement on fundamental elements" – as an explanation of the transition from a pre-flood situation where there were 53 houses in the community, to a current count of 70. The note then mentions that DRFN requested an additional 43 houses in October 2017 and then goes on to review factors that relate to the adequacy of ISC's contribution to rebuild DRFN. Those factors are: the fact that DRFN has been able to keep many existing homes instead of demolishing them; the number of evacuees; the current occupancy rate compared to the average rate of Manitoba First Nations; and the new collective infrastructure that has been built. Under the heading "Considerations," the note then mentions that DRFN has refused to jointly sign a letter to evacuees; it discusses the costs associated with various options and suggests that there may be a "large number of false evacuees" as well as evacuees who might not wish to return to the community. No mention is made of the 2016 BCR or the 2017 AIP in that section. The decision note also contains a "Summary," which focuses on the state of readiness of the recently built housing and infrastructure as well as DRFN's refusal to collaborate. It makes no mention of the 2016 BCR or the 2017 AIP.

[98] Thus, in my view, the decision note referred to the 2016 BCR and the 2017 AIP simply to provide a history of the discussions that led to the construction of a larger number of houses than existed before the flood. The substantive reason for the recommendation to terminate benefits is

2019 FC 630 (CanLII)

clearly the fact that building 70 houses as well as new collective infrastructure puts DRFN in an adequate position, relative to its situation before the flood and to the situation of other First Nations in Manitoba, and that building an additional 43 houses is not warranted in light of the needs and the costs.

2019 FC 630 (CanLII)

[99] In other words, the decision note did not consider the 2016 BCR and the 2017 AIP as a bar to DRFN's claims. The decision note addressed the substance of the claim for additional housing and found that it was not warranted on the current facts, irrespective of previous promises or admissions. Thus, the decision was not based on an irrelevant factor.

[100] It is true that the August 23, 2018 letter seems to give much more importance to the 2016 BCR and the 2017 AIP as reasons for terminating the benefits. However, as I noted earlier, the decision was made in May 2018, and was based on a much wider array of factors than the 2016 BCR and the 2017 AIP. Moreover, the August 23, 2018 letter was written by someone who was replacing the Regional Director General on an interim basis and who may not have accurately summarized the reasons for the decision made in May 2018. In my view, the reference to those documents in the August 23, 2018 letter does not invalidate the decision retroactively.

(2) Taking Needs Into Consideration

[101] A constant theme of DRFN's argument is that the decision failed to take actual needs into account. In the present case, the concept of needs may relate to the state of housing in DRFN – are there enough houses? – or to the evacuee benefits – does an individual need those benefits to make a living? I said at the outset that this case is not about a general claim to a particular level

of housing. Nevertheless, it is not possible to entirely separate housing and evacuee benefits. This is so because, logically, ISC cannot reasonably decide to terminate evacuee benefits unless it first makes a reasonable determination that housing needs are met. Said otherwise, it would be unreasonable to cut benefits and to require people to return to a community that has not enough space to accommodate them.

2019 FC 630 (CanLII)

[102] This, indeed, flows from the requirement that the decision-maker must consider the purposes of the relevant legislation or program (*Doshi v Canada (Attorney General)*, 2018 FC 710 at paragraphs 31–36). The explicit or implicit objective of the "recovery" component of the EMAP program is to restore a community affected by a disaster to a situation at least equivalent to the status quo ante. AANDC's National Emergency Management Plan, prepared in 2011, describes "recovery" as follows (at page 19):

> Recovery focuses on the reparation or restoration of conditions to an acceptable level through measures taken after the emergency. Recovery activities include the return of evacuees, trauma counselling, reconstruction, economic impact studies and financial assistance for eligible costs. […]
>
> Returning a community to a state of normalcy, which existed prior to the emergency, is a priority.

[103] This is encapsulated in the phrase "build back or better" that is frequently repeated in the evidence. "Or better" is a recognition that all the needs of the community may not have been fulfilled before the disaster or that those needs may evolve over time, particularly if reconstruction takes a long time.

[104] Either in the specific context of housing or with respect to public services generally, the assessment of needs calls for an important measure of discretion. Defining need involves a degree of subjectivity and a measure of political judgment. It is an exercise in line-drawing. And in a complex situation such as housing, there is no single metric by which need can be measured.

2019 FC 630 (CanLII)

[105] In this case, the Regional Director General assessed need by a collective metric, the occupancy rate, that is, the number of residents divided by the number of houses. In my view, it was reasonable to do so and to reach the conclusion that, collectively, DRFN's housing needs were sufficiently met to end the evacuation.

[106] First, it was reasonable to resort to a collective metric. ISC respects First Nations' power to allocate housing in their communities. It does not require First Nations to report on how or to whom houses are allocated. As a result, ISC is unable to assess whether individual needs are met. Moreover, as part of the reconstruction efforts, ISC funded the construction of new collective infrastructure. It is difficult to measure the value of that infrastructure in individual terms.

[107] Second, it was reasonable to rely on the fact that the occupancy rate in DRFN has been brought from approximately 3.8 to approximately 3.3. In doing so, ISC recognized that it was necessary to build more houses than existed in 2011, because DRFN's population had increased in the meantime. This also constituted an improvement in comparison to the situation before the flood and gave effect to the promise to "build back or better." I also note that ISC's calculation includes the 45 families who have not been allocated houses so far, comprising 86 persons,

according to the Red Cross list. If those persons are excluded from the calculation, the occupancy rate is brought down to approximately 2.2.

[108] It was also reasonable to rely on the fact that DRFN's occupancy rate was significantly below the average occupancy rate of Manitoba First Nations. In doing so, I am not suggesting that an inadequate situation should be used as a yardstick. However, where budgetary resources are limited, it is not unreasonable to allocate them where the needs are most important first.

[109] Third, in my view, ISC was not required to match a lower target. Such a target would be difficult to define in the abstract. The parties did not suggest any basis for saying that the occupancy rate should be, for instance, 3.0, 2.8 or 2.5. Moreover, one should not lose sight of the purpose of the EMAP program, under which the evacuee benefits are funded – it is to restore the community to its pre-emergency state, not to fulfil housing needs that were then unmet.

[110] Fourth, it was reasonable to take into account the fact that the Red Cross list was potentially inaccurate and contained the names of persons that ISC described as "false evacuees," as well as the fact that DRFN has been able to keep certain old houses. In other words, because the allocation of houses is a matter for DRFN, and acknowledging the unreliability of the information before him, the Regional Director reasonably based his decision on what appeared to be the most reliable source of information to calculate the rate of occupancy, namely, the Red Cross evacuee list.

2019 FC 630 (CanLII)

[111] There is little information in the record as to how the Red Cross list was compiled. The FAQ documents and the agreement between ISC and the Red Cross suggest that names were put on that list with the consent of both DRFN and ISC.

2019 FC 630 (CanLII)

[112] DRFN has suggested that the list is incomplete and under-estimates the number of persons who currently live in the community or wish to return there. Chief John Stagg, in cross-examination (AR at 757-758), suggested as much, but it appears that he was mainly referring to the fact that some DRFN members who did not reside in the community might choose to move there in the future. In an affidavit filed pursuant to a direction I gave after the hearing, Mr. Emery Stagg provided additional information as to the allocation of houses. He indicated that the number of persons indicated on the Red Cross list for each household is not necessarily accurate. In an unspecified number of cases, relatives of the head of the household should be added to the list.

[113] On the other hand, there are indications that the list may over-estimate the housing needs of DRFN members. In his affidavit, Aaron O'Keefe states that he had observed that a number of houses existing in 2011 had not been demolished: RR at 8, para 21. This appears to be the basis of a statement to that effect in the April 26, 2018 decision note. DRFN did not cross-examine Mr. O'Keefe on that subject nor otherwise challenge that statement. Moreover, the Attorney General underlined that the Red Cross list contains six pairs of single persons listed as heads of households bearing the same family names who appear to share accommodations, as well as one case of a person who appears to share accommodations with another person bearing the same family name and two dependents.

[114] In those circumstances, it was reasonable for ISC to calculate the occupancy rate on the basis of the Red Cross list. Before leaving that topic, I would simply observe that ISC made a presentation to DRFN members in February 2018, which compared the occupancy rates of DRFN before the flood and after reconstruction with those of Manitoba First Nations and Manitoba in general, in support of its position that the emergency would soon be over: Affidavit of Aaron O'Keefe, RR at 28. DRFN did not seek to correct those numbers or to provide its own calculations.

2019 FC 630 (CanLII)

(3) Failure to Take Into Account Individual Situations

[115] From the above, we can conclude that the Regional Director General reasonably concluded that, collectively, DRFN now has enough housing available to put an end to the evacuee benefits program. But DRFN argues that this is not enough – the Regional Director General also had to consider each evacuee's personal circumstances. To put this bluntly, benefits should not be cut where that would result in sending a family to the street. In that perspective, "need" refers not only to a collective assessment of housing needs, but also to an individual, family-by-family assessment of housing arrangements. According to DRFN, this requires ISC to examine the circumstances of each person whose name appears on the Red Cross list, to ensure that appropriate living arrangements are available before evacuee benefits are terminated for that person.

[116] To define what is appropriate, DRFN referred to "national occupancy standards" published by CMHC. Those standards define the number of rooms that a house should have

depending on the composition of the family. I have no information as to the legal status of those standards.

[117] In this regard, DRFN submitted the affidavits of five of its members to whom no house has been allocated and who would have nowhere to live if their benefits are terminated. These witnesses explain how the threat to cut evacuee benefits made it difficult for them to conclude or renew satisfactory rental arrangements. Some describe their living conditions as “couchsurfing” with friends or family.

[118] I have much sympathy for persons who might suddenly lose the source of income that they have used over the last few years to pay for their rent. However, I have come to the conclusion that the Regional Director General did not have to consider individual situations before terminating the evacuee benefits program.

[119] The basic reason is simple: individual situations are the product of housing allocation decisions made by DRFN, over which ISC has no control, as well as the individual choices of the persons to whom houses have been allocated, regarding who will be invited to reside in their houses.

[120] In all fairness, ISC cannot be required to consider individual situations unless it is given all the information about the process of allocation and its outcome – which house was allocated to whom and who lives in each house? It would also be unfair to require ISC to remedy individual situations when it did not make the allocation decisions that gave rise to those

2019 FC 630 (CanLII)

situations. Moreover, ISC cannot be responsible for the consequences of individual choices as to who will live together. For example, DRFN's submissions refer to the situation of a couple who divorced during the evacuation – should they now be required to share a house in the newly rebuilt community? Obviously, people cannot be forced to live together against their wishes. However, such a situation cannot have the effect of increasing ISC's responsibility. Likewise, the situation of Tanita Cruly, which was often mentioned as an example in DRFN's argument, is not different from that of many First Nations young adults across the country who are on the waiting list for a house in their community. While this may cause personal hardship, the evacuee benefits program was not meant to address that situation.

2019 FC 630 (CanLII)

[121] DRFN's argument is based on the premise that every person whose name appears on the Red Cross list is entitled to a house and, in the meantime, to evacuee benefits. Yet, we know little about how that list was compiled. While it was suggested that the list includes only the names of persons residing in DRFN before the flood, it is difficult to accept that every person whose name appears on the list was a "head of household" to whom a house was then allocated. There are 115 names on the list, while there were 53 houses in DRFN before the flood. Moreover, 56 names on the list are those of single adults, with no spouses or children.

[122] Thus, the Red Cross list does not appear to be a reliable tool for ascertaining housing needs. Indeed, in response to a question I asked after the hearing, DRFN stated that the list was not necessarily accurate, in that a number of persons who are shown as single adults would actually be living with spouses, dependents or relatives.

[123] Moreover, to the extent that this Court is asked to make determinations of individual need, it should be provided with all the information required to understand why those needs are not met. One key component is the allocation of the 70 new houses to persons on the Red Cross list or other DRFN members. In this connection, it bears repeating that the satisfaction of the housing needs of DRFN members is a collaborative enterprise involving both DRFN and ISC and other federal entities. Yet, DRFN has taken the position that it need not explain its housing allocation policy and decisions, as "no one had argued that it had done anything wrong" in this regard and it could not be asked to "prove a negative." While DRFN provided some information after the hearing, this only increased the confusion, as DRFN now suggests that the Red Cross list is under-inclusive.

2019 FC 630 (CanLII)

[124] In those circumstances, it was reasonable for the Regional Director General to decline to consider the individual needs of DRFN members whose names appeared on the Red Cross list.

(4) Fiduciary Duties

[125] DRFN alleges that the termination of evacuee benefits was contrary to a fiduciary duty. These arguments do not appear to have been brought to the attention of the Regional Director General before the initial decision was made in May 2018, nor even before the decision was reiterated in August 2018. Be that as it may, DRFN has not proved that a fiduciary duty exists in this case.

[126] The Supreme Court of Canada has recognized that the relationship between the Crown and Indigenous peoples is fiduciary in nature, but that not every aspect of that relationship results

in a legally cognizable fiduciary duty: *Manitoba Metis Federation Inc v Canada (Attorney General)*, 2013 SCC 14 at paragraph 48, [2013] 1 SCR 623 [*MMF*]. A fiduciary duty may arise where the Crown assumes discretionary control over a specific Indigenous interest: *MMF*, at paragraph 49. While the Supreme Court did not exhaustively define the kinds of interests that may give rise to a fiduciary duty, until now it has applied the doctrine to collective interests in land only: *MMF*, at paragraphs 51–59; *Guerin v The Queen*, [1984] 2 SCR 335; *Blueberry River Indian Band v Canada*, [1995] 4 SCR 344; *Wewaykum Indian Band v Canada*, 2002 SCC 79, [2002] 4 SCR 245; *Williams Lake Indian Band v Canada (Aboriginal Affairs and Northern Development)*, 2018 SCC 4 at paragraphs 52–53, [2018] 1 SCR 83; see also *Coldwater Indian Band v Canada (Indian and Northern Affairs)*, 2017 FCA 199 and, in a somewhat different context, *Caron v Alberta*, 2015 SCC 56 at paragraph 106, [2015] 3 SCR 511. A fiduciary duty may also arise from an undertaking to act in the best interests of the beneficiary: *MMF*, at paragraph 50; *Alberta v Elder Advocates of Alberta Society*, 2011 SCC 24 at paragraph 36, [2011] 2 SCR 261 [*Elder Advocates*].

[127] With respect to the first source of fiduciary duties, DRFN's present claim is not based on an interest in land, or even a private law interest, over which the Crown assumed discretionary control. It must be borne in mind that the present case is not about reserve lands as such – DRFN has advanced such a claim in another court. It is not even about the construction of houses. It pertains to the payment of evacuee benefits. In *Elder Advocates*, the Supreme Court held that benefits schemes do not ordinarily give rise to fiduciary duties, at paragraph 52:

> Access to a benefit scheme without more will not constitute an interest capable of attracting a fiduciary duty. Although the receipt of a statutory benefit may affect a person's financial welfare, absent evidence that the legislature intended otherwise, the

2019 FC 630 (CanLII)

> entitlement is a creation of public law and is subject to the government's public law obligations in the administration of the scheme.

[128] I am not aware of any case in which a court held that the provision of services to members of First Nations gives rise to a fiduciary duty. In *Grant v Canada (Attorney General)* (2005), 77 OR (3d) 418 (SCJ), the Ontario Superior Court of Justice declined to strike a statement of claim alleging, among other causes of action, a fiduciary duty in the context of housing in First Nations communities. This, however, does not mean that such a duty exists. It simply means that the issue will be decided at trial. To my knowledge, no judgment on the merits has been rendered in that matter.

[129] With respect to the second source of fiduciary duties, the argument appears to be a restatement of the argument regarding legitimate expectations that I discussed above. To the extent that I found that ISC made no promise to build a house for each head of family or to provide evacuee benefits until such a house is available, there can be no promise-based fiduciary duty. ISC's policies regarding housing generally have not been put in evidence before me. It is therefore impossible for me to find any fiduciary duty based on the contents of those policies.

(5) Aboriginal and Treaty Rights

[130] DRFN also argues that it has aboriginal and treaty rights with respect to the use and enjoyment of its reserve lands or harvesting rights on its traditional territory. Some of those rights have been consolidated and merged in the *Constitution Act, 1930*. It follows, says DRFN, that ISC had a duty to consult DRFN before engaging in conduct that might affect the exercise of

2019 FC 630 (CanLII)

those rights. In this connection, it argues that the termination of evacuee benefits is linked to those constitutionally-protected rights.

[131] Even assuming the existence of those rights, and that the evacuation made it more difficult for DRFN members to exercise them, it does not follow that a duty to consult was triggered by the decision to terminate evacuee benefits. Those benefits are aimed at helping DRFN members who needed to relocate, most of them to Winnipeg, as a result of the flood. The termination of those benefits may render life in Winnipeg more difficult for those affected. However, it does not impair their practical ability to exercise their constitutionally-protected rights. Conversely, continuing those benefits will not facilitate the exercise of those rights if no additional housing is made available in the community and the affected persons must remain in Winnipeg.

2019 FC 630 (CanLII)

III. Conclusion

[132] As a result, DRFN has not shown that the decision to terminate evacuee benefits was unreasonable or reached through an unfair process. I can only express the hope that ISC and DRFN will continue to collaborate in order to better address the housing needs of DRFN members.

[133] The application for judicial review will be dismissed, with costs.

JUDGMENT in T-1600-18

THIS COURT'S JUDGMENT is that

1. The application for judicial review is dismissed;

2. The applicants are ordered to pay the costs of the respondents.

Tesla Motors Canada ULC v. Ontario (Ministry of Transportation)

Ontario Judgments

Ontario Superior Court of Justice

F.L. Myers J.

Heard: August 22, 2018.

Judgment: August 27, 2018.

Court File No.: DC 497/18

[2018] O.J. No. 4394 | 2018 ONSC 5062 | 20 C.E.L.R. (4th) 342 | 295 A.C.W.S. (3d) 659 | 144 O.R. (3d) 701 | 2018 CarswellOnt 13982

Between Tesla Motors Canada ULC, Applicant, and Ontario (Ministry of Transportation), Respondent

(68 paras.)

Case Summary

Government Law — Crown — Authority and powers — Discretionary powers — Abuse of — Application by Tesla Motors Canada to strike down decision of Ontario government to exclude Tesla from two-month extension of government subsidies for electric car buyers allowed — Government ended program but extended program for two months for consumers who bought cars before July 11, 2018 — Tesla was specifically excluded from extension by Minister of Transportation — Minister exercised discretion for improper purpose unrelated to purposes of subsidy program — Minister singled out Tesla for reprobation and harm without providing Tesla with opportunity to be heard or any fair process whatsoever — Climate Change Mitigation and Low-Carbon Economy Act, s. 7 — Public Transportation and Highway Improvement Act, s. 118(2).

Application by Tesla Motors Canada ULC (Tesla) to strike down the Ontario government's recent decision to exclude Tesla and its customers from a two-month extension of government subsidies for electric car buyers who bought cars before July 11, 2018. The government intended to end the subsidy program on September 10, 2018 but extended it for the two-month transition period. However, the government notified Tesla that the extension only applied to franchised automobile dealerships and not where vehicles were ordered directly from an original manufacturer by a consumer. Tesla argued that the government unlawfully targeted it without any rational basis. It said that had the government spoken to Tesla before excluding it from the program changes, Tesla could have shown the government that the exclusion of Tesla's customers from the two-month wind-down made no sense even on the grounds now advanced by the government. Tesla feared that it was being demonized for purposes that were outside the legitimate reach of the laws that governed electric car subsidies in Ontario.

HELD: Application allowed.

The unlawful exercise of discretion by the Minister of Transportation to implement the transition program was quashed and set aside. The decision to exclude Tesla by limiting the transition program to

franchised automobile dealerships was arbitrary and unrelated to the purposes of the statutory or regulatory discretion being exercised. The government's decision was egregious. It was made for an improper purpose that was unrelated to any of the conservationist purposes of the electric car subsidy program. The Minister singled out Tesla for reprobation and harm without providing Tesla with an opportunity to be heard or any fair process whatsoever. The decision was quashed. The Minister's unlawful exercises of discretion to implement the transition program on July 11, 2018 was set aside.

REASONS FOR DECISION

F.L. MYERS J.

The Issue

1 Tesla Motors Canada ULC asks the court to intervene on an urgent basis to strike down the government's recent decision to exclude Tesla and its customers from the two month extension of government subsidies for electric car buyers who bought their cars before July 11, 2018. Tesla argues that the government unlawfully targeted it without any rational basis. It says that had the government spoken to Tesla before excluding it from the program changes, Tesla could have shown the government that the exclusion of Tesla's customers from the two month wind-down made no sense even on the grounds now advanced by the government. Tesla fears that it is being demonized for purposes that are outside the legitimate reach of the laws that govern electric car subsidies in Ontario.

Outcome

2 For the reasons set out below, the exercises of discretion by the Minister of Transportation to create the transition program announced July 11, 2018 (as amended by the Ministry's letter to Tesla of the same date and further apparently amended in the affidavit of Vrinda Vaidyanathan sworn August 17, 2018 filed herein) under the *Electric and Hydrogen Vehicle Incentive Program* under the *Climate Change Action Plan* created pursuant to s. 7 (1) of the *Climate Change Mitigation and Low-Carbon Economy Act*, *SO 2016, c. 7* and to fund that program under s. 118 (2) of the *Public Transportation and Highway Improvement Act* are quashed and set aside.

Urgency

3 Tesla has applied to the court under s.6 (2) of the *Judicial Review Procedure Act*, *RSO 1990, c J.1*. That provision allows Tesla to bring its case before a single judge of the Superior Court of Justice rather than waiting to be heard by a three judge panel of the Divisional Court. To do so, Tesla is required to show that the matter is so urgent that it cannot wait. It has done so.

4 The government subsidy extension expires on September 10, 2018. Tesla has hundreds of cars moving to Ontario to fill some 600 orders that were outstanding on the July 11, 2018 cutoff date. While it may well be possible to measure the harm to customers and to Tesla in dollars and cents if the government has acted illegally, the harm can be prevented altogether by a hearing now. The matter is unfolding in real time. If the government's program is unlawful, it can be struck down to avoid the creation of urgency for hundreds of families, order cancellations, litigation, and further harm to Tesla's goodwill. While everyone's rights could possibly be vindicated by damages claims in the fullness of time, lawsuits for $14,000 are uneconomical, will take too long, and will cause harm and distress that in my view would amount to a failure of justice as compared to simply resolving the matter before the September 10 cutoff.

5 The lawyers for the Province of Ontario argued that the matter was not urgent, but frankly and quite fairly agreed that they were prepared to argue the case on its merits if need be. For the reasons set out in the preceding paragraph, need be.

Background Facts

6 While there is a fair amount of technicality involved in the funding of the various government programs involved, I do not need to go through every last detail in order to make the issues and outcome understandable. Moreover, the need for an urgent resolution precludes a voluminous decision.

7 The legal authority for government funding of electric vehicle subsidies is provided to the Minister of Transportation in s. 118 (2) of the *Public Transportation and Highway Improvement Act*, *RSO 1990, c P.50*:

> (2) On and after January 1, 1997, the Minister may, out of money appropriated therefor by the Legislature and upon such conditions as he or she considers advisable, provide grants, loans

> and other financial assistance to any person...for specific projects that the Minister considers to be of provincial significance.[1]

8 For many years the province has had programs established under various environmental statutes and regulations to promote zero emission motor vehicles. Two of these programs provided subsidies to buyers of vehicles which the government listed as environmentally approved and eligible for subsidies on lists under the two programs. Subsidies could also be paid to the sellers directly if they passed on the savings to their customers. Most recently, the applicable programs were funded through "cap-and-trade" tax revenues.

9 Since March of this year, there has been no funding available for cars priced at more than $75,000. Since then, only Tesla customers who buy its Model 3 vehicle could qualify for subsidies. Tesla points out that there are luxury brand cars that remain on the approved list that are made by other manufacturers and sell for more than its Model 3.

10 On July 3, 2018 the government announced that it had revoked the cap-and-trade regulation and would begin the orderly wind-down of programs funded through cap-and-trade tax revenues.

11 On July 11, 2018, the government announced that it was ending the programs to fund electric cars. However, the announcement included a two month extension for some orders that had already been placed. The government announced two conditions under which it would continue to pay subsidies through the two month transition period:

> Applications will be accepted from dealerships, car owners or prospective car owners only if one of the following conditions has been met:
>
> * Eligible vehicles that have been delivered to consumers, registered, and plated on or before July 11 will receive the incentive.
>
> * Inventory that dealers have on lots or orders made by dealerships with manufacturers on or before July 11, will also be honoured for the incentive provided that the vehicle is delivered to consumers, registered, and plated by September 10.

12 The two terms of the transition plan aim at different things. Under the first bullet customers were protected as far as the government was willing to do so. Customers will receive subsidy payments provided they had received their cars by the July 11 cancellation date. It should be noted that the government application forms signed by all car purchasers who sought subsidies included the following terms:

> You agree that all decisions made by the Province of Ontario relating to [the program], including applicant and vehicle eligibility and the incentive amount, are final and binding and cannot be appealed.
>
> You acknowledge that...
>
> (e) the program may be changed or cancelled by the Province of Ontario at any time for the reason whatsoever, without notice...

(g) funding for [the program] is subject to appropriation from the legislature and is not guaranteed for any specific applicant.

13 There is no disagreement among the parties that governments are entitled to cancel their subsidy programs at any time. No one has a right to receive government funds. In *Skypower CL 1 LP v Ontario (Minister of Energy)*, 2012 ON SC 4979, at para. 84, Justice Nordheimer (as he then was) wrote for the Divisional Court:

> The applicants assumed the same risk making their applications for the [subsidy] program, that is, that the terms of the program might change because of changing government policy. While it may sometimes seem unfair when rules are changed in the middle of a game, that is the nature of the game when one is dealing with government programs.

14 There is no complaint in this proceeding regarding the government's right to end the subsidy to customers as it did under the first bullet above.

15 The second term of the transition program was aimed at car dealerships. The government agreed to honour subsidy requests made before July 11 provided that the cars purchased were either already on a dealer's lot or were on order by the dealer from the manufacturer before that date. The government provided two months, to September 10, for cars to be delivered by manufacturers to dealers and then to the customers who had already ordered them by July 11.

16 The government's announcement said that further letters would be sent to car dealers to explain the terms of the transition program. Tesla Motors Canada ULC is a registered dealer in Ontario. It is a direct or indirect wholly-owned subsidiary of the Tesla US auto manufacturer. However, although it is a duly registered Ontario dealer to whom the transition program as announced applied, it did not receive the government's letter. Rather, the government sent a customized letter just to Tesla. In this letter, the government explained that, although not stated in its public announcement, the transition program only applied to orders for cars made by a "franchised automobile dealership" and not where vehicles "have been ordered directly from an original manufacturer by a consumer."

17 As the government believed that all of Tesla's cars are ordered by customers online directly from the US parent manufacturer, this seemed to exclude Tesla customers from the transition program. However, the government may not have known that Ontario customers actually buy their cars from Tesla Motors Canada ULC - a registered Ontario dealership. Like the other major car manufacturers, Tesla US sells into Ontario through dealerships. That left only the word "franchised" as the term that excluded Tesla and its customers from the program. Tesla Motors Canada ULC is not a franchised business.

18 In trying to understand why customers who bought from franchised dealerships would remain qualified for subsidies rather than those who bought from dealerships integrated into the manufacturer's business model, Tesla points to a statement made to the Ontario Legislative assembly on July 26, 2018 by the Minister of Transportation who said:

> But we also were extremely fair in the way that we ended it. On July 11, we announced that until September 10, all dealers and anyone who had purchased a vehicle or had a vehicle on order, as

> long it was plated and delivered by September 10, **other than Tesla**--they would receive their rebate. [Emphasis added.]

19 The Minister said nothing about franchised dealers and simply referred to Tesla as having been excluded. On July 31, 2018, the Parliamentary Assistant to the Minister of the Environment, Conservation, and Parks explained to the Legislature the government's disagreement with certain policies of the prior government as follows:

> ... Under the current cap-and-trade program, the previous Liberal government used the funds they raised to balance their budget. I'm going to say it, Mr. Speaker, because that's what they did. We have seen that it actually has not reduced greenhouse emissions. Not only did they use it to balance their budget, they used it for programs like **Tesla subsidies**, through the greenhouse gas reduction account. [Emphasis added.]

20 She also told the Legislature that the former Environment Minister's Chief of Staff "landed a job [sic] none other than Tesla." She said,

> So I don't know if that's unethical or a conflict of interest, but all of a sudden, in that same month as he landed that great job at Tesla, they announce a major subsidy for a program providing up to $14,000 to consumers who buy electric cars like Tesla. Where's the accountability?

21 Once again, Tesla says, the government has singled it out for vilification. The zero emission vehicle subsidies applied to cars produced by some 17 manufacturers. Tesla complains that the government is punishing Tesla for its success in producing electric vehicles in accordance with the government's own environmental goals.

22 In addition, the Premier of Ontario recently stating the following in an interview with a member of the press:

> ...with the folks from Tesla, the common folks here in Hamilton have a big problem, giving rebates of up to $16,000 with our hard-earned money, to millionaires buying $80,000 cars, $100,000 cars. Uh we have an issue with that, we want to protect the little person.
>
> ...
>
> Tesla can do what they want, but maybe they should think of coming here, and opening up a manufacturing facility, like the big five are. That's what I have, uh, message for Tesla. Stop trying to get rebates for your millionaire buddies, and putting it on the backs of the hardworking people of Hamilton and the rest of the hardworking people of Ontario.

23 The evidence discloses that rebates are limited to $14,000, the maximum car price for which subsidies may be paid is $75,000; not $80,000 or $100,000, and Tesla's Model 3 is not the most expensive car receiving subsidies under the program.

24 Tesla tried to communicate with the Ministry of Transportation several times since the announcement of the cancellation of the subsidy programs and the terms of the transition program. The government has not responded.

25 There are approximately 600 customers in Ontario who had placed orders for Tesla Model 3 vehicles with Tesla Motors Canada ULC dealerships as at July 11, 2018. There were 34 unallocated vehicles on Tesla dealership lots at that time. While the government relies on Tesla's website to say that Tesla cannot deliver its cars in time, Tesla has adduced evidence that there are 256 vehicles currently on their way to Ontario by train and 63 more that are currently headed here by truck.

26 Tesla says that not only are its customers injured by the government's adoption of the franchised business term of the transition program, but it is harmed as well. It has suffered 175 order cancellations since July 11, 2018. More can be expected. In addition, the targeting and vilification by the government raises a legitimate concern, it says, that its business is not welcome in Ontario and that potential customers will likely be influenced to avoid purchasing vehicles from Tesla as a result.

27 The government's evidence was adduced through Vrinda Vaidyanathan. She is the Acting Manager of Policy and Programs in the Assistant Deputy Minister's Office, Ministry Of Transportation - Policy and Planning Division. She participated in the events leading to the adoption of the transition program although she was not a decision-maker.

28 Ms. Vaidyanathan swears that the transition program was, "only extended to independently-owned, franchised dealerships." This is the first time that the phrase "independently-owned" has appeared in any discussion of the terms of the transition program.[2] The government argues that it is totally within its discretion to determine that it will provide brief further funding to protect small to medium-sized Ontario businesses from the risk of harm and economic loss. The government says that if dealers had cars on their lots or already on order on July 11th, the cancellation of the subsidy could leave the dealers exposed to loss at the hands of the vehicle manufacturers. That is, customers may cancel their purchases after the dealerships had already ordered and had become required to pay the manufacturers for the cars. The government extended the subsidy program to protect small to mid-sized dealerships from this potential harm.

29 On cross-examination Ms. Vaidyanathan did not know whether any car dealerships in Ontario are very large businesses and are not small to mid-sized dealerships as defined by the Ministry. Tesla asserts that documents obtained online show that some very substantial businesses own large numbers of dealerships in Ontario. There is no admissible evidence before the court to support the truth of that submission. But it was clear that the witness was unable to point to any evidence of any consideration having been given to the actual economic design of the motor vehicle dealership industry in Ontario. Similarly, there is no evidence that Ontario dealers are more or less at risk to manufacturers than is Tesla Motors Canada ULC. With 17 different manufacturers and hundreds or thousands of dealerships operating in Ontario, one might surmise that there could be significant differences in the contractual terms applicable among dealers and manufacturers. There is no evidence before the court on the terms of payments due from dealers to manufacturers or whether refunds are available to any dealership for car orders that may be cancelled after the July 11 termination of the subsidy program.

30 The government has not produced any contemporaneous documents supporting its decision to include only purchases from franchised dealers in the transition program. It rightly claims that the doctrine of Executive Privilege protects some cabinet level documents from disclosure. However, if it had studies or business case rationales to explain or support the economic or business basis for the exclusion of non-

franchised dealerships (i.e. Tesla) from the transition, those documents would not likely be privileged. While this matter has been brought on quickly, there is a limited universe of documents that are fundamental to the decision and none has been accessed by the government or its witness for this proceeding. In fact, the government's witness confirms that she only looked at documents printed or put to her on the day that she swore her affidavit.

Analysis

(i) The Court does not Review the Wisdom of Government Policy Decisions

31 It is common ground that the decisions in this case were taken by the cabinet. That is not unusual or objectionable. Hogg, *Constitutional Law of Canada*, 5th ed., Vol 1, page 9-11 (Toronto, Carswell, loose-leaf).

32 The government says that its core policy decisions, including decisions to spend money, are not justiciable. That is, in our constitutional framework, some decisions are meant for the government alone. They are usually policy decisions or decisions that are highly political in nature. If those decisions are unwise or unpopular, then the citizens can vote for a new government at the next election. The court's role, by contrast, is to assess the legality or lawfulness of actions. The court has no business assessing the wisdom of core government policy decisions.

33 In *Hamilton-Wentworth (Regional Municipality) v. Ontario (Minister of Transportation)* (Div. Ct.), *1991 CanLII 7099* (ON SC), the Divisional Court was asked to review a government decision to stop funding a municipal expressway construction project. The court held:

> 42. The evidence leads to the conclusion that the decision was one announced by the Minister after approval of the Cabinet and in substance constitutes an expression of the intention of the government not to provide any further funding for construction of the project. The government has the right to order its priorities and direct its fiscal resources towards those initiatives or programs which are most compatible with the policy conclusions guiding that particular government's action. This was simply a statement of funding policy and priorities and not the exercise of a statutory power of decision attracting judicial review.
>
> 43. While it would appear that in basing its decision on environmental concerns the government is ignoring the statutory framework established to deal with environmental matters, that does not affect its jurisdiction to make the decision in question. Such a decision is not subject to judicial review. It is in substance a decision for the disbursement of public funds. It has been a constitutional principle of our parliamentary system for at least three centuries that such disbursement is within the authority of the legislature alone. The appropriation, allocation or disbursement of such funds by a court is offensive to principle.

34 In *Hamilton-Wentworth*, the court was very careful to state, in paras. 39, 46, and elsewhere in the decision, that in exercising its authority to decline funding, the government was not exercising a statutory authority. Rather it was determining its funding priorities on a policy basis and it must be free to do that. In that case, it decided to stop funding a project and nothing more. The court found that it does not set funding priorities for government and it does not tell the government how to spend public funds.

35 But the court went on to consider the decision of Grange J. in *Re Metropolitan General Hospital and Ontario (Minister of Health)*, 1979 CanLII 2058 (ON SC), and held:

> Like Grange J., I am forced to the conclusion that it is not for any court to oversee a Minister of the Crown in policy decisions or in the exercise of his or her discretion in the expenditure of public funds entrusted to his or her department by the legislature. As Grange J. said, "***The propriety of the payment or the withholding of payment may in some circumstances be inquired into***; the wisdom of the decision can never be the subject of judicial review. It is a political and not a judicial problem." [Emphasis added]

36 Justice Grange dealt with a key distinction. Just as it is not for the court to tell the government that it must fund a highway or it must spend public funds on this or that project, it is very much the role of the court to inquire into the *propriety* or the lawfulness of a payment or withholding of a payment under statutory or regulatory laws.

(ii) The Court Reviews the Lawfulness of Operational Exercises of Statutory and Regulatory Discretion

37 The cabinet decided to cancel cap-and-trade and to stop funding projects paid from cap-and-trade tax revenues. Those are policy decisions without doubt. They set high level political direction that can then be implemented by statutory or regulatory changes. Whether the decisions were good decisions or not will only be decided in the court of public opinion.

38 The cabinet then made a second decision. It decided to continue to fund the electric car subsidy program for a brief transition period of two months. The project that they decided to fund was one established under environmental legislation relating to the promotion of clean energy and electric motor vehicles. The decision to continue to fund that particular program for two months was also a political or policy decision in my view. It too was a high level or abstract decision about policy direction that required implementation by statutory or regulatory changes.

39 But then the cabinet or the Minister made a third decision. They actually established the terms and conditions of the electric vehicle subsidy transition. They looked at the program under the environmental regime and under the power to set terms and conditions in the *Public Transportation and Highway Improvement Act* and they designed program terms so as to include only franchised dealers and to exclude Tesla.

40 In my view, in setting the operative terms of the transition program, the government changed its role from policy-setting at a high level of abstraction to executive program administration. Cabinet descended from its high core policy role as priority-setter into the field of discretionary decision-maker under the environmental regulatory regime and discretionary term-setter under s. 118 (2) of the *Public Transportation and Highway Improvement Act*. It effectively told the Ministry to design a program to exclude from environmental subsidies non-franchise dealers i.e. Tesla.[3] It is the legality of that decision under the *Public Transportation and Highway Improvement Act* and the applicable environmental laws that is the subject of this application.

(iii) The Law of Judicial Review has narrowed the Class of Non-Justiciable Decisions

41 The law of judicial review of government action has evolved. Mr. Justice Stratas discussed the current place of judicial review in our constitutional structure recently in *Tsleil-Waututh Nation v. Canada (Attorney General)*, *2017 FCA 128* (CanLII), at para. 78:

> In judicial review, the reviewing courts are in the business of enforcing the rule of law, one aspect of which is "executive accountability to legal authority" and protecting "individuals from arbitrary [executive] action": *Reference Re Secession of Quebec*, *1998 CanLII 793* (SCC), *[1998] 2 S.C.R. 217*, *161 D.L.R. (4th) 385* at paragraph 70. Put another way, all holders of public power are to be accountable for their exercises of power, something that rests at the heart of our democratic governance and the rule of law: *Slansky* at paras. 313-315. **Subject to any concerns about justiciability**, when a judicial review of executive action is brought the courts are institutionally and practically capable of assessing whether or not the executive has acted reasonably, *i.e.*, within a range of acceptability and defensibility. That assessment is the proper, constitutionally guaranteed role of the courts within the constitutional separation of powers: *Crevier v. A.G. (Québec) et al.*, [Emphasis added.]

42 Subject to the issue of justiciability of the government's actions, judicial review of executive action is a fundamental pillar of our legal and constitutional structure.

43 In *Black v Chretien*, the Court of Appeal considered the question of justiciability of Crown prerogatives such as its power to spend public funds and to set funding priorities. The Court of Appeal adopted the following words of the House of Lords from *Civil Service Unions v Minster for the Civil Service*, [1985] 1 AC 374 at p. 417:

> If the executive in pursuance of the statutory power does an act affecting the rights of the citizen, it is beyond question that in principle the manner of the exercise of that power may today be challenged on one or more of the three grounds which I have mentioned earlier in this speech. If the executive instead of acting under a statutory power acts under a prerogative power and in particular a prerogative power delegated to the respondent under article 4 of the Order in Council of 1982, so as to affect the rights of the citizen, I am unable to see, subject to what I shall say later, that there is any logical reason why the fact that the source of the power is the prerogative and not statute should today deprive the citizen of that right of challenge to the manner of its exercise which he would possess were the source of the power statutory. In either case the act in question is the act of the executive.

44 Justice Laskin, speaking for the Court of Appeal, at para. 50 of *Black*, wrote:

> The court must decide "whether the question is purely political in nature and should, therefore, be determined in another forum or whether it has a sufficient legal component to warrant the intervention of the judicial branch": Reference re Canada Assistance Plan (British Columbia), *1991 CanLII 74* (SCC), *[1991] 2 S.C.R. 525* at p. 545, *58 B.C.L.R. (2d) 1*.

45 Justice Laskin adopted the test set out by the House of Lords as follows:

> ...the exercise of the prerogative will be justiciable, or amenable to the judicial process, if its subject matter ***affects the rights or legitimate expectations of an individual***. Where the rights or legitimate expectations of an individual are affected, the court is both competent and qualified to judicially review the exercise of the prerogative. [Emphasis added.]

46 Under this test, matters of high policy i.e. purely political matters, like a decision to sign a treaty, or to declare war, or to cancel a subsidy program, affect no one's individual rights or legitimate expectations and, as such, are not subject to judicial review. I would add that, like the decision to cancel windmill subsidies in *Skypower*, the decision to cancel the cap-and-trade program and the electric car subsidy program are such decisions. At the opposite end of the spectrum, Justice Laskin referred to more mundane executive decisions such as issuing a passport. He wrote:

> A passport is the property of the Government of Canada, and no person, strictly speaking, has a legal right to one. However, common sense dictates that a refusal to issue a passport for improper reasons or without affording the applicant procedural fairness should be judicially reviewable.

47 I note that in *Hamilton-Wentworth*, the Divisional Court had determined that the "doctrine of legitimate expectations" was not itself a basis to make government decisions justiciable. It is apparent that *Black* has changed the law in that regard and narrowed the class of non-justiciable activities to those which do not affect the rights or reasonable expectations of a person. The doctrine of legitimate expectations, as recognized in *Black*, does not create substantive rights. That is, as noted above, no one has a right to receive government subsidies generally. But, as found by the Court of Appeal, in appropriate cases the court will review executive action taken "**for improper reasons or without affording the applicant procedural fairness**."

(iv) The Doctrine of Improper Purpose Limits Executive Statutory and Regulatory Discretion

48 Among the grounds advanced by Tesla in its notice of application to challenge the government's decision in this case, Tesla argues that the decision to exclude it and its customers from the transition program has "no possible connection" to the conservationist purposes of the environmental laws under which electric vehicle subsidy program exists.

49 Without a detailed analysis of the complex environmental regulatory scheme, no one disagreed that the purposes of the electric car subsidy program included: reducing greenhouse gases in response to climate change, protecting the environment, and assisting Ontarians to transition to a low-carbon economy. The purposes of the *Public Transportation and Highway Improvement Act* include the development, construction, and operation of public highways in Ontario. Tesla argues that the decision to exclude it from the transition program met none of these purposes, is without a legitimate justification, and prejudiced its interests in an unfair manner.

50 Since at least 1959 it has been established in Canada that courts have the authority to review executive action taken for an improper purpose. In that year, the Supreme Court of Canada released its seminal decision *Roncarelli v Duplessis*, *[1959] SCR 121* at p. 143. In that case, the Premier of Québec had intervened in a liquor license proceeding and directed that Mr. Roncarelli's business be denied its liquor license because he was a member of the Christian religious sect known as Jehovah's Witnesses. In finding

the Premier's intervention unlawful, Mr. Justice Ivan Rand wrote at p. 142:

> That, in the presence of expanding administrative regulation of economic activities, such a step and its consequences are to be suffered by the victim without recourse or remedy, [and] that an administration according to law is to be superseded by action dictated by and according to the arbitrary likes, dislikes and the irrelevant purposes of public officers acting beyond their duty, [both] would signalize the beginning of disintegration of the rule of law as a fundamental postulate of our constitutional structure.

51 Justice Rand explained further at p. 140:

> In public regulation of this sort there is no such thing as absolute and untrammeled "discretion", that is that action can be taken on any ground or for any reason that can be suggested to the mind of the administrator; no legislative Act can, without express language, be taken to contemplate an unlimited arbitrary power exercisable for any purpose, however capricious or irrelevant, regardless of the nature or purpose of the statute... "Discretion" necessarily implies good faith in discharging public duties; there is always a perspective within which a statute is intended to operate; and any clear departure from its lines or objects is just as objectionable as fraud or corruption. Could an applicant be refused a permit because he had been born in another province, or because of the colour of his hair? The ordinary language of the legislature cannot be so distorted.

52 Justice Rand defined "good faith" in the exercise of statutory discretion in this way:

> ...carrying out the statute according to its intent and for its purpose; it means good faith in acting with a rational appreciation of that intent and purpose and not with an improper intent and for an alien purpose; it does not mean for the purposes of punishing a person for exercising an unchallengeable right: it does not mean arbitrarily and illegally attempting to divest a citizen of an incident of his civil status.

53 Courts have since that time exercised the authority to ensure that executive discretion is not exercised for an improper purpose i.e. a purpose that is outside of the purposes for which the statute or regulation created the discretionary power that is purportedly exercised. For example, in *Re Doctors Hospital and Minister of Health et al.*, *(1976), 12 OR (2d) 164*, the Divisional Court struck down orders in council that revoked the operating authority of four hospitals under the *Public Hospitals Act*. The Minister of Health wrote letters to the hospital administrators advising that the government of the day had decided to close the hospitals to save costs as part of a "plan for greater overall cost-efficiency in the provincial health sector." It was clearly stated that the decision to close the hospitals was a funding decision in light of government funding priorities.

54 The statutory authority of the Minister of Health to close hospitals at the time was set out in s. 4 (5) of *The Public Hospitals Act*, RSO 1970, c 378:

> Any approval given or deemed to have been given under this Act in respect of a hospital may be suspended by the Minister or revoked by the Lieutenant-Governor in Council.

55 In that case, the court rejected the same arguments that counsel for the government has made in this

case. The court held that cabinet's power to suspend or revoke hospitals' operating authority set out in *The Public Hospitals Act* was intended to deal with matters of health and hospital administration. It was not intended to be used as a means of exercising financial controls over hospitals. The court held:

> In the absence of clear words in the statute, the discretion granted to the Lieutenant-Governor in Council could only be used to pursue the policy and objects of the act, which are be determined according to the standard canons of construction and to that extent, at least, reviewable by the Courts. That we take to be the view of Mr. Justice Lacourciere expressed Multi-Malls at page 18 of his reasons, where he in turn was relying upon and to a certain extent interpreting the speech of Lord Reid in Padfield et al. v Minister of Agriculture, Fisheries & Food et al., [1968] A.C. 977. At page 1030, Lord Reid stated:
>
> > [...]In a matter of this kind it is not possible to draw a hard and fast line, but if the Minister, by reason of his having misconstrued the Act or for any other reason, so uses his discretion as to thwart or run counter to the policy and objects of the Act, then our law would be very defective if persons aggrieved were not entitled to the protection of the court.[...]

56 In *Multi-Malls Inc. et al. and Minister of Transportation and Communications et al.*, 1976 CANLII 623 (ON CA) the Court of Appeal applied the same principles. In that case, a Minister had refused to issue permits under the law regulating highways as a means to prevent Multi-Malls from developing a shopping centre contrary to government planning policy. The court struck down the Minister's exercise of discretion under the highway statute for this reason:

> I am of opinion that the Minister of Transportation and Communications allowed himself to be influenced by extraneous, irrelevant and collateral considerations which should not have influenced him in the exercise of his discretion to refuse the entrance permit. It seems clear that the purpose of the Act in general is not to ensure proper land use planning but generally to control traffic. All of its provisions deal with the procedure for the designation, acquisition, construction, maintenance and financing of roads, for determining the need for and use of, King's Highways, secondary highways, tertiary resource, industrial, county, suburban, township, city, town, village and development roads.

57 In *Katz Group Canada Inc. v. Ontario (Health and Long Term Care)*, *2013 SCC 64* (CanLII) the Supreme Court of Canada affirmed the *Doctors Hospital* case but with an important gloss. At para. 28 of the reasons, Abella J. wrote:

> It is not an inquiry into the underlying "political, economic, social or partisan considerations" (*Thorne's Hardware Ltd. v. The Queen*, *1983 CanLII 20* (SCC), *[1983] 1 S.C.R. 106*, at pp. 112-13). Nor does the *vires* of regulations hinge on whether, in the court's view, they will actually succeed at achieving the statutory objectives (*CKOY Ltd. v. The Queen*, 1978 CanLII 40 (SCC), *[1979] 1 S.C.R. 2*, at p. 12; see also *Jafari*, at p. 602; Keyes, at p. 266). They must be "irrelevant", "extraneous" or "completely unrelated" to the statutory purpose to be found to be *ultra vires* on the basis of inconsistency with statutory purpose (*Alaska Trainship Corp. v. Pacific Pilotage Authority*, 1981 CanLII 175 (SCC), *[1981] 1 S.C.R. 261*; *Re Doctors Hospital and Minister of Health* (1976), 1976 CanLII 739 (ON SC), *12 O.R. (2d) 164* (Div. Ct.); *Shell Canada Products Ltd. v. Vancouver (City)*, *1994 CanLII 115* (SCC), *[1994] 1 S.C.R. 231*, at p. 280; *Jafari*, at p. 604;

Brown and Evans, at 15:3261). In effect, although it is possible to strike down regulations as *ultra vires* on this basis, as Dickson J. observed, **"it would take an egregious case to warrant such action"** (*Thorne's Hardware*, at p. 111)[4] [Emphasis added.]

(v) The Minister Exercised his Discretion for an Improper Purpose

58 Premier Ford's interview and the speeches in the Legislature are not admissible for the purpose of proving that the transition program has a colourable or improper purpose. "Speeches and public declarations by prominent figures in the public and political life" are political and are not credible sources of statutory or regulatory intention. *Reference re Upper Churchill Water Rights Reversion Act*, *[1984] 1 SCR 297*, at pa. 318.

59 It is clear nevertheless that the transition program had a distinct and unique effect on Tesla and that this was known and intended throughout. The government sent a unique letter to Tesla showing that it was treating Tesla differently than all other vehicle sellers in Ontario because it was not a franchised business -- a term that the government had not announced publicly.

60 As discussed above, if cabinet's goal is to protect small to mid-sized dealerships from the risk of loss if customers cancel orders and if the dealers are left with cars on their lots or on order and if they cannot sell the cars to others or return those cars to the manufacturers for refunds, then including franchised dealers and effectively excluding Tesla from the transition is no answer. Including franchised dealers is grossly over-inclusive as it catches all dealerships other than Tesla whether they are huge businesses or small. Including all franchised businesses does nothing to determine if:

a. any customer of a dealership cancelled an order;

b. if an order was cancelled, whether the dealer could sell the car anyway;

c. if an order was cancelled and the dealer could not sell the car, whether the dealer could cancel the order with the manufacturer; and

d. if an order was cancelled and the dealer could not sell the car or cancel the order, whether the dealer could return the car to the manufacturer or otherwise deal with the manufacturer to protect the dealer in some other way (such as adjusting its incentives, rebates, and the like).

That is, the discretionary decision to limit the transition to franchised dealers is not at all related to either protecting small to mid-sized dealers or to protecting dealers who may suffer losses to manufacturers. All it seems to do is to include in the transition all dealerships in Ontario who had eligible cars on their lots or on order except Tesla.[5] This conclusion is buoyed by the evolution of the program terms from the initial public announcement that included all dealers, to the letter to Tesla including only franchised dealers, to the affidavit filed herein that includes only "independently-owned" franchises. The evolution of the program terms propounded by the Minister lays bare the targeting of Tesla.

61 I am not assessing whether the goal of protecting small to mid-sized businesses that may be at risk of losses is wise policy. Rather, I am considering the actual exercise of discretion under which the Minister has adopted a condition of the transition program to limit it to franchised dealers as a manner to carry out that policy. Whether the goal was wise or not, the means implemented by the exercise of statutory and

regulatory discretion was arbitrary; it was unrelated to the achievement of the supposed policy goal. It was also not related to any of the conservationist purposes of the electric car subsidy program. It was not related to any purpose under the *Public Transportation and Highway Improvement Act.*[6] Therefore it cannot stand.

62 The government chose to refrain from filing contemporaneous evidence apart from the *ex post facto* explanation provided by its witness. While there was no formal "record of proceedings" for this type of decision-making, as Justice Stratas noted in *Tsleil-Waututh* at para. 79, it is not open to the government to say, "Trust us, we got it right."

63 Moreover, where an executive decision singles out a person or business for financial and reputational harm and is taken on certain assumed facts, basic fairness calls out for the target to be entitled to provide a response. The government's asserted rationale for limiting the transition program to franchised dealerships is laden with factual assumptions that were susceptible to being proved or disproved with evidence. Tesla was not asked to provide any facts that might have been relevant to those factual assumptions.

64 In conclusion, the decision to exclude Tesla by limiting the transition program to only franchised dealerships is arbitrary and unrelated to the purposes of the statutory or regulatory discretion being exercised. In my view, it is egregious, as that term was used by Dickson J. above, because, not only was it made for an improper purpose, but because the Minister singled out Tesla for reprobation and harm without provided Tesla any opportunity to be heard or any fair process whatsoever.

Remedy

65 Tesla asks that I set aside the limitation of the transition program to franchised dealers. However, doing that effectively re-shapes the transition program and requires the government to fund subsidies to Tesla's customers. I am not prepared to make such an order. The government's counsel argues that the inclusion of only franchised dealers is part and parcel and inextricably intertwined with the terms implemented to construct the transition program. I agree. If the government wants to transition out of the electric car subsidy program, the Minister must exercise his operational discretion in a lawful manner. He has yet to do so. I therefore quash and set aside the Minister's unlawful exercises of discretion to implement the transition program announced July 11, 2018 (as amended by its letter to Tesla of the same date and further amended in the affidavit filed herein) under the *Electric and Hydrogen Vehicle Incentive Program* under the *Climate Change Action Plan* created pursuant to s. 7 (1) of the *Climate Change Mitigation and Low-Carbon Economy Act*, *SO 2016, c. 7* and to fund that program under s. 118 (2) of the *Public Transportation and Highway Improvement Act*.

66 Tesla seeks costs of approximately $185,000 on a partial indemnity basis. Its efforts to contact the Ministry were never responded to. It was forced to bring urgent court proceedings to vindicate its rights. It is entitled to reimbursement for its reasonable costs.

67 The fixing of costs is a discretionary decision under section 131 of the *Courts of Justice Act*. That discretion is generally to be exercised in accordance with the factors listed in Rule 57.01 of the *Rules of Civil Procedure*. These include the principle of indemnity for the successful party (57.01(1)(0.a)), the expectations of the unsuccessful party (57.01(1)(0.b)), the amount claimed and recovered (57.01(1)(a)), and the complexity of the issues (57.01(1)(c)). Overall, the court is required to consider what is "fair and

reasonable" in fixing costs, and is to do so with a view to balancing compensation of the successful party with the goal of fostering access to justice: *Boucher v Public Accountants Council (Ontario)*, *2004 CanLII 14579* (ON CA), *(2004), 71 O.R. (3d) 291*, at paras 26, 37.

68 In my view, it is fair and reasonable, and reasonably ought to have been expected by the government, that if unsuccessful in an urgent proceeding of this magnitude it will be required to reimburse Tesla for costs of $125,000 on a partial indemnity basis all-inclusive and it is so ordered.

F.L. MYERS J.

---

1 Both the Minister's entitlement to fund and the right to impose terms and conditions are addressed by the statute. Therefore, the government's argument that the issues in the case deal with the Crown's prerogative spending power is not correct. Once a statute occupies ground formerly occupied by the royal prerogative, the prerogative goes into abeyance. *Black v Chretien et al*. (2001), 52 OR (3d) 215 (CA) at para. 26. *Kuki v Ontario*, *2013 ONSC 5574*, at para. 13.

2 There was no explanation for this late addition. It seems to me however that the only explanation for the addition of the qualifier "independently-owned" to the franchise limitation is to ensure that Tesla US cannot get around the exclusion by quickly signing a franchise agreement with Tesla Motors Canada ULC. No other manufacturer operates through owned dealerships.

3 Ms. Vaidyanathan learned later that Daimler-Chrysler may also sell directly to customers a few of its Mercedes Benz and Smart branded vehicles. But that was not known at the time that the decision was made.

4 In *Thorne's Hardware*, Dickson J. (as he then was) dealt with the review of cabinet's orders in council. It is therefore an apt analogy for this case.

5 plus a few models of cars that were accidentally swept up because they are bought directly from manufacturers. But no branded dealerships associated with those purchases, at whom the limitation is supposedly aimed are excluded or affected at all.

6 Said another way, it is not necessary to achieve the state's objective and it bears no relation to the state interest that lies behind the legislation. *Canada (Attorney General) v PHS Community Services Society*, 22011 SCC 44 at para. 77.

Tribunaux — Compétence — Contrôle judiciaire — Plaideurs privés — Une cour supérieure peut-elle contrôler la décision d'un organisme religieux concernant l'appartenance à celui-ci? — Est-il possible d'exercer un recours en contrôle judiciaire pour régler un différend entre plaideurs privés? — Existe-t-il un droit à l'équité procédurale en l'absence d'un droit légal sous-jacent? — Les questions ecclésiastiques sont-elles justiciables?

2018 SCC 26 (CanLII)

The Highwood Congregation of Jehovah's Witnesses is a voluntary, religious association. A member must live according to accepted standards of conduct and morality. A member who deviates and does not repent may be asked to appear before a Judicial Committee of elders and may be disfellowshipped. In 2014, W was disfellowshipped after he engaged in sinful behaviour and was considered to be insufficiently repentant. The decision was confirmed by an Appeal Committee. W filed an originating application for judicial review pursuant to Rule 3.15 of the *Alberta Rules of Court* seeking an order of *certiorari* quashing the Judicial Committee's decision on the basis that it was procedurally unfair. The Court of Queen's Bench dealt with the issue of jurisdiction in a separate hearing. Both the chambers judge and a majority of the Court of Appeal concluded that the courts had jurisdiction to consider the merits of the application.

Held: The appeal should be allowed and the originating application for judicial review should be quashed.

Review of the decisions of voluntary associations, including religious groups, on the basis of procedural fairness is limited for three reasons. First, judicial review is limited to public decision makers, which the Judicial Committee is not. Not all decisions are amenable to a superior court's supervisory jurisdiction. Judicial review is only available where there is an exercise of state authority and where that exercise is of a sufficiently public character. Judicial review is a public law concept that allows courts to ensure that lower tribunals respect the rule of law. Private parties cannot seek judicial review to solve disputes between them and public law remedies such as *certiorari* may not be granted in litigation relating to contractual or property rights between private parties. Simply because a decision impacts a broad segment of the public does not mean that it is public in the administrative law sense of the term nor would incorporation by a private Act operate as a statutory grant of authority to churches so constituted. The present case raises no issues about the rule of law. The Congregation in no way is exercising state authority.

La Highwood Congregation of Jehovah's Witnesses est une association religieuse volontaire. Ses membres doivent vivre selon des normes de conduite et de morale reconnues. Le membre qui s'écarte de ces normes et ne se repent pas peut être convoqué devant un comité de discipline religieuse formé d'anciens et être excommunié. En 2014, W a été excommunié parce qu'il a eu une conduite pécheresse et qu'on a estimé qu'il n'était pas suffisamment repentant. Un comité d'appel a confirmé la décision. W a présenté, en vertu de l'art. 3.15 des *Alberta Rules of Court*, une demande introductive d'instance en contrôle judiciaire sollicitant l'annulation de la décision du Comité de discipline religieuse au moyen d'une ordonnance de *certiorari*, au motif que cette décision n'était pas équitable sur le plan procédural. La Cour du Banc de la Reine a examiné la question de la compétence dans le cadre d'une audience distincte. Tant le juge en cabinet qui a examiné la demande que les juges majoritaires de la Cour d'appel ont conclu que les tribunaux avaient compétence pour statuer sur le fond de la demande.

Arrêt : Le pourvoi est accueilli et la demande introductive d'instance en contrôle judiciaire est annulée.

Trois raisons limitent la possibilité de demander, pour des raisons fondées sur l'équité procédurale, le contrôle judiciaire des décisions prises par des associations volontaires, y compris des groupes religieux. Premièrement, les procédures de contrôle judiciaire ne peuvent viser que les décisions des décideurs publics, et le Comité de discipline religieuse n'est pas un tel décideur. Ce ne sont pas toutes les décisions qui sont susceptibles de contrôle judiciaire en vertu du pouvoir de surveillance d'une cour supérieure. Un tel recours est possible uniquement lorsqu'un pouvoir étatique a été exercé et que l'exercice de ce pouvoir présente une nature suffisamment publique. Le contrôle judiciaire est un concept de droit public qui permet aux cours de veiller à ce que les juridictions inférieures respectent la primauté du droit. Des plaideurs privés ne peuvent pas présenter aux tribunaux une demande de contrôle judiciaire à l'égard de litiges les opposant, et des réparations de droit public tel le *certiorari* ne peuvent être accordées à l'occasion d'un litige entre plaideurs privés au sujet de droits contractuels ou de droits de propriété. Le simple fait qu'une décision ait des répercussions sur un large segment du public n'a pas pour effet de conférer à cette décision un caractère public au sens du droit administratif, non plus que la constitution d'une Église au moyen d'une loi d'intérêt privé n'a pour effet d'entraîner une attribution législative de pouvoirs en faveur de cette église. La présente affaire ne soulève aucune question relativement à la primauté du droit. La Congrégation n'exerce d'aucune façon des pouvoirs étatiques.

2018 SCC 26 (CanLII)

Second, there is no free-standing right to procedural fairness absent an underlying legal right. Courts may only interfere to address procedural fairness concerns related to the decisions of religious groups or other voluntary associations if legal rights are at stake and the claim is founded on a valid cause of action, for example, contract, tort or restitution. Jurisdiction cannot be established on the sole basis that there is an alleged breach of natural justice or that the complainant has exhausted the organization's internal processes. It is not enough that a matter be of importance in some abstract sense. W has no cause of action. No basis has been shown that W and the Congregation intended to create legal relations. No contractual right exists. The Congregation does not have a written constitution, by-laws or rules to be enforced. The negative impact of the disfellowship decision on W's client base as a realtor does not give rise to an actionable claim. The matters in issue fall outside the courts' jurisdiction.

Third, even where review is available, the courts will consider only those issues that are justiciable. The ecclesiastical issues raised by W are not justiciable. Justiciability relates to whether the subject matter of a dispute is appropriate for a court to decide. There is no single set of rules delineating the scope of justiciability. The court should ask whether it has the institutional capacity and legitimacy to adjudicate the matter. Even the procedural rules of a particular religious group may involve the interpretation of religious doctrine, such as in this case. The courts have neither legitimacy nor institutional capacity to deal with contentious matters of religious doctrine.

Roman Catholic Episcopal Corp. of the Diocese of Kingston*, 2011 ONCA 728, 285 O.A.C. 354; *Shergill v. Khaira*, [2014] UKSC 33, [2015] A.C. 359; *Lee v. Showmen's Guild of Great Britain*, [1952] 1 All E.R. 1175; *Lakeside Colony of Hutterian Brethren v. Hofer*, [1992] 3 S.C.R. 165; *Hofer v. Hofer*, [1970] S.C.R. 958; *Senez v. Montreal Real Estate Board*, [1980] 2 S.C.R. 555;

Deuxièmement, il n'existe aucun droit autonome à l'équité procédurale en l'absence d'un droit légal sous-jacent. Les tribunaux ne peuvent intervenir à l'égard de préoccupations liées à l'équité procédurale que soulèvent les décisions de groupes religieux ou autres associations volontaires que si des droits légaux sont en jeu et que la demande repose sur une cause d'action valable, par exemple en matière de contrat, de délit civil ou de restitution. Une simple allégation de violation des principes de justice naturelle ou le seul fait que le plaignant a épuisé les processus internes de l'organisation ne sauraient donner compétence aux tribunaux. Il ne suffit pas qu'une question revête de l'importance dans quelque sens abstrait. W ne dispose d'aucune cause d'action. Il n'a été présenté aucun élément indiquant que W et la Congrégation entendaient établir des rapports juridiques. Il n'existe aucun droit contractuel. La Congrégation n'a ni constitution écrite, ni règlement administratif, ni règles donnant ouverture à un recours devant les tribunaux. Les répercussions négatives de la décision d'excommunier W sur sa clientèle dans le cadre de ses activités de courtier immobilier ne font pas naître de droit d'action. Les questions en litige ne relèvent pas de la compétence des tribunaux.

Troisièmement, même lorsqu'il y a ouverture à contrôle judiciaire, les tribunaux n'examineront que les questions qui sont justiciables. Les questions ecclésiastiques soulevées par W ne sont pas justiciables. La justiciabilité est une notion qui s'attache à la question de savoir si l'on est en présence d'une question qu'il convient de faire trancher par un tribunal. Il n'existe pas un ensemble précis de règles délimitant le champ d'application de la notion de justiciabilité. Le tribunal doit se demander s'il dispose des attributions institutionnelles et de la légitimité requises pour trancher l'affaire. Il arrive parfois que même les règles de procédure d'un groupe religieux impliquent l'interprétation d'une doctrine religieuse, comme c'est le cas en l'espèce. Les tribunaux n'ont ni la légitimité ni les attributions institutionnelles requises pour se saisir de questions litigieuses touchant la doctrine religieuse.

The judgment of the Court was delivered by

Rowe J. —

I. Overview

[1] The central question in this appeal is when, if ever, courts have jurisdiction to review the decisions of religious organizations where there are concerns about procedural fairness. In 2014, the appellant, the Judicial Committee of the Highwood Congregation of Jehovah's Witnesses, disfellowshipped the respondent, Randy Wall, after he admitted that he had engaged in sinful behaviour and was considered to be insufficiently repentant. The Judicial Committee's decision was confirmed by an Appeal Committee. Mr. Wall brought an originating application for judicial review of the decision to disfellowship him before the Alberta Court of Queen's Bench. The court first dealt with the issue of whether it had jurisdiction to decide the matter. Both the chambers judge and a majority of the Court of Appeal concluded that the courts had jurisdiction and could proceed to consider the merits of Mr. Wall's application.

[2] For the reasons that follow, I would allow the appeal. Mr. Wall sought to have the Judicial Committee's decision reviewed on the basis that the decision was procedurally unfair. There are several reasons why this argument must fail. First, judicial review is limited to public decision makers, which the Judicial Committee is not. Second, there is no free-standing right to have such decisions reviewed

Jay Cameron, pour l'intervenant Justice Centre for Constitutional Freedoms.

Roy Millen et *Ariel Solose*, pour l'intervenante British Columbia Civil Liberties Association.

Shahzad Siddiqui et *Yavar Hameed*, pour l'intervenante l'Association canadienne des avocats musulmans.

Version française du jugement de la Cour rendu par

Le juge Rowe —

I. Aperçu

[1] La principale question en litige dans le présent pourvoi est celle de savoir si les tribunaux ont compétence pour contrôler les décisions d'organismes religieux qui soulèvent des préoccupations en matière d'équité procédurale et, si oui, dans quelles circonstances. En 2014, l'appelant, le Judicial Committee of the Highwood Congregation of Jehovah's Witnesses (« Comité de discipline religieuse »), a excommunié l'intimé, Randy Wall, parce qu'il avait admis avoir eu une conduite pécheresse et qu'on avait estimé qu'il n'était pas suffisamment repentant. Un comité d'appel a confirmé la décision du Comité de discipline religieuse. M. Wall a présenté à la Cour du Banc de la Reine de l'Alberta une demande introductive d'instance en contrôle judiciaire visant la décision d'excommunication dont il fait l'objet. La cour s'est d'abord demandé si elle avait compétence pour trancher la question. Tant le juge en cabinet qui a examiné la demande que les juges majoritaires en Cour d'appel ont conclu que les tribunaux avaient compétence et pouvaient statuer sur le fond de la demande de M. Wall.

[2] Pour les motifs qui suivent, je suis d'avis d'accueillir le pourvoi. M. Wall a demandé le contrôle de la décision du Comité de discipline religieuse, au motif que celle-ci n'était pas équitable sur le plan procédural. Cet argument ne saurait être retenu, et ce, pour plusieurs raisons. Premièrement, les procédures de contrôle judiciaire ne peuvent viser que les décisions des décideurs publics, et le Comité

2018 SCC 26 (CanLII)

on the basis of procedural fairness. In light of the foregoing, Mr. Wall has no cause of action, and, accordingly, the Court of Queen's Bench has no jurisdiction to set aside the Judicial Committee's membership decision. Finally, the ecclesiastical issues raised by Mr. Wall are not justiciable.

II. Facts and Judicial History

[3] The Highwood Congregation of Jehovah's Witnesses ("Congregation") is an association of about one hundred Jehovah's Witnesses living in Calgary, Alberta. The Congregation is a voluntary association. It is not incorporated and has no articles of association or by-laws. It has no statutory foundation. It does not own property. No member of the Congregation receives any salary or pecuniary benefit from membership. Congregational activities and spiritual guidance are provided on a volunteer basis by a group of elders.

[4] To become a member of the Congregation, a person must be baptized and must satisfy the elders that he or she possesses a sufficient understanding of relevant scriptural teachings and is living according to accepted standards of conduct and morality. Where a member deviates from these scriptural standards, elders meet and encourage the member to repent. If the member persists in the behaviour, he or she is asked to appear before a committee of at least three elders of the Congregation.

[5] The committee proceedings are not adversarial, but are meant to restore the member to the Congregation. If the elders determine that the member does not exhibit genuine repentance for his or her sins, the member is "disfellowshipped" from the Congregation. Disfellowshipped members may still attend congregational meetings, but within the Congregation they may speak only to their imme-

de discipline religieuse n'est pas un tel décideur. Deuxièmement, il n'existe pas de droit autonome permettant de solliciter le contrôle de telles décisions pour des raisons fondées sur l'équité procédurale. Compte tenu de ce qui précède, M. Wall ne dispose d'aucune cause d'action et, en conséquence, la Cour du Banc de la Reine n'avait pas compétence pour écarter la décision d'excommunication prononcée par le Comité de discipline religieuse. Enfin, les questions ecclésiastiques soulevées par M. Wall ne sont pas justiciables.

II. Faits et historique judiciaire

[3] La Highwood Congregation of Jehovah's Witnesses (« Congrégation ») est une association qui compte environ cent Témoins de Jéhovah résidant à Calgary, en Alberta. Elle est une association volontaire. Elle n'est pas constituée en personne morale et elle ne possède ni statut constitutif ni règlement administratif. Son existence ne repose sur aucune loi et elle n'est propriétaire d'aucun immeuble. Aucun membre de la Congrégation ne reçoit de salaire ou d'avantage pécuniaire en raison de son appartenance à celle-ci. Les activités et l'accompagnement spirituel offerts par la Congrégation le sont sur une base bénévole, par un groupe d'anciens.

[4] Quiconque souhaite adhérer à la Congrégation doit être baptisé et convaincre les anciens qu'il comprend suffisamment les enseignements pertinents des Saintes Écritures et qu'il vit selon des normes de conduite et de morale reconnues. Lorsqu'un membre s'écarte des normes prévues dans ces Écritures, les anciens rencontrent le membre et l'encouragent à faire acte de repentance. S'il ne corrige pas son comportement, il est convoqué devant un comité formé d'au moins trois anciens de la Congrégation.

[5] Les procédures de ce comité n'ont pas un caractère contradictoire, mais visent plutôt la réintégration du membre dans la Congrégation. Dans les cas où les anciens estiment que le membre ne manifeste pas un repentir sincère à l'égard de ses péchés, ce dernier est « excommunié » de la Congrégation. Les membres excommuniés peuvent continuer d'assister aux rassemblements de la Congrégation, mais, au sein de

2018 SCC 26 (CanLII)

diate family and limit discussions to non-spiritual matters.

[6] Randy Wall became a member of the Congregation in 1980. He remained a member of the Congregation until he was disfellowshipped by the Judicial Committee.

[7] Mr. Wall unsuccessfully appealed the Judicial Committee's decision to elders of neighbouring congregations (Appeal Committee) and to the Watch Tower Bible and Tract Society of Canada. After the Congregation was informed that the disfellowship was confirmed, Mr. Wall filed an originating application for judicial review pursuant to Rule 3.15 of the *Alberta Rules of Court*, Alta. Reg. 124/2010, seeking an order of *certiorari* quashing and declaring void the Judicial Committee's decision. In his application, Mr. Wall claimed that the Judicial Committee breached the principles of natural justice and the duty of fairness, and that the decision to disfellowship him affected his work as a realtor as his Jehovah's Witness clients declined to work with him.

[8] An initial hearing was held to determine whether the Court of Queen's Bench had jurisdiction. The chambers judge found that the court did have jurisdiction as Mr. Wall's civil rights might have been affected by the Judicial Committee's decision: File No. 1401-10225, April 16, 2015. The judge also noted that expert evidence could be heard regarding the interpretation by Jehovah's Witnesses of Christian scripture as to what is sinful and the scriptural criteria used by elders to determine whether someone said to have sinned has sufficiently repented.

[9] The majority of the Court of Appeal of Alberta dismissed the Congregation's appeal, affirming that the Court of Queen's Bench had jurisdiction to hear Mr. Wall's originating application for judicial review: 2016 ABCA 255, 43 Alta. L.R. (6th) 33. The majority held that the courts may intervene in decisions

celle-ci, ils ne peuvent parler qu'aux membres de leur famille proche, et leurs discussions doivent se limiter à des questions non spirituelles.

[6] M. Wall a adhéré à la Congrégation en 1980, et il en est demeuré membre jusqu'à son excommunication par le Comité de discipline religieuse.

[7] M. Wall a interjeté appel sans succès de la décision du Comité de discipline religieuse devant les anciens des congrégations voisines (Comité d'appel), ainsi que la Tour de Garde Société de Bibles et de Tracts du Canada. Après que la Congrégation a été informée que l'excommunication était confirmée, M. Wall a présenté, en vertu de l'art. 3.15 des *Alberta Rules of Court*, Alta. Reg. 124/2010, une demande introductive d'instance en contrôle judiciaire sollicitant l'annulation de la décision du Comité de discipline religieuse au moyen d'une ordonnance de *certiorari*. Dans sa demande, M. Wall prétendait que le Comité de discipline religieuse avait violé les principes de justice naturelle et l'obligation d'équité qui lui incombaient, et que la décision de l'excommunier avait nui à ses activités de courtier immobilier, étant donné que ses clients Témoins de Jéhovah refusaient de faire appel à ses services.

[8] La Cour du Banc de la Reine a tenu une première audience pour décider si elle avait compétence. Le juge en cabinet a conclu que la cour avait effectivement compétence, puisque la décision du Comité de discipline religieuse était susceptible d'avoir porté atteinte aux droits civils de M. Wall : dossier nº 1401-10225, 16 avril 2015. Le juge a également indiqué que des experts pourraient témoigner sur la façon dont les Témoins de Jéhovah interprètent les Saintes Écritures chrétiennes pour déterminer ce qui constitue un péché, ainsi que sur les critères, tirés de ces Écritures, sur lesquels se fondent les anciens pour juger si une personne qui a commis un péché s'en est suffisamment repentie.

[9] La Cour d'appel de l'Alberta a rejeté, à la majorité, l'appel de la Congrégation et confirmé que la Cour du Banc de la Reine pouvait entendre la demande introductive de contrôle judiciaire de M. Wall : 2016 ABCA 255, 43 Alta. L.R. (6th) 33. Les juges majoritaires ont conclu que les tribunaux peuvent

2018 SCC 26 (CanLII)

of voluntary organizations concerning membership where property or civil rights are at issue. The majority also held that even where no property or civil rights are engaged, courts may intervene in the decisions of voluntary associations where there is a breach of the rules of natural justice or where the complainant has exhausted internal dispute resolution processes.

[10] The dissenting judge would have allowed the Congregation's appeal on the basis that the Judicial Committee is a private actor, and as such is not subject to judicial review, and that in any event, Mr. Wall's challenge of the Judicial Committee's decision did not raise a justiciable issue.

III. Question on Appeal

[11] This appeal requires the Court to determine whether it has jurisdiction to judicially review the disfellowship decision for procedural fairness concerns.

IV. Analysis

[12] Courts are not strangers to the review of decision making on the basis of procedural fairness. However, the ability of courts to conduct such a review is subject to certain limits. These reasons address three ways in which the review on the basis of procedural fairness is limited. First, judicial review is reserved for state action. In this case, the Congregation's Judicial Committee was not exercising statutory authority. Second, there is no free-standing right to procedural fairness. Courts may only interfere to address the procedural fairness concerns related to the decisions of religious groups or other voluntary associations if legal rights are at stake. Third, even where review is available, the courts will consider only those issues that are justiciable. Issues of theology are not justiciable.

intervenir à l'égard des décisions prises par les organisations volontaires en matière d'adhésion lorsque des droits de propriété ou des droits civils sont en jeu. Ils ont également conclu que les tribunaux peuvent intervenir à l'égard des décisions de ces organisations, et ce, même si de tels droits ne sont pas en jeu, dans les cas où la plainte reproche la violation de principes de justice naturelle ou dans ceux où le plaignant a épuisé les processus internes de règlement des différends.

[10] Le juge dissident aurait accueilli l'appel de la Congrégation, au motif que le Comité de discipline religieuse est une entité privée, que ses décisions ne sont par conséquent pas susceptibles de contrôle judiciaire et que, de toute façon, la contestation de la décision du Comité de discipline religieuse par M. Wall ne soulevait pas de question justiciable.

III. Question en litige

[11] Dans le cadre du présent pourvoi, notre Cour doit décider si elle a compétence pour contrôler, sur la base de motifs fondés sur l'équité procédurale, la décision du Comité de discipline religieuse d'excommunier l'intimé.

IV. Analyse

[12] Les tribunaux sont familiers avec le contrôle de processus décisionnels au regard de l'équité procédurale. Toutefois, leur pouvoir de contrôle à cet égard est assujetti à certaines limites. Les présents motifs traitent de trois limites applicables au contrôle de décisions au regard de l'équité procédurale. Premièrement, le contrôle judiciaire est un recours qui ne peut être exercé qu'à l'encontre de mesures étatiques. En l'espèce, le Comité de discipline religieuse de la Congrégation n'exerçait pas un pouvoir conféré par la loi. Deuxièmement, il n'existe pas de droit autonome à l'équité procédurale. Ce n'est que si des droits légaux sont en jeu que les tribunaux peuvent intervenir à l'égard de préoccupations liées à l'équité procédurale que soulèvent les décisions de groupes religieux ou autres associations volontaires. Troisièmement, même lorsqu'il y a ouverture à contrôle judiciaire, les tribunaux n'examineront que les questions qui sont justiciables. Des questions de nature théologique ne sont pas justiciables.

2018 SCC 26 (CanLII)

A. *The Availability of Judicial Review*

[13] The purpose of judicial review is to ensure the legality of state decision making: see *Canada (Attorney General) v. TeleZone Inc.*, 2010 SCC 62, [2010] 3 S.C.R. 585, at paras. 24 and 26; *Crevier v. Attorney General of Quebec*, [1981] 2 S.C.R. 220, at pp. 237-38; *Knox v. Conservative Party of Canada*, 2007 ABCA 295, 422 A.R. 29, at paras. 14-15. Judicial review is a public law concept that allows s. 96 courts to "engage in surveillance of lower tribunals" in order to ensure that these tribunals respect the rule of law: *Knox*, at para. 14; *Constitution Act, 1867*, s. 96. The state's decisions can be reviewed on the basis of procedural fairness or on their substance. The parties in this appeal appropriately conceded that judicial review primarily concerns the relationship between the administrative state and the courts. Private parties cannot seek judicial review to solve disputes that may arise between them; rather, their claims must be founded on a valid cause of action, for example, contract, tort or restitution.

[14] Not all decisions are amenable to judicial review under a superior court's supervisory jurisdiction. Judicial review is only available where there is an exercise of state authority and where that exercise is of a sufficiently public character. Even public bodies make some decisions that are private in nature — such as renting premises and hiring staff — and such decisions are not subject to judicial review: *Air Canada v. Toronto Port Authority*, 2011 FCA 347, [2013] 3 F.C.R. 605, at para. 52. In making these contractual decisions, the public body is not exercising "a power central to the administrative mandate given to it by Parliament", but is rather exercising a private power (*ibid.*). Such decisions do not involve concerns about the rule of law insofar as this refers to the exercise of delegated authority.

A. *La possibilité d'exercer un recours en contrôle judiciaire*

[13] Le contrôle judiciaire a pour objet d'assurer la légalité des décisions prises par l'État : voir *Canada (Procureur général) c. TeleZone Inc.*, 2010 CSC 62, [2010] 3 R.C.S. 585, par. 24 et 26; *Crevier c. Procureur général du Québec*, [1981] 2 R.C.S. 220, p. 237-238; *Knox c. Conservative Party of Canada*, 2007 ABCA 295, 422 A.R. 29, par. 14-15. Le contrôle judiciaire est un concept de droit public qui permet aux cours visées à l'art. 96 [TRADUCTION] « d'exercer un pouvoir de surveillance sur les juridictions inférieures », afin de veiller à ce que celles-ci respectent la primauté du droit : *Knox*, par. 14; *Loi constitutionnelle de 1867*, art. 96. Les décisions de l'État sont susceptibles de contrôle quant au fond ou quant au respect de l'équité procédurale. Les parties au présent pourvoi ont à juste titre reconnu que le contrôle judiciaire vise essentiellement l'examen par les tribunaux judiciaires des décisions des organismes administratifs de l'État. Des plaideurs privés ne peuvent pas présenter aux tribunaux une demande de contrôle judiciaire à l'égard de litiges les opposant; s'ils s'adressent aux tribunaux, leurs demandes doivent plutôt reposer sur une cause d'action valable, par exemple en matière de contrat, de délit civil ou de restitution.

[14] Ce ne sont pas toutes les décisions qui sont susceptibles de contrôle judiciaire en vertu du pouvoir de surveillance d'une cour supérieure. Un tel recours est possible uniquement lorsqu'un pouvoir étatique a été exercé et que l'exercice de ce pouvoir présente une nature suffisamment publique. En effet, même les organismes publics prennent des décisions de nature privée — par exemple pour louer des locaux ou pour embaucher du personnel — et de telles décisions ne sont pas assujetties au pouvoir de contrôle des tribunaux : *Air Canada c. Administration portuaire de Toronto*, 2011 CAF 347, [2013] 3 R.C.F. 605, par. 52. L'organisme public qui prend des décisions de nature contractuelle « n'exerce pas un pouvoir central à la mission administrative que lui a attribuée le législateur », mais plutôt un pouvoir de nature privée (*ibid.*). Des décisions de la sorte ne soulèvent pas de préoccupations relatives à la primauté du droit, car, pour que cela soit le cas, il faut être en présence de l'exercice d'un pouvoir délégué.

2018 SCC 26 (CanLII)

[15] Further, while the private law remedies of declaration or injunction may be sought in an application for judicial review (see, for example, *Judicial Review Procedure Act*, R.S.B.C. 1996, c. 241, s. 2(2)(b); *Judicial Review Procedure Act*, R.S.O. 1990, c. J.1, s. 2(1)2; *Judicial Review Act*, R.S.P.E.I. 1988, c. J-3, ss. 2 and 3(3)), this does not make the reverse true. Public law remedies such as *certiorari* may not be granted in litigation relating to contractual or property rights between private parties: *Knox*, at para. 17. *Certiorari* is only available where the decision-making power at issue has a sufficiently public character: D. J. M. Brown and J. M. Evans, with the assistance of D. Fairlie, *Judicial Review of Administrative Action in Canada* (loose-leaf), at topic 1:2252.

[15] De plus, bien qu'il soit possible de solliciter un jugement déclaratoire ou une injonction — deux réparations de droit privé — dans le cadre d'une demande de contrôle judiciaire (voir, par exemple, *Judicial Review Procedure Act*, R.S.B.C. 1996, c. 241, al. 2(2)(b); *Loi sur la procédure de révision judiciaire*, L.R.O. 1990, c. J.1, disposition 2(1)2; *Judicial Review Act*, R.S.P.E.I. 1988, c. J-3, art. 2 et par. 3(3)), l'inverse n'est pas vrai pour autant. Des réparations de droit public tel le *certiorari* ne peuvent être accordées à l'occasion d'un litige entre plaideurs privés au sujet de droits contractuels ou de droits de propriété : *Knox*, par. 17. Un *certiorari* ne peut être obtenu que dans les cas où le pouvoir décisionnel en question présente une nature suffisamment publique : D. J. M. Brown et J. M. Evans, avec le concours de D. Fairlie, *Judicial Review of Administrative Action in Canada* (feuilles mobiles), rubrique 1:2252.

[16] The Attorney General has a right to be heard on an originating application for judicial review, and must be served notice where an application has been filed: *Alberta Rules of Court*, Rules 3.15 and 3.17. Other originating applications have no such requirements: *ibid.*, Rule 3.9. This suggests that judicial review is properly directed at public decision making.

[16] Le procureur général a le droit de se faire entendre relativement à une demande introductive instance en contrôle judiciaire, et un avis doit lui être signifié lorsqu'une telle demande est déposée : *Alberta Rules of Court*, art. 3.15 et 3.17. Aucun autre type de demande introductive d'instance n'est assorti d'une telle exigence : *ibid.*, art. 3.9. Ce fait tend à indiquer que le contrôle judiciaire vise effectivement les décisions prises par l'État.

[17] Although the public law remedy of judicial review is aimed at government decision makers, some Canadian courts, including the courts below, have continued to find that judicial review is available with respect to decisions by churches and other voluntary associations. These decisions can be grouped in two categories according to the arguments relied on in support of the availability of judicial review. Neither line of argument should be taken as authority for the broad proposition that private bodies are subject to judicial review. Both lines of cases fail to recognize that judicial review is about the legality of state decision making.

[17] Quoique le recours de droit public que constitue le contrôle judiciaire vise les décideurs gouvernementaux, certains tribunaux judiciaires canadiens, y compris les juridictions inférieures en l'espèce, continuent de conclure qu'il y a ouverture à contrôle judiciaire à l'encontre des décisions rendues par des églises ou autres associations volontaires. Les jugements de ces tribunaux peuvent être répartis en deux courants, selon le raisonnement suivi pour justifier la possibilité d'exercer un recours en contrôle judiciaire. Ni l'un ni l'autre de ces courants jurisprudentiels ne permet d'affirmer, de façon générale, que les décisions des organismes privés sont assujetties au contrôle judiciaire. Ils font tous deux abstraction du fait que ce recours porte sur la légalité des décisions prises par l'État.

[18] The first line of cases relies on the misconception that incorporation by a private Act operates

[18] Le premier courant jurisprudentiel s'appuie sur l'idée erronée selon laquelle le fait qu'une Église

2018 SCC 26 (CanLII)

as a statutory grant of authority to churches so constituted: *Lindenburger v. United Church of Canada* (1985), 10 O.A.C. 191 (Div. Ct.), at para. 21; *Davis v. United Church of Canada* (1992), 8 O.R. (3d) 75 (Gen. Div.), at p. 78. The purpose of a private Act is to "confer special powers or benefits upon one or more persons or body of persons, or to exclude one or more persons or body of persons from the general application of the law": Canada, Parliament, House of Commons, *House of Commons Procedure and Practice* (2nd ed. 2009), by A. O'Brien and M. Bosc, at p. 1177. Thus, by its nature, a private Act is not a law of general application and its effect can be quite limited. The federal *Interpretation Act*, R.S.C. 1985, c. I-21, s. 9, states that "[n]o provision in a private Act affects the rights of any person, except only as therein mentioned and referred to." For instance, *The United Church of Canada Act* (1924), 14 & 15 Geo. 5, c. 100, gives effect to an agreement regarding the transfer of property rights (from the Methodist, Congregationalist and certain Presbyterian churches) upon the creation of the United Church of Canada; it is not a grant of statutory authority.

soit constituée au moyen d'une loi d'intérêt privé a pour effet d'entraîner une attribution législative de pouvoirs en faveur de cette église : *Lindenberger c. United Church of Canada* (1985), 10 O.A.C. 191 (C. div.), par. 21; *Davis c. United Church of Canada* (1992), 8 O.R. (3d) 75 (Div. gén.), p. 78. Une loi d'intérêt privé a pour objet de « conférer à une ou plusieurs personnes, ou à un groupe de personnes, des pouvoirs ou avantages spéciaux, ou d'exclure de telles personnes de l'application générale d'un texte de loi » : Canada, Parlement, Chambre des Communes, *La procédure et les usages de la Chambre des communes* (2e éd. 2009), par A. O'Brien et M. Bosc, p. 1177-1178. En conséquence, de par sa nature, une telle loi n'est pas une loi d'application générale, et sa portée peut s'avérer très limitée. La *Loi d'interprétation* fédérale, L.R.C. 1985, c. I-21, art. 9, précise que « [l]es lois d'intérêt privé n'ont d'effet sur les droits subjectifs que dans la mesure qui y est prévue. » Par exemple, la loi intitulée *United Church of Canada Act* (1924), 14 & 15 Geo. 5, c. 100, a donné effet à un accord de transfert de droits de propriété (par les églises méthodistes et congrégationalistes, et par certaines églises presbytériennes) au moment de la création de l'Église unie du Canada, il ne s'agissait pas d'une attribution législative de pouvoirs.

[19] A second line of cases that allows for judicial review of the decisions of voluntary associations that are not incorporated by any Act (public or private) looks only at whether the association or the decision in question is sufficiently public in nature: *Graff v. New Democratic Party*, 2017 ONSC 3578, at para. 18 (CanLII); *Erin Mills Soccer Club v. Ontario Soccer Assn.*, 2016 ONSC 7718, 15 Admin. L.R. (6th) 138, at para. 60; *West Toronto United Football Club v. Ontario Soccer Association*, 2014 ONSC 5881, 327 O.A.C. 29, at paras. 17-18. These cases find their basis in the Ontario Court of Appeal's decision in *Setia v. Appleby College*, 2013 ONCA 753, 118 O.R. (3d) 481. The court in *Setia* found that judicial review was not available since the matter did not have a sufficient public dimension despite some indicators to the contrary (such as the existence of a private Act setting up the school) (para. 41).

[19] Le second courant jurisprudentiel autorisant le contrôle judiciaire des décisions rendues par des associations volontaires qui ne sont pas constituées par une loi (d'intérêt public ou privé) s'attache seulement à la question de savoir si l'association ou la décision en cause présente une nature suffisamment publique : *Graff c. New Democratic Party*, 2017 ONSC 3578, par. 18 (CanLII); *Erin Mills Soccer Club c. Ontario Soccer Assn.*, 2016 ONSC 7718, 15 Admin. L.R. (6th) 138, par. 60; *West Toronto United Football Club c. Ontario Soccer Association*, 2014 ONSC 5881, 327 O.A.C. 29, par. 17-18. Ces décisions s'appuient sur l'arrêt *Setia c. Appleby College*, 2013 ONCA 753, 118 O.R. (3d) 481, de la Cour d'appel de l'Ontario. Dans cette affaire, la Cour d'appel a décidé qu'il n'y avait pas ouverture à contrôle judiciaire, parce que la question ne possédait pas une dimension suffisamment publique, malgré la présence de certains éléments tendant à indiquer le contraire (comme le fait que l'école avait été créée par une loi d'intérêt privé) (par. 41).

2018 SCC 26 (CanLII)

[20] In my view, these cases do not make judicial review available for private bodies. Courts have questioned how a private Act — like that for the United Church of Canada — that does not confer statutory authority can attract judicial review: see *Greaves v. United Church of God Canada*, 2003 BCSC 1365, 27 C.C.E.L. (3d) 46, at para. 29; *Setia*, at para. 36. The problem with the cases that rely on *Setia* is that they hold that where a decision has a broad public impact, the decision is of a sufficient public character and is therefore reviewable: *Graff*, at para. 18; *West Toronto United Football Club*, at para. 24. These cases fail to distinguish between "public" in a generic sense and "public" in a public law sense. In my view, a decision will be considered to be public where it involves questions about the rule of law and the limits of an administrative decision maker's exercise of power. Simply because a decision impacts a broad segment of the public does not mean that it is public in the administrative law sense of the term. Again, judicial review is about the legality of state decision making.

[21] Part of the confusion seems to have arisen from the courts' reliance on *Air Canada* to determine the "public" nature of the matter at hand. But, what *Air Canada* actually dealt with was the question of whether certain public entities were acting as a federal board, commission or tribunal such that the judicial review jurisdiction of the Federal Court was engaged. The proposition that private decisions of a public body will not be subject to judicial review does not make the inverse true. Thus it does not follow that "public" decisions of a private body — in the sense that they have some broad import — will be reviewable. The relevant inquiry is whether the legality of state decision making is at issue.

[20] À mon avis, ces différents jugements n'ont pas pour effet d'autoriser le contrôle judiciaire des décisions d'organismes privés. Les tribunaux se sont demandé comment une loi d'intérêt privé — comme celle concernant l'Église unie du Canada —, qui ne confère aucun pouvoir d'origine législative, pouvait donner lieu à l'exercice de recours en contrôle judiciaire : voir *Greaves c. United Church of God Canada*, 2003 BCSC 1365, 27 C.C.E.L. (3d) 46, par. 29; *Setia*, par. 36. Les jugements qui se fondent sur l'arrêt *Setia* présentent le problème suivant : les tribunaux y concluent qu'une décision ayant des répercussions publiques considérables (« *broad public impact* ») possède une nature suffisamment publique et est donc susceptible de contrôle judiciaire : *Graff*, par. 18; *West Toronto United Football Club*, par. 24. Aucune distinction n'est faite dans ces jugements entre l'adjectif anglais « *public* » (« public, que » en français) utilisé dans son sens général et le sens de ce même mot dans l'expression « *public law* » (« droit public »). Selon moi, une décision est considérée comme étant de nature publique lorsqu'elle porte sur des questions relatives à la primauté du droit et aux limites de l'exercice par un décideur administratif de ses pouvoirs. Le simple fait qu'une décision ait des répercussions sur un large segment du public n'a pas pour effet de conférer à cette décision un caractère « public » au sens du droit administratif. Je le répète, le contrôle judiciaire vise la légalité des décisions prises par l'État.

[21] La confusion semble venir, du moins en partie, du fait que les tribunaux se sont appuyés sur l'arrêt *Air Canada* pour déterminer si la question dont ils étaient saisis possédait une nature « suffisamment publique ». Toutefois, la question qui se posait dans *Air Canada* était celle de savoir si certaines entités publiques agissaient en qualité d'offices fédéraux et étaient en conséquence assujetties au pouvoir de contrôle de la Cour fédérale. La proposition selon laquelle les décisions de nature privée des organismes publics ne sont pas susceptibles de contrôle judiciaire n'implique pas que l'inverse est vrai. Par conséquent, il ne s'ensuit pas que les décisions de nature « publique » prises par un organisme privé — c'est-à-dire celles ayant des répercussions considérables — sont susceptibles de contrôle. La question qu'il convient de se poser consiste à se demander si la légalité des décisions prises par l'État est en jeu.

2018 SCC 26 (CanLII)

[22] The present case raises no issues about the rule of law. The Congregation has no constating private Act and the Congregation in no way is exercising state authority.

[23] Finally, Mr. Wall submitted before this Court that he was not seeking judicial review, but in his originating application for judicial review this is what he does. In his application, he seeks an order of *certiorari* that would quash the disfellowship decision. I recognize that Mr. Wall was unrepresented at the time he filed his application. These comments do not reflect that the basis for my disposition of the appeal is a matter of form alone or is related to semantic errors in the application. However, the implications of granting an appeal must still be considered. This appeal considers only the question of the court's jurisdiction; it is not clear what other remedy would be sought if the case were returned to the Court of Queen's Bench for a hearing on the merits. However, as I indicate above, judicial review is not available.

B. *The Ability of Courts to Review Decisions of Voluntary Associations for Procedural Fairness*

[24] Even if Mr. Wall had filed a standard action by way of statement of claim, his mere membership in a religious organization — where no civil or property right is granted by virtue of such membership — should remain free from court intervention. Indeed, there is no free-standing right to procedural fairness with respect to decisions taken by voluntary associations. Jurisdiction cannot be established on the sole basis that there is an alleged breach of natural justice or that the complainant has exhausted the organization's internal processes. Jurisdiction depends on the presence of a legal right which a party seeks to have vindicated. Only where this is so can the courts consider an association's adherence to its own procedures and (in certain circumstances) the fairness of those procedures.

[22] La présente affaire ne soulève aucune question relativement à la primauté du droit. La Congrégation n'est pas constituée par une loi d'intérêt privé et elle n'exerce d'aucune façon des pouvoirs étatiques.

[23] Enfin, bien que M. Wall ait fait valoir à la Cour qu'il ne demandait pas de contrôle judiciaire, c'est néanmoins ce qu'il fait dans sa demande introductive d'instance en contrôle judiciaire. En effet, dans cette demande, il sollicite une ordonnance de *certiorari* qui annulerait la décision d'excommunication dont il fait l'objet. Je reconnais que M. Wall n'était pas représenté lorsqu'il a déposé sa demande. Les commentaires qui précèdent ne doivent pas être considérés comme une indication que je rejette le pourvoi pour une simple question de forme ou pour cause d'erreurs sémantiques dans la demande. Toutefois, il faut néanmoins tenir compte des implications du fait d'accueillir un pourvoi. Le présent appel ne porte que sur la question de la compétence du tribunal concerné; il est difficile de déterminer quelle autre réparation serait demandée si l'affaire était renvoyée à la Cour du Banc de la Reine pour audition sur le fond. Cependant, comme je l'ai indiqué précédemment, le contrôle judiciaire n'est pas un recours ouvert en l'espèce.

B. *La capacité des tribunaux de contrôler les décisions d'associations volontaires pour des motifs fondés sur l'équité procédurale*

[24] Même si M. Wall avait intenté une action ordinaire en déposant une déclaration, la seule question de son appartenance à une organisation religieuse — appartenance qui ne confère ni droit civil ni droit de propriété — ne devrait pas faire l'objet d'intervention de la part des tribunaux. En effet, il n'existe aucun droit autonome à l'équité procédurale relativement aux décisions prises par des associations volontaires. Une simple allégation de violation des principes de justice naturelle ou le seul fait que le plaignant a épuisé les processus internes de l'organisation ne sauraient donner compétence aux tribunaux. Pour qu'ils aient compétence, il doit exister un droit légal qu'une partie cherche à faire valoir. Ce n'est que dans de tels cas que les tribunaux peuvent examiner le respect par une association de ses propres procédures et (dans certaines circonstances) l'équité de ces procédures.

2018 SCC 26 (CanLII)

[25] The majority in the Court of Appeal held that there was such a free-standing right to procedural fairness. However, the cases on which they relied on do not stand for such a proposition. Almost all of them were cases involving an underlying legal right, such as wrongful dismissal (*McCaw v. United Church of Canada* (1991), 4 O.R. (3d) 481 (C.A.); *Pederson v. Fulton*, 1994 CanLII 7483 (Ont. S.C. (Gen. Div.)), or a statutory cause of action (*Lutz v. Faith Lutheran Church of Kelowna*, 2009 BCSC 59). Another claim was dismissed on the basis that it was not justiciable as the dispute was ecclesiastical in nature: *Hart v. Roman Catholic Episcopal Corp. of the Diocese of Kingston*, 2011 ONCA 728, 285 O.A.C. 354.

[26] In addition, it is clear that the English jurisprudence cited by Mr. Wall similarly requires the presence of an underlying legal right. In *Shergill v. Khaira*, [2014] UKSC 33, [2015] A.C. 359, at paras. 46-48, and *Lee v. Showmen's Guild of Great Britain*, [1952] 1 All E.R. 1175 (C.A.), the English courts found that the voluntary associations at issue were governed by contract. I do not view *Shergill* as standing for the proposition that there is a free-standing right to procedural fairness as regards the decisions of religious or other voluntary organizations in the absence of an underlying legal right. Rather, in *Shergill*, requiring procedural fairness is simply a way of enforcing a contract (para. 48). Similarly, in *Lee*, Lord Denning held that "[t]he jurisdiction of a domestic tribunal, such as the committee of the Showmen's Guild, must be founded on a contract, express or implied" (p. 1180).

[27] Mr. Wall argued before this Court that *Lakeside Colony of Hutterian Brethren v. Hofer*, [1992] 3 S.C.R. 165, could be read as permitting courts to review the decisions of voluntary organizations for procedural fairness concerns where the issues raised were "sufficiently important", even where no property or contractual right is in issue. This is a misreading of *Lakeside Colony*. What is required is that a *legal right* of sufficient importance — such as a property or contractual right — be at stake: see

[25] Les juges majoritaires de la Cour d'appel ont conclu à l'existence d'un tel droit autonome à l'équité procédurale. Toutefois, les affaires sur lesquelles ils se sont appuyés n'étayent pas cette proposition. Ces affaires portaient presque toutes sur un droit légal sous-jacent, par exemple un congédiement injustifié (*McCaw c. United Church of Canada* (1991), 4 O.R. (3d) 481 (C.A.); *Pederson c. Fulton*, 1994 CanLII 7483 (C.S. Ont. (Div. gén.)), ou une cause d'action prévue par la loi (*Lutz v. Faith Lutheran Church of Kelowna*, 2009 BCSC 59). Une autre demande avait été rejetée au motif qu'elle n'était pas justiciable en raison de la nature ecclésiastique du différend : *Hart c. Roman Catholic Episcopal Corp. of the Diocese of Kingston*, 2011 ONCA 728, 285 O.A.C. 354.

[26] En outre, il est évident que la jurisprudence anglaise citée par M. Wall requiert elle aussi l'existence d'un droit légal sous-jacent. Dans *Shergill c. Khaira*, [2014] UKSC 33, [2015] A.C. 359, par. 46-48, et *Lee c. Showmen's Guild of Great Britain*, [1952] 1 All E.R. 1175 (C.A.), les tribunaux anglais ont jugé que les associations volontaires en cause étaient régies par des contrats. Je ne considère pas que l'arrêt *Shergill* appuie la proposition voulant qu'il existe un droit autonome à l'équité procédurale en ce qui concerne les décisions d'associations volontaires —religieuses ou autres — en l'absence d'un droit légal sous-jacent. Dans cet arrêt, l'exigence relative au respect de l'équité procédurale se voulait plutôt un moyen d'assurer l'exécution du contrat (par. 48). De même, dans l'arrêt *Lee*, lord Denning a conclu que [TRADUCTION] « [l]a compétence d'un tribunal interne, tel le comité de la Showmen's Guild, doit reposer sur un contrat, exprès ou implicite » (p. 1180).

[27] Devant la Cour, M. Wall a plaidé qu'il est possible d'interpréter l'arrêt *Lakeside Colony of Hutterian Bretheren c. Hofer*, [1992] 3 R.C.S. 165, d'une manière qui a pour effet de permettre aux tribunaux de contrôler, pour des motifs fondés sur l'équité procédurale, les décisions d'organisations volontaires lorsque les questions qu'elles soulèvent sont « suffisamment important[es] », et ce, même si aucun droit de propriété ni droit contractuel n'est en cause. Il s'agit là d'une interprétation erronée de

2018 SCC 26 (CanLII)

2018 SCC 26 (CanLII)

also *Ukrainian Greek Orthodox Church of Canada v. Trustees of the Ukrainian Greek Orthodox Cathedral of St. Mary the Protectress*, [1940] S.C.R. 586. It is not enough that a matter be of "sufficient importance" in some abstract sense. As Gonthier J. pointed out in *Lakeside Colony*, the legal right at issue was of a different nature depending on the perspective from which it was examined: from the colony's standpoint the dispute involved a property right, while from the members' standpoint the dispute was contractual in nature. Either way, the criterion of "sufficient importance" was never contemplated as a basis to give jurisdiction to courts absent the determination of legal rights.

[28] Mr. Wall argues that a contractual right (or something resembling a contractual right) exists between himself and the Congregation. There was no such finding by the chambers judge. No basis has been shown that Mr. Wall and the Congregation intended to create legal relations. Unlike many other organizations, such as professional associations, the Congregation does not have a written constitution, by-laws or rules that would entitle members to have those agreements enforced in accordance with their terms. In *Zebroski v. Jehovah's Witnesses* (1988), 87 A.R. 229, at paras. 22-25, the Court of Appeal of Alberta ruled that membership in a similarly constituted congregation did not grant any contractual right in and of itself. The appeal can therefore be distinguished from *Hofer v. Hofer*, [1970] S.C.R. 958, at pp. 961 and 963, *Senez v. Montreal Real Estate Board*, [1980] 2 S.C.R. 555, at pp. 566 and 568, and *Lakeside Colony*, at p. 174. In all of these cases, the Court concluded that the terms of these voluntary associations were contractually binding.

[29] Moreover, *mere* membership in a religious organization, where no civil or property right is formally granted by virtue of membership, should remain outside the scope of the *Lakeside Colony*

l'arrêt *Lakeside Colony*. Ce qui est requis, c'est qu'un *droit légal* revêtant une importance suffisante — tel un droit de propriété ou un droit contractuel — soit en jeu : voir également *Ukrainian Greek Orthodox Church of Canada c. Trustees of the Ukrainian Greek Orthodox Cathedral of St. Mary the Protectress*, [1940] R.C.S. 586. Il ne suffit pas qu'une question revête une « importance suffisante » dans quelque sens abstrait. Comme le soulignait le juge Gonthier dans *Lakeside Colony*, la nature du droit légal en jeu différait selon le point de vue à partir duquel il était considéré : pour la colonie, le différend portait sur un droit de propriété; pour les membres, il était de nature contractuelle. Dans un cas comme dans l'autre, le critère de l'« importance suffisante » n'a jamais été envisagé comme fondement justifiant de reconnaître compétence aux tribunaux en l'absence de décisions sur l'existence de droits légaux.

[28] M. Wall prétend que la Congrégation et lui sont liés par un droit contractuel (ou quelque chose qui s'en rapproche). Le juge en cabinet n'a pas tiré de conclusion en ce sens. Il n'a été présenté aucun élément indiquant que M. Wall et la Congrégation entendaient établir des rapports juridiques. Contrairement à bon nombre d'autres organismes, telles les associations professionnelles, la Congrégation n'a ni constitution écrite, ni règlement administratif, ni règles qui autoriseraient ses membres à demander et obtenir l'exécution de tels accords conformément à leurs modalités. Dans l'arrêt *Zebroski c. Jehovah's Witnesses* (1988), 87 A.R. 229, par. 22-25, la Cour d'appel de l'Alberta a jugé que l'appartenance à une congrégation de constitution similaire ne conférait pas en soi de droit contractuel. Par conséquent, le pourvoi peut être distingué des affaires *Hofer c. Hofer*, [1970] R.C.S. 958, p. 961 et 963, *Senez c. Chambre d'Immeuble de Montréal*, [1980] 2 R.C.S. 555, p. 566 et 568, et *Lakeside Colony*, p. 174. Dans toutes ces affaires, notre Cour a conclu que les modalités régissant les associations volontaires concernées constituaient des obligations contractuelles liant les parties.

[29] Qui plus est, la *simple* appartenance à une organisation religieuse, lorsque cette appartenance n'a pas pour effet de conférer formellement de droit civil ou de droit de propriété, devrait demeurer en

criteria. Otherwise, it would be devoid of its meaning and purpose. In fact, members of a congregation may not think of themselves as entering into a legally enforceable contract by merely adhering to a religious organization, since "[a] religious contract is based on norms that are often faith-based and deeply held": R. Moon, "*Bruker v. Marcovitz*: Divorce and the Marriage of Law and Religion" (2008), 42 *S.C.L.R.* (2d) 37, at p. 45. Where one party alleges that a contract exists, they would have to show that there was an intention to form contractual relations. While this may be more difficult to show in the religious context, the general principles of contract law would apply.

dehors du champ d'application du critère de l'arrêt *Lakeside Colony*. Autrement, ce critère serait dénué de tout sens et objet. En réalité, il est possible que les membres d'une congrégation ne considèrent pas que, par le simple fait d'adhérer à une organisation religieuse, ils se trouvent à conclure un contrat susceptible d'exécution devant les tribunaux, étant donné qu'[TRADUCTION] « un contrat religieux repose sur des normes souvent ancrées dans la foi et profondément respectées » : R. Moon, « *Bruker v. Marcovitz* : Divorce and the Marriage of Law and Religion » (2008), 42 *S.C.L.R.* (2d) 37, p. 45. La partie qui allègue l'existence d'un contrat doit démontrer que les parties avaient l'intention d'établir des rapports contractuels. Bien que cela puisse se révéler plus difficile à démontrer dans un contexte religieux, les principes généraux du droit des contrats s'appliqueront dans un tel cas.

[30] Before the chambers judge, Mr. Wall also argued his rights are at stake because the Judicial Committee's decision damaged his economic interests in interfering with his client base. On this point, I would again part ways with the courts below. Mr. Wall had no property right in maintaining his client base. As Justice Wakeling held in dissent in the court below, Mr. Wall does not have a right to the business of the members of the Congregation: Court of Appeal reasons, at para. 139. For an illustration of this, see *Mott-Trille v. Steed*, [1998] O.J. No. 3583 (C.J. (Gen. Div.)), at paras. 14 and 45, rev'd on other grounds, 1999 CanLII 2618 (Ont. C.A.).

[30] Devant le juge en cabinet, M. Wall a également plaidé que ses droits sont en jeu, car la décision du Comité de discipline religieuse a porté atteinte à ses intérêts financiers en réduisant sa clientèle. Sur ce point, je me dissocie une fois de plus des juridictions inférieures. Le maintien par M. Wall de sa clientèle ne constituait pas pour lui un droit de propriété. Comme l'a indiqué le juge Wakeling dans ses motifs de dissidence en Cour d'appel, M. Wall ne dispose pas du droit de faire affaire avec les membres de la Congrégation : motifs de la Cour d'appel, par. 139. À titre d'exemple, voir *Mott-Trille c. Steed*, [1998] O.J. No. 3583 (C.J. (Div. gén.)), par. 14 et 45, inf. pour d'autres motifs, 1999 CanLII 2618 (C.A. Ont.).

[31] Had Mr. Wall been able to show that he suffered some detriment or prejudice to his legal rights arising from the Congregation's membership decision, he could have sought redress under appropriate private law remedies. This is not to say that the Congregation's actions had no impact on Mr. Wall; I accept his testimony that it did. Rather, the point is that in the circumstances of this case, the negative impact does not give rise to an actionable claim. As such there is no basis for the courts to intervene in the Congregation's decision-making process; in other words, the matters in issue fall outside the courts' jurisdiction.

[31] Si M. Wall avait été en mesure de démontrer que ses droits légaux avaient subi un quelconque préjudice découlant de la décision concernant son appartenance à la Congrégation, il aurait pu demander réparation en se prévalant des recours de droit privé appropriés. Cela ne veut pas dire que les mesures prises par la Congrégation n'ont pas eu de répercussions sur M. Wall. J'accepte son témoignage qu'elles en ont eues. Toutefois, eu égard aux circonstances de l'espèce, ces répercussions négatives n'ont pas fait naître de droit d'action. En conséquence, rien ne justifie l'intervention des tribunaux dans le processus décisionnel de la Congrégation. Autrement dit, les questions en litige ne relèvent pas de la compétence des tribunaux.

2018 SCC 26 (CanLII)

C. *Justiciability*

[32] This appeal may be allowed for the reasons given above. However, I also offer some supplementary comments on justiciability, given that it was an issue raised by the parties and dealt with at the Court of Appeal. In addition to questions of jurisdiction, justiciability limits the extent to which courts may engage with decisions by voluntary associations even when the intervention is sought only on the basis of procedural fairness. Justiciability relates to the subject matter of a dispute. The general question is this: Is the issue one that is appropriate for a court to decide?

[33] Lorne M. Sossin defines justiciability as

> a set of judge-made rules, norms and principles delineating the scope of judicial intervention in social, political and economic life. In short, if a subject-matter is held to be suitable for judicial determination, it is said to be justiciable; if a subject-matter is held not to be suitable for judicial determination, it is said to be non-justiciable.

(*Boundaries of Judicial Review: The Law of Justiciability in Canada* (2nd ed. 2012), at p. 7)

Put more simply, "[j]usticiability is about deciding whether to decide a matter in the courts": *ibid.*, at p. 1.

[34] There is no single set of rules delineating the scope of justiciability. Indeed, justiciability depends to some degree on context, and the proper approach to determining justiciability must be flexible. The court should ask whether it has the institutional capacity and legitimacy to adjudicate the matter: see Sossin, at p. 294. In determining this, courts should consider "that the matter before the court would be an economical and efficient investment of judicial resources to resolve, that there is a sufficient factual and evidentiary basis for the claim, that there would

C. *Justiciabilité*

[32] Il est possible de faire droit au présent pourvoi pour les motifs énoncés précédemment. Toutefois, je tiens à ajouter quelques observations sur la question de la justiciabilité, puisque celle-ci a été soulevée par les parties et examinée par la Cour d'appel. En plus d'être limitée par des questions de compétence, et ce, même lorsque leur intervention est demandée uniquement pour des raisons fondées sur l'équité procédurale, la capacité des tribunaux d'intervenir à l'égard des décisions d'associations volontaires est également limitée par la notion de justiciabilité. La justiciabilité est une notion qui s'attache à l'objet du différend et se traduit par la question générale suivante : Est-on en présence d'une question qu'il convient de faire trancher par un tribunal?

[33] Lorne M. Sossin définit ainsi la justiciabilité :

> [TRADUCTION] . . . un ensemble de règles, de normes et de principes jurisprudentiels qui délimitent le champ d'application de l'intervention judiciaire dans la vie sociale, politique et économique. Bref, si une question est considérée comme se prêtant à une décision judiciaire, on dit qu'elle est justiciable; si une question n'est pas considérée comme se prêtant à une décision judiciaire, on dit qu'elle n'est pas justiciable.

(*Boundaries of Judicial Review : The Law of Justiciability in Canada* (2e éd. 2012), p. 7)

En termes plus simples, [TRADUCTION] « [l]a justiciabilité ou non-justiciabilité d'une question consiste à décider si celle-ci doit être tranchée par les tribunaux » : *ibid.*, p. 1.

[34] Il n'existe pas un ensemble précis de règles délimitant le champ d'application de la notion de justiciabilité. En effet, la justiciabilité est dans une certaine mesure tributaire du contexte, et l'approche appropriée pour statuer sur la justiciabilité d'une question doit être empreinte de souplesse. Le tribunal qui est appelé à le faire doit se demander s'il dispose des attributions institutionnelles et de la légitimité requises pour trancher la question : voir Sossin, p. 294. Pour conclure au caractère justiciable d'une question, le tribunal doit être d'avis [TRADUCTION]

2018 SCC 26 (CanLII)

be an adequate adversarial presentation of the parties' positions and that no other administrative or political body has been given prior jurisdiction of the matter by statute" (*ibid.*).

« que le fait pour lui de résoudre la question constituerait une utilisation économique et efficace de ses ressources, qu'il existe suffisamment de faits et d'éléments de preuve au soutien de la demande, qu'un exposé adéquat des positions contradictoires des parties sera présenté et qu'aucun organisme administratif ou corps politique ne s'est pas déjà vu conférer par voie législative compétence à l'égard de la question » (*ibid.*).

[35] By way of example, the courts may not have the legitimacy to assist in resolving a dispute about the greatest hockey player of all time, about a bridge player who is left out of his regular weekly game night, or about a cousin who thinks she should have been invited to a wedding: Court of Appeal reasons, at paras. 82-84, per Wakeling J.A.

[35] À titre d'exemple, les tribunaux pourraient, faute de légitimité, n'être d'aucun secours pour régler un différend portant sur l'identité du meilleur joueur de hockey de tous les temps, sur un joueur de bridge que l'on écarte de son habituelle soirée de jeu hebdomadaire ou sur une cousine convaincue qu'elle aurait dû être invitée à un mariage : motifs de la Cour d'appel, par. 82-84, le juge d'appel Wakeling.

[36] This Court has considered the relevance of religion to the question of justiciability. In *Bruker v. Marcovitz*, 2007 SCC 54, [2007] 3 S.C.R. 607, at para. 41, Justice Abella stated: "The fact that a dispute has a religious aspect does not by itself make it non-justiciable." That being said, courts should not decide matters of religious dogma. As this Court noted in *Syndicat Northcrest v. Amselem*, 2004 SCC 47, [2004] 2 S.C.R. 551, at para. 50: "Secular judicial determinations of theological or religious disputes, or of contentious matters of religious doctrine, unjustifiably entangle the court in the affairs of religion." The courts have neither legitimacy nor institutional capacity to deal with such issues, and have repeatedly declined to consider them: see *Demiris v. Hellenic Community of Vancouver*, 2000 BCSC 733, at para. 33 (CanLII); *Amselem*, at paras. 49-51.

[36] La Cour s'est penchée sur l'interaction de la religion et de la justiciabilité. Dans *Bruker c. Marcovitz*, 2007 CSC 54, [2007] 3 R.C.S. 607, par. 41, la juge Abella a déclaré ce qui suit : « Le fait qu'un litige comporte un aspect religieux ne le rend pas nécessairement non justiciable. » Cela dit, les tribunaux ne devraient pas trancher les questions de dogmes religieux. Comme l'a indiqué notre Cour, dans l'arrêt *Syndicat Northcrest c. Amselem*, 2004 CSC 47, [2004] 2 R.C.S. 551, par. 50 : « Statuer sur des différends théologiques ou religieux ou sur des questions litigieuses touchant la doctrine religieuse amènerait les tribunaux à s'empêtrer sans justification dans le domaine de la religion. » Les tribunaux n'ont ni la légitimité ni les attributions institutionnelles requises pour se saisir de questions de la sorte, et ils ont maintes fois refusé de le faire : voir *Demiris c. Hellenic Community of Vancouver*, 2000 BCSC 733, par. 33 (CanLII); *Amselem*, par. 49-51.

[37] In *Lakeside Colony*, this Court held (at p. 175 (emphasis added)):

> In deciding the membership or residence status of the defendants, the court must determine whether they have been validly expelled from the colony. It is not incumbent on the court to review the merits of the decision to expel. It is, however, called upon to determine whether the purported expulsion was carried out according to the

[37] La Cour a tiré la conclusion suivante dans *Lakeside Colony* (p. 175 (je souligne)) :

> Afin de trancher la question du statut de membre ou de résidant des défendeurs, la cour doit décider si leur expulsion de la colonie est valide. Il n'appartient pas à la cour d'examiner le bien-fondé de la décision d'expulser. Elle est appelée, toutefois, à décider si l'expulsion présumée a été faite conformément aux règles applicables, dans le

2018 SCC 26 (CanLII)

applicable rules, with regard to the principles of natural justice, and without *mala fides*. This standard goes back at least to this statement by Stirling J. in *Baird v. Wells* (1890), 44 Ch. D. 661, at p. 670:

> The only questions which this Court can entertain are: first, whether the rules of the club have been observed; secondly, whether anything has been done contrary to natural justice; and, thirdly, whether the decision complained of has been come to *bona fide*.

The foregoing passage makes clear that the courts will not consider the merits of a religious tenet; such matters are not justiciable.

[38] In addition, sometimes even the procedural rules of a particular religious group may involve the interpretation of religious doctrine. For instance, the *Organized to Do Jehovah's Will* handbook (2005) outlines the procedure to be followed in cases of serious wrongdoing: "After taking the steps outlined at Matthew 18:15, 16, some individual brothers or sisters may report to the elders cases of unresolved serious wrongdoing" (p. 151). The courts lack the legitimacy and institutional capacity to determine whether the steps outlined in Matthew have been followed. These types of procedural issues are also not justiciable. That being said, courts may still review procedural rules where they are based on a contract between two parties, even where the contract is meant to give effect to doctrinal religious principles: *Marcovitz*, at para. 47. But here, Mr. Wall has not shown that his legal rights were at stake.

[39] Justiciability was raised in another way. Both the Congregation and Mr. Wall argued that their freedom of religion and freedom of association should inform this Court's decision. The dissenting justice in the Court of Appeal made comments on this basis and suggested that religious matters were not justiciable due in part to the protection of freedom of religion in s. 2(*a*) of the *Canadian Charter of Rights and Freedoms*. As this Court held in *RWDSU v. Dolphin Delivery Ltd.*, [1986] 2 S.C.R. 573, at

respect des principes de justice naturelle et sans mauvaise foi. Cette norme remonte au moins aussi loin que l'énoncé du juge Stirling dans l'arrêt *Baird c. Wells* (1890), 44 Ch. D. 661, p. 670 :

> [TRADUCTION] Les seules questions dont notre cour peut connaître sont les suivantes : Premièrement, les règles du club ont-elles été observées? Deuxièmement, a-t-on fait quelque chose de contraire à la justice naturelle? Et, troisièmement, la décision attaquée a-t-elle été prise de bonne foi?

Il ressort clairement de ce passage que les tribunaux n'examineront pas le bien-fondé d'un principe religieux; les questions de cette nature ne sont pas justiciables.

[38] En outre, il arrive parfois que même les règles de procédure d'un groupe religieux impliquent l'interprétation d'une doctrine religieuse. Par exemple, le manuel *Organisés pour faire la volonté de Jéhovah* (2005) expose la marche à suivre en cas de transgression grave : « Après avoir suivi la démarche définie en Matthieu 18:15, 16, un frère ou une sœur portera peut-être à l'attention des anciens un cas de faute grave qui n'a pu être réglé » (p. 151). Les tribunaux n'ont ni la légitimité ni les attributions institutionnelles pour évaluer si les étapes que prévoit l'Évangile selon Matthieu ont bel et bien été suivies. De telles questions d'ordre procédural sont, elles aussi, non justiciables. Cela étant posé, les tribunaux peuvent néanmoins contrôler les règles de procédure basées sur un contrat intervenu entre deux parties, même si ce contrat vise à mettre en œuvre des principes de doctrine religieuse : *Marcovitz*, par. 47. En l'espèce, toutefois, M. Wall n'a pas su démontrer que ses droits légaux étaient en jeu.

[39] La question de la justiciabilité s'est soulevée d'une autre façon. La Congrégation et M. Wall ont tous deux prétendu que leurs droits à la liberté de religion et à la liberté d'association devaient être pris en compte dans la décision de la Cour. Le juge d'appel dissident a formulé des commentaires à cet égard, affirmant que les questions religieuses n'étaient pas justiciables, en partie en raison de la protection dont jouit la liberté de religion garantie par l'al. 2*a*) de la *Charte canadienne des droits et libertés*. Comme a

2018 SCC 26 (CanLII)

p. 603, the *Charter* does not apply to private litigation. Section 32 specifies that the *Charter* applies to the legislative, executive and administrative branches of government: *ibid.*, at pp. 603-4. The *Charter* does not directly apply to this dispute as no state action is being challenged, although the *Charter* may inform the development of the common law: *ibid.*, at p. 603. In the end, religious groups are free to determine their own membership and rules; courts will not intervene in such matters save where it is necessary to resolve an underlying legal dispute.

V. Disposition

[40] I would allow the appeal and quash the originating application for judicial review filed by Mr. Wall. As the appellants requested that no costs be awarded, I award none.

Appeal allowed.

Solicitors for the appellants: W. Glen How & Associates, Georgetown, Ontario.

Solicitors for the respondent: McCarthy Tétrault, Vancouver.

Solicitor for the intervener the Canadian Council of Christian Charities: Canadian Council of Christian Charities, Elmira, Ontario.

Solicitor for the intervener the Association for Reformed Political Action Canada: Association for Reformed Political Action Canada, Ottawa.

Solicitors for the intervener the Canadian Constitution Foundation: Osler, Hoskin & Harcourt, Toronto.

Solicitors for the interveners the Evangelical Fellowship of Canada and the Catholic Civil Rights League: Vincent Dagenais Gibson, Ottawa.

conclu notre Cour dans *SDGMR c. Dolphin Delivery Ltd.*, [1986] 2 R.C.S. 573, p. 603, la *Charte* ne s'applique pas aux litiges privés. L'article 32 de la *Charte* précise que celle-ci s'applique aux pouvoirs législatif, exécutif et administratif du gouvernement : *ibid.*, p. 603-604. La *Charte* ne s'applique pas directement en l'espèce, puisqu'aucune mesure étatique n'est contestée, mais elle peut néanmoins guider l'évolution de la common law : *ibid.*, p. 603. En définitive, les groupes religieux sont libres de décider qui peut être membre de leur organisation, et d'établir leurs propres règles de fonctionnement; les tribunaux n'interviendront pas à l'égard de telles questions, à moins qu'il ne soit nécessaire de le faire pour trancher un différend de nature juridique sous-jacent.

V. Dispositif

[40] Je suis d'avis d'accueillir l'appel et d'annuler la demande introductive d'instance en contrôle judiciaire déposée par M. Wall. Comme les appelants ont demandé qu'aucuns dépens ne soient adjugés, je n'en accorde pas.

Pourvoi accueilli.

SCOTT J.A.

BETWEEN:

HUPACASATH FIRST NATION

Appellant

And

THE MINISTER OF FOREIGN AFFAIRS CANADA and THE ATTORNEY GENERAL OF CANADA

Respondents

REASONS FOR JUDGMENT

STRATAS J.A.

A. Introduction

[1] In the Federal Court, the appellant, Hupacasath First Nation, alleged that a foreign investment promotion and protection agreement between Canada and the People's Republic of China might affect Aboriginal rights and interests it has asserted over certain lands in British

Columbia. Due to that potential effect, the appellant submitted that, as a matter of law, the Minister of Foreign Affairs Canada and the Attorney General of Canada ("Canada") had to consult with it and, if necessary, accommodate its concerns before causing the agreement to come into force. Canada did not do this and so, the appellants said, Canada failed to fulfil its duty.

2015 FCA 4 (CanLII)

[2] By judgment dated August 26, 2013, the Federal Court (*per* Crampton C.J.) ruled against the appellant: 2013 FC 900. It found that the agreement could not potentially cause harm to the appellant's asserted rights and interests. The Federal Court added that any effect on the appellant's asserted rights and interests was "non-appreciable" and "speculative."

[3] The appellant appeals to this Court.

[4] During oral argument in this Court, an issue arose concerning the jurisdiction of the Federal Courts to entertain this matter. Decisions by Canada to enter into international agreements and treaties are exercises of federal Crown prerogative power. A decision of the Court of Appeal for Ontario suggests that the Federal Courts do not have jurisdiction to review exercises of prerogative power. We invited the parties to provide written submissions on this after the hearing. We have now reviewed and considered those submissions.

[5] In those submissions, Canada also raises a new objection. It says that the appellant's case, directed at an exercise of Crown prerogative power, is not justiciable and should not be heard.

[6] Following oral argument, while this matter was under reserve, the Supreme Court of Canada released its decision in *Tsilhqot'in Nation v. British Columbia*, 2014 SCC 44. On some Aboriginal law issues, the decision is rather sweeping. So we invited the parties to provide supplementary written submissions on its effect on this appeal. We have now reviewed and considered those submissions too.

2015 FCA 4 (CanLII)

[7] In my view, the Federal Courts system has the jurisdiction to review exercises of federal Crown prerogative power. Accordingly, the Federal Court and this Court have jurisdiction over this matter. I would also reject Canada's submission that the appellant's case is not justiciable.

[8] On the merits of the appeal, I agree with the result and much of the reasoning of the Federal Court. It applied proper legal principles to the evidence before it. The recent case of *Tsilhqot'in Nation* does not alter those legal principles. The Federal Court's overall conclusions – that the appellant had not established a causal relationship between the effects of the foreign investment promotion and protection agreement upon the appellant and its asserted rights and interests and that any effects upon the appellant were "non-appreciable" and "speculative" – were predominantly factual in nature and deserve deference. These conclusions were amply supported by the evidentiary record.

[9] Accordingly, Canada did not have to consult with the appellant before entering into the foreign investment promotion and protection agreement.

[10] Therefore, I would dismiss the appeal with costs.

B. Basic facts

[11] The appellant is a band under the *Indian Act*, R.S.C. 1985, c. I-5. Its 285 members live on two reserves covering roughly 56 acres of land on Vancouver Island. However, it asserts Aboriginal rights, including self-government rights, and title over roughly 573,000 acres of land on Vancouver Island, an area that overlaps with the territory claimed by nine other First Nations.

2015 FCA 4 (CanLII)

[12] On September 9, 2012, Canada announced that it had signed a foreign investment promotion and protection agreement with the People's Republic of China. This agreement is known as the *Agreement between the Government of Canada and the Government of the People's Republic of China for the Promotion and Reciprocal Protection of Investments* (hereafter "Agreement"). The Agreement is similar to twenty-four other foreign investment promotion and protection agreements Canada has signed with other nations.

[13] Under the Agreement, Canada and the People's Republic of China must, among other things, treat investors from the other country and their investments in accordance with principles of non-discriminatory treatment and protection from expropriation without compensation. The Agreement implements these principles in the following provisions:

- *Article 4 (Minimum Standard of Treatment).* The host country must treat investments made by the investors of the other country in accordance with the customary international law minimum treatment of aliens.

- Article 5 (Most-Favoured Nation Treatment). The host country must accord investors of the other country, and their investments, treatment that is no less favourable than the treatment the host country accords, in like circumstances, to investors or investments of other countries.

- *Article 8 (Aboriginal Reservation).* Under Article 8(3) and Annex B.8, Canada has the right to provide rights and preferences to Aboriginal peoples that may be inconsistent with certain obligations under the Agreement; the appellant says this narrow exception, applicable only to articles 5-7, does nothing to prevent harm to the rights and interests of Aboriginal peoples.

- *Article 10 (Expropriation).* The host country may only directly or indirectly expropriate an investment of an investor of the other country for a public purpose, on a non-discriminatory basis, in accordance with due process of law, and upon payment of compensation. Annex B.10 clarifies that good faith and non-discriminatory measures designed and applied to protect legitimate public policy objectives, such as health, safety and the environment, do not constitute indirect expropriation.

- *Article 33 (General Exceptions).* The host country may take measures, including environmental measures, necessary to protect human, animal or plant life or health, provided that the measures are not applied in an arbitrary or unjustifiable manner and are not a disguised restriction on trade or investment.

2015 FCA 4 (CanLII)

[14] In certain circumstances, violations of the Agreement can result in proceedings before an arbitral tribunal: see Part C, articles 19-32. Violations of certain provisions can result in monetary awards against the host country: article 31(2) and see the Federal Court's reasons at paragraphs 87 and 133(h).

2015 FCA 4 (CanLII)

[15] The Agreement does not empower any awards against a sub-national government, such as a First Nations government. Nor does it require a government to change or discontinue a measure that breaches the Agreement. In particular, an arbitral tribunal established under the Agreement cannot stop Canada from fully complying with its obligations to Aboriginal peoples.

[16] Broadly speaking, the appellant says that the Agreement changes the landscape in the sense that it creates incentives for Canada to act in a manner that avoids breaches of the Agreement and resulting monetary awards. This, it says, may cause Canada to act in a manner that injures the appellant and its interests.

[17] On the law set out in cases such as *Rio Tinto Alcan Inc. v. Carrier Sekani Tribal Council*, 2010 SCC 43, [2010] 2 S.C.R. 650, *Mikisew Cree First Nation v. Canada (Minister of Canadian Heritage)*, 2005 SCC 69, [2005] 3 S.C.R. 388, and *Haida Nation v. British Columbia (Minister of Forests)*, 2004 SCC 73, [2004] 3 S.C.R. 511, the appellant says that Canada became obligated in these circumstances to consult with it and accommodate its rights and interests. Before signing the Agreement and, indeed, before the matter was heard in the Federal Court, Canada did not consult with the appellant. The appellant maintains that had Canada consulted with it, Canada would have had to protect the appellant's rights in the Agreement. But Canada did not.

[18] Before the Federal Court, the parties adduced expert evidence concerning the interpretation and effects of the Agreement. The Federal Court assigned less weight to the expert evidence tendered by the appellant because of impartiality concerns (at paragraphs 37-38) and the presence of "assertions on key issues" that "were baldly stated and unsubstantiated" (at paragraph 42).

2015 FCA 4 (CanLII)

[19] The Federal Court found uncertainty on how arbitral tribunals might interpret the Agreement. But overall, largely based on the expert evidence it preferred – that tendered by Canada – the Federal Court found no conflict, actual or potential, between the provisions of the Agreement on the one hand and the appellant's asserted rights, interests and title on the other (at paragraphs 133, 147-148).

[20] Among other things, it found that the Appellant had not offered sufficient evidence, beyond the speculative, that:

- the appellant would face potential adverse impacts arising from arbitral decisions (at paragraphs 100-105);

- absent article 10, Canada would have been prepared to expropriate land, and particularly land owned by Chinese investors, without compensation in order to settle the appellant's Aboriginal claims (at paragraphs 108-110);

- arbitral tribunals would rule that measures designed to protect or accommodate the appellant's asserted Aboriginal rights contravene article 10 (at paragraphs 106-120);

- Canada would refrain from taking measures to protect the appellant's asserted Aboriginal rights due to a fear of monetary awards made by arbitral tribunals under the Agreement (at paragraph 133(d));

- Canada has not retained sufficient policy flexibility through the exemptions under the Agreement to prevent or avoid potential adverse impacts upon the appellant's asserted Aboriginal rights (at paragraphs 121-131);

- any existing measures, including any enacted by the appellant, might contravene or conflict with any of the obligations under the Agreement (at paragraph 133(f)).

[21] In reaching these conclusions, the Federal Court drew in part upon Canada's experience under the twenty-four other similar foreign investment promotion and protection agreements it has entered into, particularly the *North American Free Trade Agreement*: at paragraph 133(a). The Federal Court concluded that the appellant had not shown that Canada's experience under the Agreement would be different: at paragraph 133(c).

[22] Overall, the Federal Court concluded that Canada did not fall under a duty to consult the appellant because the alleged potential adverse impacts on its asserted interests were "non-

2015 FCA 4 (CanLII)

appreciable" and "speculative" and the appellant had not established the required causal link between the Agreement and those alleged impacts: at paragraphs 3, 147 and 148.

C. Analysis

(1) The matter under review and the nature of the jurisdictional issue

[23] The matter under review is the coming into effect of the Agreement. This, the appellant says, will happen without consultation with it, thereby violating its rights.

[24] How does this Agreement come into effect? The parties agree that this happens in two steps.

[25] First, the Governor in Council passes an order in council authorizing the Minister of Foreign Affairs to take the actions necessary to have the Agreement come into effect. At the time of the appellant's judicial review, this had not been done.

[26] Second, the Agreement comes into effect when the Minister signs an instrument of ratification and Canada delivers it to the People's Republic of China, confirming that all of Canada's internal legal procedures for bringing the Agreement into effect have been met. See Hugh M. Kindred *et al.*, eds., *International Law Chiefly as Interpreted and Applied in Canada*, 7th ed. (Toronto: Emond Montgomery 2006) at pages 120-121.

2015 FCA 4 (CanLII)

[27] This process is reflected in section 35 of the Agreement. It provides that the parties will notify each other through diplomatic channels that they have completed the internal legal procedures for the entry into force of the Agreement.

2015 FCA 4 (CanLII)

[28] While this matter was under reserve, the parties advised us that Canada has now taken the above steps and the Agreement is now in effect. This development does not affect our analysis of the issues in this appeal.

[29] In the Federal Court, the appellant primarily sought two forms of relief. First, it sought a declaration that "Canada is required to engage in a process of consultation and accommodation with First Nations, including the appellant, prior to taking steps which will bind Canada under the [Agreement]." Second, it sought an order restraining the Minister or any other official from taking steps to bring the Agreement into effect.

[30] Unlike the present case, in cases seeking review of orders or decisions made under legislation, this Court indisputably has jurisdiction. Under section 18.1(3) of the *Federal Courts Act*, R.S.C. 1985, c. F-7, this Court can review the actions of federal boards, commissions or other tribunals. The Governor in Council is a "federal board, commission or other tribunal" within the meaning of subsection 2(1) of the *Federal Courts Act* – it is exercising "jurisdiction or powers conferred by or under an Act of Parliament …".

[31] In this case, however, the Governor in Council's power to make the order is not conferred by or under an Act of Parliament. What is the source of its power?

[32] The Governor in Council's power to make the order comes from the Crown's prerogative powers. These are the Crown's remaining inherent or historical powers as the common law has shaped them: Peter W. Hogg, Q.C., *et al.*, *Liability of the Crown*, 4th ed. (Toronto: Carswell, 2011) at pages 19-20. Looking at it another way, prerogative powers are "the residue of discretionary or arbitrary authority, which at any given time is legally left in the hands of the Crown": A.V. Dicey, *Law of the Constitution*, 10th ed. (1959) at page 424.

2015 FCA 4 (CanLII)

[33] The conduct of foreign affairs is one area where the Crown holds some prerogative powers. These include the power to enter into treaties and international agreements. Properly understood then, to bring the Agreement into effect, the Crown, acting through the Governor in Council, uses its prerogative power to make an order instructing the Minister of Foreign Affairs to issue an instrument of ratification. In turn, the Minister of Foreign Affairs complies with that order.

[34] In principle, exercises of pure Crown prerogative, such as the Governor in Council's exercise of power in this case, can be judicially reviewed: *Council of Civil Service Unions v. Minister for the Civil Service*, [1985] 1 A.C. 374, [1984] 3 All E.R. 935 (H.L.). However, in Canada, in the case of the federal Crown prerogative, the question is where that review can take place. Do the Federal Courts have the power under the *Federal Courts Act* to review exercises of pure Crown prerogative? If not, provincial superior courts have that power by default because of their inherent jurisdiction.

[35] The only appellate authority in Canada on this question is *Black v. Canada (Prime Minister)* (2001), 54 O.R. (3d) 215, 199 D.L.R. (4th) 228 (C.A.). And that authority suggests that the Federal Courts do not have the power under the *Federal Courts Act* to review exercises of pure Crown prerogative. If *Black* is still good law, the appellant should not have gone to the Federal Courts to restrain or challenge the Governor in Council's exercise of pure Crown prerogative – here, its power to sign the Agreement and cause it to come into effect.

2015 FCA 4 (CanLII)

(2) Analysis of the jurisdictional issue

[36] In their memoranda of fact and law submitted prior to this appeal, the parties did not address the jurisdiction of the Federal Courts to entertain this matter. Both assumed that the Federal Courts had jurisdiction.

[37] In response to questioning at the hearing of this appeal, both agreed that the Federal Courts had jurisdiction. However, both, understandably, were not fully prepared to address the authority of *Black*, a case neither had cited in its memorandum.

[38] Regardless of the parties' agreement that this Court has jurisdiction, this Court cannot proceed unless it is persuaded that it has jurisdiction. Therefore, at the hearing of this appeal, we heard full argument on the merits of the appeal but we also asked the parties to make further written submissions on the issue of jurisdiction.

[39] The parties have done so, and the Court has received and considered the parties submissions. The Court thanks the parties for their thorough, helpful submissions.

[40] As evident from the preliminary discussion, above, the jurisdiction of this Court turns upon two provisions of the *Federal Courts Act*, subsections 2(1) and 18.1(3). Subsection 18.1(3) provides as follows:

18.1. (3) On an application for judicial review, the Federal Court may	**18.1.** (3) Sur présentation d'une demande de contrôle judiciaire, la Cour fédérale peut.
(a) order a federal board, commission or other tribunal to do any act or thing it has unlawfully failed or refused to do or has unreasonably delayed in doing; or	a) ordonner à l'office fédéral en cause d'accomplir tout acte qu'il a illégalement omis ou refusé d'accomplir ou dont il a retardé l'exécution de manière déraisonnable;
(b) declare invalid or unlawful, or quash, set aside or set aside and refer back for determination in accordance with such directions as it considers to be appropriate, prohibit or restrain, a decision, order, act or proceeding of a federal board, commission or other tribunal.	b) déclarer nul ou illégal, ou annuler, ou infirmer et renvoyer pour jugement conformément aux instructions qu'elle estime appropriées, ou prohiber ou encore restreindre toute décision, ordonnance, procédure ou tout autre acte de l'office fédéral.

[41] As can be seen, the Federal Courts can only exercise these powers if they are reviewing a "federal board, commission or other tribunal." Subsection 2(1) defines that term:

2. (1) In this Act,	2. (1) Les définitions qui suivent s'appliquent à la présente loi.
"federal board, commission or other tribunal" means any body, person or persons having, exercising or purporting to exercise jurisdiction or powers conferred by or under an Act of Parliament or by or under an order made pursuant to a prerogative of the	« office fédéral » Conseil, bureau, commission ou autre organisme, ou personne ou groupe de personnes, ayant, exerçant ou censé exercer une compétence ou des pouvoirs prévus par une loi fédérale ou par une ordonnance prise en vertu d'une

2015 FCA 4 (CanLII)

Crown… prérogative royale…

[42] Above, I noted that the making of an order by the Governor in Council authorizing the Minister of Foreign Affairs to issue an instrument of ratification is one founded upon the Crown prerogative and nothing else. When federal officials act purely under the federal Crown prerogative and nothing else, are they exercising a power "conferred by or under an Act of Parliament or by or under an order made pursuant to a prerogative of the Crown" within the meaning of subsection 2(1) of the *Federal Courts Act*?

2015 FCA 4 (CanLII)

[43] *Black*, *supra* arose from the British government's nomination of Black, then a Canadian citizen, for a peerage. Acting under the Canadian Crown prerogative relating to the bestowal of honours, the then Prime Minister of Canada advised the Queen to block the peerage, advising that it was against Canadian law. As a result, Black did not become a peer. In the Ontario Superior Court of Justice, Black brought an action for damages against the Prime Minister, alleging that the Prime Minister wrongly interfered with the Queen and blocked his peerage.

[44] In *Black*, all agreed that the Federal Courts and provincial superior courts had concurrent jurisdiction over actions against the federal Crown and its servants: *Federal Courts Act*, *supra*, subsection 17(1). However, Canada, seeking to strike out Black's action, argued that the action was really a review of a "federal board, commission or other tribunal" within the meaning of subsection 2(1) of the *Federal Court Act*. Under subsection 18(1) of the *Federal Court Act*, the Federal Court alone has jurisdiction to conduct such a review. Therefore, said Canada, Black was barred from bringing his proceeding anywhere but the Federal Court.

[45] The Court of Appeal for Ontario disagreed, adopting a purely textual approach to subsection 2(1) of the *Federal Courts Act*. It held (at paragraphs 69-76) that the Prime Minister's actions were an exercise of the pure prerogative power of the Crown relating to honours. In its view, subsection 2(1) does not empower the Federal Courts to review exercises of pure prerogative power. It only authorizes reviews of conduct under an "order made pursuant to a prerogative of the Crown." As there was no order under which the Prime Minister was acting, the Federal Courts could not entertain the matter. Only the Ontario Court system with its inherent jurisdiction could.

2015 FCA 4 (CanLII)

[46] Today, on the facts of *Black*, it might not have been necessary for the Court of Appeal for Ontario to consider the definition of "federal board, commission or other tribunal" and define it as narrowly as it did. We now know that in certain circumstances, an action against the federal Crown may be brought in a provincial superior court even where the conduct of a "federal board, commission or other tribunal" is bound up in it in some way: *Canada (Attorney General) v. TeleZone Inc.*, 2010 SCC 62, [2010] 3 S.C.R. 585. Through today's lens, the Ontario Courts may well have had jurisdiction over Black's action even though the conduct of the Prime Minister was very much part of it. I would distinguish *Black* on that basis.

[47] However, it is important to clarify matters of jurisdiction where possible and ensure that the law on such a fundamental point is clear: *Steel v. Canada (Attorney General)*, 2011 FCA 153, [2011] 1 F.C. 143 at paragraphs 62-73. In my view, certain jurisprudential developments have overtaken the reasoning of the Court of Appeal in *Black*. Its conclusion that the Federal Courts cannot review exercises of federal Crown prerogative power can stand no longer.

[48] The Supreme Court of Canada has emphasized that in interpreting legislative provisions one must look at the text, context and purpose of the provision: *Re Rizzo & Rizzo Shoes Ltd.*, [1998] 1 S.C.R. 27, 154 D.L.R. (4th) 193; *Bell ExpressVu Limited Partnership v. Rex*, 2002 SCC 42, [2002] 2 S.C.R. 559. In a case postdating *Black*, the Supreme Court has emphasized that while the text of the provision may predominate in the analysis, the analysis cannot stop with the text as it did in *Black*. Instead, one must go on to examine the context of that text in the wider statute and its purpose: *Canada Trustco Mortgage Co. v. Canada*, 2005 SCC 54, [2005] 2 S.C.R. 601.

2015 FCA 4 (CanLII)

[49] I begin with the text. I agree that the text of subsection 2(1) of the *Federal Courts Act* can be construed in the manner done by the Court of Appeal in *Black*. However, it can also be construed in a manner that supports the jurisdiction of the Federal Courts to review pure exercises of federal Crown prerogative.

[50] As mentioned above, the issue in this case is whether federal officials exercising a pure prerogative power are exercising a power "conferred by or under an Act of Parliament or by or under an order made pursuant to a prerogative of the Crown" within the meaning of subsection 2(1) of the *Federal Courts Act*. The answer is yes if we construe subsection 2(1) as allowing reviews of powers "conferred…by…a prerogative of the Crown." The rival interpretation of subsection 2(1), adopted in *Black*, is that "by or under" modifies "an order" and so unless an official is acting under an order made under the prerogative, this Court does not have jurisdiction.

[51] Either reading of the text of subsection 2(1) is plausible. So to decide the matter, we must consider the context of subsection 2(1) and its purpose.

[52] Parliament intended to grant to the Federal Courts general administrative, supervisory jurisdiction over all federal decision makers: *Canada (Human Rights Commission) v. Canadian Liberty Net*, [1998] 1 S.C.R. 626, 157 D.L.R. (4th) 385 at paragraph 36; *M.N.R. v. Derakhshani*, 2009 FCA 190, 400 N.R. 311 at paragraphs 10-11. Parliament established the Federal Courts under the *Federal Courts Act* to supervise federal administrative decision-makers to ensure consistency across the country: *Southam Inc. v. Canada (Attorney General)*, [1990] 3 F.C. 465 at page 481 (C.A.); *Canada v. Tremblay*, 2004 FCA 172, [2004] 4 F.C. 165 at paragraph 10 (C.A.).

[53] It is true that provincial superior courts have inherent jurisdiction. But, as the Supreme Court has held, "[t]he doctrine of inherent jurisdiction raises no valid reasons, constitutional or otherwise, for jealously protecting the jurisdiction of provincial superior courts as against the Federal Court." Nor does it justify reading "statutes which purport to grant jurisdiction to [the Federal Court]…narrowly so as to protect the jurisdiction of the superior court": *Canadian Liberty Net*, *supra* at paragraphs 32 and 34. The Supreme Court has also emphasized that gaps should not be found in the *Federal Courts Act* unless the "words clearly created them": *Canadian Liberty Net*, *supra* at paragraph 34. Given these authoritative statements from the Supreme Court, unless there are clear words to the contrary, the text of the *Federal Courts Act* must be interpreted to achieve its purposes.

2015 FCA 4 (CanLII)

[54] An interpretation that the Federal Court has the power to review federal exercises of pure prerogative power is consistent with the Parliament's aim to have the Federal Courts review all federal administrative decisions. The contrary interpretation would carve out from the Federal Courts a wide swath of administrative decisions that stem from the federal prerogative, some of which can have large national impact: for a list of the federal prerogative powers, see Peter W. Hogg, Q.C., *et al.*, *Liability of the Crown*, *supra* at pages 23-24 and S. Payne, "The Royal Prerogative" in M. Sunkin and S. Payne, eds., *The Nature of the Crown: A Legal and Political Analysis* (Oxford: Oxford University Press, 1999).

2015 FCA 4 (CanLII)

[55] One must also appreciate the wider context surrounding the nature of the federal Crown prerogative. It can be exercised through a variety of instruments and means: A. Berriedale Keith, *The King and the Imperial Crown* (London: Longmans, Green and Co., 1936) at page 68. The particular language used in section 2 of the *Federal Courts Act* to capture the exercise of the prerogative can be explained as merely an attempt to mirror the way that the prerogative is habitually or commonly understood to be exercised, *i.e.*, by officials acting under an order made under the prerogative. Or it can be interpreted in the manner I have done in paragraph 49, above or in the manner done by the Federal Court in *Khadr v. Canada (Attorney General)*, 2006 FC 727, [2007] 2 F.C. 218.

[56] The contrary interpretation – an interpretation that hives off exercises of federal prerogative power from exercises of powers under orders made by or under the prerogative power – is a technical distinction that serves only to trap the unwary and obstruct access to justice. In *TeleZone*, *supra*, a case postdating *Black*, the Supreme Court underscored (at

paragraphs 18-19 and 32) the need to interpret these provisions with a view to avoiding these concerns.

[57] In the case at bar, these concerns are very much in play. If the contrary interpretation is adopted, the Governor in Council's making of the order in this case authorizing the Minister to issue the instrument of ratification – a pure exercise of prerogative power – would have to be reviewed in the provincial superior courts. But the Minister's issuance of the instrument of ratification in this case – an exercise of power "by or under an order made under the prerogative" under subsection 2(1) of the *Federal Courts Act* – would have to be reviewed under this Court's exclusive jurisdiction under subsection 18 (1) of the *Federal Courts Act*. There would have to be two separate proceedings in two separate courts, with every potential for unnecessary expense, delay, confusion and inconsistency.

[58] In light of the foregoing, I conclude that the Federal Courts can review exercises of jurisdiction or power rooted solely in the federal Crown prerogative.

(3) The justiciability issue

[59] In the course of its written submissions on this Court's jurisdiction, Canada says that if exercises of pure federal Crown prerogative are potentially reviewable, then this Court still cannot consider them. The subject-matter, being policy-oriented and concerned with foreign relations, is not justiciable, *i.e.*, it is not appropriately reviewable in a court of law.

2015 FCA 4 (CanLII)

[60] In support of this, Canada submits that exercises of pure federal Crown prerogative are reviewable only where Charter rights are in issue. They cite *Canada (Prime Minister) v. Khadr*, 2010 SCC 3, [2010] 1 S.C.R. 44 at paragraphs 36-37 and *Operation Dismantle Inc. v. Canada*, [1985] 1 S.C.R. 441, 18 D.L.R. (4th) 481.

[61] It is true that these cases do stand for the narrow proposition that Charter cases are justiciable regardless of the nature of the government action, be it an exercise of the Crown prerogative or otherwise. But these cases do not stand for the broad proposition that all other exercises of the Crown prerogative are not justiciable. In fact, as I shall demonstrate, some are.

[62] Justiciability, sometimes called the "political questions objection," concerns the appropriateness and ability of a court to deal with an issue before it. Some questions are so political that courts are incapable or unsuited to deal with them, or should not deal with them in light of the time-honoured demarcation of powers between the courts and the other branches of government.

[63] Whether the question before the Court is justiciable bears no relation to the source of the government power: *R. v. Ministry of Defence, ex parte Smith*, [1995] 4 All E.R. 427, aff'd [1996] Q.B. 517, [1996] 1 All E.R. 257 (C.A.). For some time now, it has been accepted that for the purposes of judicial review there is no principled distinction between legislative sources of power and prerogative sources of power: *Council of Civil Service Unions*, *supra*. I agree with the following passage from Lord Roskill's speech in that case (at page 417 A.C.):

> If the executive in pursuance of the statutory power does an act affecting the rights of the citizen, it is beyond question that in principle the manner of the

2015 FCA 4 (CanLII)

> exercise of that power may be challenged on one or more…grounds…. If the executive instead of acting under a statutory power acts under a prerogative power…I am unable to see…that there is any logical reason why the fact that the source of the power is the prerogative and not statute should deprive the citizen of that right of challenge to the manner of its exercise which he would possess were the source of the power statutory. In either case the act in question is the act of the executive.

2015 FCA 4 (CanLII)

[64] I also agree with the Court of Appeal for Ontario in *Black*, *supra* at paragraph 44 that "the source of the power – statute or prerogative – should not determine whether the action complained of is reviewable."

[65] So what is or is not justiciable?

[66] In judicial review, courts are in the business of enforcing the rule of law, one aspect of which is "executive accountability to legal authority" and protecting "individuals from arbitrary [executive] action": *Reference Re Secession of Quebec*, [1998] 2 S.C.R. 217, 161 D.L.R. (4th) 385 at paragraph 70. Usually when a judicial review of executive action is brought, the courts are institutionally capable of assessing whether or not the executive has acted reasonably, *i.e.*, within a range of acceptability and defensibility, and that assessment is the proper role of the courts within the constitutional separation of powers: *Crevier v. A.G. (Québec) et al.*, [1981] 2 S.C.R. 220, 127 D.L.R. (3d) 1; *Dunsmuir v. New Brunswick*, 2008 SCC 9, [2008] 1 S.C.R. 190. In rare cases, however, exercises of executive power are suffused with ideological, political, cultural, social, moral and historical concerns of a sort not at all amenable to the judicial process or suitable for judicial analysis. In those rare cases, assessing whether the executive has acted within a range of acceptability and defensibility is beyond the courts' ken or capability, taking courts beyond their proper role within the separation of powers. For example, it is hard to

conceive of a court reviewing in wartime a general's strategic decision to deploy military forces in a particular way. See generally *Operation Dismantle*, *supra* at pages 459-460 and 465; *Canada (Auditor General)*, [1989] 2 S.C.R. 49 at pages 90-91; *Reference Re Canada Assistance Plan*, [1991] 2 S.C.R. 525 at page 545; *Black*, *supra* at paragraphs 50-51.

2015 FCA 4 (CanLII)

[67] These cases show that the category of non-justiciable cases is very small. Even in judicial reviews of subordinate legislation motivated by economic considerations and other difficult public interest concerns, courts will still assess the acceptability and defensibility of government decision-making, often granting the decision-maker a very large margin of appreciation. For that reason, it is often said that in such cases an applicant must establish an "egregious" case: see, *e.g.*, *Thorne's Hardware v. Canada*, [1983] 1 S.C.R. 106 at page 111, 143 D.L.R. (3d) 577; *Katz Group Canada Inc. v. Ontario (Health and Long-Term Care)*, 2013 SCC 64, [2013] 3 S.C.R. 810 at paragraph 28. But the matter is still justiciable.

[68] There are authorities suggesting that executive decisions to sign a treaty, without more, are not justiciable: see, e.g., *R. v. Secretary of State for Foreign and Commonwealth Affairs, Ex. P. Everett*, [1989] 1 All E.R. 655 at page 690, [1989] Q.B. 811, cited in *Black*, *supra* at paragraph 52. This makes sense, as the factors underlying a decision to sign a treaty are beyond the courts' ken or capability to assess, and any assessment of them would take courts beyond their proper role within the separation of powers.

[69] But here the gist of the appellant's challenge is different. It alleges that, regardless of the factors prompting the Agreement, the decision of the executive to bring the Agreement into

effect would be unacceptable and indefensible because the appellant has enforceable legal rights to be consulted before that happens. In this case, acceptability and defensibility turns on whether or not the appellant has those legal rights.

2015 FCA 4 (CanLII)

[70] Assessing whether or not legal rights exist on the facts of a case lies at the core of what courts do. Under the constitutional separation of powers, determining this is squarely within our province. Canada's justiciability objection has no merit.

(4) The standard of review in this Court

[71] At the outset, we must assess the true or real nature of the appellant's application: *Canada (National Revenue) v. JP Morgan Asset Management (Canada) Inc.*, 2013 FCA 250, [2014] DTC 5001 at paragraph 50.

[72] In reality, the appellant's request for a declaration arises in the context of a decision made by the Government of Canada. The Government of Canada decided, implicitly or explicitly in the face of the appellant's stated position, that it could bring the Agreement into effect without consulting with the appellant or other Aboriginal peoples. Through the use of a declaration, the appellant seeks to invalidate that decision. The appellant also seeks an order restraining Canada from taking steps that would bring the Agreement into effect.

[73] I need not consider whether the standard of review of the decision is correctness or reasonableness. If the standard of review is reasonableness, the only acceptable and defensible

outcome available to the Government of Canada in this case is compliance with the law concerning the duty of consultation. The question before us is a binary one. Either there is a duty or there is not, and since Canada did not consult, Canada's decision either stands or falls on that question alone.

2015 FCA 4 (CanLII)

[74] As will be evident from the discussion below, in the course of its reasons, the Federal Court made certain findings heavily suffused by its appreciation of the evidence. In this Court, what standard of review applies to those sorts of findings?

[75] *Agraira v. Canada (Public Safety and Emergency Preparedness)*, [2013] 2 S.C.R. 559, 2013 SCC 36 at paragraph 46 stands for the proposition that we are to stand in the shoes and consider whether the Federal Court properly applied the standard of review. I do not believe that this allows us to substitute our factual findings for those made by the Federal Court.

[76] In my view, as is the case in all areas of appellate review, absent some extricable legal principle, we are to defer to findings that are heavily suffused by the first instance court's appreciation of the evidence, not second-guess them. Only palpable and overriding error can vitiate such findings. In the context of the existence of Aboriginal title, the Supreme Court held to similar effect in *Tsilhqot'in Nation*, *supra* at paragraph 52.

[77] In other words, in this case, absent legal error, deference is owed to the Federal Court's largely factual findings described above in paragraphs 13-15 and 18-22.

[78] However, in this case, nothing turns on this. As is evident from some of the discussion below, had I been in the Federal Court's position I would have made the same factual findings.

(5) Was a duty to consult triggered?

2015 FCA 4 (CanLII)

[79] The parties agree that the Federal Court identified the correct law concerning what triggers the duty to consult and, if necessary, accommodate Aboriginal rights and title which have been asserted but not yet proven. That law is found in *Rio Tinto, Mikisew,* and *Haida Nation*, all *supra*.

[80] As mentioned above, while this matter was under reserve the Supreme Court of Canada released *Tsilhqot'in Nation*, *supra*. We asked for further submissions. Having considered those submissions, I conclude that *Tsilhqot'in Nation* has not changed the law concerning when Canada's duty to consult is triggered. Indeed, it confirms that *Rio Tinto, Mikisew,* and *Haida*, all *supra*, still set out the correct law on this point: see *Tsilhqot'in Nation* at paragraphs 78, 80 and 89.

[81] Of the three cases, *Rio Tinto* comes later and incorporates the earlier holdings in *Mikisew* and *Haida* concerning the duty to consult. In *Rio Tinto*, the Supreme Court set out specific elements that must be present to trigger the duty to consult. However, it also set out certain aims the duty is meant to fulfil. These aims are best kept front of mind when assessing whether the specific elements are present.

[82] The Supreme Court identified two aims the duty to consult is meant to further. First is "the need to protect Aboriginal rights and to preserve the future use of the resources claimed by Aboriginal peoples while balancing countervailing Crown interests": *Rio Tinto*, *supra* at paragraph 50. Second is the need to "recognize that actions affecting unproven Aboriginal title or rights or Agreement rights can have irreversible [adverse] effects that are not in keeping with the honour of the Crown": *Rio Tinto*, *supra* at paragraph 46.

2015 FCA 4 (CanLII)

[83] This last-mentioned idea – that the duty is aimed at preventing a present, real possibility of harm caused by dishonourable conduct that cannot be addressed later – is key:

> The Crown, acting honourably, cannot cavalierly run roughshod over Aboriginal interests where claims affecting these interests are being seriously pursued in the process of [Agreement] negotiation and proof. It must respect these potential, but yet unproven, interests. The Crown is not rendered impotent. It may continue to manage the resource in question pending claims resolution. But, depending on the circumstances, discussed more fully below, the honour of the Crown may require it to consult with and reasonably accommodate Aboriginal interests pending resolution of the claim. To unilaterally exploit a claimed resource during the process of proving and resolving the Aboriginal claim to that resource, may be to deprive the Aboriginal claimants of some or all of the benefit of the resource. That is not honourable.

(*Haida*, *supra* at paragraph 27.)

[84] Given those aims, the Supreme Court in *Rio Tinto*, *supra* at paragraphs 40-50 has told us three elements must be present for the duty to consult to be triggered:

- a "real or constructive knowledge of [an Aboriginal] claim to the resource or land to which it attaches" (at paragraph 40);

- "Crown conduct or a Crown decision that engages a potential Aboriginal right," meaning conduct even at the level of "strategic, higher level decisions" (at paragraph 44) that "may adversely impact on the claim or right in question" (at paragraph 42) or create a "potential for adverse impact" (at paragraph 44);

- a "possibility that the Crown conduct may affect the Aboriginal claim or right" in the sense of "a causal relationship between the proposed government conduct or decision and a potential for adverse impacts on pending Aboriginal claims or rights" (at paragraph 45).

2015 FCA 4 (CanLII)

[85] Both before the Federal Court and in this Court, the central issue was whether the third of these requirements – a causal relationship between the Crown conduct and potential adverse impacts on pending Aboriginal claims or rights – was met. The degree of causal relationship and whether it has been met in this case lies at the core of the debate between the parties.

[86] On this, the parties agree that the Federal Court accurately identified the law concerning the degree or quality of causal relationship that must be present in order to trigger a duty to consult. That law is found, once again, in *Rio Tinto*, *supra* and contains two elements:

- The focus of the analysis must be the effect caused by the Crown conduct on Aboriginal rights or the exercise of rights (at paragraph 46). A general "adverse impact" or an effect caused on matters divorced from rights, such as "a First Nation's future negotiating position," is irrelevant (at paragraphs 46 and 50);

- While a "generous, purposive approach [must] be taken," the effect on rights must be one of "appreciable adverse effect." While "possible" impacts can qualify, those that are "[m]ere[ly] speculative…will not suffice" (at paragraph 46).

2015 FCA 4 (CanLII)

[87] As mentioned, the Federal Court identified and stated all of this law. What the appellant raises in this appeal is whether the Federal Court applied this law correctly to the facts of this case.

[88] On the facts, the Federal Court concluded that the potential adverse effects the Agreement may have upon the appellant's Aboriginal rights are "non-appreciable" and "speculative" and so a duty to consult with the appellant does not arise. Put another way, the appellant had not demonstrated a causal relationship between the Agreement and potential adverse impacts on asserted Aboriginal claims or rights.

[89] As will be evident from the discussion below, in this Court the appellant has not shown any palpable and overriding error in how the Federal Court applied the law to the facts of this case or in its fact-finding. In any event, I agree with the Federal Court's factually suffused conclusions.

[90] In this Court, the appellant submits that the Federal Court's conclusion that the Agreement's effects were "speculative" was primarily based on its view of the content of obligations assumed by Canada under the Agreement. But, the appellant says, that was based on the Federal Court's fundamental misapprehension of the evidence before it about those

obligations. The Federal Court stated that the appellant had failed to lead enough persuasive evidence about the consequences of other foreign investment promotion and protection agreements that would shed light on Canada's obligations under the Agreement. In fact, says the appellant, those other agreements and their consequences were before the Court. The Federal Court's error in overlooking these was a palpable and overriding error.

2015 FCA 4 (CanLII)

[91] The problem with the appellant's submission is that notwithstanding the existence of other agreements, there is no evidence deserving of sufficient weight that these agreements are causing or might cause Canada to make decisions that are contrary to law. In particular, there is no evidence that those agreements are causing Canada to make decisions that do not respect Aboriginal rights.

[92] It bears noting that, as the Federal Court found (at paragraphs 87, 133(f) and 144), the Agreement does not contravene or contradict any domestic law at either the federal or sub-national government level, does not change the way in which the appellant could exercise its rights under a future treaty, or give arbitral tribunals the power to invalidate any measures that may be adopted by the appellant or by Canada in the future to protect the appellant's asserted Aboriginal rights: see also paragraph 20, above. There is no basis to interfere with these factual findings.

[93] The appellant also submits that the Federal Court applied the wrong legal test when it held that the adverse effects identified by the appellant were too "speculative," insignificant and "non-appreciable" to trigger the duty to consult. The appellant suggests that the threshold to

trigger the duty to consult is "very low" – even quite insignificant effects on asserted rights or title can suffice.

[94] The appellant adds that the Federal Court overlooked a "chilling effect" that will arise when the Agreement takes effect. It says that the Agreement inhibits Canada's ability or willingness to take steps to regulate or prevent the use of lands and resources by Chinese investors that are the subject of the appellant's rights and title claims. The appellant suggests that Canada will fear the monetary awards imposed for non-compliance under the Agreement and will exercise its regulatory and other powers less aggressively.

2015 FCA 4 (CanLII)

[95] The appellant adds that the Federal Court wrongly required the appellant to provide actual evidence of a chilling effect as opposed to reliance on "logic and common sense" to make inferences from known facts. The appellant notes that a chilling effect is not susceptible to easy proof.

[96] At the root of this allegation of chilling effect is a speculation that Canada will not want to incur an adverse monetary award so it would likely avoid taking action barred by the Agreement that would prevent infringements of Aboriginal rights. In effect, the speculation is that when push comes to a shove Canada will subordinate Aboriginal rights to its desire to avoid economic penalties under the Agreement.

[97] The appellant calls this logic and common sense. It is actually pure guesswork. We cannot assume that there will be a collision between protecting Aboriginal rights and a monetary

award under the Agreement, nor can we assume that Canada will prioritize the latter over the former; indeed we cannot assume that that will happen even once: *Gitxaala National v. Canada*, 2012 FC 1336, 421 F.T.R. 169 at paragraph 54. We have no idea whether the two will ever clash.

2015 FCA 4 (CanLII)

[98] On the information in this record, it is equally possible to assume that Canada will prioritize the protection of rights over economic penalties. Government priorities can shift over time according to the circumstances, can shift in accordance with the particular decision to be made, and can shift in accordance with popular opinion and electoral results that express that opinion. And sometimes governments affirm rights regardless of the financial cost or public opinion. At this time, we can only guess as to what will happen under the Agreement and what decisions or events will arise, or whether there will ever be any decisions or events requiring response. And, as we shall see, after the Agreement comes into effect, if any actual non-speculative effects on the appellant's rights appear on the horizon and become possible, the appellant will have many opportunities to protect its rights fully and prevent any harm, especially irreversible harm.

[99] Until there is at least a prospect of a decision or event prompted by the Agreement and until we know the nature of that decision or event, we cannot say with any degree of confidence or estimate any possibility that there will be a collision between protecting Aboriginal rights and a monetary award under the Agreement. If a decision or an event prompted by an agreement affecting Aboriginal rights were in prospect, a duty to consult might then arise depending on whether it causes a possibility of harm. But nothing is in prospect at this time, nothing can be defined, nor can we even say that anything problematic might ever arise. At this time, all we can

do is imagine decisions or events and impacts from them that might or might not happen as a result of the Agreement. However, the duty to consult is triggered not by imaginings but by tangibilities.

2015 FCA 4 (CanLII)

[100] Indeed, the evidence we do have at this time – evidence of what has happened under other foreign investment promotion and protection agreements – suggests that concerns arising from these agreements have not arisen: see the Federal Court's reasons at paragraphs 133(a), (c) and (d) and paragraph 69 of the main affidavit Canada has adduced. There is no evidence to suggest that these agreements have impaired the ability of any level of government to protect Aboriginal rights and interests, or the rights and interests themselves, whenever the need arises.

[101] Before us, the appellant emphasized that there is a difference between "possibilities" and "speculations" and that while the Supreme Court said the duty to consult does not arise in the case of the latter, it does in the case of the former. The mere possibility of harm is enough.

[102] The appellant is right to draw this distinction to our attention. And in some cases the line between the two might be a fine one. However, the aims behind the recognition of the duty can assist us in drawing the line. To reiterate, they are to protect Aboriginal rights from injury, to protect against irreversible effects and to preserve the future use of the resources claimed by Aboriginal peoples while balancing countervailing Crown interests: see paragraphs 82-83 above. An impact that is, at best, indirect, that may or may not happen at all (such that we cannot estimate any sort of probability), and that can be fully addressed later is one that falls on the

speculative side of the line, the side that does not trigger the duty to consult. As the Federal Court found on the facts, this case falls on that side of the line.

[103] Once the Agreement comes into effect, it may be expected to increase Chinese investment into Canada. It may be that some of that new investment finds its way into resource development companies. Might those companies eye resources on Aboriginal lands or lands claimed by Aboriginal peoples for development? Maybe. Or maybe not. We just don't know.

2015 FCA 4 (CanLII)

[104] But what we do know is that upon the concrete possibility of that development and certainly by the time of application for development permits and approvals by those companies from governments and their agencies, Aboriginal peoples will have access, if necessary, to administrative decision-makers and the Courts for protection. That protection may be by way of application for interim or permanent injunctive relief, prohibition, *certiorari* or, if Canada is somehow not involved and should be, *mandamus*. In these ways, an aggrieved party may allege, with evidence in support, among other things that Canada is improperly prioritizing the risk of a monetary award under the Agreement over Aboriginal rights and interests. The jurisprudence of this Court on direct standing to bring a judicial review is liberal enough to fully protect those concerned about non-speculative effects on their legal rights or practical interests: *League for Human Rights of B'Nai Brith Canada v. Odynsky*, 2010 FCA 307, 409 N.R. 298 at paragraphs 57-58.

[105] Bearing in mind the aims the duty to consult is meant to fulfil, I cannot say that imposing a duty to consult in this case would further those aims at all. There is no apprehended, evidence-

based potential or possible impact on Aboriginal rights. The imposition of a duty here is not necessary to preserve the future use of the resources claimed by Aboriginal peoples. Any adverse impact on rights stemming from the Agreement, if any, can be addressed later when they rise beyond the speculative and trigger the duty to consult. The appellants have failed to show that anything will be evasive of review before any harm is caused, if ever it is caused.

2015 FCA 4 (CanLII)

[106] The appellant further submits that Canada's obligations under the Agreement will last for at least thirty years and cannot be set aside by any government or Canadian court during that period. The Agreement "cannot be undone." That is so, but it adds nothing to the analysis. Until there is a non-speculative impact on rights of the sort I have described above – if there ever is one – a duty to consult simply does not arise.

[107] Next, the appellant says that the Federal Court failed to address one of its arguments. It argued that Canada, by agreeing to be bound by the obligations in the Agreement, has also agreed to ensure that the appellant's exercise of its rights of self-government would be constrained by those same obligations.

[108] I do not accept that Canada has agreed to ensure that the appellant's exercise of whatever rights of self-government it has will be constrained by the provisions of the Agreement. Nothing in the Agreement suggests that, nor is there anything that suggests that result. There is no evidence on this record to suggest any possible impact on rights to self-government.

[109] Again, to the extent that a decision is made or a power is exercised that affects any rights of self-government the appellant has, the appellant will have its legal recourses. Again, a decision in prospect might trigger a duty to consult, but here we have no idea what events or decisions might follow as a result of the Agreement, or even whether any events or decisions might ever be in prospect, let alone whether the appellant's asserted self-government rights might be affected by those events or decisions.

2015 FCA 4 (CanLII)

[110] The appellant submits that the Federal Court wrongly required evidence of the presence of investors on its traditional territory with rights under the Agreement and that measures were being contemplated that would impact on those rights.

[111] I do not read the Federal Court's decision so narrowly. The Federal Court was alive to broader impacts said by the appellant to trigger the duty to consult. Those broader impacts, as I have said above and as the Federal Court has found, are speculative at this time.

[112] In the Federal Court and in this Court, the appellant submitted that the Agreement would prevent Canada from enacting a moratorium on resource development, something that would respect the rights of Aboriginal peoples. But as the Federal Court noted (at paragraph 131), that submission relies on layers of speculations or assumptions, conjectures and guesswork, not evidence. Among other things, there was no evidence that Canada is considering or would ever consider, let alone implement such a moratorium, that such a moratorium might adversely impact a potential Chinese investment in the appellant's territory, that the moratorium would be found

by an arbitral tribunal to contravene the Agreement, and that Canada would not retain sufficient policy flexibility to prevent impacts upon the appellant.

[113] The appellant cites several cases showing that high-level management decisions or structural changes can trigger a duty to consult: *Huu-Ay-Aht First Nation v The Minister of Forests*, 2005 BCSC 697, 33 Admin. L.R. (4th) 123; *Dene Tha' First Nation v Canada (Minister of Environment)*, 2006 FC 1354, 303 F.T.R. 106; *Kwicksutaineuk Ah-Kwa-Mish First Nation v Canada (Attorney General)*, 2012 FC 517, 409 F.T.R. 87; *Squamish Indian Band v British Columbia (Minister of Sustainable Resource Management)*, 2004 BCSC 1320, 34 B.C.L.R. (4th) 280.

[114] I agree that high-level management decisions or structural changes can trigger a duty to consult, but only where the legal test is met. The cases the appellant cites are distinguishable. I agree with the Federal Court's observation (at paragraph 78) that the Crown conduct in those cases "directly concern[ed] the applicant First Nation's claimed territories or the resources situated upon those territories." In each case, there was, in the words of *Rio Tinto*, *supra* at paragraph 45, "a causal relationship between the proposed government conduct or decision and a potential for adverse impacts on pending Aboriginal claims or rights." I agree with the Federal Court's assessment that the case before us is different (at paragraph 78):

> They are all distinguishable from the ratification of the [Agreement], because the [Agreement] does not address any specific lands, potential projects involving specific lands, or specific resources. It is simply a broad, national, framework agreement that provides additional legal protections to Chinese investors in Canada, and Canadian investors in China, which parallel the rights provided in several existing investment protection and trade agreements to which Canada is already a party.

2015 FCA 4 (CanLII)

[115] Overall, I believe that at the root of all of the appellant's submissions is its definition of "speculative," a definition that cannot be accepted.

[116] The appellant defines "speculative" as situations where "there is no reasonable basis to conclude that an impact might occur." Applying that definition in this case, the appellant says that there is a reasonable basis for concluding that an impact caused by the Agreement might occur.

2015 FCA 4 (CanLII)

[117] What is missing from the appellant's definition of "speculative" is the idea of assumption, conjecture or guesswork. A conclusion is not speculative when it is reached by way of a chain of reasoning all of whose links are proven facts and inferences, joined together by logic. A conclusion is speculative when it is reached by way of a chain of reasoning where one or more of the links are assumptions, conjectures or guesses or where assumptions, conjectures or guesses are needed to join them.

[118] Assuming the Agreement is successful in achieving its objectives, it is true that there will be more investment in Canada from the People's Republic of China. But more investment in Canada does not necessarily lead to the conclusion that the appellant's Aboriginal rights will be affected. The appellant's case founders on that break in the chain of reasoning, a break that can only be repaired by resort to assumptions, conjectures or guesses. In short, the appellant has failed to show, in the words of *Rio Tinto* at paragraph 45, "a causal relationship between the proposed government conduct or decision and a potential for adverse impacts on [its] pending Aboriginal claims or rights" that rises above the speculative.

[119] If the appellant's definition of "speculative" were accepted, then just about every decision or action by governments would trigger the duty to consult. Governments announce high-level policies all the time. For example, often measures are proposed to encourage Canadians and others to invest in Canadian businesses and developments, just like the Agreement before us. Does the duty to consult arise every time the government intends to announce measures of that sort?

2015 FCA 4 (CanLII)

[120] Taken to its extreme, the appellant's position would require the Minister of Finance – before the annual budget speech in the House of Commons, on every measure in it that might possibly affect the investment and development climate – to consult with every First Nation, large or small, whose claimed lands might conceivably or imaginatively be affected, no matter how remotely, no matter how insignificantly. Such a tenuous triggering and aggressive application of the duty to consult would undercut one of its aims, namely respect for "countervailing Crown interests" – in this example, the Crown's interest in workable governance: *Rio Tinto*, *supra* at paragraph 50.

[121] Finally, just before this Court's judgment in this matter was released, the appellant drew to our attention the recent decision of the Federal Court in *Mikisew Cree Nation v. The Governor General in Council et al.*, 2014 FC 1244, a decision not binding upon us. I see no need for further submissions from the parties on this new authority. In *Mikisew*, the Federal Court noted (at paragraph 93) that the possible or "potential existence" of a harm is sufficient to trigger the duty to consult, a legal proposition supported by Supreme Court case law (see paragraph 86, above). On the particular facts of *Mikisew*, the Federal Court found a possible effect that went

beyond the appreciable and the speculative. For the reasons above, and as found by the Federal Court in this case, the appellant has failed to show on the facts a causal link between the Agreement and any possible harm, let alone any harm that rises above the appreciable and speculative.

[122] Therefore, there are no grounds to set aside the judgment of the Federal Court.

D. Proposed disposition

[123] Therefore, for the foregoing reasons, I would dismiss the appeal with costs. I wish to thank the parties for their helpful submissions.

"David Stratas"

Counsel

Written representations by:

Joseph J. Arvay, Catherine Boies Parker, Christopher Tollefson, Anthony Ho, for the Plaintiffs.

Joseph Cheng, Andrew Law, Shaun Ramdin, Katrina Longo, for the Defendants.

ORDER AND REASONS

M.D. MANSON J.

I. Introduction

1 This is a motion to strike the Plaintiffs' Statement of Claim without leave to amend. This motion is brought by the Defendants, Her Majesty the Queen in Right of Canada and the Attorney General of Canada, on the basis that the Statement of Claim discloses no reasonable cause of action, pursuant to Rule 221 of the *Federal Courts Rules*, *SOR/98-106*.

II. Background

A. *The Plaintiffs*

2 The Plaintiffs are fifteen children and youth from across Canada. The Statement of Claim describes each of the Plaintiffs' specific experiences with climate change. While their locations and particular circumstances vary, the Plaintiffs collectively describe that climate change has negatively impacted their physical, mental and social health and well-being. They allege it has further threatened their homes, cultural heritage and their hopes and aspirations for the future. As children and youth, they claim a particular vulnerability to climate change, owed to their stage of development, increased exposure risk and overall susceptibility.

B. *Climate Change*

3 The Plaintiffs' Statement of Claim is particularly focused on the contribution of greenhouse gases (GHGs) to climate change, discussing the link between the cumulative impacts of GHGs and changes occurring in the environment. It challenges the entirety of the Defendants' alleged conduct that the Plaintiffs associate with GHG emissions.

4 The Plaintiffs and Defendants agree that climate change is serious, real and measurable. Each party has described the wide ranging impacts of climate change, including extreme weather events, ocean acidification and warming, the degradation of natural resources, air pollution and the expansion of vector-borne illnesses. The parties also agree that climate change particularly threatens Indigenous cultures and communities. The negative impact of climate change to the Plaintiffs and all Canadians is significant, both now and looking forward into the future.

5 However, at issue is the justifiability of the claim and whether the Plaintiffs raise valid causes of action under sections 7 and 15 of the *Canadian Charter of Rights and Freedoms* [*Charter*]. As well, the parties also disagree on whether a "public trust doctrine" can be relied upon and argued at trial, based on the common law or as an unwritten constitutional principle. This forms the basis of both the Defendants' Statement of Defence (filed on February 7, 2020) and the current motion to strike the Plaintiffs' Statement of Claim.

C. *Plaintiffs' Statement of Claim*

(1) Causes of Actions

6 The Plaintiffs filed their Statement of Claim on October 25, 2019. They allege that various conduct on the part of the Defendants [the "Impugned Conduct"] continues to cause, contribute to and allow GHG emissions that are incompatible with a "Stable Climate System". This is described as a stable climate capable of sustaining human life and liberties (Plaintiffs' Statement of Claim at para 3).

7 The Plaintiffs allege that the Impugned Conduct has unjustifiably infringed their rights (and the rights of all children and youth in Canada, present and future, due to an asserted public interest standing) under sections 7 and 15 of the *Charter*. The Plaintiffs further allege that the Defendants have failed to discharge their public trust obligations with respect to identified public resources, arguing a breach of obligations they claim fall under the "public trust doctrine".

(2) The Impugned Conduct of the Defendants

8 The Impugned Conduct involves the following actions and inactions on the part of the Defendants (Plaintiffs' Statement of Claim at para 5):

a. Continuing to cause, contribute to and allow a level of GHG emissions incompatible with a Stable Climate System;

b. Adopting GHG emission targets that are inconsistent with the best available science about what is necessary to avoid dangerous climate change and restore a Stable Climate System;

c. Failing to meet the Defendants' own GHG emission targets; and

d. Actively participating in and supporting the development, expansion and operation of industries and activities involving fossil fuels that emit a level of GHGs incompatible with a Stable Climate System.

9 The Defendants' causation of, contribution to and allowance of GHG emissions is further pleaded in paragraphs 45 to 51 of the Statement of Claim, including broad activities under various statutory authorities (Plaintiffs' Statement of Claim at para 47). The Defendants are further alleged to support fossil fuel exploration, extraction, production and consumption through subsidies to the fossil fuel industry and through the acquisition of the Trans Mountain Pipeline System, the Trans Mountain Expansion Project and the Puget Sound Pipeline System.

10 In paragraphs 52 to 63 of the Statement of Claim, the Plaintiffs set out facts alleging the failure of the Defendants to fulfill their own commitments to limit GHG emissions under a variety of international agreements and conventions, spanning the period of 1988 to 2015.

(3) Harms Associated with Climate Change

11 The impact of climate change on the individual Plaintiffs is set out in paragraphs 94 to 221 of the Statement of Claim. The Statement of Claim lists approximately thirteen different alleged harms to the Plaintiffs in paragraph 4. As indicated above, the impacts of climate change that are described by the

Plaintiffs are wide ranging, significant and felt across Canada.

(4) Relief Sought

12 The Plaintiffs claim various forms of relief at paragraph 222 of the Plaintiffs' Statement of Claim, including the following:

a. an order declaring that the Defendants have a common law and constitutional obligation to act in a manner compatible with maintaining a Stable Climate System, i.e. one that is capable of sustaining human life and liberties, and to refrain from acting in a manner that disrupts a Stable Climate System;

b. an order declaring that, as a result of their Impugned Conduct, the Defendants have and continue to unjustifiably infringe the Plaintiffs' rights under section 7 of the Charter and put at risk the section 7 rights of all children and youth now and in the future;

c. an order declaring that, as a result of their Impugned Conduct, the Defendants have and continue to unjustifiably infringe the Plaintiffs' rights under section 15 of the Charter and put at risk the section 15 rights of all children and youth now and in the future;

d. an order declaring that, as a result of their Impugned Conduct, the Defendants have breached and continue to be in breach of their obligation to protect and preserve the integrity of public trust resources and have violated the right of the Plaintiffs and put at risk the rights of all children and youth now and in the future to access, use and enjoy public trust resources including navigable waters, the foreshores and the territorial sea, the air including the atmosphere, and the permafrost ("Public Trust Resources");

e. an order requiring the Defendants to prepare an accurate and complete accounting of Canada's GHG emissions, including the GHG emissions released in Canada, the emissions caused by the consumption of fossil fuels extracted in Canada and consumed out of the country, and emissions embedded in the consumption of goods and services within Canada;

f. an order requiring the Defendants to develop and implement an enforceable climate recovery plan that is consistent with Canada's fair share of the global carbon budget plan to achieve GHG emissions reductions compatible with the maintenance of a Stable Climate System, the protection of Public Trust Resources subject to federal jurisdiction and the Plaintiffs' constitutional rights;

g. an order retaining jurisdiction over this action until the Defendants have fully complied with the orders of this Court and there is reasonable assurance that the Defendants will continue to comply in the future absent continuing jurisdiction; and

h. costs, including special costs and applicable taxes on those costs; and

i. such further and other relief as this Honourable Court deems just.

III. Issue

13 The issue is whether it is plain and obvious that the pleadings disclose no reasonable cause of action, or that the claim has no reasonable prospect of success?

14 This inquiry involves four sub-issues:

a. Are the claims justiciable?

b. Does the section 7 *Charter* claim disclose a reasonable cause of action?

c. Does the section 15 *Charter* claim disclose a reasonable cause of action?

d. Does the claim pursuant to a "public trust doctrine" disclose a reasonable cause of action?

IV. Relevant Provisions

15 *Federal Courts Rules*, Rule 221:

> **Motion to strike**
>
> **221(1)** On motion, the Court may, at any time, order that a pleading, or anything contained therein, be struck out, with or without leave to amend, on the ground that it
>
> **(a)** discloses no reasonable cause of action or defence, as the case may be,
>
> **(b)** is immaterial or redundant,
>
> **(c)** is scandalous, frivolous or vexatious,
>
> **(d)** may prejudice or delay the fair trial of the action,
>
> **(e)** constitutes a departure from a previous pleading, or
>
> **(f)** is otherwise an abuse of the process of the Court,
>
> and may order the action be dismissed or judgment entered accordingly.
>
> **Evidence**
>
> **(2)** No evidence shall be heard on a motion for an order under paragraph (1)(a).

V. Test on a Motion to Strike

16 The test on a motion to strike is whether it is plain and obvious that the pleadings disclose no reasonable cause of action, or that the claim has no reasonable prospect of success (*Hunt v Carey Canada Inc*, *[1990] 2 SCR 959* at 980; *R v Imperial Tobacco Canada Ltd*, *2011 SCC 42* at para 17 [*Imperial Tobacco*]). The threshold to strike a claim is high and the matter must proceed to trial where a reasonable prospect of success exists.

17 The material facts pleaded in the Statement of Claim must be taken as true, unless the allegations are based on assumption and speculation (*Operation Dismantle v The Queen*, *[1985] 1 SCR 441* at para 27 [*Operation Dismantle*]). It is incumbent on the Plaintiffs to clearly plead the facts in sufficient detail to support the claims and the relief sought. The material facts form the basis upon which to evaluate the possibility of the success of the claim (*Imperial Tobacco*, above at para 22; *Mancuso v Canada (National*

Health and Welfare), *2015 FCA 227* at paras 16-17, leave to appeal to SCC refused, 36889 (23 June 2016)).

18 Further, the pleadings must be read as generously as possible, erring on the side of permitting a novel but arguable claim to proceed to trial (*Imperial Tobacco* at para 21; *Atlantic Lottery v Corp Inc v Babstock*, *2020 SCC 19* at para 19 [*Atlantic Lottery*]).

19 The test on a motion to strike considers the context of the law and the litigation process. It "operates on the assumption that the claim will proceed through the court system in the usual way -- in an adversarial system where judges are under a duty to apply the law as set out in (and as it may develop from) statutes and precedents" (*Imperial Tobacco* at para 25).

VI. Analysis

A. *Parties' Position*

20 It is the Plaintiffs' position that what is really being asked of the Court, through the relief being claimed, is to require the Defendants, through the disclosure and application of scientific data, on a justifiably manageable standard, to comply with their common law and constitutional obligations and act in a manner compatible with maintaining a Stable Climate System.

21 The Plaintiffs argue that the relief claimed in paragraph 222 of the Statement of Claim are all "conventional" legal remedies to correct breaches of section 7 and section 15 of the *Charter*. Further, the Plaintiffs ask this Court to recognize a new or novel cause of action, the breach of the public trust doctrine. They claim the Defendants have failed to meet the duty to safeguard Public Trust Resources in a manner that does not "substantially" impair the integrity of those resources or impair the right of the public to access, use and enjoy those resources.

22 The Defendants argue that the broad and sweeping claim of the Plaintiffs is not justiciable, in that the breadth of the claim is incompatible with the basic rules of *Charter* analysis. Further, the Plaintiffs are effectively seeking that this Court intervene in Canada's overall approach to climate policy, for which there is no judicially manageable legal standard. Additionally, the remedies sought by the Plaintiffs are not legal remedies. The Defendants also allege that the claim does not disclose a reasonable cause of action. This is because the Charter claims are positive rights claims and because they would also fail to meet the tests under sections 7 and 15 of the Charter. Lastly, the public trust doctrine holds no reasonable prospect of success, as this cause of action does not exist in Canadian law.

B. *Moving to Strike Charter Claims*

23 As a preliminary matter, the parties have raised the appropriateness of this Court to consider a motion to strike on the basis that the Statement of Claim raises *Charter* claims, novel questions of law and novel *Charter* claims. The Plaintiffs state that novel claims, particularly novel *Charter* claims, ought not to be decided on a motion to strike. The Defendants' position is that the *Charter* claims in this case are not novel because they engage traditional *Charter* frameworks. Further, the Defendants assert that a Court

may strike a novel claim, where it is not in line with the principles of proper judicial restraint and where it extends beyond an incremental change in the law.

24 First, I note that the parties have raised several cases throughout their pleadings in which a motion to strike of a *Charter* claim was considered. I do not find that the presence of a *Charter* claim alone prevents me from considering this motion to strike (see *Operation Dismantle*, above; *Tanudjaja v Canada (Attorney General)*, *2014 ONCA 852* [*Tanudjaja*]).

25 Second, it is clear that a Court can hear and decide novel questions of law on a motion to strike. In fact, a claim should not survive a motion to strike based on novelty alone. Disposing of novel claims that are doomed to fail is "critical to the viability of civil justice and public access" (*Atlantic Lottery*, above at para 19). Nor am I convinced that I am required to allow the *Charter* claims to survive the motion to strike simply because they are new *Charter* claims. The Plaintiffs rely on the dissenting decision in *Nevsun Resources Ltd v Araya*, *2020 SCC 5* at paragraph 145, for this proposition. While I agree with the Plaintiffs that the framing of their *Charter* claim is novel, I do not find that this overrides the "housekeeping" role of the Court on a motion to strike, without more (*Imperial Tobacco* at para 19).

C. *Justiciability*

(1) Conclusions on Justiciability

26 For the reasons below, I find both *Charter* claims, under sections 7 and 15 of the *Charter*, are not justiciable. However, the question in relation to the public trust doctrine is a justiciable issue.

(2) Law of Justiciability

(a) **Test for Justiciability**

27 Justiciability is concerned with the Court's proper role within Canada's constitutional framework and the "time-honoured" demarcation of powers between the Courts and the other branches of government. It relates to the subject matter of a dispute and whether the issue is appropriate for a Court to decide (*Highwood Congregation of Jehovah's Witnesses (Judicial Committee) v Wall*, *2018 SCC 26* at para 32 [*Highwood*]; *Hupacasath First Nation v Canada (Foreign Affairs and International Trade Canada)*, *2015 FCA 4* at para 62 [*Hupacasath*]). The inquiry into justiciability was described in *Canada (Auditor General) v Canada (Minister of Energy, Mines & Resources)*, *[1989] 2 SCR 49* at 90-91, as:

> 50 ... first and foremost, a normative inquiry into the appropriateness as a matter of constitutional judicial policy of the courts deciding a given issue, or instead, deferring to other decision making institutions of the polity.

28 In *Boundaries of Judicial Review: The Law of Justiciability in Canada*, Lorne M. Sossin defines justiciability as:

> ... a set of judge-made rules, norms and principles delineating the scope of judicial intervention in social, political and economic life. In short, if a subject-matter is held to be suitable for judicial

> determination, it is said to be justiciable; if a subject-matter is held not to be suitable for judicial determination, it is said to be non-justiciable.
>
> [Lorne M Sossin, *Boundaries of Judicial Review: The Law of Justiciability in Canada*, 2nd ed (Toronto: Carswell, 2012) at 7 [Sossin], cited in *Highwood*, above at para 33]

29 The question to be decided is whether the Court has the institutional capacity and legitimacy to adjudicate the matter. Or, more generally, is the issue one that is appropriate for a Court to decide (*Highwood* at paras 32, 34). The terms "legitimacy" and "capacity" can also be understood as the "appropriateness" and "ability" of the Court to deal with a matter (*Hupacasath*, above at para 62).

30 There is no single set of rules delineating the scope of justiciability, the approach to which is flexible and to some degree contextual. Courts have often inquired whether there is a sufficient legal component to warrant judicial intervention, "[s]ince only a court can authoritatively resolve a legal question, its decision will serve to resolve a controversy or it will have some other practical significance" (*Highwood* at para 34; *Reference Re Canada Assistance Plan (BC), [1991] 2 SCR 525* at 546).

31 In determining whether it has the institutional capacity and legitimacy to adjudicate the matter, the Supreme Court in *Highwood* provides that a Court should consider that the matter before it "would be an economical and efficient investment of judicial resources to resolve, that there is a sufficient factual and evidentiary basis for the claim, that there would be an adequate adversarial presentation of the parties' positions and that no other administrative or political body has been given prior jurisdiction of the matter by statute" (Sossin, above at 294, cited in *Highwood* at para 34).

(b) **Novelty or Complexity of the Claim**

32 The parties agree that simply because a cause of action is novel or complex per se does not make it non-justiciable or without merit. While this Court is not dissuaded by the complexity of the matter or the novelty of the claim, neither can these factors permit judicial involvement in subject matters where the Court does not have institutional legitimacy or capacity. The importance of a societal issue cannot extend the boundaries of a Court's role within Canada's constitutional framework (*Tanudjaja*, above at para 35):

> 35 I add that complexity alone, sensitivity of political issues, the potential for significant ramifications flowing from a court decision and a preference that legislatures alone deal with a matter are not sufficient on their own to permit a court to decline to hear a matter on the ground of justiciability: see, for example, Chaoulli, at para. 107. *Again, the issue is one of institutional competence. The question is whether there is a sufficient legal component to anchor the analysis.*
>
> [Emphasis added]

(c) **Policy and Political Questions**

33 Policy and political questions are not a bar to judicial involvement, however, "[s]ome questions are so political that courts are incapable or unsuited to deal with them, or should not deal with them in light of the time-honoured demarcation of powers between the courts and other branches of government" (*Hupacasath* at para 62). Questions in the realm of policy and political issues must be demonstrably

unsuitable for adjudication (Sossin at 162):

> Political questions, therefore, must demonstrably be unsuitable for adjudication. These will typically involve moral, strategic, ideological, historical or policy considerations that are not susceptible to resolution through adversarial presentation of evidence or the judicial process. Justiciable questions and political questions lie at opposing ends of a jurisdiction spectrum.

34 To engage the Court's adjudicative functions, the question must be one that can be resolved by the application of law.

35 It is within the Court's role to consider the constitutionality of government action and the accountability of the executive in light of the supremacy of the Constitution, including the *Charter*. *Charter* cases have been considered justiciable, regardless of the nature of government action, be it an exercise of Crown prerogative or otherwise (*Hupacasath* at paras 61, 70).

36 Several cases discuss the crystallization of a policy or political issue into a justiciable one, as it relates to a Court's role in upholding constitutional supremacy. The Supreme Court in *Canada (Attorney General) v PHS Community Services Society*, *2011 SCC 44* at paragraph 105 [*PHS*], states:

> 105 The issue of illegal drug use and addiction is a complex one which attracts a variety of social, political, scientific and moral reactions. There is room for disagreement between reasonable people concerning how addiction should be treated. *It is for the relevant governments, not the Court, to make criminal and health policy. However, when a policy is translated into law or state action, those laws and actions are subject to scrutiny under the Charter* ... The issue before the Court at this point is not whether harm or abstinence-based programmes are the best approach to resolving illegal drug use. It is simply whether Canada has limited the rights of the claimants in a manner that does not comply with the *Charter*.
>
> [Emphasis added]

37 The Supreme Court in *Chaoulli v Quebec (Attorney General)*, *2005 SCC 35* at paragraph 107 [*Chaoulli*], in a different context found:

> 107 *While the decision about the type of health care system Quebec should adopt falls to the Legislature of that province, the resulting legislation, like all laws, is subject to constitutional limits, including those imposed by s. 7 of the Charter*. The fact that the matter is complex, contentious or laden with social values does not mean that the courts can abdicate the responsibility vested in them by our Constitution to review legislation for Charter compliance when citizens challenge it ...
>
> [Emphasis added]

38 Policy choices must be translated into law or state action in order to be amenable to *Charter* review and otherwise justiciable.

(3) Justiciability of the *Charter* claims

39 The Plaintiffs argue that their claim is systemic and complex in nature. However, this should not render their claim non-justiciable. Asking this Court to declare the Defendants' conduct to be unconstitutional, it is argued, is justiciable and well within the institutional legitimacy and capacity of the Courts. There is no issue as to institutional capacity because the Courts are well equipped to handle complexity, which in this case is based on scientific data and the assessment of that data. Furthermore, an underlying social or policy context is not an impediment to a Court's legitimacy. The Plaintiffs further argue that their case is narrow in formulation, in that they are not asking this Court to review each independent action and inaction on the part of the Defendants, but rather to assess the cumulative effects of GHG emissions occurring from that conduct. Without considering the totality of the Defendants' conduct, Canada's contribution to global warming would be evasive of review.

40 The Plaintiffs' position fails on the basis that there are some questions that are so political that the Courts are incapable or unsuited to deal with them. These include questions of public policy approaches -- or approaches to issues of significant societal concern. As found in *PHS*, above at paragraph 105, and *Chaoulli*, above at paragraph 107, to be reviewable under the *Charter*, policy responses must be translated into law or state action. While this is not to say a government policy or network of government programs cannot be subject to *Charter* review, in my view, the Plaintiffs' approach of alleging an overly broad and unquantifiable number of actions and inactions on the part of the Defendants does not meet this threshold requirement and effectively attempts to subject a holistic policy response to climate change to *Charter* review.

41 My finding on justiciability is supported both by the undue breadth and diffuse nature of the Impugned Conduct and the inappropriate remedies sought by the Plaintiffs.

(a) **Breadth of the Impugned Conduct**

42 As described above, the Impugned Conduct refers broadly to categories of the Defendants' actions and inactions, including Canada's participation in various industries and its causation of, contribution to and allowance of GHG emissions incompatible with a Stable Climate System. These categories are somewhat sub-categorized throughout the Statement of Claim, through descriptions of a broad range of activities, as identified above.

43 The diffuse nature of the Impugned Conduct, as described by the Plaintiffs, has effectively put the entirety of Canada's policy response to climate change in issue. The Plaintiffs adamantly disagree with this characterization. In their Written Representations, they attempt to clarify their claim, suggesting that they are asking this Court to review the cumulative effects of GHG emissions, not each and every law or state action that underpins these emissions. I find this position to be problematic, as the purpose of *Charter* review is to ensure the constitutionality of laws and state action. The Plaintiffs' position undermines this function of *Charter* review, if assessments of *Charter* infringement cannot be connected to specific laws or state action.

44 Moreover, the diffuse nature of the claim that targets all conduct leading to GHG emissions cannot be characterized in a way other than to suggest the Plaintiffs' are seeking judicial involvement in Canada's overall policy response to climate change. There is little difference between the choices the Defendants

make in relation to addressing climate change and other policy choices the Courts have consistently recognized as falling more appropriately within the sphere of the other branches of government. These include choices in relation to the type of healthcare system (*Chaoulli* at para 107), approaches to illegal drug use and addiction (*PHS* at para 105), limits on how and where prostitution may be conducted (*Canada (Attorney Genera) v Bedford*, *2013 SCC 72* at para 5), addressing physician-assisted death (*Carter v Canada (Attorney General)*, *2015 SCC 5* at para 98) and the prioritization of homeless and inadequate housing (*Tanudjaja* at para 33). These are all important societal issues, the decisions in relation to which fall more appropriately on the legislative and executive branches of government. They attract a variety of social, political, scientific and moral reactions. There is room for disagreement between reasonable people about how these issues should be addressed (*PHS* at para 105).

45 However, when policy choices are translated into law or state action, that resulting law or state action must not infringe the constitutional rights of the Plaintiffs. As such, it is the specific law or state action -- or possibly a network thereof -- that is subject to *Charter* review and that forms the basis upon which the rest of the *Charter* analysis can occur. "A challenge to a particular law or particular application of such law is an archetypal feature of *Charter* challenges under s. 7 and s. 15" (*Tanudjaja* at para 22).

46 The Plaintiffs do not plead definable law or state action in issue, or for that matter a network in respect thereof. I agree with the statement made by the Ontario Court of Appeal in *Tanudjaja*, that it is not the case that a Court could never consider the constitutionality of a network of programs. In fact, Courts have already considered the constitutionality of a network of laws in some cases. For example, in *Bedford*, the Supreme Court considered three impugned provisions that prevented prostitutes from implementing certain safety measures (*Bedford*, above at para 6). My concern is not that the Plaintiffs are asking this Court to consider a network of Canada's actions and inactions related to climate change, but with the undue breadth and diffuse nature of that network, which puts Canada's overall policy choices at issue.

47 The Plaintiffs rely on *Youth Environment v Attorney General of Canada*, *2019 QCCS 2885* [*Youth Environment*] as a case which demonstrates that "constitutional claims about climate action are justiciable". The claimants in *Youth Environment* argued that Canada's failure to set appropriate GHG emission reduction targets, and to meet the targets that had been set, amounted to a violation of rights, including those under the *Charter*. The Quebec Superior Court in *Youth Environment* was clear it was not prepared to find the claim "unjusticiable" at the certification stage of the action (*Youth Environment*, above at para 71). This case is not binding on this Court and I remain unpersuaded of its assistance, considering the differences in the breadth of conduct alleged in *Youth Environment* and in the current case.

48 As it relates to the evasiveness of review, my comments above are not to be taken as suggesting that the Defendants should not be responsible or unaccountable in addressing climate change. The Defendants acknowledge that climate change posses a serious societal issue of our times, requiring responsiveness from all stakeholders. However, justiciability is an important underpinning of Canada's constitutional framework and this Court cannot circumvent its constitutional boundaries of the subject matter pleaded on the sole basis that the issue in question is one of societal importance, no matter how critical climate change is and will be to Canadians' health and well-being, which is acknowledged.

(b) **Remedies**

49 The Plaintiffs ask for various forms of relief at paragraph 222 of their Statement of Claim. They provide that the relief sought is within the bounds of justiciable orders, as they are all "conventional" legal remedies to correct breaches of sections 7 and 15 of the *Charter*, or are otherwise appropriate in relation to the "public trust doctrine", if this cause of action is found to exist at common law or an unwritten constitutional principle.

50 While the *Charter* remedies have the air of *prima facie* legal remedies, the Plaintiffs fail to consider that the overall context of the relief sought, in relation to the undue breadth of the claim, pushes this Court into a role outside the confines imposed by justiciability. In this respect, I agree with the Defendants that while the availability of *Charter* remedies are broad, the proposed remedies in this case are not legitimate within the framework of Canada's constitutional democracy.

51 The first order proposed by the Plaintiffs, asking this Court to declare that the Defendants have a common law and constitutional obligation to act in a manner compatible with maintaining a Stable Climate System, is unrelated to the constitutionality of the Impugned Conduct. Even if this was the case, the breadth of the Impugned Conduct effectively means that the Plaintiffs are seeking a legal opinion on the interpretation of the *Charter*, in the absence of clearly defined law or state action that brings the *Charter* into play (*Borowski v Canada (Attorney General)*, *[1989] 1 SCR 342* at 365).

52 The declaratory relief related to a finding that the Plaintiffs' section 7 and section 15 *Charter* rights have been unjustifiably infringed, as well as that the Defendants are in breach of the public trust doctrine, does not address the underlying harms created by law or state action. The breadth of the Impugned Conduct subject to review effectively asks this Court to take on a public inquiry role, whereby it determines whether or not the Defendants' overall approach to climate change is effective.

53 The proposed remedies include that this Court require action on the part of the Defendants to prepare an accounting of GHG emissions and to develop and implement an enforceable climate recovery plan, as well as retain supervision of the Defendants' compliance in relation to these orders. These remedies are similar to the wide-ranging remedies sought at paragraph 15 of *Tanudjaja*, including declarations, mandatory orders and supervision. The Ontario Court of Appeal in *Tanudjaja* was of the view that (at para 34):

> 34 Were the court to confine its remedy to a bare declaration that a government was required to develop a housing policy, that would be so devoid of content as to be effectively meaningless. To embark, as asked, on judicial supervision of the adequacy of housing policy developed by Canada and Ontario takes the court well beyond the limits of its institutional capacity ...

54 These considerations are also applicable in the current case. This Court, in *Friends of the Earth*, found the evaluation of the content of a climate change plan to be non-justiciable (*Friends of the Earth v Canada (Governor in Council)*, *2008 FC 1183* at paras 34-36, aff'd *2009 FCA 297*, leave to appeal to SCC refused, 33469 (25 March 2010)). Although this finding was based on this Court's interpretation of the *Kyoto Protocol Implementation Act*, it suggests that the remedies in the context of climate change must be carefully circumscribed to the appropriate separation of powers.

55 The Plaintiffs are seeking an order requiring the Defendants to develop and implement an enforceable

climate recovery plan, without specifying the specific content of that plan. Instead, they specify the method for devising such a plan, which involves a comprehensive accounting of Canada's GHG emissions and the alignment of the "enforceable" climate recovery plan with Canada's fair share of the global carbon budget plan. This remedy is devoid of content and meaning in addressing the Plaintiffs' alleged rights, if violated. Further, it poses an incursion into the policy-making functions of the executive and legislative branches by requiring specific standards that the climate recovery plan must meet, including that it be compatible with maintaining a Stable Climate System and the protection of Public Trust Resources.

56 An appropriate and just remedy in the context of a *Charter* claim "must employ means that are legitimate within the framework of our constitutional democracy" (*Doucet-Boudreau v Nova Scotia (Minister of Education)*, *2003 SCC 62* at para 56 [*Doucet-Boudreau*]). While I agree with the Plaintiffs that novel and creative remedies may be warranted in order to be responsive to the needs of a given case, this is not such a case. In *Doucet-Boudreau*, the Supreme Court considered the decision of a trial judge who ordered a provincial government to do its best to build French-language schools within a set timeframe. The trial judge declared himself competent to hear reports on the efforts. The orders were made in light of section 23 of the *Charter*, which provides for language rights, and the supervisory jurisdiction was limited. I find the context in *Doucet-Boudreau* to be distinguishable from the current case.

(4) Justiciability of the Public Trust Doctrine

57 I do not find that the justiciability arguments relied upon by the Defendants apply in the same manner to the public trust doctrine. In relation to this particular claim, the Plaintiffs are seeking that this Court recognize the existence of a *sui generis* doctrine, in which the Defendants have obligations to protect and preserve various identified inherently public resources, within the jurisdiction of the federal government.

58 The existence of the public trust doctrine at common law or as an unwritten constitutional principle is clearly a legal question, which the Courts can resolve. This question does not engage the same considerations in relation to the constitutional demarcation of powers and there is no policy or political context or component to the claim. The novelty of the doctrine is not a bar to its justiciability. The real question in relation to this particular claim is whether such a doctrine discloses a reasonable cause of action or has a reasonable prospect of success.

D. *Reasonable Cause of Action*

(1) Conclusion on whether the Statement of Claim Discloses a Reasonable Cause of Action

59 Even if I am wrong on the question of justiciability, I find that the Statement of Claim does not disclose a reasonable cause of action. For the reasons that follow, on the basis of the pleadings, the facts of which are taken to be true, both the section 7 and section 15 *Charter* claims, as well as the claim in relation to the public trust doctrine, have no reasonable prospect of success. Specifically, the undue breadth and diffuse nature of the Impugned Conduct cannot sustain a section 7 *Charter* analysis. The Plaintiffs have failed to disclose a distinction on the basis of state action or law, required for the purposes of a section 15 *Charter* analysis. Moreover, the existence of the public trust doctrine, as pleaded by the

Plaintiffs, is not supported in Canadian law.

(2) Section 7 of the *Charter*

60 To establish a section 7 *Charter* infringement, the Plaintiffs are required to demonstrate that: (1) the legislation or state action interferes with, or deprives them of, their life, liberty or security of the person; and (2) once they have established that section 7 of the *Charter* is engaged, they must show that the deprivation in question is not in accordance with the principles of fundamental justice (*Carter*, above at para 55).

61 The test on a motion to strike operates on the assumption that the claim will proceed through the Court system in the usual way (*Imperial Tobacco* at para 25). The Defendants argue that: (1) there is no reasonable cause of action because section 7 of the *Charter* does not confer positive rights, requiring Canada to enact, fund and enforce climate change policies consistent with the Plaintiffs' standards; (2) the claim is speculative and incapable of proof; and (3) the Defendants have also brought into issue the breadth of the Impugned Conduct, which does not disclose a discrete law, state action or network thereof as the foundation for a section 7 *Charter* analysis. I find that the claim discloses no reasonable prospect of success on the basis of this third reason. However, I will nonetheless address each argument the Defendants have raised.

(a) **Impugned Law or State Action**

62 In my view, the section 7 *Charter* claim fails to disclose a reasonable cause of action because the undue breadth and diffuse nature of the Impugned Conduct cannot sustain a section 7 *Charter* analysis. As identified in *Tanudjaja*, a challenge to a *particular* law or application thereof is an archetypal feature of section 7 *Charter* challenges.

63 As discussed above, while I would be prepared to find that a network of laws or state action could be reviewable under section 7 of the *Charter*, it is the diffuse and unconstrained nature of the proposed Impugned Conduct that fails to provide an anchor for the analysis in this case. As such, the claim has no reasonable prospect of success under section 7 of the *Charter*.

64 While this finding forms the basis for striking the section 7 *Charter* claim, I will address the additional arguments of the Defendants below.

(b) **Positive Rights**

65 While no longer determinative, I will offer some comments in regards to the Defendants' argument in relation to the positive rights framing of the section 7 *Charter* claim. I do not find this argument sufficient to find that the claim discloses no reasonable cause of action for the reasons below.

66 The Defendants assert that the Plaintiffs' section 7 *Charter* claim discloses no reasonable cause of action because the claim is seeking recognition of positive rights to the climate change policies preferred by the Plaintiffs. Section 7 of the *Charter* does not instill positive obligations, rather it is premised on the

finding of a deprivation resulting from law or state action. The Defendants further indicate that the Plaintiffs' claim is not consistent with an incremental step in the evolution of section 7 *Charter* interpretation and that there is allegedly a lack of special circumstances in this case that would allow for a positive rights framing.

67 I am not prepared to find that the Plaintiffs would be unable to argue a negative rights claim or that they are otherwise barred from arguing a positive rights claim at this stage in the proceedings. Therefore, this argument has not been accepted as an additional basis for striking the section 7 *Charter* claim.

68 I am cognizant of the Plaintiffs' objection to this "positive rights" characterization of their claim. They are seeking to argue that the Impugned Conduct deprives them of a healthy climate and that both the actions and inactions of the Defendants have deprived them of a Stable Climate System. Considering the high threshold that must be met on a motion to strike, I am not prepared to characterize the Plaintiffs' claim as one that only engages positive rights.

69 Additionally, the Plaintiffs have raised authorities to suggest that section 7 may be interpreted as engaging positive rights in appropriate cases. Notably, in *Gosselin v Quebec (Attorney General)*, *2002 SCC 84* at paragraphs 81-82 [*Gosselin*], Chief Justice McLachlin, writing for the majority provided:

> 81 ... Nothing in the jurisprudence thus far suggests that s. 7 places a positive obligation on the state to ensure that each person enjoys life, liberty or security of the person. Rather, s. 7 has been interpreted as restricting the state's ability to deprive people of these. Such a deprivation does not exist in the case at bar.
>
> 82 ... The question therefore is not whether s. 7 has ever been - or will ever be - recognized as creating positive rights. Rather, the question is whether the present circumstances warrant a novel application of s. 7 as the basis for a positive state obligation to guarantee adequate living standards.

70 Furthermore, Justice Rennie, speaking for an unanimous Federal Court of Appeal in *Kreishan v Canada (Citizenship and Immigration)*, *2019 FCA 223* at paragraph 139, stated:

> 139 I am cognizant of the fact that section 7 is not frozen in time, nor is its content exhaustively defined, and that it may, some day, evolve to encompass positive obligations -- possibly in the domain of social, economic, health or *climate rights* ...
>
> [Emphasis added]

71 The Plaintiffs further rely on a British Columbia Supreme Court decision, *Single Mothers' Alliance of BC Society v British Columbia*, *2019 BCSC 1427* at paragraph 112, as an example of when a section 7 *Charter* claim was not struck on the basis that section 7 of the *Charter* has not yet been interpreted to impose positive obligations. The British Columbia Supreme Court found that it should err on the side of permitting a novel, but arguable, case to proceed to trial.

72 As found by the Supreme Court in *Gosselin*, "[i]t would be a mistake to regard s. 7 as frozen, or its content as having been exhaustively defined in previous cases" (*Gosselin*, above at para 82). In is within this context of *Charter* interpretation that the door has been opened for growth and expansion, within its

natural limits, to potentially consider positive rights under section 7. The Plaintiffs have pleaded facts that may support the existence of "special circumstances". Within this context, I do not accept the Defendants' argument that the Plaintiffs' claim discloses no reasonable cause of action on this basis alone.

(c) **Speculation**

73 I will also address the Defendants' arguments in relation to the speculative nature of the section 7 *Charter* claim, although I have already determined that the section 7 *Charter* claim discloses no reasonable cause of action on the basis of the undue breadth and diffuse nature of the Impugned Conduct. For the reasons below, I do not agree with the Defendants' arguments on this narrow issue.

74 The Defendants further allege that the Charter claims are speculative because they are incapable of proof, owed to the cumulative and global nature of climate change. Climate change is driven from historical and global human activities and requires a comprehensive, international approach to address. In this way, the Defendants liken the current case to *Operation Dismantle*, where a "sufficient causal link" could not be established. In *Operation Dismantle*, the Federal Cabinet's decision to approve cruise missile testing could not be linked to the result the appellants were alleging -- the increased threat of nuclear war. This amounted to speculation, which could never be proven (*Operation Dismantle* at para 18).

75 I cannot find that there is no reasonable prospect of success on the basis of the speculation arguments alone. Unlike the speculation inherent in the assumption in *Operation Dismantle* - that the reaction of foreign powers to cruise missile testing will increase the risk of nuclear war, the Plaintiffs in this case are alleging that Canada's role in climate change has led to the alleged harms. Canada has a role in GHG emissions that is more than speculative in this current case.

(3) Section 15 of the *Charter*

76 To establish a limitation of their section 15 *Charter* rights, the Plaintiffs must demonstrate that an impugned law, on its face or in its impact, creates (1) a distinction based on an enumerated or analogous ground, and (2) that the distinction perpetuates a disadvantage (*Quebec (Attorney General) v Alliance of professional and technical personnel in health and social services*, *2018 SCC 17* at para 25 [*Alliance professional*]).

77 Section 15 of the *Charter* is not limited to evaluating the constitutionality of legislation, but will apply to government action in a variety of forms, for example the implementation of statute in a discriminatory way by government officials (*Little Sisters Book and Art Emporium v Canada (Minister of Justice)*, *2000 SCC 69*). However, the law in question must be the source of the distinction, whether on its face or in its impact.

78 The Plaintiffs claim that a "law" under section 15 of the *Charter* includes what the Plaintiffs have characterized as "Impugned Conduct". I note that the Plaintiffs have described the particular vulnerability of children and youth to climate change at paragraphs 78 to 89 of the Plaintiffs' Statement of Claim. Further, the Plaintiffs allege discrimination on the basis of age and "indigeneity" at paragraph 232 of the Plaintiffs' Statement of Claim.

79 The Defendants argue that section 15 of the *Charter* cannot offer protection in the abstract and there is no allegation of a particular law bearing benefits or burdens, distributed unequally on the basis of a prohibited ground. I agree with the Defendants. It is unclear what impugned law creates the claimed distinction, whether on its face or in its impact. I understand that the Plaintiffs are claiming that climate change has a disproportionate impact on children and youth. However, by using this as a starting point, they have circumvented the step of defining a law that creates a distinction on the basis of an enumerated ground.

80 On the basis of the above, I do not find it helpful to address the argument at paragraphs 59 to 60 of the Defendants' Written Representations, that section 15 of the *Charter* does not impose positive obligations on the part of Canada. The Defendants' arguments were primarily focused on positive rights concerns as it relates to section 7 of the *Charter*, and the above is otherwise determinative of the issue on section 15 of the *Charter*. There is no reasonable cause of action under section 15 of the *Charter* for the reasons above.

(4) The Public Trust Doctrine

81 The Plaintiffs describe the public trust doctrine as a trust-like, *parens patriae*, or fiduciary obligation on the part of the Defendants to preserve and protect the integrity of inherently public resources so that the public is not deprived of the benefits they provide to all. In their Written Representations on this motion to strike, the Plaintiffs clarified that the public trust doctrine is a *sui generis* doctrine. They allege it is both a common law and an unwritten constitutional principle. The Defendants have allegedly both general and specific obligations under the public trust doctrine with respect to the identified Public Trust Resources.

82 As beneficiaries of the public trust, and on account of having public interest standing, the Plaintiffs claim they may enforce the public trust in circumstances in which the Defendants have failed to discharge their obligations as trustee (Plaintiffs' Statement of Claim at para 242).

83 The following resources are suggested by the Plaintiffs as falling under the public trust doctrine, which by their nature, are public resources that Canada has an obligation to preserve and protect. The Public Trust Resources include:

a. Navigable waters, the foreshores and the territorial sea, including the lands submerged thereunder and the resources located therein;
b. The air, including the atmosphere; and
c. The permafrost.

84 The Plaintiffs also assert that the general obligations owed by the Defendants under the public trust doctrine include:

a. A duty to exercise continuous supervision and control over the Public Trust Resources;

b. A duty to protect the right of the public to access, use and enjoy such resources whenever feasible, including those rights that are fundamental to the ability of the public to enjoy the benefit of the resource as one held in common; and

c. A duty to safeguard the Public Trust Resources in a manner that does not substantially impair the integrity of these resources or substantially impair the right of the public to access, use and enjoy such resources.

(a) **Public Trust Doctrine at Common Law**

85 The Plaintiffs assert that the public trust doctrine is an open, long standing question that remains unanswered and deserves adjudication. In this respect, they distinguish an "unrecognized" legal right from a "non-existent" legal right. They seek to distinguish prior case law that has failed to recognize the public trust doctrine, arguing their case ought to be heard at trial to assess the existence of and the boundaries of the proposed public trust obligations. The Plaintiffs further provide that a motion to strike is a gate-keeping tool meant to eliminate clearly meritless claims. It is not a means of thwarting the potential of the law to adapt to changing circumstances. The Plaintiffs therefore assert that they are entitled to make their case about how this *sui generis* doctrine may apply in the specific and unprecedented context of climate change.

86 The Plaintiffs attempt to distinguish the Supreme Court decision in *Alberta v Elder Advocates of Alberta Society*, *2011 SCC 24* [*Elder Advocates*] from the type of public trust obligations they are seeking that the Court find in this case (*Elder Advocates*, above at paras 36-37). In *Elder Advocates*, the Supreme Court found that the Crown does not owe fiduciary obligations to the public at large (*Elder Advocates* at para 50). In the current case, the Plaintiffs are claiming a formulation of the public trust doctrine, whereby the duty is owed to all Canadians. The public trust doctrine described by the Plaintiffs therefore does not fall under the concept of an *ad hoc* fiduciary duty in their view.

87 I find that there is no legal foundation to suggest that the public trust doctrine, as described by the Plaintiffs, discloses a reasonable cause of action. For the reasons that follow, this claim has no reasonable prospect of success.

88 The breadth of the claim under the alleged public trust doctrine and the lack of material facts to support any legal basis suggests this claim is reflective of an "outcome" in search of a "cause of action". The scope of the obligations proposed by the Plaintiffs are both extensive and without definable limits. The Plaintiffs rely on *obiter* in *British Columbia v Canadian Forest Products Ltd*, *2004 SCC 38* [*Canfor*] for the proposition that the door has been opened for the public trust doctrine to be considered in Canada, whereby public rights are vested in the Crown (*Canfor*, above at paras 72-83):

> 74 The notion that there are public rights in the environment that reside in the Crown has deep roots in the common law: see, e.g., J.C. Maguire, "Fashioning an Equitable Vision for Public Resource Protection and Development in Canada: The Public Trust Doctrine Revisited and Reconceptualized" (1997), 7 J.E.L.P. 1. Indeed, the notion of "public rights" existed in Roman law:
>
> > By the law of nature these things are common to mankind - the air, running water, the sea ...
> >
> > (T.C. Sandars, The Institutes of Justinian (5th ed. 1876), at 2.1.1)

> ...
>
> 81 It seems to me there is no legal barrier to the Crown suing for compensation as well as injunctive relief in a proper case on account of public nuisance, or negligence causing environmental damage to public lands, and perhaps other torts such as trespass, but there are clearly important and novel policy questions raised by such actions. These include the Crown's potential liability for inactivity in the face of threats to the environment, the existence or non-existence of enforceable fiduciary duties owed to the public by the Crown in that regard, the limits to the role and function and remedies available to governments taking action on account of activity harmful to public enjoyment of public resources, and the spectre of imposing on private interests an indeterminate liability for an indeterminate amount of money for ecological or environmental damage.

89 *Canfor* concerned the Attorney General's ability to recover damages for environmental loss (*Canfor* at para 8). In this case, the Crown in right of British Columbia claimed it sued not only in its capacity as a property owner, but as the representative of the people of British Columbia. In this context, *obiter* comments in relation to the public trust doctrine cannot be taken to suggest a basis for the extensive scope of rights as suggested by the Plaintiffs, where the Plaintiffs have an actionable right against the Crown (Plaintiffs' Statement of Claim at para 242). The Supreme Court's *obiter* comments in *Canfor* were made in the context of whether the Crown was limited to suing in its capacity as an ordinary landowner. As such, if any door was opened, it is in relation to the entitlement of the Crown in the context of a tort action.

90 The American public trust doctrine and secondary sources relied on by the Plaintiffs to this effect are also not applicable in my view. Specifically, the Plaintiffs rely on *Waters' Law of Trusts in Canada*, 4th ed (Toronto: Carswell, 2012) [*Waters*], which surveys the doctrine under American law. This text discusses the American public trust doctrine, before clarifying that "[t]he public trust doctrine has not been adopted in Canada" (*Waters*, above at 603; see also: Maguire, John C, "Fashioning an Equitable Vision for Public Resource Protection and Development in Canada: The Public Trust Doctrine Revisited and Reconceptualized" (1997) 7 J Env L & Prac 1).

91 In *Burns Bog Conservation Society v Canada*, *2014 FCA 170* [*Burns Bog* (FCA)], the Federal Court of Appeal agreed with a decision of the Federal Court, recognizing that the public trust doctrine has not been recognized in Canadian law (*Burns Bog* (FCA) at paras 43-47; *Burns Bog* (FC) at para 107). The Federal Court of Appeal specified at paragraph 44:

> 44 It is clear that in reaching his conclusion, the Judge carefully considered *Canfor*. He found that at best *Canfor* opens the door to the application of the public trust doctrine developed in the United States in respect of land owned by the Crown (see *Canfor* at paragraphs 74-81). Here, as mentioned, the respondent does not own Burns Bog.

92 While it is clear the determining issue in *Burns Bog* was that of ownership, I do not find these cited cases have "opened the door" to an expansive public trust doctrine, as described by the Plaintiffs, that could be crystalized in a different factual context. I have reviewed the reasons in *Canfor* and *Burns Bog* (*Canfor* at paras 72-83; *Burns Bog* (FC) at paras 74-81) and while there is a "notion" that public rights in

the environment reside in the Crown, these authorities do not approach the breadth of the rights and actionable interests that the Plaintiffs claim could exist at common law.

93 I remain unconvinced that a claim for the public trust doctrine should proceed to trial on the basis that it is a novel claim and that I must err on the side of caution. Rather, the public trust doctrine is a concept that Canadian Courts have consistently failed to recognize. It does not exist in Canadian law. In this respect, I do not agree with the Plaintiffs' attempt at distinguishing an unrecognized from non-existent cause of action.

94 This is a claim that may be appropriately struck. As provided by the Supreme Court in *Atlantic Lottery*, "[i]f a court does not recognize an unprecedented claim where the alleged facts are taken to be true, the claim is clearly doomed and must be struck out" (*Atlantic Lottery* at para 19).

95 Moreover, the recognition of this principle is not consistent with the Courts' approach to the development of the common law, namely that these evolutions are incremental, unlike the developments in the law that may be taken by the legislature. The Courts are constrained in this regard, unlike the legislature, and the breadth of the proposed public trust doctrine is not reflective of such an incremental step.

(b) **Public Trust Doctrine as an Unwritten Constitutional Principle**

96 The Plaintiffs also claim that the public trust doctrine is an unwritten constitutional principle. They rely on secondary sources, pointing to remarks by Chief Justice McLachlin in *Unwritten Constitutional Principles: What is going on?* [Given at the 2005 Lord Cooke Lecture in Wellington, New Zealand]. The remarks discussed how constitutional principles are rooted in natural law. In the Plaintiffs' view, this is not unlike the alleged public trust doctrine they describe. The remarks by the Chief Justice include the following statement:

> The contemporary concept of unwritten constitutional principles can be seen as a modern reincarnation of the ancient doctrines of natural law.

97 The Plaintiffs claim it would therefore be premature to reject this claim on a motion to strike.

98 This said, the Plaintiffs' Statement of Claim has not pleaded material facts to support the public trust doctrine as an unwritten constitutional principle, outside its allegation that this is in fact the case. The failure to offer any material facts which, taken to be true, would support this finding in their Statement of Claim, is fatal to the proposed cause of action.

99 The Supreme Court in *Reference re Succession of Quebec*, *[1998] 2 SCR 217* at paras 50, 51, describe that "it would be impossible to conceive of our constitutional structure without them [underlying constitutional principles]. The principles dictate major elements of the architecture of the Constitution itself and are as such its lifeblood". There are no material facts, which taken to be true, could demonstrate this threshold has been met.

100 On the basis of the above, it is plain and obvious that the claims related to the public trust doctrine

fail to disclose a reasonable cause of action.

VII. Conclusion

101 On the basis of the above findings, I would grant the Defendants' motion to strike the Plaintiffs' Statement of Claim without leave to amend.

102 The *Charter* claims, under section 7 and section 15, are not justiciable and otherwise disclose no reasonable cause of action. The public trust doctrine, while justiciable, does not disclose a reasonable cause of action.

103 The Defendants did not seek costs in their motion. Given the novel and challenging nature of the statement of claim, I exercise my discretion in ordering no costs.

ORDER IN T-1750-19

THIS COURT ORDERS that:

1. The Defendants' motion to strike the Plaintiffs' Statement of Claim is granted without leave to amend;
2. No costs are awarded.

BY THE COURT

OVERVIEW

[1] The government of Ontario announced a basic income pilot research study ("the Pilot Project") in April of 2017.

[2] The objective of the Pilot Project was to: "study whether a basic income can better support vulnerable workers and give people the security and opportunity they need to achieve their potential."

[3] It was envisaged that data would be gathered over a prolonged period in the hope of identifying whether providing recipients with a basic income would increase and stabilize income; reduce economic anxiety and/or improve housing stability, mental health and

2019 ONSC 1064 (CanLII)

employment outcomes; and enable recipients to be better able to make choices and decisions about their future. The compilation of this data would assist in determining whether to adopt the basic income approach across the province.

[4] The Minister of Children, Social and Community Services ("the Respondent") decided to cancel the Pilot Project on July 31, 2018 with payments to end in March 2019.

[5] The Applicants seek judicial review to quash the decision cancelling the Pilot Project.

THE POSITION OF THE PARTIES

The Applicants' Position

[6] The Applicants agree that governments are entitled to make policy decisions to fund or not to fund certain initiatives. They also agree that the Minister's decision to cancel the Pilot Project is a policy decision.

[7] However, the Applicants submit that the decision to cancel the Pilot Project is subject to judicial review because the Minister's decision affects their financial interests, they relied on the Pilot Project to their detriment, and the decision to cancel adversely affects their well-being. Moreover, they claim the decision was irrational, made in bad faith and/or unethical and should therefore be quashed.

[8] The Applicants also claim the Respondent breached an agreement with Veritas, the Independent Review Board ("IRB") retained for the Pilot Project, which requires the Respondent to consult with Veritas and adhere to the terms of the agreement.

[9] Lastly, while the Applicants seek an order quashing the decision to cancel the Pilot Project, they do not seek an order requiring the Respondent to continue funding the Pilot Project. Rather, they concede there is no legal authority to require the Respondent to continue funding the Pilot Project.

The Respondent's Position

[10] The Respondent submits that the Pilot Project is a government funding decision which does not give rise to individual rights enforceable on judicial review. The decision to cancel the Pilot Project is therefore not justiciable because a policy decision as to how to spend public funds is a political decision that cannot be questioned or reviewed by the courts.

[11] Secondly, and only if this court decides that there is a justiciable issue, the fact that the Respondent's policy choices may be contrary to the interests of some does not render the decision irrational or in bad faith.

[12] Moreover, the Respondent argues that the statements made by members of the Legislature are not "reasons for decision" and the opinions of research ethicists cannot fetter

2019 ONSC 1064 (CanLII)

Cabinet's policy-making authority. In any event, the Respondent's two experts concluded that the decision to cancel the Pilot Project was not an ethical violation.

[13] The Respondent submits that it had no obligation to consult with Veritas prior to cancelling the funding for the Pilot Project.

[14] Finally, the Respondent argues that the inevitable effect of an order to quash the decision to cancel the Pilot Project is to require the Respondent to continue funding, which, it is agreed, this Court has no authority to do.

THE EVIDENCE

[15] The Pilot Program was created pursuant to the Crown's common law spending powers. The authority for expenditures is derived from the *Supply Act* and expenditures are approved by the Treasury Board of Cabinet.

[16] The Applicants are all residents of Lindsay, Ontario. All of them receive Basic Income payments pursuant to the Pilot Project. Dana Bowman is 57-years old with long-term disabilities. Grace Hillion is a 20-year old student at Durham College. Susan Lindsay is a 57-year old person who stopped work in 2017 owing to health issues. Tracey Mechefske is a 46-year old person living with long-term disabilities who owns a small business.

[17] Pursuant to the Pilot Project, a randomized controlled trial was conducted in Hamilton and Thunder Bay with 1,000 participants assigned to a control group and 1,000 participants receiving payments. In Lindsay, a "saturation site", all 2,000 participants received payments.

[18] Participants in the control group receive up to $16,989 per year for a single person or $24,027 for a couple, plus an additional amount of up to $6,000 per year for each person with a disability. Payments are reduced by 100% of Employment Insurance and Workplace Safety and Insurance Board benefits and 50% of employment income. Recipients who were receiving income support from Ontario Works at the time of enrollment in the Pilot Project receive drug benefits and those who received income support from the Ontario Disability Support Program ("ODSP") continue to receive drug and dental benefits. Other benefits were not provided in the Pilot Project.

[19] Each of the Applicants was provided with an Information Booklet.

[20] In the Booklet, the Pilot Project is identified as "a three-year study" and later as lasting "up to three years".

[21] The Information Booklet provides that participants must complete surveys containing questions about their experiences while in the Pilot Project, such as regarding "stress levels, work, family, health, education and housing" and consent to the collection and disclosure of their personal information and tax records. The Information Booklet provides that:

2019 ONSC 1064 (CanLII)

> Participation in the pilot is temporary. Any decision you make about your future based on the amount you receive should take this into account. Participants will get notifications about the close of the pilot in advance.
>
> …
>
> The pilot will run for up to three years. When the pilot enters its final year, the Basic Income payments will be reduced gradually to prepare participants for the end of the study. The intent of this gradual reduction is to reduce any impact of ending Basic Income payments. Participants will receive information about this before any payments are reduced.

2019 ONSC 1064 (CanLII)

[22] Two of the four Applicants say they were told by Pilot Project staff that the Pilot Project would last three years. There was a phased enrollment of participants.

[23] As the Pilot Project was essentially a social science experiment with human participants, the Respondent engaged Veritas to "perform the initial and ongoing ethical review of the research study with the Research Participants' rights and welfare in mind."

[24] The Respondent acknowledged in writing that Veritas had the authority to review, oversee, and suspend approval of the Pilot Project and agreed to implement the Pilot Project "in accordance with the guiding ethical principles and normative documents abided by the IRB".

[25] In March 2018, the Respondent stated in a report to Veritas that the study closure date was May 27, 2021.

[26] Consistent with the Respondent's objectives of the Pilot Project:

a. Dana Bowman renewed her plan to upgrade her education toward a career in social work, which she said had not been financially feasible under ODSP;

b. Grace Hillion was able to pay her tuition and continue her college education which she said was in jeopardy due to financial issues;

c. Susan Lindsay, planned to use the Pilot Project payments to resume working; and

d. Tracey Mechefske used the payments in her small business.

[27] The Applicants say they also used the basic income from the Pilot Project to pay their bills, eat healthier food, and purchase clothes and medications. The Applicants say their independence, self-esteem and sense of personal accountability increased.

[28] On July 31, 2018, just over one year from the announcement of the Pilot Project, the Minister cancelled the Pilot Project. The Applicants first learned of the cancellation through family, the news, and social media.

[29] The Applicants state that the cancellation of the Pilot Project on July 31, 2018 effective March 31, 2019, has had a devastating impact on them and they feel that, as a result of the cancellation, their futures are in jeopardy, their health has suffered, and their futures are uncertain.

[30] Media releases were followed up with letters to the participants who were informed that payments would continue until March 2019, whereupon all payments would cease.

[31] When asked about the reason for the cancellation, the Executive Director of Policy in the Office of the Premier said that he thought cost was a big factor and that paperwork was another. He also cited "[r]emoval of work ethic/driving people to quit jobs," as well as anti-competitive business environment leading to more layoffs and "usage/uptake". The Minister stated that the Pilot Project was "actually disincentivizing people from working" and that a basic income program would be too expensive, "costing $17 billion and leading to a 20% HST".

[32] On September 6, 2018, Veritas expressed "concern over the news reports indicating the government's intention to wind down the Ontario Basic Income Pilot." Veritas further noted that, as the IRB responsible for oversight of the project, it must review any proposed changes to the research protocol, evaluate their ethical acceptability, and approve them before they are implemented or disapprove them as the case may be.

[33] On October 4, 2018, the Respondent submitted its wind down strategy to Veritas. Veritas did not approve the strategy. Veritas said the wind down timeline was inconsistent with the three-year term of the Pilot Project and the Respondent's initial statement that those who receive the basic income would receive it for two years, with another year in which the benefits would be gradually reduced to ease the transition back to standard benefits and because it appeared no justification for approval of the 'winding down' plan was forthcoming. Finally, Veritas made a finding of Serious Non-Compliance based on evidence that, despite Veritas' insistence, the 'winding down' of the Pilot Project was started by the Respondent without Veritas' approval.

[34] Veritas stated that its finding of Serious Non-Compliance was also made "considering that the situation will have profound adverse effects on the rights and welfare of Research Participants." Veritas directed that a plan to rectify the Serious Non-Compliance be submitted by the Respondent to Veritas for review and approval. The Respondent advised Veritas that it disagreed with Veritas' characterization of the documents and terminated its engagement with Veritas, "in light of [its] position", effective immediately.

ANALYSIS OF THE ISSUES

Issue #1: When are Policy Decisions Subject to Judicial Review?

2019 ONSC 1064 (CanLII)

[35] In choosing to wind-down the Pilot Project, Cabinet made a policy decision. The authority to implement the Pilot Project is based on the Crown's common law spending powers.

[36] The allocation of public resources does not give rise to enforceable rights on judicial review: See *Hamilton-Wentworth (Regional Municipality) v. Ontario (Minister of Transportation)* (1991), 2 O.R. (3d) 716 (Div. Ct), at paras. 43-44, leave to appeal dismissed [1991] O.J. No. 3201 (C.A.) and *Apotex Inc. v. Ontario (Minister of Health)* (2004), 73 O.R. (3d) 1 (C.A.), at paras. 33-37, 39-40, leave to appeal refused [2005] S.C.C.A. No. 8.

[37] In *Hamilton-Wentworth*, at paras. 43-47, the Minister of Transportation refused to fund the building of an expressway despite the government's agreement almost 20 years earlier to fund the project. The Applicant alleged that the cancellation of funding was based on environmental grounds, which were extraneous to the purposes of the relevant statute. The Court found that Cabinet's decision not to fund the expressway was a policy decision that was not subject to judicial review. In so doing, it held (at paras. 42-44) that:

> The government has the right to order its priorities and direct its fiscal resources towards those initiatives or programs which are most compatible with the policy conclusions guiding that particular government's action. This was simply a statement of funding policy and priorities and not the exercise of a statutory power of decision attracting judicial review.
>
> While it would appear that in basing its decision on environmental concerns the government is ignoring the statutory framework established to deal with environmental matters that does not affect its jurisdiction to make the decision in question. Such a decision is not subject to judicial review. It is in substance a decision for the disbursement of public funds. It has been a constitutional principle of our parliamentary system for at least three centuries that such disbursement is within the authority of the legislature alone. The appropriation, allocation or disbursement of such funds by a court is offensive to principle.
>
> As was said by Lush J. in *R. v. Treasury Lords Commissioners* (1872), L.R. 7 Q.B. 387, at p. 402:
>
> > I think that the applicants have failed to make out that which is essential to entitle them to a writ of mandamus, namely, that there is a legal duty imposed upon the Lords of the Treasury -- a duty as between them and the applicants -- to pay over this sum of money.

[38] Government cannot be required by the court to make or continue to fund an expenditure, as the distribution of government funds is a political not a judicial function: See *Re Metropolitan General Hospital and Minister of Health* (1979), 25 O.R. (2d) 699 (H.C.), at paras. 10-13.

[39] Moreover, the fact that funds were provided in the past does not mean government must continue to offer the same level of service nor does the decision to reduce or eliminate funding

2019 ONSC 1064 (CanLII)

alone, create enforceable rights: See *St. Joseph Island Hospital Assn. (c.o.b. Matthews Memorial Hospital Assn.) v. Plummer Memorial Public Hospital,* [1996] O.J. No. 4663 (C.J. (Gen. Div.)), at paras. 39-40.

[40] This is because courts have no power to review the policy considerations which motivate Cabinet decisions. The responsibility for the management of public funds rests with the government and not the court, as does the correctness of the government's decisions and policies: See: *Apotex*, at para. 39.

[41] For this reason alone, the Application is dismissed.

2019 ONSC 1064 (CanLII)

Issue #2: Does this Decision alter individual rights, obligations or legitimate expectations?

[42] The Applicants submit that although policy decisions are not usually justiciable, judicial review is nonetheless appropriate in this case as the decision affects their financial interests, they rely on the Basic Income payments, and the decision to cancel has adversely affected their well-being. They submit that an application for judicial review is appropriate to protect their legitimate rights and expectations.

[43] We do not agree.

[44] A motion to quash is only available when the decision at issue:

a. alters the person(s)' rights or obligations that are enforceable in private law, or

b. deprives the person(s) of a benefit (i) she had been given and legitimately expects to continue to enjoy pending receipt of rational grounds for withdrawing it and an opportunity to comment; or (ii) for which assurance has been given that the benefit or advantage would not be withdrawn without first having an opportunity to advance reasons why they should not be withdrawn. (See: *Black v. Canada (Prime Minister)* (2001), 54 O.R. (3d) 215 (C.A.), at paras. 44, 47-51; *Pharmaceutical Manufacturers Assn. of Canada v. British Columbia (Attorney General)* (1997), 149 D.L.R. (4th) 613 (B.C.C.A.), at paras. 27-28)

[45] In this case, the Applicants do not seek private law remedies such as damages for breach of contract or for negligence. They seek only to quash the decision to cancel the Pilot Program.

[46] Nor does the Respondent's decision deprive the Applicants of a "legitimate expectation" within the meaning of the law. There is no legitimate expectation to be consulted on policy decisions to fund. Nor is there any obligation to hold public hearings or consult with stakeholders: See *Gigliotti v. Conseil d'Administration du College des Grands Lacs* (2005), 76

O.R. (3d) 561 (Div. Ct.), at paras. 62-63 and *Canadian Union of Public Employees v. Ontario*, 2018 ONCA 309, at para. 8, affirming 2017 ONSC 4874.

[47] As Nordheimer J. (as he then was) noted: "While it may sometimes seem unfair when rules are changed in the middle of a game; that is the nature of the game when one is dealing with government programs." See *Skypower CL I LP et al. v. Minister of Energy (Ontario) et al.,* 2012 ONSC 4979 (Div. Ct.), at para. 84.

[48] The Applicants point to the decision in *Tesla Motors Canada ULC v. Ontario (Ministry of Transportation)*, 2018 ONSC 5062, where the Court held that the government's decision to implement a wind-down of a subsidy program wrongfully singled out Tesla. *Tesla* is, however, distinguishable from the case before us as the court was not being asked to review the government's decision to stop funding the electric car subsidy program. Rather, the decision in *Tesla* involved the regulatory details as to how a winding down program was going to operate under a statutory scheme. This brought the decision out of the realm of a broad policy decision and into the realm of a reviewable administrative implementation decision for which Tesla had a legitimate expectation of consultation.

[49] As such this ground of review must fail.

Issue # 3: Was the Decision Irrational or in Bad Faith?

[50] The Applicants further submit that the Respondent's decision to cancel the Pilot Project was irrational and in bad faith and should therefore be quashed.

[51] However, policy decisions taken without consultation do not constitute bad faith because there is no right to procedural fairness or any legitimate expectation to be consulted on policy decisions: See *Canadian Union of Public Employees v. Ontario,* at para. 8. To the extent that contracts are breached in so doing, governments are permitted to change government policy subject to private law remedies.

[52] Moreover, the Applicants concede that comments by politicians in the Legislature are not admissible to prove improper purpose as public declarations are not credible sources of government intention though they "represent, no doubt, the considered views of the speakers, at the time they were made." See: *Reference re Upper Churchill Water Rights Reversion Act, 1980,* [1984] 1 S.C.R. 297, at para. 31.

[53] The Applicants have commenced a class action in which they seek private law remedies. In this application for judicial review they only ask the court to quash the decision cancelling the Pilot Project. Because the decision to cancel the Pilot Program was a core policy decision made by the Respondent based on political considerations or electoral expediency, the Court has no authority to grant that request.

Issue #4: Does this Court have the authority to Grant the Order to Quash?

2019 ONSC 1064 (CanLII)

[54] An order to quash the decision cancelling the Pilot Program would inevitably result in a further allocation of funds to the Pilot Program.

[55] The Respondent cannot be required to make a particular expenditure, since an order for judicial review cannot compel a particular result, such as the payment of funds, the conduct of research, or the continuation of a program. (See *Metropolitan General Hospital*, at paras. 9-10).

2019 ONSC 1064 (CanLII)

CONCLUSION

[56] The Applicants made clear and cogent submissions in respect of:

a. The importance of the Pilot Project in collecting data to better understand the effect of a guaranteed annual income on those who are most vulnerable, and

b. The harm the Applicants say they suffered and their concern about the decision and the effect of the decision on their futures and others like them.

[57] However, the Pilot Project is a government funding decision which does not give rise to individual rights enforceable on judicial review. This Court has no power to review the considerations which motivate a Cabinet policy decision. As such, the decision to cancel the Pilot Project is not justiciable.

[58] Moreover, the inevitable effect of an order to quash the decision to cancel the Pilot Project would require the Respondent to continue funding, which, it is agreed, this Court has no authority to do. The distribution of government funds *per se* is a political not a judicial function.

[59] For these reasons, the Application is dismissed.

[60] This order has no effect on the Applicants' class action for damages for breach of duty of care, breach of contract and/or other private law remedies. This order only addresses the question of whether the court can quash the government's decision.

[61] Given the nature of this proceeding and in view of the agreement between the parties, we make no order as to costs.

also as parens patriae — Whether Comparative Value Pricing system can be taken into account to reduce compensation — Whether Province entitled to "auction value" of harvestable trees — Whether Province entitled to commercial value of non-harvestable trees plus a premium for environmental value — Whether common law provides for environmental damages.

In 1992, a fire swept through the Stone Creek area in the interior of British Columbia, damaging 1491 hectares of forest in a region where tenure holders are licensed to log. There is no dispute that the appellant ("Canfor"), a major licensee, is largely responsible for the blaze. After the fire, the burned-over cutting areas were logged. The fire-damaged timber was sold at a reduced price. The burned trees in some areas were left standing for environmental reasons, primarily to add stability to the soil, and the Crown adopted a rehabilitation plan. The Crown claimed damages against Canfor for three categories of loss: (1) expenditures for suppression of the fire and restoration of the burned-over areas; (2) loss of stumpage revenue from trees that would have been harvested in the ordinary course (harvestable trees); and (3) loss of trees set aside for various environmental reasons (non-harvestable or protected trees) in sensitive areas as established by the Crown.

In 1987, as part of its strategy to deal with the softwood lumber dispute with the United States, the Province adopted a stumpage "target rate" for wood harvested in the British Columbia Interior, together with a Comparative Value Pricing ("CVP") system, which the Crown's expert testified operates to ensure "that provincial revenues are not affected by low timber values" in any particular area. Forest productivity and costs of production varied from licence area to licence area within the British Columbia Interior, and the Province's regulatory rate system was calculated to ensure cost sensitivity to local conditions. If the "value" of the standing timber was reduced in one area, therefore giving rise to a reduced stumpage rate in that area, the regulatory system, through the CVP mechanism, adjusted the rates paid by other licensees in the following quarter to compensate. This was known as the "waterbed effect", which affected approximately 35 percent of the harvested timber from the Stone Creek

poursuivre non seulement en sa qualité de propriétaire foncier ordinaire mais aussi en sa qualité de parens patriae? — Le système de fixation des prix en fonction de la valeur comparative peut-il être pris en compte pour diminuer le montant de l'indemnité? — La province a-t-elle droit à la « valeur aux enchères » des arbres récoltables? — La province a-t-elle droit à la valeur marchande des arbres protégés et à une indemnité additionnelle pour leur valeur environnementale? — La common law permet-elle des dommages environnementaux?

En 1992, un incendie de forêt a ravagé la région de Stone Creek dans l'intérieur de la Colombie-Britannique, endommageant 1 491 hectares de forêt dans une région où des titulaires de tenure forestière étaient autorisés à exploiter la forêt. Nul ne conteste que l'appelante (« Canfor »), un important titulaire de permis, est en grande partie responsable de l'incendie. Après l'incendie, les arbres ont été coupés dans les parterres de coupe ravagés par le feu. Le bois endommagé par le feu a été vendu à prix réduit. Dans certaines zones, des arbres brûlés ont été laissés debout à des fins écologiques, principalement pour assurer la stabilité des sols, et la Couronne a adopté un plan de restauration. La Couronne a réclamé des dommages-intérêts pour trois catégories de pertes : (1) les dépenses supportées pour la lutte contre l'incendie et la restauration des aires incendiées, (2) la perte des droits de coupe à l'égard des arbres qui auraient été récoltés dans le cours normal des activités (les arbres récoltables), et (3) la perte des arbres réservés pour diverses fins liées à l'environnement dans les zones désignées écosensibles par la Couronne (les arbres réservés ou protégés).

En 1987, dans le cadre de sa stratégie à l'égard du différend sur le bois d'œuvre résineux avec les États-Unis, la province a adopté un « taux cible » des droits de coupe pour le bois récolté dans l'intérieur de la Colombie-Britannique, ainsi qu'un système de fixation des prix en fonction de la valeur comparative (« PVC ») qui, selon l'expert de la Couronne, garantissent « que la moindre valeur du bois » dans une aire donnée « n'a pas d'incidence sur les recettes de la province ». La productivité de l'exploitation forestière et les coûts de production variaient d'une aire de permis à l'autre dans le secteur de l'intérieur de la Colombie-Britannique, et le système de tarification réglementaire de la province a été conçu pour assurer l'élasticité du coût par rapport aux conditions locales. Si, dans une aire, la « valeur » du bois sur pied était diminuée, entraînant par conséquent une diminution du taux des droits de coupe, la réglementation, par le mécanisme du PVC, rajustait les droits payés par les autres titulaires de permis au cours du

2004 SCC 38 (CanLII)

fire. The stumpage system, including the CVP, was the only source of revenue for the Province under the *Forest Act*, pursuant to which it was entitled to recover revenues.

The trial judge awarded the Crown $3,575,000 (an amount agreed upon by the parties) under the first category of loss, but otherwise dismissed the claim on the basis that the Crown had failed to prove a compensable loss with respect to either harvestable or non-harvestable trees. The trial judge concluded that, as the fire had accelerated the Province's receipt of revenue that would otherwise have been spread over a period of up to 66 years and that as the fire damage was not so severe as to make the salvaged timber significantly less valuable than it was before the fire, the Province had not suffered a loss in purely financial terms other than restoration costs. The trial judge also held that Canfor was entitled to have the increased revenue obtained by the Province from other licensees under the CVP system taken into account to determine if the Province had suffered a financial loss. In the result, he concluded, the fire left the Province in a financial position no worse than it would have enjoyed had the fire not occurred. With respect to the non-harvestable trees, the trial judge indicated that while the Province had lost something of value, there was no proof of loss other than restoration costs, which had been agreed to.

The Court of Appeal dismissed the Crown's appeal on damages with respect to the harvestable trees, but awarded compensation for diminution of the value of the non-harvestable trees at a figure equivalent to one-third of their commercial value.

Held (Bastarache, LeBel and Fish JJ. dissenting): The appeal should be allowed and the cross-appeal dismissed. The decision of the trial judge is restored.

Per McLachlin C.J. and Iacobucci, Major, Binnie, Arbour and Deschamps JJ.: A claim for environmental loss, as in the case of any loss, must be put forward based on a coherent theory of damages, a methodology suitable for their assessment, and supporting evidence. No one doubts the need for environmental protection but, in this case, apart from the cost of reforestation, which was agreed to, the Crown claims only stumpage and "diminution of the value of the timber" within the burned-over area. The environment includes more than timber, but

trimestre suivant pour compenser. On appelait cela « l'effet stabilisateur », qui touchait environ 35 pour 100 du bois récolté dans la zone ravagée de Stone Creek. Le système des droits de coupe, y compris le PVC, était la seule source de recettes de la province sous le régime de la *Forest Act* donnant ouverture à indemnisation.

Le juge de première instance a accordé à la Couronne 3 575 000 $ (un chiffre arrêté de concert) à l'égard de la première catégorie de perte, mais a rejeté la demande pour le reste parce que la Couronne n'avait pas prouvé une perte indemnisable soit pour les arbres récoltables, soit pour les arbres réservés. Le juge de première instance a conclu que, comme le feu avait accéléré la perception par la province de recettes qui, sans cela, auraient pu s'étaler sur 66 ans et que le dommage causé par le feu n'était pas grave au point de diminuer de manière significative la valeur du bois récupéré par rapport à celle du bois vert, la province n'avait pas subi de perte d'ordre purement financier, abstraction faite des coûts de restauration. Le juge de première instance a également décidé que Canfor avait droit à ce que les recettes supplémentaires obtenues par la province des autres titulaires de permis en application du système de PVC soient prises en compte pour déterminer si la province avait subi une perte financière. En fin de compte, il a conclu que la province se trouvait dans une situation financière aussi avantageuse que si l'incendie n'avait pas eu lieu. En ce qui concerne les arbres réservés, le juge de première instance a affirmé que la province avait perdu quelque chose de valeur, mais que la preuve relative à la perte portait uniquement sur les coûts de restauration, qui avaient fait l'objet d'un accord.

La Cour d'appel a rejeté l'appel de la Couronne concernant les dommages-intérêts pour ce qui est des arbres récoltables, mais elle a accordé une indemnité en ce qui concerne la diminution de la valeur des arbres réservés, la fixant à un tiers de leur valeur marchande.

Arrêt (les juges Bastarache, LeBel et Fish sont dissidents) : Le pourvoi est accueilli et le pourvoi incident est rejeté. La décision du juge de première instance est rétablie.

La juge en chef McLachlin et les juges Iacobucci, Major, Binnie, Arbour et Deschamps : Une demande d'indemnité pour une perte environnementale, comme pour toute perte, doit être basée sur une théorie cohérente des dommages, sur une méthode permettant d'évaluer ces dommages et sur une preuve suffisante. Nul ne met en doute la nécessité de protéger l'environnement, mais en l'espèce, hormis le coût du reboisement, dont les parties ont convenu, la Couronne ne réclame que les droits de coupe et la « diminution de la

2004 SCC 38 (CanLII)

no allegation of such additional losses were made in that regard. The pleadings proceeded on a fairly narrow commercial focus and that is how the claim was defended.

The Crown's entitlement to compensation for both harvestable and non-harvestable trees should be limited to entitlement in the role the Crown adopted in its statement of claim, namely that of the landowner of a tract of forest. While it is open to the Crown in a proper case to take action as *parens patriae*, for compensation and injunctive relief on account of public nuisance, or negligence causing environmental damage to public lands, such litigation would raise important and novel policy issues. Since the Crown sought compensation here on the same basis as any other landowner for stumpage and "diminution of the value of the timber", this is not a proper appeal for the Court to embark on a consideration of those difficult issues. It would be unfair to the other parties to inject such a wide-ranging and important debate into the proceedings at this late date.

The Crown claimed "auction value" as the appropriate basis on which to calculate compensation for the harvestable trees. However, under the regulatory licensing system in effect in 1992 in British Columbia, the Province was not entitled to auction off the right to an immediate cut of the entire territory eventually burned over, which is what auction value measures. The Provincial regulatory scheme schedules the right to log its forests from year to year and decade to decade in exchange for long-term stability, as well as the economic well-being of communities dependent on a sustainable forest industry. The rights of the licensees were reciprocated in the imposition of corresponding obligations on the Province. The practical effect was that the Province had tied up its forest assets in such a way as to render the auction approach at odds with the Province's own regulatory regime. The Crown is as bound by the legislative scheme of the *Forest Act* as are the private operators, subject to any special exemption. There are no special exemptions applicable here.

The CVP system provides a relevant source of income to the Province which can properly be taken into account to determine if it has suffered a loss. The Province's claim is restricted to the impact of the fire on its projected revenue stream and the assessment of compensable loss is therefore heavily influenced by the regulatory structure which the Province itself designed and implemented. The

valeur de la ressource » dans la zone ravagée par le feu. L'environnement ne se limite pas au bois, mais aucun préjudice additionnel à cet égard n'a été allégué. Les actes de procédure visaient un aspect commercial assez restreint et c'est sur cette base que la demande a été contestée.

Le droit de la Couronne à une indemnité à l'égard tant des arbres récoltables que des arbres réservés est limité à celui du propriétaire d'une aire forestière, le rôle qu'elle a adopté dans sa déclaration. Bien que la Couronne à titre de *parens patriae* ait toute latitude pour engager, quand les faits y donnent ouverture, des poursuites en indemnisation et en injonction pour cause de nuisance publique ou pour négligence causant un dommage environnemental à des terres domaniales, ces poursuites soulèveraient des questions de politique générale nouvelles et importantes. Comme la Couronne demande, au même titre que tout propriétaire foncier, d'être indemnisée pour la perte de droits de coupe et la « diminution de la valeur du bois », le présent pourvoi ne se prête pas à l'examen par la Cour de ces questions difficiles. Il serait injuste pour les autres parties de présenter à une étape aussi tardive des questions dont la portée et l'importance sont aussi grandes.

La Couronne prétend que la « valeur aux enchères » constitue le fondement qui convient pour calculer l'indemnité quant aux arbres récoltables. Toutefois, suivant le système de permis réglementaire en vigueur en Colombie-Britannique en 1992, la province ne pouvait pas vendre aux enchères le droit de couper immédiatement tout le bois de la zone qui allait être ravagée par le feu, ce que permet de mesurer la valeur aux enchères. La réglementation provinciale fixe la coupe du bois pour les années et les décennies à venir en contrepartie de la stabilité à long terme ainsi que du bien-être économique des collectivités qui dépendent d'une industrie forestière stable. Aux droits des titulaires de permis correspondent des obligations de la province. L'effet pratique de ce système est que la province a bloqué ses actifs forestiers et que la méthode des enchères est incompatible avec sa propre réglementation. La Couronne, sous réserve d'exemption spéciale, est liée par les règlements d'application de la *Forest Act* au même titre que les exploitants privés. Aucune exemption spéciale ne s'applique en l'espèce.

Le système de PVC fournit à la province une source de revenu pertinente qu'il y a lieu de prendre en compte pour déterminer si elle a subi une perte. La demande de réparation de la province est limitée à l'incidence de l'incendie sur le flux anticipé de ses recettes et, donc, l'appréciation de la perte indemnisable dépend grandement de la réglementation que la province a elle-même

2004 SCC 38 (CanLII)

trial judge's analysis of the regulatory system was correct and it was open to him to conclude that the Province had defined the British Columbia Interior Region, and not the Stone Creek area itself, as the appropriate frame of reference for revenue purposes. Canfor therefore was entitled to rely on the "revenue-neutral" system the Province had implemented. Thus the Province had not, because of the fire, suffered a loss in the relevant revenue-generating unit.

The Crown's tactic to isolate the Stone Creek fire area from the regulatory region of which it forms a part must be rejected as an attempt to construct a financial loss that was not in fact suffered. If the Crown were permitted to ignore its own regulatory system, and calculate a notional loss by treating the Stone Creek fire area in isolation, it would by collection of that amount exceed the revenue otherwise intended to be collected by its own regulatory scheme and to that extent make a windfall rather than receive fair compensation for a proven loss.

The legislative scheme put in place by the *Forest Act* is central to the analysis of the Province's claim. According to the testimony of Canfor's expert, which was accepted by the trial judge, the CVP stumpage system was designed to ensure that the loss was never incurred. If there was no revenue loss, there was nothing to mitigate. Thus the principles governing mitigation of damages are not pertinent. Similarly, the Crown's argument that Canfor should not be allowed to "pass on" the loss to other forest licensees through the "waterbed effect" is misplaced. If no revenue loss was suffered in the first place, there was no loss to "pass on".

Nor did the Crown prove any financial loss with respect to the non-harvestable trees. Commercial logging of the steep, sensitive slopes would cost more than it was worth and according to the expert evidence would not have produced additional revenue for the Crown. With respect to the riparian areas (which could have been logged in 1992), the trial judge accepted the calculations of Canfor's expert witness which showed that any loss in the commercial value of expected stumpage revenue was more than offset by the receipt of accelerated payments for the immediate harvest of salvaged timber. There was thus no revenue shortfall in that respect either. While stumpage money may well not be a satisfactory financial proxy for the value of forest areas preserved for environmental purposes, the Crown

élaborée et mise en œuvre. Le juge de première instance a correctement analysé le régime réglementaire et il lui était loisible de conclure que la province avait défini le secteur de l'intérieur de la Colombie-Britannique, et non la zone de Stone Creek elle-même, comme étant le cadre de référence approprié pour déterminer les recettes. Canfor était donc fondée à invoquer le système « sans incidence sur les recettes » que la province avait mis en place. Dans cette zone génératrice de recettes, la province n'avait donc pas subi de perte attribuable à l'incendie.

La tactique de la Couronne consistant à isoler la zone ravagée de Stone Creek du secteur réglementé dont elle fait partie doit être rejetée parce qu'elle constitue une tentative de créer une perte financière qu'elle n'a pas subie. Si l'on permettait à la Couronne de faire fi de sa propre réglementation et de calculer une perte théorique en prenant isolément la zone ravagée de Stone Creek, elle toucherait, avec cette somme, des recettes supérieures à celles qu'elle était censée percevoir en vertu de sa propre réglementation et, dans cette mesure, elle obtiendrait un paiement injustifié au lieu de recevoir la juste indemnisation de la perte prouvée.

La réglementation mise en place par la *Forest Act* est essentielle à l'analyse de la demande de la province. Selon la déposition de l'expert de Canfor, que le juge de première instance a retenue, le système de PVC des droits de coupe était conçu pour garantir qu'il n'y ait jamais de perte. S'il n'y avait pas de perte de recettes, il n'y avait rien à limiter. Les principes régissant la limitation des dommages ne sont donc pas pertinents. De même, l'argument de la Couronne selon lequel il ne fallait pas permettre à Canfor de « transférer » la perte à d'autres titulaires de permis par application de « l'effet stabilisateur » porte à faux. Si aucune perte de recettes n'a été subie, il va de soi qu'aucune perte ne peut être « transférée ».

La Couronne n'a pas non plus prouvé qu'elle avait subi une perte financière en ce qui concerne les arbres réservés. L'exploitation commerciale en terrain escarpé vulnérable aurait été déficitaire et, selon les experts, la Couronne n'en aurait tiré aucune recette additionnelle. Pour ce qui est des aires riveraines (qui auraient pu être exploitées en 1992), le juge de première instance a accepté les calculs de l'expert de Canfor qui montraient que toute perte de la valeur marchande des droits de coupe anticipés était plus que compensée par la perception de versements anticipés pour la récolte immédiate du bois récupéré. Il n'y avait donc pas ici non plus de manque à gagner. Même si la somme tirée des droits de coupe n'est peut-être pas un indicateur financier de la valeur des aires forestières réservées à

2004 SCC 38 (CanLII)

asserted a claim for commercial value and a finding by the trial judge that there was no commercial loss precludes an award of damages on that basis.

The Crown's claim to an environmental premium with respect to the non-harvestable trees is grounded neither in the pleadings nor in the evidence. While the fire damage had both commercial and environmental dimensions, the trial judge was not given the evidence to quantify a distinct ecological or environmental loss. The lack of probative evidence, reliable measurement and proper pleading lie at the root of this case. No evidence was led about the nature of the wildlife, plants and other organisms protected by the environmental resource in question, the uniqueness of the ecosystem, the environmental services provided or recreational opportunities afforded by the resource, or the emotional attachment of the public to the damaged or destroyed area. The Crown's claim to an environmental premium of 20 percent of commercial value is therefore overly arbitrary and simplistic. Less arbitrary techniques are available and will have to be carefully considered when and if properly presented. Courts should not strangle legitimate claims that are properly pleaded because of overly technical objections to novel methods of assessment, but the Crown cannot succeed in an unpleaded claim for ecological or environmental damage simply because the Crown on this issue occupies the moral high ground. The courts and the alleged wrongdoer are entitled to require a proper evidentiary basis.

Canfor's argument that environmental losses should only be recoverable under a special statutory remedy such as the United States' *Comprehensive Environmental Response, Compensation and Liability Act* should be rejected. There is nothing so peculiar about environmental damages as to cause the courts to neglect the potential of the common law which, if developed in a principled and incremental fashion, can assist in achieving the fundamental value of environmental protection. However, a court cannot act on generalizations and unsupported assertions. In the absence of a statutory regime to address environmental loss, the Court must proceed cautiously with the development of the common law. The trial judge in this case rejected the Crown's claim for financial compensation for

des fins environnementales, la Couronne s'est appuyée sur la valeur marchande comme point de référence, et la conclusion du juge de première instance selon laquelle il n'y a eu aucune perte commerciale empêche d'accorder des dommages-intérêts à ce titre.

La réclamation, par la Couronne, d'une indemnité additionnelle pour perte environnementale à l'égard des arbres réservés est dénuée de fondement tant dans les actes de procédure qu'au regard de la preuve. Le dommage causé par le feu avait des dimensions à la fois commerciales et environnementales, mais le dossier ne donnait au juge de première instance aucun moyen de quantifier une perte écologique ou environnementale distincte. L'absence de preuves factuelles, de mesure fiable et d'exposé convenable de la demande dans les actes de procédure est un aspect fondamental en l'espèce. On n'a présenté aucune preuve relativement à la nature de la faune, de la flore et des autres organismes protégés par la ressource environnementale en question, au caractère unique de l'écosystème, aux avantages environnementaux qu'offre la ressource, à ses possibilités récréo-touristiques ou à l'attachement subjectif ou émotif du public à la zone endommagée ou détruite. La réclamation, par la Couronne, d'une indemnité additionnelle de 20 pour 100 de la valeur marchande est donc trop arbitraire et simpliste. Des méthodes moins arbitraires existent et devront faire l'objet d'un examen sérieux quand elles seront valablement présentées. Les tribunaux ne doivent pas paralyser les demandes légitimes présentées comme il se doit en opposant des objections excessivement techniques aux méthodes d'évaluation nouvelles, mais la Couronne ne peut avoir gain de cause en ce qui concerne une demande non alléguée pour un préjudice écologique ou environnemental, simplement parce qu'elle a sur ce point une moralité inattaquable. Le tribunal et le présumé auteur de la faute ont droit d'exiger que la Couronne étaye sa position par des éléments de preuve.

Il faut rejeter l'argument de Canfor selon lequel seule l'adoption d'un recours distinct, dans une loi spéciale telle que la *Comprehensive Environmental Response, Compensation and Liability Act* des États-Unis, permettrait le recouvrement des pertes environnementales. Les dommages-intérêts environnementaux ne sont pas à ce point particuliers que les tribunaux doivent négliger la possibilité que la common law, si elle évolue de façon progressive et conforme aux principes, contribue à concrétiser la valeur fondamentale qu'est la protection de l'environnement. Un tribunal ne peut cependant pas s'autoriser de généralisations et d'assertions non étayées pour intervenir. En l'absence d'un régime législatif encadrant la perte environnementale, la Cour doit user de circonspection dans son élaboration de la common law.

2004 SCC 38 (CanLII)

"environmental loss" on the facts of this case and, on the record, he was right to do so.

Per Bastarache, LeBel and Fish JJ. (dissenting): The Crown's entitlement in this particular case is not limited to the damages that a private landowner would receive. The fact that the Crown is trying to recover commercial value, or using commercial value as a proxy for the recovery of damages, should not limit the Crown's *parens patriae* jurisdiction. The Crown, in seeking damages, is still fulfilling its general duty, its *parens patriae* function to protect the environment and the public's interest in it.

The Crown suffered a compensable loss in respect of harvestable trees despite the CVP system. This system is nothing more than a means of attempting to pass losses on to other forest licensees. Until the fire-damaged forest has grown back to its original state this source of revenue for the Crown — the trees — is lost. The fact that the Crown has a system in place by which it charges higher prices to other customers within the British Columbia Interior should not prevent the Crown from recovering damages for its very real loss. The loss is all the more real when one considers that the Crown lost not only stumpage, but a bundle of rights attached to the harvestable trees through the licensing system.

The argument that the effective rate of stumpage that the Crown receives is the same, forest fire or no forest fire, is faulty and the lower courts' acceptance of it was wrong in fact and in law. There is no guarantee that the CVP system is revenue-neutral. Canfor has only established that the target rate is maintained by charging higher stumpage rates to others. That the target revenue is maintained as a result is by no means certain. Even for a monopolistic supplier of timber licences, as the Crown is in the British Columbia Interior, there are consequences to raising stumpage rates as a result of forest fires, consequences which are too numerous to consider and beyond the competence of the courts. If a court wishes to allow the defence that the Crown has recouped all of its losses from the forest fire by charging higher stumpage rates to other customers in the British Columbia Interior, then it should carry this analysis to its end and inquire into whether the Crown suffered any economic loss as a result of increased stumpage fees charged to other licensees. This type of analysis, however, would be endless and futile and would tax the institutional capacities of the

Le juge de première instance a rejeté la réclamation de la Couronne relative à une indemnité financière pour « perte environnementale » au regard des faits de l'espèce et, au vu du dossier, il a eu raison de le faire.

Les juges Bastarache, LeBel et Fish (dissidents) : Le droit de la Couronne en l'espèce n'est pas limité aux dommages-intérêts qu'un propriétaire ordinaire pourrait obtenir. Le fait que la Couronne cherche à recouvrer la valeur marchande, ou qu'elle utilise celle-ci comme indicateur de valeur en vue de recouvrer des dommages-intérêts, ne doit pas limiter le rôle de la Couronne à titre de *parens patriae*. En demandant des dommages-intérêts, la Couronne remplit toujours sa fonction générale, sa fonction *parens patriae* qui consiste à protéger l'environnement et l'intérêt du public à cet égard.

Même avec le système de PVC, la Couronne a subi une perte indemnisable en ce qui a trait aux arbres récoltables. Ce système n'est rien de plus qu'un mécanisme permettant de transférer les pertes aux autres titulaires de permis d'exploitation forestière. Jusqu'à ce que la forêt ravagée par le feu retrouve son état initial, cette source de recettes — ces arbres — est perdue. Le fait que la Couronne ait mis en place un système par lequel elle demande aux autres clients du secteur de l'intérieur de la Colombie-Britannique un prix plus élevé ne devrait pas l'empêcher d'obtenir un dédommagement pour sa perte bien tangible. La perte est d'autant plus tangible quand on considère que la Couronne a perdu non seulement les droits de coupe, mais encore un ensemble de droits rattachés aux arbres récoltables dans le cadre du régime d'octroi de permis.

L'argument selon lequel le taux effectif des droits de coupe que la Couronne perçoit reste le même, avec ou sans incendie, est erroné et son acceptation par les tribunaux inférieurs était mal fondée en fait et en droit. Rien ne garantit que le système de PVC n'aura aucune incidence sur les recettes. Canfor a établi seulement que le taux cible est maintenu du fait que l'on exige des autres exploitants des droits plus élevés. Il n'est pas du tout acquis que les recettes anticipées soient perçues pour autant. Même pour un fournisseur qui détient le monopole des permis d'exploitation, comme c'est le cas de la Couronne dans le secteur de l'intérieur de la Colombie-Britannique, l'augmentation des droits de coupe par l'effet des incendies de forêt a des conséquences trop nombreuses pour être étudiées, des conséquences qui excèdent la compétence des tribunaux. Si une cour veut admettre le moyen de défense selon lequel la Couronne a recouvré toutes ses pertes causées par l'incendie en imposant des taux des droits de coupe plus élevés aux autres clients du secteur de l'intérieur de la Colombie-Britannique, elle devrait pousser son analyse jusqu'au bout et examiner

2004 SCC 38 (CanLII)

courts. To the extent that the Crown has shown that it has received less stumpage revenue in the Stone Creek fire area as a result of Canfor's negligence, it has established a right of recovery in damages. Even if the CVP system were in fact revenue-neutral, such a finding would be irrelevant to an assessment of damages in tort. The law of damages only requires the Province to establish damages in a proximate sense.

si la Couronne a subi une perte financière en raison de l'augmentation des droits de coupe imposée aux autres titulaires de permis. Une telle analyse serait interminable et futile et grèverait les capacités institutionnelles des tribunaux. Dans la mesure où la Couronne a montré qu'en raison de la négligence de Canfor, elle a perçu moins de droits de coupe dans le secteur ravagé de Stone Creek, elle a prouvé un droit à des dommages-intérêts. Même si le système de PVC a fait en sorte d'éviter toute incidence négative sur les recettes de la Couronne, cette conclusion ne serait pas pertinente à l'évaluation des dommages-intérêts accordés en droit de la responsabilité civile délictuelle. En matière de dommages-intérêts, le droit oblige seulement la province à établir que le préjudice est une conséquence immédiate du délit.

The CVP system cannot be viewed as a form of mitigation. The principles behind mitigation, in particular the principle of economic efficiency, require the injured party to exploit any new "capacity to earn" triggered by the defendant's tort. Mitigation principles do not require the injured party to attempt to recoup its losses by charging higher prices to other customers. The CVP system is therefore not a mitigating factor in the assessment of damages against Canfor.

Le système de PVC ne peut être considéré comme un moyen de limitation du préjudice. Les principes régissant la limitation du préjudice, en particulier le principe de l'efficience économique, commandent que la personne lésée tire parti de la « capacité de gain » nouvellement acquise du fait de la faute du défendeur. Ces principes n'exigent pas que la personne lésée essaie de recouvrer ses pertes en demandant des prix plus élevés aux autres clients. Le système de PVC ne constitue donc pas un facteur de limitation du préjudice dont il faut tenir compte dans l'évaluation des dommages-intérêts réclamés à Canfor.

The rule against double recovery is not violated by allowing the Crown to recover damages in addition to the increased revenue it received from other licensees under the CVP system. To deny the Crown recovery at bar would amount to recognizing in tort law the defence of passing on, which must not be allowed to take hold in Canadian jurisprudence. The trial judge erred in law in accepting the approach for valuing damages advocated by Canfor's expert, because the expert was essentially advocating a legal defence of passing on, even if cast in a factual light.

Le fait d'autoriser la Couronne à recouvrer une indemnité en sus des recettes accrues des droits de coupe perçues des autres titulaires de permis grâce au système de PVC ne viole pas la règle interdisant la double indemnisation. Priver la Couronne de l'indemnité dans le présent pourvoi équivaut à reconnaître en droit de la responsabilité civile délictuelle le moyen de défense fondé sur le transfert de la perte, qu'il ne faut pas laisser s'enraciner dans la jurisprudence canadienne. Le juge de première instance a commis une erreur de droit en acceptant la méthode d'évaluation des dommages-intérêts préconisée par l'expert de Canfor, parce que ce dernier se trouvait essentiellement à préconiser le moyen de défense en droit fondé sur le transfert de la perte, même si c'était sous la forme d'un exposé factuel.

The Province should be allowed to recover damages for the non-harvestable trees in the environmentally sensitive areas, both in the riparian zones and on the steep slopes. These trees have intrinsic value at least equal to their commercial value (i.e., stumpage value), despite their non-commercial use. In the absence of better evidence, the value of nearby harvestable trees can serve as a yardstick to measure the value of the trees on the steep slopes, and Canfor's own expert report includes the commercial value for the non-harvestable trees in the riparian

La province devrait pouvoir recouvrer des dommages-intérêts à l'égard des arbres réservés des zones écosensibles, tant pour ce qui est des aires riveraines que des terrains escarpés. Ces arbres ont une valeur intrinsèque au moins égale à leur valeur marchande (soit la valeur des droits de coupe), en dépit de l'usage non commercial qui en est fait. Faute de meilleure preuve, la valeur des arbres récoltables des aires voisines peut servir de point de référence pour mesurer la valeur des arbres en terrain escarpé, et le rapport de l'expert de Canfor inclut déjà la

2004 SCC 38 (CanLII)

zones. To say as the Court of Appeal did that the value of the trees in question is only a portion of their commercial value is to significantly and fundamentally devalue the Crown's and society's loss. It is agreed with the majority that no damages for an environmental premium can be awarded.

valeur marchande des arbres réservés des aires riveraines. Dire, comme la Cour d'appel, que la valeur des arbres en question n'est qu'une fraction de leur valeur marchande revient à sous-évaluer grandement la perte fondamentale qu'ont subie la Couronne et la société. Comme l'ont décidé les juges majoritaires, il n'y a pas lieu d'accorder une indemnité additionnelle au titre de l'environnement.

John J. L. Hunter, *c.r.*, et *K. Michael Stephens*, pour les intervenants Council of Forest Industries, l'Association des produits forestiers du Canada et Coast Forest & Lumber Association.

Version française du jugement de la juge en chef McLachlin et des juges Iacobucci, Major, Binnie, Arbour et Deschamps rendu par

LE JUGE BINNIE — Pendant l'été de 1992, un incendie de forêt a ravagé la région de Stone Creek, une région de l'intérieur de la Colombie-Britannique située à quelque 35 kilomètres au sud de Prince

1

2004 SCC 38 (CanLII)

The trial judge awarded the Crown $3,575,000 under the first heading (which was an agreed figure), but otherwise dismissed the claim on the basis the Crown had failed to prove a compensable loss with respect either to harvestable or non-harvestable trees. In doing so, he expressly accepted as "compelling" the valuation evidence of C. H. Gairns, Canfor's expert, and rejected the analysis of G. W. Reznik of Deloitte & Touche, the Crown's valuation expert, as "not persuasive".

Le juge de première instance a accordé à la Couronne 3 575 000 $ à l'égard de la première catégorie (un chiffre arrêté de concert), mais a rejeté la demande pour le reste parce que la Couronne n'avait pas prouvé une perte indemnisable soit pour les arbres récoltables, soit pour les arbres réservés. Ce faisant, il a expressément accepté comme [TRADUCTION] « probante » l'expertise de C. H. Gairns, l'expert présenté par Canfor, et il a rejeté l'analyse de G. W. Reznik du cabinet Deloitte & Touche, l'expert en estimation produit par la Couronne, la trouvant [TRADUCTION] « non convaincante ». 4

The Court of Appeal dismissed the Crown's appeal on damages with respect to the harvestable trees, but awarded compensation for "diminution of the value" of the non-harvestable trees at a figure equivalent to one third of their commercial value. The task of assessing the commercial value of the non-harvestable trees, if the parties could not agree to it, was referred back to the trial court. This award is the subject matter of Canfor's appeal.

La Cour d'appel a rejeté l'appel de la Couronne concernant les dommages-intérêts pour ce qui est des arbres récoltables, mais elle a accordé une indemnité en ce qui concerne la « diminution de la valeur » des arbres réservés, la fixant à un tiers de leur valeur marchande. Elle a renvoyé à la cour de première instance la tâche de déterminer la valeur marchande des arbres réservés, advenant que les parties ne puissent s'entendre à ce sujet. Cette indemnité fait l'objet du pourvoi de Canfor. 5

The Crown considers the award of compensation to be inadequate and in its cross-appeal claims the "auction value" of the standing timber in both harvestable and non-harvestable areas as of the date of the fire plus a premium over and above auction value for the degradation of the environment caused by destruction of the non-harvestable trees. In the alternative, it seeks an award of stumpage fees, plus the environmental premium on the non-harvestable trees. Canfor attacks the Crown's methodology and says that, on the evidence, the Crown has been overcompensated, not undercompensated, by the courts in British Columbia.

La Couronne estime l'indemnité insuffisante et réclame, dans son pourvoi incident, la [TRADUCTION] « valeur aux enchères » du bois sur pied tant dans les zones exploitables que dans les zones non exploitables à la date de l'incendie, ainsi qu'une indemnité additionnelle au titre de la dégradation de l'environnement causée par la destruction des arbres protégés. Subsidiairement, elle demande à l'égard des arbres réservés que les droits de coupes lui soient accordés, à quoi s'ajouterait une indemnité pour dommage environnemental. Canfor conteste la méthode employée par la Couronne et affirme que, au vu de la preuve, la Couronne a obtenu des tribunaux de la Colombie-Britannique une indemnité excessive, et non une indemnité insuffisante. 6

The question of compensation for environmental damage is of great importance. As the Court observed in *R. v. Hydro-Québec*, [1997] 3 S.C.R. 213, at para. 85, legal measures to protect the environment "relate to a public purpose of superordinate importance". In *Friends of the Oldman River*

La question de l'indemnité pour dommage environnemental revêt une grande importance. Comme la Cour l'a fait observer dans *R. c. Hydro-Québec*, [1997] 3 R.C.S. 213, par. 85, les mesures législatives prises en vue de protéger l'environnement « visent un objectif public d'une importance supérieure ». 7

2004 SCC 38 (CanLII)

Society v. Canada (Minister of Transport), [1992] 1 S.C.R. 3, the Court declared, at p. 16, that "[t]he protection of the environment has become one of the major challenges of our time." In *Ontario v. Canadian Pacific Ltd.*, [1995] 2 S.C.R. 1031, "stewardship of the natural environment" was described as a fundamental value (para. 55 (emphasis deleted)). Still more recently, in *114957 Canada Ltée (Spraytech, Société d'arrosage) v. Hudson (Town)*, [2001] 2 S.C.R. 241, 2001 SCC 40, the Court reiterated, at para. 1:

. . . our common future, that of every Canadian community, depends on a healthy environment. . . . This Court has recognized that "(e)veryone is aware that individually and collectively, we are responsible for preserving the natural environment . . . environmental protection [has] emerged as a fundamental value in Canadian society" . . . .

Dans *Friends of the Oldman River Society c. Canada (Ministre des Transports)*, [1992] 1 R.C.S. 3, la Cour a déclaré, à la p. 16, que « [l]a protection de l'environnement est devenue l'un des principaux défis de notre époque. » Dans *Ontario c. Canadien Pacifique Ltée*, [1995] 2 R.C.S. 1031, « la *responsabilité* de l'être humain envers l'environnement naturel » a été qualifiée de valeur fondamentale (par. 55 (italiques supprimés)). Encore plus récemment, dans *114957 Canada Ltée (Spraytech, Société d'arrosage) c. Hudson (Ville)*, [2001] 2 R.C.S. 241, 2001 CSC 40, la Cour a affirmé ce qui suit, au par. 1 :

. . . notre avenir à tous, celui de chaque collectivité canadienne, dépend d'un environnement sain. [. . .] Notre Cour a reconnu que « (n)ous savons tous que, individuellement et collectivement, nous sommes responsables de la préservation de l'environnement naturel [. . .] la protection de l'environnement est [. . .] devenue une valeur fondamentale au sein de la société canadienne » . . .

8 If justice is to be done to the environment, it will often fall to the Attorney General, invoking both statutory and common law remedies, to protect the public interest. In this case, the Attorney General has not resorted to statutory remedies (as under s. 161(1) of the *Forest Act*, R.S.B.C. 1979, c. 140 (now R.S.B.C. 1996, c. 157), for payment where timber is damaged or destroyed) but has sought damages at common law. The present appeal raises, therefore, the Attorney General's ability to recover damages for environmental loss, the requirement of proof of such loss and a principled approach to the assessment of environmental compensation at common law.

Pour assurer une juste prise en considération de l'environnement, il revient souvent au procureur général de protéger l'intérêt public en exerçant les voies de droit prévues par la loi et par la common law. En l'espèce, le procureur général ne s'est pas prévalu des recours prévus par la loi (par exemple, le par. 161(1) de la *Forest Act*, R.S.B.C. 1979, ch. 140 (maintenant R.S.B.C. 1996, ch. 157), pour obtenir paiement si du bois est endommagé ou détruit) mais il a réclamé des dommages-intérêts suivant la common law. Le présent pourvoi soulève donc la possibilité, pour le procureur général, de recouvrer des dommages-intérêts pour perte environnementale, les exigences de preuve de cette perte et la méthode permettant d'évaluer l'indemnité pour dommage environnemental en common law.

9 The Crown in right of British Columbia says it sues not only in its capacity as property owner but as the representative of the people of British Columbia, for whom the Crown seeks to maintain an unspoiled environment. Thus the claim for an environmental premium is made "in recognition of the fact that it [the Crown], and the public on whose behalf it owned the Protected Trees, valued them more highly as part of a protected

La Couronne du chef de la Colombie-Britannique dit agir non seulement en qualité de propriétaire foncier, mais encore à titre de représentante des habitants de la Colombie-Britannique, au bénéfice desquels elle cherche à préserver un environnement intact. Ainsi, la revendication d'une indemnité additionnelle au titre de l'environnement est-elle formulée [TRADUCTION] « pour reconnaître le fait qu'elle [la Couronne],

EN APPEL DE LA COUR D'APPEL DU QUÉBEC

Droit constitutionnel — Partage des compétences législatives — Protection de l'environnement — Loi fédérale habilitant des ministres à déterminer quelles substances sont toxiques et à interdire le rejet de ces substances dans l'environnement à moins que certaines conditions particulières soient respectées — La loi fédérale est-elle valide? — Relève-t-elle de la compétence du Parlement de légiférer pour la paix, l'ordre et le bon gouvernement du Canada? — Relève-t-elle de la compétence du Parlement en matière de droit criminel? — Loi canadienne sur la protection de l'environnement, L.R.C. (1985), ch. 16 (4e suppl.), art. 3 «environnement», «substance», 11, 34, 35 — Arrêté d'urgence sur les biphényles chlorés, C.P. 1989-296, art. 6a) — Loi constitutionnelle de 1867, art. 91 (préambule), 91(27).

The respondent allegedly dumped polychlorinated biphenyls (PCBs) into a river in early 1990. It was charged with two infractions under s. 6(*a*) of the *Chlorobiphenyls Interim Order*, which was adopted and enforced pursuant to ss. 34 and 35 of the *Canadian Environmental Protection Act*. Sections 34 and 35 appear in Part II of the Act, entitled "Toxic Substances". Part II deals first with the identification of substances that could pose a risk either to the environment or to human life and health, and then provides a procedure for adding them to the List of Toxic Substances in Schedule I (which contains a list of dangerous substances carried over from pre-existing legislation) and for imposing by regulations requirements respecting the terms and conditions under which substances so listed may be released into the environment. According to s. 11 of the Act, a substance is toxic where "it is entering or may enter the environment" under conditions "having or that may have an immediate or long-term harmful effect on the environment", "constituting or that may constitute a danger to the environment on which human life depends", or "constituting or that may constitute a danger in Canada to human life or health". Section 3 defines a "substance" as "any distinguishable kind of organic or inorganic matter, whether animate or inanimate" and the "environment" as "the components of the Earth". Section 34 provides for the regulation of substances on the List of Toxic Substances. Section 35 is ancillary to s. 34. It provides that where a substance is not listed in Schedule I (or where it is listed but the Ministers of the Environment and of Health believe it is not adequately regulated) and the Ministers believe that immediate action is required, an "interim order" may be made in respect of the substance. Such orders may contain any regulation which could have been made under s. 34, but they remain in effect for only 14 days unless they are approved by the Governor in Council. Failure to comply with regulations made under s. 34 or an order made under s. 35 constitutes an offence under s. 113 of the Act. The respondent brought a motion seeking to have ss. 34 and 35 of the Act as well as s. 6(*a*) of the Interim Order itself declared *ultra vires* the Parliament of Canada on the ground that they do not fall within the ambit of any federal head of power set out in s. 91 of the *Constitution Act, 1867*. The Attorney General of Quebec intervened in support of the respondent's position. The motion was granted in the Court of Québec, and an

L'intimée aurait déversé des biphényles polychlorés (BPC) dans une rivière, au début de 1990. Elle a été accusée d'avoir commis deux infractions en vertu de l'al. 6*a*) de *l'Arrêté d'urgence sur les biphényles chlorés*, qui a été pris et mis à exécution conformément aux art. 34 et 35 de la *Loi canadienne sur la protection de l'environnement*. Les articles 34 et 35 figurent à la partie II de la Loi, intitulée «Substances toxiques». La partie II traite d'abord de l'identification de substances susceptibles de mettre en danger l'environnement ou la vie et la santé humaines, et elle établit ensuite la procédure à suivre pour les ajouter à la liste des substances toxiques de l'annexe I (qui contient une liste de substances dangereuses provenant d'un texte législatif antérieur), et pour imposer, par voie de règlement, les conditions à respecter pour que les substances ainsi énumérées puissent être rejetées dans l'environnement. Selon l'art. 11 de la Loi, est toxique toute substance «qui pénètre ou peut pénétrer dans l'environnement» dans des conditions «de nature à [. . .] avoir, immédiatement ou à long terme, un effet nocif sur l'environnement», à «mettre en danger l'environnement essentiel pour la vie humaine» ou à «constituer un danger au Canada pour la vie ou la santé humaine». L'article 3 définit le terme «substance» comme étant «[t]oute matière organique ou inorganique, animée ou inanimée, distinguable» et le terme «environnement» comme étant l'«[e]nsemble des conditions et des éléments naturels de la terre». L'article 34 prescrit la réglementation des substances inscrites sur la liste des substances toxiques. L'article 35 est accessoire à l'art. 34. Il prévoit que, lorsqu'une substance n'est pas inscrite sur la liste de l'annexe I (ou lorsqu'elle y est inscrite mais que les ministres de l'Environnement et de la Santé croient qu'elle n'est pas réglementée comme il convient) et que les ministres croient qu'une intervention immédiate est nécessaire, un «arrêté d'urgence» peut être pris relativement à celle-ci. Ces arrêtés peuvent comporter les mêmes dispositions qu'un règlement pris aux termes de l'art. 34, mais ils ne demeurent en vigueur que pendant 14 jours, à moins d'être approuvés par le gouverneur en conseil. Le défaut de se conformer à un règlement pris sous le régime de l'art. 34 ou à un arrêté pris aux termes de l'art. 35 constitue une infraction en vertu de l'art. 113 de la Loi. L'intimée a déposé une requête en vue de faire déclarer que les art. 34 et 35 de la Loi ainsi que l'art. 6*a*) de l'arrêté d'urgence lui-même excèdent la compétence du Parlement du Canada pour le motif qu'ils ne relèvent d'aucun chef de compétence fédérale énoncé à l'art. 91 de la *Loi constitutionnelle de 1867*. Le procureur général du Québec est intervenu à l'appui de la position de l'intimée. La requête a été accueillie par la Cour du Québec et un appel interjeté devant la Cour

1997 CanLII 318 (SCC)

appeal to the Superior Court was dismissed. A further appeal to the Court of Appeal was also dismissed.

Held (Lamer C.J. and Sopinka, Iacobucci and Major JJ. dissenting): The appeal should be allowed. The impugned provisions are valid legislation under the criminal law power.

Per La Forest, L'Heureux-Dubé, Gonthier, Cory and McLachlin JJ.: The environment is not, as such, a subject matter of legislation under the *Constitution Act, 1867*. Rather, it is a diffuse subject that cuts across many different areas of constitutional responsibility, some federal, some provincial. If a provision relating to the environment in pith and substance falls within the parameters of any power assigned to the body that enacted the legislation, then it is constitutionally valid.

Under s. 91(27) of the *Constitution Act, 1867*, Parliament has been accorded plenary power to make criminal law in the widest sense. It is entirely within Parliament's discretion to determine what evil it wishes by penal prohibition to suppress and what threatened interest it thereby wishes to safeguard. Under s. 91(27), it is also within the discretion of Parliament to determine the extent of blameworthiness that it wishes to attach to a criminal prohibition. This power is of course subject to the "fundamental justice" requirements of s. 7 of the *Canadian Charter of Rights and Freedoms*, which may dictate a higher level of *mens rea* for serious or "true" crimes. The *Charter* apart, the only qualification that has been attached to Parliament's plenary power over criminal law is that it cannot be employed colourably. Like other legislative powers, it cannot permit Parliament simply by legislating in the proper form to colourably invade areas of exclusively provincial legislative competence. To determine whether such an attempt is made, it is appropriate to determine whether a legitimate public purpose underlies the prohibition.

The protection of the environment, through prohibitions against toxic substances, constitutes a wholly legitimate public objective in the exercise of the criminal law power. Protection of the environment is an international problem that requires action by governments at all levels. The legitimate use of the criminal law in no way constitutes an encroachment on provincial legislative power, though it may affect matters falling within the latter's ambit. Parliament may validly enact prohibitions

supérieure a été rejeté. Un autre appel interjeté devant la Cour d'appel a, lui aussi, été rejeté.

Arrêt (le juge en chef Lamer et les juges Sopinka, Iacobucci et Major sont dissidents): Le pourvoi est accueilli. Les dispositions contestées sont valides en vertu de la compétence en matière de droit criminel.

Les juges La Forest, L'Heureux-Dubé, Gonthier, Cory et McLachlin: L'environnement n'est pas, comme tel, un domaine de compétence législative en vertu de la *Loi constitutionnelle de 1867*. Il s'agit plutôt d'un sujet diffus qui touche plusieurs domaines différents de responsabilité constitutionnelle, dont certains sont fédéraux et d'autres provinciaux. Si une disposition relative à l'environnement relève, de par son caractère véritable, de l'un des pouvoirs attribués au corps législatif qui l'a adoptée, elle est alors constitutionnellement valide.

En vertu du par. 91(27) de la *Loi constitutionnelle de 1867*, le Parlement a été investi du plein pouvoir d'adopter des règles de droit criminel au sens le plus large du terme. Il relève entièrement du pouvoir discrétionnaire du Parlement de décider quel mal il désire supprimer au moyen d'une interdiction pénale et quel intérêt menacé il souhaite ainsi sauvegarder. Aux termes du par. 91(27), il relève également du pouvoir discrétionnaire du Parlement de déterminer le degré de culpabilité qu'il souhaite attacher à une interdiction criminelle. Ce pouvoir est assujetti, naturellement, aux exigences de la «justice fondamentale» prescrites à l'art. 7 de la *Charte canadienne des droits et libertés*, qui peuvent dicter un degré plus élevé de *mens rea* dans le cas des crimes graves ou «proprement dits». La *Charte* mise à part, la seule réserve dont a été assorti le plein pouvoir du Parlement en matière de droit criminel est qu'il ne peut pas être utilisé de façon déguisée. Comme d'autres pouvoirs législatifs, il ne peut pas permettre au Parlement, simplement en légiférant de la manière appropriée, d'empiéter spécieusement sur des domaines de compétence législative provinciale exclusive. Pour déterminer si on est en présence d'une telle tentative, il convient de déterminer si l'interdiction se fonde sur un objectif public légitime

La protection de l'environnement, au moyen d'interdictions concernant les substances toxiques, constitue un objectif public tout à fait légitime dans l'exercice de la compétence en matière de droit criminel. La protection de l'environnement est un problème international qui exige une action des gouvernements de tous les niveaux. Le recours légitime au droit criminel ne constitue nullement un empiétement sur la compétence législative provinciale, bien qu'il puisse toucher à des matières qui en

1997 CanLII 318 (SCC)

under its criminal law power against specific acts for the purpose of preventing pollution. This does not constitute an interference with provincial legislative powers. The use of the federal criminal law power in no way precludes the provinces from exercising their extensive powers under s. 92 to regulate and control the pollution of the environment either independently or in co-operation with federal action.

Broad wording is unavoidable in environmental protection legislation because of the breadth and complexity of the subject. The effect of requiring greater precision would be to frustrate the legislature in its attempt to protect the public against the dangers flowing from pollution. Part II of the *Canadian Environmental Protection Act* does not deal with the protection of the environment generally, but simply with the control of toxic substances that may be released into the environment under certain restricted circumstances, through a series of prohibitions to which penal sanctions are attached. There was no intention that the Act should bar the use, importation or manufacture of all chemical products, but rather that it should affect only those substances that are dangerous to the environment, and then only if they are not otherwise regulated by law. The broad purpose and effect of Part II is to provide a procedure for assessing whether out of the many substances that may conceivably fall within the ambit of s. 11, some should be added to the List of Toxic Substances in Schedule I and, when an order to this effect is made, whether to prohibit the use of the substance so added in the manner provided in the regulations made under s. 34(1) subject to a penalty. These listed substances, toxic in the ordinary sense, are those whose use in a manner contrary to the regulations the Act ultimately prohibits. This is a limited prohibition applicable to a restricted number of substances. The prohibition is enforced by a penal sanction and is undergirded by a valid criminal objective, and so is valid criminal legislation. Specific targeting of toxic substances based on individual assessment avoids resort to unnecessarily broad prohibitions and their impact on the exercise of provincial powers.

The interim order is also valid under s. 91(27) of the *Constitution Act, 1867*. PCBs are not only highly toxic but long lasting and very slow to break down in water, air or soil. They are also extremely mobile. As well,

relèvent. Le Parlement peut, en vertu de sa compétence en matière de droit criminel, édicter validement des interdictions relatives à des actes précis en vue de prévenir la pollution. Cela ne constitue pas un empiétement sur les compétences législatives d'une province. Le recours à la compétence fédérale en matière de droit criminel n'empêche nullement les provinces d'exercer les vastes pouvoirs que leur confère l'art. 92 pour réglementer et limiter la pollution de l'environnement de façon indépendante ou de concert avec des mesures fédérales.

La formulation large est inévitable dans une loi sur la protection de l'environnement en raison de l'ampleur et de la complexité du sujet. Exiger une plus grande précision aurait pour effet de faire échouer la législature dans sa tentative de protéger le public contre les dangers découlant de la pollution. La partie II de la *Loi canadienne sur la protection de l'environnement* traite non pas de la protection de l'environnement en général, mais simplement du contrôle de substances toxiques qui peuvent être rejetées dans l'environnement dans certains circonstances limitées, au moyen d'une série d'interdictions assorties de sanctions pénales. La Loi visait non pas à interdire l'utilisation, l'importation ou la fabrication de tous les produits chimiques, mais plutôt à ne toucher que les substances qui sont dangereuses pour l'environnement, et seulement si elles ne sont pas par ailleurs réglementées par la loi. La partie II a généralement pour objet et pour effet de prescrire une procédure permettant d'évaluer si, parmi les nombreuses substances qui peuvent, en théorie, être visées par l'art. 11, certaines devraient être ajoutées à la liste des substances toxiques de l'annexe I, et de déterminer, lorsqu'on prend un arrêté en ce sens, s'il y a lieu d'interdire, sous peine de sanction, l'utilisation de la substance ainsi ajoutée de la manière prévue dans le règlement pris en vertu du par. 34(1). Ces substances inscrites sur la liste, toxiques au sens ordinaire du terme, sont celles que la Loi interdit, en fin de compte, d'utiliser d'une manière contraire au règlement. C'est une interdiction limitée qui s'applique à un nombre limité de substances. L'interdiction est assortie d'une peine en cas de non-respect et s'appuie sur un objectif pénal valide et est donc une mesure législative pénale valide. Le ciblage précis de substances toxiques fondé sur une évaluation individuelle évite de recourir à des interdictions inutilement larges et à leur incidence sur l'exercice de pouvoirs provinciaux.

L'arrêté d'urgence est également valide en vertu du par. 91(27) de la *Loi constitutionnelle de 1867*. Les BPC sont non seulement très toxiques, mais encore ils durent longtemps et se décomposent très lentement dans l'eau,

1997 CanLII 318 (SCC)

they dissolve readily in fat tissues and other organic compounds, with the result that they move up the food chain. They pose significant risks of serious harm to both animals and humans.

It is not necessary to consider whether the impugned provisions fall within Parliament's jurisdiction to make laws for the peace, order and good government of Canada.

Per Lamer C.J. and Sopinka, Iacobucci and Major JJ. (dissenting): The pith and substance of Part II of the *Canadian Environmental Protection Act* lies in the wholesale regulation by federal agents of any and all substances which may harm any aspect of the environment or which may present a danger to human life or health. While Parliament has been given broad and exclusive power to legislate in relation to criminal law by virtue of s. 91(27) of the *Constitution Act, 1867*, the criminal law power has always been made subject to two requirements: laws purporting to be upheld under s. 91(27) must contain prohibitions backed by penalties, and they must be directed at a legitimate public purpose. Although the protection of human health has been held to be a legitimate public purpose, the impugned legislation goes well beyond this goal. However, the protection of the environment is also a valid purpose of the criminal law.

While the impugned provisions have a legitimate criminal purpose, they fail to meet the other half of the test. They are not intended to prohibit environmental pollution, but simply to regulate it, and so do not qualify as criminal law under s. 91(27). While a criminal law may validly contain exemptions for certain conduct without losing its status as criminal law, in order to have an exemption, there must first be a prohibition in the legislation from which that exemption is derived. There are no such prohibitions in the legislation at issue here. Sections 34 and 35 do not define an offence at all. Rather, they establish a regulatory regime whereby the Ministers of Health and the Environment can place substances on the List of Toxic Substances and define the norms of conduct regarding those substances on an ongoing basis. It would be an odd crime whose definition was made entirely dependent on the discretion of the executive. The prohibitions in s. 113, such as they are, are ancillary to the regulatory scheme, not the other way around. This strongly suggests that the focus of the legislation is regulation rather than prohibition. Section

l'air ou le sol. Ils sont aussi extrêmement mobiles. De même, ils se dissolvent facilement dans les tissus adipeux et autres composés organiques, de sorte qu'ils remontent la chaîne alimentaire. Ils posent des risques importants de préjudice grave pour les animaux et les humains.

Il n'est pas nécessaire de déterminer si les dispositions contestées relèvent de la compétence du Parlement pour légiférer relativement à la paix, à l'ordre et au bon gouvernement du Canada.

Le juge en chef Lamer et les juges Sopinka, Iacobucci et Major (dissidents): Le caractère véritable de la partie II de la *Loi canadienne sur la protection de l'environnement* réside dans la réglementation systématique, par des organismes fédéraux, de toutes les substances susceptibles d'avoir un effet nocif sur un aspect de l'environnement, ou de présenter un danger pour la vie ou la santé humaine. Même si le par. 91(27) de la *Loi constitutionnelle de 1867* a attribué au Parlement la compétence vaste et exclusive pour légiférer en matière de droit criminel, la compétence en matière de droit criminel a toujours été assujettie à deux exigences: les lois censées être maintenues en vertu du par. 91(27) doivent contenir des interdictions assorties de peines et elles doivent viser un objectif public légitime. Bien qu'il ait été déterminé que la protection de la santé humaine constitue un objectif public légitime, la mesure législative contestée va bien au-delà de cet objectif. Cependant, la protection de l'environnement constitue également un objectif valide du droit criminel.

Même si les dispositions contestées visent un objectif légitime en matière criminelle, elles ne satisfont pas à l'autre moitié du critère. Elles visent non pas à interdire la pollution de l'environnement, mais simplement à la réglementer et ne peuvent donc pas être qualifiées de droit criminel au sens du par. 91(27). Bien qu'une loi en matière criminelle puisse validement comporter des exemptions relativement à certaines conduites sans pour autant perdre son caractère, pour qu'il y ait exemption, il faut d'abord qu'il y ait une interdiction dans la loi dont découle cette exemption. La loi faisant l'objet du présent pourvoi ne contient aucune interdiction de cette nature. Les articles 34 et 35 ne définissent pas une infraction. Ils établissent plutôt un régime de réglementation en vertu duquel les ministres de la Santé et de l'Environnement peuvent, de manière continue, inscrire des substances sur la liste des substances toxiques et définir les normes de conduite relatives à ces substances. Ce serait un crime singulier dont la définition a été laissée à l'entière discrétion du pouvoir exécutif. Les interdictions prévues à l'art. 113, telles qu'elles existent,

1997 CanLII 318 (SCC)

34 allows for the regulation of every conceivable aspect of toxic substances. It is highly unlikely that Parliament intended to leave the criminalization of such a sweeping area of behaviour to the discretion of the Ministers. Moreover, the equivalency provisions in s. 34(6) of the Act, under which a province may be exempted from the application of regulations if it already has equivalent regulations in force there, creates a strong presumption that the federal regulations are regulatory, not criminal, since any environmental legislation enacted by the provinces must be regulatory in nature. Finally, granting Parliament the authority to regulate so completely the release of substances into the environment by determining whether or not they are "toxic" would inescapably preclude the possibility of shared environmental jurisdiction and would infringe severely on other heads of power assigned to the provinces.

Assuming that the protection of the environment and of human life and health against any and all potentially harmful substances could be a "new matter" which would fall under the peace, order and good government power, that matter does not have the required singleness, distinctiveness and indivisibility that clearly distinguishes it from matters of provincial concern. The definition of "toxic substances" in s. 11, combined with the definition of "substance" found in s. 3, is an all-encompassing definition with no clear limits. While s. 15 does specify some criteria to refine the notion of "toxic substance", it does not narrow the broad definition of that notion, but only offers investigatory guidelines. Moreover, the investigatory process provided for in s. 15 can be totally bypassed where an interim order is issued pursuant to s. 35. With respect to geographical limits, although the preamble of the Act suggests that its ambit is restricted to those substances that "cannot always be contained within geographic boundaries", nowhere in Part II or the enabling provisions at issue is there any actual limitation based on territorial considerations. Part II's failure to distinguish between types of toxic substances, either on the basis of degree of persistence and diffusion into the environment and the severity of their harmful effect or on the basis of their extraprovincial aspects, demonstrates that the enabling provisions lack the necessary singleness, distinctiveness and indivisibility. To the extent that Part II of the Act includes the regulation of "toxic substances" that may only affect the

sont accessoires au régime de réglementation, et non l'inverse. Cela laisse fortement entendre que la Loi est axée sur la réglementation plutôt que sur les interdictions. L'article 34 permet la réglementation de tous les aspects imaginables des substances toxiques. Il est fort improbable que le Parlement ait eu l'intention de laisser la criminalisation d'un aussi vaste domaine de comportement à la discrétion des ministres. De plus, les dispositions équivalentes mentionnées au par. 34(6) de la Loi, selon lequel une province peut être exemptée de l'application des règlements lorsque des dispositions équivalentes à ces règlements y sont déjà en vigueur, laissent fortement présumer que les règlements fédéraux sont de nature réglementaire et non pas criminelle, puisque toute loi en matière d'environnement adoptée par une province doit être de nature réglementaire. Enfin, le fait d'accorder au Parlement le pouvoir de réglementer de façon aussi complète le rejet de substances dans l'environnement par la détermination de leur nature «toxique» ou non éliminerait inévitablement la possibilité d'avoir une compétence partagée en matière d'environnement et empiéterait de façon considérable sur d'autres chefs de compétence provinciale.

Tenant pour acquis que la protection de l'environnement et de la vie et de la santé humaines contre toutes les substances potentiellement nocives pourrait constituer une «nouvelle matière» relevant de la compétence concernant la paix, l'ordre et le bon gouvernement, cette matière n'a pas l'unicité, la particularité et l'indivisibilité requises qui la distinguent clairement des matières d'intérêt provincial. La définition des «substances toxiques» à l'art. 11, conjuguée à celle du mot «substance» à l'art. 3, est une définition générale sans limites précises. Même si l'art. 15 énonce effectivement certains critères pour raffiner la notion de «substance toxique», il ne restreint pas la définition large donnée à cette notion, mais ne fait qu'offrir des lignes directrices en matière d'enquête. En outre, le processus d'enquête prévu à l'art. 15 peut être complètement évité lorsqu'un arrêté d'urgence est pris conformément à l'art. 35. Quant aux limites géographiques, même si le préambule de la Loi laisse entendre qu'elle ne s'applique qu'aux substances «qu'il n'est pas toujours possible de circonscrire au territoire touché», ni la partie II ni les dispositions habilitantes en cause ne contiennent une véritable restriction fondée sur des considérations territoriales. Le fait que la partie II n'établisse aucune distinction entre des types de substances toxiques, que ce soit en fonction de leur degré de persistance et de diffusion dans l'environnement et de la sévérité de leur effet nocif, ou de leurs aspects extraprovinciaux, démontre que les dispositions habilitantes n'ont pas l'unicité, la particularité et

1997 CanLII 318 (SCC)

particular province within which they originate, the appellant bears a heavy burden to demonstrate that provinces themselves would be incapable of regulating such toxic emissions, a burden which it has not discharged.

The impugned legislation cannot be justified as an exercise of the federal trade and commerce power.

l'indivisibilité requises. Dans la mesure où la partie II de la Loi inclut la réglementation de «substances toxiques» susceptibles de toucher uniquement la province où elles émanent, l'appelant a le lourd fardeau d'établir que les provinces elles-mêmes seraient incapables de réglementer ces émissions toxiques, fardeau dont il ne s'est pas acquitté.

La loi contestée ne peut pas se justifier en tant qu'exercice de la compétence fédérale en matière d'échanges et de commerce.

Version française des motifs du juge en chef Lamer et des juges Sopinka, Iacobucci et Major rendus par

LE JUGE EN CHEF et LE JUGE IACOBUCCI (dissidents) — Le présent pourvoi fait suite à un arrêté d'urgence pris en 1989 par le ministre de l'Envi- 1

1997 CanLII 318 (SCC)

Environment of Canada, the Honourable Lucien Bouchard. It restricted the emission of chlorobiphenyls ("PCBs") to 1 gram per day. The respondent, Hydro-Québec, was charged with breaching this Interim Order and challenged the charges by claiming that the Interim Order, as well as the underlying provisions supporting it, were *ultra vires* Parliament as invading provincial territory.

2 We have had the advantage of reading the lucid reasons of La Forest J. While we share his concern for the protection of the environment, we are of the view that the impugned provisions cannot be justified under s. 91 of the *Constitution Act, 1867*, and are therefore *ultra vires* the federal government. Because of our disagreement with our colleague's approach, we will set out the relevant factual and judicial background.

1. Facts

3 The respondent Hydro-Québec was charged with two infractions under s. 6(*a*) of the *Chlorobiphenyls Interim Order*, P.C. 1989-296 (hereinafter "the Interim Order"), adopted and enforced pursuant to ss. 34 and 35 of the *Canadian Environmental Protection Act*, R.S.C., 1985, c.16 (4th Supp.). It was alleged that the respondent:

[TRANSLATION]

[1] From January 1 to January 3, 1990, did unlawfully release more than 1 gram per day of chlorobiphenyls into the environment contrary to s. 6(*a*) of the *Chlorobiphenyls Interim Order*, P.C. 1989-29[6] of February 23, 1989, thereby committing an offence under ss. 113(*i*) and (*o*) of the *Canadian Environmental Protection Act*, R.S.C., 1985, c. 16 (4th Supp.);

[2] On or about January 8, 1990, following the release into the environment, in contravention of s. 6(*a*) of the *Chlorobiphenyls Interim Order*, P.C. 1989-296 of February 23, 1989, of a substance specified in Schedule I to the *Canadian Environmental Protection Act*, R.S.C., 1985, c. 16 (4th Supp.), to wit: chlorobiphenyls . . . did fail to report the matter to an inspector as soon as possible in the circumstances contrary to s. 36(1)(*a*) of the said Act, thereby com-

ronnement de l'époque, l'honorable Lucien Bouchard. L'arrêté limitait à 1 g par jour les émissions de biphényles chlorés (BPC). L'intimée Hydro-Québec, accusée d'avoir contrevenu à cet arrêté d'urgence, a contesté les accusations portées contre elle en soutenant que l'arrêté d'urgence et les dispositions le sous-tendant excédaient la compétence du Parlement, car ils envahissaient un domaine de compétence provinciale.

Nous avons pris connaissance des motifs limpides du juge La Forest. Bien que nous partagions son intérêt pour la protection de l'environnement, nous sommes d'avis que les dispositions contestées ne peuvent être justifiées en vertu de l'art. 91 de la *Loi constitutionnelle de 1867* et qu'elles excèdent donc la compétence du gouvernement fédéral. Vu notre désaccord avec le point de vue adopté par notre collègue, nous allons exposer les contextes factuel et judiciaire pertinents.

1. Les faits

L'intimée Hydro-Québec a été accusée de deux infractions en vertu de l'al. 6*a*) de l'*Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-296 (ci-après l'«arrêté d'urgence»), qui a été pris et mis à exécution conformément aux art. 34 et 35 de la *Loi canadienne sur la protection de l'environnement*, L.R.C. (1985), ch. 16 (4e suppl.). L'intimée a été accusée des faits suivants:

[1] Du 1er janvier au 3 janvier 1990, a illégalement rejeté, dans l'environnement, plus d'un gramme par jour de biphényles chlorés contrairement à l'alinéa 6*a*) de *l'Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-29[6] du 23 février 1989, commettant ainsi l'infraction prévue aux alinéas 113*i*) et *o*) de la *Loi canadienne sur la protection de l'environnement*, L.R.C. de 198[5], 4e suppl., c. 16;

[2] Le ou vers le 8 janvier 1990, après le rejet dans l'environnement en violation de l'alinéa 6*a*) de *l'Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-296 du 23 février 1989, d'une substance inscrite à l'annexe I de la *Loi canadienne sur la protection de l'environnement*, L.R.C. de 198[5], 4e suppl., c. 16, à savoir: des biphényles chlorés [. . .] a omis de faire rapport de la situation à l'inspecteur dans les meilleurs délais possible, contrairement à l'alinéa 36(1)*a*)

1997 CanLII 318 (SCC)

mitting an offence under ss. 113(*h*) and (*o*) of the said Act.

On July 23, 1990, the respondent pleaded not guilty to both these charges. It brought a motion before the Court of Québec to have ss. 34 and 35 of the Act as well as s. 6(*a*) of the Interim Order declared unconstitutional as outside the federal government's sphere of competence. On August 12, 1991, the court granted this motion and struck down the provisions in question: [1991] R.J.Q. 2736. An appeal to the Quebec Superior Court was dismissed on August 6, 1992 ([1992] R.J.Q. 2159), as was a further appeal to the Quebec Court of Appeal, on February 14, 1995 ([1995] R.J.Q. 398, 67 Q.A.C. 161, 17 C.E.L.R. (N.S.) 34, [1995] Q.J. No. 143 (QL)). On October 12, 1995, this Court granted leave to appeal ([1995] 4 S.C.R. vii) and a constitutional question, set forth below, was stated.

2. Relevant Statutory and Constitutional Provisions

Chlorobiphenyls Interim Order, P.C. 1989-296

6. The quantity of chlorobiphenyls that may be released into the environment shall not exceed 1 gram per day in respect of any item of equipment or any receptacle or material containing equipment in the course of the operation, servicing, maintenance, decommissioning, transporting or storage of

(*a*) electrical capacitors and electrical transformers and associated electrical equipment manufactured in or imported into Canada before July 1, 1980;

Canadian Environmental Protection Act, R.S.C., 1985, c. 16 (4th Supp.)

It is hereby declared that the protection of the environment is essential to the well-being of Canada.

WHEREAS the presence of toxic substances in the environment is a matter of national concern;

de ladite loi, commettant ainsi l'infraction prévue aux alinéas 113*h*) et *o*) de ladite Loi.

Le 23 juillet 1990, l'intimée a plaidé non coupable à ces deux accusations. Elle a déposé une requête devant la Cour du Québec en vue de faire déclarer inconstitutionnels les art. 34 et 35 de la Loi ainsi que l'al. 6*a*) de l'arrêté d'urgence, pour le motif qu'ils excédaient le champ de compétence du gouvernement fédéral. Le 12 août 1991, la cour a accueilli la requête et annulé les dispositions en question: [1991] R.J.Q. 2736. L'appel interjeté devant la Cour supérieure du Québec a été rejeté le 6 août 1992 ([1992] R.J.Q. 2159), et un autre appel interjeté devant la Cour d'appel du Québec a été rejeté le 14 février 1995 ([1995] R.J.Q. 398, 67 Q.A.C. 161, 17 C.E.L.R. (N.S.) 34, [1995] A.Q. nº 143 (QL)). Le 12 octobre 1995, notre Cour a accordé l'autorisation de pourvoi ([1995] 4 R.C.S. vii) et formulé la question constitutionnelle reproduite plus loin.

2. Les dispositions législatives et constitutionnelles pertinentes

Arrêté d'urgence sur les biphényles chlorés, C.P. 1989-296

6. La quantité de biphényles chlorés qui peut être rejetée, dans l'environnement, dans une région du Canada ne peut excéder 1 g par jour pour chaque pièce d'équipement ou contenant ou emballage d'équipement au cours de l'exploitation, de l'entretien, de la maintenance, de la mise hors service, du transport ou de l'entreposage de l'équipement suivant:

a) des condensateurs électriques ainsi que des transformateurs électriques et de l'équipement connexe, fabriqués ou importés au Canada avant le 1er juillet 1980;

Loi canadienne sur la protection de l'environnement, L.R.C. (1985), ch. 16 (4e suppl.)

Il est déclaré que la protection de l'environnement est essentielle au bien-être de la population du Canada.

Attendu:

que la présence de substances toxiques dans l'environnement est une question d'intérêt national;

1997 CanLII 318 (SCC)

WHEREAS toxic substances, once introduced into the environment, cannot always be contained within geographic boundaries;

WHEREAS the Government of Canada in demonstrating national leadership should establish national environmental quality objectives, guidelines and codes of practice;

WHEREAS it is necessary to control the dispersal of nutrients in Canadian waters;

WHEREAS some of the laws under which federal lands, works and undertakings are administered or regulated do not make provision for environmental protection in respect of federal lands, works and undertakings;

AND WHEREAS Canada must be able to fulfil its international obligations in respect of the environment;

3. (1) In this Act,

. . .

"environment" means the components of the Earth and includes

(*a*) air, land and water,

(*b*) all layers of the atmosphere,

(*c*) all organic and inorganic matter and living organisms, and

(*d*) the interacting natural systems that include components referred to in paragraphs (*a*) to (*c*);

. . .

"substance" means any distinguishable kind of organic or inorganic matter, whether animate or inanimate, and includes

(*a*) any matter that is capable of being dispersed in the environment or of being transformed in the environment into matter that is capable of being so dispersed or that is capable of causing such transformations in the environment,

(*b*) any element or free radical,

(*c*) any combination of elements of a particular molecular identity that occurs in nature or as a result of a chemical reaction, and

(*d*) complex combinations of different molecules that originate in nature or are the result of chemical reactions but that could not practicably be formed by simply combining individual constituents,

qu'il n'est pas toujours possible de circonscrire au territoire touché la dispersion de substances toxiques ayant pénétré dans l'environnement;

que le gouvernement fédéral, à titre de chef de file national en la matière, se doit d'établir des objectifs, des directives et des codes de pratiques nationaux en matière de qualité de l'environnement;

qu'il est nécessaire de limiter la dispersion des substances nutritives dans les eaux canadiennes;

que la législation régissant les terres, entreprises et ouvrages fédéraux ne prévoit pas toujours à leur égard de mesures de protection de l'environnement;

que le Canada se doit d'être en mesure de respecter ses obligations internationales en matière d'environnement,

3. (1) Les définitions qui suivent s'appliquent à la présente loi.

. . .

«environnement» Ensemble des conditions et des éléments naturels de la terre, notamment:

a) l'air, l'eau et le sol;

b) toutes les couches de l'atmosphère;

c) toutes les matières organiques et inorganiques ainsi que les êtres vivants;

d) les systèmes naturels en interaction qui comprennent les éléments visés aux alinéas *a*) à *c*).

. . .

«substance» Toute matière organique ou inorganique, animée ou inanimée, distinguable. La présente définition vise notamment:

a) les matières susceptibles soit de se disperser dans l'environnement, soit de s'y transformer en matières dispersables, ainsi que les matières susceptibles de provoquer de telles transformations dans l'environnement;

b) les radicaux libres ou les éléments;

c) les combinaisons d'éléments à l'identité moléculaire précise soit naturelles, soit consécutives à une réaction chimique;

d) des combinaisons complexes de molécules différentes, d'origine naturelle ou résultant de réactions chimiques, mais qui ne pourraient se former dans la pratique par la simple combinaison de leurs composants individuels.

1997 CanLII 318 (SCC)

and, except for the purposes of sections 25 to 32, includes

(*e*) any mixture that is a combination of substances and does not itself produce a substance that is different from the substances that were combined,

(*f*) any manufactured item that is formed into a specific physical shape or design during manufacture and has, for its final use, a function or functions dependent in whole or in part on its shape or design, and

(*g*) any animate matter that is, or any complex mixtures of different molecules that are, contained in effluents, emissions or wastes that result from any work, undertaking or activity;

11. For the purposes of this Part, a substance is toxic if it is entering or may enter the environment in a quantity or concentration or under conditions

(*a*) having or that may have an immediate or long-term harmful effect on the environment;

(*b*) constituting or that may constitute a danger to the environment on which human life depends; or

(*c*) constituting or that may constitute a danger in Canada to human life or health.

15. For the purpose of assessing whether a substance is toxic or is capable of becoming toxic, or for the purpose of assessing whether to control, or the manner in which to control, a substance, either Minister may

(*a*) collect data and conduct investigations respecting

(i) the nature of the substance,

(ii) the presence of the substance in the environment and the effect of its presence on the environment or on human life or health,

(iii) the extent to which the substance can become dispersed and will persist in the environment,

(iv) the ability of the substance to become incorporated or accumulate in biological tissues or to interfere with biological processes,

(v) methods of controlling the presence of the substance in the environment,

(vi) methods for testing the effects of the presence of the substance in the environment,

(vii) development and use of alternatives to the substance,

Elle vise aussi, sauf pour l'application des articles 25 à 32:

e) les mélanges combinant des substances et ne produisant pas eux-mêmes une substance différente de celles qui ont été combinées;

f) les articles manufacturés dotés d'une forme ou de caractéristiques matérielles précises pendant leur fabrication et qui ont, pour leur utilisation finale, une ou plusieurs fonctions en dépendant, en tout ou en partie;

g) les matières animées ou les mélanges complexes de molécules différentes qui sont contenus dans les effluents, les émissions ou les déchets attribuables à des travaux, des entreprises ou des activités.

11. Pour l'application de la présente partie, est toxique toute substance qui pénètre ou peut pénétrer dans l'environnement en une quantité ou une concentration ou dans des conditions de nature à:

a) avoir, immédiatement ou à long terme, un effet nocif sur l'environnement;

b) mettre en danger l'environnement essentiel pour la vie humaine;

c) constituer un danger au Canada pour la vie ou la santé humaine.

15. Afin de déterminer si une substance est effectivement ou potentiellement toxique, d'apprécier s'il y a lieu de prendre des mesures de contrôle et, dans l'affirmative, de déterminer la nature de celles-ci, l'un ou l'autre ministre peut:

a) recueillir des données sur cette substance et mener des enquêtes sur:

(i) sa nature,

(ii) sa présence dans l'environnement et l'effet qu'elle a sur celui-ci, la vie ou la santé humaine,

(iii) la mesure dans laquelle elle peut se disperser et persister dans l'environnement,

(iv) sa capacité d'infiltration et d'accumulation dans les tissus biologiques ainsi que sa capacité de nuire à des processus biologiques,

(v) les méthodes permettant de limiter sa présence dans l'environnement,

(vi) les méthodes de vérification des effets de sa présence dans l'environnement,

(vii) la mise au point et l'utilisation de substituts,

1997 CanLII 318 (SCC)

(viii) quantities, uses and disposal of the substance, and

(ix) methods of reducing the amount of the substance used, produced or released into the environment;

(*b*) correlate and evaluate any data collected pursuant to paragraph (*a*) and publish results of any investigations carried out pursuant to that paragraph; and

(*c*) provide information and consultative services and make recommendations respecting measures to control the presence of the substance in the environment.

34. (1) Subject to subsection (3), the Governor in Council may, on the recommendation of the Ministers and after the federal-provincial advisory committee is given an opportunity to provide its advice under section 6, make regulations with respect to a substance specified on the List of Toxic Substances in Schedule I, including regulations providing for, or imposing requirements respecting,

(*a*) the quantity or concentration of the substance that may be released into the environment either alone or in combination with any other substance from any source or type of source;

(*b*) the places or areas where the substance may be released;

(*c*) the commercial, manufacturing or processing activity in the course of which the substance may be released;

(*d*) the manner in which and conditions under which the substance may be released into the environment, either alone or in combination with any other substance;

(*e*) the quantity of the substance that may be manufactured, processed, used, offered for sale or sold in Canada;

(*f*) the purposes for which the substance or a product containing the substance may be imported, manufactured, processed, used, offered for sale or sold;

(*g*) the manner in which and conditions under which the substance or a product containing the substance may be imported, manufactured, processed or used;

(*h*) the quantities or concentrations in which the substance may be used;

(*i*) the quantities or concentrations of the substance that may be imported;

(viii) ses quantités, ses utilisations et son élimination,

(ix) les méthodes permettant de réduire la quantité utilisée, produite ou rejetée dans l'environnement;

b) corréler et analyser les données recueillies et publier le résultat des enquêtes effectuées;

c) fournir des services d'information et de consultation et faire des recommandations concernant les mesures à prendre pour limiter la présence de cette substance dans l'environnement.

34. (1) Sous réserve du paragraphe (3), le gouverneur en conseil peut, sur recommandation des ministres et après avoir donné au comité consultatif fédéro-provincial la possibilité de formuler ses conseils dans le cadre de l'article 6, prendre des règlements concernant une substance inscrite sur la liste de l'annexe I, notamment en ce qui touche:

a) la quantité ou la concentration dans lesquelles elle peut être rejetée dans l'environnement, seule ou combinée à une autre substance émise par quelque source ou type de sources que ce soit;

b) les lieux ou zones de rejet;

c) les activités commerciales, de fabrication ou de transformation au cours desquelles le rejet est permis;

d) les modalités et conditions de son rejet, seule ou en combinaison avec une autre substance;

e) la quantité qui peut être fabriquée, transformée, utilisée, mise en vente ou vendue au Canada;

f) les fins pour lesquelles la substance ou un produit qui en contient peut être importé, fabriqué, transformé, utilisé, mis en vente ou vendu;

g) les modalités et conditions d'importation, de fabrication, de transformation ou d'utilisation de la substance ou d'un produit qui en contient;

h) la quantité ou la concentration dans lesquelles celle-ci peut être utilisée;

i) la quantité ou la concentration dans lesquelles celle-ci peut-être importée;

1997 CanLII 318 (SCC)

(*j*) the countries from or to which the substance may be imported or exported;

(*k*) the conditions under which, the manner in which and the purposes for which the substance may be imported or exported;

(*l*) the total, partial or conditional prohibition of the manufacture, use, processing, sale, offering for sale, import or export of the substance or a product containing the substance;

(*m*) the quantity or concentration of the substance that may be contained in any product manufactured, imported, exported or offered for sale in Canada;

(*n*) the manner in which and conditions under which and the purposes for which the substance or a product containing the substance may be advertised or offered for sale;

(*o*) the manner in which and conditions under which the substance or a product or material containing the substance may be stored, displayed, handled, transported or offered for transport;

(*p*) the packaging and labelling of the substance or a product or material containing the substance;

(*q*) the manner, conditions, places and method of disposal of the substance or a product or material containing the substance, including standards for the construction, maintenance and inspection of disposal sites;

(*r*) the submission to the Minister, on request or at such times as are prescribed, of information relating to the substance;

(*s*) the maintenance of books and records for the administration of any regulation made under this section;

(*t*) the conduct of sampling, analyses, tests, measurements or monitoring of the substance and the submission of the results to the Minister;

(*u*) the submission of samples of the substance to the Minister;

(*v*) the methods and procedures for conducting sampling, analyses, tests, measurements or monitoring of the substance;

(*w*) circumstances or conditions under which the Minister may, for the proper administration of this Act, modify

j) les pays d'exportation ou d'importation;

k) les conditions, modalités et objets de l'importation ou de l'exportation;

l) l'interdiction totale, partielle ou conditionnelle de la fabrication, de l'utilisation, de la transformation, de la vente, de la mise en vente, de l'importation ou de l'exportation de la substance ou d'un produit qui en contient;

m) la quantité ou concentration de celle-ci que peut contenir un produit fabriqué, importé, exporté ou mis en vente au Canada;

n) les modalités, les conditions et l'objet de la publicité et de la mise en vente de la substance ou d'un produit qui en contient;

o) les modalités et les conditions de stockage, de présentation, de transport, de manutention ou d'offre de transport soit de la substance, soit d'un produit ou d'une matière qui en contient;

p) l'emballage et l'étiquetage soit de la substance, soit d'un produit ou d'une matière qui en contient;

q) les modalités, lieux et méthodes d'élimination soit de la substance, soit d'un produit ou d'une matière qui en contient, notamment les normes de construction, d'entretien et d'inspection des sites d'élimination;

r) la transmission au ministre, sur demande ou au moment fixé par règlement, de renseignements concernant la substance;

s) la tenue de livres et de registres pour l'exécution des règlements d'application du présent article;

t) l'échantillonnage, l'analyse, l'essai, la mesure ou la surveillance de la substance et la transmission des résultats au ministre;

u) la transmission d'échantillons de la substance au ministre;

v) les méthodes et procédures à suivre pour les opérations mentionnées à l'alinéa *t*);

w) les cas ou conditions de modification par le ministre, pour l'exécution de la présente loi, soit des exigences imposées pour les opérations mentionnées à l'alinéa *t*), soit des méthodes et procédures afférentes;

1997 CanLII 318 (SCC)

(i) any requirement for sampling, analyses, tests, measurements or monitoring, or

(ii) the methods and procedures for conducting any required sampling, analyses, tests, measurements or monitoring; and

(*x*) any other matter necessary to carry out the purposes of this Part.

(2) The Governor in Council may, on the recommendation of the Ministers, make regulations providing for the exemption of the following activities from the application of this Part and any regulations made under it, namely,

(*a*) the import, export, manufacture, use, processing, transport, offering for transport, handling, packaging, labelling, advertising, sale, offering for sale, displaying, storing, disposing or releasing into the environment of any substance or a product or material containing any substance; and

(*b*) the release of any substance into the environment, for a period specified in the regulations, from any source or type of source.

(3) The Governor in Council shall not make a regulation under subsection (1) in respect of any substance if, in the opinion of the Governor in Council, the regulation regulates an aspect of the substance that is regulated by or under any other Act of Parliament.

(4) A regulation made under subsection (1) with respect to a substance may amend the List of Toxic Substances in Schedule I so as to specify the type of regulation that applies with respect to the substance.

(5) Except with respect to Her Majesty in right of Canada, the provisions of a regulation made under subsection (1) do not apply in any province in respect of which there is in force an order, made under subsection (6), declaring that the provisions do not apply.

(6) Where the Minister and the government of a province agree in writing that there are in force by or under the laws of the province

(*a*) provisions that are equivalent to the provisions of a regulation made under subsection (1), and

(*b*) provisions that are similar to sections 108 to 110 for the investigation of alleged offences under provincial environmental legislation,

x) toute autre mesure d'application de la présente partie.

(2) Sur recommandation des ministres, le gouverneur en conseil peut, par règlement, soustraire à l'application de la présente partie et de ses règlements:

a) l'importation, l'exportation, la fabrication, l'utilisation, la transformation, le transport, l'offre de transport, la manutention, l'emballage, l'étiquetage, la publicité, la vente, la mise en vente, la présentation, le stockage, l'élimination ou le rejet dans l'environnement soit d'une substance, soit d'un produit ou d'une matière qui en contient;

b) le rejet dans l'environnement d'une substance provenant d'une source donnée, ou d'un type de sources donné, pendant un certain temps.

(3) Les règlements prévus au paragraphe (1) ne peuvent toutefois être pris que si, selon le gouverneur en conseil, ils ne visent pas un point déjà réglementé sous le régime d'une autre loi fédérale.

(4) Les règlements d'application du paragraphe (1) peuvent modifier la liste de l'annexe I de manière à y préciser le type de règlement qui s'applique à la substance visée.

(5) Sauf à l'égard de Sa Majesté du chef du Canada, les règlements pris aux termes du paragraphe (1) ne s'appliquent pas dans la province visée par un décret pris aux termes du paragraphe (6).

(6) Sur recommandation du ministre, le gouverneur en conseil peut, par décret, déclarer que les règlements pris en application du paragraphe (1) ne s'appliquent pas dans la province lorsque le ministre et le gouvernement provincial sont convenus par écrit que sont en vigueur dans le cadre de la législation provinciale:

a) d'une part, des dispositions équivalentes à ces règlements;

b) d'autre part, des dispositions similaires aux articles 108 à 110 concernant les enquêtes pour infractions aux lois provinciales sur l'environnement.

1997 CanLII 318 (SCC)

the Governor in Council may, on the recommendation of the Minister, make an order declaring that the provisions of the regulation do not apply in the province.

(7) The Minister shall make public any agreement referred to in subsection (6).

(8) An agreement referred to in subsection (6) may be terminated by either party giving to the other at least six months notice of termination.

(9) The Governor in Council may, on the recommendation of the Minister, revoke an order made under subsection (6) where the agreement referred to in that subsection is terminated.

(10) The Minister shall include in the annual report required by section 138 a report on the administration of subsections (5) to (9).

35. (1) Where

(*a*) a substance

(i) is not specified on the List of Toxic Substances in Schedule I and the Ministers believe that it is toxic, or

(ii) is specified on that List and the Ministers believe that it is not adequately regulated, and

(*b*) the Ministers believe that immediate action is required to deal with a significant danger to the environment or to human life or health,

the Minister may make an interim order in respect of the substance and the order may contain any provision that may be contained in a regulation made under subsection 34(1) or (2).

(2) Subject to subsection (3), an interim order has effect

(*a*) from the time it is made; and

(*b*) as if it were a regulation made under section 34.

(3) An interim order ceases to have effect unless it is approved by the Governor in Council within fourteen days after it is made.

(7) Le ministre rend public l'accord visé au paragraphe (6).

(8) Une partie à l'accord peut y mettre fin en donnant un préavis de six mois à l'autre partie.

(9) Sur recommandation du ministre, le gouverneur en conseil peut révoquer le décret d'exemption lorsqu'il a été mis fin à l'accord.

(10) Le ministre rend compte, dans le rapport annuel visé à l'article 138, de la mise en œuvre des paragraphes (5) à (9).

35. (1) Le ministre peut prendre un arrêté d'urgence pouvant comporter les mêmes dispositions qu'un règlement d'application des paragraphes 34(1) ou (2), lorsque les conditions suivantes sont réunies:

a) la substance n'est pas inscrite sur la liste de l'annexe I et les ministres la croient toxique, ou bien elle y est inscrite et ils estiment qu'elle n'est pas réglementée comme il convient;

b) les ministres croient qu'une intervention immédiate est nécessaire afin de parer à tout danger appréciable soit pour l'environnement, soit pour la vie humaine ou la santé.

(2) Sous réserve du paragraphe (3), l'arrêté prend effet dès sa prise comme s'il s'agissait d'un règlement pris en vertu de l'article 34.

(3) L'arrêté cesse toutefois d'avoir effet à défaut d'approbation par le gouverneur en conseil dans les quatorze jours qui suivent.

1997 CanLII 318 (SCC)

(4) The Governor in Council shall not approve an interim order unless

(*a*) the Minister has, within twenty-four hours after making the order, offered to consult the governments of all the affected provinces to determine whether they are prepared to take sufficient action to deal with the significant danger; and

(*b*) the Minister has consulted with other ministers of the Crown in right of Canada to determine whether any action can be taken under any other Act of Parliament to deal with the significant danger.

(5) Where the Governor in Council approves an interim order, the Ministers shall, within ninety days after the approval, recommend to the Governor in Council

(*a*) that a regulation having the same effect as the order be made under section 34; and

(*b*) if the order was made in respect of a substance that was not specified on the List of Toxic Substances in Schedule I, that the substance be added to that List under section 33.

(6) An interim order

(*a*) is exempt from the application of sections 3, 5 and 11 of the *Statutory Instruments Act*; and

(*b*) shall be published in the *Canada Gazette* within twenty-three days after it is approved under subsection (3).

(7) No person shall be convicted of an offence consisting of a contravention of an interim order that, at the time of the alleged contravention, was not published in the *Canada Gazette* in both official languages unless it is proved that at the date of the alleged contravention reasonable steps had been taken to bring the purport of the order to the notice of those persons likely to be affected by it.

(8) An interim order ceases to have effect when a regulation referred to in subsection (5) is made or two years after the order was made, whichever is the earlier.

Constitution Act, 1867

91. It shall be lawful for the Queen, by and with the Advice and Consent of the Senate and House of Commons, to make Laws for the Peace, Order, and good Government of Canada, in relation to all Matters not coming within the Classes of Subjects by this Act

(4) Le gouverneur en conseil ne peut approuver l'arrêté d'urgence que si le ministre:

a) d'une part, dans les vingt-quatre heures suivant la prise de l'arrêté, a offert de consulter tous les gouvernements des provinces concernées afin de déterminer s'ils sont disposés à prendre les moyens nécessaires pour parer au danger en question;

b) d'autre part, a consulté les autres ministres fédéraux afin de déterminer si des mesures peuvent être prises sous le régime de toute autre loi fédérale pour parer au danger en question.

(5) Dans les quatre-vingt-dix jours qui suivent l'approbation par le gouverneur en conseil, les ministres recommandent à celui-ci, à la fois:

a) la prise d'un règlement d'application de l'article 34 ayant le même effet que l'arrêté;

b) l'inscription, sous le régime de l'article 33, de la substance visée sur la liste de l'annexe I dans les cas où elle n'y figure pas.

(6) L'arrêté est soustrait à l'application des articles 3, 5 et 11 de la *Loi sur les textes réglementaires* et publié dans la *Gazette du Canada* dans les vingt-trois jours suivant son approbation.

(7) Nul ne peut être condamné pour violation d'un arrêté d'urgence qui, à la date du fait reproché, n'était pas publié dans la *Gazette du Canada* dans les deux langues officielles, sauf s'il est établi qu'à cette date les mesures nécessaires avaient été prises pour porter la teneur de l'arrêté à la connaissance des personnes susceptibles d'être touchées par celui-ci.

(8) L'arrêté cesse d'avoir effet à la prise du règlement visé au paragraphe (5) ou, au plus tard, deux ans après sa prise.

Loi constitutionnelle de 1867

91. Il sera loisible à la Reine, sur l'avis et avec le consentement du Sénat et de la Chambre des communes, de faire des lois pour la paix, l'ordre et le bon gouvernement du Canada, relativement à toutes les matières ne tombant pas dans les catégories de sujets exclusivement

1997 CanLII 318 (SCC)

assigned exclusively to the Legislatures of the Provinces; and for greater Certainty, but not so as to restrict the Generality of the foregoing Terms of this Section, it is hereby declared that (notwithstanding anything in this Act) the exclusive Legislative Authority of the Parliament of Canada extends to all Matters coming within the Classes of Subjects next herein-after enumerated; that is to say, —

. . .

27. The Criminal Law, except the Constitution of Courts of Criminal Jurisdiction, but including the Procedure in Criminal Matters.

. . .

And any Matter coming within any of the Classes of Subjects enumerated in this Section shall not be deemed to come within the Class of Matters of a local or private Nature comprised in the Enumeration of the Classes of Subjects by this Act assigned exclusively to the Legislatures of the Provinces.

assignés aux législatures des provinces par la présente loi mais, pour plus de certitude, sans toutefois restreindre la généralité des termes employés plus haut dans le présent article, il est par les présentes déclaré que (nonobstant toute disposition de la présente loi) l'autorité législative exclusive du Parlement du Canada s'étend à toutes les matières tombant dans les catégories de sujets énumérés ci-dessous, à savoir:

. . .

27. le droit criminel, sauf la constitution des tribunaux de juridiction criminelle, mais y compris la procédure en matière criminelle;

. . .

Et aucune des matières ressortissant aux catégories de sujets énumérés au présent article ne sera réputée tomber dans la catégorie des matières d'une nature locale ou privée comprises dans l'énumération des catégories de sujets exclusivement assignés par la présente loi aux législatures des provinces.

3. Judicial History

A. *Court of Québec*

In Judge Babin's view, the fundamental question was whether Parliament had the power to regulate the emission of substances harmful to the environment when that environment was situated within a province. Applying the criteria set out by this Court in *R. v. Crown Zellerbach Canada Ltd.*, [1988] 1 S.C.R. 401, to the Act, he held that the scope of the legislation was unacceptably broad, largely owing to the sweeping definitions given to "environment" and to "toxic". The subject matter of the Act did not exhibit the "singleness, distinctiveness and indivisibility" required by *Crown Zellerbach*. Since a substance could be labelled "toxic" without even necessarily having a harmful effect on human health, he held that the Act was too broad to be sustained under the peace, order and good government power.

For similar reasons, he held that it could not be upheld as criminal law either. Since risk to human health was not necessary for the federal government to move in and impose regulations, he ruled

3. L'historique des procédures judiciaires

A. *Cour du Québec*

6 Selon le juge Babin, la question fondamentale était de savoir si le Parlement avait le pouvoir de réglementer les émissions de substances nocives pour l'environnement lorsque l'environnement en cause se trouve à l'intérieur d'une province. Appliquant à la Loi les critères énoncés par notre Cour dans l'arrêt *R. c. Crown Zellerbach Canada Ltd.*, [1988] 1 R.C.S. 401, il a conclu que la loi en question avait une portée large inacceptable, principalement en raison des définitions générales données aux mots «environnement» et «toxique». Le sujet visé par la Loi n'avait pas «l'unicité, la particularité et l'indivisibilité» requises par l'arrêt *Crown Zellerbach*. Étant donné qu'une substance pouvait être qualifiée de «toxique» sans même avoir nécessairement un effet nocif sur la santé humaine, il a conclu que la Loi avait une portée trop large pour être justifiée en vertu de la compétence en matière de paix, d'ordre et de bon gouvernement.

7 Pour des motifs similaires, il a conclu qu'elle ne pouvait pas non plus être maintenue comme étant du droit criminel. Vu qu' il n'était pas nécessaire qu'il y ait un risque pour la santé humaine pour

1997 CanLII 318 (SCC)

that Part II of the Act was legislation aimed primarily at protecting the environment, not at protecting health. Applying the *Reference re Validity of Section 5(a) of the Dairy Industry Act*, [1949] S.C.R. 1 (hereinafter the "*Margarine Reference*"), he held that the impugned provisions were essentially regulatory, with some [TRANSLATION] "provisions of a criminal nature", and that they entrenched on areas of jurisdiction reserved to the provinces. He declared s. 6(*a*) of the Interim Order *ultra vires* and struck it down.

B. *Quebec Superior Court*

8 Trottier J. found that the definitions of "environment" and "toxic" in the Act made it clear that the legislation was aimed at regulating toxic substances generally, not just cases where there might be effects spreading beyond the borders of a single province. He examined *Crown Zellerbach*, *supra*, and *Friends of the Oldman River Society v. Canada (Minister of Transport)*, [1992] 1 S.C.R. 3, and agreed with Judge Babin that the peace, order and good government power did not justify the Act. In order for the emission of toxic substances anywhere in the environment to qualify as a matter of "national concern" within *Crown Zellerbach*, he held that the provinces would have to be unable to deal with this matter themselves, that it would have to concern Canada as a whole, and that incapacity on the part of one province would have to have real consequences outside the borders of that province. He did not feel these criteria were met in this case, and so he could not support the Act under the peace, order and good government power.

9 He also agreed that the Act was not supportable as criminal law. Examining the provisions at issue, particularly s. 34, he concluded that their aim was truly to regulate, not to prohibit, and that they were accordingly not criminal law within the meaning of *R. v. Sault Ste. Marie*, [1978] 2 S.C.R. 1299.

que le gouvernement fédéral intervienne et prescrive un règlement, il a décidé que la partie II de la Loi visait principalement à protéger l'environnement et non pas la santé. Appliquant le renvoi *Reference re Validity of Section 5(a) of the Dairy Industry Act*, [1949] R.C.S. 1 (ci-après le «*Renvoi sur la margarine*»), il a conclu que les dispositions contestées étaient essentiellement de nature réglementaire, qu'elles comprenaient quelques «dispositions de nature criminelle» et qu'elles empiétaient sur des champs de compétence réservés aux provinces. Il a déclaré inconstitutionnel l'al. 6*a*) de l'arrêté d'urgence et l'a annulé.

B. *Cour supérieure du Québec*

Le juge Trottier a conclu qu'il ressortait clairement des définitions des mots «environnement» et «toxique», contenues dans la Loi, que la mesure législative en cause visait à réglementer les substances toxiques en général, et non pas seulement les cas où des effets pourraient se faire sentir au-delà des frontières d'une seule province. Il a examiné les arrêts *Crown Zellerbach*, précité, et *Friends of the Oldman River Society c. Canada (Ministre des Transports)*, [1992] 1 R.C.S. 3, et s'est dit d'accord avec le juge Babin pour affirmer que la compétence en matière de paix, d'ordre et de bon gouvernement ne justifiait pas la Loi. Il a statué que, pour que le rejet de substances toxiques n'importe où dans l'environnement constitue une question d'«intérêt national» au sens de l'arrêt *Crown Zellerbach*, il faudrait que les provinces soient incapables de régler elles-mêmes le problème, qu'il s'agisse d'une question qui intéresse le Canada en entier et que l'incapacité d'une province ait des conséquences réelles au-delà de ses propres frontières. Comme il n'avait pas le sentiment que ces critères étaient respectés en l'espèce, il ne pouvait pas justifier la Loi en vertu de la compétence en matière de paix, d'ordre et de bon gouvernement.

Il a également convenu que la Loi n'était pas justifiable en tant que droit criminel. Examinant les dispositions en cause, en particulier l'art. 34, il a conclu que leur véritable objet était de réglementer et non pas d'interdire, et qu'elles ne constituaient donc pas du droit criminel au sens de l'arrêt

1997 CanLII 318 (SCC)

Since the Act could not be supported under either head of jurisdiction, he dismissed the appeal.

C. *Quebec Court of Appeal*

Tourigny J.A. (Nichols and Chamberland JJ.A. concurring) characterized the impugned provisions as being in pith and substance aimed at protecting the environment. Applying *Crown Zellerbach*, *supra*, she held that the broad provisions of the Act lacked the "singleness, distinctiveness and indivisibility" necessary for a matter of national concern. Nor could the Act be upheld under the emergency doctrine of the peace, order and good government power. It was not a temporary measure, and the subject matter had not been proved to be "urgent" within the meaning of the *Reference re Anti-Inflation Act*, [1976] 2 S.C.R. 373.

Tourigny J.A. also held that the provisions of the Act greatly exceeded the legitimate domain of criminal law, even though they took the form of a set of prohibitions backed by penalties. She could not uphold the legislation under peace, order and good government or under s. 91(27), and so she too dismissed the appeal.

4. Issues

On December 21, 1995, the following constitutional question was stated:

Do s. 6(*a*) of the *Chlorobiphenyls Interim Order*, P.C. 1989-296, and the enabling legislative provisions, ss. 34 and 35 of the *Canadian Environmental Protection Act*, R.S.C., 1985, c. 16 (4th Supp.), fall in whole or in part within the jurisdiction of the Parliament of Canada to make laws for the peace, order and good government of Canada pursuant to s. 91 of the *Constitution Act, 1867* or its criminal law jurisdiction under s. 91(27) of the *Constitution Act, 1867* or otherwise fall within its jurisdiction?

R. c. Sault Ste-Marie, [1978] 2 R.C.S. 1299. Vu que la Loi ne pouvait pas se justifier en vertu de l'un ou l'autre chef de compétence, il a rejeté l'appel.

C. *Cour d'appel du Québec*

Le juge Tourigny (avec l'appui des juges Nichols et Chamberland) a affirmé que les dispositions contestées visaient, de par leur caractère véritable, la protection de l'environnement. Appliquant l'arrêt *Crown Zellerbach*, précité, elle a conclu que les dispositions larges de la Loi n'avaient pas «l'unicité, la particularité et l'indivisibilité» requises pour constituer une question d'intérêt national. La Loi ne pouvait pas non plus être maintenue en vertu de la théorie de l'urgence nationale justifiant l'application de la compétence en matière de paix, d'ordre et de bon gouvernement. Il ne s'agissait pas d'une mesure temporaire et il n'a pas été prouvé qu'il s'agissait d'une matière «urgente» au sens du *Renvoi sur la Loi anti-inflation*, [1976] 2 R.C.S. 373. 10

Le juge Tourigny a également conclu que les dispositions de la Loi dépassaient largement le champ légitime du droit criminel, même si elles formaient un ensemble d'interdictions assorties de peines. Comme elle ne pouvait confirmer la validité de la loi en cause ni en vertu de la compétence en matière de paix, d'ordre et de bon gouvernement, ni en vertu du par. 91(27), elle a, elle aussi, rejeté l'appel. 11

4. Les questions en litige

Le 21 décembre 1995, la question constitutionnelle suivante a été formulée: 12

L'alinéa 6*a*) de l'*Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-296, ainsi que les dispositions législatives habilitantes, les art. 34 et 35 de la *Loi canadienne sur la protection de l'environnement*, L.R.C. (1985), ch. 16 (4e suppl.), relèvent-ils en tout ou en partie de la compétence du Parlement du Canada de légiférer pour la paix, l'ordre et le bon gouvernement du Canada en vertu de l'art. 91 de la *Loi constitutionnelle de 1867* ou de la compétence en matière criminelle suivant le par. 91(27) de la *Loi constitutionnelle de 1867*, ou autrement?

1997 CanLII 318 (SCC)

5. Analysis

13 While the constitutional question mentions the Interim Order and its enabling provisions separately, there can be no doubt that the question of the constitutional validity of the Interim Order will be raised only if its enabling provisions themselves are found to be constitutional. That is, if ss. 34 and 35 of the Act are found to be *ultra vires* Parliament, it will then become purely theoretical to analyse the constitutionality of the Interim Order. See P. W. Hogg, *Constitutional Law of Canada* (3rd ed. 1992 (loose-leaf)), vol. 1, at p. 14-7, and D. C. Holland and J. P. McGowan, *Delegated Legislation in Canada* (1989), at pp. 170-71. Accordingly, these reasons will focus on the constitutionality of the enabling provisions, ss. 34 and 35.

14 In order to address the issues raised by this appeal, it is necessary to understand the legislative context of the impugned provisions. We will therefore begin by briefly setting out this context.

A. *The Legislative Structure of the Act*

15 The *Canadian Environmental Protection Act* was adopted by Parliament in 1988. It consolidated and replaced several other laws dealing with various kinds of environmental protection. Part II of the Act, which contains ss. 34 and 35, is called "Toxic Substances" and deals with the identification and regulation of substances which could potentially pose a risk to the environment and/or to human health. According to s. 11 of the Act, a substance is toxic where "it is entering or may enter the environment" under conditions "having or that may have an immediate or long-term harmful effect on the environment", "constituting or that may constitute a danger to the environment on which human life depends", or "constituting or that may constitute a danger in Canada to human life or health". Section 3 broadly defines a "substance" as "any distinguishable kind of organic or inorganic matter, whether animate or inanimate" and the "environment" as "the components of the

5. Analyse

Bien que la question constitutionnelle mentionne séparément l'arrêté d'urgence et ses dispositions habilitantes, il n'y a pas de doute que la question de la constitutionnalité de l'arrêté d'urgence ne se posera que si ses dispositions habilitantes sont jugées constitutionnelles. Autrement dit, s'il est jugé que les art. 34 et 35 de la Loi excèdent la compétence du Parlement, l'analyse de la constitutionnalité de l'arrêté d'urgence deviendra purement théorique. Voir P. W. Hogg, *Constitutional Law of Canada* (3e éd. 1992 (feuilles mobiles)), vol. 1, à la p. 14-7, et D. C. Holland et J. P. McGowan, *Delegated Legislation in Canada* (1989), aux pp. 170 et 171. Par conséquent, les présents motifs seront axés sur la constitutionnalité des dispositions habilitantes, soit les art. 34 et 35.

Pour aborder les questions soulevées dans le présent pourvoi, il est nécessaire de comprendre le contexte législatif dans lequel se situent les dispositions contestées. Nous commencerons donc par un bref exposé de ce contexte.

A. *La structure de la Loi*

La *Loi canadienne sur la protection de l'environnement* a été adoptée par le Parlement en 1988. Elle réunissait et remplaçait plusieurs autres lois traitant de divers types de protection de l'environnement. La partie II de la Loi, qui contient les art. 34 et 35, s'intitule «Substances toxiques» et porte sur l'identification et la réglementation de substances susceptibles de présenter un risque pour l'environnement ou la santé humaine, ou pour les deux à la fois. Selon l'art. 11 de la Loi, est toxique toute substance «qui pénètre ou peut pénétrer dans l'environnement» dans des conditions «de nature à [. . .] avoir, immédiatement ou à long terme, un effet nocif sur l'environnement», à «mettre en danger l'environnement essentiel pour la vie humaine» ou à «constituer un danger au Canada pour la vie ou la santé humaine». L'article 3 donne une définition large du terme «substance» en la décrivant comme étant «[t]oute matière organique ou inorganique, animée ou inanimée, distinguable», et du terme «environnement», qu'il décrit comme étant l'«[e]nsemble des conditions et des éléments natu-

1997 CanLII 318 (SCC)

Earth". "Harmful effect" and "danger" are not defined.

The Act instructs the Ministers of the Environment and Health to compile and maintain four lists: the Domestic Substances List (DSL), the Non-Domestic Substances List (NDSL), the Priority Substances List (PSL) and the List of Toxic Substances (LTS). The DSL includes all substances in use in Canada since 1986 (some 21,700 substances as of January 1991). The NDSL contains all other substances. At present, the NDSL list includes over 41,000 substances. See E. A. Fitzgerald, "The Constitutionality of Toxic Substances Regulation Under the Canadian Environmental Protection Act" (1996), 30 *U.B.C. L. Rev.* 55, at p. 70. There is a blanket restriction on importing NDSL substances into Canada until they are approved (s. 26).

Sections 12 and 13 of the Act require the Ministers to compile a "Priority Substances List" specifying those substances to which priority should be given in determining whether or not they should be placed on the List of Toxic Substances. Under s. 15, either the Minister of the Environment or the Minister of Health may conduct investigations with a view to determining whether a given substance is toxic. The Ministers may examine, *inter alia*, the nature of the substance in question, its effects on natural biological processes, the extent to which the substance will persist in the environment, its ability to bio-accumulate, methods of controlling it, and methods of reducing the amount of it used. Section 16 provides that the Minister of the Environment can require private citizens to provide him or her with information about, or samples of, substances which the Minister suspects may be toxic and under s. 18, the Minister can order that persons with information about a substance which might be toxic provide that information to him or her.

Once a priority listed substance is found to be toxic within the meaning of s. 11, the Ministers may recommend adding it to the List of Toxic Substances.

rels de la terre». Les expressions «effet nocif» et «danger» ne sont pas définis.

16 En vertu de la Loi, les ministres de l'Environnement et de la Santé doivent établir et tenir quatre listes de substances: la liste intérieure, la liste extérieure, la liste prioritaire et la liste des substances toxiques. La liste intérieure comprend toutes les substances utilisées au Canada depuis 1986 (quelque 21 700 substances en janvier 1991). La liste extérieure énumère toutes les autres substances. À l'heure actuelle, cette dernière liste comprend plus de 41 000 substances. Voir E. A. Fitzgerald, «The Constitutionality of Toxic Substances Regulation Under the Canadian Environmental Protection Act» (1996), 30 *U.B.C. L. Rev.* 55, à la p. 70. Il existe une interdiction générale d'importer au Canada les substances figurant sur la liste extérieure aussi longtemps qu'elles ne sont pas approuvées (art. 26).

17 En vertu des art. 12 et 13 de la Loi, les ministres doivent établir une «liste prioritaire» qui énumère les substances pour lesquelles il est prioritaire de déterminer si elles doivent ou non être inscrites sur la liste des substances toxiques. L'article 15 prévoit que le ministre de l'Environnement ou le ministre de la Santé peut tenir des enquêtes afin de déterminer si une substance donnée est toxique. Les ministres peuvent examiner, notamment, la nature de la substance en question, ses effets sur des processus biologiques naturels, la mesure dans laquelle elle persistera dans l'environnement, sa capacité d'accumulation dans les tissus biologiques, les méthodes permettant d'en limiter la présence et celles permettant d'en réduire la quantité utilisée. L'article 16 prévoit que le ministre de l'Environnement peut exiger de simples citoyens qu'ils lui fournissent des renseignements sur les substances qu'il juge susceptibles d'être toxiques, ou des échantillons de ces substances, et, en vertu de l'art. 18, le Ministre peut ordonner que les personnes qui possèdent des renseignements sur une substance susceptible d'être toxique lui fournissent ces renseignements.

18 Dès qu'il est jugé qu'une substance figurant sur la liste prioritaire est toxique au sens de l'art. 11, les ministres peuvent recommander son ajout à la

1997 CanLII 318 (SCC)

stances. After a federal-provincial advisory committee (established under s. 6) has been given an opportunity to provide its advice, the Governor in Council may add the substance to the list and bring it under the regulatory control of s. 34.

19 Section 34 provides for the regulation of substances on the List of Toxic Substances. The Governor in Council is given extensive powers to prescribe regulations dealing with every conceivable aspect of the listed substance, including: the quantity or concentration in which it can be released; the commercial or manufacturing activity in the course of which it can be released; the quantity of that substance that can be manufactured, imported, owned, sold, or used — including total prohibitions on its manufacture, importation, ownership, use or sale — and likewise the manner in and purposes for which it can be manufactured, imported, processed, used, offered for sale or sold; the manner and conditions in which the substance may be advertised, stored, displayed, handled, transported or offered for transport; the manner, conditions, places and method of disposal of the substance; the maintenance of books and records in respect of the substance; and the extent to which reports must be made to the Minister regarding the monitoring of the substance. Section 34(1)(*x*) allows the Governor in Council to regulate "any other matter necessary to carry out the purposes of this Part".

20 Where a substance is not on the List of Toxic Substances (or where it is listed, but the Ministers believe that it is not adequately regulated), and where the Ministers believe that immediate action is necessary in respect of that substance, s. 35 allows for the making of "interim orders" without going through the usual procedure. These orders can contain any regulation which could have been made under s. 34, but they remain in effect for only 14 days unless they are approved by the Governor in Council. Approval can be given only if, *inter alia*, the Ministers have offered to consult with the governments of any affected provinces to

liste des substances toxiques. Après qu'un comité consultatif fédéro-provincial (constitué en vertu de l'art. 6) a eu la possibilité de formuler ses conseils, le gouverneur en conseil peut ajouter la substance à la liste et la soumettre au contrôle réglementaire de l'art. 34.

L'article 34 prescrit la réglementation des substances inscrites sur la liste des substances toxiques. Le gouverneur en conseil est investi de pouvoirs considérables de prendre des règlements concernant tous les aspects imaginables de la substance inscrite sur la liste, dont la quantité ou la concentration dans lesquelles elle peut être rejetée, les activités commerciales ou de fabrication au cours desquelles son rejet est permis, la quantité de cette substance qui peut être fabriquée, importée, possédée, vendue ou utilisée — y compris les interdictions absolues de la fabriquer, de l'importer, de la posséder, de l'utiliser ou de la vendre — de même que les modalités et l'objet de la fabrication, de l'importation, de la transformation, de l'utilisation, de la mise en vente et de la vente de la substance, les modalités et les conditions de publicité, de stockage, de présentation, de manutention, de transport ou d'offre de transport de la substance, les modalités, lieux et méthodes d'élimination de la substance, la tenue de livres et de registres la concernant et la mesure dans laquelle des rapports doivent être faits au Ministre en ce qui concerne sa surveillance. L'alinéa 34(1)*x*) permet au gouverneur en conseil de prendre des règlements touchant «toute autre mesure d'application de la présente partie».

Si une substance n'est pas inscrite sur la liste des substances toxiques (ou si, bien qu'elle y soit inscrite, les ministres estiment qu'elle n'est pas convenablement réglementée) et si les ministres croient qu'une intervention immédiate est nécessaire à son égard, l'art. 35 permet de prendre des «arrêtés d'urgence» sans suivre la procédure habituelle. Ces arrêtés peuvent comporter les mêmes dispositions qu'un règlement pris aux termes de l'art. 34, mais ils ne demeurent en vigueur que pendant 14 jours, à moins d'être approuvés par le gouverneur en conseil. Cette approbation ne peut être donnée que si, notamment, les ministres ont

1997 CanLII 318 (SCC)

see whether they are prepared to take sufficient action to deal with the threat posed by the substance (s. 35(4)). According to s. 35(8), interim orders expire after two years, even if such approval is granted.

offert de consulter le gouvernement de toute province concernée afin de déterminer s'il est disposé à prendre les moyens nécessaires pour parer à la menace que constitue la substance (par. 35(4)). Selon le par. 35(8), les arrêtés d'urgence cessent d'être en vigueur au bout de deux ans, même si une telle approbation est donnée.

As stated above, this appeal arose as a result of an interim order made in 1989 by the then Minister of the Environment, the Honourable Lucien Bouchard. It restricted the emission of chlorobiphenyls ("PCBs") to 1 gram per day. The respondent was charged with breaching this Interim Order and challenged the charges by claiming that the Interim Order, as well as the underlying provisions supporting it, were *ultra vires* Parliament.

21 Comme nous l'avons vu, le présent pourvoi fait suite à un arrêté d'urgence pris en 1989 par le ministre de l'Environnement de l'époque, l'honorable Lucien Bouchard. L'arrêté limitait à 1 g par jour les émissions de biphényles chlorés (BPC). L'intimée, accusée d'avoir contrevenu à cet arrêté d'urgence, a contesté les accusations portées contre elle en soutenant que l'arrêté d'urgence et les dispositions le sous-tendant excédaient la compétence du Parlement.

Finally, the Act prescribes a number of civil and criminal penalties. Section 113(*f*), for example, creates an offence of contravening regulations made under s. 34. The punishment ranges from a maximum $300,000 fine or six months imprisonment (or both) on summary conviction to a maximum $1 million fine or three years imprisonment (or both) on indictment. A defence of due diligence is allowed for all offences under the Act except those under s. 114 (knowingly providing false or misleading information), s. 115(1)(*a*) (intentionally or recklessly causing an environmental disaster) or s. 115(1)(*b*) (showing wanton or reckless disregard for the lives or safety of other persons). These offences require a higher standard of moral culpability.

22 Enfin, la Loi prescrit un certain nombre de peines civiles et criminelles. Selon l'al. 113*f*), par exemple, commet une infraction quiconque ne se conforme pas aux règlements pris sous le régime de l'art. 34. Cette infraction est punissable, par procédure sommaire, d'une amende maximale de 300 000 $ ou d'un emprisonnement maximal de six mois (ou des deux à la fois), ou, par mise en accusation, d'une amende maximale d'un million de dollars ou d'un emprisonnement maximal de trois ans (ou des deux à la fois). Une défense de diligence convenable ou raisonnable est permise pour toutes les infractions prévues à la Loi, sauf celles décrites à l'art. 114 (communiquer sciemment des renseignements faux ou trompeurs), à l'al. 115(1)*a*) (provoquer, intentionnellement ou par imprudence grave, une catastrophe environnementale) ou à l'al. 115(1)*b*) (faire preuve d'imprudence ou d'insouciance graves à l'endroit de la vie ou de la sécurité d'autrui). Ces infractions requièrent une norme plus stricte de culpabilité morale.

B. *The Pith and Substance of the Legislation*

B. *Le caractère véritable de la loi en cause*

The manner of analysing matters involving division of powers is well established: see Hogg, *supra*, at p. 15-6. The law in question must first be characterized in relation to its "pith and substance", that is, its dominant or most important characteristic. One must then see if the law, seen in

23 La méthode d'analyse des questions concernant le partage des compétences est bien établie: voir Hogg, *op. cit.*, à la p. 15-6. La loi en question doit d'abord être qualifiée en fonction de son «caractère véritable», c'est-à-dire de sa caractéristique dominante ou la plus importante. Il faut ensuite se

1997 CanLII 318 (SCC)

this light, can be successfully assigned to one of the government's heads of legislative power.

24 In this case, the Quebec Court of Appeal held that, although one of the effects of Part II of the Act is to protect human life and health, its pith and substance lies in the protection of the environment (at p. 405):

> [TRANSLATION] It can be seen from a careful examination of the provisions at issue that Parliament has chosen to regulate the release of toxic substances into the environment for the stated purpose of protecting human life and health. There is of course no question that one of the effects of the adopted measures is to promote the protection of human life and health. However, it is my view that the pith and substance of both the *Chlorobiphenyls Interim Order* and the enabling provisions pursuant to which it was made is the protection of the environment.

25 The respondent Hydro-Québec and the *mis en cause* the Attorney General of Quebec agree with this characterization and suggest that the true goal of the legislation is the regulation of environmental protection, writ large. The appellant, on the other hand, argues that the true object of Part II of the Act is simply the control of pollution caused by toxic substances (like PCBs), which are capable of being dispersed into the environment and whose level of toxicity is such as to pose a serious risk of harm to the environment and to human health and life. Several interveners support this claim, submitting that the impugned provisions seek simply to create national standards for the control of toxic substances. They cite in this regard various government ministry and legislative committee reports: see, e.g., Environment Canada and Health and Welfare Canada, *Final Report of the Environmental Contaminants Act Amendments Consultative Committee* (1986); Environment Canada, *The Right to a Healthy Environment: An Overview of the Proposed Environmental Protection Act* (1987).

26 In our view, the dominant characteristic of the impugned legislation is apparent from its plain text. Part II of the Act seeks, at first glance, to pro-

demander si la loi, vue sous cet angle, relève à bon droit de l'un des chefs de compétence législative du gouvernement.

En l'espèce, la Cour d'appel du Québec a statué que, même si l'un des effets de la partie II de la Loi est de protéger la vie et la santé humaines, son caractère véritable réside dans la protection de l'environnement (à la p. 405):

> L'étude attentive des dispositions en cause révèle que le législateur a choisi de réglementer le rejet de substances toxiques dans l'environnement dans le but déclaré de protéger la vie humaine et la santé. Il n'est certes pas douteux que l'un des effets des mesures adoptées soit de favoriser la protection de la vie humaine et de la santé. J'estime cependant que, dans leur caractère véritable, tant l'*Arrêté d'urgence sur les biphényles chlorés* que les dispositions habilitantes en vertu desquelles il a été pris visent la protection de l'environnement.

L'intimée Hydro-Québec et le mis en cause le procureur général du Québec acceptent cette qualification et affirment que le véritable objectif de la Loi est nettement la réglementation de la protection de l'environnement. L'appelant, pour sa part, soutient que le véritable objet de la partie II de la Loi est simplement le contrôle de la pollution causée par des substances toxiques (comme les BPC) qui peuvent se disperser dans l'environnement et dont le degré de toxicité est tel qu'elles présentent un risque grave pour l'environnement ainsi que la santé et la vie humaines. Plusieurs intervenants appuient cette prétention en soutenant que les dispositions contestées visent simplement à établir des normes nationales de contrôle des substances toxiques. Ils citent à cet égard divers rapports de ministères et de comités législatifs: voir, par exemple, Environnement Canada et Santé et Bien-être social Canada, *Rapport final du Comité consultatif sur les modifications à la Loi sur les contaminants de l'environnement* (1986); Environnement Canada, *Le droit à un environnement sain: Aperçu du projet de loi sur la protection de l'environnement* (1987).

À notre avis, la caractéristique dominante de la loi contestée ressort à sa lecture même. La partie II de la Loi vise, à première vue, à protéger l'envi-

1997 CanLII 318 (SCC)

tect the environment, human health and life from harm owing to the release of toxic substances. As noted above, it seeks to do so through extensive — indeed, comprehensive — regulation of these substances and the ways in which they may come into contact with the environment. That being said, we believe it is also necessary to consider the sweeping definitions given by the Act to "environment" and "toxic substance". Section 3 defines the "environment" as follows:

3. (1) In this Act,

. . .

"environment" means the components of the Earth and includes

(*a*) air, land and water,

(*b*) all layers of the atmosphere,

(*c*) all organic and inorganic matter and living organisms, and

(*d*) the interacting natural systems that include components referred to in paragraphs (*a*) to (*c*);

Even broader is the definition given to "substance":

"substance" means any distinguishable kind of organic or inorganic matter, whether animate or inanimate, and includes

(*a*) any matter that is capable of being dispersed in the environment or of being transformed in the environment into matter that is capable of being so dispersed or that is capable of causing such transformations in the environment,

(*b*) any element or free radical,

(*c*) any combination of elements of a particular molecular identity that occurs in nature or as a result of a chemical reaction, and

(*d*) complex combinations of different molecules that originate in nature or are the result of chemical reactions but that could not practicably be formed by simply combining individual constituents,

and, except for the purposes of sections 25 to 32, includes

ronnement ainsi que la santé et la vie humaines contre les effets nocifs du rejet de substances toxiques. Comme nous l'avons vu, elle cherche à réaliser cela par l'entremise d'une réglementation détaillée, voire exhaustive, de ces substances et des façons dont elles peuvent entrer en contact avec l'environnement. Cela dit, nous croyons qu'il est également nécessaire de tenir compte des définitions larges des expressions «environnement» et «substance toxique» contenues dans la Loi. Voici comment l'art. 3 définit le mot «environnement»:

3. (1) Les définitions qui suivent s'appliquent à la présente loi.

. . .

«environnement» Ensemble des conditions et des éléments naturels de la terre, notamment:

a) l'air, l'eau et le sol;

b) toutes les couches de l'atmosphère;

c) toutes les matières organiques et inorganiques ainsi que les êtres vivants;

d) les systèmes naturels en interaction qui comprennent les éléments visés aux alinéas *a*) à *c*).

La définition du terme «substance» est encore plus large: 27

«substance» Toute matière organique ou inorganique, animée ou inanimée, distinguable. La présente définition vise notamment:

a) les matières susceptibles soit de se disperser dans l'environnement, soit de s'y transformer en matières dispensables, ainsi que les matières susceptibles de provoquer de telles transformations dans l'environnement;

b) les radicaux libres ou les éléments;

c) les combinaisons d'éléments à l'identité moléculaire précise soit naturelles, soit consécutives à une réaction chimique;

d) des combinaisons complexes de molécules différentes, d'origine naturelle ou résultant de réactions chimiques, mais qui ne pourraient se former dans la pratique par la simple combinaison de leurs composants individuels.

Elle vise aussi, sauf pour l'application des articles 25 à 32:

1997 CanLII 318 (SCC)

(*e*) any mixture that is a combination of substances and does not itself produce a substance that is different from the substances that were combined,

(*f*) any manufactured item that is formed into a specific physical shape or design during manufacture and has, for its final use, a function or functions dependent in whole or in part on its shape or design, and

(*g*) any animate matter that is, or any complex mixtures of different molecules that are, contained in effluents, emissions or wastes that result from any work, undertaking or activity;

28 The Act is not, as was suggested by the appellant, aimed specifically at chemical substances; rather, it purports to cover "any distinguishable kind of organic or inorganic matter, whether animate or inanimate". Section 11 determines when a substance will be "toxic", and therefore subject to federal regulation:

11. For the purposes of this Part, a substance is toxic if it is entering or may enter the environment in a quantity or concentration or under conditions

(*a*) having or that may have an immediate or long-term harmful effect on the environment;

(*b*) constituting or that may constitute a danger to the environment on which human life depends; or

(*c*) constituting or that may constitute a danger in Canada to human life or health.

29 Paragraphs 11(*a*) through (*c*) are not cumulative. It will suffice to bring a substance under federal regulatory control that it pose a risk to human life or health, part of the environment upon which human life depends, or the environment itself.

30 In this regard, we note that we cannot, with respect, agree with our colleague, La Forest J., that the criteria found in s. 11 are simply a "drafting tool" or that to speak of s. 11 as a definition is "misleading". The purpose of this section is to delineate from the category of "substances" (as defined by s. 3) those particular substances which qualify for regulation under ss. 34 and 35. It does so by specifying that "toxic" substances are, for the purposes of Part II, those which are capable of

e) les mélanges combinant des substances et ne produisant pas eux-mêmes une substance différente de celles qui ont été combinées;

f) les articles manufacturés dotés d'une forme ou de caractéristiques matérielles précises pendant leur fabrication et qui ont, pour leur utilisation finale, une ou plusieurs fonctions en dépendant, en tout ou en partie;

g) les matières animées ou les mélanges complexes de molécules différentes qui sont contenus dans les effluents, les émissions ou les déchets attribuables à des travaux, des entreprises ou des activités.

Contrairement à ce qu'a prétendu l'appelant, la Loi ne vise pas les substances chimiques en particulier; elle a plutôt pour objet de réglementer «[t]oute matière organique ou inorganique, animée ou inanimée, distinguable». L'article 11 définit la substance «toxique» qui, du fait même, est assujettie à la réglementation fédérale:

11. Pour l'application de la présente partie, est toxique toute substance qui pénètre ou peut pénétrer dans l'environnement en une quantité ou une concentration ou dans des conditions de nature à:

a) avoir, immédiatement ou à long terme, un effet nocif sur l'environnement;

b) mettre en danger l'environnement essentiel pour la vie humaine;

c) constituer un danger au Canada pour la vie ou la santé humaine.

Les alinéas 11*a*) à *c*) ne sont pas cumulatifs. Pour qu'une substance soit assujettie au contrôle réglementaire fédéral, il suffit qu'elle présente un risque pour la vie ou la santé humaine, pour une partie de l'environnement essentielle à la vie humaine, ou pour l'environnement même.

À cet égard, nous soulignons que nous ne pouvons pas, en toute déférence, être d'accord avec notre collègue le juge La Forest pour dire que les critères énoncés à l'art. 11 ne sont qu'un «moyen rédactionnel» ou qu'il est «trompeur» de qualifier de définition l'art. 11. L'objet de cet article est d'extraire de la catégorie des «substances» (définies à l'art. 3) celles qui peuvent être réglementées sous le régime des art. 34 et 35. Il le fait en précisant que les substances «toxiques» sont, aux fins

1997 CanLII 318 (SCC)

posing one of the threats listed above. This seems to us a clear statement of Parliament's intentions in this area. As was held in *Ontario v. Canadian Pacific Ltd.*, [1995] 2 S.C.R. 1031, at p. 1050:

> [T]he first task of a court construing a statutory provision is to consider the meaning of its words in the context of the statute as a whole. If the meaning of the words when they are considered in this context is clear, there is no need for further interpretation. The basis for this general rule is that when such a plain meaning can be identified this meaning can ordinarily be said to reflect the legislature's intention.

Nothing in the Act suggests that "toxic" is to be defined by any criteria other than those given in s. 11. Moreover, no special definition is given to the terms "harmful effect" and "danger". It is, in our view, accordingly clear from the wording of the legislation that "toxicity" is intended to be conditional upon meeting the criteria set out in ss. 3 and 11(*a*) to (*c*). If a substance (which can be essentially anything) poses or may pose a risk to human life or health, or to the environment upon which human life depends, or to any aspect of the environment itself, it qualifies as toxic according to the Act and may be made the subject of comprehensive federal regulation.

Nor are we convinced that the federal-provincial consultative process contemplated in s. 35(4) of the Act has the effect of changing the character of the impugned provisions. Although we understand why Parliament might wish to seek the opinion of provincial legislatures before enacting regulations which would affect areas under their supervision, nothing in the Act requires that this process be anything other than consultative. That is, once having consulted affected provincial governments, Parliament is left free to pass whatever regulations it sees fit in order to address the threat posed by substances qualifying as "toxic".

de la partie II, celles qui sont susceptibles de constituer l'une des menaces énumérées plus haut. Il nous semble que cela constitue un énoncé clair des intentions du Parlement dans ce domaine. Comme il a été décidé dans l'arrêt *Ontario c. Canadien Pacifique Ltée*, [1995] 2 R.C.S. 1031, à la p. 1050:

> [L]a première tâche du tribunal appelé à interpréter une disposition législative consiste à examiner le sens de ses mots dans le contexte global de la loi. Si le sens des mots examinés dans ce contexte est clair, il n'est pas nécessaire de poursuivre l'interprétation. Le fondement de cette règle générale est que lorsqu'il est ainsi possible d'identifier un sens clair, on peut généralement présumer que ce sens reflète l'intention du législateur.

31 Rien dans la Loi ne porte à croire que le terme «toxique» doit être défini selon des critères autres que ceux énoncés à l'art. 11. En outre, elle ne contient aucune définition particulière des expressions «effet nocif» et «danger». À notre avis, il ressort clairement du libellé de la Loi qu'on a voulu que, pour qu'une substance soit qualifiée de «toxique», elle doit satisfaire aux critères énoncés à l'art. 3 et aux al. 11*a*) à *c*). La substance (qui peut essentiellement être n'importe quoi) qui présente ou est susceptible de présenter un risque pour la vie ou la santé humaine, pour l'environnement essentiel à la vie humaine ou pour tout autre aspect de l'environnement lui-même, est toxique au sens de la Loi et elle peut faire l'objet d'une réglementation fédérale détaillée.

32 Nous ne sommes pas convaincus non plus que le processus de consultation fédéro-provincial envisagé au par. 35(4) de la Loi a pour effet de modifier la nature des dispositions contestées. Bien que nous comprenions pourquoi le Parlement pourrait vouloir consulter des assemblées législatives provinciales avant de prendre un règlement ayant une incidence sur des domaines assujettis à leur contrôle, rien dans la Loi n'exige que ce processus soit de nature autre que consultative. Autrement dit, une fois qu'il a consulté les gouvernements provinciaux concernés, le Parlement est libre de prendre tout règlement qu'il juge nécessaire pour contrer la menace que constituent des substances qui présentent les caractéristiques requises pour être qualifiées de «toxiques».

1997 CanLII 318 (SCC)

33 In light of these factors, we believe the pith and substance of Part II of the Act lies in the wholesale regulation by federal agents of any and all substances which may harm any aspect of the environment or which may present a danger to human life or health. That is, the impugned provisions are in pith and substance aimed at protecting the environment and human life and health from any and all harmful substances by regulating these substances. It remains to be seen whether this can be justified under any of the heads of power listed in s. 91 of the *Constitution Act, 1867*. In that connection, we will begin by considering s. 91(27), the criminal law power.

Compte tenu de ces facteurs, nous estimons que le caractère véritable de la partie II de la Loi réside dans la réglementation systématique, par des organismes fédéraux, de toutes les substances susceptibles d'avoir un effet nocif sur un aspect de l'environnement, ou de présenter un danger pour la vie ou la santé humaine. En d'autres termes, les dispositions contestées visent, de par leur caractère véritable, à protéger l'environnement ainsi que la vie et la santé humaines contre les substances nocives en réglementant celles-ci. Il reste à voir si cela peut être justifié en vertu de l'un ou l'autre des chefs de compétence énumérés à l'art. 91 de la *Loi constitutionnelle de 1867*. À ce propos, nous allons commencer par examiner le par. 91(27), soit la compétence en matière de droit criminel.

C. *The Criminal Law Power*

C. *La compétence en matière de droit criminel*

34 Parliament has been given broad and exclusive power to legislate in relation to criminal law by virtue of s. 91(27): *RJR-MacDonald Inc. v. Canada (Attorney General)*, [1995] 3 S.C.R. 199; *Scowby v. Glendinning*, [1986] 2 S.C.R. 226. This power has traditionally been construed generously. As La Forest J. noted in *RJR-MacDonald*, at p. 240, "[i]n developing a definition of the criminal law, this Court has been careful not to freeze the definition in time or confine it to a fixed domain of activity".

Le paragraphe 91(27) a attribué au Parlement la compétence vaste et exclusive pour légiférer en matière de droit criminel: *RJR-MacDonald Inc. c. Canada (Procureur général)*, [1995] 3 R.C.S. 199; *Scowby c. Glendinning*, [1986] 2 R.C.S. 226. Cette compétence a traditionnellement été interprétée libéralement. Comme l'a souligné le juge La Forest dans l'arrêt *RJR-MacDonald*, à la p. 240, «[d]ans l'élaboration d'une définition du droit criminel, notre Cour a pris soin de ne pas geler la définition à une époque déterminée ni de la restreindre à un domaine d'activité fixe».

35 Nevertheless, the criminal law power has always been made subject to two requirements: laws purporting to be upheld under s. 91(27) must contain prohibitions backed by penalties; and they must be directed at a "legitimate public purpose" (*Scowby*, at p. 237). As Rand J. stated in the *Margarine Reference*, *supra*, at pp. 49-50:

> A crime is an act which the law, with appropriate penal sanctions, forbids; but as prohibitions are not enacted in a vacuum, we can properly look for some evil or injurious or undesirable effect upon the public against which the law is directed. That effect may be in relation to social, economic or political interests; and the legisla-

Néanmoins, la compétence en matière de droit criminel a toujours été assujettie à deux exigences: les lois censées être maintenues en vertu du par. 91(27) doivent contenir des interdictions assorties de peines et elles doivent viser «un objectif public légitime» (*Scowby*, à la p. 237). Comme le juge Rand l'a affirmé dans le *Renvoi sur la margarine*, précité, aux pp. 49 et 50:

> [TRADUCTION] Le crime est l'acte que la loi interdit et auquel elle attache une peine; les interdictions portant sur quelque chose, l'on peut toujours trouver à leur base une situation contre laquelle le législateur veut, dans l'intérêt public, lutter. La situation que le législateur a voulu faire cesser ou les intérêts qu'il a voulu sauvegarder peuvent être autant du domaine social que du domaine économique ou politique; et la législature avait

1997 CanLII 318 (SCC)

ture has had in mind to suppress the evil or to safeguard the interest threatened.

. . .

Is the prohibition then enacted with a view to a public purpose which can support it as being in relation to criminal law? Public peace, order, security, health, morality: these are the ordinary though not exclusive ends served by that law. . . .

These two criteria have been consistently applied: see e.g. *Boggs v. The Queen*, [1981] 1 S.C.R. 49; *Labatt Breweries of Canada Ltd. v. Attorney General of Canada*, [1980] 1 S.C.R. 914; *R. v. Wetmore*, [1983] 2 S.C.R. 284; *Scowby*, *supra*; *RJR-MacDonald*, *supra*; see also *Knox Contracting Ltd. v. Canada*, [1990] 2 S.C.R. 338, at p. 348. Criminal law under s. 91(27) must attempt to achieve a criminal public purpose through the imposition of prohibitions and penalties. Colourable attempts to invade areas of provincial jurisdiction under the guise of criminal legislation will be declared *ultra vires.* As La Forest J. wrote in *RJR-MacDonald*, at p. 246:

The scope of the federal power to create criminal legislation with respect to health matters is broad, and is circumscribed only by the requirements that the legislation must contain a prohibition accompanied by a penal sanction and must be directed at a legitimate public health evil. If a given piece of federal legislation contains these features, and if that legislation is not otherwise a "colourable" intrusion upon provincial jurisdiction, then it is valid as criminal law. . . . [Emphasis added.]

These comments were made in the context of criminal legislation concerning health, but we see no reason why they should not be of general application as regards s. 91(27). See also *R. v. Morgentaler*, [1993] 3 S.C.R. 463; *R. v. Hauser*, [1979] 1 S.C.R. 984.

The next step is therefore to examine the impugned provisions and determine whether they meet these criteria. In our view, they fall short.

à l'esprit de supprimer le mal ou de sauvegarder les intérêts menacés.

. . .

La prohibition est-elle alors adoptée en vue d'un objectif public qui peut la faire considérer comme relative au droit criminel? La paix publique, l'ordre, la sécurité, la santé, la moralité: ce sont là des buts habituels, bien que non exclusifs, que poursuit ce droit . . .

Ces deux critères ont été constamment appliqués: voir, par exemple, *Boggs c. La Reine*, [1981] 1 R.C.S. 49; *Brasseries Labatt du Canada Ltée c. Procureur général du Canada*, [1980] 1 R.C.S. 914; *R. c. Wetmore*, [1983] 2 R.C.S. 284; *Scowby*, précité; *RJR-MacDonald*, précité; voir également *Knox Contracting Ltd. c. Canada*, [1990] 2 R.C.S. 338, à la p. 348. Le droit criminel au sens du par. 91(27) doit tenter d'atteindre un objectif public en matière criminelle par l'imposition d'interdictions et de peines. Les tentatives déguisées d'empiéter sur des champs de compétence provinciale sous le couvert d'une loi criminelle seront déclarées inconstitutionnelles. Comme le juge La Forest l'a écrit dans l'arrêt *RJR-MacDonald*, à la p. 246: 36

Le fédéral possède une vaste compétence pour ce qui est de l'adoption de lois en matière criminelle relativement à des questions de santé, et cette compétence n'est circonscrite que par les exigences voulant qu'elles comportent une interdiction accompagnée d'une sanction pénale, et qu'elles visent un mal légitime pour la santé publique. Si une loi fédérale donnée possède ces caractéristiques et ne constitue pas par ailleurs un empiétement «spécieux» sur la compétence provinciale, c'est alors une loi valide en matière criminelle . . . [Je souligne.]

Ces commentaires ont été faits à l'égard d'une loi criminelle concernant la santé, mais nous ne voyons pas pourquoi ils ne devraient pas avoir une application générale en ce qui concerne le par. 91(27). Voir également *R. c. Morgentaler*, [1993] 3 R.C.S. 463; *R. c. Hauser*, [1979] 1 R.C.S. 984. 37

La prochaine étape consiste donc à examiner les dispositions contestées pour déterminer si elles satisfont à ces critères. À notre avis, elles n'y satis- 38

1997 CanLII 318 (SCC)

While the protection of the environment is a legitimate public purpose which could support the enactment of criminal legislation, we believe the impugned provisions of the Act are more an attempt to regulate environmental pollution than to prohibit or proscribe it. As such, they extend beyond the purview of criminal law and cannot be justified under s. 91(27).

(i) A Legitimate Public Purpose

39 The appellant and several interveners urged us to uphold the provisions as related to health, one of the criminal public purposes recognized in the *Margarine Reference*, *supra*. In this regard, they cited numerous studies outlining the hazardous effects of PCBs, which were the subject of the Interim Order that gave rise to this litigation. See e.g. Canadian Council of Resource and Environment Ministers, *The PCB Story* (1986); Health and Welfare Canada, *A Review of the Toxicology and Human Health Aspects of PCB's (1978-1982)* (1985). With respect, the toxicity of PCBs, while clearly important to the environment itself, is not directly relevant to this appeal, since what is at issue is not simply the Interim Order, but the enabling provisions under which that order was enacted. That is, the question is not whether PCBs pose a danger to human health, which it appears they clearly do, but whether the Act purports to grant federal regulatory power over substances which may not pose such a danger.

40 In our view, there is no question but that the Act does so. Section 11 provides as follows:

11. For the purposes of this Part, a substance is toxic if it is entering or may enter the environment in a quantity or concentration or under conditions

(*a*) having or that may have an immediate or long-term harmful effect on the environment;

font pas. Bien que la protection de l'environnement soit un objectif public légitime qui pourrait justifier l'adoption d'une loi criminelle, nous croyons que les dispositions contestées de la Loi constituent plus une tentative de réglementer la pollution de l'environnement qu'une tentative de l'interdire ou de la proscrire. Pour cette raison, elles excèdent les limites du droit criminel et ne peuvent être justifiées en vertu du par. 91(27).

(i) Un objectif public légitime

L'appelant et plusieurs intervenants nous ont invités à confirmer la validité des dispositions pour le motif qu'elles avaient trait à la santé qui est l'un des objectifs publics en matière criminelle reconnus dans le *Renvoi sur la margarine*, précité. À cet égard, ils ont cité de nombreuses études exposant les effets nocifs des BPC, qui ont fait l'objet de l'arrêté d'urgence à l'origine du présent litige. Voir, par exemple, Conseil canadien des ministres des ressources et de l'environnement, *La question des BPC* (1986); Santé et Bien-être social Canada, *Examen de la toxicologie et des questions sanitaires relatives aux BPC (1978-1982)* (1985). En toute déférence, la toxicité des BPC, bien que manifestement importante en ce qui concerne l'environnement même, n'est pas directement pertinente relativement au présent pourvoi, étant donné que ce qui est en cause est non seulement l'arrêté d'urgence, mais encore les dispositions habilitantes en vertu desquelles il a été pris. Autrement dit, il ne s'agit pas de savoir si les BPC présentent un danger pour la santé humaine, ce qui semble être clairement le cas, mais plutôt de savoir si la Loi a pour effet d'accorder un pouvoir fédéral de réglementer des substances susceptibles de ne pas présenter un tel danger.

À notre avis, il ne fait aucun doute que tel est l'effet de la Loi. Voici le libellé de l'art. 11:

11. Pour l'application de la présente partie, est toxique toute substance qui pénètre ou peut pénétrer dans l'environnement en une quantité ou une concentration ou dans des conditions de nature à:

a) avoir, immédiatement ou à long terme, un effet nocif sur l'environnement;

1997 CanLII 318 (SCC)

(*b*) constituting or that may constitute a danger to the environment on which human life depends; or

(*c*) constituting or that may constitute a danger in Canada to human life or health.

As noted above, these are not cumulative requirements. It is not necessary that a substance constitute a danger to human life or health for it to be labelled "toxic" and brought under federal control; under s. 11(*a*), it is enough that it may have a harmful effect on the environment. It is not even necessary to show that the aspect of the environment threatened be one upon which human life depends; this is made a separate category under s. 11(*b*), and should not, therefore, be read into s. 11(*a*). A substance which affected groundhogs, for example, but which had no effect on people could be labelled "toxic" under s. 11(*a*) and made subject to wholesale federal regulation.

By defining "toxic" in this way, Parliament has taken explicit steps to ensure that no risk to human life or health, direct or indirect, would have to be proven before regulatory control could be assumed over a given substance. As such, we cannot see how the provisions can be upheld as legislation relating to health. Their scope extends well beyond matters relating to human health into the realm of general ecological protection. Parliament's clear intention was to allow for federal intervention where the environment itself was at risk, whether or not the substances concerned posed a threat to human health and whether or not the aspect of the environment affected was one on which human life depended. Having specifically excluded both direct and indirect danger to human health as preconditions for the application of these provisions, Parliament cannot now say that they were enacted in order to guard against such dangers.

To the extent that La Forest J. suggests that this legislation is supportable as relating to health,

b) mettre en danger l'environnement essentiel pour la vie humaine;

c) constituer un danger au Canada pour la vie ou la santé humaine.

41 Tel que souligné plus haut, ces exigences ne sont pas cumulatives. Il n'est pas nécessaire qu'une substance constitue un danger pour la vie ou la santé humaine pour qu'elle soit qualifiée de «toxique» et assujettie au contrôle fédéral; aux termes de l'al. 11*a*), il suffit qu'elle soit susceptible d'avoir un effet nocif sur l'environnement. Il n'est même pas nécessaire de démontrer que l'aspect de l'environnement menacé est essentiel à la vie humaine; cela fait l'objet d'une catégorie distincte prévue à l'al. 11*b*) et ne doit donc pas être considéré comme faisant partie de l'al. 11*a*). Une substance qui nuirait aux marmottes, par exemple, mais qui n'aurait aucun effet sur les gens pourrait être qualifiée de «toxique» aux termes de l'al. 11*a*) et être assujettie à une réglementation fédérale systématique.

42 En définissant ainsi le mot «toxique», le Parlement a pris des mesures expresses pour s'assurer qu'aucun risque direct ou indirect pour la vie ou la santé humaine ne devrait être établi pour pouvoir réglementer une substance donnée. Pour cette raison, nous ne voyons pas comment les dispositions en cause peuvent être maintenues en tant que mesures législatives concernant la santé. Leur portée dépasse largement les questions de santé humaine et s'étend au domaine de la protection écologique générale. Le Parlement avait manifestement l'intention de permettre au gouvernement fédéral d'intervenir en cas de risque pour l'environnement même, peu importe que les substances concernées constituent ou non une menace pour la santé humaine ou que l'aspect de l'environnement touché soit essentiel ou non à la vie humaine. Après avoir écarté expressément tant le danger direct qu'indirect pour la vie humaine en tant que condition préalable à l'application de ces dispositions, le Parlement ne peut maintenant affirmer qu'elles ont été adoptées afin de parer à de tels dangers.

43 Par conséquent, dans la mesure où le juge La Forest dit que la présente loi peut être justifiée

1997 CanLII 318 (SCC)

therefore, we must respectfully disagree. We agree with him, however, that the protection of the environment is itself a legitimate criminal public purpose, analogous to those cited in the *Margarine Reference*, *supra*. We would not add to his lucid reasoning on this point, save to state explicitly that this purpose does not rely on any of the other traditional purposes of criminal law (health, security, public order, etc.). To the extent that Parliament wishes to deter environmental pollution specifically by punishing it with appropriate penal sanctions, it is free to do so, without having to show that these sanctions are ultimately aimed at achieving one of the "traditional" aims of criminal law. The protection of the environment is itself a legitimate basis for criminal legislation.

44 However, we still do not feel that the impugned provisions qualify as criminal law under s. 91(27). While they have a legitimate criminal purpose, they fail to meet the other half of the *Maragarine Reference* test. The structure of Part II of the Act indicates that they are not intended to prohibit environmental pollution, but simply to regulate it. As we will now explain in further detail, they are not, therefore, criminal law: see *Hauser*, *supra*, at p. 999.

(ii) Prohibitions Backed by Penalties

45 Ascertaining whether a particular statute is prohibitive or regulatory in nature is often more of an art than a science. As Cory J. acknowledged in *Knox Contracting*, *supra*, what constitutes criminal law is often "easier to recognize than define" (p. 347). Some guidelines have, however, emerged from previous jurisprudence.

46 The fact that a statute contains a prohibition and a penalty does not necessarily mean that statute is criminal in nature. Regulatory statutes commonly prohibit violations of their provisions or regulations promulgated under them and provide penal

en tant que loi concernant la santé, nous devons exprimer, en toute déférence, notre désaccord. Nous sommes cependant d'accord avec lui pour dire que la protection de l'environnement est en soi un objectif public légitime en matière criminelle, analogue à ceux mentionnés dans le *Renvoi sur la margarine*, précité. Sans vouloir ajouter quoi que ce soit à son raisonnement limpide sur ce point, nous tenons à préciser que cet objectif ne se fonde sur aucun des autres objectifs traditionnels du droit criminel (santé, sécurité, ordre public, etc.). Dans la mesure où il souhaite dissuader expressément de polluer l'environnement, par l'imposition de peines appropriées, le Parlement est libre de le faire sans avoir à démontrer que ces peines visent, en fin de compte, à atteindre l'un des objectifs «traditionnels» du droit criminel. La protection de l'environnement représente en soi une justification légitime d'une loi criminelle.

Toutefois, nous n'estimons pas que les dispositions contestées peuvent être qualifiées de droit criminel au sens du par. 91(27). Même si elles visent un objectif légitime en matière criminelle, elles ne satisfont pas à l'autre moitié du critère du *Renvoi sur la margarine*. Il ressort de la structure de la partie II de la Loi qu'elles visent non pas à interdire la pollution de l'environnement, mais simplement à la réglementer. Comme nous allons maintenant l'expliquer de manière plus détaillée, elles ne constituent donc pas du droit criminel: voir *Hauser*, précité, à la p. 999.

(ii) Interdictions assorties de peines

Vérifier si une loi particulière est de nature prohibitive ou réglementaire est souvent plus un art qu'une science. Comme le juge Cory l'a reconnu dans l'arrêt *Knox Contracting*, précité, ce qui constitue du droit criminel est souvent «plus facile à reconnaître qu'à définir» (p. 347). Un certain nombre de lignes directrices sont cependant ressorties de la jurisprudence.

La loi qui impose une interdiction et une peine n'est pas nécessairement de nature criminelle. En fait, il arrive souvent que les lois de nature réglementaire interdisent la violation de leurs dispositions ou de leurs règlements d'application et impo-

1997 CanLII 318 (SCC)

sanctions to be applied if violations do, in fact, occur. Any regulatory statute that lacked such prohibitions and penalties would be meaningless. However, as La Forest J. himself recognized in *Thomson Newspapers Ltd. v. Canada (Director of Investigation and Research, Restrictive Trade Practices Commission)*, [1990] 1 S.C.R. 425, at pp. 508-17, and in *R. v. McKinlay Transport Ltd.*, [1990] 1 S.C.R. 627, at p. 650, the penalties that are provided in a regulatory context serve a "pragmatic" or "instrumental" purpose and do not transform the legislation into criminal law. (Also see *Wetmore*, *supra*, *Scowby*, *supra*, and *Knox Contracting*, *supra*.) In environmental law, as in competition law or income tax law, compliance cannot always be ensured by the usual regulatory enforcement techniques, such as periodic or unannounced inspections. Hence, in order to ensure that legal standards are being met, a strong deterrent, the threat of penal sanctions, is necessary. La Forest J. relied on this rationale in concluding that the penal sanctions contained in the *Competition Act* (in *Thomson Newspapers*) and the *Income Tax Act* (in *McKinlay Transport*) did not affect the characterization of those statutes as regulatory in nature for purposes of s. 8 of the *Canadian Charter of Rights and Freedoms*.

sent des peines applicables en cas de violation. Une loi de nature réglementaire qui n'imposerait pas de telles interdictions et peines serait dénuée de sens. Cependant, comme le juge La Forest l'a lui-même reconnu dans l'arrêt *Thomson Newspapers Ltd. c. Canada (Directeur des enquêtes et recherches, Commission sur les pratiques restrictives du commerce)*, [1990] 1 R.C.S. 425, aux pp. 508 à 517, et dans l'arrêt *R. c. McKinlay Transport Ltd.*, [1990] 1 R.C.S. 627, à la p. 650, les peines prescrites dans un contexte de réglementation l'ont été pour des raisons «pragmatiques» ou «pratiques» et n'ont pas pour effet de transformer la loi en loi criminelle. (Voir également les arrêts *Wetmore*, *Scowby*, et *Knox Contracting*, précités.) En droit de l'environnement, tout comme en droit de la concurrence ou en droit fiscal, il n'est pas toujours possible d'assurer le respect de la loi au moyen des techniques habituelles d'application des règlements, telles les inspections périodiques ou imprévues, d'où la nécessité de disposer d'un élément dissuasif puissant, soit la menace de sanctions pénales, pour assurer le respect des normes prescrites par la loi. Le juge La Forest s'est fondé sur ce raisonnement pour conclure que les peines prévues dans la *Loi sur la concurrence* (dans *Thomson Newspapers*) et la *Loi de l'impôt sur le revenu* (dans *McKinlay Transport*) n'avaient aucune incidence sur la qualification de ces lois comme étant des lois de nature réglementaire pour les fins de l'art. 8 de la *Charte canadienne des droits et libertés.*

At the same time, however, a criminal law does not have to consist solely of blanket prohibitions. It may, as La Forest J. noted in *RJR-MacDonald*, *supra*, at pp. 263-64, "validly contain exemptions for certain conduct without losing its status as criminal law". See also *Lord's Day Alliance of Canada v. Attorney General of British Columbia*, [1959] S.C.R. 497; *Morgentaler*, *supra*; *R. v. Furtney*, [1991] 3 S.C.R. 89. These exemptions may have the effect of establishing "regulatory" schemes which confer a measure of discretionary authority without changing the character of the law, as was the case in *RJR-MacDonald*.

47 En même temps, une loi en matière criminelle n'a pas à être composée uniquement d'interdictions générales. Elle peut, comme le juge La Forest l'a souligné dans l'arrêt *RJR-MacDonald*, précité, aux pp. 263 et 264, «validement comporter des exemptions relativement à certaines conduites sans pour autant perdre son caractère». Voir également *Lord's Day Alliance of Canada c. Attorney General of British Columbia*, [1959] R.C.S. 497; *Morgentaler*, précité; *R. c. Furtney*, [1991] 3 R.C.S. 89. Il se peut que ces exemptions aient pour effet d'établir des régimes «de réglementation» conférant une certaine mesure de pouvoir discrétionnaire sans pour autant modifier la nature de la loi, comme c'était le cas dans l'arrêt *RJR-MacDonald*.

1997 CanLII 318 (SCC)

48 Determining when a piece of legislation has crossed the line from criminal to regulatory involves, in our view, considering the nature and extent of the regulation it creates, as well as the context within which it purports to apply. A scheme which is fundamentally regulatory, for example, will not be saved by calling it an "exemption". As Professor Hogg suggests, *supra*, at p. 18-26, "the more elaborate [a] regulatory scheme, the more likely it is that the Court will classify the dispensation or exemption as being regulatory rather than criminal". At the same time, the subject matter of the impugned law may indicate the appropriate approach to take in characterizing the law as criminal or regulatory.

Pour déterminer quand une loi passe du domaine criminel au domaine réglementaire, il faut, à notre avis, examiner la nature et la portée de la réglementation qu'elle crée, ainsi que le contexte dans lequel elle est censée s'appliquer. Par exemple, il ne sera pas possible de sauvegarder un régime essentiellement réglementaire en le qualifiant d'«exemption». Comme le professeur Hogg le laisse entendre, *op. cit.*, à la p. 18-26, [TRADUCTION] «plus [un] régime de réglementation est élaboré, plus il est probable que la cour qualifiera la dérogation ou l'exemption de réglementaire au lieu de criminelle». En même temps, il se peut que le sujet sur lequel porte la loi contestée indique la méthode qu'il convient d'adopter pour déterminer s'il s'agit d'une loi de nature criminelle ou réglementaire.

49 Having examined the legislation at issue in this case, we have no doubt that it is essentially regulatory in nature, and therefore outside the scope of s. 91(27). In order to have an "exemption", there must first be a prohibition in the legislation from which that exemption is derived. Thus, the *Tobacco Products Control Act*, S.C. 1988, c. 20, at issue in *RJR-MacDonald*, *supra*, contained broad prohibitions against the advertising and promotion of tobacco products in Canada. Section 4 of that Act provided that "[n]o person shall advertise any tobacco product offered for sale in Canada". It also provided a labelling requirement in the form of a prohibition, stating in s. 9 that it was illegal to sell tobacco products without printed health warnings. Any exemptions from these general prohibitions were just that — exceptions to a general rule.

Après avoir examiné la loi en cause dans le présent pourvoi, nous ne doutons nullement qu'elle est essentiellement de nature réglementaire et qu'elle ne relève donc pas du par. 91(27). Pour qu'il y ait «exemption», il faut d'abord qu'il y ait une interdiction dans la loi dont découle cette exemption. Ainsi, la *Loi réglementant les produits du tabac*, L.C. 1988, ch. 20, dont il est question dans l'arrêt *RJR-MacDonald*, précité, imposait des interdictions générales en matière de publicité et de promotion des produits du tabac au Canada. L'article 4 de cette loi prévoyait que «[l]a publicité en faveur des produits du tabac mis en vente au Canada est interdite». Elle prescrivait aussi une exigence en matière d'étiquetage qui revêtait la forme d'une interdiction, en déclarant à l'art. 9 qu'il était interdit de vendre des produits du tabac sur lesquels n'était pas imprimé un message concernant leurs effets sur la santé. Toute exemption relative à ces interdictions générales constituaient précisément des exceptions à une règle générale.

50 Similarly, the *Food and Drugs Act*, R.S.C., 1985, c. F-27, upheld in *Wetmore*, *supra*, contains several prohibitions at the beginning of its Part I. It prohibits, *inter alia*, the advertising of any food, drug, cosmetic or device with respect to a prescribed list of diseases, disorders or abnormal physical states (s. 3); the selling of food or drug that is adulterated or prepared under unsanitary

De même, la *Loi sur les aliments et drogues*, L.R.C. (1985), ch. F-27, dont la validité est confirmée dans *Wetmore*, précité, contient plusieurs interdictions au début de sa partie I. Elle interdit notamment de faire la publicité d'un aliment, d'une drogue, d'un cosmétique ou d'un instrument relativement à une liste établie de maladies, de désordres ou d'état physiques anormaux (art. 3),

1997 CanLII 318 (SCC)

conditions (ss. 4 and 8); the labelling, packaging, selling or advertising of any food, drug or device in a manner that is false, misleading or deceptive (ss. 5(1), 9(1) and 20(1)); the distribution of any drug as a sample (s. 14); and the selling of any cosmetic that may cause injury to the health of the user or was prepared under unsanitary conditions (s. 16). There are also a number of prohibitions with respect to controlled drugs in Part III of the Act and restricted drugs in Part IV.

de vendre un aliment ou une drogue falsifiés ou préparés dans des conditions non hygiéniques (art. 4 et 8), d'étiqueter, d'emballer, de vendre un aliment, une drogue ou un instrument, ou d'en faire la publicité, de manière fausse, trompeuse ou mensongère (par. 5(1), 9(1) et 20(1)), de distribuer une drogue comme échantillon (art. 14), et de vendre un cosmétique susceptible de nuire à la santé de la personne qui en fait usage ou qui a été préparé dans des conditions non hygiéniques (art. 16). On trouve également un certain nombre d'interdictions relatives à des drogues contrôlées dans la partie III de la Loi et à des drogues d'usage restreint dans la partie IV.

In the legislation at issue in this appeal, on the other hand, no such prohibitions appear. Section 34(1) of the *Canadian Environmental Protection Act* reads as follows:

Par contre, la loi faisant l'objet du présent pourvoi ne contient aucune interdiction de cette nature. Voici le libellé du par. 34(1) de la *Loi canadienne sur la protection de l'environnement*: 51

34. (1) Subject to subsection (3), the Governor in Council may, on the recommendation of the Ministers and after the federal-provincial advisory committee is given an opportunity to provide its advice under section 6, make regulations with respect to a substance specified on the List of Toxic Substances in Schedule I, including regulations providing for, or imposing requirements respecting,

34. (1) Sous réserve du paragraphe (3), le gouverneur en conseil peut, sur recommandation des ministres et après avoir donné au comité consultatif fédéro-provincial la possibilité de formuler ses conseils dans le cadre de l'article 6, prendre des règlements concernant une substance inscrite sur la liste de l'annexe I, notamment en ce qui touche:

(*a*) the quantity or concentration of the substance that may be released into the environment either alone or in combination with any other substance from any source or type of source;

a) la quantité ou la concentration dans lesquelles elle peut être rejetée dans l'environnement, seule ou combinée à une autre substance émise par quelque source ou type de sources que ce soit;

(*b*) the places or areas where the substance may be released;

b) les lieux ou zones de rejet;

(*c*) the commercial, manufacturing or processing activity in the course of which the substance may be released;

c) les activités commerciales, de fabrication ou de transformation au cours desquelles le rejet est permis;

(*d*) the manner in which and conditions under which the substance may be released into the environment, either alone or in combination with any other substance;

d) les modalités et conditions de son rejet, seule ou en combinaison avec une autre substance;

(*e*) the quantity of the substance that may be manufactured, processed, used, offered for sale or sold in Canada;

e) la quantité qui peut être fabriquée, transformée, utilisée, mise en vente ou vendue au Canada;

(*f*) the purposes for which the substance or a product containing the substance may be imported, manufactured, processed, used, offered for sale or sold;

f) les fins pour lesquelles la substance ou un produit qui en contient peut être importé, fabriqué, transformé, utilisé, mis en vente ou vendu;

1997 CanLII 318 (SCC)

(*g*) the manner in which and conditions under which the substance or a product containing the substance may be imported, manufactured, processed or used;

(*h*) the quantities or concentrations in which the substance may be used;

(*i*) the quantities or concentrations of the substance that may be imported;

(*j*) the countries from or to which the substance may be imported or exported;

(*k*) the conditions under which, the manner in which and the purposes for which the substance may be imported or exported;

(*l*) the total, partial or conditional prohibition of the manufacture, use, processing, sale, offering for sale, import or export of the substance or a product containing the substance;

(*m*) the quantity or concentration of the substance that may be contained in any product manufactured, imported, exported or offered for sale in Canada;

(*n*) the manner in which and conditions under which and the purposes for which the substance or a product containing the substance may be advertised or offered for sale;

(*o*) the manner in which and conditions under which the substance or a product or material containing the substance may be stored, displayed, handled, transported or offered for transport;

(*p*) the packaging and labelling of the substance or a product or material containing the substance;

(*q*) the manner, conditions, places and method of disposal of the substance or a product or material containing the substance, including standards for the construction, maintenance and inspection of disposal sites;

(*r*) the submission to the Minister, on request or at such times as are prescribed, of information relating to the substance;

(*s*) the maintenance of books and records for the administration of any regulation made under this section;

(*t*) the conduct of sampling, analyses, tests, measurements or monitoring of the substance and the submission of the results to the Minister;

(*u*) the submission of samples of the substance to the Minister;

g) les modalités et conditions d'importation, de fabrication, de transformation ou d'utilisation de la substance ou d'un produit qui en contient;

h) la quantité ou la concentration dans lesquelles celle-ci peut être utilisée;

i) la quantité ou la concentration dans lesquelles celle-ci peut-être importée;

j) les pays d'exportation ou d'importation;

k) les conditions, modalités et objets de l'importation ou de l'exportation;

l) l'interdiction totale, partielle ou conditionnelle de la fabrication, de l'utilisation, de la transformation, de la vente, de la mise en vente, de l'importation ou de l'exportation de la substance ou d'un produit qui en contient;

m) la quantité ou concentration de celle-ci que peut contenir un produit fabriqué, importé, exporté ou mis en vente au Canada;

n) les modalités, les conditions et l'objet de la publicité et de la mise en vente de la substance ou d'un produit qui en contient;

o) les modalités et les conditions de stockage, de présentation, de transport, de manutention ou d'offre de transport soit de la substance, soit d'un produit ou d'une matière qui en contient;

p) l'emballage et l'étiquetage soit de la substance, soit d'un produit ou d'une matière qui en contient;

q) les modalités, lieux et méthodes d'élimination soit de la substance, soit d'un produit ou d'une matière qui en contient, notamment les normes de construction, d'entretien et d'inspection des sites d'élimination;

r) la transmission au ministre, sur demande ou au moment fixé par règlement, de renseignements concernant la substance;

s) la tenue de livres et de registres pour l'exécution des règlements d'application du présent article;

t) l'échantillonnage, l'analyse, l'essai, la mesure ou la surveillance de la substance et la transmission des résultats au ministre;

u) la transmission d'échantillons de la substance au ministre;

1997 CanLII 318 (SCC)

(*v*) the methods and procedures for conducting sampling, analyses, tests, measurements or monitoring of the substance;

(*w*) circumstances or conditions under which the Minister may, for the proper administration of this Act, modify

(i) any requirement for sampling, analyses, tests, measurements or monitoring, or

(ii) the methods and procedures for conducting any required sampling, analyses, tests, measurements or monitoring; and

(*x*) any other matter necessary to carry out the purposes of this Part.

v) les méthodes et procédures à suivre pour les opérations mentionnées à l'alinéa *t*);

w) les cas ou conditions de modification par le ministre, pour l'exécution de la présente loi, soit des exigences imposées pour les opérations mentionnées à l'alinéa *t*), soit des méthodes et procédures afférentes;

x) toute autre mesure d'application de la présente partie.

This section is not ancillary to existing prohibitions found elsewhere in the Act or to exemptions to such prohibitions. It is not itself prohibitory in nature. In fact, the only time the word "prohibition" appears in s. 34(1) is in s. 34(1)(*l*), which provides that the Governor in Council may, at his or her discretion, prohibit the manufacture, import, use or sale of a given substance. Clearly, this is not analogous to the broad general prohibitions found in the statutes cited above.

52 Ce paragraphe n'est pas accessoire aux interdictions qui se trouvent ailleurs dans la Loi, ni aux exemptions relatives à ces interdictions. Il n'est pas lui-même de nature prohibitive. En fait, le mot «interdiction» n'est employé qu'une seule fois au par. 34(1), soit à l'al. 34(1)*l*), lequel prévoit que le gouverneur en conseil peut, à sa discrétion, interdire la fabrication, l'importation, l'utilisation ou la vente d'une substance particulière. De toute évidence, cela est différent des interdictions générales imposées dans les lois précitées.

The only other mentions of prohibition in relation to the impugned provisions are in ss. 113(*f*) and 113(*i*) of the Act, which provide that failure to comply with a regulation made under ss. 34 or 35 is an offence. The prohibitions, such as they are, are ancillary to the regulatory scheme, not the other way around. This strongly suggests that the focus of the legislation is regulation rather than prohibition.

53 Les seules autres mentions d'une interdiction concernant les dispositions contestées se trouvent aux al. 113*f*) et 113*i*) de la Loi, qui prévoient que l'omission de se conformer à un règlement pris sous le régime de l'art. 34 ou de l'art. 35 constitue une infraction. Les interdictions, telles qu'elles existent, sont accessoires au régime de réglementation, et non l'inverse. Cela laisse fortement entendre que la Loi est axée sur la réglementation plutôt que sur les interdictions.

Moreover, as Professor Hogg notes, *supra*, at p. 18-24:

A criminal law ordinarily consists of a prohibition which is to be self-applied by the persons to whom it is addressed. There is not normally any intervention by an administrative agency or official prior to the application of the law. The law is "administered" by law enforcement officials and courts of criminal jurisdiction only in the sense that they can bring to bear the machinery of punishment after the prohibited conduct has occurred.

54 En outre, comme le professeur Hogg le souligne, *op. cit.*, à la p. 18-24:

[TRADUCTION] Une loi criminelle consiste ordinairement en une interdiction à laquelle se soumettent d'elles-mêmes les personnes qu'elle vise. Normalement, aucun organisme ni fonctionnaire administratif n'intervient avant l'application de la loi. La loi est «appliquée» par les personnes responsables de son application et les cours de juridiction criminelle uniquement en ce sens qu'elles peuvent déclencher le mécanisme de sanction après que la conduite interdite a eu lieu.

1997 CanLII 318 (SCC)

55 In this case, there is no offence until an administrative agency "intervenes". Sections 34 and 35 do not define an offence at all: which, if any, substances will be placed on the List of Toxic Substances, as well as the norms of conduct regarding these substances, are to be defined on an on-going basis by the Ministers of Health and the Environment. It would be an odd crime whose definition was made entirely dependent on the discretion of the Executive. This further suggests that the Act's true nature is regulatory, not criminal, and that the offences created by s. 113 are regulatory offences, not "true crimes": see *R. v. Wholesale Travel Group Inc.*, [1991] 3 S.C.R. 154, *per* Cory J. Our colleague, La Forest J., would hold that the scheme of the impugned act is an effective means of avoiding unnecessarily broad prohibitions and carefully targeting specific toxic substances. The regulatory mechanism allows the schemes to be changed flexibly, as the need arises. Of course, simply because a scheme is effective and flexible does not mean it is *intra vires* the federal Parliament.

En l'espèce, il n'y a aucune infraction tant et aussi longtemps qu'un organisme administratif n'«intervient» pas. Les articles 34 et 35 ne définissent pas une infraction: il incombe, de manière continue, aux ministres de la Santé et de l'Environnement de définir les substances qui seront inscrites sur la liste des substances toxiques, de même que les normes de conduite relatives à ces substances. Ce serait un crime singulier dont la définition a été laissée à l'entière discrétion du pouvoir exécutif. Cela laisse aussi entendre que la véritable nature de la Loi est réglementaire et non criminelle et que les infractions créées par l'art. 113 sont de nature réglementaire et non des «crimes proprement dits»: voir *R. c. Wholesale Travel Group Inc.*, [1991] 3 R.C.S. 154, le juge Cory. Selon notre collègue le juge La Forest, le régime de la loi contestée est un moyen efficace d'éviter les interdictions inutilement générales et de cibler minutieusement des substances toxiques particulières. Le mécanisme de réglementation permet de modifier les régimes avec souplesse, au besoin. Il va sans dire que le simple fait qu'un régime soit efficace et souple ne signifie pas qu'il relève de la compétence du Parlement fédéral.

56 This is particularly true in light of the striking breadth of the impugned provisions. The 24 listed heads of authority in s. 34 allow for the regulation of every conceivable aspect of toxic substances; in fact, in case anything was left out, s. 34(1)(*x*) provides for regulations concerning "any other matter necessary to carry out the purposes of this Part". It is highly unlikely, in our opinion, that Parliament intended to leave the criminalization of such a sweeping area of behaviour to the discretion of the Ministers of Health and the Environment.

Cela est particulièrement vrai compte tenu de l'ampleur remarquable des dispositions contestées. Les 24 rubriques de compétence énumérées à l'art. 34 permettent la réglementation de tous les aspects imaginables des substances toxiques; en fait, au cas où il y aurait eu oubli, l'al. 34(1)*x*) prévoit la prise de règlements concernant «toute autre mesure d'application de la présente partie». Il est fort improbable, à notre avis, que le Parlement ait eu l'intention de laisser la criminalisation d'un aussi vaste domaine de comportement à la discrétion des ministres de la Santé et de l'Environnement.

57 Moreover, this process is further complicated by the equivalency provisions in s. 34(6) of the Act. Under this provision, the Governor in Council may exempt a province from the application of regulations made under ss. 34 or 35 if that province already has equivalent regulations in force there. This would be a very unusual provision for a criminal law. Provinces do not have the jurisdiction to

De plus, les dispositions équivalentes mentionnées au par. 34(6) de la Loi rendent ce processus d'autant plus complexe. Aux termes de ce paragraphe, le gouverneur en conseil peut exempter une province de l'application des règlements pris en vertu des art. 34 et 35 lorsque des dispositions équivalentes à ces règlements y sont déjà en vigueur. Il s'agirait d'une disposition très inusitée

1997 CanLII 318 (SCC)

enact criminal legislation, nor can the federal government delegate such jurisdiction to them: *Attorney General of Nova Scotia v. Attorney General of Canada*, [1951] S.C.R. 31. Any environmental legislation enacted by the provinces must, therefore, be of a regulatory nature. Deferring to provincial regulatory schemes on the basis that they are "equivalent" to federal regulations made under s. 34(1) creates a strong presumption that the federal regulations are themselves also of a regulatory, not criminal, nature.

pour une loi criminelle. Les provinces n'ont pas compétence pour adopter des lois criminelles et le gouvernement fédéral ne peut pas non plus leur déléguer une telle compétence: *Attorney General of Nova Scotia c. Attorney General of Canada*, [1951] R.C.S. 31. Toute loi en matière d'environnement adoptée par une province doit donc être de nature réglementaire. Le fait de s'en remettre aux régimes de réglementation provinciaux pour le motif qu'ils sont «équivalents» aux règlements fédéraux pris sous le régime du par. 34(1) laisse fortement présumer que les règlements fédéraux eux-mêmes sont aussi de nature réglementaire et non pas criminelle.

The appellant relies on this Court's decision in *RJR-MacDonald*, *supra*, arguing that the statutory regime in this case is analogous to that upheld (on division of powers grounds) in *RJR-MacDonald*. We believe this reliance is, with respect, misplaced. As noted above, the legislation at issue in *RJR-MacDonald* contained broad prohibitions, tempered by certain exemptions. The impugned provisions in this case, on the other hand, involve no such general prohibition. In our view, they can only be characterized as a broad delegation of regulatory authority to the Governor in Council. The aim of these provisions is not to prohibit toxic substances or any aspect of their use, but simply to control the manner in which these substances will be allowed to interact with the environment.

58 L'appelant se fonde sur l'arrêt *RJR-MacDonald*, précité, de notre Cour en soutenant que le régime législatif en l'espèce est analogue à celui qui y a été maintenu (pour des raisons de partage des pouvoirs). Nous estimons, en toute déférence, qu'il est déplacé de s'en remettre ainsi à cet arrêt. Comme nous l'avons vu, la loi en cause dans *RJR-MacDonald* contenait des interdictions générales tempérées par certaines exemptions. Par contre, les dispositions contestées en l'espèce ne comportent aucune interdiction générale de cette nature. À notre avis, elles peuvent seulement être qualifiées de délégation générale de pouvoir réglementaire au gouverneur en conseil. Ces dispositions visent non pas à interdire les substances toxiques ou encore l'un ou l'autre aspect de leur utilisation, mais simplement à contrôler la façon dont elles pourront interagir avec l'environnement.

RJR-MacDonald, may be further distinguished, in our view. The *Tobacco Products Control Act* addressed a narrow field of activity: the advertising and promotion of tobacco products. The impugned provisions here deal with a much broader area of concern: the release of substances into the environment. This Court has unanimously held that the environment is a subject matter of shared jurisdiction, that is, that the Constitution does not assign it exclusively to either the provinces or Parliament: *Oldman River*, *supra*, at p. 63; see also *Crown Zellerbach*, *supra*, at pp. 455-56, *per* La Forest J. A decision by the framers of the Constitution not to give one level of government

59 À notre avis, il est possible d'établir une autre distinction d'avec l'arrêt *RJR-MacDonald*. La *Loi réglementant les produits du tabac* portait sur un champ d'activités restreint: la publicité et la promotion des produits du tabac. Les dispositions contestées en l'espèce traitent d'un sujet de préoccupation beaucoup plus vaste: le rejet de substances dans l'environnement. Notre Cour a conclu, à l'unanimité, que l'environnement est un sujet de compétence partagée, c'est-à-dire que la Constitution ne l'attribue pas exclusivement aux provinces ou au Parlement: *Oldman River*, précité, à la p. 63; voir également *Crown Zellerbach*, précité, aux pp. 455 et 456, le juge La Forest. Une décision des

1997 CanLII 318 (SCC)

exclusive control over a subject matter should, in our opinion, act as a signal that the two levels of government are meant to operate in tandem with regard to that subject matter. One level should not be allowed to take over the field so as to completely dwarf the presence of the other. This does not mean that no regulation will be permissible, but wholesale regulatory authority of the type envisaged by the Act is, in our view, inconsistent with the shared nature of jurisdiction over the environment. As La Forest J. noted in his dissenting reasons in *Crown Zellerbach*, at p. 455, "environmental pollution alone [i.e. as a subject matter of legislative authority] is itself all-pervasive. It is a by-product of everything we do. In man's relationship with his environment, waste is unavoidable."

rédacteurs de la Constitution de ne pas attribuer à un ordre de gouvernement le contrôle exclusif d'une matière devrait indiquer, à notre avis, que les deux ordres de gouvernement sont appelés à agir de concert à cet égard. On ne devrait pas permettre à un ordre de gouvernement d'investir le domaine de manière à éclipser totalement la présence de l'autre. Cela signifie non pas qu'aucune réglementation ne sera acceptable, mais qu'un pouvoir de réglementation systématique du genre prévu par la Loi est, à notre avis, incompatible avec la nature partagée de la compétence en matière d'environnement. Comme le juge La Forest l'a souligné dans ses motifs de dissidence, dans l'arrêt *Crown Zellerbach*, à la p. 455, «la pollution de l'environnement [c.-à-d. en tant que sujet de compétence législative] se fait elle-même sentir partout. C'est le sous-produit de tout ce que nous faisons. Dans les rapports qu'a l'être humain avec son environnement, les déchets sont une chose inévitable.»

60 We agree completely with this statement. Almost everything we do involves "polluting" the environment in some way. The impugned provisions purport to grant regulatory authority over all aspects of any substance whose release into the environment "ha[s] or . . . may have an immediate or long-term harmful effect on the environment" (s. 11(*a*)). One wonders just what, if any, role will be left for the provinces in dealing with environmental pollution if the federal government is given such total control over the release of these substances. Moreover, the countless spheres of human activity, both collective and individual, which could potentially fall under the ambit of the Act are apparent. Many of them fall within areas of jurisdiction granted to the provinces under s. 92. Granting Parliament the authority to regulate so completely the release of substances into the environment by determining whether or not they are "toxic" would not only inescapably preclude the possibility of shared environmental jurisdiction; it would also infringe severely on other heads of power assigned to the provinces. In this respect, we can do no better than to quote Professor Gibson, who wrote as follows in his article "Constitu-

Nous souscrivons entièrement à cet énoncé. Presque tout ce que nous faisons «pollue» l'environnement d'une façon ou d'une autre. Les dispositions contestées visent à accorder un pouvoir de réglementer tous les aspects d'une substance dont le rejet dans l'environnement «[a], immédiatement ou à long terme, un effet nocif sur l'environnement» (al. 11*a*)). On se demande bien quel rôle, s'il en est, sera laissé aux provinces relativement à la pollution de l'environnement si un contrôle aussi absolu du rejet de ces substances est accordé au gouvernement fédéral. En outre, les innombrables domaines d'activité humaine, aussi bien collective qu'individuelle, susceptibles d'être assujettis à la Loi sont manifestes. Un bon nombre d'entre eux relèvent de champs de compétence conférés aux provinces en vertu de l'art. 92. Le fait d'accorder au Parlement le pouvoir de réglementer de façon aussi complète le rejet de substances dans l'environnement par la détermination de leur nature «toxique» ou non éliminerait inévitablement non seulement la possibilité d'avoir une compétence partagée en matière d'environnement, mais encore empiéterait également de façon considérable sur d'autres chefs de compétence provinciale. À cet égard, nous ne pouvons que citer le professeur Gibson, qui a écrit ce qui suit dans son article

1997 CanLII 318 (SCC)

tional Jurisdiction over Environmental Management in Canada" (1973), 23 *U.T.L.J.* 54, at p. 85:

> [I]t is . . . obvious that 'environmental management' could never be treated as a constitutional unit under one order of government in any constitution that claimed to be federal, because no system in which one government was so powerful would be federal.

For all of the above reasons, we are unable to uphold the impugned provisions of the Act under the federal criminal law power. That being said, we wish to add that none of this should be read as foredooming future attempts by Parliament to create an effective national — or, indeed, international — strategy for the protection of the environment. We agree with La Forest J. that achieving such a strategy is a public purpose of extreme importance and one of the major challenges of our time. There are, in this regard, many measures open to Parliament which will not offend the division of powers set out by the Constitution, notably the creation of environmental crimes. Nothing, in our view, prevents Parliament from outlawing certain kinds of behaviour on the basis that they are harmful to the environment. But such legislation must actually seek to outlaw this behaviour, not merely regulate it.

Other potential avenues include the power to address interprovincial or international environmental concerns under the peace, order and good government power, which is discussed below. Parliament is not without power to act in pursuit of national policies on environmental protection. But it must do so pursuant to the balance of powers assigned by ss. 91 and 92. Environmental protection must be achieved in accordance with the Constitution, not in spite of it. As Professor Bowden concludes in her case comment on *Oldman River*, *supra*, (1992), 56 *Sask. L. Rev.* 209, at pp. 219-20, "it is only through legislative and policy initiatives

intitulé «Constitutional Jurisdiction over Environmental Management in Canada» (1973), 23 *U.T.L.J.* 54, à la p. 85:

> [TRADUCTION] [I]l est [. . .] évident que, la «gestion de l'environnement» ne pourrait jamais être considérée comme une matière constitutionnelle relevant d'un seul ordre de gouvernement en vertu d'une constitution se voulant fédérale, car aucun système dans lequel un gouvernement serait si puissant ne pourrait être fédéral.

61 Pour tous les motifs qui précèdent, nous ne pouvons confirmer la validité des dispositions contestées de la Loi en vertu de la compétence fédérale en matière de droit criminel. Cela dit, nous tenons à ajouter que les présents motifs ne doivent nullement être interprétés comme signifiant que toute tentative future du Parlement de concevoir une stratégie efficace nationale, voire internationale, en matière de protection de l'environnement sera vouée à l'échec. Nous sommes d'accord avec le juge La Forest pour dire que la conception d'une telle stratégie est un objectif public de la plus haute importance et l'un des principaux défis de notre époque. À cet égard, il est loisible au Parlement de prendre de nombreuses mesures qui ne contreviendront pas au partage des compétences énoncé dans la Constitution, notamment la création de crimes contre l'environnement. Rien, à notre avis, n'empêche le Parlement de proscrire certains types de conduite pour le motif qu'ils sont nocifs pour l'environnement. Toutefois, une telle mesure législative doit effectivement viser à proscrire la conduite en cause et non pas simplement à la réglementer.

62 Parmi les autres possibilités qui s'offrent, il y a le pouvoir de s'attaquer aux problèmes d'environnement interprovinciaux ou internationaux en vertu de la compétence en matière de paix, d'ordre et de bon gouvernement, qui est analysée plus loin. Le Parlement n'est pas dépourvu du pouvoir d'agir pour mettre en œuvre des politiques nationales en matière de protection de l'environnement. Cependant, il doit agir conformément au partage des pouvoirs prévu aux art. 91 et 92. La protection de l'environnement doit être réalisée conformément à la Constitution et non malgré celle-ci. Comme le professeur Bowden le conclut dans son commentaire de l'arrêt *Oldman River*, précité, (1992), *Sask. L.*

1997 CanLII 318 (SCC)

at and between both levels of government that satisfactory solutions may be attainable".

63 The impugned provisions are not justified under s. 91(27) of the *Constitution Act, 1867*. We will now consider the appellant's second argument, namely that the provisions may be upheld under the peace, order and good government power.

D. *Peace, Order and Good Government*

64 The appellant argues that ss. 34 and 35 of the Act fall within the residual jurisdiction of Parliament under the peace, order and good government (POGG) power to legislate respecting matters of national concern, as provided for in the introductory paragraph of s. 91 of the *Constitution Act, 1867*. No argument is made with respect to the national emergency branch of POGG, and therefore only the national concern doctrine is at issue.

65 The jurisprudence of this Court with respect to the peace, order and good government provision of the Constitution was thoroughly reviewed by Le Dain J. for the majority in *Crown Zellerbach*, *supra*. Relying on Beetz J.'s comments in *Reference re Anti-Inflation Act*, *supra*, Le Dain J. adopted the following criteria in order to determine whether a matter constitutes a "national concern", at pp. 431-32:

1. The national concern doctrine is separate and distinct from the national emergency doctrine of the peace, order and good government power, which is chiefly distinguishable by the fact that it provides a constitutional basis for what is necessarily legislation of a temporary nature;

2. The national concern doctrine applies to both new matters which did not exist at Confederation and to matters which, although originally matters of a local or private nature in a province, have since, in the

Rev. 209, aux pp. 219 et 220, [TRADUCTION] «ce n'est qu'au moyen d'initiatives législatives et politiques au sein des deux ordres de gouvernement et entre ceux-ci que des solutions satisfaisantes peuvent être trouvées».

Les dispositions contestées ne sont pas justifiées en vertu du par. 91(27) de la *Loi constitutionnelle de 1867*. Nous allons maintenant examiner le deuxième argument de l'appelant, celui voulant qu'il soit possible de confirmer la validité des dispositions en cause en vertu de la compétence en matière de paix, d'ordre et de bon gouvernement.

D. *La paix, l'ordre et le bon gouvernement*

L'appelant soutient que les art. 34 et 35 de la Loi relèvent de la compétence résiduelle que le Parlement possède en matière de paix, d'ordre et de bon gouvernement pour légiférer à l'égard de questions d'intérêt national, prévue au paragraphe introductif de l'art. 91 de la *Loi constitutionnelle de 1867*. Comme aucun argument n'a été avancé au sujet du volet «urgence nationale» de la compétence en matière de paix, d'ordre et de bon gouvernement, seule la théorie de l'intérêt national est en cause.

La jurisprudence de notre Cour en ce qui concerne la disposition constitutionnelle relative à la paix, à l'ordre et au bon gouvernement a été examinée minutieusement par le juge Le Dain, au nom des juges majoritaires, dans l'arrêt *Crown Zellerbach*, précité. Se fondant sur les commentaires du juge Beetz dans le *Renvoi sur la Loi anti-inflation*, précité, le juge Le Dain adopte les critères suivants pour déterminer si une question est d'«intérêt national», aux pp. 431 et 432:

1. La théorie de l'intérêt national est séparée et distincte de la théorie de la situation d'urgence nationale justifiant l'exercice de la compétence en matière de paix, d'ordre et de bon gouvernement, qui peut se distinguer surtout par le fait qu'elle offre un fondement constitutionnel à ce qui est nécessairement une mesure législative provisoire;

2. La théorie de l'intérêt national s'applique autant à de nouvelles matières qui n'existaient pas à l'époque de la Confédération qu'à des matières qui, bien qu'elles fussent à l'origine de nature locale ou privée dans

1997 CanLII 318 (SCC)

absence of national emergency, become matters of national concern;

3. For a matter to qualify as a matter of national concern in either sense it must have a singleness, distinctiveness and indivisibility that clearly distinguishes it from matters of provincial concern and a scale of impact on provincial jurisdiction that is reconcilable with the fundamental distribution of legislative power under the Constitution;

4. In determining whether a matter has attained the required degree of singleness, distinctiveness and indivisibility that clearly distinguishes it from matters of provincial concern it is relevant to consider what would be the effect on extra-provincial interests of a provincial failure to deal effectively with the control or regulation of the intra-provincial aspects of the matter.

une province, sont depuis devenues des matières d'intérêt national, sans qu'il y ait situation d'urgence nationale;

3. Pour qu'on puisse dire qu'une matière est d'intérêt national dans un sens ou dans l'autre, elle doit avoir une unicité, une particularité et une indivisibilité qui la distinguent clairement des matières d'intérêt provincial, et un effet sur la compétence provinciale qui soit compatible avec le partage fondamental des pouvoirs législatifs effectué par la Constitution;

4. Pour décider si une matière atteint le degré requis d'unicité, de particularité et d'indivisibilité qui la distingue clairement des matières d'intérêt provincial, il est utile d'examiner quel effet aurait sur les intérêts extra-provinciaux l'omission d'une province de s'occuper efficacement du contrôle ou de la réglementation des aspects intraprovinciaux de cette matière.

Assuming that the protection of the environment and of human life and health against any and all potentially harmful substances could be a "new matter" which would fall under the POGG power, we must then determine whether that matter has the required "singleness, distinctiveness and indivisibility that clearly distinguishes it from matters of provincial concern" and whether its "impact on provincial jurisdiction . . . is reconcilable with the fundamental distribution of legislative power under the Constitution". Only if these criteria are satisfied will the matter be one of national concern.

66 Tenant pour acquis que la protection de l'environnement et de la vie et de la santé humaines contre toutes les substances potentiellement nocives pourrait constituer une «nouvelle matière» relevant de la compétence concernant la paix, l'ordre et le bon gouvernement, nous devons déterminer si cette matière a l'«unicité, [la] particularité et [l']indivisibilité [requises] qui la distinguent clairement des matières d'intérêt provincial» et si elle a un «effet sur la compétence provinciale qui soit compatible avec le partage fondamental des pouvoirs législatifs effectué par la Constitution». Ce n'est que si ces critères sont respectés que la matière sera d'intérêt national.

(i) Singleness, Distinctiveness and Indivisibility

(i) Unicité, particularité et indivisibilité

The test for singleness, distinctiveness and indivisibility is a demanding one. Because of the high potential risk to the Constitution's division of powers presented by the broad notion of "national concern", it is crucial that one be able to specify precisely what it is over which the law purports to claim jurisdiction. Otherwise, "national concern" could rapidly expand to absorb all areas of provincial authority. As Le Dain J. noted in *Crown Zellerbach, supra*, at p. 433, once a subject matter is qualified of national concern, "Parliament has an exclusive jurisdiction of a plenary nature to legis-

67 Le critère applicable pour déterminer s'il y a unicité, particularité et indivisibilité est exigeant. Vu le risque élevé que la notion générale de l'«intérêt national» peut présenter pour le partage des compétences prévu par la Constitution, il est essentiel de pouvoir préciser exactement ce que la loi est censée régir. Autrement, l'«intérêt national» pourrait rapidement s'amplifier pour absorber tous les champs de compétence provinciale. Comme le juge Le Dain l'a souligné dans l'arrêt *Crown Zellerbach*, précité, à la p. 433, dès qu'une matière est qualifiée comme étant d'intérêt national, «le Parle-

1997 CanLII 318 (SCC)

late in relation to that matter, including its intra-provincial aspects".

ment jouit d'une compétence exclusive et absolue pour légiférer sur cette matière, y compris sur ses aspects intraprovinciaux».

68 The appellant submits that the object of Part II of the Act is limited in scope in that there is a clear distinction between chemical substances whose pollutant effects are diffuse and persist in the environment and other types of pollution whose effects are temporary and more local in nature. Therefore, being a single, distinct and indivisible form of pollution which can cross provincial boundaries, chemical pollution requires particular national measures for its proper control. However, as we have shown above, Part II of the Act applies to a wide array of substances, not only to chemical polluants. Moreover, the impugned legislation is not limited to substances having interprovincial effects.

L'appelant soutient que l'objectif de la partie II de la Loi a une portée limitée en raison de l'existence d'une distinction nette entre les substances chimiques dont les effets polluants sont diffus et persistent dans l'environnement et les autres types de pollution dont les effets sont temporaires et de nature plus locale. En conséquence, comme elle constitue une forme de pollution unique, particulière et indivisible qui peut franchir les frontières provinciales, la pollution chimique requiert des mesures nationales particulières pour être contrôlée adéquatement. Cependant, comme nous l'avons déjà démontré, la partie II de la Loi s'applique à toute une gamme de substances et non seulement aux polluants chimiques. En outre, la loi contestée ne vise pas que les substances ayant des effets interprovinciaux.

69 The definition of "toxic substances" in s. 11, combined with the definition of "substance" found in s. 3, is an all-encompassing definition with no clear limits. Many human activities could involve the use of materials falling within the meaning of "toxic substances" as defined by the impugned legislation. As noted earlier, the definition of "substance" includes "organic or inorganic matter, whether animate or inanimate". Paragraphs (*a*) through (*g*) of the definition in s. 3(1) do little to narrow this initial broad scope. Paragraph (*g*), which refers to "any animate matter . . . contained in effluents, emissions or wastes that result from any work, undertaking or activity" could, on its plain wording, conceivably include any effluent containing human or animal waste, garbage containing food remnants, or similar items commonly dealt with by municipal waste disposal services.

La définition des «substances toxiques» à l'art. 11, conjuguée à celle du mot «substance» à l'art. 3, est une définition générale sans limites précises. Bien des activités humaines pourraient impliquer l'utilisation de matières visées par la définition de «substances toxiques» contenue dans la loi contestée. Comme nous l'avons vu, le mot «substance» est défini comme incluant «[t]oute matière organique ou inorganique, animée ou inanimée». Les alinéas *a*) à *g*) de la définition de l'art. 3 contribuent peu à restreindre cette large portée initiale. Il est concevable que, vu son libellé, l'al. *g*), qui renvoie aux «matières animées [. . .] qui sont contenu[es] dans les effluents, les émissions ou les déchets attribuables à des travaux, des entreprises ou des activités», porte également sur les effluents contenant des excréments humains ou animaux, des déchets contenant des restes de table ou d'autres objets similaires dont s'occupent communément les services municipaux d'élimination des déchets.

70 Furthermore, by virtue of s. 11(*a*), a "toxic substance" may be any form of distinguishable matter which has or even simply may have "an immediate or long-term harmful effect on the environment". Section 11(*a*) equates "toxic" with "harmful

En outre, aux termes de l'al. 11*a*), une «substance toxique» peut être toute forme de matière distinguable de nature à avoir, «immédiatement ou à long terme, un effet nocif sur l'environnement». L'alinéa 11*a*) assimile «toxique» à «effet nocif». À

1997 CanLII 318 (SCC)

effect". In our opinion, this is a very broad definition of "toxic". While it would be difficult to disagree that "toxic" necessarily implies a "harmful effect", the converse, "that which has a harmful effect is toxic" is more questionable and quite exceeds the plain and ordinary meaning of "toxic". "Toxic" is more narrowly defined in *The Concise Oxford Dictionary* (9th ed. 1995), at p. 1475, as "of or relating to poison (*toxic symptoms*); poisonous (*toxic gas*); caused by poison (*toxic anaemia*)". A more circumscribed definition of "toxic substances" would be required in ss. 11 and 3 of the Act in order to give substance to the appellant's submission that this legislation is aimed at a distinct form of pollution, namely chemical pollution.

notre avis, il s'agit là d'une définition très large du mot «toxique». Même s'il était difficile de ne pas admettre que «toxique» implique nécessairement «effet nocif», l'inverse, c'est-à-dire que «ce qui a un effet nocif est toxique» est plus discutable et excède complètement le sens ordinaire du mot «toxique». Le mot «toxique» reçoit une définition plus stricte dans *Le Nouveau Petit Robert* (1995), à la p. 2282: «**1.** [. . .] Poison. *Toxiques gazeux* ou *volatiles, minéraux, organiques.* **2.** [. . .] Qui agit comme un poison. *Substance toxique* [. . .] *Gaz toxiques.* [. . .] *Supprimer les effets toxiques.* [. . .] *Champignons toxiques* . . .» Il faudrait que les art. 11 et 3 de la Loi donnent une définition plus circonscrite de l'expression «substances toxiques» pour étayer la prétention de l'appelant que cette loi vise une forme précise de pollution, savoir la pollution chimique.

Section 15 does specify some criteria to refine the notion of "toxic substance". However, it does not narrow the broad definition of that notion. Section 15 only offers investigatory guidelines. The Minister of the Environment and the Governor in Council are not legally bound by any of the investigatory reports prepared pursuant to s. 15. The scope of the Minister's power to regulate in ss. 34 and 35 is limited only by the broad definition of "toxic substance" and "environment" in ss. 11 and 3. Moreover, the investigatory process provided for in s. 15 can be totally bypassed with respect to the issuing of an interim order pursuant to s. 35. Under the powers conferred by s. 35(1), the Minister of the Environment may issue an interim order, which has the same regulatory scope and effect as a regulation under s. 34(1) or (2), whenever satisfied that "immediate action is required to deal with a significant danger to the environment or to human life or health" (emphasis added).

71 L'article 15 énonce effectivement certains critères pour raffiner la notion de «substance toxique». Cependant, il ne restreint pas la définition large donnée à cette notion. L'article 15 ne fait qu'offrir des lignes directrices en matière d'enquête. Ni le ministre de l'Environnement ni le gouverneur en conseil ne sont liés légalement par un rapport d'enquête préparé conformément à l'art. 15. L'étendue du pouvoir de réglementer conféré au Ministre par les art. 34 et 35 n'est limitée que par les définitions larges des expressions «substance toxique» et «environnement» que l'on trouve aux art. 11 et 3. En outre, le processus d'enquête prévu à l'art. 15 peut être complètement évité en ce qui concerne la prise d'un arrêté d'urgence conformément à l'art. 35. En vertu des pouvoirs que lui confère le par. 35(1), le ministre de l'Environnement peut prendre un arrêté d'urgence ayant les mêmes portée et effet qu'un règlement d'application du par. 34(1) ou (2) lorsqu'il est convaincu qu'une «intervention immédiate est nécessaire afin de parer à tout danger appréciable soit pour l'environnement, soit pour la vie humaine ou la santé» (je souligne).

In sum, the investigatory guidelines contemplated by s. 15 do not effectively narrow the broad definitions given to "toxic substances" in ss. 11 and 3; that is, they do not guarantee that only the

72 Somme toute, les lignes directrices en matière d'enquête envisagées à l'art. 15 n'ont pas pour effet de limiter les définitions larges données à l'expression «substances toxiques» aux art. 11 et 3,

1997 CanLII 318 (SCC)

most serious, diffuse and persistent toxic substances will be caught by the regulatory power conferred by ss. 34 and 35.

73 Nor are we convinced by the argument of the interveners Pollution Probe et al. that federal practice demonstrates that the impugned legislation is specifically targeted to address only those toxic substances that pose the greatest harm to human health or to the environment. It is true, as the interveners note, that out of the over 21,000 substances on the Domestic Substances List, relatively few, i.e. 44, were placed on the Priority Substances List by the federal government by 1989. Of these 44 substances, just 25 were determined to be toxic, and only a subset of these 25 have been subject to regulations. However, the constitutional validity of a statute cannot depend on the ebb and flow of existing government practice or the manner in which discretionary powers appear thus far to be exercised. It is the boundaries to the exercise of that discretion and the scope of the regulatory power created by the impugned legislation that are at issue here. It is no answer to a charge that a law is unconstitutional to say that it is only used sparingly. If it is unconstitutional, it cannot be used at all.

74 With respect to geographical limits, although the preamble of the Act suggests that its ambit is restricted to those substances that "cannot always be contained within geographic boundaries", nowhere in Part II or the enabling provisions at issue is there any actual limitation based on territorial considerations. The notion of "environment" as defined in s. 3 includes all conceivable environments without regard to provincial boundaries. Thus, Part II applies with equal force to "toxic substances" that are wholly situated within a province or whose effects are localized or entirely intraprovincial and to those which move across interprovincial or international borders.

c'est-à-dire qu'elles ne garantissent pas que seules les substances toxiques les plus dangereuses, diffuses et persistantes seront assujetties au pouvoir de réglementation conféré par les art. 34 et 35.

Nous ne sommes pas non plus convaincus par l'argument des intervenants Pollution Probe et autres qu'il ressort de la pratique fédérale que la loi contestée vise uniquement les substances toxiques qui sont les plus nocives pour la santé humaine ou l'environnement. Il est vrai, comme le font remarquer les intervenants, que des quelque 21 000 substances figurant sur la liste intérieure, relativement peu (c.-à-d. 44) avaient été inscrites sur la liste prioritaire par le gouvernement fédéral en 1989. De ces 44 substances, seulement 25 ont été jugées toxiques et seul un sous-ensemble de ces dernières a fait l'objet d'une réglementation. Cependant, la constitutionnalité d'une loi ne peut dépendre des aléas de la pratique gouvernementale existante ni de la façon dont des pouvoirs discrétionnaires semblent avoir été exercés jusqu'à maintenant. Ce sont les limites de l'exercice de ces pouvoirs discrétionnaires et l'étendue du pouvoir de réglementation créé par la loi contestée qui sont en cause ici. Il ne suffit pas de répondre qu'une loi est appliquée avec modération pour repousser une prétention qu'elle est inconstitutionnelle. Si la loi est inconstitutionnelle, elle ne peut pas du tout s'appliquer.

Quant aux limites géographiques, même si le préambule de la Loi laisse entendre qu'elle ne s'applique qu'aux substances «qu'il n'est pas toujours possible de circonscrire au territoire touché», ni la partie II ni les dispositions habilitantes en cause ne contiennent une véritable restriction fondée sur des considérations territoriales. La notion d'«environnement», définie à l'art. 3, comprend tous les environnements imaginables sans égard aux frontières provinciales. Ainsi, la partie II s'applique aussi bien aux «substances toxiques» qui se trouvent entièrement à l'intérieur d'une province ou dont les effets sont localisés ou se font ressentir exclusivement à l'intérieur de cette province qu'à celles qui franchissent les frontières interprovinciales ou internationales.

1997 CanLII 318 (SCC)

The majority of this Court in *Crown Zellerbach*, *supra*, at pp. 436-37, found marine pollution to constitute a single, distinct, and indivisible subject-matter, on the basis that the *Ocean Dumping Control Act*, S.C. 1974-75-76, c. 55, distinguished between the pollution of salt water and the pollution of fresh water, both types of waters having different compositions and characteristics. In Part II of the *Canadian Environmental Protection Act*, there is no analogous clear distinction between types of toxic substances, either on the basis of degree of persistence and diffusion into the environment and the severity of their harmful effect or on the basis of their extraprovincial aspects. The lack of any distinctions similar to those in the legislation upheld in *Crown Zellerbach* means that the Act has a regulatory scope which can encroach widely upon several provincial heads of power, notably, s. 92(13) "property and civil rights", s. 92(16) "matters of a merely local or private nature", and s. 92(10) "local works and undertakings". In our view, this failure to circumscribe the ambit of the Act demonstrates that the enabling provisions lack the necessary singleness, distinctiveness and indivisibility.

75 Notre Cour à la majorité a conclu, dans l'arrêt *Crown Zellerbach*, précité, aux pp. 436 et 437, que la pollution des mers constituait une matière unique, particulière et indivisible, compte tenu du fait que la *Loi sur l'immersion de déchets en mer*, S.C. 1974-75-76, ch. 55, établissait une distinction entre la pollution des eaux salées et celle des eaux douces, chacun de ces types d'eaux ayant une composition et des caractéristiques lui étant propres. La partie II de la *Loi canadienne sur la protection de l'environnement* n'établit pas de distinction claire semblable entre des types de substances toxiques, que ce soit en fonction de leur degré de persistance et de diffusion dans l'environnement et de la sévérité de leur effet nocif, ou de leurs aspects extraprovinciaux. L'absence de distinctions semblables à celles qu'établissait la loi maintenue dans l'arrêt *Crown Zellerbach* signifie que la Loi a une portée réglementaire susceptible d'empiéter largement sur plusieurs chefs de compétence provinciale, notamment le par. 92(13) «la propriété et les droits civils», le par. 92(16) «les matières d'une nature purement locale ou privée» et le par. 92(10) «les ouvrages et entreprises d'une nature locale». À notre avis, il ressort de cette omission de circonscrire la portée de la Loi que les dispositions habilitantes n'ont pas l'unicité, la particularité et l'indivisibilité requises.

Another criterion that can be used to determine whether the subject matter sought to be regulated can be sufficiently distinguished from matters of provincial interest is to consider whether the failure of one province to enact effective regulation would have adverse effects on interests exterior to the province. This indicator has also been named the "provincial inability" test (see *Crown Zellerbach*, at pp. 432-34). If the impugned provisions of the Act were indeed restricted to chemical substances, like PCBs, whose effects are diffuse, persistent and serious, then a *prima facie* case could be made out as to the grave consequences of any one province failing to regulate effectively their emissions into the environment. However, the s. 11(*a*) threshold of "immediate or long-term harmful effect on the environment" also encompasses substances whose effects may only be temporary or local. Therefore, the notion of "toxic

76 Un autre critère pouvant servir à déterminer si la matière que l'on cherche à réglementer peut être suffisamment distinguée des matières d'intérêt provincial consiste à se demander si l'omission d'une province d'adopter une réglementation efficace aurait des effets préjudiciables sur des intérêts à l'extérieur de celle-ci. Cet indicateur a également été appelé le critère de l'«incapacité provinciale» (voir *Crown Zellerbach*, aux pp. 432 à 434). Si les dispositions contestées de la Loi portaient, en fait, uniquement sur des substances chimiques, tels les BPC, dont les effets sont diffus, persistants et sérieux, les conséquences graves de l'omission d'une province de réglementer efficacement leur rejet dans l'environnement pourraient être établies à première vue. Cependant, le seuil établi à l'al. 11*a*), selon lequel les substances doivent avoir, «immédiatement ou à long terme, un effet nocif sur l'environnement» vise également les subs-

1997 CanLII 318 (SCC)

substances" as defined in the Act is inherently divisible. Those substances whose harmful effects are only temporary and localized would appear to be well within provincial ability to regulate. To the extent that Part II of the Act includes the regulation of "toxic substances" that may only affect the particular province within which they originate, the appellant bears a heavy burden to demonstrate that provinces themselves would be incapable of regulating such toxic emissions. It has not discharged this burden before this Court.

77 The s. 34(6) equivalency provision also implicitly undermines the appellant's submission that the provinces are incapable of regulating toxic substances. If the provinces were unable to regulate, there would be even more reason for the federal government not to agree to withdraw from the field. Section 34(6) demonstrates that the broad subject matter of regulating toxic substances, as defined by the Act, is inherently or potentially divisible

78 These reasons confirm that the subject matter does not fulfill the characteristics of singleness, distinctiveness and indivisibility required to qualify as a national concern matter.

(ii) Impact on Provincial Jurisdiction

79 Having concluded that the requirement of singleness, distinctiveness and indivisibility was not satisfied, it is unnecessary to examine the second criterion of the national concern test. The subject matter at issue does not qualify as a national concern matter and, since it was not suggested that it could be upheld as a matter of national emergency, it is therefore not justified by the peace, order and good government power.

E. *The Trade and Commerce Power*

80 The interveners Pollution Probe et al. submit, in the alternative, that ss. 34 and 35 of the Act as well

tances dont les effets peuvent être seulement temporaires ou locaux. Par conséquent, la notion de «substances toxiques», définie dans la Loi, est divisible en soi. Les substances dont les effets nocifs ne sont que temporaires et localisés sembleraient sans contredit relever de la capacité des provinces en matière de réglementation. Dans la mesure où la partie II de la Loi inclut la réglementation de «substances toxiques» susceptibles de toucher uniquement la province où elles émanent, l'appelant a le lourd fardeau d'établir que les provinces elles-mêmes seraient incapables de réglementer ces émissions toxiques. Il ne s'est pas acquitté de ce fardeau devant notre Cour.

La disposition relative aux dispositions équivalentes que l'on trouve au par. 34(6) mine aussi implicitement la prétention de l'appelant que les provinces sont incapables de réglementer les substances toxiques. Si les provinces étaient incapables de réglementer ces substances, le gouvernement fédéral serait d'autant plus justifié de refuser de se retirer de ce domaine. Le paragraphe 34(6) démontre que le large sujet de la réglementation des substances toxiques, défini dans la Loi, est fondamentalement ou potentiellement divisible.

Les présents motifs confirment que la matière n'a pas l'unicité, la particularité et l'indivisibilité requises pour être qualifiée de question d'intérêt national.

(ii) Effet sur la compétence provinciale

Ayant conclu qu'il n'a pas été satisfait à l'exigence d'unicité, de particularité et d'indivisibilité, il est inutile d'examiner le deuxième volet du critère de l'intérêt national. La matière visée en l'espèce ne peut être qualifiée de question d'intérêt national et, comme on n'a pas laissé entendre qu'il pourrait s'agir d'une question d'urgence nationale, elle n'est donc pas justifiée par la compétence en matière de paix, d'ordre et de bon gouvernement.

E. *La compétence en matière d'échanges et de commerce*

Les intervenants Pollution Probe et autres soutiennent subsidiairement que les art. 34 et 35 de la

1997 CanLII 318 (SCC)

as the Interim Order can be sustained as an exercise of the federal trade and commerce power under s. 91(2) of the *Constitution Act, 1867*. More specifically, they argue that the "general trade and commerce power" recognized in *General Motors of Canada Ltd. v. City National Leasing*, [1989] 1 S.C.R. 641, can justify the federal regulations, which are aimed at controlling the use and release of toxic substances in the course of commercial activities.

Pollution Probe et al. refer to Laskin C.J.'s comments in *Wetmore*, *supra*, at p. 288, that the part of the *Food and Drugs Act* that regulated the labelling, packaging and manufacture of food and drug products "invites the application of the trade and commerce power". These comments, they argue, should similarly apply to those parts of the Interim Order and s. 34(1) that address the manufacture, sale and commercial use of PCBs and other toxic substances.

We reject these submissions for two main reasons. First, it is clear that the "pith and substance" of the impugned legislation does not concern trade and commerce, even if trade and commerce may be affected by the application of these provisions. The interveners Pollution Probe et al. seem to recognize this insofar as they submit that the trade and commerce power merely provides "supplemental authority" for upholding the Interim Order and the enabling provisions.

Secondly, even if it could be assumed that certain parts of s. 34(1) of the Act were aimed at the regulation of trade and commerce (e.g. those paragraphs dealing with importing and exporting), the remainder of s. 34(1) would, based on the arguments adduced above, be *ultra vires* Parliament and would have to be struck down. Assuming that the "trade and commerce" elements could be saved, therefore, they would have to be "severed"

Loi de même que l'arrêté d'urgence peuvent être maintenus en tant qu'exercice de la compétence fédérale en matière d'échanges et de commerce prévue au par. 91(2) de la *Loi constitutionnelle de 1867*. Plus précisément, ils prétendent que la «compétence générale en matière d'échanges et de commerce» reconnue dans l'arrêt *General Motors of Canada Ltd. c. City National Leasing*, [1989] 1 R.C.S. 641, peut justifier la réglementation fédérale, qui vise à contrôler l'utilisation et le rejet de substances toxiques dans le cadre d'activités commerciales.

81 Les intervenants Pollution Probe et autres renvoient aux commentaires du juge en chef Laskin dans *Wetmore*, précité, à la p. 288, selon lesquels la partie de la *Loi des aliments et drogues* qui réglementait l'étiquetage, l'empaquetage et la fabrication de produits alimentaires et pharmaceutiques «emporte [. . .] l'application de la compétence en matière d'échanges et de commerce». Ces commentaires, prétendent-ils, devraient s'appliquer de la même façon aux parties de l'arrêté d'urgence et du par. 34(1) qui traitent de la fabrication, de la vente et de l'utilisation à des fins commerciales de BPC et d'autres substances toxiques.

82 Nous rejetons ces arguments principalement pour deux raisons. Premièrement, il est clair que le «caractère véritable» de la loi contestée ne concerne pas les échanges et le commerce, même si ceux-ci peuvent être touchés par l'application de ces dispositions. Les intervenants Pollution Probe et autres semblent reconnaître cela dans la mesure où ils soutiennent que la compétence en matière d'échanges et de commerce ne constitue qu'une [TRADUCTION] «raison supplémentaire» de confirmer la validité de l'arrêté d'urgence et des dispositions habilitantes.

83 Deuxièmement, même s'il pouvait être tenu pour acquis que certaines parties du par. 34(1) de la Loi visaient la réglementation des échanges et du commerce (par exemple, les alinéas traitant de l'importation et de l'exportation), le reste du par. 34(1), selon les arguments présentés plus haut, excéderait la compétence du Parlement et devrait être annulé. À supposer que les éléments «échanges et commerce» puissent être sauve-

1997 CanLII 318 (SCC)

from the paragraphs of s. 34(1) that would be struck down. It is not altogether clear that this could be done, particularly since the portion of the statute remaining after severance must be capable of standing independently of the severed portion. In this case, the paragraphs are too "inextricably bound" to be able to survive independently (see Hogg, *supra*, at p. 15-21). For these reasons, we cannot agree with the interveners' submission that the impugned legislation can be justified as an exercise of the federal trade and commerce power.

gardés, ils devraient, par conséquent, être «dissociés» des alinéas du par. 34(1) qui seraient annulés. Il n'est pas absolument certain que cela serait possible, étant donné, en particulier, que la partie restante de la Loi doit pouvoir exister indépendamment de la partie retranchée. En l'espèce, les alinéas sont trop [TRADUCTION] «inextricablement liés» pour pouvoir subsister indépendamment (voir Hogg, *op. cit.*, à la p. 15-21). Pour ces motifs, nous ne pouvons souscrire à l'argument des intervenants que la loi contestée peut se justifier en tant qu'exercice de la compétence fédérale en matière d'échanges et de commerce.

6. Conclusions and Disposition

84 For the above reasons, we find that the impugned provisions are not justified under any of the heads of power granted to Parliament by s. 91. We would therefore declare them *ultra vires* and dismiss the appellant's appeal with costs. We would answer the constitutional question as follows:

Do s. 6(*a*) of the *Chlorobiphenyls Interim Order*, PC 1989-296, and the enabling legislative provisions, ss. 34 and 35 of the *Canadian Environmental Protection Act*, R.S.C., 1985, c. 16 (4th Supp.), fall in whole or in part within the jurisdiction of the Parliament of Canada to make laws for the peace, order and good government of Canada pursuant to s. 91 of the *Constitution Act, 1867* or its criminal law jurisdiction under s. 91(27) of the *Constitution Act, 1867* or otherwise fall within its jurisdiction?

Answer: No.

6. Conclusion et dispositif

Pour les motifs qui précèdent, nous concluons que les dispositions contestées ne sont pas justifiées en vertu de l'un ou l'autre des chefs de compétence attribués au Parlement par l'art. 91. En conséquence, nous sommes d'avis de les déclarer inconstitutionnelles, de rejeter le pourvoi de l'appelant, avec dépens, et de répondre à la question constitutionnelle de la façon suivante:

L'alinéa 6*a*) de l'*Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-296, ainsi que les dispositions législatives habilitantes, les art. 34 et 35 de la *Loi canadienne sur la protection de l'environnement*, L.R.C. (1985), ch. 16 (4e suppl.), relèvent-ils en tout ou en partie de la compétence du Parlement du Canada de légiférer pour la paix, l'ordre et le bon gouvernement du Canada en vertu de l'art. 91 de la *Loi constitutionnelle de 1867* ou de la compétence en matière criminelle suivant le par. 91(27) de la *Loi constitutionnelle de 1867*, ou autrement?

Réponse: Non.

The judgment of La Forest, L'Heureux-Dubé, Gonthier, Cory and McLachlin JJ. was delivered by

Version française du jugement des juges La Forest, L'Heureux-Dubé, Gonthier, Cory et McLachlin rendu par

85 LA FOREST J. — This Court has in recent years been increasingly called upon to consider the interplay between federal and provincial legislative powers as they relate to environmental protection. Whether viewed positively as strategies for maintaining a clean environment, or negatively as measures to combat the evils of pollution, there can be no doubt that these measures relate to a public purpose of superordinate importance, and one in

LE JUGE LA FOREST — Au cours des dernières années, on a demandé de plus en plus à notre Cour d'examiner l'interaction entre les pouvoirs législatifs du Parlement et ceux des législatures provinciales en ce qui concerne la protection de l'environnement. Qu'elles soient considérées positivement comme des stratégies en vue de maintenir un environnement propre, ou négativement comme des dispositions prises en vue de

1997 CanLII 318 (SCC)

1997 CanLII 318 (SCC)

which all levels of government and numerous organs of the international community have become increasingly engaged. In the opening passage of this Court's reasons in what is perhaps the leading case, *Friends of the Oldman River Society v. Canada (Minister of Transport)*, [1992] 1 S.C.R. 3, at pp. 16-17, the matter is succinctly put this way:

> The protection of the environment has become one of the major challenges of our time. To respond to this challenge, governments and international organizations have been engaged in the creation of a wide variety of legislative schemes and administrative structures.

The all-important duty of Parliament and the provincial legislatures to make full use of the legislative powers respectively assigned to them in protecting the environment has inevitably placed upon the courts the burden of progressively defining the extent to which these powers may be used to that end. In performing this task, it is incumbent on the courts to secure the basic balance between the two levels of government envisioned by the Constitution. However, in doing so, they must be mindful that the Constitution must be interpreted in a manner that is fully responsive to emerging realities and to the nature of the subject matter sought to be regulated. Given the pervasive and diffuse nature of the environment, this reality poses particular difficulties in this context.

This latest case in which this Court is required to define the nature of legislative powers over the environment is of major significance. The narrow issue raised is the extent to and manner in which the federal Parliament may control the amount of and conditions under which Chlorobiphenyls (PCBs) — substances well known to pose great dangers to humans and the environment generally — may enter into the environment. However, the attack on the federal power to secure this end is not really aimed at the specific provisions respecting

combattre les maux engendrés par la pollution, il ne fait pas de doute que ces mesures visent un objectif public d'une importance supérieure, objectif que tous les niveaux de gouvernement et les nombreux organismes de la communauté internationale ont entrepris de plus en plus de poursuivre. Au tout début des motifs de notre Cour dans ce qui est peut-être l'arrêt de principe, *Friends of the Oldman River Society c. Canada (Ministre des Transports)*, [1992] 1 R.C.S. 3, aux pp. 16 et 17, la question est exposée succinctement de la manière suivante:

> La protection de l'environnement est devenue l'un des principaux défis de notre époque. Pour y faire face, les gouvernements et les organismes internationaux ont participé à la création d'un éventail important de régimes législatifs et de structures administratives.

86 Le devoir de la plus haute importance que le Parlement et les législatures provinciales ont d'utiliser pleinement les pouvoirs législatifs qui leur ont été respectivement conférés en matière de protection de l'environnement a inévitablement imposé aux tribunaux l'obligation de définir progressivement la mesure dans laquelle ces pouvoirs peuvent être utilisés à cette fin. Pour s'acquitter de cette tâche, il incombe aux tribunaux d'établir l'équilibre fondamental entre les deux niveaux de gouvernement envisagés par la Constitution. Toutefois, pour ce faire, ils doivent se rappeler que la Constitution doit être interprétée de manière à tenir compte pleinement des nouvelles réalités et de la nature du sujet que l'on veut réglementer. En raison du caractère omniprésent et diffus de l'environnement, cette réalité pose des difficultés particulières dans le présent contexte.

87 La présente affaire, qui est la plus récente dans laquelle on demande à notre Cour de définir la nature des pouvoirs législatifs en matière d'environnement, revêt une importance majeure. Il s'agit strictement de savoir dans quelle mesure et de quelle manière le législateur fédéral peut régir la quantité de biphényles chlorés (BPC) — substances reconnues comme étant très dangereuses pour les humains et l'environnement en général — qui peut pénétrer dans l'environnement, et les conditions dans lesquelles leur rejet peut se faire.

PCBs. Rather, it puts into question the constitutional validity of its enabling statutory provisions. What is really at stake is whether Part II ("Toxic Substances") of the *Canadian Environmental Protection Act*, R.S.C., 1985, c. 16 (4th Supp.), which empowers the federal Ministers of Health and of the Environment to determine what substances are toxic and to prohibit the introduction of such substances into the environment except in accordance with specified terms and conditions, falls within the constitutional power of Parliament.

Cependant, la contestation du pouvoir fédéral de réaliser cette fin ne vise pas vraiment les dispositions particulières concernant les BPC. Elle met plutôt en question la constitutionnalité de ses dispositions législatives habilitantes. Ce qui est vraiment en cause, c'est de savoir si la partie II («Substances toxiques») de la *Loi canadienne sur la protection de l'environnement*, L.R.C. (1985), ch. 16 (4e suppl.), qui habilite les ministres fédéraux de la Santé et de l'Environnement à déterminer quelles substances sont toxiques et à interdire le rejet de ces substances dans l'environnement à moins que certaines conditions particulières soient respectées, relève de la compétence constitutionnelle du Parlement.

Facts

Les faits

88 The case arose in this way. The respondent Hydro-Québec allegedly dumped polychlorinated biphenyls (PCBs) into the St. Maurice River in Quebec in early 1990. On June 5, 1990, it was charged with the following two infractions under s. 6(*a*) of the *Chlorobiphenyls Interim Order*, P.C. 1989-296 (hereafter "Interim Order"), which was adopted and enforced pursuant to ss. 34 and 35 of the *Canadian Environmental Protection Act*:

[TRANSLATION]

[1] From January 1 to January 3, 1990, did unlawfully release more than 1 gram per day of chlorobiphenyls into the environment contrary to s. 6(*a*) of the *Chlorobiphenyls Interim Order*, P.C. 1989-29[6] of February 23, 1989, thereby committing an offence under ss. 113(*i*) and (*o*) of the *Canadian Environmental Protection Act*, R.S.C., 1985, c. 16 (4th Supp.);

[2] On or about January 8, 1990, following the release into the environment, in contravention of s. 6(*a*) of the *Chlorobiphenyls Interim Order*, P.C. 1989-296 of February 23, 1989, of a substance specified in Schedule I to the *Canadian Environmental Protection Act*, R.S.C., 1985, c. 16 (4th Supp.), to wit: chlorobiphenyls . . . did fail to report the matter to an inspector as soon as possible in the circumstances contrary to s. 36(1)(*a*) of the said Act, thereby committing an offence under ss. 113(*h*) and (*o*) of the said Act.

L'affaire a pris naissance de la façon suivante. L'intimée Hydro-Québec aurait déversé des biphényles polychlorés (BPC) dans la rivière St-Maurice au Québec, au début de 1990. Le 5 juin 1990, elle a été accusée d'avoir commis les deux infractions suivantes en vertu de l'al. 6*a*) de *l'Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-296 (ci-après l'«arrêté d'urgence»), qui a été pris et mis à exécution conformément aux art. 34 et 35 de la *Loi canadienne sur la protection de l'environnement*:

[1] Du 1er janvier au 3 janvier 1990, a illégalement rejeté, dans l'environnement, plus d'un gramme par jour de biphényles chlorés contrairement à l'alinéa 6*a*) de *l'Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-29[6] du 23 février 1989, commettant ainsi l'infraction prévue aux alinéas 113*i*) et *o*) de la *Loi canadienne sur la protection de l'environnement*, L.R.C. de 198[5], 4e suppl., c. 16;

[2] Le ou vers le 8 janvier 1990, après le rejet dans l'environnement en violation de l'alinéa 6*a*) de *l'Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-296 du 23 février 1989, d'une substance inscrite à l'annexe I de la *Loi canadienne sur la protection de l'environnement*, L.R.C. de 198[5], 4e suppl., c. 16, à savoir: des biphényles chlorés [. . .] a omis de faire rapport de la situation à l'inspecteur dans les meilleurs délais possible, contrairement à l'alinéa 36(1)*a*) de ladite loi, commettant ainsi l'infraction prévue aux alinéas 113*h*) et *o*) de ladite Loi.

1997 CanLII 318 (SCC)

On July 23, 1990, the respondent pleaded not guilty to both charges before the Court of Québec.

On March 4, 1991, the respondent Hydro-Québec brought a motion before Judge Michel Babin seeking to have ss. 34 and 35 of the Act as well as s. 6(*a*) of the Interim Order itself declared *ultra vires* the Parliament of Canada on the ground that they do not fall within the ambit of any federal head of power set out in s. 91 of the *Constitution Act, 1867*. The Attorney General of Quebec intervened in support of the respondent's position. Judge Babin granted the motion on August 12, 1991 ([1991] R.J.Q. 2736), and an appeal to the Quebec Superior Court was dismissed by Trottier J. on August 6, 1992 ([1992] R.J.Q. 2159). A further appeal to the Court of Appeal of Quebec was dismissed on February 14, 1995: [1995] R.J.Q. 398, 67 Q.A.C. 161, 17 C.E.L.R. (N.S.) 34, [1995] Q.J. No. 143 (QL). Leave to appeal to this Court was granted on October 12, 1995: [1995] 4 S.C.R. vii.

Judicial History

A. *Court of Québec*

The principal submission of the respondent before Judge Babin was that s. 6(*a*) of the Interim Order as well as the enabling provisions of the *Canadian Environmental Protection Act* pursuant to which it was adopted are *ultra vires* Parliament on the ground that they cannot be justified as a matter of "national concern" under the "Peace, Order, and good Government" clause of s. 91 or the criminal law power (s. 91(27)) or under any other federal head of power under s. 91 of the *Constitution Act, 1867*. The appellant argued that the provisions in question could be justified as a matter of national concern as well as under the criminal law power. Judge Babin considered that the main issue in the dispute as regards either head of power was whether Parliament has the power to enact provisions dealing with disposal of toxic substances into the environment when the

Le 23 juillet 1990, l'intimée a plaidé non coupable relativement aux deux accusations devant la Cour du Québec.

89 Le 4 mars 1991, l'intimée Hydro-Québec a déposé une requête devant le juge Michel Babin en vue de faire déclarer que les art. 34 et 35 de la Loi ainsi que l'al. 6*a*) de l'arrêté d'urgence lui-même excèdent la compétence du Parlement du Canada pour le motif qu'ils ne relèvent d'aucun chef de compétence fédérale énoncé à l'art. 91 de la *Loi constitutionnelle de 1867*. Le procureur général du Québec est intervenu à l'appui de la position de l'intimée. Le juge Babin a accueilli la requête le 12 août 1991([1991] R.J.Q. 2736), et le juge Trottier a rejeté, le 6 août 1992, un appel interjeté devant la Cour supérieure du Québec ([1992] R.J.Q. 2159). Un autre appel interjeté devant la Cour d'appel du Québec a été rejeté le 14 février 1995: [1995] R.J.Q. 398, 67 Q.A.C. 161, 17 C.E.L.R. (N.S.) 34, [1995] A.Q. nº 143 (QL). L'autorisation de pourvoi devant notre Cour a été accordée le 12 octobre 1995: [1995] 4 R.C.S. vii.

Historique des procédures judiciaires

A. *Cour du Québec*

90 Devant le juge Babin, l'intimée a principalement soutenu que l'al. 6*a*) de l'arrêté d'urgence ainsi que les dispositions habilitantes de la *Loi canadienne sur la protection de l'environnement*, conformément auxquelles il a été adopté, excèdent la compétence du Parlement pour le motif qu'ils ne peuvent pas être justifiés à titre de question d'«intérêt national» en vertu de la clause de l'art. 91 concernant «la paix, l'ordre et le bon gouvernement», ou de la compétence en matière de droit criminel (par. 91(27)), ou encore en vertu de tout autre chef de compétence fédérale énoncé à l'art. 91 de la *Loi constitutionnelle de 1867*. L'appelant a fait valoir que les dispositions en cause pouvaient être justifiées à titre de question d'intérêt national, ainsi qu'en vertu de la compétence en matière de droit criminel. Le juge Babin a considéré que la principale question en litige concernant l'un ou l'autre chef de compétence était de savoir si le Parlement a le pouvoir d'adopter des dispositions relatives au rejet de substances toxiques dans

1997 CanLII 318 (SCC)

"environment" in question lies exclusively within the borders of a single province.

91 Beginning with the question of whether or not the provisions at issue fall within the "national concern" doctrine under the peace, order and good government clause, Judge Babin applied the criteria enunciated by this Court in *R. v. Crown Zellerbach Canada Ltd.*, [1988] 1 S.C.R. 401, for determining when a matter may properly be considered as falling within this power. He found that particularly in view of the wide definitions given to the terms "environment" and "toxic" under ss. 3 and 11 of the *Canadian Environmental Protection Act*, the provisions in question were unacceptably broad in that they could not be said to be limited in scope to a subject matter having the "singleness, distinctiveness and indivisibility" required under the *Crown Zellerbach* test. For much the same reasons, he found that to attribute exclusively to Parliament the subject matter at which the provisions are aimed would be to infringe significantly upon various areas of provincial competence and disturb the federal-provincial distribution of powers to an unacceptable degree.

92 Judge Babin also found that the provisions in question did not fall within the ambit of the criminal law power. Specifically, he held that while the provisions at issue are clearly directed at protecting human life and health, they are also directed at protecting the environment in general and that while the former aim constitutes a "criminal public purpose" in the sense set out in *Reference re Validity of Section 5(a) of the Dairy Industry Act*, [1949] S.C.R. 1 (the *Margarine Reference*), at p. 50, the latter does not. Similarly, he found that the mere fact that the Act in question here contains provisions setting out penalties for violations of its terms does not, in and of itself, affect the Act's "regulatory nature". Having found that the provisions at issue did not fall within either the "national concern" doctrine of the peace, order and good government clause or the criminal law power

l'environnement lorsque l'«environnement» en question se trouve exclusivement à l'intérieur d'une seule province.

Commençant par la question de savoir si les dispositions en cause sont visées par la théorie de l'«intérêt national» justifiant l'application de la clause concernant la paix, l'ordre et le bon gouvernement, le juge Babin a appliqué les critères énoncés par notre Cour dans l'arrêt *R. c. Crown Zellerbach Canada Ltd.*, [1988] 1 R.C.S. 401, pour déterminer quand une question peut être considérée à juste titre comme relevant de ce pouvoir. Il a conclu que, compte tenu particulièrement des définitions larges qui ont été données des mots «environnement» et «toxique» aux art. 3 et 11 de la *Loi canadienne sur la protection de l'environnement*, les dispositions en question avaient une portée large inacceptable du fait qu'on ne pouvait pas les considérer comme limitées à un sujet ayant «l'unicité, la particularité et l'indivisibilité» requises en vertu du critère de l'arrêt *Crown Zellerbach*. Pour à peu près les mêmes raisons, il a conclu que l'attribution exclusive au Parlement du sujet visé par les dispositions reviendrait à empiéter sensiblement sur divers domaines de compétence provinciale et à perturber de manière inacceptable le partage des pouvoirs entre le Parlement et les législatures provinciales.

Le juge Babin a également statué que les dispositions en cause ne relevaient pas de la compétence en matière de droit criminel. Il a conclu précisément que, bien que ces dispositions visent clairement à protéger la vie et la santé humaines, elles visent aussi à protéger l'environnement en général, et que, même si le premier objectif constitue un «objectif public du droit criminel» au sens donné à cette expression dans *Reference re Validity of Section 5(a) of the Dairy Industry Act*, [1949] R.C.S. 1 (le *Renvoi sur la margarine*), à la p. 50, le dernier n'en constitue pas un. De même, il a décidé que le simple fait que la loi en question ici contienne des dispositions énonçant des peines pour sa violation ne modifie pas en soi sa «nature réglementaire». Ayant conclu que les dispositions en cause ne relevaient ni de la théorie de l'«intérêt national» justifiant l'application de la clause concernant la paix,

1997 CanLII 318 (SCC)

(or within any other head of federal competence), Judge Babin held s. 6(*a*) of the Interim Order *ultra vires* Parliament.

B. *Quebec Superior Court*

On the appeal to the Superior Court, Trottier J. began by explaining that, pursuant to this Court's reasons in *Oldman River*, *supra*, the environment *per se* does not constitute a specific domain of legislative competence under ss. 91 and 92 of the *Constitution Act, 1867*. Holding in much the same manner as Judge Babin that the definitions of "toxic" and "environment" are extremely broad, Trottier J. held that the provisions in question could not be upheld as *intra vires* under the national concern doctrine. Similarly, he found the provisions could not be justified under the criminal law power on the basis that their true purpose was not to prohibit activity but to regulate it. Finding no other head of power to be applicable, he dismissed the appeal.

C. *Quebec Court of Appeal*

On the appeal to the Quebec Court of Appeal, Tourigny J.A., writing for the court, began her reasons by holding that even though one of the effects of the Act in question is to protect human life and health, the true "pith and substance" both of s. 6(*a*) of the Interim Order and of the enabling provisions of the Act under which it was adopted is "the protection of the environment". Following this Court's decision in *Oldman River*, Tourigny J.A. recognized that neither Parliament nor the provinces are vested with legislative competence regarding the environment *per se* and that environmental legislation will therefore only fall within the jurisdiction of either level of government if it is ancillary to a head of power listed in ss. 91 or 92 of the *Constitution Act, 1867*.

l'ordre et le bon gouvernement, ni de la compétence en matière de droit criminel (ou de tout autre chef de compétence fédérale), le juge Babin a statué que l'al. 6*a*) de l'arrêté d'urgence excédait la compétence du Parlement.

B. *Cour supérieure du Québec*

93 Lors de l'appel interjeté devant la Cour supérieure, le juge Trottier a commencé par expliquer que, conformément aux motifs de notre Cour dans *Oldman River*, précité, l'environnement ne constitue pas en soi un domaine particulier de compétence législative en vertu des art. 91 et 92 de la *Loi constitutionnelle de 1867*. Concluant, à peu près de la même manière que le juge Babin, que les définitions des mots «toxique» et «environnement» sont extrêmement larges, le juge Trottier a statué qu'il n'était pas possible de confirmer que les dispositions en cause sont constitutionnelles en vertu de la théorie de l'intérêt national. De même, il a conclu que les dispositions ne pouvaient pas être justifiées en vertu de la compétence en matière de droit criminel parce que leur véritable objectif était non pas d'interdire une activité, mais de la réglementer. Estimant qu'aucun autre chef de compétence n'était applicable, il a rejeté l'appel.

C. *Cour d'appel du Québec*

94 Lors de l'appel interjeté devant la Cour d'appel du Québec, le juge Tourigny a, au nom de la cour, commencé ses motifs en disant que, même si l'un des effets de la loi en question est de protéger la vie et la santé humaines, tant l'al. 6*a*) de l'arrêté d'urgence que les dispositions habilitantes de la Loi en vertu desquelles il a été adopté visent, de par leur «caractère véritable», «la protection de l'environnement». Suivant l'arrêt de notre Cour *Oldman River*, le juge Tourigny a reconnu que ni le Parlement ni les provinces ne sont investis du pouvoir de légiférer au sujet de l'environnement lui-même et que les lois en matière d'environnement ne relèveront donc de la compétence de l'un ou l'autre niveau de gouvernement que si elles sont subordonnées à un chef de compétence énuméré à l'art. 91 ou à l'art. 92 de la *Loi constitutionnelle de 1867*.

1997 CanLII 318 (SCC)

95 Applying this principle to the matter at hand, Tourigny J.A. first examined whether the provisions in question can be said to fall within federal competence under the national concern doctrine. In light of this Court's decision in *Crown Zellerbach*, *supra*, she found the provisions could not be *intra vires* on this ground. She then examined the appellant's submission that the provisions could be justified under the "national emergency" doctrine under the peace, order and good government clause. She rejected this argument as well, holding both that there exists no "emergency" justifying the adoption of the provisions, and that, in any case, the provisions are not sufficiently temporary in nature as to satisfy the strict requirements of the national emergency doctrine.

Appliquant ce principe à l'affaire dont il était saisi, le juge Tourigny s'est d'abord demandé s'il était possible de dire que les dispositions en cause relevaient de la compétence fédérale en vertu de la théorie de l'intérêt national. Compte tenu de l'arrêt de notre Cour *Crown Zellerbach*, précité, elle a conclu que ces dispositions ne pouvaient pas être constitutionnelles pour cette raison. Puis, elle a examiné l'argument de l'appelant selon lequel les dispositions pouvaient être fondées en vertu de la théorie de l'«urgence nationale» justifiant l'application de la clause concernant la paix, l'ordre et le bon gouvernement. Elle a aussi rejeté cet argument, concluant qu'il n'y a aucune «urgence» justifiant l'adoption des dispositions et que, de toute façon, celles-ci ne sont pas suffisamment de nature temporaire pour satisfaire aux exigences strictes de la théorie de l'urgence nationale.

96 Finally, Tourigny J.A. analysed the appellant's submission that the impugned provisions fall within Parliament's jurisdiction over criminal law. While she recognized that this power has historically been given a relatively broad reading, she found that these provisions greatly exceed the ambit of what may properly be considered criminal law. She, therefore, held that the provisions in question do not fall within this federal power even though the Act does prohibit certain conduct and provides for the enforcement of such prohibitions through penalties.

Enfin, le juge Tourigny a analysé l'argument de l'appelant selon lequel les dispositions contestées relèvent de la compétence du Parlement en matière de droit criminel. Tout en reconnaissant que ce pouvoir a, dans le passé, reçu une interprétation assez large, elle a conclu que ces dispositions excèdent grandement ce qui peut être considéré à juste titre comme du droit criminel. Elle a donc jugé que les dispositions en cause ne relèvent pas de ce pouvoir fédéral même si la Loi interdit effectivement un certain comportement et prévoit la mise en œuvre de ces interdictions au moyen de peines.

D. *Constitutional Questions*

D. *Question constitutionnelle*

97 On December 21, 1995, Lamer C.J. framed the following constitutional question:

Le 21 décembre 1995, le juge en chef Lamer a formulé la question constitutionnelle suivante:

Do s. 6(*a*) of the *Chlorobiphenyls Interim Order*, P.C. 1989-296, and the enabling legislative provisions, ss. 34 and 35 of the *Canadian Environmental Protection Act*, R.S.C., 1985, c. 16 (4th Supp.), fall in whole or in part within the jurisdiction of the Parliament of Canada to make laws for the peace, order and good government of Canada pursuant to s. 91 of the *Constitution Act, 1867* or its criminal law jurisdiction under s. 91(27) of the *Constitution Act, 1867* or otherwise fall within its jurisdiction?

L'alinéa 6*a*) de l'*Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-296, ainsi que les dispositions législatives habilitantes, les art. 34 et 35 de la *Loi canadienne sur la protection de l'environnement*, L.R.C. (1985), ch. 16 (4e suppl.), relèvent-ils en tout ou en partie de la compétence du Parlement du Canada de légiférer pour la paix, l'ordre et le bon gouvernement du Canada en vertu de l'art. 91 de la *Loi constitutionnelle de 1867* ou de la compétence en matière criminelle suivant le par. 91(27) de la *Loi constitutionnelle de 1867*, ou autrement?

1997 CanLII 318 (SCC)

As can be seen, the constitutional question first raises the constitutionality of s. 6(*a*) of the Interim Order, which reads as follows:

> 6. The quantity of chlorobiphenyls that may be released into the environment shall not exceed 1 gram per day in respect of any item of equipment or any receptacle or material containing equipment in the course of the operation, servicing, maintenance, decommissioning, transporting or storage of
>
> (*a*) electrical capacitors and electrical transformers and associated electrical equipment manufactured in or imported into Canada before July 1, 1980;

However, it also raises the validity of the enabling provisions of the Act, specifically ss. 34 and 35. While it is possible to challenge the constitutional validity of the Interim Order directly, the real issue, as is evident from the reasons of the courts appealed from, is the validity of the enabling provisions, cited *infra*, and the main thrust of these reasons will be concerned with that issue. It is clear that the Interim Order will be of no force or effect if the enabling provisions pursuant to which it was adopted are themselves found to be *ultra vires.* As stated by Professor Hogg: "The invalidity of a statute which is ultra vires the enacting legislative body will of course destroy any powers which the statute purported to delegate to the government" (P. W. Hogg, *Constitutional Law of Canada* (3rd ed. 1992 (loose-leaf)), vol. 1, at p. 14-7); see also D. C. Holland and J. P. McGowan, *Delegated Legislation in Canada* (1989), at pp. 170-71.

Overview of the Legislative Structure of the Canadian Environmental Protection Act

The *Canadian Environmental Protection Act* was adopted by Parliament in 1988 with a view to consolidating and replacing several other laws dealing with different types of environmental protection. Sections 34 and 35 appear in Part II, entitled "Toxic Substances". This Part is, in large measure, an adaptation of the *Environmental*

98 Comme on peut le constater, la question constitutionnelle soulève d'abord la question de la constitutionnalité de l'al. 6*a*) de l'arrêté d'urgence, qui est rédigé ainsi:

> 6. La quantité de biphényles chlorés qui peut être rejetée, dans l'environnement, dans une région du Canada ne peut excéder 1 g par jour pour chaque pièce d'équipement ou contenant ou emballage d'équipement au cours de l'exploitation, de l'entretien, de la maintenance, de la mise hors service, du transport ou de l'entreposage de l'équipement suivant:
>
> *a*) des condensateurs électriques ainsi que des transformateurs électriques et de l'équipement connexe, fabriqués ou importés au Canada avant le 1er juillet 1980;

Cependant, elle soulève également la question de la validité des dispositions habilitantes de la Loi, plus précisément les art. 34 et 35. Bien qu'il soit possible de contester directement la constitutionnalité de l'arrêté d'urgence, la véritable question, qui ressort des motifs des tribunaux dont les décisions ont été portées en appel, concerne la validité des dispositions habilitantes, citées plus loin, et les présents motifs porteront principalement sur cette question. Il est évident que l'arrêté d'urgence sera inopérant si les dispositions habilitantes conformément auxquelles il a été adopté sont elles-mêmes jugées inconstitutionnelles. Comme l'affirme le professeur Hogg: [TRADUCTION] «L'invalidité d'une loi qui excède la compétence du corps législatif qui l'a adoptée annihilera naturellement tout pouvoir que cette loi était censée déléguer au gouvernement» (P. W. Hogg, *Constitutional Law of Canada* (3e éd. 1992 (feuilles mobiles)), vol. 1, à la p. 14-7); voir également D. C. Holland et J. P. McGowan, *Delegated Legislation in Canada* (1989), aux pp. 170 et 171.

Aperçu de la structure de la Loi canadienne sur la protection de l'environnement

99 La *Loi canadienne sur la protection de l'environnement* a été adoptée par le Parlement, en 1988, afin de réunir et de remplacer plusieurs autres lois traitant de différents types de protection de l'environnement. Les articles 34 et 35 figurent à la partie II, intitulée «Substances toxiques». Cette partie est, dans une large mesure, une adaptation de la *Loi sur*

1997 CanLII 318 (SCC)

Contaminants Act, R.S.C., 1985, c. E-12 (which was abrogated when the present Act came into force). It should not be overlooked, however, that other parts of the Act are relevant to toxic substances. The subject of toxic substances is introduced in the preamble, which after declaring that the protection of the environment is essential to the well-being of Canada sets forth the following clauses that are of direct relevance in this case:

les contaminants de l'environnement, L.R.C. (1985), ch. E-12 (qui a été abrogée lorsque la présente loi est entrée en vigueur). Il ne faudrait toutefois pas oublier que d'autres parties de la Loi ont trait aux substances toxiques. La question des substances toxiques est présentée dans le préambule où, après avoir déclaré que la protection de l'environnement est essentielle au bien-être de la population du Canada, on énonce les clauses suivantes qui sont directement applicables en l'espèce:

WHEREAS the presence of toxic substances in the environment is a matter of national concern;

WHEREAS toxic substances, once introduced into the environment, cannot always be contained within geographic boundaries;

WHEREAS the Government of Canada in demonstrating national leadership should establish national environmental quality objectives, guidelines and codes of practice;

. . .

AND WHEREAS Canada must be able to fulfil its international obligations in respect of the environment;

Attendu:

que la présence de substances toxiques dans l'environnement est une question d'intérêt national;

qu'il n'est pas toujours possible de circonscrire au territoire touché la dispersion de substances toxiques ayant pénétré dans l'environnement;

que le gouvernement fédéral, à titre de chef de file national en la matière, se doit d'établir des objectifs, des directives et des codes de pratiques nationaux en matière de qualité de l'environnement;

. . .

que le Canada se doit d'être en mesure de respecter ses obligations internationales en matière d'environnement,

As well, the first substantive provision of the Act, s. 2, in para. 2(*j*) imposes the following duty on the Canadian government:

De même, l'art. 2, qui est la première disposition de fond de la Loi, impose, à son al. *j*), l'obligation suivante au gouvernement canadien:

2. In the administration of this Act, the Government of Canada shall, having regard to the Constitution and laws of Canada,

. . .

(*j*) endeavour to act expeditiously to assess whether substances in use in Canada are toxic or capable of becoming toxic.

2. Pour l'exécution de la présente loi, le gouvernement fédéral doit, compte tenu de la Constitution et des lois du Canada:

. . .

j) s'efforcer d'agir avec diligence en vue de déterminer si des substances en usage au Canada sont toxiques ou susceptibles de le devenir.

100 Moreover, Schedule I of the Act under the heading "List of Toxic Substances" originally set forth nine such substances with the type of regulations applicable to them.

En outre, l'annexe I de la Loi énonçait initialement, sous la rubrique intitulée «Liste des substances toxiques», neuf de ces substances en plus du type de règlement qui leur était applicable.

101 Part II of the Act deals first with the identification of other substances that could pose a risk either to the environment or to human life and

La partie II de la Loi traite d'abord de l'identification d'autres substances susceptibles de mettre en danger l'environnement ou la vie et la santé

1997 CanLII 318 (SCC)

health, and then provides a procedure for adding them to the List of Toxic Substances in Schedule I and for imposing by regulations requirements respecting the terms and conditions under which substances so listed may be released into the environment.

Part II begins with s. 11, which reads:

11. For the purposes of this Part, a substance is toxic if it is entering or may enter the environment in a quantity or concentration or under conditions

(*a*) having or that may have an immediate or long-term harmful effect on the environment;

(*b*) constituting or that may constitute a danger to the environment on which human life depends; or

(*c*) constituting or that may constitute a danger in Canada to human life or health.

Two things should be noted about this provision. First, it is confined in its application to Part II. Secondly, while the provision was in the course of argument described as a "definition", it is by no means a true definition, a matter about which I shall comment more extensively later. Before one can know if a substance can give rise to the real or possible harmful effects or dangers spelled out in paras. (*a*) to (*c*), some assessment or test must be made to determine whether the quantity or concentration or conditions under which a substance enters the environment is sufficient to make it toxic. This is made clear by s. 12(1) which, in providing for the creation of a Priority Substances List, authorizes the Ministers of Health and of the Environment to "specify substances in respect of which the Ministers are satisfied priority should be given in assessing whether they are toxic or capable of becoming toxic" (emphasis added). This expression, I observe, is repeated throughout Part II in the provisions regarding assessments.

The manner in which the Ministers may conduct investigations to determine whether or not a given "substance" is "toxic" is set forth in s. 15. They may examine, *inter alia*, the nature of the sub-

humaines, et elle établit ensuite la procédure à suivre pour les ajouter à la liste des substances toxiques de l'annexe I, et pour imposer, par voie de règlement, les conditions à respecter pour que les substances ainsi énumérées puissent être rejetées dans l'environnement.

La partie II commence par l'art. 11, qui est libellé ainsi: 102

11. Pour l'application de la présente partie, est toxique toute substance qui pénètre ou peut pénétrer dans l'environnement en une quantité ou une concentration ou dans des conditions de nature à:

a) avoir, immédiatement ou à long terme, un effet nocif sur l'environnement;

b) mettre en danger l'environnement essentiel pour la vie humaine;

c) constituer un danger au Canada pour la vie ou la santé humaine.

Il y a lieu de noter deux choses au sujet de cette disposition. Premièrement, son application se limite à la partie II. Deuxièmement, bien qu'elle ait été qualifiée de «définition» au cours des plaidoiries, cette disposition n'est nullement une véritable définition, une question que je commenterai davantage plus loin. Pour savoir si une substance peut avoir les effets nocifs ou présenter les dangers réels ou potentiels, énoncés aux al. *a*) à *c*), il faut effectuer une évaluation ou un test pour déterminer si la quantité ou concentration de la substance rejetée dans l'environnement, ou les conditions dans lesquelles le rejet a eu lieu, sont suffisantes pour qu'elle soit toxique. C'est ce que précise le par. 12(1) qui, en prévoyant l'établissement d'une liste de substances d'intérêt prioritaire, autorise les ministres de la Santé et de l'Environnement à «énum[érer] les substances pour lesquelles ils jugent prioritaire de déterminer si elles sont effectivement ou potentiellement toxiques» (je souligne). Cette expression, ainsi que je l'ai remarqué, revient tout au long de la partie II dans les dispositions concernant les évaluations.

La façon dont les ministres peuvent mener des enquêtes pour déterminer si une «substance» donnée est «toxique» ou non est exposée à l'art. 15. Ils peuvent examiner, notamment, la nature de la sub- 103

1997 CanLII 318 (SCC)

stance in question, its effects on natural biological processes, the extent to which the substance will persist in the environment, methods of controlling it, and methods of reducing the amount used. Section 15 read at the relevant time:

15. For the purpose of assessing whether a substance is toxic or is capable of becoming toxic, or for the purpose of assessing the need for measures to control a substance, either Minister may

(*a*) collect data and conduct investigations respecting

(i) the nature of the substance,

(ii) the presence of the substance in the environment and the effect of its presence on the environment or on human life or health,

(iii) the extent to which the substance can become dispersed and will persist in the environment,

(iv) the ability of the substance to become incorporated or accumulate in biological tissues or to interfere with biological processes,

(v) methods of controlling the presence of the substance in the environment,

(vi) methods for testing the effects of the presence of the substance in the environment,

(vii) development and use of alternatives to the substance,

(viii) quantities, uses and disposal of the substance, and

(ix) methods of reducing the amount of the substance used, produced or released into the environment;

(*b*) correlate and evaluate any data collected pursuant to paragraph (*a*) and publish results of any investigations carried out pursuant to that paragraph; and

(*c*) provide information and consultative services and make recommendations respecting measures to control the presence of the substance in the environment.

Under s. 16, the Minister of the Environment may require that private citizens provide him or her with information about, or samples of, substances they suspect may be toxic, and under s. 18, the Minister can order that persons with information

stance en question, ses effets sur des processus biologiques naturels, la mesure dans laquelle elle persistera dans l'environnement, les méthodes permettant d'en limiter la présence et d'en réduire la quantité utilisée. L'article 15 était ainsi rédigé à l'époque pertinente:

15. En vue de déterminer si une substance est effectivement ou potentiellement toxique ou d'apprécier s'il y a lieu de prendre des mesures pour en contrôler la présence dans l'environnement, l'un ou l'autre ministre peut:

a) recueillir des données sur cette substance et mener des enquêtes sur:

(i) sa nature,

(ii) sa présence dans l'environnement et l'effet qu'elle a sur celui-ci, la vie ou la santé humaine,

(iii) la mesure dans laquelle elle peut se disperser et persister dans l'environnement,

(iv) sa capacité d'infiltration et d'accumulation dans les tissus biologiques ainsi que sa capacité de nuire à des processus biologiques,

(v) les méthodes permettant de limiter sa présence dans l'environnement,

(vi) les méthodes de vérification des effets de sa présence dans l'environnement,

(vii) la mise au point et l'utilisation de substituts,

(viii) ses quantités, ses utilisations et son élimination,

(ix) les méthodes permettant de réduire la quantité utilisée, produite ou rejetée dans l'environnement;

b) corréler et analyser les données recueillies et publier le résultat des enquêtes effectuées;

c) fournir des services d'information et de consultation et faire des recommandations concernant les mesures à prendre pour limiter la présence de cette substance dans l'environnement.

Aux termes de l'art. 16, le ministre de l'Environnement peut exiger des simples citoyens qu'ils lui fournissent des renseignements concernant les substances qu'ils jugent susceptibles d'être toxiques, ou des échantillons de ces substances, et,

1997 CanLII 318 (SCC)

about a substance that may be toxic provide that information.

Sections 12 and 13 of the Act require the Ministers of the Environment and Health to compile a "Priority Substances List" specifying those substances in respect of which priority should be given in determining whether or not they are toxic. Once the Ministers have assessed a priority listed substance, they may decide either to recommend or not to recommend that the substance be added to the List of Toxic Substances in Schedule I. Where the Ministers so recommend, the Governor in Council by virtue of s. 33 may, after a federal-provincial advisory committee (established under s. 6) has been given an opportunity to provide its advice, make an order adding the substance to the List of Toxic Substances. When that is done, the Governor in Council is empowered under s. 34 to make detailed regulations imposing requirements respecting the manner of dealing with any substance listed in Schedule I. Failure to comply with these regulations is punishable by a fine or imprisonment (s. 113(*f*), (*o*) and (*p*)). Since s. 34 (of which s. 34(1) is of prime importance) is under attack in this case, I cite it at length:

34. (1) Subject to subsection (3), the Governor in Council may, on the recommendation of the Ministers and after the federal-provincial advisory committee is given an opportunity to provide its advice under section 6, make regulations with respect to a substance specified on the List of Toxic Substances in Schedule I, including regulations providing for, or imposing requirements respecting,

(*a*) the quantity or concentration of the substance that may be released into the environment either alone or in combination with any other substance from any source or type of source;

(*b*) the places or areas where the substance may be released;

(*c*) the commercial, manufacturing or processing activity in the course of which the substance may be released;

en vertu de l'art. 18, le Ministre peut ordonner que les personnes qui possèdent des renseignements au sujet d'une substance qui peut être toxique fournissent ces renseignements.

104 Les articles 12 et 13 de la Loi exigent que les ministres de l'Environnement et de la Santé établissent une «liste de substances d'intérêt prioritaire» indiquant les substances pour lesquelles il serait prioritaire de déterminer si elles sont toxiques ou non. Une fois que les ministres ont évalué une substance inscrite sur une liste prioritaire, ils peuvent décider de recommander ou non qu'elle soit ajoutée à la liste des substances toxiques de l'annexe I. Lorsque les ministres font une telle recommandation, le gouverneur en conseil peut, en vertu de l'art. 33, après avoir donné à un comité consultatif fédéro-provincial (constitué en vertu de l'art. 6) la possibilité de formuler ses conseils, prendre un décret d'inscription de la substance à la liste des substances toxiques. Cela fait, le gouverneur en conseil est habilité, en vertu de l'art. 34, à prendre des règlements détaillés en ce qui touche la manière de traiter toute substance inscrite sur la liste de l'annexe I. L'omission de se conformer à ces règlements est punissable d'une amende ou d'une peine d'emprisonnement (al. 113*f*), *o*) et *p*)). Comme l'art. 34 (dont le premier paragraphe est de toute première importance) est contesté en l'espèce, je vais le citer au complet:

34. (1) Sous réserve du paragraphe (3), le gouverneur en conseil peut, sur recommandation des ministres et après avoir donné au comité consultatif fédéro-provincial la possibilité de formuler ses conseils dans le cadre de l'article 6, prendre des règlements concernant une substance inscrite sur la liste de l'annexe I, notamment en ce qui touche:

a) la quantité ou la concentration dans lesquelles elle peut être rejetée dans l'environnement, seule ou combinée à une autre substance émise par quelque source ou type de sources que ce soit;

b) les lieux ou zones de rejet;

c) les activités commerciales, de fabrication ou de transformation au cours desquelles le rejet est permis;

1997 CanLII 318 (SCC)

(*d*) the manner in which and conditions under which the substance may be released into the environment, either alone or in combination with any other substance;

d) les modalités et conditions de son rejet, seule ou en combinaison avec une autre substance;

(*e*) the quantity of the substance that may be manufactured, processed, used, offered for sale or sold in Canada;

e) la quantité qui peut être fabriquée, transformée, utilisée, mise en vente ou vendue au Canada;

(*f*) the purposes for which the substance or a product containing the substance may be imported, manufactured, processed, used, offered for sale or sold;

f) les fins pour lesquelles la substance ou un produit qui en contient peut être importé, fabriqué, transformé, utilisé, mis en vente ou vendu;

(*g*) the manner in which and conditions under which the substance or a product containing the substance may be imported, manufactured, processed or used;

g) les modalités et conditions d'importation, de fabrication, de transformation ou d'utilisation de la substance ou d'un produit qui en contient;

(*h*) the quantities or concentrations in which the substance may be used;

h) la quantité ou la concentration dans lesquelles celle-ci peut être utilisée;

(*i*) the quantities or concentrations of the substance that may be imported;

i) la quantité ou la concentration dans lesquelles celle-ci peut-être importée;

(*j*) the countries from or to which the substance may be imported or exported;

j) les pays d'exportation ou d'importation;

(*k*) the conditions under which, the manner in which and the purposes for which the substance may be imported or exported;

k) les conditions, modalités et objets de l'importation ou de l'exportation;

(*l*) the total, partial or conditional prohibition of the manufacture, use, processing, sale, offering for sale, import or export of the substance or a product containing the substance;

l) l'interdiction totale, partielle ou conditionnelle de la fabrication, de l'utilisation, de la transformation, de la vente, de la mise en vente, de l'importation ou de l'exportation de la substance ou d'un produit qui en contient;

(*m*) the quantity or concentration of the substance that may be contained in any product manufactured, imported, exported or offered for sale in Canada;

m) la quantité ou concentration de celle-ci que peut contenir un produit fabriqué, importé, exporté ou mis en vente au Canada;

(*n*) the manner in which and conditions under which and the purposes for which the substance or a product containing the substance may be advertised or offered for sale;

n) les modalités, les conditions et l'objet de la publicité et de la mise en vente de la substance ou d'un produit qui en contient;

(*o*) the manner in which and conditions under which the substance or a product or material containing the substance may be stored, displayed, handled, transported or offered for transport;

o) les modalités et les conditions de stockage, de présentation, de transport, de manutention ou d'offre de transport soit de la substance, soit d'un produit ou d'une matière qui en contient;

(*p*) the packaging and labelling of the substance or a product or material containing the substance;

p) l'emballage et l'étiquetage soit de la substance, soit d'un produit ou d'une matière qui en contient;

(*q*) the manner, conditions, places and method of disposal of the substance or a product or material containing the substance, including standards for the construction, maintenance and inspection of disposal sites;

q) les modalités, lieux et méthodes d'élimination soit de la substance, soit d'un produit ou d'une matière qui en contient, notamment les normes de construction, d'entretien et d'inspection des sites d'élimination;

1997 CanLII 318 (SCC)

(*r*) the submission to the Minister, on request or at such times as are prescribed, of information relating to the substance;

(*s*) the maintenance of books and records for the administration of any regulation made under this section;

(*t*) the conduct of sampling, analyses, tests, measurements or monitoring of the substance and the submission of the results to the Minister;

(*u*) the submission of samples of the substance to the Minister;

(*v*) the methods and procedures for conducting sampling, analyses, tests, measurements or monitoring of the substance;

(*w*) circumstances or conditions under which the Minister may, for the proper administration of this Act, modify

(i) any requirement for sampling, analyses, tests, measurements or monitoring, or

(ii) the methods and procedures for conducting any required sampling, analyses, tests, measurements or monitoring; and

(*x*) any other matter necessary to carry out the purposes of this Part.

(2) The Governor in Council may, on the recommendation of the Ministers, make regulations providing for the exemption of the following activities from the application of this Part and any regulations made under it, namely,

(*a*) the import, export, manufacture, use, processing, transport, offering for transport, handling, packaging, labelling, advertising, sale, offering for sale, displaying, storing, disposing or releasing into the environment of any substance or a product or material containing any substance; and

(*b*) the release of any substance into the environment, for a period specified in the regulations, from any source or type of source.

(3) The Governor in Council shall not make a regulation under subsection (1) in respect of any substance if, in the opinion of the Governor in Council, the regulation regulates an aspect of the substance that is regulated by or under any other Act of Parliament.

(4) A regulation made under subsection (1) with respect to a substance may amend the List of Toxic Sub-

r) la transmission au ministre, sur demande ou au moment fixé par règlement, de renseignements concernant la substance;

s) la tenue de livres et de registres pour l'exécution des règlements d'application du présent article;

t) l'échantillonnage, l'analyse, l'essai, la mesure ou la surveillance de la substance et la transmission des résultats au ministre;

u) la transmission d'échantillons de la substance au ministre;

v) les méthodes et procédures à suivre pour les opérations mentionnées à l'alinéa *t*);

w) les cas ou conditions de modification par le ministre, pour l'exécution de la présente loi, soit des exigences imposées pour les opérations mentionnées à l'alinéa *t*), soit des méthodes et procédures afférentes;

x) toute autre mesure d'application de la présente partie.

(2) Sur recommandation des ministres, le gouverneur en conseil peut, par règlement, soustraire à l'application de la présente partie et de ses règlements:

a) l'importation, l'exportation, la fabrication, l'utilisation, la transformation, le transport, l'offre de transport, la manutention, l'emballage, l'étiquetage, la publicité, la vente, la mise en vente, la présentation, le stockage, l'élimination ou le rejet dans l'environnement soit d'une substance, soit d'un produit ou d'une matière qui en contient;

b) le rejet dans l'environnement d'une substance provenant d'une source donnée, ou d'un type de sources donné, pendant un certain temps.

(3) Les règlements prévus au paragraphe (1) ne peuvent toutefois être pris que si, selon le gouverneur en conseil, ils ne visent pas un point déjà réglementé sous le régime d'une autre loi fédérale.

(4) Les règlements d'application du paragraphe (1) peuvent modifier la liste de l'annexe I de manière à y

1997 CanLII 318 (SCC)

stances in Schedule I so as to specify the type of regulation that applies with respect to the substance.

(5) Except with respect to Her Majesty in right of Canada, the provisions of a regulation made under subsection (1) do not apply in any province in respect of which there is in force an order, made under subsection (6), declaring that the provisions do not apply.

(6) Where the Minister and the government of a province agree in writing that there are in force by or under the laws of the province

(*a*) provisions that are equivalent to the provisions of a regulation made under subsection (1), and

(*b*) provisions that are similar to sections 108 to 110 for the investigation of alleged offences under provincial environmental legislation,

the Governor in Council may, on the recommendation of the Minister, make an order declaring that the provisions of the regulation do not apply in the province.

(7) The Minister shall make public any agreement referred to in subsection (6).

(8) An agreement referred to in subsection (6) may be terminated by either party giving to the other at least six months notice of termination.

(9) The Governor in Council may, on the recommendation of the Minister, revoke an order made under subsection (6) where the agreement referred to in that subsection is terminated.

(10) The Minister shall include in the annual report required by section 138 a report on the administration of subsections (5) to (9).

préciser le type de règlement qui s'applique à la substance visée.

(5) Sauf à l'égard de Sa Majesté du chef du Canada, les règlements pris aux termes du paragraphe (1) ne s'appliquent pas dans la province visée par un décret pris aux termes du paragraphe (6).

(6) Sur recommandation du ministre, le gouverneur en conseil peut, par décret, déclarer que les règlements pris en application du paragraphe (1) ne s'appliquent pas dans la province lorsque le ministre et le gouvernement provincial sont convenus par écrit que sont en vigueur dans le cadre de la législation provinciale:

a) d'une part, des dispositions équivalentes à ces règlements;

b) d'autre part, des dispositions similaires aux articles 108 à 110 concernant les enquêtes pour infractions aux lois provinciales sur l'environnement.

(7) Le ministre rend public l'accord visé au paragraphe (6).

(8) Une partie à l'accord peut y mettre fin en donnant un préavis de six mois à l'autre partie.

(9) Sur recommandation du ministre, le gouverneur en conseil peut révoquer le décret d'exemption lorsqu'il a été mis fin à l'accord.

(10) Le ministre rend compte, dans le rapport annuel visé à l'article 138, de la mise en œuvre des paragraphes (5) à (9).

105 Section 35 is ancillary to s. 34. It provides that where a substance is not listed in Schedule I (or where it is listed but the Ministers believe it is not adequately regulated) and the Ministers believe that immediate action is required in respect of that substance, the Minister of the Environment may make an "interim order" in respect of the substance and make any provision that may be made in a regulation made under s. 34(1) and (2). Such provisions may include setting limits on the quantity and concentration of emissions of the substance, controlling the areas where the substance may be released, controlling the commercial man-

L'article 35 est accessoire à l'art. 34. Il prévoit que, lorsqu'une substance n'est pas inscrite sur la liste de l'annexe I (ou lorsqu'elle y est inscrite mais que les ministres croient qu'elle n'est pas réglementée comme il convient) et que les ministres croient qu'une intervention immédiate est nécessaire à l'égard de cette substance, le ministre de l'Environnement peut prendre, relativement à la substance en question, un «arrêté d'urgence» pouvant comporter les mêmes dispositions qu'un règlement d'application des par. 34(1) et (2). Ces dispositions peuvent notamment établir des limites relativement à la quantité et à la concentration des

1997 CanLII 318 (SCC)

ufacturing or processing activity in the course of which the substance is released, stipulating the manner and conditions in which the substance may be advertised or offered for sale and regulating the packaging and labelling of the substance or of a material containing the substance. An interim order ceases to have effect within 14 days unless it is approved by the Governor in Council (s. 35(3)), and such approval is not to be given unless, within 24 hours of making the order, the Minister has consulted with the affected provincial governments to determine whether they are prepared to take sufficient action to deal with the significant danger and has also consulted other federal Ministers to determine whether the matter can be dealt with under another Act of Parliament. The interim order ceases to have effect at the latest two years after it is made (s. 35(8)). Section 35 reads:

émissions de la substance, restreindre les secteurs où il peut y avoir rejet de la substance, contrôler les activités commerciales de fabrication ou de transformation au cours desquelles il y a rejet de la substance, prescrire les modalités de la publicité et de la mise en vente de la substance et réglementer l'emballage et l'étiquetage de la substance ou d'un produit qui la contient. L'arrêté d'urgence cesse de s'appliquer dans les 14 jours, à défaut d'approbation par le gouverneur en conseil (par. 35(3)), et une telle approbation ne doit être donnée que si, dans les 24 heures de la prise de l'arrêté, le Ministre a consulté les gouvernements provinciaux concernés afin de déterminer s'ils sont disposés à prendre les moyens nécessaires pour parer au danger appréciable et s'il a également consulté les autres ministres fédéraux afin de déterminer s'il est possible de régler la question en recourant à une autre loi fédérale. L'arrêté d'urgence cesse d'avoir effet, au plus tard, deux ans après qu'il a été pris (par. 35(8)). L'article 35 est rédigé ainsi:

35. (1) Where

(*a*) a substance

(i) is not specified on the List of Toxic Substances in Schedule I and the Ministers believe that it is toxic, or

(ii) is specified on that List and the Ministers believe that it is not adequately regulated, and

(*b*) the Ministers believe that immediate action is required to deal with a significant danger to the environment or to human life or health,

the Minister may make an interim order in respect of the substance and the order may contain any provision that may be contained in a regulation made under subsection 34(1) or (2).

(2) Subject to subsection (3), an interim order has effect

(*a*) from the time it is made; and

(*b*) as if it were a regulation made under section 34.

35. (1) Le ministre peut prendre un arrêté d'urgence pouvant comporter les mêmes dispositions qu'un règlement d'application des paragraphes 34(1) ou (2), lorsque les conditions suivantes sont réunies:

a) la substance n'est pas inscrite sur la liste de l'annexe I et les ministres la croient toxique, ou bien elle y est inscrite et ils estiment qu'elle n'est pas réglementée comme il convient;

b) les ministres croient qu'une intervention immédiate est nécessaire afin de parer à tout danger appréciable soit pour l'environnement, soit pour la vie humaine ou la santé.

(2) Sous réserve du paragraphe (3), l'arrêté prend effet dès sa prise comme s'il s'agissait d'un règlement pris en vertu de l'article 34.

1997 CanLII 318 (SCC)

(3) An interim order ceases to have effect unless it is approved by the Governor in Council within fourteen days after it is made.

(4) The Governor in Council shall not approve an interim order unless

(*a*) the Minister has, within twenty-four hours after making the order, offered to consult the governments of all the affected provinces to determine whether they are prepared to take sufficient action to deal with the significant danger; and

(*b*) the Minister has consulted with other ministers of the Crown in right of Canada to determine whether any action can be taken under any other Act of Parliament to deal with the significant danger.

(5) Where the Governor in Council approves an interim order, the Ministers shall, within ninety days after the approval, recommend to the Governor in Council

(*a*) that a regulation having the same effect as the order be made under section 34; and

(*b*) if the order was made in respect of a substance that was not specified on the List of Toxic Substances in Schedule I, that the substance be added to that List under section 33.

(6) An interim order

(*a*) is exempt from the application of sections 3, 5 and 11 of the *Statutory Instruments Act*; and

(*b*) shall be published in the *Canada Gazette* within twenty-three days after it is approved under subsection (3).

(7) No person shall be convicted of an offence consisting of a contravention of an interim order that, at the time of the alleged contravention, was not published in the *Canada Gazette* in both official languages unless it is proved that at the date of the alleged contravention reasonable steps had been taken to bring the purport of the order to the notice of those persons likely to be affected by it.

(8) An interim order ceases to have effect when a regulation referred to in subsection (5) is made or two years after the order was made, whichever is the earlier.

(3) L'arrêté cesse toutefois d'avoir effet à défaut d'approbation par le gouverneur en conseil dans les quatorze jours qui suivent.

(4) Le gouverneur en conseil ne peut approuver l'arrêté d'urgence que si le ministre:

a) d'une part, dans les vingt-quatre heures suivant la prise de l'arrêté, a offert de consulter tous les gouvernements des provinces concernées afin de déterminer s'ils sont disposés à prendre les moyens nécessaires pour parer au danger en question;

b) d'autre part, a consulté les autres ministres fédéraux afin de déterminer si des mesures peuvent être prises sous le régime de toute autre loi fédérale pour parer au danger en question.

(5) Dans les quatre-vingt-dix jours qui suivent l'approbation par le gouverneur en conseil, les ministres recommandent à celui-ci, à la fois:

a) la prise d'un règlement d'application de l'article 34 ayant le même effet que l'arrêté;

b) l'inscription, sous le régime de l'article 33, de la substance visée sur la liste de l'annexe I dans les cas où elle n'y figure pas.

(6) L'arrêté est soustrait à l'application des articles 3, 5 et 11 de la *Loi sur les textes réglementaires* et publié dans la *Gazette du Canada* dans les vingt-trois jours suivant son approbation.

(7) Nul ne peut être condamné pour violation d'un arrêté d'urgence qui, à la date du fait reproché, n'était pas publié dans la *Gazette du Canada* dans les deux langues officielles, sauf s'il est établi qu'à cette date les mesures nécessaires avaient été prises pour porter la teneur de l'arrêté à la connaissance des personnes susceptibles d'être touchées par celui-ci.

(8) L'arrêté cesse d'avoir effet à la prise du règlement visé au paragraphe (5) ou, au plus tard, deux ans après sa prise.

106 It is the interplay between ss. 34 and 35 that gave rise to the Interim Order that ultimately led to

C'est l'interaction des art. 34 et 35 qui est à l'origine de l'arrêté d'urgence ayant abouti au pré-

1997 CanLII 318 (SCC)

this litigation. In 1989, the then Environment Minister, the Honourable Lucien Bouchard, became concerned that regulations governing PCBs made under previous legislation might not continue in force once the previous legislation had been repealed. Exercising his powers under s. 35, he adopted the Interim Order, cited *supra*, providing for the regulation of PCBs in accordance with the provisions of s. 34. The respondent challenges the charges brought against it under the Interim Order by alleging that both the order and ss. 34 and 35 are *ultra vires* Parliament.

But the nub of its case is not fully apparent from a reading of ss. 34 and 35 alone. These provisions must also be read in light of the broad definitions of "environment" and "substance" which read:

3. (1) In this Act,

. . .

"environment" means the components of the Earth and includes

(*a*) air, land and water,

(*b*) all layers of the atmosphere,

(*c*) all organic and inorganic matter and living organisms, and

(*d*) the interacting natural systems that include components referred to in paragraphs (*a*) to (*c*);

. . .

"substance" means any distinguishable kind of organic or inorganic matter, whether animate or inanimate, and includes

(*a*) any matter that is capable of being dispersed in the environment or of being transformed in the environment into matter that is capable of being so dispersed or that is capable of causing such transformations in the environment,

(*b*) any element or free radical,

(*c*) any combination of elements of a particular molecular identity that occurs in nature or as a result of a chemical reaction, and

(*d*) complex combinations of different molecules that originate in nature or are the result of chemical reac-

sent litige. En 1989, le ministre de l'Environnement de l'époque, l'honorable Lucien Bouchard, a commencé à craindre que le règlement régissant les BPC, pris en vertu de l'ancienne loi, ne soit plus en vigueur une fois que l'ancienne loi aurait été abrogée. Exerçant les pouvoirs que lui conférait l'art. 35, il a adopté l'arrêté d'urgence susmentionné qui prévoyait la réglementation des BPC conformément aux dispositions de l'art. 34. L'intimée conteste les accusations portées contre elle en vertu de l'arrêté d'urgence, en alléguant que cet arrêté ainsi que les art. 34 et 35 excèdent la compétence du Parlement.

Mais l'essentiel de son argumentation n'est pas tout à fait évident à la lecture des seuls art. 34 et 35. Il faut également lire ces dispositions à la lumière des définitions générales des mots «environnement» et «substance», qui se lisent ainsi: 107

3. (1) Les définitions qui suivent s'appliquent à la présente loi.

. . .

«environnement» Ensemble des conditions et des éléments naturels de la terre, notamment:

a) l'air, l'eau et le sol;

b) toutes les couches de l'atmosphère;

c) toutes les matières organiques et inorganiques ainsi que les êtres vivants;

d) les systèmes naturels en interaction qui comprennent les éléments visés aux alinéas *a*) à *c*).

. . .

«substance» Toute matière organique ou inorganique, animée ou inanimée, distinguable. La présente définition vise notamment:

a) les matières susceptibles soit de se disperser dans l'environnement, soit de s'y transformer en matières dispersables, ainsi que les matières susceptibles de provoquer de telles transformations dans l'environnement;

b) les radicaux libres ou les éléments;

c) les combinaisons d'éléments à l'identité moléculaire précise soit naturelles, soit consécutives à une réaction chimique;

d) des combinaisons complexes de molécules différentes, d'origine naturelle ou résultant de réactions

1997 CanLII 318 (SCC)

tions but that could not practicably be formed by simply combining individual constituents,

and, except for the purposes of sections 25 to 32, includes

(*e*) any mixture that is a combination of substances and does not itself produce a substance that is different from the substances that were combined,

(*f*) any manufactured item that is formed into a specific physical shape or design during manufacture and has, for its final use, a function or functions dependent in whole or in part on its shape or design, and

(*g*) any animate matter that is, or any complex mixtures of different molecules that are, contained in effluents, emissions or wastes that result from any work, undertaking or activity;

Above all, the respondent is concerned with the term "toxic" as it is used in s. 11, which, together with the definitions just quoted, it contends, constitute an impermissibly broad interference with provincial legislative powers.

The Issues

108 In this Court, the appellant Attorney General of Canada seeks to support the impugned provisions of the Act on the basis of the national concern doctrine under the peace, order and good government clause of s. 91 or under the criminal law power under s. 91(27) of the *Constitution Act, 1867*. The respondent Hydro-Québec and the *mis en cause* Attorney General of Quebec dispute this. In broad terms, they say that the provisions are so invasive of provincial powers that they cannot be justified either under the national dimensions doctrine or under the criminal law power. The attack on the validity of the provisions under the latter power is also supported, most explicitly by the intervener the Attorney General for Saskatchewan, on the ground that they are, in essence, of a regulatory and not of a prohibitory character. Finally, I repeat that while the Interim Order precipitated the litigation, there is no doubt that the respondent and *mis*

chimiques, mais qui ne pourraient se former dans la pratique par la simple combinaison de leurs composants individuels.

Elle vise aussi, sauf pour l'application des articles 25 à 32:

e) les mélanges combinant des substances et ne produisant pas eux-mêmes une substance différente de celles qui ont été combinées;

f) les articles manufacturés dotés d'une forme ou de caractéristiques matérielles précises pendant leur fabrication et qui ont, pour leur utilisation finale, une ou plusieurs fonctions en dépendant, en tout ou en partie;

g) les matières animées ou les mélanges complexes de molécules différentes qui sont contenus dans les effluents, les émissions ou les déchets attribuables à des travaux, des entreprises ou des activités.

L'intimée s'intéresse surtout au mot «toxique» utilisé à l'art. 11, qui, conjugué aux définitions qui viennent d'être citées, constitue, selon elle, un empiétement grave et inacceptable sur les pouvoirs législatifs des provinces.

Les questions en litige

Devant notre Cour, l'appelant le procureur général du Canada cherche à fonder les dispositions contestées de la Loi sur la théorie de l'intérêt national justifiant l'application de la clause de l'art. 91 concernant la paix, l'ordre et le bon gouvernement, ou sur la compétence en matière de droit criminel conférée au par. 91(27) de la *Loi constitutionnelle de 1867*. L'intimée Hydro-Québec et le mis en cause le procureur général du Québec contestent cela. De façon générale, ils affirment que ces dispositions empiètent tellement sur les pouvoirs des provinces qu'il est impossible de les justifier par la théorie des dimensions nationales ou la compétence en matière de droit criminel. La contestation de la validité des dispositions en vertu de cette dernière compétence est également appuyée fort explicitement par l'intervenant le procureur général de la Saskatchewan, pour le motif qu'elles sont essentiellement de nature réglementaire et non prohibitive. Enfin, je répète que, bien que l'arrêté d'urgence ait précipité le litige, il n'y a pas de doute que l'intimée et le mis en cause ainsi que les intervenants qui les appuient visent

1997 CanLII 318 (SCC)

en cause as well as their supporting interveners are after bigger game — the enabling provisions.

While both the national concern doctrine and the criminal law power received attention in the course of the argument, it is right to say that the principal focus in this Court was on the national concern issue. This may in fact be owing to the fact that this Court's most recent decision dealing extensively with the criminal law power, *RJR-MacDonald Inc. v. Canada (Attorney General)*, [1995] 3 S.C.R. 199, had not been decided when this case came before the courts whose judgments are under review in this case. Whatever the reason, many of the arguments and concerns seemed at times to be addressed at both legislative powers, and the general effect was to colour and I think at times to distort the approach that, in my view, should properly be taken to the criminal law power. Thus I found much of the discussion relating to the pith and substance of the legislation, as well as other matters to which I shall later refer, not altogether apt to a consideration of the criminal law power.

I make these remarks because, in my view, the impugned provisions are valid legislation under the criminal law power — s. 91(27) of the *Constitution Act, 1867*. It thus becomes unnecessary to deal with the national concern doctrine, which inevitably raises profound issues respecting the federal structure of our Constitution which do not arise with anything like the same intensity in relation to the criminal law power.

In analysing the issues as they relate to the criminal law power, I propose to proceed in the following manner. I shall begin with introductory remarks reviewing the manner in which this Court has approached environmental issues arising under the division of powers under the *Constitution Act, 1867*. I shall then turn to a discussion of the federal criminal law power under s. 91(27) of that Act. This will be followed by a closer examination of

une cible plus importante — les dispositions habilitantes.

109 Bien qu'on ait prêté attention à la théorie de l'intérêt national et à la compétence en matière de droit criminel au cours des plaidoiries, on peut affirmer à juste titre que, devant notre Cour, l'accent a été mis principalement sur la question de l'intérêt national. C'est peut-être dû au fait que l'arrêt le plus récent de notre Cour portant largement sur la compétence en matière de droit criminel, *RJR-MacDonald Inc. c. Canada (Procureur général)*, [1995] 3 R.C.S. 199, n'avait pas été rendu lorsque la présente affaire a été portée devant les tribunaux dont les décisions font l'objet du présent pourvoi. Quelle qu'en soit la raison, bon nombre des arguments et des préoccupations semblaient parfois avoir trait aux deux pouvoirs législatifs, et cela a généralement eu pour effet de fausser et parfois, selon moi, de dénaturer la façon dont, à mon avis, il conviendrait d'aborder la compétence en matière de droit criminel. J'ai donc conclu qu'une bonne partie de l'analyse portant sur le caractère véritable de la loi en cause, ainsi que d'autres questions auxquelles je me reporterai plus tard, n'étaient absolument pas pertinentes pour examiner la compétence en matière de droit criminel.

110 Je formule ces remarques parce que, selon moi, les dispositions contestées sont valides en vertu de la compétence en matière de droit criminel — le par. 91(27) de la *Loi constitutionnelle de 1867*. Il devient ainsi inutile de traiter la théorie de l'intérêt national, qui soulève inévitablement de graves questions concernant la structure fédérale de notre Constitution qui ne se posent pas avec la même intensité au sujet de la compétence en matière de droit criminel.

111 Pour analyser les questions se rapportant à la compétence en matière de droit criminel, je compte procéder de la façon suivante. Je vais d'abord formuler des observations préliminaires sur la façon dont notre Cour a abordé les questions environnementales qui se posent en vertu du partage des pouvoirs prévu dans la *Loi constitutionnelle de 1867*. Je passerai ensuite à l'analyse de la compétence fédérale en matière de droit criminel en vertu

1997 CanLII 318 (SCC)

Part II, Toxic Substances, of the Act. This will open the way to a discussion of whether ss. 34 and 35, as well as the Interim Order, are valid exercises of the criminal law power.

Analysis

Introduction

112 In considering how the question of the constitutional validity of a legislative enactment relating to the environment should be approached, this Court in *Oldman River*, *supra*, made it clear that the environment is not, as such, a subject matter of legislation under the *Constitution Act, 1867*. As it was put there, "the *Constitution Act, 1867* has not assigned the matter of 'environment' *sui generis* to either the provinces or Parliament" (p. 63). Rather, it is a diffuse subject that cuts across many different areas of constitutional responsibility, some federal, some provincial (pp. 63-64). Thus Parliament or a provincial legislature can, in advancing the scheme or purpose of a statute, enact provisions minimizing or preventing the detrimental impact that statute may have on the environment, prohibit pollution, and the like. In assessing the constitutional validity of a provision relating to the environment, therefore, what must first be done is to look at the catalogue of legislative powers listed in the *Constitution Act, 1867* to see if the provision falls within one or more of the powers assigned to the body (whether Parliament or a provincial legislature) that enacted the legislation (*ibid.* at p. 65). If the provision in essence, in pith and substance, falls within the parameters of any such power, then it is constitutionally valid.

113 Though pith and substance may be described in different ways, the expressions "dominant purpose" or "true character" used in *R. v. Morgentaler*, [1993] 3 S.C.R. 463, at pp. 481-82, or "the dominant or most important characteristic of the challenged law" used in *Whitbread v. Walley*, [1990] 3 S.C.R. 1273, at p. 1286, and in *Old-*

du par. 91(27) de cette loi. Viendra ensuite un examen plus approfondi de la partie II de la Loi, intitulée «Substances toxiques». Cela nous amènera à nous demander si les art. 34 et 35 ainsi que l'arrêté d'urgence constituent des exercices valides de la compétence en matière de droit criminel.

Analyse

Introduction

En examinant la façon dont devrait être abordée la question de la constitutionnalité d'un texte législatif concernant l'environnement, notre Cour a précisé dans l'arrêt *Oldman River*, précité, que l'environnement n'est pas, comme tel, un domaine de compétence législative en vertu de la *Loi constitutionnelle de 1867*. Comme il y est affirmé, «la *Loi constitutionnelle de 1867* n'a pas conféré le domaine de l'«"environnement"» comme tel aux provinces ou au Parlement» (p. 63). Il s'agit plutôt d'un sujet diffus qui touche plusieurs domaines différents de responsabilité constitutionnelle, dont certains sont fédéraux et d'autres provinciaux (pp. 63 et 64). Le Parlement ou une législature provinciale peut, en alléguant l'économie ou l'objet d'une loi, adopter des dispositions qui réduisent au minimum ou empêchent l'effet préjudiciable que cette loi peut avoir sur l'environnement, interdire la pollution, et ainsi de suite. En conséquence, pour évaluer la constitutionnalité d'une disposition relative à l'environnement, il faut d'abord consulter la liste des pouvoirs législatifs figurant dans la *Loi constitutionnelle de 1867*, pour vérifier si la disposition relève d'un seul ou de plusieurs des pouvoirs attribués au corps législatif (le Parlement ou une législature provinciale) qui a adopté la mesure législative en cause (*ibid.*, à la p. 65). Si, de par son caractère véritable, la disposition relève essentiellement de l'un de ces pouvoirs, elle est alors constitutionnellement valide.

Bien que le caractère véritable puisse être décrit de différentes façons, les expressions «objet principal» ou «idée maîtresse» utilisées dans l'arrêt *R. c. Morgentaler*, [1993] 3 R.C.S. 463, aux pp. 481 et 482, ou l'expression «la caractéristique principale ou la plus importante de la loi contestée», utilisée dans les arrêts *Whitbread c. Walley*, [1990] 3

1997 CanLII 318 (SCC)

man River, *supra*, at p. 62, appropriately convey the meaning to be attached to the term. If a provision dealing with the environment is really aimed at promoting the dominant purpose of the statute or at addressing the impact of a statutory scheme, and the scheme itself is valid, then so is the provision.

In examining the validity of legislation in this way, it must be underlined that the nature of the relevant legislative powers must be examined. Different types of legislative powers may support different types of environmental provisions. The manner in which such provisions must be related to a legislative scheme was, by way of example, discussed in *Oldman River* in respect of railways, navigable waters and fisheries. An environmental provision may be validly aimed at curbing environmental damage, but in some cases the environmental damage may be directly related to the power itself. There is a considerable difference between regulating works and activities, like railways, and a resource like fisheries, and consequently the environmental provisions relating to each of these. Environmental provisions must be tied to the appropriate constitutional source.

Some heads of legislation may support a wholly different type of environmental provision than others. Notably under the general power to legislate for the peace, order and good government, Parliament may enact a wide variety of environmental legislation in dealing with an emergency of sufficient magnitude to warrant resort to the power. But the emergency would, of course, have to be established. So too with the "national concern" doctrine, which formed the major focus of the present case. A discrete area of environmental legislative power can fall within that doctrine, provided it meets the criteria first developed in *Reference re Anti-Inflation Act*, [1976] 2 S.C.R. 373,

R.C.S. 1273, à la p. 1286, et *Oldman River*, précité, à la p. 62, évoquent correctement le sens qu'il faut donner à cette notion. Si une disposition concernant l'environnement vise réellement à promouvoir l'objectif principal de la loi ou à s'attaquer à l'effet d'un régime législatif, et si ce régime est lui-même valide, alors la disposition le sera également.

114 Il faut souligner que, lorsqu'on examine la validité d'une loi de cette façon, il faut également examiner la nature des pouvoirs législatifs pertinents. Différents types de pouvoirs législatifs peuvent justifier différents types de dispositions relatives à l'environnement. La manière dont de telles dispositions doivent se rapporter à un régime législatif a été étudiée, au moyen d'un exemple, dans l'arrêt *Oldman River* relativement aux chemins de fer, aux eaux navigables et aux pêches. Une disposition relative à l'environnement peut validement viser à freiner les dommages causés à l'environnement, mais, dans certains cas, ces dommages peuvent être liés directement au pouvoir lui-même. Il existe une énorme différence entre la réglementation d'ouvrages et d'activités comme les chemins de fer, et celle d'une ressource comme les pêches, et, par conséquent, entre les dispositions relatives à l'environnement qui se rapportent à chacun d'eux. Les dispositions relatives à l'environnement doivent être rattachées à la bonne source constitutionnelle.

115 Certains chefs de compétence législative peuvent justifier un type tout à fait différent de dispositions relatives à l'environnement. En vertu notamment du pouvoir général d'adopter des lois pour la paix, l'ordre et le bon gouvernement, le Parlement peut adopter un large éventail de lois sur l'environnement afin de répondre à une urgence d'une ampleur suffisante pour justifier le recours à ce pouvoir. Mais il faudrait naturellement prouver qu'il y a urgence. Il en est de même en ce qui concerne la théorie de l'«intérêt national», qui constituait le principal point sur lequel on s'est concentré en l'espèce. Un domaine distinct de compétence législative en matière d'environnement peut relever de cette théorie, pourvu qu'il satisfasse aux critères établis dans le *Renvoi sur la Loi anti-*

1997 CanLII 318 (SCC)

and thus set forth in *Crown Zellerbach*, *supra*, at p. 432:

> 3. For a matter to qualify as a matter of national concern in either sense it must have a singleness, distinctiveness and indivisibility that clearly distinguishes it from matters of provincial concern and a scale of impact on provincial jurisdiction that is reconcilable with the fundamental distribution of legislative power under the Constitution;

Thus in the latter case, this Court held that marine pollution met those criteria and so fell within the exclusive legislative power of Parliament under the peace, order and good government clause. While the constitutional necessity of characterizing certain activities as beyond the scope of provincial legislation and falling within the national domain was accepted by all the members of the Court, the danger of too readily adopting this course was not lost on the minority. Determining that a particular subject matter is a matter of national concern involves the consequence that the matter falls within the exclusive and paramount power of Parliament and has obvious impact on the balance of Canadian federalism. In *Crown Zellerbach*, the minority (at p. 453) expressed the view that the subject of environmental protection was all-pervasive, and if accepted as falling within the general legislative domain of Parliament under the national concern doctrine, could radically alter the division of legislative power in Canada.

116 The minority position on this point (which was not addressed by the majority) was subsequently accepted by the whole Court in *Oldman River*, *supra*, at p. 64. The general thrust of that case is that the Constitution should be so interpreted as to afford both levels of government ample means to protect the environment while maintaining the general structure of the Constitution. This is hardly consistent with an enthusiastic adoption of the "national dimensions" doctrine. That doctrine can, it is true, be adopted where the criteria set forth in *Crown Zellerbach* are met so that the subject can

inflation, [1976] 2 R.C.S. 373, et ainsi énoncés dans l'arrêt *Crown Zellerbach*, précité, à la p. 432:

> 3. Pour qu'on puisse dire qu'une matière est d'intérêt national dans un sens ou dans l'autre, elle doit avoir une unicité, une particularité et une indivisibilité qui la distinguent clairement des matières d'intérêt provincial, et un effet sur la compétence provinciale qui soit compatible avec le partage fondamental des pouvoirs législatifs effectué par la Constitution;

Dans le dernier cas, notre Cour a donc jugé que la pollution de la mer satisfaisait à ces critères et relevait ainsi de la compétence législative exclusive que le Parlement possède en vertu de la clause concernant la paix, l'ordre et le bon gouvernement. Bien que tous les juges de la Cour aient reconnu la nécessité constitutionnelle de qualifier certaines activités comme excédant la portée de la loi provinciale et relevant du domaine national, le danger d'adopter trop facilement cette ligne de conduite n'a pas échappé aux juges dissidents. Décider qu'un sujet particulier est une question d'intérêt national fait en sorte que cette question relève de la compétence exclusive et prépondérante du Parlement et a manifestement une incidence sur l'équilibre du fédéralisme canadien. Dans l'arrêt *Crown Zellerbach*, les juges dissidents (à la p. 453) ont exprimé l'avis que la protection de l'environnement est une matière qui touche à tout et que, si elle était reconnue comme relevant de la compétence législative générale du Parlement en vertu de la théorie de l'intérêt national, elle pourrait modifier radicalement le partage des compétences législatives au Canada.

La position des juges dissidents sur ce point (qui n'a pas été abordé par les juges formant la majorité) a été ultérieurement acceptée par la Cour au complet dans l'arrêt *Oldman River*, précité, à la p. 64. D'après l'orientation générale de cet arrêt, il faudrait interpréter la Constitution de façon à accorder aux deux niveaux de gouvernement de vastes moyens de protéger l'environnement, tout en maintenant la structure générale de la Constitution. Cela est difficilement compatible avec l'adoption enthousiaste de la théorie des «dimensions nationales». Cette théorie peut, il est vrai, être adoptée lorsqu'il a été satisfait aux critères énoncés dans l'arrêt *Crown Zellerbach*, de sorte

1997 CanLII 318 (SCC)

appropriately be separated from areas of provincial competence.

I have gone on at this length to demonstrate the simple proposition that the validity of a legislative provision (including one relating to environmental protection) must be tested against the specific characteristics of the head of power under which it is proposed to justify it. For each constitutional head of power has its own particular characteristics and raises concerns peculiar to itself in assessing it in the balance of Canadian federalism. This may seem obvious, perhaps even trite, but it is all too easy (see *Fowler v. The Queen*, [1980] 2 S.C.R. 213) to overlook the characteristics of a particular power and overshoot the mark or, again, in assessing the applicability of one head of power to give effect to concerns appropriate to another head of power when this is neither appropriate nor consistent with the law laid down by this Court respecting the ambit and contours of that other power. In the present case, it seems to me, this was the case of certain propositions placed before us regarding the breadth and application of the criminal law power. There was a marked attempt to raise concerns appropriate to the national concern doctrine under the peace, order and good government clause to the criminal law power in a manner that, in my view, is wholly inconsistent with the nature and ambit of that power as set down by this Court from a very early period and continually reiterated since, notably in specific pronouncements in the most recent cases on the subject.

The Criminal Law Power

Section 91(27) of the *Constitution Act, 1867* confers the exclusive power to legislate in relation to criminal law on Parliament. The nature and ambit of this power has recently been the subject of a detailed analytical and historical examination in *RJR-MacDonald*, *supra*, where it was again described (p. 240), as it has for many years, as being "plenary in nature" (emphasis added). I shall

que le sujet en question peut, à juste titre, être dissocié des domaines de compétence provinciale.

117 J'en suis venu jusque-là pour démontrer simplement que la validité d'une disposition législative (y compris une disposition relative à la protection de l'environnement) doit être examinée en fonction des caractéristiques particulières du chef de compétence par lequel on propose de la justifier. En effet, chaque chef de compétence constitutionnelle a ses propres caractéristiques particulières et soulève des questions qui lui sont propres lorsqu'on l'évalue au regard du fédéralisme canadien. Cela peut sembler évident, voire même banal, mais il n'est que trop facile (voir *Fowler c. La Reine*, [1980] 2 R.C.S. 213) d'oublier les caractéristiques d'un pouvoir particulier et de dépasser les bornes ou, encore une fois, en évaluant l'applicabilité d'un chef de compétence, de mettre à exécution des intérêts propres à un autre chef de compétence lorsque ce n'est ni approprié ni conforme au droit énoncé par notre Cour en ce qui concerne l'étendue et les limites de cet autre pouvoir. En l'espèce, me semble-t-il, c'était le cas de certaines propositions qui nous ont été soumises relativement à l'étendue et à l'application de la compétence en matière de droit criminel. On a manifestement tenté de soulever des questions propres à la théorie de l'intérêt national justifiant l'application de la clause concernant la paix, l'ordre et le bon gouvernement à la compétence en matière de droit criminel, et ce, d'une manière qui, à mon avis, est tout à fait incompatible avec la nature et l'étendue de cette compétence qui ont été établies très tôt par notre Cour et qui ont été constamment réitérées depuis, notamment dans des déclarations précises contenues dans la jurisprudence la plus récente en la matière.

La compétence en matière de droit criminel

118 Le paragraphe 91(27) de la *Loi constitutionnelle de 1867* confère au Parlement le pouvoir exclusif d'adopter des lois en matière de droit criminel. La nature et l'étendue de ce pouvoir ont récemment fait l'objet d'une analyse historique approfondie dans l'arrêt *RJR-MacDonald*, précité, où ce pouvoir a de nouveau été décrit (p. 240), comme c'était le cas depuis de nombreuses années, comme

1997 CanLII 318 (SCC)

not attempt to repeat the analysis so recently set forth at length by this Court, or attempt to refer extensively to all of the many authorities there cited, but will confine myself to underlining the findings in that case that are most salient to the issues raised here. I add that Professor Leclair in an excellent article, "Aperçu des virtualités de la compétence fédérale en droit criminel dans le contexte de la protection de l'environnement" (1996), 27 *R.G.D.* 137, has very recently analysed all the relevant cases and has come to the same conclusion about the general scope of the criminal law power and its application to the environment, and in particular the Act here in question.

étant «de nature plénière» (je souligne). Je ne tenterai ni de reprendre l'analyse détaillée si récente de notre Cour ni de mentionner à fond toute la doctrine et toute la jurisprudence qui y ont été citées, mais je me contenterai plutôt de souligner les conclusions de cet arrêt qui sont les plus marquantes en ce qui concerne les questions soulevées en l'espèce. J'ajoute que, dans un excellent article intitulé «Aperçu des virtualités de la compétence fédérale en droit criminel dans le contexte de la protection de l'environnement» (1996), 27 *R.G.D.* 137, le professeur Leclair analysait très récemment toute la jurisprudence pertinente et qu'il en est venu à la même conclusion au sujet de la portée générale de la compétence en matière de droit criminel et de son application à l'environnement, et, en particulier, de la loi dont il est question en l'espèce.

119 What appears from the analysis in *RJR-MacDonald* is that as early as 1903, the Privy Council, in *Attorney-General for Ontario v. Hamilton Street Railway Co.*, [1903] A.C. 524, at pp. 528-29, had made it clear that the power conferred on Parliament by s. 91(27) is "the criminal law in its widest sense" (emphasis added). Consistently with this approach, the Privy Council in *Proprietary Articles Trade Association v. Attorney-General for Canada*, [1931] A.C. 310 (hereafter *PATA*), at p. 324, defined the criminal law power as including any prohibited act with penal consequences. As it put it, at p. 324: "The criminal quality of an act cannot be discerned . . . by reference to any standard but one: Is the act prohibited with penal consequences?" This approach has been consistently followed ever since and, as *RJR-MacDonald* relates, it has been applied by the courts in a wide variety of settings. Accordingly, it is entirely within the discretion of Parliament to determine what evil it wishes by penal prohibition to suppress and what threatened interest it thereby wishes to safeguard, to adopt the terminology of Rand J. in the *Margarine Reference*, *supra*, at p. 49, cited *infra*.

Ce qui ressort de l'analyse effectuée dans l'arrêt *RJR-MacDonald* est que, dès 1903, dans l'arrêt *Attorney-General for Ontario c. Hamilton Street Railway Co.*, [1903] A.C. 524, aux pp. 528 et 529, le Conseil privé avait précisé que le pouvoir conféré au Parlement par le par. 91(27) a trait au [TRADUCTION] «droit criminel dans son sens le plus large» (je souligne). Conformément à cette interprétation, le Conseil privé a, dans l'arrêt *Proprietary Articles Trade Association c. Attorney-General for Canada*, [1931] A.C. 310 (ci-après *PATA*), à la p. 324, défini la compétence en matière de droit criminel comme comprenant tout acte interdit assorti de conséquences pénales. Comme il l'affirme, à la p. 324: [TRADUCTION] «La qualité criminelle d'un acte ne peut se discerner [. . .] qu'en se référant à une norme unique: l'acte est-il interdit et assorti de conséquences pénales?» Cette interprétation a été constamment suivie depuis et, comme on le rapporte dans l'arrêt *RJR-MacDonald*, elle a été appliquée par les tribunaux dans toute une gamme de contextes. Par conséquent, il relève entièrement du pouvoir discrétionnaire du Parlement de décider quel mal il désire supprimer au moyen d'une interdiction pénale et quel intérêt menacé il souhaite ainsi sauvegarder, pour reprendre les termes du juge Rand dans le *Renvoi sur la margarine*, précité, à la p. 49, cité plus loin.

1997 CanLII 318 (SCC)

Contrary to the respondent's submission, under s. 91(27) of the *Constitution Act, 1867*, it is also within the discretion of Parliament to determine the extent of blameworthiness that it wishes to attach to a criminal prohibition. So it may determine the nature of the mental element pertaining to different crimes, such as a defence of due diligence like that which appears in s. 125(1) of the Act in issue. This flows from the fact that Parliament has been accorded plenary power to make criminal law in the widest sense. This power is, of course, subject to the "fundamental justice" requirements of s. 7 of the *Canadian Charter of Rights and Freedoms*, which may dictate a higher level of *mens rea* for serious or "true" crimes; cf. *R. v. Wholesale Travel Group Inc.*, [1991] 3 S.C.R. 154, and *R. v. Rube*, [1992] 3 S.C.R. 159, but that is not an issue here.

120 Contrairement à l'argument de l'intimée, aux termes du par. 91(27) de la *Loi constitutionnelle de 1867*, il relève également du pouvoir discrétionnaire du Parlement de déterminer le degré de culpabilité qu'il souhaite attacher à une interdiction criminelle. Il peut ainsi déterminer la nature de l'élément moral relatif à divers crimes, telle que la défense de diligence raisonnable comme celle qui figure au par. 125(1) de la loi en cause. Cela découle du fait que le Parlement a été investi du plein pouvoir d'adopter des règles de droit criminel au sens le plus large du terme. Ce pouvoir est assujetti, naturellement, aux exigences de la «justice fondamentale» prescrites à l'art. 7 de la *Charte canadienne des droits et libertés*, qui peuvent dicter un degré plus élevé de *mens rea* dans le cas des crimes graves ou «proprement dits»; voir *R. c. Wholesale Travel Group Inc.*, [1991] 3 R.C.S. 154, et *R. c. Rube*, [1992] 3 R.C.S. 159, mais cette question ne se pose pas en l'espèce.

The *Charter* apart, only one qualification has been attached to Parliament's plenary power over criminal law. The power cannot be employed colourably. Like other legislative powers, it cannot, as Estey J. put it in *Scowby v. Glendinning*, [1986] 2 S.C.R. 226, at p. 237, "permit Parliament, simply by legislating in the proper form, to colourably invade areas of exclusively provincial legislative competence". To determine whether such an attempt is being made, it is, of course, appropriate to enquire into Parliament's purpose in enacting the legislation. As Estey J. noted in *Scowby*, at p. 237, since the *Margarine Reference*, it has been "accepted that some legitimate public purpose must underlie the prohibition". Estey J. then cited Rand J.'s words in the *Margarine Reference* (at p. 49) as follows:

121 La *Charte* mise à part, le plein pouvoir du Parlement en matière de droit criminel a été assorti d'une seule réserve. Ce pouvoir ne peut pas être utilisé de façon déguisée. Comme d'autres pouvoirs législatifs, il ne peut pas, comme le dit le juge Estey dans l'arrêt *Scowby c. Glendinning*, [1986] 2 R.C.S. 226, à la p. 237, «permettr[e] au Parlement, simplement en légiférant de la manière appropriée, d'empiéter spécieusement sur des domaines de compétence législative provinciale exclusive». Pour déterminer si on est en présence d'une telle tentative, il convient, naturellement, d'examiner l'objectif que poursuivait le Parlement en adoptant la loi en cause. Comme le juge Estey le fait remarquer dans l'arrêt *Scowby*, à la p. 237, depuis le *Renvoi sur la margarine*, on a «accepté que l'interdiction doit se fonder sur un objectif public légitime». Le juge Estey cite ensuite les propos du juge Rand dans le *Renvoi sur la margarine* (à la p. 49):

A crime is an act which the law, with appropriate penal sanctions, forbids; but as prohibitions are not enacted in a vacuum, we can properly look for some evil or injurious or undesirable effect upon the public against which the law is directed. That effect may be in relation to social, economic or political interests; and the legisla-

[TRADUCTION] Le crime est l'acte que la loi interdit et auquel elle attache une peine; les interdictions portant sur quelque chose, l'on peut toujours trouver à leur base une situation contre laquelle le législateur veut, dans l'intérêt public, lutter. La situation que le législateur a voulu faire cesser ou les intérêts qu'il a voulu sauvegar-

1997 CanLII 318 (SCC)

ture has had in mind to suppress the evil or to safeguard the interest threatened.

der peuvent être autant du domaine social que du domaine économique ou politique; et la législature avait à l'esprit de supprimer le mal ou de sauvegarder les intérêts menacés.

I simply add that the analysis in *Scowby* and the *Margarine Reference* was most recently applied by this Court in *RJR-MacDonald*, *supra*, at pp. 240-41.

J'ajoute simplement que l'analyse effectuée dans *Scowby* et le *Renvoi sur la margarine* a été appliquée tout récemment par notre Cour dans l'arrêt *RJR-MacDonald*, précité, aux pp. 240 et 241.

122 In the *Margarine Reference*, *supra*, at p. 50, Rand J. helpfully set forth the more usual purposes of a criminal prohibition in the following passage:

Dans le *Renvoi sur la margarine*, précité, à la p. 50, le juge Rand expose de façon utile les objectifs les plus courants d'une interdiction criminelle, dans le passage suivant:

> Is the prohibition . . . enacted with a view to a public purpose which can support it as being in relation to criminal law? Public peace, order, security, health, morality: these are the ordinary though not exclusive ends served by that law. . . . [Emphasis added.]

> [TRADUCTION] La prohibition est-elle [. . .] adoptée en vue d'un objectif public qui peut la faire considérer comme relative au droit criminel? La paix publique, l'ordre, la sécurité, la santé, la moralité: ce sont là des buts habituels, bien que non exclusifs, que poursuit ce droit . . . [Je souligne.]

See also *Morgentaler*, *supra*, at p. 489; *RJR-MacDonald*, at p. 241. As the final clause in the passage just cited indicates, the listed purposes by no means exhaust the purposes that may legitimately support valid criminal legislation. Not only is this clear from this passage, but subsequent to the *Margarine Reference*, it is obvious from Rand J.'s remarks in *Lord's Day Alliance of Canada v. Attorney General of British Columbia*, [1959] S.C.R. 497, at pp. 508-9, that he was in no way departing from Lord Atkin's statement in the *PATA* case, *supra* (he cited the relevant passage with approval). His concern in the *Margarine Reference*, as he indicates in the *Lord's Day* case (at p. 509), was that "in a federal system distinctions must be made arising from the true object, purpose, nature or character of each particular enactment". In short, in a case like the present, all one is concerned with is colourability. Otherwise, one would, in effect, be reviving the discarded notion that there is a "domain" of criminal law, something Rand J., like Lord Atkin before him, was not prepared to do. All of this is, of course, consistent with the view, most recently reiterated in *RJR-MacDonald*, at pp. 259-61, that criminal law is not frozen in time.

Voir aussi *Morgentaler*, précité, à la p. 489; *RJR-MacDonald*, à la p. 241. Comme l'indique la dernière phrase du passage que je viens de citer, il ne s'agit nullement d'une liste exhaustive des objectifs sur lesquels une loi criminelle valide peut se fonder légitimement. Non seulement cela ressort-il clairement de ce passage, mais, à la suite du *Renvoi sur la margarine*, il appert des remarques du juge Rand dans l'arrêt *Lord's Day Alliance of Canada c. Attorney General of British Columbia*, [1959] R.C.S. 497, aux pp. 508 et 509, qu'il ne s'écartait nullement de l'énoncé de lord Atkin dans l'arrêt *PATA*, précité (il a cité le passage pertinent en l'approuvant). Ce qui l'intéressait dans le *Renvoi sur la margarine*, comme il l'indique dans l'arrêt *Lord's Day* (à la p. 509), c'était que [TRADUCTION] «dans un régime fédéral, il convient de faire des distinctions selon l'objet, le but, la nature ou le caractère de chaque texte législatif». Bref, dans un cas comme en l'espèce, tout ce qui nous intéresse, c'est la question de la législation déguisée. Sinon, on ferait, en réalité, revivre l'idée abandonnée qu'il existe un «domaine» de droit criminel, quelque chose que le juge Rand, à l'instar de lord Atkin avant lui, n'était pas disposé à faire. Il va sans dire que tout cela est compatible avec le point de vue réitéré tout récemment dans l'arrêt *RJR-MacDonald*, aux pp. 259 à 261, que le droit criminel n'est pas figé dans le temps.

1997 CanLII 318 (SCC)

During the argument in the present case, however, one sensed, at times, a tendency, even by the appellant and the supporting interveners, to seek justification solely for the purpose of the protection of health specifically identified by Rand J. Now I have no doubt that that purpose obviously will support a considerable measure of environmental legislation, as perhaps also the ground of security. But I entertain no doubt that the protection of a clean environment is a public purpose within Rand J.'s formulation in the *Margarine Reference*, cited *supra*, sufficient to support a criminal prohibition. It is surely an "interest threatened" which Parliament can legitimately "safeguard", or to put it another way, pollution is an "evil" that Parliament can legitimately seek to suppress. Indeed, as I indicated at the outset of these reasons, it is a public purpose of superordinate importance; it constitutes one of the major challenges of our time. It would be surprising indeed if Parliament could not exercise its plenary power over criminal law to protect this interest and to suppress the evils associated with it by appropriate penal prohibitions.

This approach is entirely consistent with the recent pronouncement of this Court in *Ontario v. Canadian Pacific Ltd.*, [1995] 2 S.C.R. 1031, where Gonthier J., speaking for the majority, had this to say, at para. 55:

> It is clear that over the past two decades, citizens have become acutely aware of the importance of environmental protection, and of the fact that penal consequences may flow from conduct which harms the environment. . . . Everyone is aware that individually and collectively, we are responsible for preserving the natural environment. I would agree with the Law Reform Commission of Canada, *Crimes Against the Environment*, *supra*, which concluded at p. 8 that:
>
> > . . . a fundamental and widely shared value is indeed seriously contravened by some environmental pollution, a value which we will refer to as the *right to a safe environment*.
> >
> > To some extent, this right and value appears to be new and emerging, but in part because it is an exten-

123 Toutefois, durant les plaidoiries en l'espèce, on a parfois senti une tendance, même chez l'appelant et les intervenants qui l'appuyaient, à chercher seulement à justifier de l'objectif de protection de la santé décrit expressément par le juge Rand. Maintenant je n'ai aucun doute que cet objectif servira manifestement de fondement à un grand nombre de mesures législatives relatives à l'environnement, comme peut-être également le motif de sécurité. Mais je ne doute nullement que la protection d'un environnement propre est un objectif public, au sens de ce qu'a exprimé le juge Rand dans le *Renvoi sur la margarine*, précité, qui est suffisant pour justifier une interdiction criminelle. C'est sûrement un [TRADUCTION] «intérêt menacé» que le Parlement peut légitimement «sauvegarder» ou, en d'autres mots, la pollution est un «mal» que le Parlement peut légitimement chercher à supprimer. En fait, comme je l'ai indiqué au début des présents motifs, c'est un objectif public d'une importance supérieure; il constitue l'un des principaux défis de notre époque. Il serait, en effet, surprenant que le Parlement ne puisse pas exercer son plein pouvoir en matière de droit criminel pour protéger cet intérêt et supprimer les maux qui lui sont associés au moyen d'interdictions pénales appropriées.

124 Ce point de vue est en totale harmonie avec l'arrêt récent de notre Cour *Ontario c. Canadien Pacifique Ltée*, [1995] 2 R.C.S. 1031, où le juge Gonthier affirme au nom des juges majoritaires, au par. 55:

> Il est clair qu'au cours des deux dernières décennies, les citoyens se sont fortement sensibilisés à l'importance d'assurer la protection de l'environnement et au fait que des conséquences pénales peuvent découler d'une conduite qui nuit à l'environnement. [. . .] Nous savons tous que, individuellement et collectivement, nous sommes responsables de la préservation de l'environnement naturel. J'abonde dans le sens de la Commission de réforme du droit du Canada qui, dans son document *Les crimes contre l'environnement*, *op. cit.*, a conclu, à la p. 10:
>
> > . . . certains faits de pollution représentent effectivement la violation d'une valeur fondamentale et largement reconnue, valeur que nous appellerons le *droit à un environnement sûr*.
> >
> > Cette valeur paraît relativement nouvelle, encore que dans la mesure où elle s'inscrit dans le prolonge-

1997 CanLII 318 (SCC)

sion of existing and very traditional rights and values already protected by criminal law, its presence and shape even now are largely discernible. Among the new strands of this fundamental value are, it may be argued, those such as *quality of life*, and *stewardship* of the natural environment. At the same time, traditional values as well have simply expanded and evolved to include the environment now as an area and interest of direct and primary concern. Among these values fundamental to the purposes and protections of criminal law are the *sanctity of life*, the *inviolability and integrity of persons*, and the *protection of human life and health*. It is increasingly understood that certain forms and degrees of environmental pollution can directly or indirectly, sooner or later, seriously harm or endanger human life and human health.

ment d'un ensemble traditionnel et bien établi de droits et de valeurs déjà protégés par le droit pénal, son existence et ses modalités soient facilement perceptibles. Parmi les nouvelles composantes de cette valeur fondamentale, on peut sans doute compter la *qualité de la vie* et la *responsabilité* de l'être humain envers l'environnement naturel. D'autre part, les valeurs plus traditionnelles ont simplement évolué et pris une certaine ampleur pour embrasser l'environnement à titre de sujet d'intérêt et de préoccupation en soi. Font partie des valeurs fondamentales qui sous-tendent les objets et les mécanismes de protection du droit pénal, *le caractère sacré de la vie*, *l'inviolabilité et l'intégrité de la personne* et la *protection de la vie et de la santé humaines*. L'on s'entend de plus en plus pour dire que la pollution de l'environnement, sous certaines formes et à certains degrés, peut, directement ou indirectement, à court ou à long terme, être gravement dommageable ou dangereuse pour la vie et la santé humaines.

Not only has environmental protection emerged as a fundamental value in Canadian society, but this has also been recognized in legislative provisions such as s. 13(1)(*a*) EPA. [Italics in original; underlining added.]

Non seulement la protection de l'environnement est-elle devenue une valeur fondamentale au sein de la société canadienne, mais ce fait est maintenant reconnu dans des dispositions législatives telles que l'al. 13(1)*a*) LPE. [En italique dans l'original; je souligne.]

125 It is worthy of note that following Working Paper 44 (1985), from which Gonthier J. cites, the Law Reform Commission of Canada in a subsequent report to Parliament (*Recodifying Criminal Law*, Report 31 (1987)), noted its view of the desirability of using the criminal law to underline the value of respect for the environment itself. It stated, at p. 93:

Il est à noter que, à la suite du document de travail 44 (1985), dont le juge Gonthier cite un passage, la Commission de réforme du droit du Canada a, dans un rapport ultérieur au Parlement (*Pour une nouvelle codification du droit pénal*, rapport 31 (1987)), fait part de son opinion qu'il était souhaitable de mettre en relief par le droit criminel l'importance du respect de l'environnement lui-même. Elle affirme, aux pp. 105 et 106:

. . . in Working Paper 44 we proposed a new and distinct crime against the environment on the ground that certain behaviour so threatens fundamental values as to warrant criminal sanctions. That crime was to consist of conduct damaging the environment and thereby seriously harming or endangering human life or health.

Dans le document de travail nº 44 [. . .], nous proposions [. . .] l'instauration d'un nouveau crime portant spécifiquement sur les atteintes à l'environnement parce que certains actes menacent à ce point les valeurs fondamentales qu'ils justifient le recours au droit pénal. Plus précisément, le crime était défini comme une conduite dommageable pour l'environnement et, de ce fait, gravement dommageable ou dangereuse pour la vie ou la santé humaines.

Since then, however, we revised our opinion. First, we concluded that since environmental damage harming or endangering life and safety is covered by crimes of negligence against the person and by the newly proposed crime of endangering (clause 10(1)), there was no need for an environmental crime like that proposed.

Nous avons toutefois changé d'avis depuis. En premier lieu, nous en sommes venus à la conclusion qu'il était inutile de créer une infraction contre l'environnement telle que nous l'avions proposée parce que le dommage écologique gravement dommageable ou dangereux pour la vie et la sécurité est réprimé par les crimes

1997 CanLII 318 (SCC)

Second, our consultations on Working Paper 44 together with a series of environmental disasters since its publication convinced the majority of the Commissioners of the need to use criminal law to underline the value of respect for the environment itself and stigmatize behaviour causing disastrous damage with long-term loss of natural resources. [Emphasis added.]

de négligence contre la personne et par le nouveau crime de mise en danger (paragraphe 10(1)). En second lieu, les consultations tenues au sujet du document de travail nº 44 et la série de catastrophes écologiques qui ont eu lieu dans les années qui ont suivi la publication du document ont convaincu la majorité des commissaires de la nécessité de mettre en relief par le droit pénal l'importance du respect de l'environnement lui-même et de stigmatiser les conduites qui provoquent des dommages écologiques d'ampleur catastrophique amenant à long terme une perte des ressources naturelles. [Je souligne.]

1997 CanLII 318 (SCC)

This is, of course, in line with the thinking of various international organisms. The World Commission on Environment and Development (the Brundtland Commission) in its report *Our Common Future* (1987) (see at pp. 219-20, and pp. 224-25) long ago recommended the adoption of appropriate legislation to protect the environment against toxic and chemical substances, including the creation of national standards that could be supplemented by local legislation. At p. 211, it stated:

126 Naturellement, cela est conforme à la pensée de divers organismes internationaux. Dans son rapport intitulé *Notre avenir à tous* (1988) (voir aux pp. 261 et 262 et aux pp. 267 et 268), la Commission mondiale sur l'environnement et le développement (la commission Brundtland) a recommandé, depuis longtemps, l'adoption de lois appropriées pour protéger l'environnement contre les substances toxiques et chimiques, y compris l'établissement de normes nationales qui pourraient être complétées par des mesures législatives locales. Aux pages 251 et 252, elle affirme:

It is becoming increasingly clear that the sources and causes of pollution are far more diffuse, complex, and interrelated — and the effects of pollution more widespread, cumulative, and chronic — than hitherto believed. Pollution problems that were once local are now regional or even global in scale. Contamination of soils, ground-water, and people by agrochemicals is widening and chemical pollution has spread to every corner of the planet. The incidence of major accidents involving toxic chemicals has grown. Discoveries of hazardous waste disposal sites — at Love Canal in the United States, for example, and at Lekkerkek in the Netherlands, Vac in Hungary, and Georgswerder in the Federal Republic of Germany — have drawn attention to another serious problem.

Il devient de plus en plus évident que les sources et causes de pollution sont beaucoup plus diffuses, complexes et reliées — et les effets de la pollution plus répandus, plus cumulatifs et plus chroniques — qu'on ne le croyait précédemment. Les problèmes de pollution qui avaient naguère un caractère local se posent maintenant à l'échelle régionale, voire même mondiale. La contamination des sols, des eaux souterraines et des êtres humains par des produits agrochimiques, s'élargit et la pollution chimique s'est étendue aux quatre coins de la planète. Les incidences de grands accidents impliquant des produits chimiques toxiques se sont aggravées. Les découvertes de décharges de déchets dangereux — à Love Canal aux États-Unis, par exemple, ainsi qu'à Lekkerkek aux Pays-Bas, à Vac en Hongrie et à Georgswerder en République fédérale d'Allemagne — a appelé l'attention sur un autre grave problème.

In the light of this and the growth trends projected through the next century, it is evident that measures to reduce, control, and prevent industrial pollution will need to be greatly strengthened. If they are not, pollution damage to human health could become intolerable

Compte tenu de ce qui précède et des projections estimées de la croissance pour le siècle prochain, il est manifeste qu'il faudra renforcer considérablement les mesures visant à réduire, à maîtriser et à prévenir la pollution industrielle. Autrement les dommages causés à la

in certain cities and threats to property and ecosystems will continue to grow.

Later, at pp. 219-20, it added:

In dealing with industrial pollution and resource degradation, it is essential that industry, government, and the public have clear benchmarks. Where the workforce and financial resources permit, national governments should establish clear environmental goals and enforce environmental laws, regulations, incentives, and standards on industrial enterprises. In formulating such policies, they should give priority to public health problems associated with industrial pollution and hazardous wastes. And they must improve their environmental statistics and data base relating to industrial activities.

The regulations and standards should govern such matters as air and water pollution, waste management, occupational health and safety of workers, energy and resource efficiency of products or processes, and the manufacture, marketing, use, transport, and disposal of toxic substances. This should normally be done at the national level, with local governments being empowered to exceed, but not to lower, national norms. [Emphasis added.]

See also United Nations Environment Programme, *Global Environmental Issues* (1982), at pp. 55-60.

127 What the foregoing underlines is what I referred to at the outset, that the protection of the environment is a major challenge of our time. It is an international problem, one that requires action by governments at all levels. And, as is stated in the preamble to the Act under review, "Canada must be able to fulfil its international obligations in respect of the environment". I am confident that Canada can fulfil its international obligations, in so far as the toxic substances sought to be prohibited from entering into the environment under the Act are concerned, by use of the criminal law power. The purpose of the criminal law is to underline and protect our fundamental values. While many environmental issues could be criminally sanctioned in

santé par la pollution pourraient devenir intolérables dans certaines villes et les menaces aux biens et aux écosystèmes continueraient de s'amplifier.

Plus loin, aux pp. 261 et 262, elle ajoute:

Pour faire face à la pollution industrielle et à la dégradation des ressources, il est essentiel que l'industrie, les gouvernements et l'opinion publique disposent de critères bien définis. Lorsque les ressources humaines et financières le permettent, les gouvernements nationaux devraient définir clairement les objectifs en matière d'environnement et obliger les entreprises industrielles à mettre en application les lois, les règlements, les mesures incitatives et les normes dans ce domaine. En élaborant ces politiques, ils devraient donner la priorité aux problèmes d'ordre sanitaire liés à la pollution industrielle et aux déchets dangereux. Et ils devraient améliorer, du point de vue de l'environnement, leurs statistiques et leurs fonds de données se rapportant à des activités industrielles.

Les règlements et les normes devraient régir des aspects tels que la pollution de l'air et de l'eau, la gestion des déchets, l'hygiène industrielle et la sécurité des travailleurs, l'efficacité des produits ou des processus du point de vue de la consommation d'énergie et de ressources, ainsi que la fabrication, la commercialisation, l'utilisation, le transport et l'élimination des substances toxiques. Cela devrait normalement se faire à l'échelon national, les autorités locales étant habilitées à renforcer, mais non pas à libéraliser, les normes nationales. [Je souligne.]

Voir également le Programme des Nations Unies sur l'environnement, intitulé *Global Environmental Issues* (1982), aux pp. 55 à 60.

Les passages précédents viennent souligner ce que j'ai mentionné au début, c'est-à-dire que la protection de l'environnement est un défi majeur de notre époque. C'est un problème international qui exige une action des gouvernements de tous les niveaux. Et, comme il est déclaré dans le préambule de la Loi visée par le présent examen, «le Canada se doit d'être en mesure de respecter ses obligations internationales en matière d'environnement». Je suis persuadé que le Canada peut, en recourant à la compétence en matière de droit criminel, respecter ses obligations internationales en ce qui concerne les substances toxiques dont la Loi cherche à interdire le rejet dans l'environnement. Le droit criminel a pour objectif de mettre en relief

1997 CanLII 318 (SCC)

terms of protection of human life or health, I cannot accept that the criminal law is limited to that because "certain forms and degrees of environmental pollution can directly or indirectly, sooner or later, seriously harm or endanger human life and human health", as the paper approvingly cited by Gonthier J. in *Ontario v. Canadian Pacific*, *supra*, observes. But the stage at which this may be discovered is not easy to discern, and I agree with that paper that the stewardship of the environment is a fundamental value of our society and that Parliament may use its criminal law power to underline that value. The criminal law must be able to keep pace with and protect our emerging values.

et de protéger nos valeurs fondamentales. Bien que des sanctions pénales puissent être attachées à beaucoup de questions relatives à l'environnement en ce qui concerne la protection de la vie ou de la santé humaine, je ne puis accepter que le droit criminel se limite à cela parce que «la pollution de l'environnement, sous certaines formes et à certains degrés, peut, directement ou indirectement, à court ou à long terme, être gravement dommageable ou dangereuse pour la vie et la santé humaines», comme on le fait remarquer dans le document que le juge Gonthier cite et approuve dans l'arrêt *Ontario c. Canadien Pacifique*, précité. Mais le stade auquel cela peut être découvert n'est pas facile à identifier, et je suis d'accord avec le document pour dire que la responsabilité de l'être humain envers l'environnement est une valeur fondamentale de notre société, et que le Parlement peut recourir à sa compétence en matière de droit criminel pour mettre cette valeur en relief. Le droit criminel doit pouvoir s'adapter à nos nouvelles valeurs et les protéger.

In saying that Parliament may use its criminal law power in the interest of protecting the environment or preventing pollution, there again appears to have been confusion during the argument between the approach to the national concern doctrine and the criminal law power. The national concern doctrine operates by assigning full power to regulate an area to Parliament. Criminal law does not work that way. Rather it seeks by discrete prohibitions to prevent evils falling within a broad purpose, such as, for example, the protection of health. In the criminal law area, reference to such broad policy objectives is simply a means of ensuring that the prohibition is legitimately aimed at some public evil Parliament wishes to suppress and so is not a colourable attempt to deal with a matter falling exclusively within an area of provincial legislative jurisdiction.

128 Lorsqu'on a dit que le Parlement peut recourir à sa compétence en matière de droit criminel dans le but de protéger l'environnement ou de prévenir la pollution, il semble de nouveau y avoir eu de la confusion, durant les plaidoiries, entre la façon d'aborder la théorie de l'intérêt national et la compétence en matière de droit criminel. La théorie de l'intérêt national a pour effet d'attribuer au Parlement le plein pouvoir de réglementer un domaine. Le droit criminel ne fonctionne pas ainsi. Il cherche plutôt, au moyen d'interdictions distinctes, à prévenir des maux relevant d'un objectif général, comme, par exemple, la protection de la santé. Dans le domaine du droit criminel, le renvoi à des objectifs de principe généraux n'est qu'un moyen d'assurer que l'interdiction vise légitimement un certain mal public que le Parlement veut supprimer et ne constitue pas une tentative déguisée de traiter une matière relevant exclusivement d'un domaine de compétence législative provinciale.

The legitimate use of the criminal law I have just described in no way constitutes an encroachment on provincial legislative power, though it may affect matters falling within the latter's ambit.

129 Le recours légitime au droit criminel, que je viens de décrire, ne constitue nullement un empiétement sur la compétence législative provinciale, bien qu'il puisse toucher à des matières qui en

1997 CanLII 318 (SCC)

This is made clear from the following passage from *Standard Sausage Co. v. Lee*, [1933] 4 D.L.R. 501 (B.C.C.A.), at pp. 506-7, cited with approval in *RJR-MacDonald*, *supra*, pp. 254-55:

> . . . if the Federal Parliament, to protect the public health against actual or threatened danger, places restrictions on, and limits the number of preservatives that may be used, it may do so under s. 91(27) of the B.N.A. Act. This is not in essence an interference with property and civil rights. That may follow as an incident but the real purpose (not colourable and not merely to aid what in substance is an encroachment) is to prevent actual, or threatened injury or the likelihood of injury of the most serious kind to all inhabitants of the Dominion.
>
> . . .
>
> The primary object of this legislation is the public safety — protecting it from threatened injury. If that is its main purpose — and not a mere pretence for the invasion of civil rights — it is none the less valid. . . .

I shall have more to say about this later.

130 I conclude that Parliament may validly enact prohibitions under its criminal law power against specific acts for the purpose of preventing pollution or, to put it in other terms, causing the entry into the environment of certain toxic substances. I quite understand that a particular prohibition could be so broad or all-encompassing as to be found to be, in pith and substance, really aimed at regulating an area falling within the provincial domain and not exclusively at protecting the environment. A sweeping prohibition like this (and this would be equally true of one aimed generally at the protection of health) would, in any case, probably be unworkable. But the attack here ultimately is that the impugned provisions grant such a broad discretion to the Governor in Council as to permit orders that go beyond federal power. I can imagine very nice issues being raised concerning this matter under certain types of legislation, though in such a case one would tend to interpret the legislation narrowly if only to keep it within constitutional bounds. But one need not go so far here. For, it

relèvent. Cela ressort clairement du passage suivant de l'arrêt *Standard Sausage Co. c. Lee*, [1933] 4 D.L.R. 501 (C.A.C.-B.), aux pp. 506 et 507, cité et approuvé dans *RJR-MacDonald*, précité, aux pp. 254 et 255:

> [TRADUCTION] . . . si le Parlement fédéral, pour protéger la santé publique contre un danger réel ou appréhendé, apporte des restrictions aux agents de conservation qui peuvent être utilisés et en limite le nombre, il peut le faire en vertu du par. 91(27) de l'A.A.N.B. Ce n'est pas par essence une intrusion dans la propriété et les droits civils. Cela peut en découler accessoirement mais le vrai but (qui n'est pas déguisé, ni seulement un appui à ce qui est en substance un empiétement) est de prévenir un dommage réel ou appréhendé ou la probabilité d'un dommage de la plus grande gravité pour tous les habitants du Dominion.
>
> . . .
>
> L'objet premier de cette loi est la sécurité du public, en protégeant celui-ci contre un dommage appréhendé. Si c'est là son but principal — et non un simple prétexte pour s'ingérer dans le domaine des droits civils — sa validité n'est pas amoindrie . . .

J'aurai quelque chose à ajouter à ce sujet plus loin.

Je conclus que le Parlement peut, en vertu de sa compétence en matière de droit criminel, édicter validement des interdictions relatives à des actes précis en vue de prévenir la pollution ou, autrement dit, le rejet de certaines substances toxiques dans l'environnement. Je comprends très bien qu'une interdiction particulière pourrait être générale ou globale au point d'être considérée, de par son caractère véritable, comme visant réellement à réglementer un domaine relevant des provinces et non pas exclusivement à protéger l'environnement. Une interdiction absolue comme celle-là (et ce serait également le cas de toute interdiction visant généralement à protéger la santé) serait de toute façon probablement impossible à appliquer. Mais, en l'espèce, on s'attaque en fin de compte au fait que les dispositions contestées accordent au gouverneur en conseil un pouvoir discrétionnaire si vaste qu'il permet de rendre des ordonnances qui excèdent la compétence fédérale. J'imagine que certains types de mesures législatives peuvent soulever de très belles questions à ce sujet, même si,

1997 CanLII 318 (SCC)

seems to me, as we shall see, when one carefully peruses the legislation, it becomes clear enough that Parliament has stayed well within its power.

dans un tel cas, on avait tendance à interpréter strictement le texte législatif en cause ne serait-ce que pour le garder dans les limites fixées par la Constitution. Mais il n'est pas nécessaire d'aller aussi loin en l'espèce, car, me semble-t-il, comme nous le verrons, lorsqu'on lit attentivement la Loi, il devient assez évident que le Parlement a bel et bien agi conformément à sa compétence.

Though I shall deal with this issue in more detail once I come to consider the legislation, it is well at this point to recall that the use of the federal criminal law power in no way precludes the provinces from exercising their extensive powers under s. 92 to regulate and control the pollution of the environment either independently or to supplement federal action. The situation is really no different from the situation regarding the protection of health where Parliament has for long exercised extensive control over such matters as food and drugs by prohibitions grounded in the criminal law power. This has not prevented the provinces from extensively regulating and prohibiting many activities relating to health. The two levels of government frequently work together to meet common concerns. The cooperative measures relating to the use of tobacco are fully related in *RJR-MacDonald*, *supra*. Nor, though it arises under a different technical basis, is the situation, in substance, different as regards federal prohibitions against polluting water for the purposes of protecting the fisheries. Here again there is a wide measure of cooperation between the federal and provincial authorities to effect common or complementary ends. It is also the case in many other areas. The fear that the legislation impugned here would distort the federal-provincial balance seems to me to be overstated.

131 Même si je traiterai cette question plus en détail une fois que j'en serai venu à examiner la Loi, il convient à ce moment-ci de se rappeler que le recours à la compétence fédérale en matière de droit criminel n'empêche nullement les provinces d'exercer les vastes pouvoirs que leur confère l'art. 92 pour réglementer et limiter la pollution de l'environnement de façon indépendante ou pour compléter les mesures fédérales. La situation ne diffère vraiment pas de celle qui a trait à la protection de la santé, dans laquelle le Parlement exerce depuis longtemps un vaste contrôle sur des matières comme les aliments et drogues au moyen d'interdictions fondées sur la compétence en matière de droit criminel. Cela n'a pas empêché les provinces de réglementer et d'interdire largement beaucoup d'activités relatives à la santé. Les deux niveaux de gouvernement travaillent souvent ensemble pour satisfaire des intérêts communs. Les mesures de coopération concernant l'usage du tabac sont relatées intégralement dans *RJR-MacDonald*, précité. Bien qu'elle ait un fondement technique différent, la situation n'est pas non plus différente, pour l'essentiel, dans le cas des interdictions fédérales de pollution de l'eau qui visent à protéger les pêches. Ici encore, il y a une vaste mesure de coopération entre les autorités fédérales et provinciales pour réaliser des fins communes ou complémentaires. C'est également le cas dans de nombreux autres domaines. La crainte que la loi contestée en l'espèce perturbe l'équilibre fédéral-provincial me semble exagérée.

One last matter requires comment. The specific provision impugned in this case, the Interim Order, would seem to me to be justified as a criminal prohibition for the protection of human life and health alone (a purpose upheld most recently in *RJR-MacDonald*). That would also at first sight appear

132 Un dernier point nécessite des remarques. La mesure même qui est contestée en l'espèce, l'arrêté d'urgence, me semblerait justifiée en tant qu'interdiction criminelle visant à protéger la vie et la santé humaines seulement (un objectif dont la validité a été confirmée tout récemment dans *RJR-*

1997 CanLII 318 (SCC)

to be true of many of the prohibited uses of the substances in the List of Toxic Substances in Schedule I. So if the protection of the environment does not amount to a valid public purpose to justify criminal sanctions, it would be simply a question of severing those portions of s. 11 of the Act that deal solely with the environment to ensure the validity of the Interim Order and the rest of the enabling provisions. After all, the protection of the environment, as we earlier saw, is closely integrated, directly or indirectly, with the protection of health. But for my part, I find this exercise wholly unnecessary. The protection of the environment, through prohibitions against toxic substances, seems to me to constitute a wholly legitimate public objective in the exercise of the criminal law power. Humanity's interest in the environment surely extends beyond its own life and health.

MacDonald). De prime abord, cela paraîtrait également être le cas d'un bon nombre des usages interdits des substances inscrites sur la liste des substances toxiques de l'annexe I. Donc, si la protection de l'environnement n'équivaut pas à un objectif public valide pour justifier des sanctions criminelles, il s'agirait simplement de dissocier du reste des dispositions habilitantes les parties de l'art. 11 de la Loi qui traitent seulement de l'environnement, afin de garantir la validité de l'arrêté d'urgence. Après tout, la protection de l'environnement, comme nous l'avons déjà vu, est étroitement assimilée, directement ou indirectement, à la protection de la santé. Mais, quant à moi, je juge cet exercice tout à fait inutile. La protection de l'environnement, au moyen d'interdictions concernant les substances toxiques, me semble constituer un objectif public tout à fait légitime dans l'exercice de la compétence en matière de droit criminel. L'intérêt qu'ont les êtres humains dans l'environnement va sûrement au-delà de leurs propres vie et santé.

The Provisions Respecting Toxic Substances

Les dispositions concernant les substances toxiques

133 The respondent, the *mis en cause* and their supporting interveners primarily attack ss. 34 and 35 of the Act as constituting an infringement on provincial regulatory powers conferred by the Constitution. This they do by submitting that the power to regulate a substance is so broad as to encroach upon provincial legislative jurisdiction. That is because of what they call the broad "definition" given to toxic substances under s. 11, and particularly para. (*a*), thereof which, it will be remembered, provides that:

L'intimée, le mis en cause et les intervenants qui les appuient contestent principalement les art. 34 et 35 de la Loi, en faisant valoir qu'ils constituent un empiétement sur les pouvoirs de réglementation conférés aux provinces par la Constitution. Ce faisant, ils soutiennent que le pouvoir de réglementer une substance est vaste au point d'empiéter sur la compétence législative des provinces. Il en est ainsi en raison de ce qu'ils appellent la «définition» large que l'on donne des substances toxiques à l'art. 11 et tout particulièrement à son al. *a*), qui, rappelons-le, prévoit que:

11. For the purposes of this Part, a substance is toxic if it is entering or may enter the environment in a quantity or concentration or under conditions

(*a*) having or that may have an immediate or long-term harmful effect on the environment;

11. Pour l'application de la présente partie, est toxique toute substance qui pénètre ou peut pénétrer dans l'environnement en une quantité ou une concentration ou dans des conditions de nature à:

a) avoir, immédiatement ou à long terme, un effet nocif sur l'environnement;

This, along with the expansive definitions of "substance" and "environment" in s. 3(1), makes it possible, they say, in effect to regulate any substance

Cette définition, conjuguée aux définitions larges des termes «substance» et «environnement» au par. 3(1), permet en fait, disent-ils, de réglementer

1997 CanLII 318 (SCC)

that can in any way prove harmful to the environment.

I cannot agree with this submission. As I see it, the argument focusses too narrowly on a specific provision of the Act and for that matter only on certain aspects of it, and then applies that provision in a manner that I do not think is warranted by a consideration of the provisions of the Act as a whole and in light of its background and purpose. I shall deal with the latter first. Before doing so, however, I shall comment briefly on the concern expressed about the breadth of the phraseology of the Act. As Gonthier J. observed in *Ontario v. Canadian Pacific*, *supra*, this broad wording is unavoidable in environmental protection legislation because of the breadth and complexity of the subject and has to be kept in mind in interpreting the relevant legislation. At para. 43, he stated:

> What is clear from this brief review of Canadian pollution prohibitions is that our legislators have preferred to take a broad and general approach, and have avoided an exhaustive codification of every circumstance in which pollution is prohibited. Such an approach is hardly surprising in the field of environmental protection, given that the nature of the environment (its complexity, and the wide range of activities which might cause harm to it) is not conducive to precise codification. Environmental protection legislation has, as a result, been framed in a manner capable of responding to a wide variety of environmentally harmful scenarios, including ones which might not have been foreseen by the drafters of the legislation.

In light of this, he went on to hold that environmental protection legislation should not be approached with the same rigour as statutes dealing with less complex issues in applying the doctrine of vagueness developed under s. 7 of the *Charter*. The effect of requiring greater precision would be to frustrate the legislature in its attempt to protect the public against the dangers flowing from pollution. He thus summarized his view, at para. 58:

> In the environmental context, each one of us is vulnerable to the health and property damage caused by pollution. Where the legislature provides protection

toute substance qui peut de quelque façon s'avérer nocive pour l'environnement.

Je ne suis pas d'accord avec cet argument. À mon sens, il porte trop strictement sur une disposition précise de la Loi et, à ce sujet, uniquement sur certains de ses aspects, et applique ensuite cette disposition d'une manière qui, selon moi, n'est pas justifiée selon un examen des dispositions de la Loi dans son ensemble et compte tenu de l'historique et de l'objet de cette loi. Je vais d'abord traiter le dernier point. Avant de ce faire, cependant, je commenterai brièvement la crainte exprimée au sujet du caractère général du libellé de la Loi. Comme le juge Gonthier l'a fait observer dans l'arrêt *Ontario c. Canadien Pacifique*, précité, cette formulation large est inévitable dans une loi sur la protection de l'environnement en raison de l'ampleur et de la complexité du sujet, et il faut en tenir compte en interprétant les dispositions législatives pertinentes. Voici qu'il disait, au par. 43: 134

> Il ressort clairement de cette brève revue des interdictions relatives à la pollution au Canada que nos législateurs ont préféré adopter une démarche générale, évitant ainsi une codification exhaustive de chaque situation entraînant l'interdiction de polluer. Une telle démarche dans le domaine de la protection de l'environnement ne surprend pas, étant donné que la nature de l'environnement (sa complexité et la vaste gamme des activités qui peuvent en causer la dégradation) ne se prête pas à une codification précise. Les lois sur la protection de l'environnement ont donc été rédigées d'une façon qui permette de répondre à une vaste gamme d'atteintes environnementales, y compris celles qui n'ont peut-être même pas été envisagées par leurs rédacteurs.

Compte tenu de cela, il a conclu qu'il n'y a pas lieu d'aborder les lois sur la protection de l'environnement avec la même rigueur que celles qui traitent de questions moins complexes, en appliquant la théorie de l'imprécision établie en vertu de l'art. 7 de la *Charte*. Exiger une plus grande précision aurait pour effet de faire échouer la législature dans sa tentative de protéger le public contre les dangers découlant de la pollution. Il résume ainsi son point de vue, au par. 58:

> Dans le contexte environnemental, chacun d'entre nous est menacé par la dégradation de la santé et des biens que cause la pollution. Lorsque le législateur pré-

1997 CanLII 318 (SCC)

through regulatory statutes such as the EPA, it is appropriate for courts to take a more deferential approach to the *Charter* review of the offences contained in such statutes.

On this basis, Gonthier J. then turned to an examination of terms similar to those in the Act under review. He was there dealing with a provincial regulatory statute, but the same underlying need to protect the vulnerable and the public generally is inherent in criminal offences of the type in question here. This was recognized by Cory J. in *Wholesale Travel Group Inc.*, *supra*. That case concerned offences under the *Competition Act* (formerly the *Combines Investigation Act*), long held to be constitutionally supportable under Parliament's criminal law power. Cory J. carefully distinguished between the type of offences there in question, which he described as regulatory offences, and "true crimes" such as murder. In a passage, at p. 233, relied upon by Gonthier J. (at para. 57), he had this to say:

The realities and complexities of a modern industrial society coupled with the very real need to protect all of society and particularly its vulnerable members, emphasize the critical importance of regulatory offences in Canada today. Our country simply could not function without extensive regulatory legislation. The protection provided by such measures constitutes a second justification for the differential treatment, for *Charter* purposes, of regulatory and criminal offences.

135 I turn then to the background and purpose of the provisions under review. Part II does not deal with the protection of the environment generally. It deals simply with the control of toxic substances that may be released into the environment under certain restricted circumstances, and does so through a series of prohibitions to which penal sanctions are attached. It replaces the *Environmental Contaminants Act*, first enacted in 1975 (S.C. 1974-75-76, c. 72), which was intended to control substances entering or capable of entering into the environment in a quantity or concentration suffi-

voit des mesures de protection au moyen de lois de nature réglementaire comme la LPE, il convient que les tribunaux fassent preuve d'une plus grande retenue quand ils examinent les infractions prévues dans ces lois au regard de la *Charte*.

À partir de là, le juge Gonthier est passé à l'examen de termes semblables à ceux utilisés dans la loi en cause dans la présente affaire. Il était alors saisi d'une loi provinciale de nature réglementaire, mais la même nécessité sous-jacente de protéger les personnes vulnérables et le public en général est inhérente aux infractions criminelles du genre en question ici. Le juge Cory a reconnu cela dans l'arrêt *Wholesale Travel Group Inc.*, précité. Cette affaire concernait des infractions à la *Loi sur la concurrence* (auparavant *Loi relative aux enquêtes sur les coalitions*) jugée depuis longtemps constitutionnellement justifiable en vertu de la compétence du Parlement en matière de droit criminel. Le juge Cory a soigneusement établi une distinction entre le genre d'infractions dont il était question dans cette affaire, qu'il a qualifiées d'infractions réglementaires, et des «crimes proprement dits» comme le meurtre. Dans un passage, à la p. 233, sur lequel s'est fondé le juge Gonthier (au par. 57), il affirme ceci:

Les réalités et les complexités d'une société industrielle moderne associées au besoin réel de protéger tous les membres de la société et, en particulier, ceux qui sont vulnérables font ressortir l'importance cruciale des infractions réglementaires au Canada aujourd'hui. Notre pays ne pourrait tout simplement pas fonctionner sans réglementation très étendue. La protection fournie par de telles mesures est une seconde justification du traitement différent des infractions réglementaires et des infractions criminelles aux fins de la *Charte*.

Je passe maintenant à l'historique et à l'objet des dispositions visées par le présent examen. La partie II ne traite pas de la protection de l'environnement en général. Elle traite simplement du contrôle de substances toxiques qui peuvent être rejetées dans l'environnement dans certaines circonstances limitées, et elle le fait au moyen d'une série d'interdictions assorties de sanctions pénales. Elle remplace la *Loi sur les contaminants de l'environnement* adoptée en 1975 (S.C. 1974-75-76, ch. 72), qui visait à contrôler les substances pénétrant ou risquant de pénétrer dans l'environne-

1997 CanLII 318 (SCC)

cient to constitute a danger to health or the environment; see s. 4. The continuity of policy is evident from the fact that the toxic substances controlled under the earlier legislation including PCBs were automatically included as Schedule I of the present legislation, entitled "List of Toxic Substances".

The underlying purpose for the enactment of the present Act, so far as toxic substances are concerned, is evident from a series of reports of studies made in the mid-1980s; see Environment Canada, *From Cradle to Grave: A Management Approach to Chemicals* (1986); Environment Canada and Health and Welfare Canada, *Final Report of the Environmental Contaminants Act Amendments Consultative Committee* (1986). What these reveal is that the earlier Act was clearly deficient in identifying substances that could be toxic and that what was really needed was a regime whereby the government could assess material that could be harmful to health and the environment before the substance was already in use.

This comes out more clearly in a document published by Environment Canada in 1987 which outlines the reasons why a new Act dealing with the environment was necessary; see Environment Canada, *The Right to a Healthy Environment: An Overview of the Proposed Environmental Protection Act.* The publication made clear that existing measures had not been adequate and that because of the negligent use of chemical products, the following had resulted: "Chemical residues are everywhere: in our homes, offices and factories; in cities, on farms, in wilderness areas far removed from the sources of contamination" (p. 1). It continued (at p. 1):

> The fact that most human beings have detectable levels of synthetic chemicals in their bodies is evidence of our collective carelessness in using them. In his *Report Card* on the environment in 1986, Environment Minister Tom McMillan gave Canada an "F" for its ability to handle toxic substances.

ment en une quantité ou concentration suffisante pour mettre en danger la santé ou l'environnement; voir l'art. 4. La continuité de la politique ressort clairement du fait que les substances toxiques contrôlées en vertu de la loi antérieure, qui comprenaient les BPC, ont été incluses automatiquement à l'annexe I de la loi actuelle, intitulée «Liste des substances toxiques».

136 L'objet sous-jacent de la loi actuelle, en ce qui concerne les substances toxiques, ressort clairement d'une série de rapports émanant d'études effectuées au milieu des années 80; voir Environnement Canada, *L'intégral système de gestion des produits chimiques* (1986); Environnement Canada et Santé et Bien-être social Canada, *Rapport final du Comité consultatif sur les modifications à la Loi sur les contaminants de l'environnement* (1986). Ces rapports révèlent que la loi antérieure ne suffisait manifestement pas à identifier les substances susceptibles d'être toxiques et qu'il fallait vraiment établir un régime permettant au gouvernement d'évaluer les matières qui pourraient être nocives pour la santé et l'environnement avant qu'elles soient utilisées.

137 Cela ressort plus clairement d'un document publié par Environnement Canada en 1987, qui expose les raisons pour lesquelles une nouvelle loi sur l'environnement était requise; voir Environnement Canada, *Le droit à un environnement sain: Aperçu du projet de loi sur la protection de l'environnement*. La publication précisait que les mesures existantes n'avaient pas été adéquates et que l'utilisation négligente de produits chimiques avait engendré la situation suivante: «Les résidus de produits chimiques sont partout: dans nos maisons, dans nos bureaux et dans nos usines, dans les villes et sur les fermes, dans les régions sauvages très éloignées des sources de contamination» (p. 1). On ajoutait (à la p. 1):

> Le fait qu'on puisse déceler, chez la plupart des humains, la présence de produits chimiques synthétiques constitue une preuve évidente de l'insouciance avec laquelle nous utilisons ces produits. Dans le *Bulletin d'évaluation* sur l'état de l'environnement en 1986, le ministre de l'Environnement, Tom McMillan, accordait au Canada la note (F) pour la compétence dont nous faisons preuve dans la gestion des substances toxiques.

1997 CanLII 318 (SCC)

138 There was no intention that the Act should bar the use, importation or manufacture of all chemical products, but rather that it should affect only those substances that are dangerous to the environment, and then only if they are not regulated by law. The report recognized that "[a] great deal of our industrial strength and economic progress is based upon the use of chemicals" (p. 2), and that only a fraction of these were "believed to be hazardous but few have been assessed to make sure" (p. 2).

La Loi visait non pas à interdire l'utilisation, l'importation ou la fabrication de tous les produits chimiques, mais plutôt à ne toucher que les substances qui sont dangereuses pour l'environnement, et seulement si elles ne sont pas réglementées par la loi. Le rapport reconnaissait qu'«[u]ne large part de notre puissance industrielle et de notre croissance économique est fondée sur l'utilisation de substances chimiques» (p. 2) et que seulement une fraction d'entre elles étaient «considérées comme dangereuses, mais très peu de celles-ci ont fait l'objet de tests permettant de s'en assurer» (p. 2).

139 The manner of assessment traditionally employed — related as it was to the concern for "pollution that could be seen, touched, smelled or tasted" and "cleaning up a mess after it occurred" (p. 3) — was no longer adequate. As the report put it (at p. 3):

> Toxic chemical contamination cannot be handled in this way. Ordinary sense perception cannot identify chemical contamination because it is usually invisible until the damage, sometimes irreparable damage, has been done. Since chemical pollution exists at the molecular level, it cannot usually be treated, contained or recovered from the environment. And since its effects are pervasive and long term, rather than local or immediate, quick-fix measures are not practical. [Emphasis added.]

La méthode d'évaluation traditionnelle — axée sur la crainte de «pollution apparente, de celle que l'on peut voir à l'œil nu, toucher, sentir, goûter», et sur le «nettoyage des dégâts, après coup» (pp. 3 et 4) — ne convenait plus. Comme l'explique le rapport (à la p. 4):

> La lutte contre la contamination par les substances toxiques ne peut se faire de cette manière. La perception habituelle par les sens ne permet pas de constater cette contamination parce qu'elle reste invisible jusqu'au moment où les dommages, quelquefois irréversibles, sont un fait accompli. Vu que la pollution chimique existe à l'état moléculaire, il n'est pas possible de la traiter dans l'environnement, de la circonscrire ou de l'éliminer. Et vu également que ses effets sont diffus et durables, plutôt que circonscrits et immédiats, des mesures ponctuelles sont impraticables. [Je souligne.]

140 Not surprisingly, the report emphasized the need to improve the procedures for assessing whether chemical substances were hazardous; see e.g. pp. 10-11. The Act would operate through the listing of chemicals, including "a schedule of dangerous chemicals which are subject to regulation under the [Act]" (p. 15).

Comme on pouvait s'y attendre, le rapport insistait sur la nécessité d'améliorer les procédures servant à établir si les substances chimiques étaient dangereuses; voir, par exemple, aux pp. 10 et 11. La Loi dresserait une liste de produits chimiques, dont «une liste des substances chimiques dangereuses visées par les règlements de la [Loi]» (p. 18).

141 The impugned Act appears to me to respond closely to these objectives. The subject of toxic substances is dealt with principally in Part II of the Act. It begins, we saw, with s. 11, which has been described as a "definition" in argument. While the provision has some properties of a definition, to speak of it in this way is misleading and does not do full justice to its purpose and function. It should be observed that it does not purport to define a

La loi contestée me semble satisfaire exactement à ces objectifs. Le sujet des substances toxiques est traité principalement à la partie II de la Loi. Elle commence, nous l'avons vu, par l'art. 11 qui a été qualifié de «définition» pendant les plaidoiries. Bien que cette disposition présente certaines caractéristiques d'une définition, la qualifier ainsi est trompeur et ne rend pas pleinement justice à son objet et à sa fonction. Il y a lieu de souligner

1997 CanLII 318 (SCC)

1997 CanLII 318 (SCC)

"toxic substance" in the manner in which s. 3 defines various concepts, e.g. "air contaminant", "air pollution", etc. which describes with finality what the defined concept means. Rather, it sets forth that a substance can only be toxic, for the purposes of Part II, if it is entering or may enter the environment in a quantity or concentration or under conditions that result in the detrimental effects on the environment, human life and human health described in paras. (*a*) to (*c*). In other words, one cannot look at a phrase like "having or that may have an immediate or long-term harmful effect on the environment" in a manner divorced from the term "toxic" (i.e. "poisonous"; see the *Oxford English Dictionary* (2nd ed. 1989)). As well, the provision underlines that toxic as used in the Act includes substances that are not *per se*, toxic, but that may, when released into the environment in a certain quantity, concentration or condition, become toxic. Lead, for example, which appears in Schedule I, entitled "List of Toxic Substances", is not *per se* toxic but it can be so when it enters the environment in the course of its use. (This approach is strongly fortified by the nature of Schedule I, which I shall examine later.) The phrase, in other words, describes the nature of toxicity in respect of which substances are to be tested or assessed.

qu'elle n'a pas pour objet de définir une «substance toxique» de la façon dont l'art. 3 définit diverses notions, notamment «polluant atmosphérique» ou «polluant», «pollution atmosphérique», etc., article qui décrit de façon péremptoire le sens de la notion définie. Elle prévoit plutôt qu'une substance ne peut être toxique, pour l'application de la partie II, que si elle pénètre ou peut pénétrer dans l'environnement en une quantité ou une concentration ou dans des conditions qui ont un effet nocif sur l'environnement ainsi que sur la vie et la santé humaines, tel que prévu aux al. *a*) à *c*). Autrement dit, on ne peut pas considérer un passage comme «avoir, immédiatement ou à long terme, un effet nocif sur l'environnement» séparément du terme «toxique» (c.-à-d. «délétère»; voir *Le Nouveau Petit Robert* (1995)). De plus, la disposition souligne que le mot «toxique» utilisé dans la Loi comprend des substances qui ne sont pas toxiques en soi, mais qui peuvent le devenir lorsqu'elles sont rejetées dans l'environnement en une certaine quantité ou concentration ou dans certaines circonstances. Le plomb, par exemple, qui figure à l'annexe I, intitulée «Liste des substances toxiques» n'est pas toxique en soi, mais il peut le devenir lorsqu'il pénètre dans l'environnement au cours de son utilisation. (Ce point de vue est grandement renforcé par la nature de l'annexe I, que j'examinerai plus loin.) En d'autres termes, le passage en question décrit la nature de la toxicité en fonction de laquelle les substances doivent être analysées ou évaluées.

I add that the determination of whether the various components of s. 11 are satisfied in respect of particular substances is by no means an easy task. Whether substances enter or may enter the environment in a quantity, concentration or conditions sufficient to have the effects set forth in that provision are not matters that are generally known. Rather these are matters that must be ascertained by assessments or tests set forth in s. 15, and in accordance with a procedure that requires consultation with the provinces, the informed community and the general public with a view to determining whether certain substances "are toxic or capable of becoming toxic", to use the expression employed in the provisions of Part II dealing with testing,

142 J'ajoute qu'il n'est nullement facile de déterminer si les divers éléments de l'art. 11 sont respectés relativement à certaines substances. La question de savoir si des substances pénètrent ou peuvent pénétrer dans l'environnement en une quantité ou concentration ou dans des conditions suffisantes pour produire les effets mentionnés à cet article n'est pas un fait notoire. Ce sont plutôt des questions qui doivent être vérifiées au moyen des évaluations ou des tests mentionnés à l'art. 15 et conformément à une procédure qui requiert des consultations avec les provinces, les citoyens avertis et le public en général afin de déterminer si certaines substances «sont effectivement ou potentiellement toxiques», pour reprendre l'expression

beginning with the Ministers' weeding out most substances by establishing a priority list of substances to be tested. I note here that a similar expression is used in s. 2(*j*), which falls outside Part II, where in describing the administrative duties of the Government under the Act, it is provided that it shall, consistently with the Constitution, act expeditiously in assessing "whether substances in use in Canada are toxic or capable of becoming toxic". It is also evident from the portion of the preamble of the Act earlier cited that the toxic substances intended to be dealt with by the Act are toxic substances in their normal sense that may result in polluting the environment in a significant degree. In light of this, it is difficult to believe "toxic" is not given its ordinary meaning in the Act, and that s. 11 is, therefore, simply a drafting tool for the demarcation of those aspects of toxicity that are to be considered in the tests required in the sections that follow.

143 What the assessments described in Part II are aimed at is the selection of new items to add to the List of Toxic Substances set forth in Schedule I. Thus s. 11 is the first of a series of provisions respecting testing or assessment for toxicity. The first step in the process of assessment is s. 12, which requires the Ministers to compile a Priority Substances List in respect of substances to which the Ministers are satisfied priority should be given in assessing whether they are toxic or capable of becoming toxic; this list and any amendments to it are published in the *Canada Gazette*, and the provinces and other interested parties are informed (s. 12(2) and (3)). The process of testing is a detailed one and includes informing the provinces and other interested groups and the public at all stages; see, for example, s. 13. In performing their duties, the Ministers are given broad powers to collect data, conduct investigations and correlate and evaluate any data so obtained (see, for example, s. 15). The testing process culminates in a decision of the Ministers to recommend or not to recommend that a substance be added to the List of Toxic Substances in Schedule I of the Act, and, if a

utilisée dans les dispositions de la partie II traitant de la vérification, à commencer par l'élimination par les ministres de la plupart des substances au moyen d'une liste des substances d'intérêt prioritaire à vérifier. Je souligne ici qu'une expression similaire est utilisée à l'al. 2*j*), qui est en dehors de la partie II, où, en décrivant les tâches administratives que la Loi confie au gouvernement, il est prévu que, conformément à la Constitution, ce dernier doit agir avec diligence pour évaluer «si des substances en usage au Canada sont toxiques ou susceptibles de le devenir». Il ressort aussi de la partie du préambule de la Loi, citée plus haut, que les substances toxiques destinées à être visées par la Loi sont les substances toxiques au sens ordinaire qui peuvent polluer sensiblement l'environnement. Compte tenu de cela, il est difficile de croire qu'on ne donne pas au mot «toxique» son sens ordinaire dans la Loi et que l'art. 11 n'est donc qu'un moyen rédactionnel de délimiter les aspects de la toxicité qu'il faut prendre en considération dans les vérifications requises dans les articles suivants.

Les évaluations décrites dans la partie II visent la sélection de nouvelles matières à ajouter à la liste des substances toxiques de l'annexe I. Ainsi, l'art. 11 est la première d'une série de dispositions concernant la vérification ou l'évaluation de la toxicité. La première étape du processus d'évaluation est l'art. 12, qui exige des ministres qu'ils établissent une liste de substances d'intérêt prioritaire énumérant les substances pour lesquelles ils jugent prioritaire de déterminer si elles sont effectivement ou potentiellement toxiques; cette liste et ses modifications sont publiées dans la *Gazette du Canada*, et les provinces ainsi que les autres parties intéressées en sont informées (par. 12(2) et (3)). Le processus de vérification est un processus détaillé qui consiste notamment à informer les provinces de même que les autres groupes intéressés et le public à toutes les étapes; voir, par exemple, l'art. 13. Dans l'exercice de leurs fonctions, les ministres sont investis de vastes pouvoirs de recueillir des données, de mener des enquêtes et de corréler et analyser les données ainsi obtenues (voir, par exemple, l'art. 15). Le processus de vérification aboutit à une décision des ministres de recomman-

1997 CanLII 318 (SCC)

recommendation is made, what regulations should be made in respect of the substance under s. 34.

der ou non l'ajout d'une substance à la liste des substances toxiques de l'annexe I de la Loi et, en cas de recommandation, à une décision de leur part quant au règlement qui devrait être pris en vertu de l'art. 34 relativement à la substance en cause.

The recommendation of the Ministers marks the end of the testing phase and the beginning of a new phase in the process, i.e. the regulatory phase. From this point, as the terminology of the Act makes clear, Part II is concerned with substances in the List of Toxic Substances in Schedule I only. This begins with s. 33, under which the Governor in Council may, if satisfied that a substance is toxic, on the recommendation of the Ministers, make an order adding it to the List of Toxic Substances in Schedule I. It is important to underline that what Part II of the Act provides for is a procedure to control toxic substances generally by subjecting the many chemical substances in use in Canada to testing. That is in furtherance of the duty imposed on the Government, by s. 2(*j*), to make such assessments consistently with the Constitution. If any such substance is found to be toxic, it may be added to the List of Toxic Substances in Schedule I of the Act. Since that list (like s. 2(*j*)) is outside Part II, one must assume "toxic" here refers to toxic in a real sense, which as I stated earlier buttresses the argument that the description given in s. 11 does the same, since one would think the substances authorized to be added to a statute by the Governor in Council would be of the same general character. I add that Driedger's statement that "the words of an Act are to be read in their entire context and in their grammatical and ordinary sense harmoniously with the scheme of the Act, the object of the Act, and the intention of Parliament" bears repetition here; see E. A. Driedger, *Construction of Statutes* (2nd ed. 1983), at p. 87.

144 La recommandation des ministres marque la fin de la phase de vérification et le début d'une nouvelle phase du processus, c.-à-d. la phase de réglementation. Dès lors, comme il ressort nettement de la terminologie de la Loi, la partie II ne porte que sur les substances inscrites sur la liste des substances toxiques de l'annexe I. Cela commence par l'art. 33, en vertu duquel le gouverneur en conseil peut, s'il est convaincu qu'une substance est toxique, sur recommandation des ministres, prendre un arrêté ajoutant une substance à la liste des substances toxiques de l'annexe I. Il est important de souligner que ce que prescrit la partie II de la Loi, c'est une procédure de contrôle des substances toxiques en général au moyen de la vérification des nombreuses substances chimiques en usage au Canada. Il est conforme à l'obligation imposée au gouvernement, par l'al. 2*j*), de faire ces évaluations en accord avec la Constitution. Si une telle substance est jugée toxique, elle peut être ajoutée à la liste des substances toxiques de l'annexe I de la Loi. Vu que cette liste (comme l'al. 2*j*) est en dehors de la partie II, il faut présumer que le mot «toxique» signifie ici toxique au sens réel, ce qui, ainsi que je l'ai affirmé antérieurement, vient étayer l'argument selon lequel la description figurant à l'art. 11 fait la même chose, puisqu'on penserait que les substances que le gouverneur en conseil permettrait d'ajouter à une loi auraient le même caractère général. J'ajoute ici qu'il convient de répéter l'assertion de Driedger selon laquelle [TRADUCTION] «il faut interpréter les termes d'une loi dans leur contexte global en suivant le sens ordinaire et grammatical qui s'harmonise avec l'esprit de la loi, l'objet de la loi et l'intention du législateur»; voir E. A. Driedger, *Construction of Statutes* (2e éd. 1983), à la p. 87.

More needs to be said about this. When one examines the original Schedule, as it appeared in the statute, it is evident that it comprises a very restricted number of substances, nine, and it is also

145 Il est nécessaire d'en dire plus sur ce point. Lorsqu'on examine l'annexe initiale, telle qu'elle apparaissait dans la Loi, il est évident qu'elle comprend un nombre très limité de substances, soit

1997 CanLII 318 (SCC)

apparent that they set forth asbestos, lead and mercury, substances that even to the uninitiated are well known to be toxic in certain circumstances when they enter into the environment. As well, as I noted earlier, the items in the statute were taken from previous legislation, notably the *Environmental Contaminants Act*, under which they were selected because the Ministers believed "on reasonable grounds" that they "constitute or will constitute a significant danger to human health or the environment" (s. 7(2)). I have earlier referred more generally to the continuation of policy when the new legislation was enacted, and noted that the change particularly aimed at by the new legislation was the strengthening of the method of controlling toxic substances by improving the means for identifying them. For all these reasons, I conclude that when the Governor in Council makes an order adding to the List of Toxic Substances in Schedule I, it involves a determination that the substances added are of a kind akin to those already listed in Schedule I.

146 In summary, as I see it, the broad purpose and effect of Part II is to provide a procedure for assessing whether out of the many substances that may conceivably fall within the ambit of s. 11, some should be added to the List of Toxic Substances in Schedule I and, when an order to this effect is made, whether to prohibit the use of the substance so added in the manner provided in the regulations made under s. 34(1) subject to a penalty. These listed substances, toxic in the ordinary sense, are those whose use in a manner contrary to the regulations the Act ultimately prohibits. This is a limited prohibition applicable to a restricted number of substances. The prohibition is enforced by a penal sanction and is undergirded by a valid criminal objective, and so is valid criminal legislation.

147 This, in my mind, is consistent with the terms of the statute, its purpose, and indeed common sense. It is precisely what one would expect of an environmental statute — a procedure to weed out from

neuf, et il appert également qu'elle inclut l'amiante, le plomb et le mercure, des substances dont, même le profane, reconnaît la toxicité dans certaines circonstances lorsqu'elles pénètrent dans l'environnement. De même, comme je l'ai déjà noté, les substances énumérées dans la Loi sont tirées de la législation antérieure, notamment la *Loi sur les contaminants de l'environnement*, en vertu de laquelle elles ont été sélectionnées parce que les ministres avaient des «motifs raisonnables» de croire qu'elles «constituent un risque important pour la santé ou l'environnement» (par. 7(2)). Je me suis déjà reporté plus généralement à la continuation d'une politique lorsque la nouvelle loi a été adoptée et j'ai fait remarquer que le changement visé particulièrement par cette nouvelle loi était le renforcement de la méthode de contrôle des substances toxiques par l'amélioration des moyens de les identifier. Pour toutes ces raisons, je conclus que, lorsque le gouverneur en conseil prend un arrêté qui ajoute une substance à la liste des substances toxiques de l'annexe I, cela implique une décision que la substance ajoutée s'apparente à celles qui figurent déjà sur la liste de l'annexe I.

En résumé, j'estime que la partie II a généralement pour objet et pour effet de prescrire une procédure permettant d'évaluer si, parmi les nombreuses substances qui peuvent, en théorie, être visées par l'art. 11, certaines devraient être ajoutées à la liste des substances de l'annexe I, et de déterminer, lorsqu'on prend un arrêté en ce sens, s'il y a lieu d'interdire, sous peine de sanction, l'utilisation de la substance ainsi ajoutée de la manière prévue dans le règlement pris en vertu du par. 34(1). Ces substances inscrites sur la liste, toxiques au sens ordinaire du terme, sont celles que la Loi interdit, en fin de compte, d'utiliser d'une manière contraire au règlement. C'est une interdiction limitée qui s'applique à un nombre limité de substances. L'interdiction est assortie d'une peine en cas de non-respect et s'appuie sur un objectif pénal valide et est donc une mesure législative pénale valide.

À mon sens, cela est conforme aux termes de la Loi, à son objet et, en fait, au bon sens. C'est précisément ce qu'on attendrait d'une loi sur l'environnement — une procédure permettant d'élimi-

1997 CanLII 318 (SCC)

1997 CanLII 318 (SCC)

the vast number of substances potentially harmful to the environment or human life those only that pose significant risks of that type of harm. Specific targeting of toxic substances based on individual assessment avoids resort to unnecessarily broad prohibitions and their impact on the exercise of provincial powers. Having regard to the particular nature and requirements of effective environmental protection legislation, I do not share my colleagues' concern that the prohibition originates in a regulation, the breach of which gives rise to criminal sanction. The careful targeting of toxic substances is borne out by practice. Counsel for the interveners, Pollution Probe et al., informed us that of the over 21,000 registered substances in commercial use in Canada (see *Domestic Substances List*, SI/91-148, *Canada Gazette, Part I Supp.*; *Domestic Substances List*, SOR/94-311, am. SOR/95-517), only 44 have been placed on the *Priority Substances List* and scientifically assessed under the Act (*Priority Substances List, Canada Gazette, Part I* (Feb. 11, 1989), p. 543). Of these, only 25 were found to be toxic within the meaning of s. 11 (*It's About Our Health!: Towards Pollution Prevention*, Report of the House of Commons Standing Committee on Environment and Sustainable Development, at pp. 63-64), and of these only a few have been the subject of a regulation under s. 34; see *Pulp and Paper Mill Effluent Chlorinated Dioxins and Furans Regulations*, SOR/92-267; *Pulp and Paper Mill Defoamer and Wood Chip Regulations*, SOR/92-268.

ner, parmi le très grand nombre de substances potentiellement nocives pour l'environnement ou la vie humaine, celles qui posent des risques importants de ce genre. Le ciblage précis de substances toxiques fondé sur une évaluation individuelle évite de recourir à des interdictions inutilement larges et à leur incidence sur l'exercice de pouvoirs provinciaux. Compte tenu de la nature et des exigences particulières d'une loi efficace en matière de protection de l'environnement, je ne partage pas la crainte de mes collègues que l'interdiction prenne naissance dans un règlement dont la violation donne lieu à une sanction criminelle. Le ciblage minutieux de substances toxiques est justifié par la pratique. Les avocats des intervenants Pollution Probe et autres nous ont informés que, sur plus de 21 000 substances enregistrées et utilisées de façon commerciale au Canada (voir *Liste intérieure des substances*, TR/91-148, *Gazette du Canada, partie I suppl.*; *Liste intérieure des substances*, DORS/94-311, mod. DORS/95-517), seulement 44 ont été inscrites sur la *Liste des substances d'intérêt prioritaire* et évaluées scientifiquement en vertu de la Loi (*Liste des substances d'intérêt prioritaire, Gazette du Canada, partie I* (11 février 1989), p. 543). De ce nombre, seulement 25 ont été jugées toxiques au sens de l'art. 11 (*Notre santé en dépend!: Vers la prévention de la pollution*, Rapport du Comité permanent de l'environnement et du développement durable, aux pp. 70 et 71), et parmi celles-ci, seules quelques-unes ont fait l'objet d'un règlement pris en vertu de l'art. 34; voir le *Règlement sur les dioxines et les furannes chlorés dans les effluents des fabriques de pâtes et papiers*, DORS/92-267; le *Règlement sur les additifs antimousse et les copeaux de bois utilisés dans les fabriques de pâtes et papiers*, DORS/92-268.

I should perhaps note here that it is wholly appropriate to have recourse to extrinsic material of the kind just referred to as well as of the type already referred to in considering the constitutional validity of legislation, especially when one is dealing with colourability, as is the case here. I refer to *Reference re Upper Churchill Water Rights Reversion Act*, [1984] 1 S.C.R. 297, where McIntyre J.,

148 Je devrais peut-être souligner ici qu'il convient parfaitement d'avoir recours à des documents extrinsèques du genre de ceux que je viens de mentionner et de ceux que j'ai déjà mentionné en examinant la constitutionnalité de la Loi, notamment quand il est question de législation déguisée, comme c'est le cas en l'espèce. Je me reporte au *Renvoi relatif à la Upper Churchill Water Rights*

referring to earlier authorities, had this to say, at p. 318:

> I agree with the Court of Appeal in the present case that extrinsic evidence is admissible to show the background against which the legislation was enacted. I also agree that such evidence is not receivable as an aid to construction of the statute. However, I am also of the view that in constitutional cases, particularly where there are allegations of colourability, extrinsic evidence may be considered to ascertain not only the operation and effect of the impugned legislation but its true object and purpose as well. This was also the view of Dickson J. in the *Reference re Residential Tenancies Act, 1979*, *supra*, at p. 721. . . . [Emphasis in third sentence added.]

149 I turn now to a more detailed examination of the provisions of the Act impugned in the present case, i.e. ss. 34 and 35. I mentioned earlier that the testing phase provided for under Part II ends with s. 32. Up to that point, Part II deals with the testing of substances that may be toxic when released into the environment as described in s. 11. The remainder of Part II, beginning with s. 33, however, is no longer addressed at substances that may be toxic in that broad sense. Rather it is more narrowly addressed at substances specifically listed in the List of Toxic Substances in Schedule I of the Act. In particular, s. 34 authorizes the Governor in Council to make regulations setting forth the restrictions imposed on those using or dealing with such substances. Failure to comply with any such restriction constitutes an offence and is punishable on summary conviction by a fine not exceeding three hundred thousand dollars or a term of imprisonment not exceeding six months, or both; or, on indictment, by a fine not exceeding one million dollars or a term of imprisonment not exceeding three years, or both (s. 113(*f*), (*o*) and (*p*)).

150 Without attempting to regurgitate the whole of s. 34, I shall simply give some flavour of the nature of the prohibitions created by the regulations made thereunder. Generally, s. 34 includes regulations providing for or imposing require-

Reversion Act, [1984] 1 R.C.S. 297, dans lequel le juge McIntyre affirme ceci, au sujet de la jurisprudence antérieure, à la p. 318:

> Je suis d'accord avec la Cour d'appel qu'en l'espèce les éléments de preuve extrinsèques sont recevables pour montrer le contexte dans lequel la législation a été adoptée. Je suis également d'accord que ces éléments de preuve ne sont pas recevables pour aider à interpréter la Loi. Je suis toutefois d'avis que dans les affaires constitutionnelles, notamment lorsqu'il y a allégation de législation déguisée, on peut tenir compte d'éléments de preuve extrinsèques pour vérifier non seulement l'application et l'effet de la loi contestée, mais aussi son objet véritable. C'est également l'avis exprimé par le juge Dickson dans le renvoi *Re Loi de 1979 sur la location résidentielle*, précité, à la p. 721 . . . [Je souligne dans la troisième phrase.]

Je passe maintenant à un examen plus détaillé des dispositions de la loi contestée en l'espèce, c.-à-d. les art. 34 et 35. J'ai mentionné précédemment que la phase de vérification prévue à la partie II se termine à l'art. 32. Jusqu'à ce point, la partie II traite de la vérification de substances qui peuvent être toxiques lorsqu'elles sont rejetées dans l'environnement, tel que décrit à l'art. 11. Cependant, le reste de la partie II, à commencer par l'art. 33, ne vise plus les substances qui peuvent être toxiques dans ce sens large du terme. Il vise plus strictement les substances inscrites précisément sur la liste des substances toxiques de l'annexe I de la Loi. En particulier, l'art. 34 autorise le gouverneur en conseil à prendre des règlements énonçant les restrictions imposées à ceux qui utilisent ou traitent de telles substances. Le défaut de se conformer à l'une de ces restrictions constitue une infraction et est punissable, par procédure sommaire, d'une amende maximale de 300 000 $ et d'un emprisonnement maximal de six mois, ou de l'une de ces peines, ou, par mise en accusation, d'une amende maximale d'un million de dollars et d'un emprisonnement maximal de trois ans, ou de l'une de ces peines (al. 113*f*), *o*) et *p*)).

Sans tenter de reprendre l'art. 34 au complet, je vais simplement donner un aperçu de la nature des interdictions créées par ses règlements d'application. En général, l'art. 34 comprend des règlements prescrivant ou imposant des exigences concernant

1997 CanLII 318 (SCC)

ments respecting the quantity or concentration of a substance listed in Schedule I that may be released into the environment either alone or in combination with others from any source, the places where such substances may be released, the manufacturing or processing activities in the course of which the substance may be released, the manner and conditions of release, and so on. In short, s. 34 precisely defines situations where the use of a substance in the List of Toxic Substances in Schedule I is prohibited, and these prohibitions are made subject to penal consequences. This is similar to the techniques Parliament has employed in providing for and imposing highly detailed requirements and standards in relation to food and drugs, which control their import, sale, manufacturing, labelling, packaging, processing and storing (see *Food and Drugs Act*, R.S.C., 1985, c. F-27). These techniques have, in a number of cases including several in this Court, been upheld as valid criminal law; see *Standard Sausage*, *supra*, esp. at pp. 506-7; *R. v. Wetmore*, [1983] 2 S.C.R. 284, at p. 289; *RJR-MacDonald*, *supra*. Other statutes providing for extensive control of hazardous products that are justifiable in whole or in part under the criminal law power include the *Hazardous Products Act*, R.S.C., 1985, c. H-3 (see *R. v. Cosman's Furniture (1972) Ltd.* (1976), 32 C.C.C. (2d) 345 (Man. C.A.)), and the *Explosives Act*, R.S.C., 1985, c. E-17.

la quantité ou la concentration d'une substance inscrite sur la liste de l'annexe I, qui peut être rejetée dans l'environnement seule ou avec d'autres substances provenant de quelque source que ce soit, les endroits où ces substances peuvent être rejetées, les activités de fabrication ou de traitement au cours desquelles la substance peut être rejetée, la manière et les conditions du rejet, et ainsi de suite. Bref, l'art. 34 définit précisément des situations où l'utilisation d'une substance inscrite sur la liste des substances toxiques de l'annexe I est interdite et où ces interdictions sont assorties de conséquences pénales. Cela ressemble aux techniques que le Parlement a utilisées pour prescrire et imposer des exigences et des normes fort détaillées en matière d'aliments et drogues, qui servent à en contrôler l'importation, la vente, la fabrication, l'étiquetage, l'emballage, le traitement et l'entreposage (voir la *Loi sur les aliments et drogues*, L.R.C. (1985), ch. F-27). Dans un certain nombre d'affaires dont plusieurs instruites par notre Cour, ces techniques ont été maintenues comme constituant du droit criminel valide; voir *Standard Sausage*, précité, particulièrement aux pp. 506 et 507; *R. c. Wetmore*, [1983] 2 R.C.S. 284, à la p. 289; *RJR-MacDonald*, précité. Parmi d'autres lois prévoyant le contrôle général de produits dangereux, qui peuvent se justifier en totalité ou en partie en vertu de la compétence en matière de droit criminel, il y a la *Loi sur les produits dangereux*, L.R.C. (1985), ch. H-3 (voir *R. c. Cosman's Furniture (1972) Ltd.* (1976), 32 C.C.C. (2d) 345 (C.A. Man.)), et la *Loi sur les explosifs*, L.R.C. (1985), ch. E-17.

What Parliament is doing in s. 34 is making provision for carefully tailoring the prohibited action to specified substances used or dealt with in specific circumstances. This type of tailoring is obviously necessary in defining the scope of a criminal prohibition, and is, of course, within Parliament's power. As Laskin C.J. noted in *Morgentaler v. The Queen*, [1976] 1 S.C.R. 616, at p. 627: "I need cite no authority for the proposition that Parliament may determine what is not criminal as well as what is". More recently, Stevenson J. in *R. v. Furtney*, [1991] 3 S.C.R. 89, at pp. 106-7, speak-

151 Ce que fait le Parlement à l'art. 34, c'est créer une disposition qui permette de bien adapter l'action interdite aux substances mentionnées qui sont utilisées ou traitées dans certaines circonstances. Ce genre d'adaptation est manifestement requis pour définir l'étendue d'une interdiction criminelle et relève, naturellement, de la compétence du Parlement. Comme le juge en chef Laskin l'a fait observer dans l'arrêt *Morgentaler c. La Reine*, [1976] 1 R.C.S. 616, à la p. 627: «Je n'ai pas besoin de citer de précédents pour affirmer que le Parlement peut déterminer ce qui n'est pas criminel aussi bien que ce qui l'est». Plus récemment, le juge Stevenson, dans l'arrêt *R. c. Furtney*, [1991] 3

1997 CanLII 318 (SCC)

ing of decriminalization of lotteries in certain circumstances, had this to say:

> It constitutes a definition of the crime, defining the reach of the offence, a constitutionally permissive exercise of the criminal law power, reducing the area subject to criminal law prohibition where certain conditions exist. I cannot characterize it as an invasion of provincial powers any more than the appellants were themselves able to do.

152 As Stevenson J. notes, this kind of legislation does not constitute an invasion of provincial regulatory power; see also *Attorney-General for British Columbia v. Attorney-General for Canada*, [1937] A.C. 368 (P.C.), at pp. 375-6; *Boggs v. The Queen*, [1981] 1 S.C.R. 49, at pp. 60-61. This is true as well in the case of detailed legislation such as that in question here, as can be seen from the statement of Macdonald J.A. in *Standard Sausage*, cited *supra*, at pp. 506-7 (affirmed in *Wetmore*, *supra*, and specifically relied on in *RJR-MacDonald*, *supra*). This is based on even more fundamental principles. As noted earlier, we are dealing with prohibitions accompanied by penal sanctions, so that we are really not concerned with whether these may incidentally affect property and civil rights but whether the prohibitions are directed at a public evil. The matter was thus put in *RJR-MacDonald*, at pp. 241-42:

> These prohibitions are accompanied by penal sanctions under s. 18 of the Act, which, as Lord Atkin noted in *PATA*, *supra*, at p. 324, creates at least a *prima facie* indication that the Act is criminal law. However, the crucial further question is whether the Act also has an underlying criminal public purpose in the sense described by Rand J. in the *Margarine Reference*, *supra*. The question, as Rand J. framed it, is whether the prohibition with penal consequences is directed at an "evil" or injurious effect upon the public.

153 In truth, there is a broad area of concurrency between federal and provincial powers in areas subjected to criminal prohibitions, and the courts

R.C.S. 89, aux pp. 106 et 107, a dit, au sujet de la décriminalisation des loteries dans certaines circonstances:

> Elle constitue une définition de l'acte criminel, qui fixe la portée de l'infraction, un exercice constitutionnellement acceptable du pouvoir en matière de droit criminel, qui réduit le champ de l'interdiction du droit criminel lorsqu'il existe certaines conditions. Je ne puis qualifier cela d'empiétement sur les pouvoirs des provinces, pas plus que les appelants n'ont eux-mêmes été en mesure de le faire.

Comme le juge Stevenson le souligne, ce genre de mesure législative ne constitue pas un empiétement sur le pouvoir de réglementation des provinces; voir également les arrêts *Attorney-General for British Columbia c. Attorney-General for Canada*, [1937] A.C. 368 (C.P.), aux pp. 375 et 376; *Boggs c. La Reine*, [1981] 1 R.C.S. 49, aux pp. 60 et 61. C'est aussi vrai dans le cas d'une loi détaillée comme celle dont il est question en l'espèce, comme permet de le constater l'énoncé du juge Macdonald dans l'arrêt *Standard Sausage*, précité, aux pp. 506 et 507 (confirmé dans *Wetmore*, précité, et invoqué expressément dans *RJR-MacDonald*, précité). Cela repose sur des principes encore plus fondamentaux. Comme nous l'avons vu, il est question ici d'interdictions assorties de sanctions pénales, de sorte que ce qui nous intéresse vraiment est de savoir non pas si elles peuvent influer incidemment sur la propriété et les droits civils, mais si elles visent à remédier à un mal public. La question est exposée ainsi dans l'arrêt *RJR-MacDonald*, aux pp. 241 et 242:

> Ces interdictions sont assorties de sanctions pénales en vertu de l'art. 18 de la Loi, lesquelles, comme le précise lord Atkin dans l'arrêt *PATA*, précité, à la p. 324, créent une indication du moins à première vue que la loi est de droit criminel. Cependant, l'autre question importante est de savoir si la Loi a également un objectif public sous-jacent du droit criminel au sens où le décrit le juge Rand dans le *Renvoi sur la margarine*, précité. Comme le précise le juge Rand, la question est de savoir si l'interdiction assortie de sanctions pénales est dirigée contre un «mal» ou un effet nuisible pour le public.

À vrai dire, c'est un vaste champ de concurrence entre les pouvoirs du gouvernement fédéral et ceux des provinces dans des domaines assujettis à des

1997 CanLII 318 (SCC)

have been alert to the need to permit adequate breathing room for the exercise of jurisdiction by both levels of government. Dickson J. put it this way in *Schneider v. The Queen*, [1982] 2 S.C.R. 112, at p. 134:

> The interface between criminal law and provincial legislation which might be seen as impunging upon the federal jurisdiction in the field of criminal law has not been closely drawn. As Professor Hogg notes in Chapter 16 of his work, *Constitutional Law of Canada*, the dominant tendency of the case law has been to uphold provincial penal legislation; recent cases have been generous to provincial power, and "The result is that over much of the field which may loosely be thought of as criminal law legislative power is concurrent" (at p. 292).

This type of approach is essential in dealing with amorphous subjects like health and the environment. In my reasons for the minority in *Crown Zellerbach*, *supra*, (addressing an issue which the majority did not discuss), I had this to say about the matter as it relates to environmental pollution (at p. 455):

> . . . environmental pollution . . . is . . . all-pervasive. It is a by-product of everything we do. In man's relationship with his environment, waste is unavoidable. The problem is thus not new, although it is only recently that the vast amount of waste products emitted into the atmosphere or dumped in water has begun to exceed the ability of the atmosphere and water to absorb and assimilate it on a global scale. There is thus cause for concern and governments at every level have begun to deal with the many activities giving rise to problems of pollution. In Canada, both federal and provincial levels of government have extensive powers to deal with these matters. Both have enacted comprehensive and specific schemes for the control of pollution and the protection of the environment. Some environmental pollution problems are of more direct concern to the federal government, some to the provincial government. But a vast number are interrelated, and all levels of government actively co-operate to deal with problems of mutual concern; for

interdictions criminelles, et les tribunaux ont été conscients de la nécessité de réserver un espace adéquat pour que les deux niveaux de gouvernement puissent exercer leur compétence. Le juge Dickson s'exprime ainsi dans l'arrêt *Schneider c. La Reine*, [1982] 2 R.C.S. 112, à la p. 134:

> La ligne de démarcation entre le droit criminel et les lois provinciales qui pourraient être considérées comme des empiétements sur la compétence fédérale en matière de droit criminel n'a pas été tracée avec précision. Le professeur Hogg souligne, au chapitre 16 de son ouvrage intitulé *Constitutional Law of Canada*, que la jurisprudence a tendance à confirmer les lois provinciales de nature pénale; les arrêts récents sont favorables au pouvoir des provinces et [TRADUCTION] «Il s'ensuit qu'une bonne partie du domaine qu'on pourrait plus ou moins considérer comme relevant de la compétence législative en matière de droit criminel est de compétence concurrente» (à la p. 292).

Ce genre d'approche est essentiel pour traiter de sujets vagues comme la santé et l'environnement. Dans les motifs de dissidence que j'ai rédigés dans l'arrêt *Crown Zellerbach*, précité, (abordant une question que la Cour à la majorité n'avait pas analysée), voici ce que j'ai dit à ce sujet dans le contexte de la pollution de l'environnement (à la p. 455):

> . . . la pollution de l'environnement se fait [. . .] sentir partout. C'est le sous-produit de tout ce que nous faisons. Dans les rapports qu'a l'être humain avec son environnement, les déchets sont une chose inévitable. Le problème n'est donc pas nouveau, bien que ce ne soit que récemment que la vaste quantité de résidus déversés dans l'atmosphère ou dans l'eau ait commencé à excéder la capacité de l'atmosphère et de l'eau de les absorber et de les assimiler, à l'échelle planétaire. Il y a donc là un sujet de préoccupation et les gouvernements de tous paliers ont commencé à s'intéresser aux nombreuses activités qui causent la pollution. Au Canada, tant le gouvernement fédéral que ceux des provinces jouissent de pouvoirs étendus pour traiter ces problèmes. Les deux paliers de gouvernement ont adopté des programmes globaux et spécifiques de contrôle de la pollution et de protection de l'environnement. Certains problèmes de pollution de l'environnement intéressent plus directement le gouvernement fédéral, d'autres le gouvernement provincial. Mais beaucoup sont intimement liés et tous les paliers de gouvernement coopèrent activement pour régler ces problèmes d'intérêt mutuel; pour un exemple de cela, voir l'étude sur les Grands Lacs

1997 CanLII 318 (SCC)

an example of this, see the Great Lakes study in I.J.C. Report, op. cit.

I observe that in enacting the legislation in issue here, Parliament was alive to the need for cooperation and coordination between the federal and provincial authorities. This is evident throughout the Act. In particular, under s. 34(2), (5) and (6), Parliament has made it clear that the provisions of this Part are not to apply where a matter is otherwise regulated under other equivalent federal or provincial legislation.

154 In *Crown Zellerbach*, I expressed concern with the possibility of allocating legislative power respecting environmental pollution exclusively to Parliament. I would be equally concerned with an interpretation of the Constitution that effectively allocated to the provinces, under general powers such as property and civil rights, control over the environment in a manner that prevented Parliament from exercising the leadership role expected of it by the international community and its role in protecting the basic values of Canadians regarding the environment through the instrumentality of the criminal law power. Great sensitivity is required in this area since, as Professor Lederman has rightly observed, environmental pollution "is no limited subject or theme, [it] is a sweeping subject or theme virtually all-pervasive in its legislative implications"; see W. R. Lederman, "Unity and Diversity in Canadian Federalism: Ideals and Methods of Moderation" (1975), 53 *Can. Bar Rev.* 597, at p. 610.

155 Turning then to s. 35, I mentioned that it is ancillary to s. 34. It deals with emergency situations. The provision, it seems to me, indicates even more clearly a criminal purpose, and throws further light on the intention of s. 34 and of the Act generally. It can only be brought into play when the Ministers believe a substance is not specified in the List in Schedule I or is listed but is not subjected to control under s. 34. In such a case, they may make an interim order in respect of the sub-

dans le rapport de la Commission mixte internationale, *op. cit.*

Je remarque que, en adoptant la loi en question dans la présente affaire, le Parlement était conscient du besoin de coopération et de coordination entre les autorités fédérales et provinciales. Cela est manifeste partout dans la Loi. Plus particulièrement, aux par. 34(2), (5) et (6), le Parlement a précisé que les dispositions de cette partie ne doivent pas s'appliquer lorsqu'une matière est, par ailleurs, réglementée en vertu d'une autre loi fédérale ou provinciale équivalente.

Dans l'arrêt *Crown Zellerbach*, j'ai exprimé des craintes au sujet de la possibilité d'accorder exclusivement au Parlement la compétence législative en matière de pollution de l'environnement. Je serais tout aussi craintif si on donnait une interprétation de la Constitution qui accorderait effectivement aux provinces, en vertu de pouvoirs généraux comme ceux relatifs à la propriété et aux droits civils, un contrôle sur l'environnement d'une manière qui empêcherait le Parlement d'exercer le leadership que la communauté internationale attend de lui et son rôle de protecteur des valeurs fondamentales des Canadiens en ce qui concerne l'environnement, au moyen de sa compétence en matière de droit criminel. Il faut faire preuve d'une grande perspicacité dans ce domaine car, comme le professeur Lederman l'a fait observer à juste titre, la pollution de l'environnement [TRADUCTION] «n'est pas un sujet limité, c'est un vaste sujet dont l'incidence législative se fait sentir presque partout»; voir W. R. Lederman, «Unity and Diversity in Canadian Federalism: Ideals and Methods of Moderation» (1975), 53 *R. du B. can.* 597, à la p. 610.

Quant à l'art. 35, j'ai mentionné qu'il est accessoire à l'art. 34. Il traite de situations d'urgence. La disposition, me semble-t-il, indique encore plus clairement l'existence d'un objectif de droit criminel et renseigne davantage sur le but de l'art. 34 et de la Loi en général. Il ne peut entrer en jeu que lorsque les ministres croient qu'une substance n'est pas inscrite sur la liste de l'annexe I ou y est inscrite sans toutefois être assujettie au contrôle fondé sur l'art. 34. En pareil cas, ils peuvent pren-

1997 CanLII 318 (SCC)

stance if they believe "immediate action is required to deal with a significant danger to the environment or to human life or health".

dre un arrêté d'urgence relativement à la substance en cause s'ils croient qu'une «intervention immédiate est nécessaire afin de parer à tout danger appréciable soit pour l'environnement, soit pour la vie humaine ou la santé».

In sum, then, I am of the view that Part II of the Act, properly construed, simply provides a means to assess substances with a view to determining whether the substances are sufficiently toxic to be added to Schedule I of the Act (which contains a list of dangerous substances carried over from pre-existing legislation), and provides by regulations under s. 34 the terms and conditions under which they can be used, with provisions under s. 35 for by-passing the ordinary provisions for testing and regulation under Part II in cases where immediate action is required. I have reached this position independently of the legal presumption that a legislature intends to confine itself to matters within its competence; see *Reference re Farm Products Marketing Act*, [1957] S.C.R. 198, at p. 255; *Nova Scotia Board of Censors v. McNeil*, [1978] 2 S.C.R. 662, at p. 688. However, it follows that the position I have taken would by virtue of the presumption displace a possible reading of the Act that would render it unconstitutional.

156 Somme toute, je suis donc d'avis que la partie II de la Loi, interprétée correctement, fournit simplement un moyen d'évaluer des substances en vue de déterminer si elles sont suffisamment toxiques pour être ajoutées à l'annexe I de la Loi (qui contient une liste de substances dangereuses provenant d'un texte législatif antérieur), qu'elle prescrit, par règlement pris en vertu de l'art. 34, les conditions auxquelles elles peuvent être utilisées et qu'elle comporte, à l'art. 35, des dispositions permettant de contourner les dispositions ordinaires de la partie II, relatives à la vérification et à la réglementation, dans les cas où une intervention immédiate est requise. J'ai adopté ce point de vue indépendamment de la présomption légale qu'un législateur entend se limiter aux matières relevant de sa compétence; voir *Reference re Farm Products Marketing Act*, [1957] R.C.S. 198, à la p. 255; *Nova Scotia Board of Censors c. McNeil*, [1978] 2 R.C.S. 662, à la p. 688. Cependant, il s'ensuit que le point de vue que j'ai adopté supplanterait, en vertu de cette présomption, une interprétation éventuelle de la Loi qui la rendrait inconstitutionnelle.

Since I have found the empowering provisions, ss. 34 and 35, to be *intra vires*, the only attack that could be brought against any action taken under them would be that such action went beyond the authority granted by those provisions; in the present case, for example, such an attack might consist in the allegation that PCBs did not pose "a significant danger to the environment or to human life or health" justifying the making of the Interim Order. This would seem to me to be a tall order. The fact that PCBs are highly toxic substances should require no demonstration. This has become well known to the general public and is supported by an impressive array of scientific studies at both the national and international levels. I list here merely a sample of those cited to us: World Health Organization, U.N. Environment Programme and

157 Comme j'ai conclu que les dispositions habilitantes, les art. 34 et 35, sont constitutionnelles, la seule contestation dont pourrait faire l'objet toute action intentée en vertu de celles-ci consisterait à affirmer que cette action a excédé le pouvoir accordé par ces dispositions; dans la présente affaire, par exemple, elle pourrait consister à alléguer que les BPC ne posaient pas un «danger appréciable soit pour l'environnement, soit pour la vie humaine ou la santé» qui justifiait la prise d'un arrêté d'urgence. Ce serait, me semble-t-il, demander un peu trop. Il ne devrait pas être nécessaire de démontrer que les BPC sont des substances très toxiques. Ce fait est bien connu du grand public et est étayé par un nombre impressionnant d'études scientifiques tant au niveau national qu'au niveau international. J'énumère ici simplement des

1997 CanLII 318 (SCC)

International Labour Organization (joint report), *Polychlorinated Biphenyls (PCBs) and Polychlorinated Terphenyls (PCTs) Health and Safety Guide* (1992); S. Dobson and G. J. van Esch, *Polychlorinated Biphenyls and Terphenyls* (2nd ed. 1993), Environmental Health Criteria 140, World Health Organization; R. J. Norstrom (Environment Canada) and D. C. G. Muir (Department of Fisheries and Oceans), "Chlorinated Hydrocarbon Contaminants in Arctic Marine Mammals", *The Science of the Total Environment* 154 (1994) 107-28; U.N. Environment Programme, *Global Environmental Issues*, *supra*; Environment Canada, Department of Fisheries and Oceans, Health and Welfare Canada, *Toxic Chemicals in the Great Lakes and Associated Effects* (1991); J. L. and S. W. Jacobson, "A 4-Year Followup Study of Children Born to Consumers of Lake Michigan Fish", *Journal of Great Lakes Research*, 19(4) (1993): 776-83; M. Gilbertson et al., "Great Lakes Embryo Mortality, Edema, and Deformities Syndrome (GLEMEDS) in Colonial Fish-eating Birds: Similarity to Chick-Edema Disease", *Journal of Toxicology and Environmental Health*, 33 (1991): 455-520; Canadian Council of Resource and Environment Ministers, *The PCB Story* (1986); Environment Canada and Health and Welfare Canada, *Background to the Regulation of Polychlorinated Biphenyls (PCB) in Canada: A report of the Task Force on PCB, April 1 1976 to the Environmental Contaminants Committee of Environment Canada and Health and Welfare Canada*; Health and Welfare Canada, *A Review of the Toxicology and Human Health Aspects of PCBs (1978-1982)* (1985); OECD, *Protection of the Environment by Control of Polychlorinated Biphenyls* (1973).

158 From what appears in these studies, one can conclude that PCBs are not only highly toxic but long lasting and very slow to break down in water, air or soil. They do dissolve readily in fat tissues and other organic compounds, however, with the

exemples d'études qui nous ont été cités: Organisation mondiale de la Santé, Programme des Nations Unies pour l'environnement et Organisation internationale du travail (rapport conjoint), *Polychlorinated Biphenyls (PCBs) and Polychlorinated Terphenyls (PCTs) Health and Safety Guide* (1992); S. Dobson et G. J. van Esch, *Polychlorinated Biphenyls and Terphenyls* (2e éd. 1993), Critères d'hygiène de l'environnement 140, Organisation mondiale de la Santé; R. J. Norstrom (Environnement Canada) et D. C. G. Muir (Ministère des Pêches et des Océans), «Chlorinated Hydrocarbon Contaminants in Arctic Marine Mammals», *The Science of the Total Environment* 154 (1994) 107 à 128; Programme des Nations Unies pour l'environnement, *Global Environmental Issues*, *op. cit.*; Environnement Canada, Ministère des Pêches et des Océans, Santé et Bien-être social Canada, *Les produits chimiques toxiques dans les Grands Lacs et leurs effets connexes* (1991); J. L. et S. W. Jacobson, «A 4-year Followup Study of Children Born to Consumers of Lake Michigan Fish», *Journal of Great Lakes Research*, 19(4) (1993): 776 à 783; M. Gilbertson et autres, «Great Lakes Embryo Mortality, Edema, and Deformities Syndrome (GLEMEDS) in Colonial Fish-eating Birds: Similarity to Chick-Edema Disease», *Journal of Toxicology and Environmental Health*, 33 (1991): 455 à 520; Conseil canadien des ministres des ressources et de l'environnement, *La question des BPC* (1986); Environnement Canada et Santé et Bien-être social Canada, *Background to the Regulation of Polychlorinated Biphenyls (PCB) in Canada: A report of the Task Force on PCB, April 1 1976 to the Environmental Contaminants Committee of Environment Canada and Health and Welfare Canada*; Santé et Bien-être social Canada, *Examen de la toxicologie et des questions sanitaires relatives aux BPC (1978-1982)* (1985); OCDE, *Protection of the Environment by Control of Polychlorinated Biphenyls* (1973).

Selon ce qui ressort de ces études, on peut conclure que les BPC sont non seulement très toxiques, mais encore qu'ils durent longtemps et se décomposent très lentement dans l'eau, l'air ou le sol. Toutefois, ils se dissolvent facilement dans les

1997 CanLII 318 (SCC)

result that they move up the food chain through birds and other animals and eventually to humans. They pose significant risks of serious harm to both animals and humans. As well they are extremely mobile. They evaporate from soil and water and are transported great distances through the atmosphere. High levels of PCBs have been found in a variety of arctic animals living thousands of kilometres from any major source of PCBs. The extent of the dangers they pose is reflected in the fact that they were the first substance sought to be controlled in Canada under the *Environmental Contaminants Act*, the predecessor of the present legislation. They were also the first substance regulated in the United States under the *Toxic Substances Control Act*, 15 U.S.C. § 2605(c). And because of the trans-boundary nature of the threat, they were the first substances targeted for joint action by Canada, the United States and Mexico through the Commission for Environmental Cooperation established under the North American Free Trade Agreement; see C.E.C. Council of Ministers, Resolution # 95-5 "Sound Management of Chemicals", Oct. 1995; C.E.C. Secretariat Bulletin, vol. 2, No. 3, Winter/Spring 1996.

tissus adipeux et autres composés organiques, de sorte qu'ils remontent la chaîne alimentaire grâce aux oiseaux et aux autres animaux pour éventuellement atteindre les êtres humains. Ils posent des risques importants de préjudice grave pour les animaux et les humains. De même, ils sont extrêmement mobiles. Ils s'évaporent du sol et de l'eau et franchissent de grandes distances dans l'atmosphère. On a trouvé des concentrations élevées de BPC chez divers animaux de l'Arctique qui vivent à des milliers de kilomètres de toute source majeure de BPC. L'ampleur des dangers qu'ils posent est illustrée par le fait qu'ils constituent la première substance qu'on a cherché à contrôler au Canada en vertu de la *Loi sur les contaminants de l'environnement*, qui a précédé la loi actuelle. Ils ont aussi été la première substance à être réglementée aux États-Unis en vertu de la *Toxic Substances Control Act*, 15 U.S.C. § 2605c). Et en raison de la nature transfrontalière de la menace, ce sont les premières substances ciblées par une action conjointe du Canada, des États-Unis et du Mexique par l'intermédiaire de la Commission de coopération environnementale établie en vertu de l'Accord de libre-échange nord-américain; voir Conseil des ministres de la C.C.E., résolution # 95-5 «Sound Management of Chemicals», oct. 1995; Bulletin du Secrétariat de la C.C.E., vol. 2, nº 3, hiver-printemps 1996.

I should say that the respondent and *mis en cause* do not contest the toxicity of PCBs but simply argue that their control should not fall exclusively within federal competence. They also note that there is one study (G. J. Farquhar and J. Sykes, *PCB Behavior in Soils* (1978), at pp. 7, 8, 22, 23, 26, 33 and 34) that indicates that PCBs are absorbed, remain stable and are not mobile. I have already discussed the issue of concurrency. So far as mobility is concerned, whatever weight may be attached to the report in relation to the national concern issue, it has no relevance in considering federal jurisdiction under the criminal law power.

159 Je tiens à préciser que l'intimée et le mis en cause ne contestent pas la toxicité des BPC, mais soutiennent simplement que leur contrôle ne devrait pas relever exclusivement de la compétence fédérale. Ils soulignent aussi qu'il existe une étude (G. J. Farquhar et J. Sykes, *PCB Behavior in Soils* (1978), aux pp. 7, 8, 22, 23, 26, 33 et 34) qui indique que les BPC sont absorbés, demeurent stables et ne sont pas mobiles. J'ai déjà analysé la question de la concurrence. Quant à la mobilité, quel que soit le poids qu'on puisse attacher au rapport relativement à la question de l'intérêt national, il n'a rien à voir avec l'examen de la compétence fédérale en vertu du pouvoir en matière de droit criminel.

1997 CanLII 318 (SCC)

160 I conclude, therefore, that the Interim Order is also valid under s. 91(27) of the *Constitution Act, 1867*.

Disposition

161 I would allow the appeal with costs, set aside the judgment of the Court of Appeal of Quebec and order that the matter be returned to the Court of summary convictions to be dealt with in accordance with the Act. I would answer the constitutional question as follows:

Q. Do s. 6(*a*) of the *Chlorobiphenyls Interim Order*, P.C. 1989-296, and the enabling legislative provisions, ss. 34 and 35 of the *Canadian Environmental Protection Act*, R.S.C., 1985, c. 16 (4th Supp.), fall in whole or in part within the jurisdiction of the Parliament of Canada to make laws for the peace, order and good government of Canada pursuant to s. 91 of the *Constitution Act, 1867* or its criminal law jurisdiction under s. 91(27) of the *Constitution Act, 1867* or otherwise fall within its jurisdiction?

A. Yes. They fall wholly within Parliament's power to enact laws under s. 91(27) of the *Constitution Act, 1867*. It is not necessary to consider the first issue.

Appeal allowed with costs, LAMER C.J. *and* SOPINKA, IACOBUCCI *and* MAJOR JJ. *dissenting.*

Solicitor for the appellant: George Thomson, Montreal.

Solicitors for the respondent: Ogilvy Renault, Montreal.

Solicitor for the mis en cause: Alain Gingras, Sainte-Foy.

Solicitor for the intervener the Attorney General for Saskatchewan: W. Brent Cotter, Regina.

Solicitors for the intervener IPSCO Inc.: MacPherson Leslie & Tyerman, Regina.

Je conclus donc que l'arrêté d'urgence est également valide en vertu du par. 91(27) de la *Loi constitutionnelle de 1867*.

Dispositif

Je suis d'avis d'accueillir le pourvoi avec dépens, d'infirmer l'arrêt de la Cour d'appel du Québec et d'ordonner que l'affaire soit renvoyée au tribunal des poursuites sommaires pour qu'elle soit instruite conformément à la Loi. Je suis d'avis de répondre à la question constitutionnelle de la façon suivante:

Q. L'alinéa 6*a*) de l'*Arrêté d'urgence sur les biphényles chlorés*, C.P. 1989-296, ainsi que les dispositions législatives habilitantes, les art. 34 et 35 de la *Loi canadienne sur la protection de l'environnement*, L.R.C. (1985), ch. 16 (4e suppl.), relèvent-ils en tout ou en partie de la compétence du Parlement du Canada de légiférer pour la paix, l'ordre et le bon gouvernement du Canada en vertu de l'art. 91 de la *Loi constitutionnelle de 1867* ou de la compétence en matière criminelle suivant le par. 91(27) de la *Loi constitutionnelle de 1867*, ou autrement?

R. Oui. Ils relèvent entièrement du pouvoir du Parlement de légiférer en vertu du par. 91(27) de la *Loi constitutionnelle de 1867*. Il n'est pas nécessaire d'examiner la première partie de la question.

Pourvoi accueilli avec dépens, le juge en chef LAMER *et les juges* SOPINKA, IACOBUCCI *et* MAJOR *sont dissidents.*

guidelines order — Applications dismissed on grounds of unreasonable delay and futility — Whether Court of Appeal erred in interfering with motions judge's discretion not to grant remedy sought.

cer le ministre des Transports et le ministre des Pêches et des Océans à se conformer au décret fédéral sur les lignes directrices en matière d'environnement — Demandes rejetées en raison du retard déraisonnable et de la futilité de la procédure — La Cour d'appel a-t-elle commis une erreur en modifiant la décision du juge des requêtes, prise dans l'exercice de son pouvoir discrétionnaire, de ne pas accorder la réparation demandée?

The respondent Society, an Alberta environmental group, brought applications for *certiorari* and mandamus in the Federal Court seeking to compel the federal departments of Transport and Fisheries and Oceans to conduct an environmental assessment, pursuant to the federal *Environmental Assessment and Review Process Guidelines Order*, in respect of a dam constructed on the Oldman River by the province of Alberta — a project which affects several federal interests, in particular navigable waters, fisheries, Indians and Indian lands. The Guidelines Order was established under s. 6 of the federal *Department of the Environment Act* and requires all federal departments and agencies that have a decision-making authority for any proposal (i.e., any initiative, undertaking or activity) that may have an environmental effect on an area of federal responsibility to initially screen such proposal to determine whether it may give rise to any potentially adverse environmental effects. The province had itself conducted extensive environmental studies over the years which took into account public views, including the views of Indian bands and environmental groups, and, in September 1987, had obtained from the Minister of Transport an approval for the work under s. 5 of the *Navigable Waters Protection Act*. This section provides that no work is to be built in navigable waters without the prior approval of the Minister. In assessing Alberta's application, the Minister considered only the project's effect on navigation and no assessment under the Guidelines Order was made. Respondent's attempts to stop the project in the Alberta courts failed and both the federal Ministers of the Environment and of Fisheries and Oceans declined requests to subject the project to the Guidelines Order. The contract for the construction of the dam was awarded in 1988 and the project was 40 percent complete when the respondent commenced its action in the Federal Court in April 1989. The Trial Division dismissed the applications. On appeal, the Court of Appeal reversed the judgment, quashed the approval under s. 5 of the *Navigable Waters Protection Act*, and ordered the Ministers of Transport and of Fisheries and Oceans to comply with the Guidelines Order. This appeal raises the constitutional and statutory validity of the Guidelines Order as well as its nature and applicability. It also raises the

L'intimée, la Friends of the Oldman River Society (la «Société»), un groupe environnemental de l'Alberta, par demande de bref de *certiorari* et de bref de *mandamus* présentée à la Cour fédérale, cherche à forcer deux ministères fédéraux, le ministère des Transports et le ministère des Pêches et des Océans, à procéder à une évaluation environnementale conformément au *Décret fédéral sur les lignes directrices visant le processus d'évaluation et d'examen en matière d'environnement*, relativement à un barrage construit sur la rivière Oldman par la province d'Alberta—un projet qui touche plusieurs sphères de compétence fédérale, notamment les eaux navigables, les pêcheries, les Indiens et les terres indiennes. Le Décret sur les lignes directrices a été pris en vertu de l'art. 6 de la *Loi sur le ministère de l'Environnement* et exige de tous les ministères et organismes fédéraux qui exercent un pouvoir de décision à l'égard d'une proposition (c'est-à-dire une entreprise ou activité) susceptible d'entraîner des répercussions environnementales sur une question de compétence fédérale, qu'ils procèdent à un examen initial de cette proposition afin de déterminer si elle peut éventuellement comporter des effets défavorables sur l'environnement. La province a elle-même procédé au cours des années à d'importantes études environnementales qui ont donné lieu à des consultations publiques, notamment auprès des bandes indiennes et des groupes environnementaux, et, en septembre 1987, avait obtenu du ministre des Transports une approbation de l'ouvrage en vertu de l'art. 5 de la *Loi sur la protection des eaux navigables*. Cette disposition prévoit qu'il est interdit de construire un ouvrage dans les eaux navigables à moins qu'il n'ait préalablement été approuvé par le ministre. Dans l'évaluation de la demande de l'Alberta, le ministre n'a examiné que l'incidence du projet sur la navigation et aucune évaluation n'a été faite en vertu du Décret sur les lignes directrices. Les tentatives de l'intimée devant les tribunaux de l'Alberta pour faire arrêter le projet ont échoué et les ministres fédéraux de l'Environnement et des Pêches et des Océans ont refusé d'assujettir le projet à l'évaluation en vertu du Décret sur les lignes directrices. Le contrat de construction du barrage a été octroyé en 1988 et les travaux étaient achevés à 40 pour 100 lorsque la présente action a été intentée

1992 CanLII 110 (SCC)

question whether the motions judge properly exercised his discretion in deciding not to grant the remedy sought on grounds of unreasonable delay and futility.

Held (Stevenson J. dissenting): The appeal should be dismissed, with the exception that there should be no order in the nature of mandamus directing the Minister of Fisheries and Oceans to comply with the Guidelines Order.

Statutory Validity of the Guidelines Order

The Guidelines Order was validly enacted pursuant to s. 6 of the *Department of the Environment Act*, and is mandatory in nature. When one reads s. 6 as a whole, rather than focusing on the word "guidelines" in isolation, it is clear that Parliament has elected to adopt a regulatory scheme that is "law", and amenable to enforcement through prerogative relief. The "guidelines" are not merely authorized by statute but must be formally enacted by "order" with the approval of the Governor in Council. That is in striking contrast with the usual internal ministerial policy guidelines intended for the control of public servants under the minister's authority.

The Guidelines Order, which requires the decision maker to take socio-economic considerations into account in the environmental impact assessment, does not go beyond what is authorized by the *Department of the Environment Act*. The concept of "environmental quality" in s. 6 of the Act is not confined to the biophysical environment alone. The environment is a diffuse subject matter and, subject to the constitutional imperatives, the potential consequences for a community's livelihood, health and other social matters from environ-

devant la Cour fédérale en avril 1989. La Section de première instance a rejeté les demandes. La Cour d'appel a infirmé le jugement, annulé l'approbation accordée en vertu de l'art. 5 de la *Loi sur la protection des eaux navigables* et ordonné aux ministres des Transports et des Pêches et des Océans de se conformer au Décret sur les lignes directrices. Le présent pourvoi soulève la validité constitutionnelle et législative du Décret sur les lignes directrices et porte sur la nature et l'applicabilité de celui-ci. Il soulève aussi la question de savoir si le juge des requêtes a bien exercé son pouvoir discrétionnaire dans sa décision de ne pas accorder le redressement demandé en raison du retard déraisonnable et de la futilité de la procédure.

Arrêt (le juge Stevenson est dissident): Le pourvoi est rejeté, sauf qu'il ne sera pas délivré de bref de la nature d'un *mandamus* ordonnant au ministre des Pêches et des Océans de se conformer au Décret sur les lignes directrices.

La validité législative du Décret sur les lignes directrices

Le Décret sur les lignes directrices a été validement adopté conformément à l'art. 6 de la *Loi sur le ministère de l'Environnement* et il est de nature impérative. Lorsqu'on examine l'art. 6 dans son ensemble, plutôt que seulement le terme «directives» en vase clos, on se rend compte que le législateur fédéral a opté pour l'adoption d'un mécanisme de réglementation auquel on est soumis «légalement» et dont on peut obtenir l'exécution par bref de prérogative. Les «directives» ne sont pas simplement autorisées par une loi, mais elles doivent être officiellement adoptées par «arrêté», sur approbation du gouverneur en conseil. Ce processus contraste vivement avec le processus habituel d'établissement de directives de politique interne ministérielle destinées à exercer un contrôle sur les fonctionnaires relevant de l'autorité du ministre.

Le Décret sur les lignes directrices, qui exige du décideur qu'il tienne compte de facteurs socio-économiques dans l'évaluation des répercussions environnementales, ne va pas au-delà de ce qui est autorisé par la *Loi sur le ministère de l'Environnement*. Le concept de la «qualité de l'environnement» prévu à l'art. 6 de la Loi ne se limite pas à l'environnement biophysique seulement. L'environnement est un sujet diffus et, sous réserve des impératifs constitutionnels, les conséquences éventuelles d'un changement environnemental sur le gagne-pain, la santé et les autres préoccupations sociales d'une collectivité font partie intégrante de la prise de décisions

1992 CanLII 110 (SCC)

mental change, are integral to decision making on matters affecting environmental quality.

The Guidelines Order is consistent with the *Navigable Waters Protection Act*. There is nothing in the Act which explicitly or implicitly precludes the Minister of Transport from taking into consideration any matters other than marine navigation in exercising his power of approval under s. 5 of the Act. The Minister's duty under the Order is supplemental to his responsibility under the *Navigable Waters Protection Act*, and he cannot resort to an excessively narrow interpretation of his existing statutory powers to avoid compliance with the Order. There is also no conflict between the requirement for an initial assessment "as early in the planning process as possible and before irrevocable decisions are taken" in s. 3 of the Guidelines Order, and the remedial power under s. 6(4) of the Act to grant approval after the commencement of construction. That power is an exception to the general rule in s. 5 of the Act requiring approval prior to construction, and in exercising his discretion to grant approval after commencement, the Minister is not precluded from applying the Order.

Applicability of the Guidelines Order

The scope of the Guidelines Order is not restricted to "new federal projects, programs and activities"; the Order is not engaged every time a project may have an environmental effect on an area of federal jurisdiction. However, there must first be a "proposal" which requires an "initiative, undertaking or activity for which the Government of Canada has a decision making responsibility". The proper construction to be placed on the term "responsibility" is that the federal government, having entered the field in a subject matter assigned to it under s. 91 of the *Constitution Act, 1867*, must have an affirmative regulatory duty pursuant to an Act of Parliament which relates to the proposed initiative, undertaking or activity. "Responsibility" within the definition of "proposal" means a legal duty or obligation and should not be read as connoting matters falling generally within federal jurisdiction. Once such a duty exists, it is a matter of identifying the "initiating department" assigned responsibility for its performance, for it then becomes the "decision making authority" for the proposal and

concernant des questions ayant une incidence sur la qualité de l'environnement.

Le Décret sur les lignes directrices est compatible avec la *Loi sur la protection des eaux navigables*. La Loi n'a pas pour effet d'empêcher explicitement ou implicitement le ministre des Transports de tenir compte de facteurs autres que ceux touchant la navigation dans l'exercice de son pouvoir d'approbation en vertu de l'art. 5 de la Loi. La fonction confiée au ministre en vertu du Décret vient s'ajouter à la responsabilité qu'il a en vertu de la *Loi sur la protection des eaux navigables*, et il ne peut invoquer une interprétation trop étroite des pouvoirs qui lui sont conférés par des lois pour éviter de se conformer au Décret. Il n'existe pas non plus de conflit entre, d'une part, le fait d'exiger, à l'art. 3 du Décret sur les lignes directrices, qu'un examen soit effectué «le plus tôt possible au cours de l'étape de planification et avant de prendre des décisions irrévocables» et, d'autre part, le pouvoir de redressement, prévu au par. 6(4) de la Loi, permettant au ministre d'accorder une approbation après le début des travaux. Ce pouvoir constitue une exception à la règle générale énoncée à l'art. 5 de la Loi selon laquelle il faut obtenir une approbation avant le début de la construction et, dans l'exercice de son pouvoir discrétionnaire d'accorder une approbation après le début des travaux, rien n'empêche le ministre d'appliquer le Décret.

L'applicabilité du Décret sur les lignes directrices

L'application du Décret sur les lignes directrices n'est pas restreinte aux «nouveaux projets, programmes et activités fédéraux»; le Décret ne reçoit pas application chaque fois qu'un projet peut comporter des répercussions environnementales sur un domaine de compétence fédérale. Il doit toutefois s'agir tout d'abord d'une «proposition» qui vise une «entreprise ou activité à l'égard de laquelle le gouvernement du Canada participe à la prise de décisions». L'interprétation qu'il faut donner à l'expression «participe à la prise de décisions» est que le gouvernement fédéral, se trouvant dans un domaine relevant de sa compétence en vertu de l'art. 91 de la *Loi constitutionnelle de 1867*, doit avoir une obligation positive de réglementation en vertu d'une loi fédérale relativement à l'entreprise ou à l'activité proposée. L'expression «participe à la prise de décisions» dans la définition du terme «proposition» signifie une obligation légale et ne devrait pas être interprétée comme ayant trait à des questions relevant généralement de la compétence fédérale. Si cette obligation existe, il s'agit alors de déterminer qui est le «ministère responsable» en la matière, puisque c'est ce ministère qui exerce le «pouvoir de

1992 CanLII 110 (SCC)

thus responsible for initiating the process under the Guidelines Order.

The Oldman River Dam project falls within the ambit of the Guidelines Order. The project qualifies as a proposal for which the Minister of Transport alone is the "initiating department" under s. 2 of the Order. The *Navigable Waters Protection Act*, in particular s. 5, places an affirmative regulatory duty on the Minister of Transport. Under that Act there is a legislatively entrenched regulatory scheme in place in which the approval of the Minister is required before any work that substantially interferes with navigation may be placed in, upon, over or under, through or across any navigable water.

The Guidelines Order does not apply to the Minister of Fisheries and Oceans, however, because there is no equivalent regulatory scheme under the *Fisheries Act* which is applicable to this project. The discretionary power to request or not to request information to assist a Minister in the exercise of a legislative function does not constitute a "decision making responsibility" within the meaning of the Order. The Minister of Fisheries and Oceans under s. 37 of the *Fisheries Act* has only been given a limited *ad hoc* legislative power which does not constitute an affirmative regulatory duty.

The scope of assessment under the Guidelines Order is not confined to the particular head of power under which the Government of Canada has a decision-making responsibility within the meaning of the term "proposal". Under the Order, the initiating department which has been given authority to embark on an assessment must consider the environmental effect on all areas of federal jurisdiction. The Minister of Transport, in his capacity of decision maker under the *Navigable Waters Protection Act*, must thus consider the environmental impact of the dam on such areas of federal jurisdiction as navigable waters, fisheries, Indians and Indian lands.

Crown Immunity

Per Lamer C.J. and La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin and Iacobucci JJ.: The Crown in right of Alberta is bound by the *Navigable Waters Protection Act* by necessary implication. The proprietary right the province may have in the bed of the Oldman River is subject to the public right of navigation, legislative jurisdiction over which has been exclusively vested in Parliament. Alberta requires statutory

décision» à l'égard de la proposition et qui doit donc entamer le processus d'évaluation visé par le Décret sur les lignes directrices.

Le projet de barrage sur la rivière Oldman est visé par le Décret sur les lignes directrices. Il peut être qualifié de proposition dont le ministre des Transports seul est le «ministère responsable» en vertu de l'art. 2 du Décret. La *Loi sur la protection des eaux navigables*, notamment son art. 5, impose une obligation positive de réglementation au ministre des Transports. Cette loi a mis en place un mécanisme de réglementation qui prévoit qu'il est nécessaire d'obtenir l'approbation du ministre avant qu'un ouvrage qui gêne sérieusement la navigation puisse être placé dans des eaux navigables ou sur, sous, au-dessus ou à travers de telles eaux.

Cependant, le Décret sur les lignes directrices ne s'applique pas au ministre des Pêches et des Océans, puisque la *Loi sur les pêches* ne renferme pas de disposition de réglementation équivalente qui serait applicable au projet. Le fait que le ministre possède le pouvoir discrétionnaire de demander des renseignements visant à l'aider dans l'exercice d'une fonction législative ne signifie pas qu'il «participe à la prise de décisions» au sens du Décret. Le ministre des Pêches et des Océans a, en vertu de l'art. 37 de la *Loi sur les pêches*, un pouvoir législatif spécial limité qui ne constitue pas une obligation positive de réglementation.

L'étendue de l'évaluation en vertu du Décret sur les lignes directrices n'est pas limitée au domaine particulier de compétence à l'égard duquel le gouvernement du Canada participe à la prise de décisions au sens du terme «proposition». En vertu du Décret, le ministère responsable qui a reçu le pouvoir de procéder à l'évaluation doit tenir compte des répercussions environnementales dans tous les domaines de compétence fédérale. Le ministre des Transports, à titre de décideur en vertu de la *Loi sur la protection des eaux navigables*, doit examiner les incidences environnementales du barrage sur les domaines de compétence fédérale, comme les eaux navigables, les pêcheries, les Indiens et les terres indiennes.

L'immunité de la Couronne

Le juge en chef Lamer et les juges La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin et Iacobucci: La Couronne du chef de l'Alberta est par déduction nécessaire liée par la *Loi sur la protection des eaux navigables*. Le droit de propriété que la province peut détenir sur le lit de la rivière Oldman est assujetti au droit public de navigation, sur lequel le Parlement exerce une compétence législative exclusive. L'Alberta

1992 CanLII 110 (SCC)

authorization from Parliament to erect any obstruction that substantially interferes with navigation in the Oldman River, and the *Navigable Waters Protection Act* is the means by which it must be obtained. The Crown in right of Alberta is bound by the Act, for it is the only practicable procedure available for getting approval. The purpose of the Act would be wholly frustrated if the province was not bound by the Act. The provinces are among the bodies that are likely to engage in projects that may interfere with navigation. Were the Crown in right of a province permitted to undermine the integrity of the essential navigational networks in Canadian waters, the legislative purpose of the *Navigable Waters Protection Act* would effectively be emasculated.

Per Stevenson J. (dissenting): The province of Alberta is not bound by the *Navigable Waters Protection Act*. The Crown is not bound by legislation unless it is mentioned or referred to in the legislation. Here, there are no words in the Act "expressly binding" the Crown and no clear intention to bind "is manifest from the very terms of the statute". As well, the failure to include the Crown would not wholly frustrate the purpose of the Act or produce an absurdity. There are many non-governmental agencies whose activities are subject to the Act and there is thus no emasculation of the Act. If the Crown interferes with a public right of navigation, that wrong is remediable by action. There is no significant benefit in approval under the Act. Tort actions may still lie.

Constitutional Validity of the Guidelines Order

The "environment" is not an independent matter of legislation under the *Constitution Act, 1867*. Understood in its generic sense, it encompasses the physical, economic and social environment and touches upon several of the heads of power assigned to the respective levels of government. While both levels may act in relation to the environment, the exercise of legislative power affecting environmental concerns must be linked to an appropriate head of power. Local projects will generally fall within provincial responsibility, but federal participation will be required if, as in this case, the project impinges on an area of federal jurisdiction.

The Guidelines Order is *intra vires* Parliament. The Order does not attempt to regulate the environmental effects of matters within the control of the province but

doit obtenir l'autorisation législative du Parlement pour construire un ouvrage qui entraverait sérieusement la navigation dans la rivière Oldman; la *Loi sur la protection des eaux navigables* est le mécanisme qu'elle doit utiliser à cette fin. La Couronne du chef de l'Alberta est liée par la Loi, car il s'agit là du seul moyen pratique d'obtenir l'approbation requise. Par ailleurs, si la province n'était pas liée par la Loi, celle-ci serait privée de toute efficacité. Les provinces font partie des organismes susceptibles de participer à des projets qui peuvent obstruer la navigation. Si la Couronne du chef d'une province était habilitée à saper l'intégrité des réseaux essentiels de navigation dans les eaux canadiennes, l'objet de la *Loi sur la protection des eaux navigables* serait, en fait, annihilé.

Le juge Stevenson (dissident): La province d'Alberta n'est pas liée par la *Loi sur la protection des eaux navigables*. Nul texte législatif ne lie la Couronne, sauf dans la mesure qui y est mentionnée ou prévue. En l'espèce, la Loi ne renferme pas de termes qui «lient expressément» la Couronne et il n'existe pas d'intention claire de la lier qui «ressort du texte même de la loi». En outre, le fait que la Couronne ne soit pas liée ne priverait pas la Loi de toute efficacité ni ne donnerait lieu à une absurdité. Il existe de nombreux organismes non gouvernementaux dont les activités sont régies par la Loi et l'objet de la Loi n'est donc pas annihilé. Si la Couronne porte atteinte à un droit public de navigation, il est possible de la poursuivre en justice. Il n'y a pas d'avantage important lié à l'approbation en vertu de la Loi. Il peut toujours y avoir ouverture à responsabilité civile.

La validité constitutionnelle du Décret sur les lignes directrices

L'«environnement» n'est pas un domaine distinct de compétence législative en vertu de la *Loi constitutionnelle de 1867*. Dans son sens générique, il englobe l'environnement physique, économique et social touchant plusieurs domaines de compétence attribués aux deux paliers de gouvernement. Bien que les deux paliers puissent œuvrer dans le domaine de l'environnement, l'exercice d'une compétence législative, dans la mesure où elle se rapporte à l'environnement, doit se rattacher au domaine de compétence approprié. Les projets de nature locale relèvent généralement de la compétence provinciale, mais ils peuvent exiger la participation du fédéral dans le cas où ils empiètent sur un domaine de compétence fédérale comme en l'espèce.

Le Décret sur les lignes directrices est *intra vires* du Parlement. Il ne tente pas de réglementer les répercussions environnementales de matières qui relèvent de la

1992 CanLII 110 (SCC)

merely makes environmental impact assessment an essential component of federal decision making. The Order is in pith and substance nothing more than an instrument that regulates the manner in which federal institutions must administer their multifarious duties and functions. In essence, the Order has two fundamental aspects. First, there is the substance of the Order dealing with environmental impact assessment to facilitate decision making under the federal head of power through which a proposal is regulated. This aspect of the Order can be sustained on the basis that it is legislation in relation to the relevant subject matters enumerated in s. 91 of the *Constitution Act, 1867*. The second aspect of the Order is its procedural or organizational element that coordinates the process of assessment, which can in any given case touch upon several areas of federal responsibility, under the auspices of a designated decision maker (the "initiating department"). This facet of the Order has as its object the regulation of the institutions and agencies of the Government of Canada as to the manner in which they perform their administrative functions and duties. This is unquestionably *intra vires* Parliament. It may be viewed either as an adjunct of the particular legislative powers involved, or, in any event, be justifiable under the residuary power in s. 91.

The Guidelines Order cannot be used as a colourable device to invade areas of provincial jurisdiction which are unconnected to the relevant heads of federal power. The "initiating department" is only given a mandate to examine matters directly related to the areas of federal responsibility potentially affected. Any intrusion under the Order into provincial matters is merely incidental to the pith and substance of the legislation.

Discretion

Per Lamer C.J. and La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin and Iacobucci JJ.: The Federal Court of Appeal did not err in interfering with the motions judge's discretion not to grant the remedies sought on the grounds of unreasonable delay and futility. Respondent made a sustained effort, through legal proceedings in the Alberta courts and through correspondence with federal departments, to challenge the legality of the process followed by the province to build the dam and the acquiescence of the appellant Ministers, and there is no evidence that Alberta has suffered any prejudice from any delay in taking the present action. Despite ongoing legal proceedings, the construction of the dam continued. The province was not prepared to

compétence de la province, mais fait simplement de l'évaluation des incidences environnementales un élément essentiel de la prise de décisions fédérales. De par son caractère véritable, le Décret n'est rien de plus qu'un instrument qui régit la façon dont les institutions fédérales doivent gérer leurs diverses fonctions. Essentiellement, le Décret comporte deux aspects fondamentaux. Il y a tout d'abord l'aspect de fond qui porte sur l'évaluation des incidences environnementales, dont l'objet est de faciliter la prise de décisions dans le domaine de compétence fédérale qui régit une proposition. Cet aspect du Décret peut être maintenu au motif qu'il s'agit d'un texte législatif se rapportant aux matières pertinentes énumérées à l'art. 91 de la *Loi constitutionnelle de 1867*. Le deuxième aspect est l'élément procédural ou organisationnel coordonnant le processus d'évaluation, qui peut dans un cas donné toucher plusieurs domaines de compétence fédérale, relevant d'un décideur désigné (le «ministère responsable»). Cette facette vise à réglementer la façon dont les institutions et organismes du gouvernement du Canada exercent leurs fonctions et responsabilités administratives. Cela est indiscutablement *intra vires* du Parlement. Cet aspect peut être considéré comme un pouvoir accessoire de la compétence législative en cause, ou de toute façon, être justifié en vertu du pouvoir résiduel prévu à l'art. 91.

Le Décret sur les lignes directrices ne peut être utilisé comme moyen déguisé d'envahir des champs de compétence provinciale qui ne se rapportent pas aux domaines de compétence fédérale concernés. Le «ministère responsable» n'a que le mandat d'examiner les questions se rapportant directement aux domaines de compétence fédérale concernés. Toute ingérence dans la sphère de compétence provinciale est simplement accessoire au caractère véritable du texte législatif.

Le pouvoir discrétionnaire

Le juge en chef Lamer et les juges La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin et Iacobucci: La Cour d'appel fédérale n'a pas commis d'erreur en modifiant la décision du juge des requêtes, prise dans l'exercice de son pouvoir discrétionnaire, de ne pas accorder la réparation sollicitée en raison du retard déraisonnable et de la futilité de la procédure. L'intimée s'est efforcée d'une façon soutenue de contester, dans le cadre des poursuites judiciaires devant les tribunaux de l'Alberta et dans les lettres envoyées aux ministères fédéraux, d'une part, la légalité des mesures prises par l'Alberta relativement à la construction du barrage, et d'autre part, l'acquiescement des ministres appelants; il n'existe pas de preuve que l'Alberta a subi

1992 CanLII 110 (SCC)

accede to an environmental impact assessment under the Order until it had exhausted all legal avenues. The motions judge did not weigh these considerations adequately, giving the Court of Appeal no choice but to intervene. Futility was also not a proper ground to refuse a remedy in the present circumstances. Prerogative relief should only be refused on that ground in those few instances where the issuance of a prerogative writ would be effectively nugatory. It is not obvious in this case that the implementation of the Order even at this late stage will not have some influence over the mitigative measures that may be taken to ameliorate any deleterious environmental impact from the dam on an area of federal jurisdiction.

Per Stevenson J. (dissenting): The Federal Court of Appeal erred in interfering with the motions judge's discretion to refuse the prerogative remedy. The court was clearly wrong in overruling his conclusion on the question of delay. The common law has always imposed a duty on an applicant to act promptly in seeking prerogative relief. Given the enormity of the project and the interests at stake, it was unreasonable for the respondent Society to wait 14 months before challenging the Minister of Transport's approval. It is impossible to conclude that Alberta was not prejudiced by the delay. The legal proceedings in the Alberta courts brought by the respondent and others need not have been taken into account by the motions judge. These proceedings were separate and distinct from the relief sought in this case and were irrelevant to the issues at hand. The present action centres on the constitutionality and applicability of the Guidelines Order. It raises new and different issues. In determining whether he should exercise his discretion against the respondent, the motions judge was obliged to look only at those factors which he considered were directly connected to the application before him. Interference with his exercise of discretion is not warranted unless it can be said with certainty that he was wrong in doing what he did. The test has not been met in this case.

Costs

Per Lamer C.J. and La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin and Iacobucci JJ.: 603

un préjudice quelconque en raison d'un retard à intenter la présente action. Malgré les contestations judiciaires en cours, la construction du barrage s'est poursuivie. La province n'était pas disposée à consentir à une évaluation des incidences environnementales en vertu du Décret avant l'épuisement de tous les recours légaux. Le juge des requêtes n'a pas suffisamment accordé d'importance à ces considérations, ne laissant à la Cour d'appel d'autre choix que d'intervenir. Le motif de la futilité de la procédure ne pouvait justifier un refus dans les circonstances. On ne devrait refuser la délivrance d'un bref de prérogative pour ce motif que dans les rares cas où sa délivrance serait vraiment inefficace. En l'espèce, il n'est pas évident que l'application du Décret, même à cette étape tardive, n'aura pas un certain effet sur les mesures susceptibles d'être prises pour atténuer toute incidence environnementale néfaste que pourrait avoir le barrage sur un domaine de compétence fédérale.

Le juge Stevenson (dissident): La Cour d'appel fédérale a commis une erreur en modifiant la décision du juge des requêtes, prise dans l'exercice de son pouvoir discrétionnaire, de ne pas accorder une réparation par voie de bref de prérogative. La cour a clairement commis une erreur en rejetant sa conclusion relativement à la question du retard. La common law a toujours exigé du requérant qu'il agisse avec diligence lorsqu'il sollicite un bref de prérogative. Compte tenu de l'envergure du projet et des intérêts en jeu, il n'était pas raisonnable que la Société intimée attende 14 mois avant de contester l'approbation du ministre des Transports. Il est impossible de conclure que l'Alberta n'a pas subi un préjudice en raison du retard. Le juge des requêtes n'avait pas à tenir compte des procédures judiciaires que l'intimée et d'autres parties avaient entamées devant les tribunaux de l'Alberta. Ces procédures constituaient des recours distincts et différents du redressement sollicité en l'espèce et n'étaient pas pertinentes quant aux questions en litige. La présente action porte sur la constitutionnalité et l'applicabilité du Décret sur les lignes directrices. Il soulève des questions nouvelles et différentes. Pour déterminer s'il devait exercer son pouvoir discrétionnaire contre l'intimée, le juge des requêtes devait examiner seulement les facteurs qui, selon lui, se rattachaient directement à la demande dont il était saisi. On n'est pas justifié de modifier la décision qu'il a prise dans l'exercice de son pouvoir discrétionnaire, sauf si l'on peut affirmer avec certitude qu'il a eu tort de procéder ainsi. L'on n'a pas répondu au critère en l'espèce.

Les dépens

Le juge en chef Lamer et les juges La Forest, L'Heureux-Dubé, Sopinka, Gonthier, Cory, McLachlin

1992 CanLII 110 (SCC)

It is a proper case for awarding costs on a solicitor-client basis to the respondent, given the Society's circumstances and the fact that the federal Ministers were joined as appellants even though they did not earlier seek leave to appeal to this Court.

Per Stevenson J. (dissenting): The appellants should not be called upon to pay costs on a solicitor and client basis. There is no justification in departing from our own general rule that a successful party should recover costs on the usual party and party basis. Public interest groups must be prepared to abide by the same principles as apply to other litigants and be prepared to accept some responsibility for the costs.

et Iacobucci: Il s'agit d'un cas où il est approprié d'accorder les dépens comme entre procureur et client à la Société intimée, compte tenu de la situation de cette dernière et du fait que les ministères fédéraux ont été joints comme appelants même s'ils n'avaient pas auparavant présenté une demande d'autorisation de pourvoi à notre Cour.

Le juge Stevenson (dissident): Les appelants ne devraient pas être contraints de payer les dépens comme entre procureur et client. Il n'y a pas de raison de déroger à notre règle générale que la partie qui a gain de cause a droit aux dépens sur la base des frais entre parties. Les groupes d'intérêt public doivent être disposés à se plier aux mêmes principes que les autres plaideurs et accepter une certaine responsabilité quant aux dépens.

JUDGMENT AND REASONS

health care is not provided appropriately in some instances. But the case before this Court does not reveal any such failure, and it is far from clear how the rates of pay decreased by the October 2013 amendments could affect health care delivery. No systemic failure has been proven. At best, the record shows that one of the applicants complained of having to purchase certain painkillers even though some are prescribed to him, of having to cover the cost of a mouth guard suggested by the institutional dentist but deemed non-essential, and that his losing weight (3.3 kg) resulted in him needing to purchase new clothing outside the replacement periods. Lastly, I note exhibit Z-1, filed with consent, entitled "National Essential Health Services Framework". This document, produced by CSC in July 2015, provides a long list of which healthcare services, medical equipment and supplies, and dental service standards are approved or not.

2018 FC 94 (CanLII)

IV. Analysis

[33] Two comments must be made before we examine the applicants' legal arguments.

[34] First, this Court is not sitting to consider the wisdom of the policy decisions made by the government. Case in point, the system implemented by the government at the time in 1981 seems more generous to inmates in penitentiaries. It also follows a different philosophy. As it explicitly states, the document "Inmate Pay System" submitted as evidence, while not forgetting those in education and vocational programs, aims to "provide inmates with pay according to their job. Under this plan those inmates who participate in assigned employment including education and training, agriculture, institutional services, industrial production, and other recognized employment assignments, will receive a rate of pay designed to recognize their contribution".

The plan was to compile a list of all jobs and their descriptions and to assign pay rates to each one. The evidence does not indicate the extent to which this policy was implemented in the years that followed. However, what we do know is that Parliament adopted subsection 78(1) of the *Corrections and Conditional Release Act* in 1992 (SC 1992, c 20), establishing a correspondence between payment and participation in CSC programs and social reintegration programs. It was not a question of compensation for work performed, as was the case in 1981. This subsection still reads the same today:

Payments to offenders	**Rétribution**
78 (1) For the purpose of	**78 (1)** Le commissaire peut autoriser la rétribution des délinquants, aux taux approuvés par le Conseil du Trésor, afin d'encourager leur participation aux programmes offerts par le Service ou de leur procurer une aide financière pour favoriser leur réinsertion sociale.
(a) encouraging offenders to participate in programs provided by the Service, or	
(b) providing financial assistance to offenders to facilitate their reintegration into the community,	
the Commissioner may authorize payments to offenders at rates approved by the Treasury Board.	

This is a policy decision, meaning this Court can intervene only if it violates the Constitution. We seem to have moved from payment for work performed to payment for participation in

2018 FC 94 (CanLII)

programs promoting social reintegration; this is Parliament's decision and is not in dispute before this Court.

[35] Second, the Court is required to consider the parties' legal arguments based on the evidence in the record. It is possible that, in a particular case, the government is not fulfilling its duties under the Act. As the Attorney General concedes, the ad-hoc decision is reviewable (for example, *Charbonneau v Canada (Attorney General),* 2013 FC 687). In this case, the applicants, collectively, are challenging a lot more. The remedies sought are not so much the result of the application of certain measures in a given case under specific circumstances as they are a direct attack on the system put in place in 2013.

[36] Thus, the applicants are not arguing the unconstitutionality of section 78 in its current form, in place since 1995. Subsection 78(1) has already been reproduced, and was enacted in 1992. Originally, subsection 78(2) already allowed for deductions from payments. In 1992, it read as follows:

(2) Payments provided for pursuant to subsection (1) may be subject to deductions in accordance with any regulations made under paragraph 96(*z*.2) and any Commissioner's Directives.	**(2)** La rétribution autorisée peut faire l'objet de retenues en conformité avec les règlements d'application de l'alinéa 96*z*.2) ou les directives du commissaire.

The wording of subsection 78(2) was amended in 1995 (S.C. c. 42, s. 20) to prescribe the purposes for which deductions may be made and the maximum amount that may be deducted. Where payment is made—which suggests, of course, that Parliament is considering the possibility that no payment has been made—the Act has provided for more than 20 years that

2011 SCC 42

File Nos.: 33559, 33563.

2011: February 24; 2011: July 29.

Present: McLachlin C.J. and Binnie, LeBel, Deschamps, Fish, Abella, Charron, Rothstein and Cromwell JJ.

ON APPEAL FROM THE COURT OF APPEAL FOR BRITISH COLUMBIA

Civil procedure — Third-party claims — Motion to strike — Tobacco manufacturers being sued by provincial government to recover health care costs of tobacco-related illnesses, and by consumers of "light" or "mild" cigarettes for damages and punitive damages — Tobacco companies issuing third-party notices to federal government claiming contribution and indemnity — Whether plain and obvious that third-party claims disclose no reasonable cause of action.

Torts — Negligent misrepresentation — Failure to warn — Negligent design — Duty of care — Proximity — Tobacco manufacturers being sued by provincial government and consumers and issuing third-party notices to federal government claiming contribution and indemnity — Federal government claiming representations constituted government policy immune from judicial review — Whether facts as pleaded establish prima facie duty of care — If so, whether conflicting policy considerations negate such duty.

Torts — Provincial statutory scheme establishing rights of action against tobacco manufacturers and suppliers — Whether federal government liable as a "manufacturer" under the Tobacco Damages and Health Care Costs Recovery Act, S.B.C. 2000, c. 30, or a "supplier" under the Business Practices and Consumer Protection Act, S.B.C. 2004, c. 2, and the Trade Practice Act, R.S.B.C. 1996, c. 457.

The appeal concerns two cases before the courts in British Columbia. In the *Costs Recovery* case, the

EN APPEL DE LA COUR D'APPEL DE LA COLOMBIE-BRITANNIQUE

Procédure civile — Mise en cause — Requête en radiation — Fabricants de tabac poursuivis par le gouvernement d'une province qui cherche à recouvrer les sommes consacrées au traitement des maladies liées au tabagisme, et par des consommateurs de cigarettes dites « légères » ou « douces » qui demandent des dommages-intérêts et des dommages-intérêts punitifs — Compagnies de tabac mettant en cause le gouvernement fédéral pour lui réclamer une contribution et une indemnisation — Est-il évident et manifeste que les avis de mise en cause ne révèlent aucune cause d'action raisonnable?

Responsabilité délictuelle — Déclaration inexacte faite par négligence — Défaut de mise en garde — Conception négligente — Obligation de diligence — Lien de proximité — Poursuites engagées par le gouvernement d'une province et des consommateurs contre des fabricants de tabac qui ont mis en cause le gouvernement fédéral pour lui réclamer une contribution et une indemnisation — Gouvernement fédéral prétendant que les déclarations relevaient de la politique générale du gouvernement et étaient de ce fait soustraites au contrôle judiciaire — Les faits allégués établissent-ils l'existence d'une obligation de diligence prima facie? — Dans l'affirmative, des considérations de politique générale opposées écartent-elles cette obligation?

Responsabilité délictuelle — Régime législatif provincial conférant un droit d'action contre les fabricants et les fournisseurs de tabac — Le gouvernement fédéral a-t-il engagé sa responsabilité à titre de « fabricant » au sens de la Tobacco Damages and Health Care Costs Recovery Act, S.B.C. 2000, ch. 30, ou de « fournisseur » au sens de la Business Practices and Consumer Protection Act, S.B.C. 2004, ch. 2, et de la Trade Practice Act, R.S.B.C. 1996, ch. 457?

Le pourvoi porte sur deux actions intentées devant les tribunaux de la Colombie-Britannique. Dans l'*Affaire du*

Government of British Columbia is seeking to recover, pursuant to the *Tobacco Damages and Health Care Costs Recovery Act* ("*CRA*"), the cost of paying for the medical treatment of individuals suffering from tobacco-related illnesses from a group of tobacco companies, including Imperial. British Columbia alleges that by 1950, the tobacco companies knew or ought to have known that cigarettes were harmful to one's health, and that they failed to properly warn the public about the risks associated with smoking their product. In the *Knight* case, a class action was brought against Imperial alone on behalf of class members who purchased "light" or "mild" cigarettes, seeking a refund of the cost of the cigarettes and punitive damages. The class alleges that the levels of tar and nicotine listed on Imperial's packages for light and mild cigarettes did not reflect the actual deliveries of toxic emissions to smokers, and alleges that the smoke produced by light cigarettes was just as harmful as that produced by regular cigarettes.

In both cases, the tobacco companies issued third-party notices to the Government of Canada, alleging that if the tobacco companies are held liable to the plaintiffs, they are entitled to compensation from Canada for negligent misrepresentation, negligent design and failure to warn, as well as at equity. They also allege that Canada would itself be liable as a "manufacturer" under the *CRA* or a "supplier" under the *Business Practices and Consumer Protection Act* and the *Trade Practice Act*, and that they are entitled to contribution and indemnity from Canada pursuant to the *Negligence Act*. Canada brought motions to strike the third-party notices, arguing that it was plain and obvious that the third-party claims failed to disclose a reasonable cause of action. In both cases, the chambers judges struck all of the third-party notices. The British Columbia Court of Appeal allowed the tobacco companies' appeals in part. A majority held that the negligent misrepresentation claims arising from Canada's alleged duty of care to the tobacco companies in both the *Costs Recovery* case and the *Knight* case should proceed to trial. A majority in the *Knight* case further held that the negligent misrepresentation claim based on Canada's alleged duty of care to consumers should proceed, as should the negligent design claim. The court unanimously struck the remainder of the tobacco companies' claims.

recouvrement des coûts, le gouvernement de la Colombie-Britannique cherche, aux termes de la *Tobacco Damages and Health Care Costs Recovery Act* (« *CRA* »), à recouvrer d'un groupe de compagnies de tabac, dont Imperial, les sommes consacrées au traitement médical de personnes souffrant de maladies liées au tabagisme. Selon la Colombie-Britannique, dès 1950, les compagnies de tabac savaient ou auraient dû savoir que les cigarettes étaient néfastes pour la santé et ont fait défaut de mettre le public en garde adéquatement contre les risques associés à l'usage de leur produit. Dans l'affaire *Knight*, un recours collectif a été intenté contre Imperial seulement, pour demander, au nom des membres qui ont acheté des cigarettes dites « légères » ou « douces », le remboursement du coût des cigarettes ainsi que le versement de dommages-intérêts punitifs. Selon eux, la teneur en goudron et en nicotine indiquée sur les paquets de cigarettes fabriquées par Imperial ne correspondait pas aux émissions toxiques réelles pour les fumeurs. Ils font valoir que la fumée dégagée par les cigarettes légères était tout aussi néfaste que celle dégagée par les cigarettes régulières.

Dans les deux affaires, les compagnies de tabac ont mis en cause le gouvernement du Canada, prétendant que, si elles étaient tenues responsables envers les demandeurs, elles avaient le droit d'être indemnisées par le Canada pour déclarations inexactes faites par négligence, conception négligente et défaut de mise en garde; ainsi qu'en vertu de l'equity. Elles font également valoir que le Canada aurait engagé sa propre responsabilité à titre de « fabricant » au sens de la *CRA* ou à titre de « fournisseur » au sens de la *Business Practices and Consumer Protection Act* et de la *Trade Practice Act*, et qu'elles sont en droit d'obtenir du Canada une contribution et une indemnisation en vertu de la *Negligence Act*. Le Canada a présenté des requêtes en radiation des avis de mise en cause, faisant valoir qu'il était évident et manifeste que ces avis ne révélaient aucune cause d'action raisonnable. Dans les deux affaires, les juges siégeant en cabinet ont ordonné la radiation de tous les avis de mise en cause. La Cour d'appel de la Colombie-Britannique a accueilli en partie les appels interjetés par les compagnies de tabac. Les juges majoritaires ont conclu à l'opportunité d'instruire, dans l'*Affaire du recouvrement des coûts* et dans l'affaire *Knight*, les demandes relatives aux déclarations inexactes faites par négligence en violation d'une prétendue obligation de diligence du Canada envers les compagnies de tabac. Dans l'affaire *Knight*, les juges majoritaires ont conclu en outre à l'opportunité d'instruire la demande relative aux déclarations inexactes faites par négligence fondée sur une prétendue obligation de diligence du Canada envers les consommateurs, ainsi que la demande relative à la conception négligente. La cour a radié à l'unanimité les autres demandes présentées par les compagnies de tabac.

Held: The appeals should be allowed and the claims should be struck out. The tobacco companies' cross-appeals should be dismissed.

On a motion to strike, a claim will only be struck if it is plain and obvious, assuming the facts pleaded to be true, that the pleading discloses no reasonable cause of action. The approach must be generous, and err on the side of permitting a novel but arguable claim to proceed to trial. However, the judge cannot consider what evidence adduced in the future might or might not show. Here, it is plain and obvious that none of the tobacco companies' claims against Canada have a reasonable chance of success.

Canada's Alleged Duties of Care to Smokers in the Costs Recovery Case

In the *Costs Recovery* case, the private law claims against Canada for contribution and indemnity based on alleged breaches of a duty of care to smokers must be struck. A third party may only be liable for contribution under the *Negligence Act* if it is directly liable to the plaintiff, in this case, British Columbia. Here, even if Canada breached duties to smokers, this would have no effect on whether it was liable to British Columbia.

The Claims for Negligent Misrepresentation

There are two relationships at issue in these claims: one between Canada and consumers and one between Canada and tobacco companies. In the *Knight* case, Imperial alleges that Canada negligently represented the health attributes of low-tar cigarettes to consumers. In both the *Knight* case and the *Costs Recovery* case, the tobacco companies allege that Canada made negligent misrepresentations to the tobacco companies.

The facts as pleaded do not bring Canada's relationship with consumers and the tobacco companies within a settled category of negligent misrepresentation. Accordingly, to determine whether the alleged causes of action have a reasonable prospect of success, the general requirements for liability in tort must be met. At

Arrêt : Les pourvois sont accueillis et les demandes sont radiées. Les pourvois incidents interjetés par les compagnies de tabac sont rejetés.

Dans le cas d'une requête en radiation, une demande ne sera radiée que s'il est évident et manifeste, dans l'hypothèse où les faits allégués seraient avérés, que la déclaration ne révèle aucune cause d'action raisonnable. L'approche doit être généreuse et permettre, dans la mesure du possible, l'instruction de toute demande inédite, mais soutenable. Cependant, le juge ne peut pas anticiper ce que la preuve qui sera produite permettra d'établir. En l'espèce, il est évident et manifeste qu'aucune des allégations des compagnies de tabac visant le Canada n'a une possibilité raisonnable d'être accueillie.

Les prétendues obligations de diligence du Canada envers les fumeurs dans l'Affaire du recouvrement des coûts

Dans l'*Affaire du recouvrement des coûts*, les demandes de contribution et d'indemnisation de droit privé dirigées contre le Canada et fondées sur des manquements allégués à une obligation de diligence envers les fumeurs doivent être radiées. Un tiers ne peut être tenu de verser une contribution en vertu de la *Negligence Act* que s'il est directement responsable envers le demandeur, en l'occurrence la Colombie-Britannique. En l'espèce, même si le Canada a manqué à ses obligations envers les fumeurs, ce manquement n'aurait aucune incidence sur la question de savoir s'il est responsable envers la Colombie-Britannique.

Les allégations de déclarations inexactes faites par négligence

Les allégations en l'espèce mettent en cause deux liens : celui entre le Canada et les consommateurs, et celui entre le Canada et les compagnies de tabac. Dans l'affaire *Knight*, Imperial prétend que le Canada a fait preuve de négligence en déclarant faussement aux fumeurs que la cigarette à teneur réduite en goudron serait moins nocive pour la santé. Dans l'affaire *Knight* et l'*Affaire du recouvrement des coûts*, les compagnies de tabac prétendent que le Canada leur a fait des déclarations inexactes par négligence.

Les faits allégués ne font pas entrer la relation du Canada avec les consommateurs et les compagnies de tabac dans une catégorie définie en matière de déclarations inexactes faites par négligence. Par conséquent, afin de déterminer si les causes d'action alléguées ont une possibilité raisonnable d'être accueillies, il faut que

the first stage, the question is whether the facts disclose a relationship of proximity in which failure to take reasonable care might foreseeably cause loss or harm to the plaintiff. In a claim of negligent misrepresentation, both of these requirements for a *prima facie* duty of care are established if there was a "special relationship" between the parties. A special relationship will be established where: (1) the defendant ought reasonably to foresee that the plaintiff will rely on his or her representation; and (2) reliance by the plaintiff would be reasonable in the circumstances of the case. If proximity is established, a *prima facie* duty of care arises and the analysis proceeds to the second stage, which asks whether there are policy reasons why this *prima facie* duty of care should not be recognized.

Here, on the facts as pleaded, Canada did not owe a *prima facie* duty of care to consumers. The relationship between the two was limited to Canada's statements to the general public that low-tar cigarettes are less hazardous. There were no specific interactions between Canada and the class members. Consequently, a finding of proximity in this relationship must arise from the governing statutes. However, the relevant statutes establish only general duties to the public, and no private law duties to consumers. In light of the lack of proximity, this claim in the *Knight* case should be struck at the first stage of the analysis.

As for the tobacco companies, the facts pleaded allege a history of interactions between Canada and the tobacco companies capable of establishing a special relationship of proximity giving rise to a *prima facie* duty of care. The allegations are that Canada assumed the role of adviser to a finite number of manufacturers and that there were commercial relationships entered into between Canada and the companies based in part on the advice given to the companies by government officials, going far beyond the sort of statements made by Canada to the public at large. Furthermore, Canada's regulatory powers over the manufacturers coupled with its specific advice and its commercial involvement could be seen as supporting a conclusion that Canada ought reasonably to have foreseen that the tobacco companies would rely on the representations and that such reliance would be reasonable in the pleaded circumstance.

les exigences générales en matière de responsabilité délictuelle soient remplies. À la première étape, il faut se demander si les faits révèlent l'existence d'un lien de proximité dans le cadre duquel l'omission de faire preuve de diligence raisonnable peut, de façon prévisible, causer une perte ou un préjudice au plaignant. Dans le cadre d'une action pour déclaration inexacte faite par négligence, ces deux conditions pour qu'il existe une obligation de diligence *prima facie* sont remplies lorsqu'un « lien spécial » unit les parties. L'existence d'un lien spécial est établie lorsque : (1) le défendeur doit raisonnablement prévoir que le demandeur se fiera à sa déclaration; et que (2) la confiance que le demandeur accorde à la déclaration serait raisonnable dans les circonstances. Si l'existence d'un lien de proximité est établie, il y a obligation de diligence *prima facie* et l'analyse passe à l'étape suivante dans laquelle on se demande si des considérations de politique empêcheraient de reconnaître cette obligation de diligence *prima facie*.

Compte tenu des faits allégués, le Canada n'avait pas d'obligation de ce genre envers les consommateurs. Le lien entre eux se limitait aux déclarations du Canada adressées au grand public selon lesquelles les cigarettes à faible teneur en goudron sont moins dangereuses pour la santé. Le Canada n'entretenait pas de rapports spéciaux avec les membres du groupe. Par conséquent, le constat qu'il s'agit d'un lien suffisamment étroit doit découler des lois applicables. Les lois pertinentes n'établissent toutefois que des obligations générales envers le public, et aucune obligation de nature privée envers les consommateurs. Vu l'absence de lien de proximité, il convient de radier cette allégation dans l'affaire *Knight* à la première étape de l'analyse.

En ce qui concerne les compagnies de tabac, les faits allégués révèlent que le Canada et les compagnies de tabac entretiennent depuis longtemps des rapports qui peuvent constituer un lien spécial imposant une obligation de diligence *prima facie*. On allègue que le Canada a joué un rôle de conseiller auprès d'un nombre déterminé de fabricants et a entretenu des rapports commerciaux avec les sociétés en cause compte tenu, en partie, des avis fournis à ces dernières par des fonctionnaires, avis qui vont bien au-delà des déclarations faites par le Canada au grand public. De plus, les pouvoirs de réglementation du Canada envers les fabricants, conjugués aux avis précis qu'il a donnés et à sa participation à des activités commerciales, pourraient être considérés comme étayant la conclusion que le Canada aurait raisonnablement dû prévoir que les compagnies de tabac se fieraient aux déclarations et que cette confiance serait raisonnable dans les circonstances alléguées.

Canada's alleged negligent misrepresentations do not give rise to tort liability, however, because of conflicting policy considerations. The alleged representations constitute protected expressions of government policy. Core government policy decisions protected from suit are decisions as to a course or principle of action that are based on public policy considerations, such as economic, social and political factors, provided they are neither irrational nor taken in bad faith. The representations in this case were part and parcel of a government policy, adopted at the highest level in the Canadian government and developed out of concern for the health of Canadians and the individual and institutional costs associated with tobacco-related disease, to encourage people who continued to smoke to switch to low-tar cigarettes.

Les déclarations inexactes que le Canada aurait faites par négligence n'engagent toutefois pas sa responsabilité délictuelle parce que des considérations de politique générale s'y opposent. Les déclarations qui auraient été faites sont des expressions protégées de politique générale du gouvernement. Les décisions de politique générale fondamentale du gouvernement qui sont soustraites aux poursuites sont les décisions qui se rapportent à une ligne de conduite et reposent sur des considérations d'intérêt public, tels des facteurs économiques, sociaux ou politiques, pourvu qu'elles ne soient ni irrationnelles ni prises de mauvaise foi. Les déclarations en cause faisaient partie intégrante d'une politique générale adoptée par les plus hautes instances du gouvernement canadien et élaborée par souci pour la santé des Canadiens et des Canadiennes et en raison des coûts individuels et institutionnels associés aux maladies causées par le tabac, afin d'inciter les personnes qui continuaient de fumer à opter pour des cigarettes à faible teneur en goudron.

The claims for negligent misrepresentation should also fail because they would expose Canada to indeterminate liability. Recognizing a duty of care for representations to the tobacco companies would effectively amount to a duty to consumers. While the quantum of damages owed by Canada to the companies in both cases would depend on the number of smokers and the number of cigarettes sold, Canada had no control over the number of people who smoked light cigarettes.

Les allégations de déclarations inexactes faites par négligence doivent aussi être rejetées parce qu'elles exposeraient le Canada à une responsabilité indéterminée. Reconnaître une obligation de diligence à l'égard des déclarations faites aux compagnies de tabac reviendrait en fait à reconnaître une obligation envers les consommateurs. Le montant des dommages-intérêts dus par le Canada aux compagnies de tabac dans les deux cas dépendrait du nombre de fumeurs et du nombre de cigarettes vendues, alors que le Canada n'exerçait aucun contrôle sur le nombre de fumeurs de cigarettes légères.

The Claims for Failure to Warn

The tobacco companies make two allegations for failure to warn: (1) that Canada directed the tobacco companies not to provide warnings on cigarette packages about the health hazards of cigarettes and (2) that Canada failed to warn the tobacco companies about the dangers posed by the strains of tobacco it designed and licensed. These two claims should be struck. The crux of the first claim is essentially the same as the negligent misrepresentation claim, and should be rejected for the same policy reasons. The Minister of Health's recommendations on warning labels were integral to the government's policy of encouraging smokers to switch to low-tar cigarettes. As such, they cannot ground a claim in failure to warn. The same is true of the second claim. While the tort of failure to warn requires evidence of a positive duty towards the plaintiff, nothing in the third-party notices suggests that Canada was under such a positive duty here. A plea of negligence, without more, will not suffice to raise a duty to warn. In any event,

Les allégations de défaut de mise en garde

Les compagnies de tabac formulent deux allégations de défaut de mise en garde : (1) le Canada a interdit aux compagnies de tabac d'apposer sur les paquets de cigarettes des mises en garde à l'égard des dangers que présentent les cigarettes pour la santé et (2) le Canada n'a pas avisé les compagnies de tabac des dangers que présentent les souches de tabac conçues par le Canada et pour lesquelles il a octroyé des licences. Il faut radier ces allégations. L'élément crucial de la première allégation est essentiellement le même que celui des allégations de déclarations inexactes faites par négligence, et il y a lieu de la rejeter pour les mêmes considérations de politique générale. Les recommandations du ministre de la Santé sur les mises en garde faisaient partie intégrante de la politique générale du gouvernement visant à inciter les fumeurs à opter pour des cigarettes à faible teneur en goudron. En tant que telles, elles ne peuvent fonder une action pour défaut de mise en garde. Cela vaut aussi pour la deuxième allégation. Bien que le délit

such a claim would fail for the policy reasons applicable to the negligent misrepresentation claim.

The Claims for Negligent Design

The tobacco companies have brought two types of negligent design claims against Canada. They submit that Canada breached its duty of care to the tobacco companies when it negligently designed its strains of low-tar tobacco. In the *Knight* case, Imperial submits that Canada breached its duty of care to consumers of light and mild cigarettes. The two negligent design claims establish a *prima facie* duty of care. With respect to Canada's design of low-tar tobacco strains, the proximity alleged with the tobacco companies is not based on a statutory duty, but on commercial interactions between Canada and the tobacco companies. In the *Knight* case also, it is at least arguable that Canada was acting in a commercial capacity towards the consumers of light and mild cigarettes when it designed its strains of tobacco. However, the decision to develop low-tar strains of tobacco on the belief that the resulting cigarettes would be less harmful to health is a decision that constitutes a course or principle of action based on Canada's health policy and based on social and economic factors. As a core government policy decision, it cannot ground a claim for negligent design. These claims should accordingly be struck.

Liability as a "Manufacturer" and a "Supplier"

The tobacco companies' contribution claim in the *Costs Recovery* case that Canada could qualify as a "manufacturer" under the *CRA* should be struck. It is plain and obvious that the federal government does not qualify as a manufacturer of tobacco under that Act. When the Act is read in context and all of its provisions are taken into account, it is apparent that the British Columbia legislature did not intend Canada to be liable as a manufacturer. This is confirmed by the text of the statute, the intent of the legislature in adopting the Act,

de défaut de mise en garde requière la preuve d'une obligation positive envers le demandeur, les avis de mise en cause ne donnent aucunement matière à croire que le Canada avait une telle obligation en l'espèce. Une allégation de négligence, sans plus, est insuffisante pour imposer une obligation de mise en garde. Quoi qu'il en soit, une allégation de ce genre serait rejetée pour les considérations de politique générale qui s'appliquent aux allégations de déclarations inexactes faites par négligence.

La conception négligente

Les compagnies de tabac ont soulevé à l'encontre du Canada deux types d'allégations de conception négligente. Elles affirment que le Canada a manqué à son obligation de diligence envers elles en concevant de manière négligente ses souches de tabac à faible teneur en goudron. Dans l'affaire *Knight*, Imperial fait valoir que le Canada a manqué à son obligation de diligence envers les consommateurs de cigarettes légères et douces. Ces deux allégations de conception négligente établissent l'existence d'une obligation de diligence *prima facie*. Pour ce qui est des souches de tabac à faible teneur en goudron conçues par le Canada, le prétendu lien de proximité avec les compagnies de tabac se fonde non pas sur une obligation prévue par la loi, mais sur les rapports entre le Canada et les compagnies de tabac. Dans l'affaire *Knight* également, il est au moins possible de soutenir que le Canada agissait comme une entreprise commerciale envers les consommateurs de cigarettes légères et douces lorsqu'il a conçu ses souches de tabac. Cependant, la décision de concevoir des souches de tabac à faible teneur en goudron parce qu'on croit que les cigarettes fabriquées avec ce tabac seraient moins nuisibles pour la santé constitue une ligne de conduite fondée sur la politique générale du Canada en matière de santé et repose sur des facteurs sociaux et économiques. Cette décision de politique générale fondamentale du gouvernement ne saurait fonder une poursuite pour conception négligente. Il faut donc rejeter ces allégations.

Responsabilité d'un « fabricant » et d'un « fournisseur »

Dans l'*Affaire du recouvrement des coûts*, la demande de contribution des compagnies de tabac visant à faire reconnaître au Canada la qualité de « fabricant » au sens de la *CRA* doit être radiée. Il est manifeste et évident que le gouvernement fédéral n'est pas un fabricant de produits du tabac au sens de cette loi. Lorsqu'on interprète la loi dans son contexte eu égard à l'ensemble de ses dispositions, il appert que la législature de la Colombie-Britannique ne voulait pas imposer au Canada la responsabilité d'un fabricant. C'est ce que

and the broader context of the relationship between the province and the federal government. Holding Canada accountable under the *CRA* would defeat the legislature's intention of transferring the health-care costs resulting from tobacco-related wrongs from taxpayers to the tobacco industry. Similarly, the tobacco companies cannot rely on the recently adopted *Health Care Costs Recovery Act* in an action for contribution under the *CRA*. Finally, Canada could not be liable for contribution under the *Negligence Act* or at common law since it is not directly liable to British Columbia.

Imperial's claim in the *Knight* case that Canada could qualify as a "supplier" under the *Trade Practice Act* and the *Business Practices and Consumer Protection Act* which replaced it should also be struck. Canada's purpose for developing and promoting tobacco as described in the third-party notice suggests that it was not acting "in the course of business" or "in the course of the person's business" as those phrases are used in those statutes. Those phrases must be understood as limited to activities undertaken for a commercial purpose. Here, it is plain and obvious from the facts pleaded that Canada did not promote the use of low-tar cigarettes for a commercial purpose, but for a health purpose. Canada is therefore not a supplier and is not liable under those statutes.

Claims for Equitable Indemnity and Procedural Considerations

The tobacco companies' claims of equitable indemnity should be struck. Equitable indemnity is a narrow doctrine, confined to situations of an express or implied understanding that a principal will indemnify its agent for acting on the directions given. When Canada directed the tobacco industry about how it should conduct itself, it was doing so in its capacity as a government regulator that was concerned about the health of Canadians. Under such circumstances, it is unreasonable to infer that Canada was implicitly promising to indemnify the industry for acting on its request.

Finally, the claims for declaratory relief should be struck. The tobacco companies' ability to mount defences would not be severely prejudiced if Canada was no longer a third party in the litigation.

confirment le texte de la loi, l'intention qu'avait le législateur au moment de l'adopter et le contexte plus général des rapports entre la province et le gouvernement fédéral. Tenir le Canada responsable en application de la *CRA* contrecarrerait l'intention de la législature de faire passer des contribuables à l'industrie du tabac la responsabilité des coûts des soins de santé résultant d'une faute du fabricant. Dans le même ordre d'idées, les compagnies de tabac ne peuvent s'appuyer sur la *Health Care Costs Recovery Act*, récemment édictée, dans le cadre d'une action intentée pour obtenir une contribution en vertu de la *CRA*. Enfin, le Canada ne peut être tenu à une contribution au titre de la *Negligence Act* ou en common law parce qu'il n'est pas directement responsable envers la Colombie-Britannique.

Dans l'affaire *Knight*, la demande d'Imperial de reconnaître au Canada la qualité de « fournisseur » au sens de la *Trade Practice Act* et de la loi qui l'a remplacée, la *Business Practices and Consumer Protection Act*, doit aussi être radiée. Le but recherché par le Canada lorsqu'il a développé et promu le tabac, comme l'indique l'avis de mise en cause, tend à indiquer que le Canada n'agissait pas « dans le cours de ses affaires », dans le sens où cette expression est employée dans ces lois. Cette expression doit être interprétée comme visant seulement les activités exercées à une fin commerciale. Il ressort de façon évidente et manifeste des faits allégués que le Canada a promu la consommation de cigarettes à faible teneur en goudron non pas à une fin commerciale, mais à une fin liée à la santé. Le Canada n'est donc pas un fournisseur et sa responsabilité n'est pas engagée en application de ces lois.

Demandes d'indemnité fondées sur l'equity et considérations d'ordre procédural

Les demandes des compagnies de tabac relatives à l'indemnisation en equity doivent être radiées. La doctrine de l'indemnité fondée sur l'equity est une doctrine restreinte qui ne s'applique que dans les cas où le mandant s'engage expressément ou implicitement à indemniser son mandataire pour avoir agi conformément à ses directives. Lorsque le Canada a donné à l'industrie du tabac des directives sur la manière dont elle devrait se comporter, il le faisait à titre d'autorité de réglementation du gouvernement qui se souciait de la santé des Canadiens et des Canadiennes. Dans ces circonstances, il est déraisonnable de déduire que le Canada avait promis implicitement d'indemniser l'industrie pour avoir donné suite à sa demande.

Enfin, il convient de radier les demandes de jugement déclaratoire. La capacité des compagnies de tabac de se défendre ne serait pas gravement compromise si la mise en cause du Canada en l'espèce prenait fin.

LA JUGE EN CHEF —

TABLE DES MATIÈRES

I. Introduction

[1] Imperial Tobacco Canada Ltd. ("Imperial") is a defendant in two cases before the courts in British Columbia, *British Columbia v. Imperial Tobacco Canada Ltd.*, Docket: S010421, and *Knight v. Imperial Tobacco Canada Ltd.*, Docket: L031300. In the first case, the Government of British Columbia is seeking to recover the cost of paying for the medical treatment of individuals suffering from tobacco-related illnesses from a group of 14 tobacco companies, including Imperial ("*Costs Recovery* case"). The second case is a class action brought against Imperial alone by Mr. Knight on behalf of class members who purchased "light" or "mild" cigarettes, seeking a refund of the cost

I. Introduction

[1] Imperial Tobacco Canada Limitée (« Imperial ») est défenderesse dans deux actions intentées devant les tribunaux de la Colombie-Britannique, soit *British Columbia c. Imperial Tobacco Canada Ltd.*, dossier : S010421, et *Knight c. Imperial Tobacco Canada Ltd.*, dossier : L031300. Dans la première, le gouvernement de la Colombie-Britannique cherche à recouvrer d'un groupe de 14 compagnies de tabac, dont Imperial, les sommes consacrées au traitement médical de personnes souffrant de maladies liées au tabagisme (l'« *Affaire du recouvrement des coûts* »). Dans la deuxième action, un recours collectif intenté contre Imperial uniquement, M. Knight, au nom

of the cigarettes and punitive damages ("*Knight* case").

[2] In both cases, the tobacco companies issued third-party notices to the Government of Canada, alleging that if the tobacco companies are held liable to the plaintiffs, they are entitled to compensation from Canada for negligent misrepresentation, negligent design, and failure to warn, as well as at equity. They also allege that Canada would itself be liable under the statutory schemes at issue in the two cases. In the *Costs Recovery* case, it is alleged that Canada would be liable under the *Tobacco Damages and Health Care Costs Recovery Act*, S.B.C. 2000, c. 30 ("*CRA*"), as a "manufacturer". In the *Knight* case, it is alleged that Canada would be liable as a "supplier" under the *Business Practices and Consumer Protection Act*, S.B.C. 2004, c. 2 ("*BPCPA*"), and its predecessor, the *Trade Practice Act*, R.S.B.C. 1996, c. 457 ("*TPA*").

[3] In both cases, Canada brought motions to strike the third party notices under r. 19(24) of the *Supreme Court Rules*, B.C. Reg. 221/90 (replaced by the *Supreme Court Civil Rules*, B.C. Reg. 168/2009, r. 9-5), arguing that it was plain and obvious that the third-party claims failed to disclose a reasonable cause of action. In both cases, the chambers judges agreed with Canada, and struck all of the third-party notices. The British Columbia Court of Appeal allowed the tobacco companies' appeals in part. A majority of 3-2 held that the negligent misrepresentation claims arising from Canada's alleged duty of care to the tobacco companies in both the *Costs Recovery* case and the *Knight* case should proceed to trial. A majority in the *Knight* case further held that the negligent misrepresentation claim based on Canada's alleged duty of care to consumers should proceed, as should the negligent design claims in the *Knight* case. The court unanimously

des autres membres qui ont acheté des cigarettes dites « légères » ou « douces », demande le remboursement du coût des cigarettes ainsi que le versement de dommages-intérêts punitifs (l'« *Affaire Knight* »).

[2] Dans les deux affaires, les compagnies de tabac ont mis en cause le gouvernement du Canada, prétendant que si elles sont tenues responsables envers les demandeurs, elles ont le droit d'être indemnisées par le Canada pour déclarations inexactes faites par négligence, pour conception négligente et défaut de mise en garde; elles fondent aussi leur demande sur l'equity. Elles font également valoir que le Canada aurait engagé sa propre responsabilité au titre des régimes législatifs invoqués dans ces deux affaires. Dans l'*Affaire du recouvrement des coûts*, elles invoquent sa responsabilité, à titre de [TRADUCTION] « fabricant », aux termes de la *Tobacco Damages and Health Care Costs Recovery Act*, S.B.C. 2000, ch. 30 (« *CRA* »). Dans l'*Affaire Knight*, c'est à titre de [TRADUCTION] « fournisseur » que le Canada serait responsable, aux termes de la *Business Practices and Consumer Protection Act*, S.B.C. 2004, ch. 2 (« *BPCPA* ») et de la loi qui l'a précédée, la *Trade Practice Act*, R.S.B.C. 1996, ch. 457 (« *TPA* »).

[3] Dans les deux affaires, le Canada a présenté des requêtes en radiation des avis de mise en cause en vertu du par. 19(24) des *Supreme Court Rules*, B.C. Reg. 221/90 (remplacé par la règle 9-5 des *Supreme Court Civil Rules*, B.C. Reg. 168/2009), faisant valoir qu'il était évident et manifeste que ces avis ne révélaient aucune cause d'action raisonnable. Les juges siégeant en cabinet, faisant droit aux requêtes du Canada dans les deux actions, ont ordonné la radiation de tous les avis de mise en cause. La Cour d'appel de la Colombie-Britannique a accueilli en partie les appels interjetés par les compagnies de tabac. À trois voix contre deux, les juges majoritaires ont conclu à l'opportunité d'instruire, dans l'*Affaire du recouvrement des coûts* et dans l'*Affaire Knight*, les demandes relatives aux déclarations inexactes faites par négligence en violation d'une prétendue obligation de diligence du Canada envers les compagnies de tabac. Dans l'*Affaire Knight*, les juges majoritaires ont conclu en

evidence should be resolved in favour of proceeding to trial. The question for us is therefore whether, assuming the facts pleaded to be true, it is plain and obvious that any duty of care in negligent misrepresentation would be defeated on the ground that the conduct grounding the alleged misrepresentation is a matter of government policy and hence not capable of giving rise to liability in tort.

[71] Before we can answer this question, we must consider a third preliminary issue: what constitutes a policy decision immune from review by the courts?

(iii) What Constitutes a Policy Decision Immune From Judicial Review?

[72] The question of what constitutes a policy decision that is generally protected from negligence liability is a vexed one, upon which much judicial ink has been spilled. There is general agreement in the common law world that government policy decisions are not justiciable and cannot give rise to tort liability. There is also general agreement that governments may attract liability in tort where government agents are negligent in carrying out prescribed duties. The problem is to devise a workable test to distinguish these situations.

[73] The jurisprudence reveals two approaches to the problem, one emphasizing discretion, the other, policy, each with variations. The first approach focuses on the discretionary nature of the impugned conduct. The "discretionary decision" approach was first adopted in *Home Office v. Dorset Yacht Co.*, [1970] 2 W.L.R. 1140 (H.L.). This approach holds that public authorities should be exempt from liability if they are acting within their discretion, unless the challenged decision is irrational.

ne devraient pas empêcher la tenue d'un procès. La question dont nous sommes saisis est donc de savoir s'il ressort clairement des faits tenus pour avérés qu'une obligation de faire diligence afin d'éviter les déclarations inexactes faites par négligence serait écartée parce que la conduite à l'origine de la déclaration inexacte alléguée relève d'une politique générale du gouvernement et n'est donc pas susceptible d'engager la responsabilité délictuelle de son auteur.

[71] Pour être en mesure de répondre à cette question, nous devons examiner une troisième question préliminaire : en quoi consiste une décision de politique générale soustraite au contrôle judiciaire?

(iii) Les décisions de politique générale soustraites au contrôle judiciaire

[72] La question de savoir en quoi consiste une décision de politique générale qui écarte généralement toute responsabilité pour négligence est une question épineuse qui a fait couler beaucoup d'encre. Les tribunaux de common law de partout dans le monde s'entendent généralement pour dire que les décisions de politique générale des gouvernements ne sont pas justiciables et ne peuvent engager la responsabilité délictuelle de ces derniers. On s'entend aussi généralement pour dire que la responsabilité délictuelle de l'État peut être engagée lorsque ses mandataires exercent de façon négligente des fonctions prescrites. La difficulté tient à l'élaboration d'un critère qui permette de distinguer ces situations.

[73] La jurisprudence révèle l'existence de deux méthodes d'analyse utilisées pour résoudre cette difficulté, l'une étant axée sur la notion de pouvoir discrétionnaire, et l'autre sur la notion de politique générale, et chacune a ses propres variantes. La première méthode met l'accent sur la nature discrétionnaire de la conduite reprochée. La méthode fondée sur la [TRADUCTION] « décision discrétionnaire » a été retenue pour la première fois dans *Home Office c. Dorset Yacht Co.*, [1970] 2 W.L.R. 1140 (H.L.). Selon cette méthode, les autorités publiques doivent être exonérées de toute responsabilité lorsqu'elles agissent dans l'exercice de leur pouvoir discrétionnaire, à moins que la décision attaquée ne soit irrationnelle.

[74] The second approach emphasizes the "policy" nature of protected state conduct. Policy decisions are conceived of as a subset of discretionary decisions, typically characterized as raising social, economic and political considerations. These are sometimes called "true" or "core" policy decisions. They are exempt from judicial consideration and cannot give rise to liability in tort, provided they are neither irrational nor taken in bad faith. A variant of this is the policy/operational test, in which "true" policy decisions are distinguished from "operational" decisions, which seek to implement or carry out settled policy. To date, the policy/operational approach is the dominant approach in Canada: *Just*; *Brown v. British Columbia (Minister of Transportation and Highways)*, [1994] 1 S.C.R. 420; *Swinamer v. Nova Scotia (Attorney General)*, [1994] 1 S.C.R. 445; *Lewis (Guardian ad litem of) v. British Columbia*, [1997] 3 S.C.R. 1145.

[74] La seconde méthode insiste sur la qualité de « politique générale » de la conduite de l'État bénéficiant d'une protection. On considère que les décisions de politique générale forment un sous-groupe de décisions discrétionnaires, qui font habituellement intervenir des considérations d'ordre social, économique et politique. Elles sont parfois qualifiées de « véritables » décisions de politique générale ou décisions de politique générale « fondamentale ». Les décisions de politique générale sont soustraites au contrôle judiciaire et ne peuvent engager la responsabilité délictuelle de l'État, sauf si elles sont irrationnelles ou ont été prises de mauvaise foi. Une variante de cette méthode est le critère politique générale-opérations, lequel fait la distinction entre les « véritables » décisions de politique générale et les décisions « opérationnelles », qui visent la mise en œuvre ou l'application d'une politique générale établie. De nos jours, c'est le critère politique générale-opérations qui prévaut au Canada : *Just*; *Brown c. Colombie-Britannique (Ministre des Transports et de la Voirie)*, [1994] 1 R.C.S. 420; *Swinamer c. Nouvelle-Écosse (Procureur général)*, [1994] 1 R.C.S. 445; *Lewis (Tutrice à l'instance de) c. Colombie-Britannique*, [1997] 3 R.C.S. 1145.

[75] To complicate matters, the concepts of discretion and policy overlap and are sometimes used interchangeably. Thus Lord Wilberforce in *Anns* defined policy as a synonym for discretion (p. 754).

[75] Pour compliquer les choses, les notions de pouvoir discrétionnaire et de politique générale se chevauchent et sont parfois employées de manière interchangeable. Ainsi, dans *Anns*, lord Wilberforce a décrit la notion de politique générale comme étant synonyme de pouvoir discrétionnaire (p. 754).

[76] There is wide consensus that the law of negligence must account for the unique role of government agencies: *Just*. On the one hand, it is important for public authorities to be liable in general for their negligent conduct in light of the pervasive role that they play in all aspects of society. Exempting all government actions from liability would result in intolerable outcomes. On the other hand, "the Crown is not a person and must be free to govern and make true policy decisions without becoming subject to tort liability as a result of those decisions": *Just*, at p. 1239. The challenge,

[76] On admet généralement que le droit de la négligence doit prendre en compte le rôle unique des organismes gouvernementaux : *Just*. D'une part, il importe que les organismes publics soient responsables en général de leur négligence compte tenu du grand rôle qu'ils jouent dans tous les aspects de la vie en société. Soustraire les gouvernements à toute responsabilité pour leurs actes entraînerait des conséquences inacceptables. Par contre, « la Couronne n'est pas une personne et elle doit pouvoir être libre de gouverner et de prendre de véritables décisions de politique sans encourir pour autant une

to repeat, is to fashion a just and workable legal test.

[77] The main difficulty with the "discretion" approach is that it has the potential to create an overbroad exemption for the conduct of government actors. Many decisions can be characterized as to some extent discretionary. For this reason, this approach has sometimes been refined or replaced by tests that narrow the scope of the discretion that confers immunity.

[78] The main difficulty with the policy/operational approach is that courts have found it notoriously difficult to decide whether a particular government decision falls on the policy or operational side of the line. Even low-level state employees may enjoy some discretion related to how much money is in the budget or which of a range of tasks is most important at a particular time. Is the decision of a social worker when to visit a troubled home, or the decision of a snow-plow operator when to sand an icy road, a policy decision or an operational decision? Depending on the circumstances, it may be argued to be either or both. The policy/operational distinction, while capturing an important element of why some government conduct should generally be shielded from liability, does not work very well as a legal test.

[79] The elusiveness of a workable test to define policy decisions protected from judicial review is captured by the history of the issue in various courts. I begin with the House of Lords. The House initially adopted the view that all discretionary decisions of government are immune, unless they are irrational: *Dorset Yacht*. It then moved on to a two-stage test that asked first whether the decision was discretionary and, if so, rational; and asked second whether it was a core policy decision,

responsabilité civile délictuelle » : *Just*, p. 1239. La difficulté, encore une fois, consiste à formuler un critère juridique équitable et utile.

[77] La principale difficulté que pose la méthode d'analyse fondée sur la notion de « décision discrétionnaire » réside dans la possibilité qu'elle applique à la conduite des acteurs gouvernementaux une exemption trop générale. Bien des décisions peuvent être qualifiées de discrétionnaires dans une certaine mesure. Cette méthode d'analyse a donc parfois été peaufinée ou remplacée par des critères restreignant le pouvoir discrétionnaire qui dégage son titulaire de toute responsabilité.

[78] La principale difficulté que pose le critère politique générale-opérations tient au fait qu'il est notoirement difficile pour les tribunaux de décider si une décision gouvernementale donnée relève d'une politique générale ou des opérations. Même des fonctionnaires aux échelons inférieurs peuvent jouir d'un certain pouvoir discrétionnaire pour ce qui est d'établir le montant des fonds disponibles ou de décider quelle tâche parmi d'autres revêt le plus d'importance à un moment donné. La décision d'un travailleur social quant au moment de rendre visite à une famille perturbée, ou celle d'un conducteur de chasse-neige quant au moment d'épandre du sable sur une route glacée, sont-elles des décisions de politique générale ou des décisions opérationnelles? On peut soutenir que les deux réponses sont bonnes, selon les circonstances. Bien qu'elle illustre un facteur clé en raison duquel certains actes du gouvernement doivent généralement être à l'abri de toute responsabilité, la distinction politique générale-opérations ne constitue pas un critère juridique très utile.

[79] L'historique du traitement de la question par différents tribunaux illustre la difficulté que présente l'élaboration d'un critère utile pour décrire les décisions de politique générale soustraites au contrôle judiciaire. Commençons par la Chambre des lords, qui estimait au départ que toutes les décisions discrétionnaires du gouvernement qui ne sont pas irrationnelles sont soustraites au contrôle judiciaire : *Dorset Yacht*. Elle a ensuite appliqué un critère à deux volets, en se demandant en

in which case it was entirely exempt from judicial scrutiny: *X v. Bedfordshire County Council*, [1995] 3 All E.R. 353. Within a year of adopting this two-stage test, the House abandoned it with a ringing declamation of the policy/operational distinction as unworkable in difficult cases, a point said to be evidenced by the Canadian jurisprudence: *Stovin v. Wise*, [1996] A.C. 923 (H.L.), *per* Lord Hoffmann. In its most recent foray into the subject, the House of Lords affirmed that both the policy/operational distinction and the discretionary decision approach are valuable tools for discerning which government decisions attract tort liability, but held that the final test is a "justiciability" test: *Barrett v. Enfield London Borough Council*, [2001] 2 A.C. 550. The ultimate question on this test is whether the court is institutionally capable of deciding on the question, or "whether the court should accept that it has no role to play" (p. 571). Thus at the end of the long judicial voyage the traveller arrives at a test that essentially restates the question. When should the court hold that a government decision is protected from negligence liability? When the court concludes that the matter is one for the government and not the courts.

[80] Australian judges in successive cases have divided between a discretionary/irrationality model and a "true policy" model. In *Sutherland Shire Council v. Heyman* (1985), 157 C.L.R. 424 (H.C.), two of the justices (Gibbs C.J. and Wilson J.) adopted the *Dorset Yacht* rule that all discretionary decisions are immune, provided they are rational (p. 442). They endorsed the policy/operational distinction as a logical test for discerning which decisions should be protected, and adopted Lord Wilberforce's definition of policy as a synonym for discretion. Mason J., by contrast, held that only core policy decisions, which he viewed as a narrower subset of discretionary decisions, were protected (p. 500). Deane J. agreed with Mason J.

premier lieu si la décision était discrétionnaire et, dans l'affirmative, si elle était rationnelle; elle s'est demandé en second lieu s'il s'agissait d'une décision de politique fondamentale, et donc entièrement soustraite à l'examen judiciaire : *X c. Bedfordshire County Council*, [1995] 3 All E.R. 353. Moins d'un an après avoir retenu ce critère à deux volets, la Chambre des lords l'a laissé tomber en déclamant de manière retentissante que le critère politique générale-opérations était inapplicable dans les cas difficiles, ce dont témoignerait la jurisprudence canadienne : *Stovin c. Wise*, [1996] A.C. 923 (H.L.), lord Hoffmann. Lors de sa dernière incursion dans ce domaine, la Chambre des lords a mentionné que tant le critère politique générale-opérations que l'analyse fondée sur la notion de décision discrétionnaire sont utiles pour déterminer les décisions du gouvernement qui engagent la responsabilité délictuelle de celui-ci, mais elle a jugé que le critère final en est un de « justiciabilité » : *Barrett c. Enfield London Borough Council*, [2001] 2 A.C. 550. Selon ce critère, il s'agit de savoir, en définitive, si le tribunal est habile, sur le plan institutionnel, à trancher la question ou [TRADUCTION] « si le tribunal doit reconnaître qu'il n'a pas à intervenir » (p. 571). Ainsi, à la fin de ce long périple jurisprudentiel, on se retrouve avec un critère qui ne fait que reformuler la question. Quand le tribunal doit-il juger qu'une décision gouvernementale ne donne pas prise à la responsabilité pour négligence? Quand le tribunal conclut que l'affaire est du ressort du gouvernement et non des tribunaux.

[80] Des juges australiens s'étant prononcés dans des décisions successives sont partagés entre le modèle décision discrétionnaire-décision irrationnelle et celui de la « véritable décision de politique générale ». Dans *Sutherland Shire Council c. Heyman* (1985), 157 C.L.R. 424 (H.C.), deux des juges (le juge en chef Gibbs et le juge Wilson) ont adopté la règle établie dans l'arrêt *Dorset Yacht*, selon laquelle toutes les décisions discrétionnaires échappent au contrôle judiciaire, pourvu qu'elles soient rationnelles (p. 442). Ils ont souscrit à la thèse que la distinction entre la politique générale et les opérations était un critère logique pour déterminer quelles décisions ne donnent pas prise à la responsabilité, et ils ont fait leur la description de lord

for somewhat different reasons. Brennan J. did not comment on which test should be adopted, leaving the test an open question. The Australian High Court again divided in *Pyrenees Shire Council v. Day*, [1998] HCA 3, 192 C.L.R. 330, with three justices holding that a discretionary government action will only attract liability if it is irrational and two justices endorsing different versions of the policy/operational distinction.

Wilberforce voulant que la politique générale soit synonyme de pouvoir discrétionnaire. Pour sa part, le juge Mason a affirmé que l'État bénéficiait de la protection uniquement à l'égard des décisions de politique générale fondamentale, qu'il considérait comme un sous-groupe plus restreint de décisions discrétionnaires (p. 500). Le juge Deane a souscrit à l'opinion du juge Mason, mais pour des raisons quelque peu différentes. Quant au juge Brennan, il n'a pas dit quel critère devrait être retenu, laissant cette question en suspens. La Haute Cour d'Australie était encore une fois divisée dans *Pyrenees Shire Council c. Day*, [1998] HCA 3, 192 C.L.R. 330, où trois juges ont conclu qu'une mesure gouvernementale discrétionnaire n'engage la responsabilité de l'État que si elle est irrationnelle, et deux juges ont retenu des versions différentes du critère politique générale-opérations.

[81] In the United States, the liability of the federal government is governed by the *Federal Tort Claims Act* of 1946, 28 U.S.C. ("*FTCA*"), which waived sovereign immunity for torts, but created an exemption for discretionary decisions. Section 2680(a) excludes liability in tort for

[81] Aux États-Unis, la responsabilité du gouvernement fédéral est régie par la *Federal Tort Claims Act* de 1946, 28 U.S.C. (« *FTCA* »), qui écarte l'immunité absolue à l'égard de la responsabilité délictuelle, mais crée une exemption en faveur des décisions discrétionnaires. L'alinéa 2680a) écarte la responsabilité du gouvernement à l'égard de

> [a]ny claim based upon an act or omission of an employee of the Government, exercising due care, in the execution of a statute or regulation, whether or not such statute or regulation be valid, or based upon the exercise or performance or the failure to exercise or perform a discretionary function or duty on the part of a federal agency or an employee of the Government, whether or not the discretion involved be abused.

> [TRADUCTION] [t]oute poursuite fondée sur l'acte ou l'omission d'un fonctionnaire dans l'exécution diligente d'une loi ou d'un règlement, que ces derniers soient ou non valides, ou fondée sur l'exercice ou le défaut d'exercice d'une fonction ou d'un pouvoir discrétionnaire de la part d'un organisme fédéral ou d'un fonctionnaire, qu'il y ait eu ou non exercice abusif de ce pouvoir discrétionnaire.

Significantly, s. 2680(h) of the *FTCA* exempts the federal government from any claim of misrepresentation, either intentional or negligent: *Office of Personnel Management v. Richmond*, 496 U.S. 414 (1990), at p. 430; *United States v. Neustadt*, 366 U.S. 696 (1961).

Fait important, l'al. 2680h) de la *FTCA* soustrait le gouvernement fédéral à toute poursuite pour déclaration inexacte, faite délibérément ou par négligence : *Office of Personnel Management c. Richmond*, 496 U.S. 414 (1990), p. 430; *United States c. Neustadt*, 366 U.S. 696 (1961).

[82] Without detailing the complex history of the American jurisprudence on the issue, it suffices to say that the cases have narrowed the concept of discretion in the *FTCA* by reference to the concept of policy. Some cases develop this analysis by distinguishing between policy and operational decisions:

[82] Sans entrer dans les détails de l'historique complexe de la jurisprudence américaine en la matière, il suffit de dire que les tribunaux ont restreint le concept de pouvoir discrétionnaire énoncé dans la *FTCA* en invoquant la notion de politique générale. Dans certaines décisions, ils développent

e.g., *Dalehite v. United States*, 346 U.S. 15 (1953). The Supreme Court of the United States has since distanced itself from the approach of defining a true policy decision negatively as "not operational", in favour of an approach that asks whether the impugned state conduct was based on public policy considerations. In *United States v. Gaubert*, 499 U.S. 315 (1991), White J. faulted the Court of Appeals for relying on "a nonexistent dichotomy between discretionary functions and operational activities" (p. 326). He held that the "discretionary function exception" of the *FTCA* "protects only governmental actions and decisions based on considerations of public policy" (at p. 323, citing *Berkovitz v. United States*, 486 U.S. 531 (1988), at p. 537 (emphasis added)), such as those involving social, economic and political considerations: see also *United States v. S.A. Empresa de Viacao Aerea Rio Grandense (Varig Airlines)*, 467 U.S. 797 (1984).

[83] In *Gaubert*, only Scalia J. found lingering appeal in defining policy decisions as "not operational", but only in the narrow sense that people at the operational level will seldom make policy decisions. He stated that "there is something to the planning vs. operational dichotomy — though . . . not precisely what the Court of Appeals believed" (p. 335). That "something" is that "[o]rdinarily, an employee working at the operational level is not responsible for policy decisions, even though policy considerations may be highly relevant to his actions". For Scalia J., a government decision is a protected policy decision if it "ought to be informed by considerations of social, economic, or political policy and is made by an officer whose official responsibilities include assessment of those considerations".

cette analyse en distinguant les décisions de politique générale des décisions opérationnelles : p. ex. *Dalehite c. United States*, 346 U.S. 15 (1953). La Cour suprême des États-Unis s'est depuis distanciée de l'approche qui consiste à décrire de façon négative une véritable décision de politique générale comme une décision [TRADUCTION] « n'étant pas de nature opérationnelle » et favorise une approche visant à déterminer si la conduite contestée de l'État reposait sur des considérations d'intérêt public. Dans *United States c. Gaubert*, 499 U.S. 315 (1991), le juge White a reproché à la Court of Appeals de se fonder sur une [TRADUCTION] « dichotomie inexistante entre les fonctions discrétionnaires et les activités opérationnelles » (p. 326). Selon lui, l'« exception relative aux fonctions discrétionnaires » prévue par la *FTCA* « ne vise que les mesures et les décisions du gouvernement qui reposent sur des considérations d'intérêt public » (p. 323, citant *Berkovitz c. United States*, 486 U.S. 531 (1988), p. 537 (je souligne)), comme celles faisant intervenir des considérations sociales, économiques ou politiques; voir aussi *United States c. S.A. Empresa de Viacao Aerea Rio Grandense (Varig Airlines)*, 467 U.S. 797 (1984).

[83] Dans *Gaubert*, seul le juge Scalia trouvait encore attrayante l'idée de définir les décisions de politique générale comme des décisions [TRADUCTION] « n'étant pas de nature opérationnelle », mais seulement au sens strict selon lequel les employés au niveau opérationnel prennent rarement des décisions de politique générale. Selon lui, [TRADUCTION] « un facteur intervient dans la dichotomie entre la planification et les opérations [. . .] mais ce n'est pas tout à fait ce que les cours d'appel avaient en tête » (p. 335). Ce « facteur », c'est que, « [h]abituellement, un employé au niveau opérationnel n'a pas à prendre des décisions de politique générale, même si ses actes peuvent être étroitement liés à des considérations de cette nature ». D'après le juge Scalia, une décision du gouvernement constitue une décision de politique générale bénéficiant de protection si elle « doit tenir compte de considérations sociales, économiques ou politiques et si elle est prise par un fonctionnaire dont l'une des responsabilités officielles consiste à évaluer ces considérations ».

[84] A review of the jurisprudence provokes the following observations. The first is that a test based simply on the exercise of government discretion is generally now viewed as too broad. Discretion can imbue even routine tasks, like driving a government vehicle. To protect all government acts that involve discretion unless they are irrational simply casts the net of immunity too broadly.

[84] Les observations suivantes s'imposent comme suite à l'analyse de la jurisprudence. Premièrement, un critère fondé uniquement sur l'exercice du pouvoir discrétionnaire du gouvernement est maintenant perçu par la plupart des tribunaux comme étant trop général. Même les tâches courantes, comme la conduite d'un véhicule du gouvernement, peuvent requérir l'exercice d'un certain pouvoir discrétionnaire. Soustraire à l'examen judiciaire tous les actes de l'administration publique qui font intervenir un pouvoir discrétionnaire, pourvu qu'ils ne soient pas irrationnels, a pour effet de donner une portée trop large à l'immunité.

[85] The second observation is that there is considerable support in all jurisdictions reviewed for the view that "true" or "core" policy decisions should be protected from negligence liability. The current Canadian approach holds that only "true" policy decisions should be so protected, as opposed to operational decisions: *Just*. The difficulty in defining such decisions does not detract from the fact that the cases keep coming back to this central insight. Even the most recent "justiciability" test in the U.K. looks to this concept for support in defining what should be viewed as justiciable.

[85] Deuxièmement, un grand nombre de tribunaux dans tous les ressorts visés par l'analyse s'entendent pour dire que l'État devrait être soustrait à toute responsabilité pour négligence dans les cas de « véritables » décisions de politique générale ou de décisions de politique générale « fondamentale ». Selon le point de vue qui prévaut au Canada, seules les « véritables » décisions de politique générale (par opposition aux décisions opérationnelles) ne devraient pas donner prise à cette responsabilité : *Just*. La difficulté liée à la détermination des décisions de cette nature ne change rien au fait que les tribunaux s'en remettent encore à ces indications essentielles. Même le critère de « justiciabilité » établi tout récemment au Royaume-Uni s'inspire de ce concept pour déterminer ce qui doit être perçu comme étant justiciable.

[86] A third observation is that defining a core policy decision negatively as a decision that is not an "operational" decision may not always be helpful as a stand-alone test. It posits a stark dichotomy between two water-tight compartments — policy decisions and operational decisions. In fact, decisions in real life may not fall neatly into one category or the other.

[86] Troisièmement, le fait de définir négativement une décision de politique générale fondamentale comme une décision n'étant pas de nature « opérationnelle » ne constitue peut-être pas un critère distinct utile dans tous les cas. Ce critère suppose une nette dichotomie entre deux compartiments étanches : les décisions de politique générale et les décisions opérationnelles. Dans les faits, il est possible que les décisions n'appartiennent pas clairement à l'une ou l'autre de ces catégories.

[87] Instead of defining protected policy decisions negatively, as "not operational", the majority in *Gaubert* defines them positively as discretionary legislative or administrative decisions and conduct that are grounded in social, economic, and

[87] Au lieu de définir négativement les décisions de politique générale à l'abri de l'examen judiciaire comme des décisions [TRADUCTION] « n'étant pas de nature opérationnelle », les juges majoritaires dans *Gaubert* les décrivent positivement comme

political considerations. Generally, policy decisions are made by legislators or officers whose official responsibility requires them to assess and balance public policy considerations. The decision is a considered decision that represents a "policy" in the sense of a general rule or approach, applied to a particular situation. It represents "a course or principle of action adopted or proposed by a government": *New Oxford Dictionary of English* (1998), at p. 1434. When judges are faced with such a course or principle of action adopted by a government, they generally will find the matter to be a policy decision. The weighing of social, economic, and political considerations to arrive at a course or principle of action is the proper role of government, not the courts. For this reason, decisions and conduct based on these considerations cannot ground an action in tort.

étant des décisions et des mesures discrétionnaires d'ordre législatif ou administratif qui se fondent sur des considérations sociales, économiques ou politiques. Les décisions de politique générale sont habituellement prises par le législateur ou un fonctionnaire tenu officiellement d'évaluer et de mettre en balance des considérations d'intérêt public. La décision est réfléchie et traduit une « politique générale » dans le sens d'une règle ou orientation générale appliquée dans une situation précise. La politique désigne une « ligne de conduite adoptée par un organisme [. . .] public » : *Multidictionnaire de la langue française*, p. 1261. Les juges saisis d'une pareille ligne de conduite adoptée par un organisme public estiment généralement qu'il s'agit d'une décision de politique générale. Il appartient véritablement au gouvernement, et non aux tribunaux, de mettre en balance des considérations sociales, économiques et politiques pour en arriver à une ligne de conduite. C'est pourquoi les décisions et les actes reposant sur ces considérations ne sauraient fonder une action en responsabilité délictuelle.

[88] Policy, used in this sense, is not the same thing as discretion. Discretion is concerned with whether a particular actor had a choice to act in one way or the other. Policy is a narrow subset of discretionary decisions, covering only those decisions that are based on public policy considerations, like economic, social and political considerations. Policy decisions are always discretionary, in the sense that a different policy could have been chosen. But not all discretionary decisions by government are policy decisions.

[88] Utilisée dans ce sens, la notion de politique générale diffère de la notion de pouvoir discrétionnaire. Un tel pouvoir dépend de la question de savoir si un acteur donné a la faculté de choisir d'agir d'une façon ou d'une autre. Les politiques générales forment un sous-ensemble restreint de décisions discrétionnaires, et n'englobent que les décisions fondées sur des considérations d'intérêt public, comme des considérations d'ordre économique, social ou politique. Toutes les décisions de politique générale sont discrétionnaires, en ce sens qu'une politique différente aurait pu être retenue. Toutefois, les décisions discrétionnaires du gouvernement ne sont pas toutes des décisions de politique générale.

[89] While the main focus on the *Gaubert* approach is on the nature of the decision, the role of the person who makes the decision may be of assistance. Did the decision maker have the responsibility of looking at social, economic or political factors and formulating a "course" or "principle" of action with respect to a particular problem facing the government? Without suggesting that

[89] Bien que l'approche préconisée dans *Gaubert* mette l'accent sur la nature de la décision, le rôle du décideur peut se révéler utile. Ce dernier était-il chargé d'étudier les facteurs sociaux, économiques ou politiques et d'élaborer une « ligne de conduite » à l'égard d'un problème auquel fait face le gouvernement? Sans prétendre qu'il est possible de répondre à la question en invoquant

the question can be resolved simply by reference to the rank of the actor, there is something to Scalia J.'s observation in *Gaubert* that employees working at the operational level are not usually involved in making policy choices.

[90] I conclude that "core policy" government decisions protected from suit are decisions as to a course or principle of action that are based on public policy considerations, such as economic, social and political factors, provided they are neither irrational nor taken in bad faith. This approach is consistent with the basic thrust of Canadian cases on the issue, although it emphasizes positive features of policy decisions, instead of relying exclusively on the quality of being "non-operational". It is also supported by the insights of emerging jurisprudence here and elsewhere. This said, it does not purport to be a litmus test. Difficult cases may be expected to arise from time to time where it is not easy to decide whether the degree of "policy" involved suffices for protection from negligence liability. A black and white test that will provide a ready and irrefutable answer for every decision in the infinite variety of decisions that government actors may produce is likely chimerical. Nevertheless, most government decisions that represent a course or principle of action based on a balancing of economic, social and political considerations will be readily identifiable.

[91] Applying this approach to motions to strike, we may conclude that where it is "plain and obvious" that an impugned government decision is a policy decision, the claim may properly be struck on the ground that it cannot ground an action in tort. If it is not plain and obvious, the matter must be allowed to go to trial.

simplement le niveau hiérarchique du décideur, on peut s'inspirer de l'observation faite par le juge Scalia dans *Gaubert* selon laquelle les employés au niveau opérationnel ne participent habituellement pas à la prise de décisions de politique générale.

[90] Je conclus que les décisions de « politique générale fondamentale » du gouvernement à l'égard desquelles ce dernier est soustrait aux poursuites se rapportent à une ligne de conduite et reposent sur des considérations d'intérêt public, tels des facteurs économiques, sociaux ou politiques, pourvu qu'elles ne soient ni irrationnelles ni prises de mauvaise foi. Cette approche concorde avec le message essentiel de la jurisprudence canadienne à cet égard, bien qu'elle fasse ressortir des caractéristiques positives des décisions de politique générale, au lieu de se fonder exclusivement sur le fait qu'elles ne sont pas de « nature opérationnelle ». Elle est aussi étayée par les réflexions faites dans la nouvelle jurisprudence canadienne et étrangère. Cela dit, elle n'est pas censée constituer un critère décisif. On peut s'attendre à ce que surviennent de temps à autre des situations délicates où il n'est pas facile de décider si le degré de « politique générale » en cause suffit à mettre une décision à l'abri de toute responsabilité pour négligence. Il serait illusoire de vouloir établir un critère absolu qui donnerait rapidement et infailliblement une réponse à l'égard de toute décision parmi la gamme infinie de celles que peuvent prendre les acteurs gouvernementaux. On pourra néanmoins facilement cerner la plupart des décisions gouvernementales qui représentent une ligne de conduite fondée sur une mise en balance de considérations économiques, sociales et politiques.

[91] L'application de l'approche exposée ci-dessus aux requêtes en radiation nous permet de conclure que, dans les cas où il est « évident et manifeste » qu'une décision contestée du gouvernement constitue une décision de politique générale, l'allégation peut à juste titre être radiée au motif qu'elle ne saurait fonder une action en responsabilité délictuelle. S'il n'est pas évident et manifeste qu'il s'agit d'une décision de politique générale, il faut permettre l'instruction de l'affaire.

(iv) Conclusion on the Policy Argument

[92] As discussed, the question is whether the alleged representations of Canada to the tobacco companies that low-tar cigarettes are less harmful to health are matters of policy, in the sense that they constitute a course or principle of action of the government. If so, the representations cannot ground an action in tort.

[93] The third-party notices plead that Canada made statements to the public (and to the tobacco companies) warning about the hazards of smoking, and asserting that low-tar cigarettes are less harmful than regular cigarettes; that the representations that low-tar cigarettes are less harmful to health were false; and that insofar as consumption caused extra harm to consumers for which the tobacco companies are held liable, Canada is required to indemnify the tobacco companies and/or contribute to their losses.

[94] The third-party notices implicitly accept that in making the alleged representations, Health Canada was acting out of concern for the health of Canadians, pursuant to its policy of encouraging smokers to switch to low-tar cigarettes. They assert, in effect, that Health Canada had a policy to warn the public about the hazardous effects of smoking, and to encourage healthier smoking habits among Canadians. The third-party claims rest on the allegation that Health Canada accepted that some smokers would continue to smoke despite the adverse health effects, and decided that these smokers should be encouraged to smoke lower-tar cigarettes.

[95] In short, the representations on which the third-party claims rely were part and parcel of a government policy to encourage people who continued to smoke to switch to low-tar cigarettes. This was a "true" or "core" policy, in the sense of a course or principle of action that the government

(iv) Conclusion sur l'argument relatif à la politique générale

[92] Comme je l'ai indiqué, il s'agit de savoir si les déclarations qu'aurait faites le Canada aux compagnies de tabac, selon lesquelles les cigarettes à faible teneur en goudron sont moins nuisibles pour la santé, sont des questions de politique générale, en ce sens qu'elles constituent une ligne de conduite du gouvernement. Dans l'affirmative, ces déclarations ne peuvent fonder une action en responsabilité délictuelle.

[93] On soutient dans les avis de mise en cause que le Canada a mis en garde la population (et les compagnies de tabac) contre les dangers de l'usage du tabac et a affirmé que les cigarettes à faible teneur en goudron sont moins nocives que les cigarettes ordinaires. On soutient aussi que ces déclarations étaient fausses et que, dans la mesure où l'usage du tabac a causé aux consommateurs un préjudice additionnel dont sont tenues responsables les compagnies de tabac, le Canada doit indemniser celles-ci ou éponger une partie de leurs pertes.

[94] Les avis de mise en cause concèdent implicitement que Santé Canada a fait les déclarations qu'on lui attribue par souci pour la santé des Canadiens et Canadiennes, conformément à sa politique d'inciter les fumeurs à opter pour des cigarettes à faible teneur en goudron. Ils mentionnent en fait que Santé Canada avait pour politique de mettre en garde la population contre les effets nocifs de l'usage du tabac, et d'encourager les Canadiens et Canadiennes à fumer plus sainement. Les demandes de mise en cause reposent sur l'allégation que Santé Canada s'est résigné à ce que certaines personnes continuent de fumer malgré les effets nuisibles de cette habitude sur leur santé, et a décidé qu'il convenait de les inciter à fumer des cigarettes à faible teneur en goudron.

[95] En bref, les déclarations sur lesquelles s'appuient les demandes de mise en cause faisaient partie intégrante d'une politique générale du gouvernement visant à inciter les personnes qui continuaient de fumer à opter pour des cigarettes à faible teneur en goudron. Il s'agissait d'une « véritable »

adopted. The government's alleged course of action was adopted at the highest level in the Canadian government, and involved social and economic considerations. Canada, on the pleadings, developed this policy out of concern for the health of Canadians and the individual and institutional costs associated with tobacco-related disease. In my view, it is plain and obvious that the alleged representations were matters of government policy, with the result that the tobacco companies' claims against Canada for negligent misrepresentation must be struck out.

[96] Having concluded that the claims for negligent misrepresentation are not actionable because the alleged representations were matters of government policy, it is not necessary to canvas the other stage-two policy grounds that Canada raised against the third-party claims relating to negligent misrepresentation. However, since the argument about indeterminate liability was fully argued, I will briefly discuss it. In my view, it confirms that no liability in tort should be recognized for Canada's alleged misrepresentations.

(b) *Indeterminate Liability*

[97] Canada submits that allowing the defendants' claims in negligent misrepresentation would result in indeterminate liability, and must therefore be rejected. It submits that Canada had no control over the number of cigarettes being sold. It argues that in cases of economic loss, the courts must limit liability to cases where the third party had a means of controlling the extent of liability.

[98] The tobacco companies respond that Canada faces extensive, but not indeterminate liability.

politique générale ou d'une politique générale « fondamentale » au sens d'une ligne de conduite adoptée par le gouvernement. La ligne de conduite gouvernementale alléguée a été adoptée par les plus hautes instances du gouvernement canadien et mettait en jeu des considérations sociales et économiques. Selon les actes de procédure, le Canada a élaboré cette politique par souci pour la santé des Canadiens et Canadiennes et en raison des coûts individuels et institutionnels associés aux maladies causées par le tabac. Il m'apparaît évident et manifeste que les déclarations alléguées relevaient de la politique générale du gouvernement, de sorte que les allégations de déclarations inexactes faites par négligence qu'ont formulées les compagnies de tabac à l'encontre du Canada doivent être radiées.

[96] Vu ma conclusion que les allégations de déclarations inexactes faites par négligence ne peuvent fonder une action parce que les déclarations alléguées relevaient de la politique générale du gouvernement, point n'est besoin de passer en revue les autres motifs de politique générale — liés à la deuxième étape de l'analyse — qu'a invoqués le Canada à l'encontre des demandes de mise en cause pour déclarations inexactes faites par négligence. Mais, comme l'argument relatif à la responsabilité indéterminée a été débattu à fond, je vais l'analyser brièvement. À mon avis, cet argument confirme que la responsabilité délictuelle du Canada ne doit pas être reconnue à l'égard des déclarations inexactes qu'il aurait faites.

b) *Responsabilité indéterminée*

[97] Le Canada soutient que, si l'on accepte les allégations des défenderesses en matière de déclaration inexacte faite par négligence, cela entraînerait une responsabilité indéterminée de sa part, et qu'il faut donc les rejeter. Le Canada affirme que le nombre de cigarettes vendues était indépendant de sa volonté. En outre, dans les cas de perte financière, les tribunaux ne doivent conclure à la responsabilité du mis en cause que lorsque celui-ci est à même d'en contrôler la portée.

[98] Les compagnies de tabac répondent que la responsabilité à laquelle s'expose le Canada est

2014 ONCA 852 (CanLII)

Heard: May 26, 27 and 29, 2014

On appeal from the judgment of Justice Thomas R. Lederer of the Superior Court of Justice dated September 6, 2013, with reasons reported at 2013 ONSC 5410, 116 O.R. (3d) 574.

Pardu J.A.:

[1] The appellants ask this Court to overturn a decision of a motion judge dismissing their application for relief pursuant to the *Charter of Rights and Freedoms*. The motion judge concluded it was plain and obvious the application did not disclose a viable cause of action and the application had no reasonable prospect of success. The motion judge also found the appellant's claim was not justiciable.

Committee on Social Assistance (the Income Security Coalition); (6) the Colour of Poverty/Colour of Change Network (COPC); (7) the Ontario Human Rights Commission (OHRC); and (8) the Women's Legal Education Action Fund Inc. (LEAF). Each filed a factum and made brief oral submissions, generally in support of the appellants.

2014 ONCA 852 (CanLII)

Analysis

[19] I would uphold the motion judge's conclusion that this application is not justiciable. In essence, the application asserts that Canada and Ontario have given insufficient priority to issues of homelessness and inadequate housing.

[20] As indicated in *Canada (Auditor-General) v. Canada (Minister of Energy, Mines & Resources)*, [1989] 2 S.C.R. 49 at 90-91, "[a]n inquiry into justiciability is, first and foremost, a normative inquiry into the appropriateness as a matter of constitutional judicial policy of the courts deciding a given issue, or instead deferring to other decision making institutions of the polity."

[21] Having analysed the jurisprudence relating to justiciability in Lorne M. Sossin, *Boundaries of Judicial Review: The Law of Justiciability in Canada*, 2d ed. (Toronto: Carswell, 2012), the author identified several relevant factors, at p. 162:

> Political questions, therefore, must demonstrably be unsuitable for adjudication. These will typically involve moral, strategic, ideological, historical or policy considerations that are not susceptible to resolution

> through adversarial presentation of evidence or the judicial process. Justiciable questions and political questions lie at opposing ends of a jurisdiction spectrum.
>
> …
>
> [T]he political nature of a matter raises two related dilemmas for courts. The first is the dilemma of institutional capacity. Courts are designed to make pronouncements of law. Arguably, they accomplish this goal more effectively and efficiently than any other institution could. Where the heart of a dispute is political rather than legal, however, courts may have no particular advantage over other institutions in their expertise, and may well be less effective and efficient than other branches of government in resolving such controversies, as the judiciary is neither representative of the political spectrum, nor democratically accountable.

[22] A challenge to a particular law or particular application of such a law is an archetypal feature of *Charter* challenges under s. 7 and s. 15. As observed in *Re Canada Assistance Plan,* [1991] 2 S.C.R. 525, at p. 545:

> In considering its appropriate role the Court must determine whether the question is purely political in nature, and should therefore be determined in another forum or whether it has a sufficient legal component to warrant the intervention of the judicial branch.

[23] The Supreme Court discussed the difference between a political issue and a legal issue in *Canada (Attorney General) v. PHS Community Services Society*, 2011 SCC 44, [2011] 2 S.C.R. 134, and *Chaoulli v. Quebec (Attorney General)*, 2005 SCC 35, [2005] 1 S.C.R. 791. In both cases, the Attorneys General argued

2014 ONCA 852 (CanLII)

that the subject matter of the *Charter* challenge was immune from scrutiny, and the Supreme Court disagreed. Both cases are distinguishable.

[24] In *Canada (Attorney General) v. PHS Community Services Society*, the Court observed, at para. 105:

> The issue of illegal drug use and addiction is a complex one which attracts a variety of social, political, scientific and moral reactions. There is room for disagreement between reasonable people concerning how addiction should be treated. It is for the relevant governments, not the Court, to make criminal and health policy. However, when a policy is translated *into law or state action,* those *laws and actions* are subject to scrutiny under the *Charter*: *Chaoulli*, at para. 89, per Deschamps J., at para. 107, per McLachlin C.J. and Major J., and at para. 183, per Binnie and LeBel JJ.; *Rodriguez,* at pp. 589-90, per Sopinka J. The issue before the Court at this point is not whether harm or abstinence-based programmes are the best approach to resolving illegal drug use. It is simply whether Canada has limited the rights of the claimants in a manner that does not comply with the *Charter*. [Emphasis added]

[25] In *Chaoulli v. Quebec (Attorney General),* 2005 SCC 35, [2005] 1 S.C.R. 791, the applicant challenged a Quebec law that prohibited private health insurance for services that were available in the public sector. At para. 107, McLachlin C.J. and Major J. said:

> While the decision about the type of health care system Quebec should adopt falls to the legislature of the province, the resulting legislation, like *all laws*, is subject to constitutional limits, including those imposed by s. 7 of the *Charter*. [Emphasis added]

2014 ONCA 852 (CanLII)

[26] Binnie and LeBel JJ. (dissenting on the merits in *Chaoulli*) also rejected the argument of the Attorneys General of Canada and Quebec that the claims advanced by the appellant were inherently political and therefore not properly justiciable by the courts. They pointed, at para. 183, to s. 52 of the *Constitution Act, 1982,* which "affirms the constitutional power and *obligation* of courts to declare laws of no force or effect to the extent of their inconsistency with the Constitution" (emphasis in original).

[27] In this case, unlike in *PHS Community Services* (where a specific state action was challenged) and *Chaoulli* (where a specific law was challenged) there is no sufficient legal component to engage the decision-making capacity of the courts.

[28] In *Chaoulli*, the Supreme Court found that the legislative prohibition against private insurance contained in the *Hospital Insurance Act,* R.S.Q. c. A-29, engaged the appellants' rights to security of the person and was arbitrary in that no link was established to tie the need for the prohibition to the goal of maintaining quality public health care. That kind of analysis, a comparison between the legislative means and purpose, is impossible in this case.

[29] This is not to say that constitutional violations caused by a network of government programs can never be addressed, particularly when the issue may otherwise be evasive of review.

2014 ONCA 852 (CanLII)

[30] There are several aspects of this application, however, that make it unsuitable for *Charter* scrutiny. Here the appellants assert that s. 7 confers a general freestanding right to adequate housing. This is a doubtful proposition in light of *Chaoulli*, where McLachlin C.J. and Major J. made the following unequivocal statement, at para. 104:

> The *Charter* does not confer a freestanding right to health care. However, where the government puts in place a scheme to provide health care, that scheme must comply with the *Charter*.

[31] Further, as this Court noted in *Wynberg v. Ontario* (2006), 82 O.R. (3d) 561, leave to appeal denied, [2006] S.C.C.A. No. 441, at para. 225:

> [I]n *Gosselin, supra*, the Supreme Court of Canada rejected an argument that s. 7 of the *Charter* requires the provision of a minimum level of social assistance adequate to meet basic needs.

[32] Moreover, the diffuse and broad nature of the claims here does not permit an analysis under s. 1 of the *Charter*. As indicated in *R. v. Oakes*, [1986] 1 S.C.R. 103, in the event of a violation of a right guaranteed by the *Charter*, the legislation will nonetheless be sustained if the objective of the legislation is pressing and substantial, the rights violation is rationally connected to the purpose of the legislation, the violation minimally impairs the guaranteed right, and the impact of the infringement of the right does not outweigh the value of the legislative object. Here, in the absence of any impugned law there is no basis to make that comparison.

2014 ONCA 852 (CanLII)

[33] Finally, there is no judicially discoverable and manageable standard for assessing in general whether housing policy is adequate or whether insufficient priority has been given in general to the needs of the homeless. This is not a question that can be resolved by application of law, but rather it engages the accountability of the legislatures. Issues of broad economic policy and priorities are unsuited to judicial review. Here the court is not asked to engage in a "court-like" function but rather to embark on a course more resembling a public inquiry into the adequacy of housing policy.

[34] Were the court to confine its remedy to a bare declaration that a government was required to develop a housing policy, that would be so devoid of content as to be effectively meaningless. To embark, as asked, on judicial supervision of the adequacy of housing policy developed by Canada and Ontario takes the court well beyond the limits of its institutional capacity. All agree that housing policy is enormously complex. It is influenced by matters as diverse as zoning bylaws, interest rates, procedures governing landlord and tenant matters, income tax treatment of rental housing, not to mention the involvement of the private sector and the state of the economy generally. Nor can housing policy be treated monolithically. The needs of aboriginal communities, northern regions, and urban centres are all different, across the country.

[35] I add that complexity alone, sensitivity of political issues, the potential for significant ramifications flowing from a court decision and a preference that

2014 ONCA 852 (CanLII)

legislatures alone deal with a matter are not sufficient on their own to permit a court to decline to hear a matter on the ground of justiciability: see, for example, *Chaoulli*, at para. 107. Again, the issue is one of institutional competence. The question is whether there is a sufficient legal component to anchor the analysis.

[36] The application here is demonstrably unsuitable for adjudication, and the motion judge was correct to dismiss it on the basis that it was not justiciable.

[37] Given that this application was properly dismissed on the ground that it did not raise justiciable issues, it is not necessary to explore the limits, in a justiciable context, of the extent to which positive obligations may be imposed on government to remedy violations of the *Charter*, a door left slightly ajar in *Gosselin v. Quebec*, 2002 SCC 84, [2002] 4 S.C.R. 429. Nor is it necessary to determine whether homelessness can be an analogous ground of discrimination under s. 15 of the *Charter* in some contexts.

[38] The appellants also argue that the motion judge ought to have refused to hear the respondents' motions to dismiss because the governments did not move to dismiss the application until two years after the application was issued on May 26, 2010, and after the appellants had compiled a voluminous record which was served on the respondents on November 22, 2012. Six months later the respondents advised the appellants that they had reviewed the record, sought instructions, and consulted each other and would respond with motions to strike.

(c) Policy and Political Questions

[33] Policy and political questions are not a bar to judicial involvement, however, "[s]ome questions are so political that courts are incapable or unsuited to deal with them, or should not deal with them in light of the time-honoured demarcation of powers between the courts and other branches of government" (*Hupacasath* at para 62). Questions in the realm of policy and political issues must be demonstrably unsuitable for adjudication (Sossin at 162):

> Political questions, therefore, must demonstrably be unsuitable for adjudication. These will typically involve moral, strategic, ideological, historical or policy considerations that are not susceptible to resolution through adversarial presentation of evidence or the judicial process. Justiciable questions and political questions lie at opposing ends of a jurisdiction spectrum.

[34] To engage the Court's adjudicative functions, the question must be one that can be resolved by the application of law.

[35] It is within the Court's role to consider the constitutionality of government action and the accountability of the executive in light of the supremacy of the Constitution, including the *Charter*. *Charter* cases have been considered justiciable, regardless of the nature of government action, be it an exercise of Crown prerogative or otherwise (*Hupacasath* at paras 61, 70).

[36] Several cases discuss the crystallization of a policy or political issue into a justiciable one, as it relates to a Court's role in upholding constitutional supremacy. The Supreme Court in

2020 FC 1008 (CanLII)

[41] My finding on justiciability is supported both by the undue breadth and diffuse nature of the Impugned Conduct and the inappropriate remedies sought by the Plaintiffs.

(a) Breadth of the Impugned Conduct

[42] As described above, the Impugned Conduct refers broadly to categories of the Defendants' actions and inactions, including Canada's participation in various industries and its causation of, contribution to and allowance of GHG emissions incompatible with a Stable Climate System. These categories are somewhat sub-categorized throughout the Statement of Claim, through descriptions of a broad range of activities, as identified above.

[43] The diffuse nature of the Impugned Conduct, as described by the Plaintiffs, has effectively put the entirety of Canada's policy response to climate change in issue. The Plaintiffs adamantly disagree with this characterization. In their Written Representations, they attempt to clarify their claim, suggesting that they are asking this Court to review the cumulative effects of GHG emissions, not each and every law or state action that underpins these emissions. I find this position to be problematic, as the purpose of *Charter* review is to ensure the constitutionality of laws and state action. The Plaintiffs' position undermines this function of *Charter* review, if assessments of *Charter* infringement cannot be connected to specific laws or state action.

[44] Moreover, the diffuse nature of the claim that targets all conduct leading to GHG emissions cannot be characterized in a way other than to suggest the Plaintiffs' are seeking judicial involvement in Canada's overall policy response to climate change. There is little difference between the choices the Defendants make in relation to addressing climate change and other policy choices the Courts have consistently recognized as falling more appropriately within

2020 FC 1008 (CanLII)

the sphere of the other branches of government. These include choices in relation to the type of healthcare system (*Chaoulli* at para 107), approaches to illegal drug use and addiction (*PHS* at para 105), limits on how and where prostitution may be conducted (*Canada (Attorney Genera) v Bedford*, 2013 SCC 72 at para 5), addressing physician-assisted death (*Carter v Canada (Attorney General)*, 2015 SCC 5 at para 98) and the prioritization of homeless and inadequate housing (*Tanudjaja* at para 33). These are all important societal issues, the decisions in relation to which fall more appropriately on the legislative and executive branches of government. They attract a variety of social, political, scientific and moral reactions. There is room for disagreement between reasonable people about how these issues should be addressed (*PHS* at para 105).

[45] However, when policy choices are translated into law or state action, that resulting law or state action must not infringe the constitutional rights of the Plaintiffs. As such, it is the specific law or state action – or possibly a network thereof – that is subject to *Charter* review and that forms the basis upon which the rest of the *Charter* analysis can occur. “A challenge to a particular law or particular application of such law is an archetypal feature of *Charter* challenges under s. 7 and s. 15” (*Tanudjaja* at para 22).

[46] The Plaintiffs do not plead definable law or state action in issue, or for that matter a network in respect thereof. I agree with the statement made by the Ontario Court of Appeal in *Tanudjaja*, that it is not the case that a Court could never consider the constitutionality of a network of programs. In fact, Courts have already considered the constitutionality of a network of laws in some cases. For example, in *Bedford*, the Supreme Court considered three impugned provisions that prevented prostitutes from implementing certain safety measures (*Bedford*, above

2020 FC 1008 (CanLII)

TAB 31

COAL CONSERVATION ACT

CHAPTER C-14

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of Alberta, enacts as follows:

Definitions

1(1) In this Act,

(a) "agent" means a person appointed by the owner of a mine site, mine or coal processing plant, to act as a representative of the owner;

(b) "Board" means the Energy Resources Conservation Board;

(c) "certificate of competency" means a certificate granted under the *Coal Mines Regulation Act* or the *Coal Mines Safety Act* and entitling the holder to perform the duties of the occupation or office in respect of which the certificate is granted;

(d) "coal", in addition to its ordinary meaning, includes manufactured chars, cokes and any manufactured solid coal product used or useful as a reductant or energy source or for conversion into a reductant or energy source;

(e) "coal processing plant" means an installation for upgrading the quality of coal or for producing a marketable solid fuel, and includes any coal storage facility directly associated with it;

(f) "exploratory program" means a geological or geophysical study, investigation, reconnaissance or survey undertaken to establish the geological or physical settings of coal in a given area, or to ascertain the nature, quality or extent of coal occurrences in a given area;

(g) "manager" means the chief officer having control and daily supervision of a mine or mine site;

(h) "mine" means a working, other than a drill hole made while exploring for coal, from which coal is or could be extracted, whether commercially or otherwise;

(i) "mine site" means a location at which a facility for extracting coal by underground, strip or open pit operations exists or is to be developed, and includes

under subsection (3) subject to any terms and conditions he considers necessary or desirable.

1973 c65 s21,1975(2) c45 s5,1977 c79 s1

Compliance with other Acts

22 The performance of an operation in accordance with a permit or licence under this Part does not relieve a person from the requirements or liabilities arising under any other Act or otherwise.

1973 c65 s22

PART 5

OPERATION AND ABANDONMENT OF COAL PROCESSING PLANTS

Coal processing plants

23(1) No person shall

(a) construct or begin operations at a new coal processing plant,

(b) resume operations at a previously shut-in or abandoned coal processing plant,

(c) resume normal operation at an extensively rebuilt, modified or re-equipped coal processing plant, or

(d) operate facilities directly connected with a coal processing plant,

without applying for, and obtaining, an approval from the Board.

(2) An application under subsection (1) shall include

(a) a map or plan showing the exact location of the coal processing plant and all connected facilities in relation to

(i) the mine or mines from which the plant draws coal,

(ii) all nearby bodies of water, and

(iii) inhabited buildings and other private or public works,

(b) an outline of what steps are proposed for controlling pollution from the coal processing plant and its connected facilities, and

(c) any further information the Board requires.

1973 c65 s23

Authorizations and approvals required

24(1) Before the Board issues an approval pursuant to this Part, it shall refer the application to the Minister of the Environment for his approval of the application as it affects matters of the environment.

(2) The Minister of the Environment may give his approval with or without conditions, but when conditions are imposed, the Board shall, if it grants an approval, make its approval subject to the same

conditions imposed by the Minister of the Environment when he gave his approval.

(3) No approval relating to a coal processing plant capable of treating more than 45 000 tonnes of coal per year by normal continuous working shall be issued by the Board pursuant to this Part unless the Lieutenant Governor in Council has first authorized the issue of the approval.

(4) The Lieutenant Governor in Council may make his authorization under subsection (3) subject to any terms and conditions he considers necessary or desirable.

1973 c65 s24,1977 c79 s1

Order to shut down plant

25 If at any time after the issue of an approval under section 23, it appears to the Board that operations at a coal processing plant or facilities connected with the plant fail to comply with the conditions of the approval, the Board may order the plant or affected parts of it to be shut down until it is satisfied that the conditions will be complied with.

1973 c65 s24

Change in ownership

26(1) When a change in ownership of a coal processing plant occurs, the former owner and the new owner shall

(a) immediately notify the Board in writing and furnish any particulars respecting the change the Board requests, and

(b) apply to the Board for an amendment of the approval or for a new approval to reflect the change of ownership.

(2) If a coal processing plant has been materially altered, expanded or re-equipped, the holder of the approval shall apply to the Board for an amendment of the approval before resuming operations.

1973 c65 s26

Shut-down or suspension of operations

27(1) When it is intended to shut down permanently a coal processing plant or a major facility directly connected with it, or when normal operations are to be suspended for more than 3 months, the holder of the approval shall advise the Board of the planned shut-down or suspension and obtain its consent.

(2) The shut-down or suspension shall comply with any conditions the Board sets out in its consent.

(3) If, in connection with a shut-down or suspension under subsection (1), the holder of the approval fails to comply with the conditions prescribed in the Board's approval or consent, the Board may

(a) direct other qualified personnel to do whatever is necessary to remedy the failure, and

(b) charge all attendant costs to the holder of the approval.

TABLE OF CONTENTS

1.2.1 Coal Development Policy for Alberta (1976)

The Coal Development Policy for Alberta is designed to bring about and maintain the maximum benefits of the province's coal resources for the people of Alberta. A fundamental principle of the Coal Development Policy is that no development will be permitted unless the Alberta Government is satisfied that it may proceed without irreparable harm to the environment and with satisfactory reclamation of any disturbed land.

The Coal Development Policy provides a classification of provincial lands into four categories based on: their relative environmental sensitivity; the range of alternate land uses; the potential coal resources; and the extent of existing development of townsites and transportation facilities.

The Coal Development Policy also provides for a four-step screening and approval process for coal mines which includes:

(1) preliminary disclosure to government,

(2) disclosure by the applicant to the public,

(3) consideration of a formal application through a public hearing, and

(4) a final decision by the government.

CRC submitted a preliminary disclosure, as required by the Coal Development Policy, to the Government of Alberta and in December 1985 received approval in principle to proceed to the next stage of the approval process.

1.2.2 Alberta Environmental Protection

The Cheviot Coal Project includes both a surface mine producing a projected 3.2 million tonnes of coal per year and a coal processing plant. As a result, it is a mandatory project as set out under the Environmental Assessment Regulations of the AEPEA and so requires the preparation of an EIA.

A draft Terms of Reference for the EIA was developed jointly between both the federal and provincial governments and CRC. These were made available to the public for review in October 1994. After receipt of comments, the Terms of Reference were finalized and published by the Alberta Director of Environmental Assessment on 23 January 1995. The EIA was submitted by CRC in March 1996 to the EUB as one component of its application. Following the review of the EIA, AEP's Director of Environmental Assessment advised the EUB on 18 September 1996 that the EIA now addressed the requirements set out in Section 47 of the AEPEA and in the final Terms of Reference. The Director also advised the EUB that the EIA report was complete pursuant to Section 51 of the AEPEA.

6 LAND USE EFFECTS

The proposed Cheviot Coal Project is located on lands owned by the Province of Alberta (i.e. Crown lands) and is subject to government land use policies. A number of other uses are currently made of these and nearby lands, including: provincial natural areas, recreational uses, commercial developments, and federal national parks. (A number of communities are also located near to the Cheviot Coal Project. The expected environmental effects of the Cheviot Coal Project on them are discussed in Section 7 of the report.)

6.1 Land Use Policies

6.1.1 Views of the Applicant

In their application, CRC acknowledged that several provincial zoning policies cover the proposed development areas of the Cheviot mine, including the Coal Development Policy for Alberta, the Eastern Slopes Policy, and the Coal Branch Sub-Regional Integrated Resource Plan.
CRC also noted that the proposed Cheviot Coal Project area is located entirely within the Municipal District (M.D.) of Yellowhead No. 94. The applicant indicated that, should the project be approved by the provincial and federal governments, local development approvals would also be required and would be subject to the development policies of the M.D.

Coal Development Policy

CRC noted that the 1976 Alberta Coal Development Policy identifed a variety of categories which set out the extent to which exploration and development of coal resources may be considered in Alberta. The categories are based on factors such as potential coal resources, infrastructure requirements, alternate land uses, environmental sensitivity, and reclamation capability.

At the hearing, CRC advised the Panel that all lands within the mine permit area were classified under the Coal Conservation Act as Category 4 lands; that is, lands:

> *"in which surface or underground mining or in-situ operations may be considered subject to proper assurances respecting protection of the environment and reclamation of disturbed lands".*

CRC stated that the Coal Development Policy zoning for the proposed Cheviot area recognizes the previous mining activity in the area, as well as the high potential for the area to still contain significant coal resources, the proximity of infrastructure, the presence of successful coal operations, and reclamation achievements in the immediate area. In CRC's view, these all confirm the capability of the area to accommodate future coal mining.

Coal Branch Sub-Regional Integrated Resource Plan

CRC stated that the 1995 Coal Branch Sub-Regional Integrated Resource Plan outlined the government's most recent general resource management policy for public lands and resources within the Coal Branch planning area. CRC stated that the Integrated Resource Plan identified eight Resource Management Areas (RMAs) within the Coal Branch Region and that the Cheviot project area is within the Mountain Park–Folding Mountain RMA. CRC observed that the Integrated Resource Plan (page 66) stated that:

> *"The management intent for the Mountain Park–Folding Mountain RMA is to recognize a varied range of provincially significant resources such as coal, wildlife, extensive recreation, tourism and historical resources. A limited range of other multiple use activities will also be provided, while recognizing the importance of watershed protection."*

CRC indicated that four land use zones and their associated objectives have been established for the immediate area within and around the Cheviot Coal Project. These are:

- *Zone 1 - Prime Protection: "To preserve environmentally sensitive terrain and valuable ecological and aesthetic resources."*

- *Zone 2 - Critical Wildlife: "To protect specific fish and wildlife populations by protecting aquatic and terrestrial habitat crucial to the maintenance of those populations."*

- *Zone 4 - General Recreation: "To retain a variety of natural environments within which a wide range of outdoor recreation opportunities may be provided."*

- *Zone 5 - Multiple Use: "To provide for the management and development of the full range of available resources, while meeting long-term objectives for watershed management and environmental protection."*

Of these, CRC noted that only Zones 2, 4, and 5 are found within the lands to be disturbed by the Cheviot Coal Project. CRC stated that while Zone 1 (Prime Protection) lands border part of the Cheviot Coal Project area, they do not occur within it and that the breakdown of the land use zones within the project is: 83 per cent Critical Wildlife; 8 per cent General Recreation; and 9 per cent Multiple Use.

Coal Branch Access Management Plan

CRC indicated that the Coal Branch Access Management Plan, which was developed in 1995, also had a bearing on the Cheviot Coal Project. CRC stated that the Access Management Plan was intended to manage motorized and non-motorized recreational use on existing access routes on public land. The Plan was created in order to provide opportunities for compatible motorized and

non–motorized recreational use, while meeting the fish and wildlife objectives and maintaining the integrity of the natural environment as outlined in the Integrated Resource Plan. Within the Mountain Park–Folding Mountain RMA, the planning area considered by the Access Management Plan included all Zone 1, 2, and 4 areas. To date, the plan has only been implemented on a voluntary basis, with a public review proposed for the latter half of 1997.

CRC stated that the proposed mine and coal preparation plant operations would disturb portions of designated motorized access corridors from the project area to Drummond/Prospect Ridge and to Cadomin Ridge/Cadomin Mountain. CRC stated that it was prepared to work with provincial land managers and affected stakeholders to review access alternatives and, where appropriate, develop trails outside the disturbance area, and thereby provide linkages to the existing trail system. In addition, CRC stated that it would prepare annual access plans within the project area that would be available for review by interested recreation user groups. As a result, CRC believed that the proposed Cheviot Coal Project would have an insignificant impact on the Coal Branch Access Management Plan.

Special Places 2000

In their application, CRC noted that Special Places 2000 is a 1995 government policy committed to the identification and protection of a network of natural landscapes that represent the environmental diversity of the province's six natural regions and 20 sub–regions. CRC noted at the hearing that the Alberta Minister of Environment had advised the Special Places Coordinating Committee that the Cardinal Divide Natural Area is an effective and adequate commitment to the protected areas program for this portion of the Rocky Mountains. CRC stated that, in its view, approval of the Cheviot Coal Project would have no impact on the Special Places 2000 program.

CRC stated that, while it was aware that there are other land use policies which may have some degree of relevance to the Cheviot Coal Project, it was their belief that the policies noted above were the overriding authority for the area. Furthermore, CRC stated that whatever land use limitations may have previously applied to the Cheviot Coal Project under the 1984 Eastern Slopes Policy, those had now been superseded by the more recent Integrated Resource Plan.

CRC stated that it recognized that zoning policies carry restrictions and/or guidelines for industrial development within the areas of their coverage and hence must be assessed for potential conflicts or development conditions. CRC stated that it had incorporated what it interpreted as being the required components of the aforementioned policies into its EIA.

6.1.2 Views of the Interveners

The AWA Coalition stated that they believed the applicant had not given an appropriate amount of consideration to all of the relevant policies that apply to the proposed Cheviot project area. The AWA Coalition also felt that, due to the possibility of impacts extending beyond the proposed project boundary, the policies which apply to lands adjacent to the proposed project area should also have been considered.

required or if access management can continue on a voluntary basis. Given this, AEP requested that the Panel leave the issue of access to the provincial process.

6.1.3 Views of the Panel

As noted earlier in this report, the Panel does believe that the consistency of a project with government policy does provide one of many tests of the public acceptability of a project. In the case where there are inconsistencies between the policies themselves, the Panel believes that it is reasonable, unless it can be demonstrated otherwise, to consider either the most recent and/or the most site specific as paramount. In the case of the Cheviot Coal Project, the Coal Branch Sub-Regional Integrated Resource Plan is clearly both the most recent and site specific. That plan also clearly anticipates potential coal mining in the area, to the extent that it sets out specific criteria for an applicant to meet in its environmental planning. The Panel agrees with the position taken by AEP that the Cheviot Coal Project is conceptually consistent with the Integrated Resource Plan for the region. The Panel also finds that the Cheviot Coal Project is consistent with the Alberta Coal Development Policy. Nor is the Panel convinced that further consideration of the area under the Special Places 2000 program is likely.

With regard to access management, this issue has been addressed to some degree previously (Section 4.4) and will be addressed again in Section 6.4. However, the Panel notes that AEP did not raise concerns with CRC's proposals to ensure that Cheviot Coal Project activities were consistent with the Coal Branch Access Management Plan, and accepts that these issues can be addressed during the mine development process.

6.2 Natural Areas

6.2.1 Views of the Applicant

In their application, CRC indicated that two sites near the proposed mine permit area have been designated as Natural Areas, and that two other sites have been nominated as Candidate Natural Areas. The designated Natural Areas were the Cardinal Divide Natural Area south and west of the proposed mine and the Muskiki Lake Natural Area several kilometres to the east. The two candidate sites identified by CRC were the Cadomin Caves Candidate Natural Area located south of Cadomin, and the Grave Flats Candidate Natural Area located 5 km east of the project area. In its application, CRC only addressed possible environmental effects of the Cheviot Coal Project on the Cardinal Divide Natural Area and the Cadomin Caves Candidate Natural Area, as these were the closest to the proposed developments.

Existing Conditions

CRC indicated that the Cardinal Divide Natural Area was established under the Alberta Special Places 2000 legislation in 1995. Bordering part of both the western and southern boundaries of the proposed Cheviot mine project area, it covers approximately 6500 ha and lies between the proposed mine and Jasper National Park to the west and the Cardinal River to the south (Figure 6). CRC also noted that

The Municipal Government Board and BTC Properties II Ltd. also known as "BTC PROPERTIES II LTD."

Respondents

Reasons for Judgment
of the
Honourable Madam Justice B. E. Romaine

---

[1] The City of Calgary applies for judicial review of Municipal Government Board Order 057/08 (the Impugned Order). The issue is whether BTC Properties II Ltd. was properly assessed for business tax on parking facilities located in each of three office buildings owned by it. This largely depends upon whether BTC or the tenants renting the parking operated a business in the parking facilities.

I. BACKGROUND

[2] Prior to 2003, it was not the City's practice to assess business tax on parking space or facilities associated with office buildings and rented to the tenants of those buildings. This changed as a result of the MGB's decision in *Tonko Development Corporation v. Calgary (City)*, MGB 078/03 in which various parking operators, both property owners and third parties

operating under leases or other agreements with the owners, challenged 2002 business tax assessments relating to numerous parking facilities operated by them. One basis for the challenge was that the assessments were inequitable. The MGB found that the parking operators were assessable but agreed that the assessments were inequitable and reduced each to $1.00. The MGB found a systemic inequity resulting from the fact that the owners/landlords of parking facilities in office buildings were competing businesses but were not being assessed. As a result, the City began assessing both parking operators and owners/landlords of office building parking facilities for 2003 business tax.

[3] BTC and numerous other parking operators and owners/landlords appealed the 2003 assessments, and like assessments for the 2004, 2005 and 2006 taxation years, to the Calgary Assessment Review Board (ARB).

[4] On further appeal to the MGB, BTC's 2004 assessments on the subject parking facilities were affirmed. BTC's grounds for appeal of the 2004 assessments were the same as its grounds for appeal of the 2005 and 2006 assessments, the appeals under review in the present case. The 2004 assessments were affirmed on the basis that there was insufficient evidence to decide the matter: *Altus Group Calgary v. Calgary (City)*, MGB 016/06. In the Impugned Order, the MGB granted BTC's 2005 and 2006 appeals. The MGB distinguished its decision affirming the 2004 assessments on the basis, in this case, BTC had brought forth considerable evidence, in the form of the leases governing the subject parking facilities, to support its appeals: Impugned Order p. 13.

[5] This judicial review relates to BTC's appeal to the MGB of its 2005 and 2006 business tax assessments on the subject parking facilities. The facilities are underground parkades located in each of three multi-storey, multi-tenanted office buildings in the Calgary core and beltline areas. The buildings are owned by BTC and are referred to respectively as the IBM Building, the Energy Plaza Building and the BP Centre Building. The parking facilities in each of the buildings were rented at all material times exclusively to the business tenants of the buildings.

[6] BTC, as well as numerous other owners/landlords and parking operators of parking facilities, appealed their 2005 assessments to the ARB. BTC's Issue Statement raised the following grounds of appeal:

> Issue - Assessment incorrectly determined. Support - Bylaw 8M2005 does not identify parking as an assessable use, the bylaw is applied inconsistently within the same property. Current application of the NARV assigns a Business Asmt. and tax to vacant space...
> Issue - Incorrect Person Assessed. Support - The owner of the premises has been levied the assessment and tax instead of the occupant and the associated business...
> Issue - The NARV is unsupported by evidence and market fact. Support - No evidence is provided by the assessment office to substantiate how the NARV is achieved...
> Issue - Some assessed occupancies are tax exempt....

2010 ABQB 719 (CanLII)

[7] BTC's appeal was heard in conjunction with appeals on approximately 40 other properties. On August 24, 2005, the ARB affirmed the 2005 assessments. Each of the ARB decisions relating to each of the three parking facilities is one page in length and states the following under the section entitled "Decision with Reasons":

> ...It is the Board's decision that in most instances it is the owners or landlord and not the tenant who is the properly assessed person. The owner has care and control of the parking spaces and receives the revenue. Although the development permit requires that parking be provided, it does not indicate who shall manage the parking spaces. With regards to the allegation that many similar parking facilities have not been assessed, the Board finds there is inconclusive evidence to support this position...

[8] BTC, and numerous other owners/landlords and operators of parking facilities, also appealed their 2006 assessments to the ARB. BTC's Issue Statement raised the following grounds of appeal: (1) the NARV for the facilities may be incorrect for a number of reasons; and (2) the City erred in assessing and levying a business tax in respect of the parking facilities for the subjects as: (i) Bylaw 9M2006 does not contemplate a business tax assessment of the subjects; (ii) City applied the bylaw in a manner that was incorrect and contrary to its purpose and intent in respect of the assessed person. BTC's appeal to the ARB was heard in conjunction with approximately 47other appeals. The ARB affirmed the 2006 assessments. No formal decision was rendered other than a one page form letter mailed May 24, 2006 indicating that the assessment was confirmed.

[9] BTC and other parking operators and owners/landlords appealed both the 2005 and 2006 ARB decisions to the MGB. The 2005 Applications for Assessment Appeal state the grounds for appeal as follows: (1) the assessment is incorrectly determined and NARV is unsupported by evidence and market fact; (2) "incorrect assessed person"; and (3) "the owner of the property should not be the assessed person under bylaw 8M2005". The 2006 Application for Assessment Appeal reasons for appeal were as follows: (1) Bylaw 9m2006 does not specifically address assessment of parking facilities; Bylaw is applied inconsistently and contrary to intent and purpose; (2) incorrect stall counts are assessed; (3) NARV may not represent actual rents (net) the subject achieves; (4) comparison analysis identifies potential inequity in treatment of similar situations.

[10] The MGB hearing took place over four days, on January 14, 16, 17 and 18, 2008. Prior to the hearing, all property owners except BTC withdrew their 2005 and 2006 appeals. At the hearing, the MGB received and reviewed the ARB Record, heard evidence from BTC's two witnesses and the City's witness, examined building leases provided by BTC, and heard extensive argument from both the City and BTC. On May 26, 2008, the MGB rendered the Impugned Order allowing the appeals and setting the assessments to nil. It stated in its reasons that while BTC was not the proper assessed person, the tenants of the buildings may be.

[11] On January 19, 2009, the MGB denied the City's request to reconsider the Impugned Order: see *Calgary (City) v. BTC Properties II Ltd.*, MGB 006/09.

2010 ABQB 719 (CanLII)

2010 ABQB 719 (CanLII)

II. LEGISLATION

A. MUNICIPAL GOVERNMENT ACT

[12] The imposition of business tax is authorized under the *Municipal Government Act*, R.S.A. 2000, c. M-26 (MGA), Part 10, Division 3.

[13] Business tax must be imposed under a business tax bylaw. Section 371 of the MGA gives the City power to pass a business tax bylaw. Section 372 of the MGA gives the City power to impose a business tax bylaw on all businesses operating in the municipality unless the business was exempt from tax. Section 373 of the MGA requires the person operating the business to pay the business tax.

[14] Section 374 of the MGA specifies the contents of the bylaw. The business tax bylaw is to contain assessments of businesses to be prepared and recorded on a business assessment roll: s. 374(1). The bylaw is to specify one or more methods to be used to prepare business tax assessments. One method, the method chosen by the City in the present case, is on "a percentage of the net annual rental value of the premises" (the "NARV method"): s. 374(1)(b)(i.1). The bylaw is also to specify the basis upon which a business tax may be imposed by prescribing, for the NARV method, "the percentage of the net annual rental value": s. 374(1)(c)(i.1).

[15] "Business" is defined under s. 1(1)(a) of the MGA as follows:

> (i) a commercial, merchandising or industrial activity or undertaking;
> (ii) a profession, trade, occupation, calling or employment, or
> (iii) an activity providing goods or services,
> whether or not for profit and however organized or formed, including a co-operative or association of persons;

[16] ARB functions and decisions are dealt with in Part 11 of the MGA. Section 460 specifies the types of complaints that can be made to the ARB and includes complaints about matters shown on an assessment or tax notice including a description of a property or business (s. 460 (5)(a)); the name and mailing address of an assessed person or taxpayer (s. 460(5)(b)); an assessment (s. 460(5)(c)); and whether the property is assessable (s.460(5)(i)).

[17] Part 11, s. 467 of the MGA deals with decisions of the ARB:

> 467 (1) An assessment review board may make any of the following decisions:
> ...
> (b) make a change with respect to any matter referred to in section 460(5);

(c) decide that no change to an assessment roll or tax roll is required.

(2) An assessment review board must not alter any assessment that is fair and equitable, taking into consideration assessments of similar property or businesses in the same municipality.

[18] Part 12, s. 499(1) of the MGA deals with appeals to the MGB:

499 (1) On concluding a hearing the Board may make any of the following decisions:
...
(d) make any decision that the assessment review board could have made, if the hearing relates to the decision of an assessment review board;

(2) The Board must not alter

(a) any assessment that is fair and equitable, taking into consideration assessments of similar property in the same municipality, and...

[19] In proceedings before the MGB, the MGB is not bound by the rules of evidence and may hear new evidence: s 496 (1).

B. CALGARY BUSINESS TAX BYLAWS 8M2005 AND 9M2006

[20] The City passed the business tax bylaws in question, Bylaws 8M2005 and 9M2006 (the Bylaws). They are identical. There is no dispute that the Bylaws complied with the foregoing provisions of the MGA.

[21] NARV is defined under s. 3(e) of each Bylaw as "the typical market annual rental value of the Premises exclusive of operating costs, but inclusive of the costs of leasehold improvements".

[22] Section 4(2) of each Bylaw states that the business assessments are based on 100 percent of the NARV of the premises.

[23] The definition of "business" in s. 3 (c) of the Bylaws is the same as the definition of "business" in s. 1(1)(a) of the MGA.

[24] The term "premises" is not defined in the MGA but is defined in s. 1(g) of the Bylaws as follows:

1(g) "Premises" means any space occupied or used for the purpose of or in connection with a Business, and without limiting the generality of the foregoing includes:

(i) land and buildings or part of buildings on such land; and

2010 ABQB 719 (CanLII)

(ii) any store, office, warehouse, factory, facility, hotel, motel, enclosure, yard or other space.

[25] Section 18(1) of each Bylaw states that if a business would not have been subject to the imposition of business tax under the *Municipal Taxation Act*, R.S.A. 1980, c. M-31 (MTA), it continues to be non-taxable.

III. ISSUES

1. What is the appropriate standard of review?

2. Applying the appropriate standard of review, did the MGB err in its findings?

IV. DISCUSSION AND ANALYSIS

A. STANDARD OF REVIEW

1. Position of parties

[26] The City's approach appears to be that where a party alleges that an administrative decision maker's reasons are not only unreasonable or incorrect, but also inadequate, a double-barrelled approach to the standard of review analysis may be employed. It challenges the MGB's decision based on procedural unfairness, applying a correctness standard of review, and on a reasonableness/correctness standard of review applying the analysis in *Dunsmuir v. New Brunswick*, 2008 SCC 9, [2008] 1 S.C.R. 190.

[27] The City argues that the appropriate standard of review is correctness based on three alleged errors made by the MGB. First, it argues that the MGB's decision is procedurally unfair because its reasons are so deficient as to constitute an error of law. Second, it argues that it was procedurally unfair for the MGB to decide that the tenants had exclusive use of the parking premises and imply that they were liable for the business tax when the tenants were not represented at the MGB hearing. Third, it argues that the MGB's decision exempted BTC from the payment of business tax and that decisions regarding exemption from tax are outside the MGB's jurisdiction. In the alternative, the City argues that if a judicial review analysis under *Dunsmuir* is conducted, applying either a correctness or reasonableness standard, the MGB's reasons and decision should be quashed and the matter returned to a different hearing panel of the MGB for rehearing. It argues that if a correctness standard is applied, the reasons and decision of the MGB are not correct. It argues that if a reasonableness standard is applied, the reasons and decision of the MGB are not reasonable because the reasons are not transparent or intelligible and do not provide appropriate justification for the MGB's conclusions.

[28] The MGB made submissions to the Court confined to explaining the Record, addressing the standard and scope of judicial review, and explaining the MGB's practices and policies

2010 ABQB 719 (CanLII)

within its statutory mandate relative to the matters in issue. It took no position on the correctness, reasonableness or fairness of its decision.

[29] The MGB resists the application of a parallel judicial review analysis. It submits that the requirement to give reasons should not be so expanded that it "eats up" the judicial review analysis of the substantive reasons required under *Dunsmuir*. It argues that a parallel review goes directly against the Supreme Court of Canada's intention in *Dunsmuir* to simplify the judicial review analysis. It submits that the standard to be applied depends, in part, on the characterization of the issues before the MGB, which it characterizes as issues of fact and mixed law and fact attracting a reasonableness standard of review. It submits that the issue before the MGB was whether BTC was assessable for business tax on the parking facilities. This required the MGB to interpret the MGB and the Bylaws and make findings of fact and law related to whether parking facilities are assessable, whether BTC was operating a business in the City of Calgary, and whether it was operating its business in the parking facilities.

[30] The MGB challenges the characterization of its decision to reduce the business tax assessment to nil as a jurisdictional issue. It argues that the MGA specifically gives the MGB the authority to deal with assessment appeals. It submits that the issue before the MGB was not whether it had jurisdiction to exempt BTC from tax or to hear an appeal which could result in an exemption. The issue was whether BTC was assessable under the MGB, which is wholly within its jurisdiction to decide. It also submits that it did not decide, in the tenants' absence, that the tenants were assessable for business tax on the parking facilities. It left that issue open.

[31] BTC submits that the standard of review is reasonableness. It characterizes the issue as one of mixed law and fact. It submits that the MGB embarked on a fact finding mission and then applied those facts to the legislative scheme and the Bylaws. It considered the evidence and business tax assessment policy and equity. It submits that this was a classic case of applying the facts and findings to the law.

2. Law re standard of review for procedural fairness issues

[32] Generally, the standard of review for issues of procedural fairness and the legal obligation to give reasons is correctness: *Clifford v. Ontario (Attorney General)*, 2009 ONCA 670, 98 O.R. (3d) 210, leave to appeal to the SCC dismissed [2009] S.C.C.A. No. 461; *Alberta Liquor Store Association v. Alberta (Gaming and Liquor Commission)*, 2008 ABQB 595, 450 A.R. 1 at para. 56. In *Clifford*, the Court held at paras. 22 - 23 that if there is a legal obligation to give reasons, there can be no deference granted to a tribunal's decision to not give reasons.

a. Doctrine of legitimate expectations

[33] The Supreme Court of Canada expanded the duty of procedural fairness in *Baker v. Canada (Minister of Citizenship and Immigration)*, [1999] 2 S.C.R. 817, [1999] S.C.J. No. 39. Reasons are required from tribunals such as the MGB where the decision has an important

2010 ABQB 719 (CanLII)

significance for the individual or if there is a statutory right of appeal. In doing so, the Supreme Court of Canada commented on the doctrine of legitimate expectations, at para. 26:

> [...] the legitimate expectations of the person challenging the decision may also determine what procedures the duty of fairness requires in given circumstances. Our Court has held that, in Canada, this doctrine is part of the doctrine of fairness or natural justice, and that it does not create substantive rights [citations omitted]. As applied in Canada, if a legitimate expectation is found to exist, this will affect the content of the duty of fairness owed to the individual or individuals affected by the decision. If the claimant has a legitimate expectation that a certain procedure will be followed, this procedure will be required by the duty of fairness: [citations omitted]. Similarly, if a claimant has a legitimate expectation that a certain result will be reached in his or her case, fairness may require more extensive procedural rights than would otherwise be accorded [citations omitted]. Nevertheless, the doctrine of legitimate expectations cannot lead to substantive rights outside the procedural domain....
> [Emphasis added]

[34] The doctrine of legitimate expectations provides that a certain process will be followed rather than assuring a particular result. Further, in certain cases, more extensive procedural rights are afforded, however, the doctrine of legitimate expectations does not produce or deal with substantive rights. Put another way, a decision maker's discretion to reach a certain result is unfettered by the doctrine of legitimate expectations. Examples of procedural rights arising from this doctrine include the right to make representations and the right to be consulted: *Moreau-Bérubé v. New Brunswick (Judicial Council)*, 2002 SCC 11, [2002] 1 S.C.R. 249 at para. 78. The City cites *Edison v. Canada*, 2001 FCT 734, 208 F.T.R. 58 at para. 23 which confirms that legitimate expectations arise "where an individual relies on procedural norms established by past practice or published guidelines...".

[35] *Baker* expanded a tribunal's duty to give reasons but also confined the application of the doctrine of legitimate expectations to procedural rights. The City cannot use this doctrine to argue for a different determination outside of the procedural domain.

b. Difference between adequacy of reasons and the substantive decision made

[36] The difference between challenging the procedural fairness of a decision based on the inadequacy of reasons under *Baker* and challenging the substantive decision applying the *Dunsmuir* standard of review analysis has recently been analysed by the Ontario and the Newfoundland and Labrador Courts of Appeal.

2010 ABQB 719 (CanLII)

[37] In its 2009 decision in *Clifford*, the Ontario Court of Appeal found that where a lack of procedural fairness based on the inadequacy of reasons is alleged, two separate analyses must be conducted for judicial review purposes. The initial threshold review requires an analysis of whether the administrative body has satisfied its procedural fairness obligation to give reasons. The second review requires an analysis of whether the administrative body's substantive reasons and decision are reasonable or correct applying the *Dunsmuir* analysis. The Court stated at paras. 31 - 32:

> In addition, in my view, it is important to differentiate the task of assessing the adequacy of reasons given by an administrative tribunal from the task of assessing the substantive decision made. A challenge on judicial review to the sufficiency of reasons is a challenge to an aspect of the procedure used by the tribunal. The court must assess the reasons from a functional perspective to see if the basis for the decision is intelligible.
>
> This is to be distinguished from a challenge on judicial review to the outcome reached by the tribunal. That may require the court to examine not only the decision but the reasoning offered in support of it from a substantive perspective. Depending on the applicable standard of review, the court must determine whether the outcome and the reasoning supporting it are reasonable or correct. That is a very different task from assessing the sufficiency of the reasons in a functional sense.

[38] Jeffrey J. recently adopted and applied the foregoing passage from *Clifford* in *Calgary (City) v. Calgary Firefighters Assn.*, 2010 ABQB 226, [2010] A.J. No. 367 at para. 28.

[39] The majority of the Newfoundland and Labrador Court of Appeal subsequently took a different approach in *Newfoundland and Labrador (Treasury Board) v. Newfoundland and Labrador Nurses' Union*, 2010 NLCA 13, 294 Nfld. & P.E.I.R. 161, leave to appeal to the SCC granted [2010] S.C.C.A. No. 137. The majority decision frames the issue as whether the trial division judge erred in concluding that the arbitrator's decision was unreasonable because the decision-making process lacked justification, transparency and intelligibility. This is the test for reasonableness developed in *Dunsmuir*. The Court split on the issue of whether it must conduct both a procedural fairness analysis as to the adequacy of the reasons and a separate *Dunsmuir* analysis as to the reasonableness or correctness of the substantive reasons. Welsh J., for the majority, preferred a simplified approach, stating at para. 12:

> Finally, a comment may be of assistance regarding the interplay between adequacy of reasons in the context of procedural fairness and the first prong of the *Dunsmuir* analysis, this is, the aspect of reasonableness directed to the process of articulating the reasons, requiring justification transparency and intelligibility in the decision-making process. Clearly, the *Dunsmuir* analysis requires a consideration of the reasons provided by the

2010 ABQB 719 (CanLII)

> tribunal. A failure to give reasons, or inadequate reasons, would be decisive in the reasonableness assessment. A complete lack of or inadequate reasons could not be said to provide the justification, transparency and intelligibility in the decision-making process required to satisfy reasonableness under the *Dunsmuir* analysis. Unless legislation eliminates the necessity for reasons, reasonableness is the standard required to be met by a tribunal. Since reasons, including adequacy thereof, constitute a component of reasonableness, a separate examination of procedural fairness is an unnecessary and unhelpful complication.
> [Emphasis added]

[40] Cameron J., in dissent, appeared to prefer the two-step approach applied in *Clifford*, stating at para. 38:

> The distinction between the first part of a *Dunsmuir* review for reasonableness of a decision of an arbitrator (a substantive review) and a review of adequacy of reasons in response to a claim based on procedural fairness turns on the purpose of the review. The two procedures often use the same vocabulary: words such as "transparency" and "intelligibility" appear in the discussions of both. The difference is that a substantive review is concerned with the reasonableness of the decision and, to that end, it looks at the reasons articulated. A procedural fairness review examines the fairness of the process. It is directed to the ability to discern the reasons without reference to the question of whether the decision falls within the range of acceptable outcomes. In my opinion, where procedural fairness requires reasons be provided, *Dunsmuir* has not changed how a reviewing court would approach the task of reviewing adequacy of reasons. Issues of procedural fairness do not involve any deferential standard of review [citations omitted]...

[41] Thus, the approach to judicial review of this type of issue is different. The majority of the Newfoundland and Labrador Court of Appeal took a more simplified approach than the two-pronged approach adopted by the Ontario Court of Appeal. It found, in effect, that *Baker* is subsumed in *Dunsmuir*. There is no need to assess every decision firstly on whether the reasons are adequate applying a correctness standard and secondly on whether the reasons are reasonable or correct applying the *Dunsmuir* analysis. Welsh J. notes that if there is a total lack of reasons or inadequate reasons, justification, transparency and intelligibility cannot exist within the decision-making process.

[42] In my view, the requirement in *Baker* to give reasons does not occupy precisely the same ground as the Supreme Court of Canada's framework for analysing the sufficiency of reasons in *Dunsmuir*. However, there is some crossover since both involve an evaluation of the justification, transparency and intelligibility of the reasons. As the issue is not settled in Alberta, I will conduct two separate reviews, although I agree with the view of the majority of the

2010 ABQB 719 (CanLII)

Newfoundland and Labrador Court of Appeal which is consistent with the *Dunsmuir* goal of clarity and simplicity.

[43] It is noteworthy that the Supreme Court of Canada in *Law Society of New Brunswick v. Ryan*, 2003 SCC 20, [2003] 1 S.C.R. 247 at paras. 55-56 had the following to say on the topic of the reasonableness standard of review:

> A decision will be unreasonable only if there is no line of analysis within the given reasons that could reasonably lead the tribunal from the evidence before it to the conclusion at which it arrived. If any of the reasons that are sufficient to support the conclusion are tenable in the sense that they can stand up to a somewhat probing examination, then the decision will not be unreasonable and a reviewing court must not interfere (see *Southam* at para. 56). This means that a decision may satisfy the reasonableness standard if it is supported by a tenable explanation, even if this explanation is not one that the reviewing court finds compelling (see *Southam*, at para. 79).
>
> ...At all times, a court applying a standard of reasonableness must assess the basic adequacy of a reasoned decision remembering that the issue under review does not compel one specific result...

[44] This description of reasonableness can be taken as a description of the process for determining whether the reasons given by the tribunal are sufficient, whether the basis for the decision is intelligible and thus whether the process was fair, the first step in the two-step analysis adopted in *Clifford*. To isolate the first step and characterize it as being subject to some standard of "correctness" rather than "reasonableness" is to bring "correctness" in through the back door in an analysis that does not require such a standard, as reasons that do not meet such a test would surely, as Welsh J. has put it in Law Society of New Brunswick, be unreasonable.

3. Law re standard of review for substantive issues

a. General principles

[45] The Supreme Court reconsidered the analytical process employed by a court to ascertain the appropriate standard of review in the judicial review of administrative tribunal decisions in *Dunsmuir*. Where a standard of review analysis is required, a two-step process is now to be applied: *Dunsmuir* at paras. 62 and 64.

[46] First, the court determines whether the standard has been settled by the jurisprudence. Judicial precedent must have "determined in a satisfactory manner" the degree of deference to be accorded to "a particular category of question". It is not necessary to perform a fresh standard of review analysis in every case if the standard has already been set for the type of question in issue: *Dunsmuir* at paras. 57, 62.

2010 ABQB 719 (CanLII)

[47] Second, if the standard of review has not been satisfactorily determined, the court must perform a contextual standard of review analysis to determine whether the administrative decision maker should be given deference and a reasonableness standard applied. This involves the consideration of the following four factors: (1) presence of a privative clause; (2) purpose of the administrative decision maker as determined by its enabling legislation; (3) nature of the question(s) at issue; (4) expertise of the administrative decision maker: *Dunsmuir* at paras. 53 - 57 and para. 64.

[48] An exhaustive review of these factors is not required in every case and no one factor is determinative. The applicable factors must be weighed together to determine the proper level of deference required and thereby the appropriate standard of review: *Dunsmuir* at para. 56. Where the reviewing court determines that little or no deference is called for, a correctness standard of review is applied. Where the reviewing court determines that considerable deference is called for, a reasonableness standard of review is applied.

[49] In *Dunsmuir*, the Supreme Court of Canada gave guidelines as to the types of issues that normally attract a reasonableness standard of review and those that attract a correctness standard of review: at paras. 53 - 54:

> Where the question is one of fact, discretion or policy, deference will usually apply automatically *(Mossop* at pp. 599-600; *Dr. Q*, at para. 29; *Suresh*, at paras. 29-30). We believe that the same standard must apply to the review of questions where the legal and factual issues are intertwined with and cannot be readily separated.
>
> Guidance with regard to the questions that will be reviewed on a reasonableness standard can be found in the existing case law. Deference will usually result where a tribunal is interpreting its own statute or statutes closely connected to its function, with which it will have particular familiarity: *Canadian Broadcasting Corp. v. Canada (Labour Relations Board)*, [1995] 1 S.C.R. 157, at para. 48; *Toronto (City) Board of Education v. O.S.S.T.F., District 15*, [1997] 1 S.C.R. 487, at para. 39. Deference may also be warranted where an administrative tribunal has developed particular expertise in the application of a general common law or civil law rule in relation to a specific statutory context: *Toronto (City) v. C.U.P.E.*, at para. 72. Adjudication in labour law remains a good example of the relevance of this approach. The case law has moved away considerably from the strict position evidenced in *McLeod v. Egan*, [1975] 1 S.C.R. 517, where it was held that an administrative decision maker will always risk having its interpretation of an external statute set aside upon judicial review.

[50] A correctness standard necessarily applies where the nature of the issue before the tribunal is one of constitutional interpretation involving “true questions of jurisdiction” that arise where the tribunal must “explicitly determine whether its statutory grant of power gives it the authority to decide a particular matter”: *Dunsmuir* at para. 59; where the issue is a general

2010 ABQB 719 (CanLII)

question of law of "central importance to the legal system as a whole and outside the adjudicator's specialized areas of expertise": *Dunsmuir* at paras. 55 and 60; and, where the issue involves the jurisdictional lines between two or more competing specialized tribunals: *Dunsmuir* at para. 61. It is noteworthy that the issue of adequacy of reasons does not fit well into any of these categories.

2010 ABQB 719 (CanLII)

[51] The expertise of a tribunal is determined relative to the expertise of the court. Determining expertise requires the court to identify the nature of the issue before the tribunal, characterize the expertise of the tribunal relative to the nature of the issue, consider the court's own expertise relative to the nature of the issue, and determine whether the tribunal has relatively more expertise than the court with respect to the issue. The reviewing court determines the expertise of the tribunal by considering both the general expertise of the tribunal as well as its expertise regarding the issue under appeal or judicial review. Greater deference is indicated if the tribunal is more expert than the court and the issue under appeal or judicial review falls within the tribunal's greater expertise: *Dr. Q v. College of Physicians and Surgeons of British Columbia*, 2003 SCC 19, [2003] 1 S.C.R. 226.

[52] The Supreme Court of Canada explained the reasonableness standard in *Dunsmuir* at para. 47:

> Reasonableness is a deferential standard animated by the principle that underlies the development of the two previous standards of reasonableness: certain questions that come before administrative tribunals do not lend themselves to one specific, particular result. Instead, they may give rise to a number of possible, reasonable conclusions. Tribunals have a margin of appreciation within the range of acceptable and rational solutions. A court conducting a review for reasonableness inquires into the qualities that make a decision reasonable, referring both to the process of articulating the reasons and to outcomes. In judicial review, reasonableness is concerned mostly with the existence of justification, transparency and intelligibility within the decision-making process. But it is also concerned with whether the decision falls within a range of possible, acceptable outcomes which are defensible in respect of the facts and law.

b. Existing Case Law

[53] The existing case law indicates that a reasonableness standard of review should be applied to the MGB's decision in this case.

[54] One of the issues before the MGB was whether the parking facilities were occupied or used for the purpose of or in connection with BTC's business. Where the issue before the MGB was whether various properties used to provide food and beverage services were "...used in connection with educational purposes and held by . . . the board of governors" of a university under s. 362(1)(d)(i) of the MGA, the Alberta Court of Appeal applied a reasonableness standard of review: *University of Alberta v. Edmonton (City)*, 2005 ABCA 147, 363 A.R. 378. The Court

ruled that the nature of the problem was one of mixed fact and law, and that a moderate level of deference was called for.

[55] In *Calgary (City) v. Municipal Government Board (Alta.)*, 2008 ABCA 187, 432 A.R. 202 (*Hudson's Bay* decision), the MGB interpreted s. 460(3) of the MGA, specifically whether a party was "an assessed person" that could make a complaint as to "any assessed property or tax", even though it did not own the property assessed. The Alberta Court of Appeal ruled that the nature of the issue involved the interpretation of the MGA and was subject to a reasonableness standard of review.

c. Standard of Review Analysis

[56] In the event that a standard of review analysis is required, it also leads to the application of a reasonableness standard of review.

[57] Section 506 of the MGA states that there is no appeal from a decision of the MGB and has been characterized as a weak privative clause attracting a moderate degree of deference: *Alberta (Minister of Municipal Affairs) v. Telus Communications Inc.*, 2002 ABCA 199, 312 A.R. 40 at para. 3, leave to appeal to S.C.C. refused, [2002] S.C.C.A. 440.

[58] The purpose of the MGB is to supervise the assessment of real property for municipal taxation purposes with the objective of ensuring that all property in the Province subject to municipal taxation is fairly and equitably assessed. Where the MGB applies its expertise to assess the economic and operational realities which, in turn, impact upon its interpretation of the MGA, a reasonableness standard is applied. The assessment of economic and operational realities is a factual assessment which the MGB is uniquely equipped to make: *Telus*.

[59] The nature of the question before the MGB involved the interpretation of the MGA and the Bylaws and fact finding with regard to that interpretation. This can be characterized as an issue of mixed law and fact; however, the issues before the MGB were primarily factual. It was required to determine whether BTC occupied or used the subject parking facilities for its business. This required the MGB to examine the provisions of the leases applicable to the buildings and the facts regarding the occupation and use of the parking facilities. A reasonableness standard of review is indicated.

[60] The expertise of the MGB relative to the courts on issues of property valuation and assessment also indicates that deference be given to the MGB. In *Telus*, the Court ruled that the MGB "may have developed, through experience, a level of expertise in the area of property assessment...". The Court also considered the chambers judge's comment that the MGB had been given "an important expert role to play in determining whether it would be fair and equitable in light of the taxation of other linear property to include feature software in the definition of 'telecommunications system'". In assessing the relative expertise of the MGB and the reviewing court, the Court of Appeal ruled that the MGB was "uniquely equipped to assess the factual context and its expertise in that regard" was owed greater deference. As a result, the Court of

2010 ABQB 719 (CanLII)

Appeal ruled that, as the nature of the issue before the MGB was one of mixed law and fact, the standard of review was patent unreasonableness: *Telus* at paras. 33 - 34.

[61] Alberta courts have found that the MGB has "a particular expertise in appreciating the impact of various possible interpretations of the statutory provisions on its ability to fulfill its mandate to administer the appeal process relating to the taxation of property fairly and equitably": *Calgary (City of) v. Northland Property Ltd.*, 2003 ABQB 668, [2003] A.J. No. 970 at para. 13.

d. Conclusion

[62] Balancing the foregoing factors to be considered in a standard of review analysis, I find that a reasonableness standard of review is applicable. In this case, the MGB interpreted the provisions of the MGA and the Bylaws, made findings of fact, and applied the facts and its findings to the law. I do not agree with the City's argument that the MGB's decision to reduce the tax assessment to nil has the effect of granting a tax exemption to BTC and that this is a matter outside the MGB's jurisdiction. The issue was whether the City had properly assessed BTC for business tax under the MGA and the Bylaws. This was an issue which was clearly within the jurisdiction of the MGB.

B. APPLICATION OF STANDARD OF REVIEW

1. Application of standard of review to substantive issues

[63] A court conducting a review for reasonableness inquires into the qualities that make the decision reasonable. An administrative body's decision will be reasonable if two conditions are satisfied. First, justification, transparency and intelligibility must exist in the decision making process. Second, the decision must fall within a range of possible, acceptable outcomes which are defensible given the law and the facts: *Dunsmuir*. If the process employed by the administrative body and the outcome "fit comfortably with the principles of justification, transparency and intelligibility, it is not open to a reviewing court to substitute its own view of a preferable outcome.": *Canada (Citizenship and Immigration) v. Khosa*, 2009 SCC 12, [2009] 1 S.C.R. 339 at para. 59.

[64] The law applicable to the MGB's Impugned Order is the MGA and the Bylaws and the case law interpreting it. Further, although this Court is not bound by decisions of the MGB, it is informed by them.

[65] Business tax is assessable against those who operate a "business" in "premises" in the City of Calgary. To determine whether BTC was assessable for business tax on the subject parking facilities, the MGB was required to consider whether the subject parking facilities were "premises" as defined in the Bylaws; whether BTC was operating a "business" as defined in the MGA and the Bylaws; and whether the subject parking facilities were spaces being occupied or used by BTC to operate its business.

2010 ABQB 719 (CanLII)

a. Decision that parking facilities are taxable under the Bylaws

[66] The MGB found that the definition of "premises" includes parking facilities.

[67] The City's position was that the term "premises" as defined in the Bylaws should be interpreted expansively as encompassing parking spaces and entire parking facilities.

[68] BTC argued that it was not the intention of the legislature or the City that parking facilities be assessed for business tax. It argued that business tax is in essence an occupancy tax and was intended to be a tax levied on the premises from which a business operates. BTC pointed to several provisions of the MGA, for example, s. 379 (3) (a), which provides for supplemental assessments where the business "moves into new premises" or "increases the storage capacity or floor space of the premises occupied for the purpose of a business..." It also referred to s. 2 of the Bylaws which states that the purpose of the Bylaws is to "...authorize the assessment, supplementary assessment and taxation of Businesses operating in Premises within the City...".

[69] Section 1(g) of the Bylaws states:

> 1(g) "Premises" means any space occupied or used for the purpose of or in connection with a Business, and without limiting the generality of the foregoing includes:
>
> (i) land and buildings or part of buildings on such land; and
>
> (ii) any store, office, warehouse, factory, facility, hotel, motel, enclosure, yard or other space.
>
> [Emphasis added]

[70] The term "space" has been interpreted by the MGB as having its common meaning and including "...space, whether that space is used for parking of vehicles or for retail space": *Tonko* at p. 14.

[71] In *Tonko*, the MGA found that the term "premises" should be given a broad and expansive interpretation based on the purpose of business tax assessment under the MGA and business tax bylaws. Section 372 of the MGA authorizes the City to impose a business tax on all businesses. The Bylaws do not exempt any businesses and more specifically, do not exempt parking businesses. It found that the purpose of the business tax bylaw was to apply to all businesses and the definition of "premises" should be read in a manner that achieves that purpose: *Tonko* at p. 14.

[72] In *Tonko*, the MGB also found that the phrase "used for the purpose of or in connection with a Business" is to be interpreted as providing the flexibility needed to apply a business assessment to the entire space occupied or used. The MGB found that where a parking business

2010 ABQB 719 (CanLII)

is being operated from premises in the City, the entire parking facilities, including the physical parking spaces in which vehicles are parked, may be assessed for business tax. A business tax bylaw must apply to all businesses operating in the municipality and must therefore be adaptable to a wide variety of business circumstances: *Tonko* at p. 18.

[73] In the Impugned Order, the MGB concluded that "premises" includes parking facilities. It adopted the reasoning from a passage in *Tonko* as support for its conclusion, stating at pp. 13 - 14 of the Impugned Order:

> Tonko Development Corporation et al. v. City of Calgary (MGB 078/03) on page 14 reads as follows:
>
> > This broad and expansive interpretation of the definition is supported by an examination of the purpose of a business assessment in the Act and the Bylaw. Section 372 of the Act authorizes a municipality to impose a business tax on all businesses operating within the municipality with the exception of businesses that are exempt. Section 4(1) of the Bylaw 3M2002 requires that every person who operates a business in a premises within the city shall be assessed for the purposes of imposing a business tax. The MGB interprets this to mean all businesses. Bylaw 3M2002 has no section which identifies businesses which are exempt, and more specifically does not exempt a business which operates parking facilities. Thus, the MGB comes to the conclusion that the purpose of the bylaw is to apply to all businesses and that the definition of premises should not be read in a restrictive manner in order that this purpose cannot be achieved.
>
> While recognizing that it is not bound by its previous decisions, the MGB still accepts the reasoning in the passage above. Thus, if a parking business is operated on the premises, it is taxable. The parties disagree over whether a parking business was in operation. [Emphasis added]

[74] The MGB concluded that the MGA and the Bylaws were intended to impose a business tax on all businesses operating in premises in the City, including parking businesses. This was a reasonable conclusion, consistent with the plain meaning and purpose of the business tax provisions of the MGA and Bylaws. It is also evident from the MGB's reasoning how it came to this conclusion. The question was whether BTC was operating a business in the subject parking facilities.

b. Decision that BTC did not operate a parking business in the parking facilities

[75] The MGA and the Bylaws provide that business tax is assessable on those operating a business in premises in the City of Calgary. The MGB found that BTC did not operate a parking business in the subject parking facilities.

(i) Position of the Parties

2010 ABQB 719 (CanLII)

[76] The City argued that this issue had been decided in *Tonko* and affirmed in a line of subsequent MGB decisions. It argued that prior to *Tonko*, the standard practice had generally been to include a charge for parking in the rent for office space. As a result, the business assessment on the office space captured the NARV of office and parking space. The MGB had decided in *Tonko* and subsequent decisions that the practice had changed. Owners/landlords of parking in office buildings were now charging a separate and additional rent for parking, over and above the rent for office space. As a result, they were operating parking rental businesses separate from their office rental businesses. The City argued that the leases in question and the evidence of the City's witness, the City's former tax assessment officer, supported the City's position that there is a separate market for parking and office space. It argued that since the building leases charged a separate and additional rent for parking, BTC was operating a separate parking business in the subject parking facilities and was therefore assessable for business tax on those facilities.

[77] The City argued that the decisive factor was that BTC charged its tenants a separate and additional fee for parking and was thus in the business of selling parking. It did not matter whether the parking was rented to the tenants, their employees or the public. What mattered was that the owner/landlord generated a separate revenue stream from the rental of its parking space and was thus in the business of renting parking space, in addition to its business of renting office space.

[78] BTC argued that it had always been a standard industry practice in the office building lease market to charge a separate and additional rent for parking space. It argued that the fact that the building leases charged a separate amount for parking over and above the rent for the office space was irrelevant. The relevant factor was whether BTC carried on its business in the parking facilities. It referred to s. 4(1) of the Bylaws as the "liability-creating" section, which states that every person "who operates a Business in Premises within the City shall be assessed..." for business tax. It argued that this contemplates a tax on the space in which the business operates and that BTC did not operate its business in the physical parking spaces, but rather in the offices from which it managed its business. It argued that, in its previous decisions upholding business tax assessments on parking facilities or spaces, the MGB had misdirected itself by failing to address this initial question. It had rather jumped straight to the issue of whether the parking facilities were occupied or used for the purpose of or in connection with the business. It argued that if that was the test, a business tax would apply to all types of space such as vacant space and storage space. The City was not assessing these spaces. The issue was not whether the parking owners/landlords required the space for their businesses but whether they operated their businesses in the space. BTC argued that because the MGB had misdirected itself, it had upheld assessments of business tax on parking facilities, although the parking owners and operators did not operate their businesses in those facilities. If a business does not operate its business in the premises, it is not necessary to take the next step and determine whether the premises are "occupied or used for the purpose of or in connection with a Business."

[79] BTC argued that owners/landlords of office buildings are in the business of renting space, and that the tenants of those office buildings are engaged in the businesses carried on in their

2010 ABQB 719 (CanLII)

respective office spaces. It submitted that, as a result, neither the owners/landlords nor the tenants of the office buildings operated their businesses in the parking facilities. It argued, in the alternative, that if anyone was operating a business in the parking facilities, it was the tenants.

(ii) Law and Prior MGB Decisions

[80] Section 372(1) of the MGA states that a business tax bylaw authorizes the City to impose a tax in respect of all "businesses operating in the municipality". Section 4 of the Bylaws requires every person operating a "...Business in Premises within the City" to be assessed for the purpose of imposing a business tax.

[81] In *Bryce, Kipp & Co., Agent for Campeau Corporation v. Calgary (City of)* (23 January 1987), AAAB Order 05/87, the Alberta Assessment Appeal Board (AAAB) allowed the owner's appeal of the 1986 business tax assessed against parking spaces associated with a commercial office building owned by it and rented to tenants of the office space in the building. The AAAB found that the owner was in the business of developing and operating office buildings, rather than the parking business. It also found that the owner did not occupy the parking spaces and did not carry on a business in the parking spaces. The parking spaces were rented to the building tenants, and the AAAB found that this would lead one to believe that the tenants occupied the spaces.

[82] BTC argued that the AAAB's decision in *Bryce/Campeau* was based on the finding that the office tenants occupied the parking stalls, and not on the fact that the lease payments covered both the office and parking space. BTC referred to a passage in *Bryce/Campeau* noting that the tenants paid for parking separate from and in addition to the rent paid for the office space. Based on BTC's interpretation of *Bryce/Campeau*, the fact that BTC's lessees paid for parking space in addition to and separate from the office space had no bearing on whether or not BTC was operating a parking business in the subject parking facilities. The relevant fact in *Bryce/Campeau* was the AAAB's finding that the tenants occupied both the office space and parking space and therefore, that if anyone was assessable for business tax on the parking space, it was the tenants. BTC argued that the City and the MGB had subsequently misinterpreted the findings in *Bryce/Campeau*. This was evident from the City's position, in *Tonko*, that it was not its practice to assess owners/landlords of office buildings on parking space, because the rent for parking was captured in the NARV of the office space. This was obviously wrong, as the industry practice was to charge tenants a separate amount for parking over and above the amount charged for office space.

[83] The City agreed that the AAAB had decided in *Bryce/Campeau* that the owner of the building was not assessable for parking space in the building because it did not operate a business in the parking facilities. However, it submitted that the case did not turn on whether or not there was a separate and additional charge for parking. It argued that the parking rental market had changed since 1986. In 2005 and 2006, when the subject assessments were made, the City had more information, gathered partly from the Assessment Request for Information (ARFI) forms provided to the City by property owners, that led the City to the conclusion that the

2010 ABQB 719 (CanLII)

owners/landlords of parking facilities in office buildings operated parking rental businesses separate from their office rental businesses. This was not only based on the fact that the owners/landlords charged a separate fee for parking but also on the fact that they occupied and used the parking for their parking businesses.

[84] As noted earlier, the MGB began assessing owners/landlords of office buildings for business tax on the parking facilities in their buildings as a result of the MGB's decision in *Tonko*. In *Tonko*, various parking facility operators, such as Impark, successfully challenged 2002 business tax assessments on parking facilities owned or operated by them on the basis that a number of competing businesses were not being assessed business taxes on their parking facilities. The competing businesses referred to were principally owners/landlords of parking facilities associated with office buildings. There was evidence that the City assessed only the parking space in those buildings that was allocated to public parkers, but not that allocated to building tenants. The City submitted that the owners/landlords were not assessed for tenant parking space because it was assumed that the rent paid by the tenants for office space included rent for the tenants' associated parking space. As a result, it was the City's view that the assessment for the parking space was included in the assessment for the office space. The MGB found that the parking operators/owners had led sufficient contradictory evidence to show that parking space was not included within the office space rental values. Rather, it was often the practice to charge additional rent to tenants for parking. Since the City had not varied the NARV applied to premises where rent for parking space was charged for separately from rent for office space, the MGB found a systemic inequity in the application of the business tax bylaw. The MGB distinguished *Bryce/Campeau* on the basis that when it was decided, it was customary to include a charge for parking in the rent for the office space.

[85] Subsequent to *Tonko*, the City began to assess certain property owners, including office building owners, for business tax on their associated parking facilities, and those owners launched a succession of appeals. In many cases, the MGB upheld the business tax assessments. One of the grounds upon which the MGB upheld these assessments was that market conditions had changed. It was no longer a standard practice to include rent for parking space in the rent for office space. The market for parking space was now generally separate from the market for office space. If property owners charged separately for parking, they were operating separate parking businesses in their parking facilities and were to be assessed separate business taxes on those facilities: see, for example, *BTC v. Calgary (City of)*, MGB Order 116/03; *Fortune Properties Holdings Ltd. v. Calgary (City of)*, MGB 055/05; *Various Owners, represented by Derbyshire Viceroy Consultants Ltd. v. Calgary (City of)*, MGB Order 124/05; *Queen Creek Land Co. Ltd. v. Calgary (City of)*, MGB 007/06; *Various Owners represented by Deloitte & Touche LLP Property Tax Services v. Calgary (City of)*, MGB Order 064/07.

(iii) Evidence

[86] It is not in dispute that approximately 58 individual leases were in effect at all material times in the three buildings. Nor is it in dispute that BTC submitted only six of those leases in evidence to the MGB and that three of those were incomplete. Under the leases, the building

2010 ABQB 719 (CanLII)

tenants were charged a separate and additional charge for parking, over and above that charged for office space.

[87] The MGB heard evidence from BTC's witnesses, Mr. Kerslake and Mr. Fairgrieve-Park. Mr. Kerslake represented the Altus Group, the company representing BTC on the appeal. Mr. Kerslake's testimony was that he had been involved in commercial real estate in Alberta for over 30 years, and that he was an accredited appraiser with the Appraisal Institute, AACI, and had done extensive commercial real estate valuation work in Alberta and specifically in Calgary. Mr. Fairgrieve-Park was an experienced property manager in the office leasing market in Calgary and elsewhere and the senior vice-president of operations for BTC responsible for property operations and property management.

[88] The MGB also heard evidence from the City's witness, Ms. Hess, the City's manager of business. Ms. Hess was previously the City's manager for commercial and multi-residential assessment and in that position was responsible for conducting the business assessments and property assessments for multi-residential and commercial properties from 2001 through 2005.

[89] Both of BTC's witnesses testified that although BP Centre and Energy Plaza had been built in the early 1980s, the City had never assessed the owners/landlords for the parking facilities until 2003. Mr. Kerslake testified that it was the City's practice to assess a parking owner/operator only on the parking space that was rented to the public on an hourly basis. In his experience, it was not the City's practice to assess parking owners/operators for space rented to building tenants. The reason, in his opinion, was that owners renting parking space to their tenants were not operating a parking business. Only where the owner/landlord was charging non-tenants for hourly parking was the owner/landlord assessable for parking. It was Mr. Kerslake's understanding that owners/landlords provided parking to their building tenants as part their space leasing businesses. The parking was therefore incidental to their space leasing business and was not a stand-alone parking business.

[90] The leases in evidence charged for parking in addition to office space. Mr. Kerslake's and Mr. Fairgrieve-Park's evidence was that it was always the practice of owners/landlords to charge separately for parking and that this continued to be the standard practice at all material times. It was therefore Mr. Kerslake's opinion that this factor did not affect whether an owner/landlord was assessable for business tax on the parking facilities.

[91] Ms. Hess testified that it was the practice in the 1980's and up until 2002 to include parking in the rent paid for the office space. However, Ms. Hess testified that subsequent to *Tonko*, the City updated its information on the circumstances under which office building parking was operated and this information revealed that office building owners/landlords were charging a separate and additional rent for their parking space, over and above that charged for their office space. This information was relied upon as a basis for the subsequent business tax assessments on office building owners/landlords.

2010 ABQB 719 (CanLII)

[92] It was Ms. Hess's evidence that the City also based its business tax assessments on information contained in the ARFIs sent out to all property owners in the City. Ms. Hess testified that the ARFIs submitted on the subject parking facilities did not indicate that the parking was occupied or used by the tenants.

2010 ABQB 719 (CanLII)

(iv) MGB's Decision

[93] The MGB found that BTC was in the business of leasing space but that it was not in the parking business. It stated that this conclusion was based on an examination of the provisions of the leases and other evidence provided by BTC.

[94] The MGB acknowledged that it had found in previous decisions that building owners/landlords were operating parking businesses separate from office lease businesses in the same premises, but distinguished those cases based on the differing terms of the leases or agreements governing the parking in those cases. It stated at p 14:

> With respect to the other provisions in the leases, the MGB recognizes that many arguments brought up by the Respondent, such as the fact that parking is charged separately from the office space, and the degree of control were accepted in previous orders; however, in this case the MGB finds that the other provisions in the leases are more indicative that the parking space being part and parcel of the agreement between the parties for office space. After examining the leases in their entirety, the MGB concludes that the parking is incidental, and is provided to complement the leasing of office space, rather than being operated as a secondary business.
> [Emphasis added]

[95] The other lease provisions considered significant were those giving the tenants the right to additional parking space, and in two cases, giving the tenants the first option on additional parking and tying the allotment of parking space to the square footage of the office space leased. The MGB also found that the access and maintenance provisions of the subject leases indicated that the parking was incidental to BTC's office leasing business and that the tenants were the end users and controlled access to the parking facilities. It stated at p. 14:

> ...When the access and maintenance provisions are examined, they indicate that while the landlord is responsible for the maintenance and upkeep, it is the tenant who is the end user, and who generally controls the general access to the parkade. These are all factors that indicate that the parking is incidental to the office lease.

[96] Although the MGB did not expressly state what other evidence it relied upon, it did state that "[i]n coming to this conclusion, the MGB placed weight on the fact that the parking agreements are solely with the tenants with no public access (other than visitor parking and parking for deliveries to the office space) ...": at p. 14. This evidence did not relate to various provisions of the leases provided by BTC but to the fact that the parking was in fact rented to and used exclusively by the tenants of the buildings. This was not the case in some of the previous

MGB decisions in which the owners of buildings were found to be operating a separate parking business: see *Tonko* and *BTC v. Calgary*, MGB Order 116/03.

[97] The MGB agreed with BTC that the leases in question incorporated the prior practice of encompassing both the office space and the parking facilities in one premises and that the parking was provided to complement the leasing of office space rather than being operated as a separate business. It stated at p 14:

> The MGB concludes from a careful examination of the leases for the subject office buildings and other evidence provided that the Appellant is not operating a parking business. Rather, the Appellant's business is that of leasing space, which encompasses space in both the office portion and the parking facility. The primary relationship between the tenants and the Appellant arises from the lease agreement for the office space. The MGB notes that is consistent with the previous practice of landlords, as noted in the Respondent's position above.
> [Emphasis added]

(v) Conclusion

[98] The MGB's conclusion that BTC was not operating a parking business in the subject parking facilities was consistent with a reasonable interpretation of the MGA and the Bylaws. The MGB recognized that the City only had the power to assess business tax on those operating a business in the parking facilities. It based its decision on the evidence before it, including an evaluation of the provisions of the leases presented to it and the testimony of expert practitioners in the office leasing market. It considered the fact that the leases governed both the office space and the parking space, obligated BTC to provide parking in proportion to the office space leased, and in two cases gave the tenant the first option of obtaining parking. The MGB also considered it significant that the tenants were, in fact, the sole occupiers or users of the parking. The MGB heard arguments from both parties as to the law and the facts over four days of hearings and can be taken to have considered those arguments. It would have been helpful if the MGB had more extensively referred to the specific lease provisions and other evidence that it relied upon, but the fact that it did not does not make the decision unreasonable. Based on the law, evidence and arguments made by the parties, it was reasonable for the MGB to conclude that the provision of parking was complementary to the lease of the office space and that BTC did not operate a separate parking business. It is also clear from its reasons how it came to that conclusion.

c. Decision that the parking facilities were not premises occupied or used by BTC for its business and that the tenants occupied and used the parking

(i) Position of Parties

[99] The Bylaws define "premises" as including "... any space occupied or used for the purpose of or in connection with a Business...".

2010 ABQB 719 (CanLII)

[100] This issue revolves around whether parking facilities or parking spaces in office buildings that are rented exclusively to the building tenants are occupied or used by the building owners/landlords or the building tenants.

[101] The City argued that both the tenants and BTC occupied and used the parking premises, which required the MGB to apply the paramount occupancy test in *Gottardo, infra,* to determine who was the proper person to be assessed for business tax purposes. It argued that while the office spaces were demised to the tenants, the parking spaces were shared. It submitted that the parking spaces were more in the nature of common areas to which the tenants had access. There was no expectation of privacy or exclusive possession of the parking spaces, as there was for the tenants' office space. The majority of the parking spaces were unreserved, and if reserved, could be moved by the owner/landlord. The majority of the parking spaces were also accessed by multiple tenants on a random basis.

[102] BTC argued that it did not "occupy or use" the parking facilities for the purpose of or in connection with its business because it did not operate a parking business and did not operate its business in the parking facilities. It also argued that the tenants had exclusive use of the parking, and as a result, it was not necessary to apply the tests articulated in *Gottardo* to determine who had paramount occupancy. It argued that the paramount occupancy test need only be applied where more than one business occupies or uses the premises for their business. As a result, the issue of who had paramount occupancy of the parking premises did not arise. Only the tenants occupied or used the parking facilities.

[103] BTC argued that many of the MGB's previous decisions finding that owners/landlords or parking operators were operating parking businesses in parking facilities could be distinguished on the basis that in those cases all or part of the parking was rented to the public. In this case, BTC rented the parking space exclusively to those renting its office space. Further, in this case, one lease covered both the office space and the parking space and obligated BTC to allocate parking to its office tenants. Former decisions did not deal with the specific facts in this case.

(ii) Law and MGB Orders

[104] Where two or more parties have access to space, "occupancy" is established for municipal tax purposes, by determining who has paramount occupancy of the space.

[105] In *Qu'Appelle Developments Ltd. v. Regina (City)* (1989), 77 Sask. R. 20, 20, [1989] S.J. No. 386 (C.A.), the issue was whether the lessee of parking space or the parkade owner/operator "occupied" the parking facilities and was thus assessable for business tax. The term "occupied" was not defined, as it is in the subject Bylaws, to include premises "used for the purpose of or in connection with a business" however, the Court gave the term an expansive interpretation. It ruled that the term "occupy" was not confined to physical occupancy but extended also to the exercise of power over as well as control and or use of property.

2010 ABQB 719 (CanLII)

[106] BTC distinguished *Qu'Appelle* on a number of grounds, including the fact that the parking was rented to individuals who worked in nearby buildings as well as to other persons, rather than to business tenants of the building associated with the parking. They were rented on a first-come-first-served basis. It was argued that in contrast, the leases governing the subject parking facilities granted exclusive occupancy and use of the parking stalls to the business tenants in the building.

[107] The test to determine who has "occupancy" of premises for municipal tax purposes was further refined in *Gottardo Properties (Dome) Inc. v. Toronto (City)*, 111 O.A.C. 272, 162 D.L.R. (4th) 574 as the person with paramount occupancy, at para 40:

> The principle of paramount occupancy holds that when two persons occupy or use the same land at the same time assessability depends on who has the paramount occupancy or use of the land for its business.

[108] In *Gottardo*, the Ontario Court of Appeal applied a three-part test to determine whether the owner or licensee of stadium boxes used to entertain business clients had paramount occupancy of the boxes. The first consideration, although not a determining factor, was who had the greater physical presence in the premises. The Court found that the physical presence of the licensee of the stadium boxes was transitory. The second consideration was what controls were imposed by one occupant over the other's use of the premises and what was the purpose and effect of those controls. In *Gottardo*, the court noted that it is expected that the owner will retain some measure of control, such as the right of access and other restrictions normally attached to a licence. The third consideration was the relative significance of the activities carried out on the premises to the primary business of each of the competing occupants.

[109] BTC distinguished *Gottardo* on its facts. Those renting the stadium boxes used the boxes to entertain clients of their businesses. BTC submitted that a key factor in the court's conclusion that the owner/landlord had paramount occupancy of the boxes was that it continued to operate a food and beverage service in the boxes while they were rented. BTC submitted that the ongoing business being conducted in the boxes by the owner/landlord was the critical fact that compelled the Court to take the analysis further than deciding who occupied the premises, to deciding who had paramount occupancy. BTC argued that unlike the owner/landlord in *Gottardo*, BTC had no ongoing business interest in the subject parking facilities. The subject leases gave exclusive occupation and use of the parking to the tenants. The primary purpose of the parking was for the use of the tenants, while it was incidental to BTC's business. Further, and most importantly, BTC argued that the *Gottardo* test was only applicable where two or more businesses occupied or used a space for their businesses. If BTC did not operate a parking business and did not operate its business in the subject parking facilities, and if the parking was exclusively occupied and used by the office tenants, there was no need to apply the paramount occupancy test.

[110] BTC argued that the present case was similar to *Bryce/Campeau*. There, the AAAB concluded that the owner/operator of an office building did not operate a parking business but was in the business of leasing space, that the tenants of the office space occupied and used the

2010 ABQB 719 (CanLII)

parking space, and that if anyone was assessable for business tax on the parking space, it would appear to be the tenants.

[111] The City argued that the MGB was required and had failed to apply the *Gottardo* test and that applying the test, the parking premises were occupied or used for the purpose of or in connection with BTC's business. It argued that the parkers in the subject parking facilities, who were mostly employees of the tenants, had a transitory physical presence in the facilities, but neither BTC nor the tenants had a physical presence. It argued that the leases gave BTC significant control by giving it the right to impose rules regarding entry and exit machinery, to control access hours, to restrict use, to move the reserved parking stalls and to require the tenants to provide it with lists of parkers or vehicles using the facilities. It argued that the collection of rent in exchange for access to the facilities was integral to BTC's parking business. It submitted that the leases provided by BTC were additional evidence that BTC was the proper assessed person for business tax purposes. The leases charged the tenants separately for the parking space and the office space, did not include parking in the definition of the leased premises and showed the significant control that BTC exercised over the parking facilities.

[112] The City argued that the MGB has repeatedly applied *Qu'Appelle* and *Gottardo* to determine which of two or more persons "occupy or use" parking facilities for their business and are thereby assessable for business tax, and that it should continue to apply the principles in those cases.

[113] In *Tonko*, the MGB relied on *Qu'Appelle* to support its conclusion that the office building owners/landlords were in the parking business and occupied or used the parking facilities for their businesses.

[114] In *BTC Properties II Ltd. v. Calgary*, MGB Order 116/03, the MGB granted Impark's appeal of 2002 business tax assessments on a parkade managed by it, but owned by BTC. Impark operated the parkade under a management agreement rather than a lease. All parties agreed that a business was being operated in the parkade. The main issue was who had paramount occupancy of the parkade for their business operations - the commercial tenants renting space in the parkade, Impark (the parkade operator) or BTC (the parkade owner). The MGB found that the tenants were not the paramount occupants of the premises. It based its decision on the fact that the "use of the parking stalls by the tenants is transient and temporary in nature, as the use of the stalls is random and without specific assignment, nor of unrestricted use/access.": at p. 19. The lessees' occupation was distinguished from lessees who had exclusive possession of leased premises. Here, both Impark and BTC could access the entire parkade at any time whether or not there were vehicles parked there. The MGB found that the facts were very similar to those in *Qu'Appelle* and placed considerable weight on that decision. The MGB found that the principles in *Gottardo* also supported its decision.

[115] The final issue was whether BTC or Impark was the paramount occupant of the parking facilities. Based on a review of the management agreement between Impark and BTC, the MGB found that BTC had paramount occupancy. The level of control exercised by Impark was limited

2010 ABQB 719 (CanLII)

to managing the parkade. While Impark had day-to-day control over the parkade, its management was subject, "at all times, to the satisfaction and final approval of [BTC] with respect to car parking and operating policies." BTC had ultimate control over the most significant aspects of the arrangement including the hours of operation, the approval of parking fees, responsibility for operating and capital costs, the right to review policies and the right to terminate the management agreement with Impark. Although Impark could restrict access, it was only because it was given that power by BTC under the management agreement. The fact that Impark received a percentage of the revenue after it reached a certain point was characterized by the MGB as compensation for the added services required to manage the parkade when the number of parkers increased.

[116] In *Various Owners, Deloitte & Touche LLP Property Tax Services v. Calgary,* MGB Order 124/05, various property owners, including BTC, again appealed 2004 business tax assessments on parking space owned by them. The parking space was associated with the owners' respective office buildings and leased to commercial tenants of its buildings. There was no dispute that the property owners were operating a business and that the definition of "premises" was broad enough to include parking spaces occupied or used for the purpose of or in connection with a business. The issue was whether the parking spaces were occupied or used for the purpose of or in connection with the property owners' businesses or the tenants' businesses: at p. 4.

[117] The MGB examined the tenant leases entered as evidence. It noted that one lease used the words "for the exclusive use of the Lessee" but could not find that the owners had given the tenants exclusive occupation or demised the parking to the tenants, because it had been given only two pages of the lease. It conceded that "there may be leases that are exceptions to the finding that property owners have paramount occupancy." It noted that the office space and the parking space were dealt with separately in the lease. It noted that the rent charged for parking was additional to the rent charged for the office space.

[118] The MGB applied the *Qu'Appelle* and the *Gottardo* tests to determine who had paramount occupancy and use of the of the parking facilities. First, the tenants' physical occupancy of the parking stalls was transitory in nature. Second, the owners exercised greater control over the parking premises. The leases gave the owners the right to limit access, move parkers from stall to stall, terminate the parking leases separately from the office leases, determine hours of access for unreserved stalls, and close the parkade for purposes of maintenance and access at all times. This was greater control than that exercised over the tenant office space. The MGB found at p. 17:

> There is no indication that the property owners have demised the property to the tenants in the same way that they have demised the office space. The MGB found that the difference in respect to the level of control exerted by the property owners in the office leases versus the parking leases to be instructive. These factors lead the MGB to conclude that the property owners exert a greater level of control with respect to the parking space than the tenants.

2010 ABQB 719 (CanLII)

[119] Third, the parking space was more significant to the primary activities carried out on the premises by the owners. The MGB found that the use of the parking facilities by the tenants was incidental to their businesses as they had the option of making other arrangements for parking, and could use other forms of transportation, such as the transit system, which would reduce or eliminate the need for parking. Parking was not central to the operation of their businesses. It rejected, as it had done previously, the owners' argument that the parking space was only provided to comply with parking requirements prescribed under municipal land use bylaws (LUB). It affirmed that *Tonko* was based on the finding that the parking owners/operators were operating a parking business and not on the basis that lessees of parking have paramount occupancy.

[120] *In Various Owners represented by Derbyshire Viceroy Consultants Ltd. v. Calgary (City of)*, MGB Order 064/07, business tax assessments against various owners and operators of parking facilities were appealed. The operators either leased the parking from the property owners/landlords and rented it to parkers with the owners' permission or entered into management agreements with the property owners/landlords and rented the parking spaces to parkers on behalf of the property owners/landlords. The MGB concluded that the parking operators were operated parking businesses in the parking facilities, and were the proper parties to be assessed for business tax as they had paramount occupation and use of the parking facilities

(iii) Evidence

[121] In each of the three leases offered as representative leases for each of the buildings, the section dealing with the "demised premises" does not refer to parking. On the other hand, the three leases show that the tenant's right to parking space is tied to its right to office space and each lease governs both types of spaces. In two of the leases, the amount of parking allotted to each tenant increases or decreases in proportion to office space leased.

[122] There was evidence that the parking was provided for and used solely by the tenants of each of the buildings and that the owners/landlords had no kiosk or other presence in the parking area and did not control access to the parking. Only the office tenants had access to the parking facilities and the parking could only be accessed through the use of electronic key cards provided only to the tenants. BTC did not physically control access to the parkade through the use of parking kiosks or other means.

[123] It was Mr. Kerslake's opinion that where parking space in an office tower is committed to the tenants of the office space under the same lease, it has the effect of transferring occupation and use of both spaces to the tenants. It was Ms. Hess's opinion that the leases in question were confined to granting the lessees the ability to have parking and to pay separately for it but did not grant the same rights as those granted to the demised office space.

[124] The MGB heard evidence that the three leases provided to the MGB by BTC were typical of those in all of the office buildings. BTC's witnesses testified that each lease corresponded to leases in the building governed by the lease and was typical of leases for that building.

2010 ABQB 719 (CanLII)

[125] Neither the City's written submissions nor its oral submissions to the MGB raised the issue of the sufficiency of the leases provided by BTC. The City raised no issue as to the sufficiency of the number of leases provided or that the leases were not typical of the leases in each building. The City did not ask the MGB to compel BTC to provide further leases, as it was entitled to do under s. 497 of the MGA.

[126] The MGB also heard evidence that the parking was used exclusively by the tenants and was committed to the use of the tenants. Although the leases did not expressly prohibit BTC from renting the parking space to the public or to businesses other than the tenants, in practice it could not and would not do so specifically because the leases committed the parking to its tenants and because there was always a shortage of parking in comparison to the demand for parking by the tenants.

(iv) MGB's decision

[127] The MGB's reasons refer to the sample leases governing the buildings, which were provided by BTC and said to be typical of those in force in each of the buildings. It found that the provisions of these leases were evidence that the parking was occupied and used by the tenants. The MGB referred to BTC's position that the leases gave the tenants the right to use and occupy the parking stalls, determine who could use the stalls and for what periods, and increase or decrease the number of parking stalls subject to availability. It referred to BTC's position that the leases stipulated that the amount of parking space allocated to a tenant was tied to the amount of office space leased; that it was the tenant's responsibility to ensure that users of the parking facilities did so safely; and that it was the tenant's obligation to indemnify and save BTC harmless against all liabilities, actions, costs and expenses incurred by BTC for expenses arising from the use of the parking facilities: at p. 3 of the Impugned Order. Although it did not refer to the specific provisions of the leases granting these rights, the leases do contain such provisions. The City argues that the MGB only referred to BTC's position on these issues and not the evidence. This evidence was clearly before the MGB and it can be assumed that it not only considered BTC's position but the actual evidence before it.

[128] The MGB distinguished its decision in *Altus v. Calgary (City of)*, MGB 016/06, affirming the 2004 business tax assessment of BTC for the subject parking facilities, on the basis that there was insufficient evidence to support the appeal in that case.

[129] The MGB also distinguished its decision in *Various owners, represented by Derbyshire Viceroy Consultants Ltd. v. Calgary (City)*, MGB 124/05 in which it affirmed the assessment against the owners/landlords rather than the tenants of the parking space. It stated that in that case, the parties had agreed that the owners/landlords were operating a parking business. It is not clear from the decision that this was the case. However, the MGB also based its decision on the finding that there was insufficient evidence before it, based on only two pages of a specific lease, to determine that the tenant had been given exclusive control and occupancy of the parking: at pp. 17 - 18.

2010 ABQB 719 (CanLII)

[130] In the Impugned Order, the MGB stated that its finding that there was no parking business did not mean that there was no business at all being operated from the parking facilities. There was no dispute that BTC was in the business of renting property and that the tenants of the buildings were also operating businesses. The MGB stated, but did not conclude, that based on the wording of the Bylaws, the parking facilities appeared to be part of the tenants' premises. It stated at p. 15:

> The wording of the bylaws appears to capture the parking facilities in the tenants' premises, since (1) the tenants use and occupy the space, and (2) the leases demise space to the tenants for the purpose of their businesses, and the spaces demised include both the office space and parking space. While the leases do differentiate between these spaces, an examination of these provisions indicates that the differences relate to the nature of the spaces themselves. For example, the office spaces have different use and occupancy considerations such as fixturing periods, tenant improvements and custodial standards that need to be considered in the lease separately from the considerations such as communal parking and the use and occupancy provisions related thereto. Accordingly, having two separate leases, tied to each other, is understandable.

[131] The MGB stated that the above considerations inclined it to the view that the City could have assessed the tenants for business tax on the parking facilities if their businesses "used the parking facilities as part of the premises from which they carried on their businesses.": at p. 15.

[132] Finally, the MGB expressly stated that it was not necessary in these circumstances to apply the control tests set out in *Qu'Appelle* and *Gottardo*. This was based on its finding that BTC did not operate a parking business in the subject parking facilities and did not occupy or use the parking facilities for the purpose of or in connection with its business of renting property. As a result, there was no issue of who had paramount occupancy of the facilities.

(v) Conclusion

[133] The MGB's conclusion that the parking facilities were not occupied or used for the purpose of or in connection with BTC's space leasing business, was reasonable based on the legislation, the law and the arguments made by the parties. Central to its conclusion was its finding that the building tenants were, in fact, the exclusive users of the parking facilities. The public was not granted access. As a result, although the leases did not prohibit BTC from renting the parking to the public or other third parties, in practice, it did not do so as the parking was committed to its tenants. The MGB also considered the fact that the leases covered both the office space and the parking space. The MGB's conclusion was reasonable and the MGB's reasons show the path from its reasons to its conclusion.

d. Decision as to whether BTC's business tax assessment was correct, equitable and fair

2010 ABQB 719 (CanLII)

[134] The MGB has the authority to determine if the business tax bylaw is applied correctly, fairly and equitably. Section 499(2) of the MGA states that the MGB "must not alter any assessment that is fair and equitable, taking into consideration assessments of similar property in the same municipality...". Given the MGB's conclusion that BTC did not operate a parking business and did not occupy or use the parking facilities as premises for its business, it was reasonable for the MGB to conclude that it was not necessary to decide whether the assessment was correct, equitable and fair.

e. Decision on issue of exemption under the MTA

[135] The MGB decided that it was unnecessary to decide BTC's claim for an exemption under the Bylaws stemming from the non-taxable status of parking facilities under the MTA, having concluded that BTC was not operating a parking business in the subject parking facilities: Impugned Order at p. 15. If there was no business being operated, there was no need to decide if such a business would have been exempt under the MTA. This was a reasonable conclusion.

f. Decision to reduce the business tax assessment to "nil"

[136] The MGA gives the City the power to assess business tax. An assessment must be paid by the party operating the business in premises within the City of Calgary. In this case, the MGB found that BTC was not operating a parking business, was not operating a business in the subject parking facilities, and did not occupy or use those premises for the purpose of or in connection with its business. It was entitled and required to make this determination under the MGA. This is not the equivalent of granting an exemption from tax. Exemption from tax was not an issue before the MGB in the subject proceedings. I agree with the MGB's submission that to characterize the MGB's decision as the grant of an exemption would be to negate the requirements of a judicial review analysis and sidestep the application of the appropriate standard of review.

[137] Further, the MGB did not decide that the tenants were assessable for business tax although they were not represented at the ARB or MGB hearings, as the City argues. Rather, the MGB recognized that it could have added the tenants as assessed persons on the assessment roll but rightly concluded, as it had done in *BTC v. Calgary*, MGB Order 116/03, that this should only occur if the party being added has had a reasonable opportunity to become involved in the proceedings. In that case, BTC and Impark were represented and involved in the proceedings, thus no unfairness to BTC resulted. The tenants in the office buildings in issue in the Impugned Order were not represented at the ARB or MGB hearings. There was no determination regarding the assessability of the tenants for business tax and thus no breach of procedural fairness in this regard. The MGB reasonably found that it would have been unfair to add the tenants to the assessment roll in the circumstances.

g. Decision on disclosure of settlements

2010 ABQB 719 (CanLII)

[138] At the MGB hearing, as a preliminary matter, BTC requested disclosure of information contained in settlement agreements reached in 2007 between the City and other appellants who had been assessed business tax on parking facilities. After the MGB had received written submissions from both parties and subsequent to the hearing, Imperial Parking requested that it be granted intervener status on the disclosure issue. In light of its decision and reasons, the MGB found it unnecessary to order disclosure of the settlement agreements. As a result, it also found it unnecessary for it to decide the issue of Imperial Parking's right to intervener status. This was a reasonable decision.

2. Application of standard of review to procedural fairness issues

[139] To summarize, the main issue with regard to the City's allegations regarding procedural fairness is that the MGB's reasons are so deficient as to constitute an error of law. If there is a legal obligation to give reasons, there can be no deference granted to the MGB's decision not to give reasons.

[140] The City also argued that it was procedurally unfair for the MGB to decide in the tenants' absence that they were assessable for business tax. As explained earlier, the MGB did not decide that the tenants were assessable. It is therefore not necessary to address this issue in terms of procedural fairness.

[141] Whether or not the judicial review of the adequacy of the reasons is assessed separately from the judicial review of the reasonableness or correctness of the substantive reasons under *Dunsmuir*, the adequacy of the MGB's reasons must be evaluated from a functional perspective.

a. Functional approach to review of adequacy of reasons

[142] The principles for assessing the adequacy of reasons was set out in *R. v. R.E.M.,* 2008 SCC 51, [2008] 3 S.C.R. 3 at paras. 16 to 30. The reasons are to be read as a whole. The reasons must reveal why an issue was decided but do not have to explain how it was decided. In other words, the decision maker is not required to explain every step and finding made in the process of arriving at its conclusions. There is no requirement to explain the findings on each piece of evidence as long as the evidential findings are logically linked to the decision. It is only necessary that the "path" that was taken is clear. Inferences can be drawn from the record. The Court concluded at para 35:

> In summary the cases confirm:
>
> > (1) Appellate courts are to take a functional, substantive approach to sufficiency of reasons, reading them as a whole, in the context of the evidence, the arguments and the trial, with an appreciation of the purposes or functions for which they are delivered (see *Sheppard*, at paras. 46 and 50; *Morrissey*, at p. 524.)

2010 ABQB 719 (CanLII)

> (2) The basis for the trial judge's verdict must be "intelligible", or capable of being made out. In other words, a logical connection between the verdict and the basis for the verdict must be apparent. A detailed description of the judge's process in arriving at the verdict is unnecessary.
>
> (3) In determining whether the logical connection between the verdict and the basis for the verdict is established, one looks to the evidence, the submissions of counsel and the history of the trial to determine the "live" issues as they emerged during the trial.

[143] Reasons serve three main functions: to explain the decision to the parties, to provide public accountability and to permit effective appellate review: *R. v. R.E.M.* at para. 11. Reasons will be adequate if they satisfy these functions: *R. v. R.E.M.*, at para. 25.

[144] *R. v R.E.M.* was a criminal law case however, in *Law Society of Upper Canada v. Neinstein*, 2010 ONCA 193, 99 O.R. (3d) 1, the Ontario Court of Appeal confirmed that the adequacy of reasons of administrative tribunals is also determined by assessing whether they satisfy these three functions. The Court stated at paras. 60 - 62:

> ....it is important that the Law Society explain its discipline decisions to complainants and members of the public at large in a way which renders those decisions comprehensible and transparent. A Hearing Panel can achieve those ends only through the reasons it gives...
>
> Reasons for a decision serve several salutary purposes. Where there is a right of appeal from that decision, reasons must provide a sufficient window into the decision to allow a meaningful appellate review to the extent contemplated by the permitted scope of the appeal. Reasons for a decision that describe both *what* is decided and *why* that decision was made are susceptible to effective appellate review. Whatever other shortcomings may exist in reasons that adequately explain the "what" and the "why", those shortcomings will not render the reasons so inadequate as to justify appellate intervention on that basis: *R. v. Sheppard*, [2002] 1 S.C.R. 869, at paras. 25-26; *R. v. Braich*, [2002] 1 S.C.R. 903, at para. 31; *R. v. R.E.M.*, [2008] 3 S.C.R. 3, at paras. 15 - 18, 52 - 53.
>
> A determination of whether reasons fulfill their purpose and admit of effective appellate review can only be made by examining those reasons in the context of the proceedings that gave rise to the reasons. Context includes the nature of the issues raised before the tribunal, the evidence adduced and the submissions made...
> [Emphasis added]

[145] Similar principles have been adopted in a number of Alberta decisions: see *Keephills Aggregate Co. Ltd. v. Parkland (County of) Subdivision and Appeal Board*, 2003 ABCA 242, 348 A.R. 4 at paras. 19 - 24; *Strathcona (County) v. Allan*, 2006 ABCA 129, 394 A.R. 290 at paras.

2010 ABQB 719 (CanLII)

19 and 23; and *Sawatzky v. Alberta (Universities Academic Pension Plan Board)* (1992), 9 Admin. L.R. (2d) 109, [1992] A.J. No. 965.

[146] The above passage from *Neinstein* also explains how a court assesses whether reasons satisfy their three functions. Reasons explain the decision to the parties and make the decision maker publicly accountable by being sufficiently comprehensible and transparent to explain "what" was decided and "why". Reasons permit effective appellate review if they are adequately based upon the issues, the evidence and the submissions before the decision maker.

[147] Reasons are inadequate if there is a total lack of evidence on the essential points to support them. In *Cuff v. Edmonton School District No. 7*, 2009 ABCA 6, [2009] A. J. No. 5, the the Alberta Court of Appeal stated at para. 8 that "lack or absence of evidence to support a particular conclusion warrants judicial intervention regardless of whether the correctness or reasonableness standard of review applies." Reasons are also inadequate, even if there is some evidence on the essential points supporting them, if that evidence is counter to the overwhelming evidence to the contrary: *Mountain Creeks Ranch Inc. v. Yellowhead (County of) Subdivision and Development Appeal Board*, 2004 ABCA 177, [2004] A.J. No. 561at paras. 14 - 15. In both cases, the inadequacy of the reasons results in a jurisdictional error. This should not be taken as putting a positive duty on a decision maker to expressly indicate all relevant considerations that have been taken into account, particularly those that are not problematic: *Strathcona v. Allan,* at para. 19.

[148] The City's argument that the MGB's decision is procedurally unfair is based on two main deficiencies that, either individually or cumulatively, are said to result in the reasons being inadequate: deficiencies in its findings of fact; and deficiencies in its application of the law.

b. Adequacy of the reasons based on MGB's findings of fact

[149] The City alleges that the MGB's findings of fact are insupportable based on the evidence because its fact-finding is based on non-existent evidence, on insufficient evidence and on specific evidence which was contrary to the overwhelming contradictory evidence.

[150] The City submits that there was insufficient evidence, based on the six leases (out of a possible 58), entered as evidence, to make conclusions as to the terms on which parking was provided to all the tenants of the buildings. This issue was not raised at the MGB hearing. The City had the opportunity to request additional leases, or question the sufficiency of the leases, but it did not do so. There was unchallenged and uncontradicted evidence that each of the three leases provided by BTC as evidence was with a major tenant of each of the buildings and was typical of leases in each of those buildings. The MGB's decision is based on this evidence and the leases are sufficient in number and completeness to support its decision. The reasons state that the decision is based on the leases put in evidence and explain that this is one of the reasons why the MGB came to the conclusions it did.

2010 ABQB 719 (CanLII)

[151] The City submits that the lease provisions not only do not support the MGB's findings of fact but are, for the most part, contrary to its findings. It argues that although the MGB referred to the leases, it failed to indicate which provisions it was relying upon. The MGB referred to provisions in the leases giving the tenants the right to additional parking space, and in two cases, giving the tenants the first option on additional parking and tying the allotment of parking space to the square footage of the office space leased. The MGB also found that the tenants controlled access to the parking and in fact occupied and used the space to the exclusion of all others. The MGB was not required to refer to all of the evidence that supported its decision, but only to relevant evidence essential to its decision.

[152] The City spent some time arguing that the leases gave BTC exclusive control and management of the parking. However, the MGB's reasons state that it did not have to determine who had exclusive control but rather, whether the parking was occupied or used by the tenants or BTC. The tenants were the only ones who had access to and used the parking. The MGB's reasons adequately explain what facts it relied upon in coming to its conclusion that the parking was not occupied or used by BTC in operating its business. This evidence was not counter to the overwhelming evidence to the contrary.

[153] The City submits that although the MGB stated that its findings of fact were based on "other evidence" it did not identify that evidence and there was no other evidence supporting its findings of fact. The Impugned Order states at p. 14:

> The MGB concludes from a careful examination of the leases for the subject office buildings and the other evidence provided that the Appellant is not operating a parking business.
> [Emphasis added]

The above passage clearly indicates that the MGB relied upon the provisions of the leases provided to it. The nine volumes of the Return also contain considerable "other evidence" on which the MGB could base its decision. Although it would have been convenient if the MGB had identified the "other evidence" it considered, its failure to do so does not deprive the parties of an explanation, the public of accountability or the court the opportunity of effective judicial review. The reasons show how the MGB interpreted the MGA and Bylaws, determined the facts that were applicable to its interpretation and applied those facts to the law. Its reasons were adequate given the issues, evidence and arguments which were before it.

c. Adequacy of reasons based on the law

[154] The City attacks the MGB's decision on grounds that it is not based on the applicable and established law and a proper application of the facts and evidence to that law. It contends that it had a legitimate expectation that BTC was assessable for business tax on the subject parking facilities based on nearly ten years of the MGB's previous decisions relative to the same or a similar fact pattern. It submits that in these previous decisions, the MGB had unequivocally determined that there was a business being conducted in parking facilities rented to tenants or

2010 ABQB 719 (CanLII)

third parties and that the parking operators or owners/landlords were operating their businesses in those facilities.

[155] The legitimate expectations of the City do not give rise to a right to a particular substantive result or determination by the MGB, but rather enhanced procedural rights: *Moreau-Bérubé*, *Baker*. The City's contention that it had a legitimate expectation of a substantive result is therefore not well founded. The City does not take issue with its right to make representations or be consulted by the MGB. Instead, the City contends that the MGB's reasons departed from a long line of authority. The result of the MGB's decision is more properly considered in the standard of review analysis of the MGB's substantive reasons, rather than in a procedural fairness analysis: *Clifford*.

[156] The jurisdiction of the MGB to decide the issues before it is distinct from the functional adequacy of its reasons and decision. Although *Cuff* and *Mountain Creeks Ranch* are authority for the proposition that an unreasonable finding results in a jurisdictional error, *Cuff* required a complete lack of evidence and *Mountain Creeks Ranch* required that factual determinations be either unsubstantiated or alternatively, contrary to the vast wealth of relevant evidence, in order to find a jurisdictional error.

[157] In *Dunsmuir*, the Supreme Court of Canada cautioned against an unduly broad view of jurisdictional questions, at para. 59:

> Administrative bodies must also be correct in their determinations of true questions of jurisdiction or *vires*. We mention true questions of *vires* to distance ourselves from the extended definitions adopted before *CUPE*. It is important here to take a robust view of jurisdiction. We neither wish nor intend to return to the jurisdiction/preliminary question doctrine that plagued the jurisprudence in this area for many years. "Jurisdiction" is intended in the narrow sense of whether or not the tribunal had the authority to make the inquiry. In other words, true jurisdiction questions arise where the tribunal must explicitly determine whether its statutory grant of power gives it the authority to decide a particular matter.

d. Conclusion

[158] I find that the reasons of the MGB were sufficient to satisfy procedural fairness requirements. This is not a situation where there is a total lack of evidence supporting the MGB's decision or where the essential facts relied upon by the MGB were contrary to the majority of the evidence.

[159] The MGB defined the issues as whether the subject parking facilities were "premises" under the MGB and the Bylaws, whether BTC was operating a business, and whether it was operating its business in the subject premises. It had the jurisdiction and obligation to make these

2010 ABQB 719 (CanLII)

determinations. Its reasons explain why it came to the conclusion that BTC did not operate a business in the parking facilities. They are sufficient to explain to the parties why it came to that conclusion and to satisfy the need for public accountability. The reasons are based upon the issues, the evidence and the submissions presented to the MGB and are thus adequate for purposes of conducting an effective judicial review.

2010 ABQB 719 (CanLII)

3. Onus/burden of proof

[160] One of the arguments made by the City, expressly or by implication, is that BTC has not satisfied its onus of proof. For example, the City argues that it is not possible to determine, from only six out of 58 leases, the significant factors bearing on the issue of who occupies or uses the parking spaces in the subject parking facilities in the buildings.

[161] The onus on the parties on an appeal of a tax assessment to the MGB was summarized by the MGB in *Imperial Parking, represented by Deloitte & Touche LLP Property Tax Services v. Calgary (City)*, MGB Order 140/02 as follows at p. 10:

> ...The ultimate burden of proof or onus rests on the Appellant, at an assessment appeal, to convince the MGB their arguments, facts and evidence are more credible than that of the Respondent. However, if the Applicant leads sufficient evidence at the outset to establish a prima facie case, the evidentiary onus shifts to the Respondent. In order to establish a prima facie case, the Appellant must convince the MGB panel that there is merit to the appeal.
>
> The Appellant must establish that it is more probable than not that the assessed value is incorrect or inequitable. Once the evidentiary onus shift occurs, then the validity of the assessment is in question. In order to rebut the Appellants prima facie case, and in order to raise a legitimate inference that the assessment is correct, the Respondent must lead evidence to counter the Appellant's evidence. At the end of the hearing, the MGB considers all the evidence presented and determines which party has established their case on a preponderance of evidence. In theory this means the party with the strongest case should succeed.

In that case, Impark appealed 2002 business tax assessments on various properties operated by it. As the whole of Impark's appeal was based on six hypothetical scenarios unsupported by any substantive factual information, the MGB found that a reasonable person could not conclude that there might be a problem of equity with the assessments and that Impark had therefore failed to meet its onus of proof and the assessment must stand.

[162] In *BTC Properties II Ltd., represented by Derbyshire Viceroy Consultants Ltd. And MacLeod Dixon v. Calgary (City)*, MGB Order 116/03, the MGB found that although Impark and BTC were able to raise some questions as to the correctness and equity of the assessment, there was a considerable lack of evidence to prove their case and that "making broad statements

in narrative form, without any supporting documentation, is simply insufficient to meet the onus": at p. 24.

[163] In *Tonko*, the MGB found that the appellants had provided sufficient evidence that the 2002 office leasing market was substantially different from the 1986 market and that the City had failed to demonstrate that parking space rent was usually included in office space rent. The parking operators had provided evidence to shift the onus of proof to the City. The MGB found that the City had failed to show that the business tax assessments were equitably and fairly applied because they had failed to provide substantive evidence to support their assumption that rent for parking space was included in the rent for the office space: at p. 35.

[164] BTC had the initial onus of proving its case to the MGB, which required it to provide sufficient evidence to establish its case.

[165] As explained above, I find that BTC provided sufficient evidence to the MGB to satisfy the onus of proving that it was not the proper assessed person under the MGA and the Bylaws. It provided three complete leases and three incomplete leases. There was testimony from Mr. Kerslake and Mr. Fairgrieve-Park that each lease was representative of the leases in the building to which it applied. The City did not challenge or contradict this evidence at the MGB Hearing nor request that further leases be provided and it did not provide sufficient contradictory evidence to rebut BTC's *prima facie* case.

V. SUMMARY CONCLUSION

[166] The arguments of both parties, as evidenced in the MGB hearing transcripts, extensively canvassed the relevant issues, and the MGB clearly understood and grappled with those issues.

[167] It is implicit in the MGB's reasons for decision that it had regard to relevant business tax considerations. The MGB was required to consider three key factors: whether parking facilities were "premises" under the MGA and the Bylaws; whether BTC was operating a business in the parking facilities and whether BTC occupied or used the parking premises for the purpose of or in connection with its business. As the foregoing cases illustrate, these issues have been considered and decided before by both the MGB and the courts. Each decision is based on the interpretation of the applicable legislation and bylaws, the prior decisions of the courts and business tax appeal bodies, and the facts of each case. The MGB has not, as the City argues, found unequivocally that the owners/operators of parking facilities in office buildings operate parking businesses separate from their office leasing businesses and that they occupy or use the parking facilities for their businesses. Each case must be decided on its own facts.

[168] It should not be assumed that the MGB failed to have regard to the relevant law or evidence simply because its reasons do not specifically refer to such. The MGB is not obliged to expressly indicate that all relevant considerations have been taken into account. The Record before the MGB included a wealth of materials relating to the law and facts in issue. The MGB

2010 ABQB 719 (CanLII)

also heard extensive arguments from both parties on the law and the facts and the correct interpretation of the law in the context of the case before it.

[169] The MGB's reasons highlight the law and facts on which it relied in coming to its conclusions and logically link the evidence to the MGB's conclusions. Its findings were within a reasonable range of conclusions based on the law and the facts. As a result, the Impugned Order stands and the applications are hereby dismissed.

[170] The Consent Order granted March 2, 2010 that preceded this judicial review states that costs of the judicial review will be in the cause. If for any reason there are issues with respect to costs, the parties may speak to them within a reasonable period of time.

Heard on the 18th day of May, 2010.

EN APPEL DE LA COUR D'APPEL FÉDÉRALE

Droit administratif — Contrôle judiciaire — Norme de contrôle — Décisions ministérielles — Immigration — Citoyen de la Libye déclaré interdit de territoire en raison de son appartenance à une organisation terroriste — Demande de dispense ministérielle rejetée — Norme de contrôle applicable à la décision du ministre — La décision du ministre est-elle valide au regard de cette norme? — Loi sur l'immigration et la protection des réfugiés, L.C. 2001, ch. 27, art. 34(2).

Droit administratif — Justice naturelle — Théorie des attentes légitimes — Citoyen de la Libye déclaré interdit de territoire en raison de son appartenance à une organisation terroriste — Demande de dispense ministérielle rejetée — La décision a-t-elle porté atteinte aux attentes légitimes de l'appelant? — L'obligation d'équité procédurale a-t-elle été respectée?

Immigration — Inadmissibility and removal — Ministerial relief — Citizen of Libya found to be inadmissible based on membership in terrorist organization — Application for ministerial relief denied — Interpretation of term "national interest" — Immigration and Refugee Protection Act, S.C. 2001, c. 27, s. 34(2).

A, a citizen of Libya, has been residing in Canada continuously since 1997, despite having been found to be inadmissible on security grounds in 2002. The finding of inadmissibility was based on his membership in the Libyan National Salvation Front ("LNSF") — a terrorist organization according to Citizenship and Immigration Canada ("CIC"). A applied in 2002 under s. 34(2) of the *Immigration and Refugee Protection Act*, S.C. 2001, c. 27 ("*IRPA*"), for ministerial relief from the determination of inadmissibility, but his application was denied in 2009. The Minister of Public Safety and Emergency Preparedness ("Minister") concluded that it was not in the national interest to admit individuals who have had sustained contact with known terrorist and/or terrorist-connected organizations. A's application for permanent residence was denied.

A applied to the Federal Court for judicial review of the Minister's decision regarding relief. The Federal Court granted the application for judicial review. The Federal Court of Appeal allowed the appeal, dismissed the application for judicial review and concluded the Minister's decision was reasonable.

Held: The appeal should be dismissed and the Minister's decision under s. 34(2) of the *IRPA* allowed to stand.

A court deciding an application for judicial review must engage in a two-step process to identify the proper standard of review. First, it must consider whether the level of deference to be accorded with regard to the type of question raised on the application has been established satisfactorily in the jurisprudence. The second inquiry becomes relevant if the first is unfruitful or if the relevant precedents appear to be inconsistent with recent developments in the common law principles of judicial review. At this second stage, the court performs a full analysis in order to determine what the applicable standard is. The standard of review applicable in the case at bar has been satisfactorily determined in past decisions to be reasonableness.

Immigration — Interdiction de territoire et renvoi — Dispense ministérielle — Citoyen de la Libye déclaré interdit de territoire en raison de son appartenance à une organisation terroriste — Demande de dispense ministérielle rejetée — Interprétation de l'expression « intérêt national » — Loi sur l'immigration et la protection des réfugiés, L.C. 2001, ch. 27, art. 34(2).

A, un citoyen de la Libye, réside au Canada sans interruption depuis 1997, même s'il a été déclaré interdit de territoire pour raison de sécurité en 2002. L'interdiction de territoire reposait sur son appartenance au Front du salut national libyen (« FSNL ») — une organisation terroriste selon Citoyenneté et Immigration Canada (« CIC »). En 2002, A a demandé, aux termes du par. 34(2) de la *Loi sur l'immigration et la protection des réfugiés*, L.C. 2001, ch. 27 (« *LIPR* »), une dispense ministérielle à l'égard du constat d'interdiction de territoire, mais sa demande a été rejetée en 2009. Le ministre de la Sécurité publique et de la Protection civile (« ministre ») a conclu qu'il n'était pas dans l'intérêt national d'admettre des individus qui avaient entretenu des contacts suivis avec des organisations terroristes connues ou avec des organisations ayant des liens avec des terroristes. La demande de résidence permanente de A a donc été refusée.

A a saisi la Cour fédérale d'une demande de contrôle judiciaire de la décision du ministre relative à la dispense. La Cour fédérale a accueilli la demande de contrôle judiciaire. La Cour d'appel fédérale a accueilli l'appel, a rejeté la demande de contrôle judiciaire et a conclu que la décision du ministre était raisonnable.

Arrêt : Le pourvoi est rejeté et la décision du ministre rendue au titre du par. 34(2) de la *LIPR* est maintenue.

Pour déterminer la norme de contrôle appropriée, la cour saisie d'une demande de contrôle judiciaire doit entreprendre un processus en deux étapes. Premièrement, elle doit vérifier si la jurisprudence établit de manière satisfaisante le degré de retenue correspondant à une catégorie de questions soulevées dans la demande de contrôle judiciaire. La deuxième étape s'applique lorsque la première démarche se révèle infructueuse ou si la jurisprudence semble devenue incompatible avec l'évolution récente du droit en matière de contrôle judiciaire. À cette deuxième étape, la cour entreprend une analyse complète en vue de déterminer la norme applicable. La jurisprudence a établi de manière satisfaisante que la norme de la décision raisonnable est la norme de contrôle applicable en l'espèce.

The Minister, in making his decision, did not expressly define the term "national interest". Although this Court is not in a position to determine with finality the actual reasoning of the Minister, it may consider what appears to have been the ministerial interpretation of "national interest", based on the Minister's "express reasons" and Chapter 10 of CIC's *Inland Processing Operational Manual*: "Refusal of National Security Cases/Processing of National Interest Requests" (the "Guidelines"), which inform the scope and context of those reasons, and whether this implied interpretation, and the Minister's decision as a whole, were reasonable. Had the Minister expressly provided a definition of the term "national interest" in support of his decision on the merits, it would have been one which related predominantly to national security and public safety, but did not exclude the other important considerations outlined in the Guidelines or any analogous considerations. The Guidelines did not constitute a fixed and rigid code. Rather, they contained a set of factors, which appeared to be relevant and reasonable, for the evaluation of applications for ministerial relief. The Minister did not have to apply them formulaically, but they guided the exercise of his discretion and assisted in framing a fair administrative process for such applications.

The Minister is entitled to deference as regards this implied interpretation of the term "national interest". The Minister's interpretation of the term "national interest" is reasonable. The plain words of the provision favour a broader reading of the term "national interest" rather than one which would limit its meaning to the protection of public safety and national security. The words of the statute, the legislative history of the provision, the purpose and context of the provision, are all consistent with the Minister's implied interpretation of this term. Section 34 is intended to protect Canada, but from the perspective that Canada is a democratic nation committed to protecting the fundamental values of its *Charter* and of its history as a parliamentary democracy. Section 34 should not be transformed into an alternative form of humanitarian review; however, it does not necessarily exclude the consideration of personal factors that might be relevant to this particular form of review. An analysis based on the principles of statutory interpretation reveals that a broad range of factors may be relevant to the determination of what is in the "national interest", for the purposes of s. 34(2) of the *IRPA*.

En prenant sa décision, le ministre n'a pas défini expressément l'expression « intérêt national ». Bien que notre Cour ne soit pas en mesure de déterminer de manière définitive le raisonnement qu'a effectivement tenu le ministre, elle peut examiner l'interprétation que le ministre semble avoir donnée de l'expression « intérêt national », à partir de sa « décision expresse motivée » et du chapitre 10 du guide opérationnel *Traitement des demandes au Canada* : « Refus des cas de sécurité nationale/Traitement des demandes en vertu de l'intérêt national » de CIC (le « guide opérationnel »), qui régissent la portée et le contexte de ces motifs, ainsi que la question de savoir si cette interprétation implicite, et la décision du ministre dans son ensemble, étaient raisonnables. Si le ministre avait défini expressément l'expression « intérêt national » à l'appui de sa décision sur le fond, sa définition aurait porté principalement sur la sécurité nationale et la sécurité publique, sans écarter les autres considérations importantes énoncées dans le guide opérationnel ou toutes autres considérations analogues. Le guide opérationnel ne constituait pas un code définitif et rigide. Il contenait plutôt un ensemble de facteurs, apparemment pertinents et raisonnables, relatifs à l'examen des demandes de dispense ministérielle. Le ministre n'était pas tenu de l'appliquer d'une manière rigide, mais il guidait l'exercice de son pouvoir discrétionnaire et l'aidait à élaborer un processus administratif juste applicable à ces demandes.

Il convient de faire preuve de retenue à l'égard de cette interprétation implicite que le ministre a donnée de l'expression « intérêt national ». Le ministre a donné une interprétation raisonnable de l'expression « intérêt national ». Le sens ordinaire de la disposition milite en faveur d'une interprétation plus large de l'expression « intérêt national » que celle qui limiterait la portée de cette expression à la protection de la sécurité publique et de la sécurité nationale. Le libellé de la loi, l'historique législatif de la disposition, son objectif et son contexte sont conformes à l'interprétation implicite que le ministre donne de cette expression. L'article 34 vise à protéger le Canada, mais dans la perspective du caractère démocratique du Canada, une nation qui entend protéger les valeurs fondamentales de sa *Charte* et de son histoire de démocratie parlementaire. L'article 34 ne devrait pas devenir une formule de rechange à l'examen pour des raisons d'ordre humanitaire; toutefois, il n'exclut pas nécessairement la prise en compte de facteurs personnels qui peuvent être pertinents dans le cadre de ce type particulier d'examen. Une analyse fondée sur les principes d'interprétation législative révèle qu'un large éventail de facteurs peuvent être pertinents à l'égard de la détermination de ce que l'« intérêt national » peut comporter pour les besoins du par. 34(2) de la *LIPR*.

The Minister's reasons were justifiable, transparent and intelligible. Although brief, they made clear the process he had followed in ruling on A's application for ministerial relief. He reviewed and considered all the material and evidence before him. Having done so, he placed particular emphasis on: A's contradictory and inconsistent accounts of his involvement with the LNSF, a group that has engaged in terrorism; the fact that A was most likely aware of the LNSF's previous activity; and the fact that A had had sustained contact with the LNSF. The Minister's reasons revealed that, on the basis of his review of the evidence and other submissions as a whole, and of these factors in particular, he was not satisfied that A's continued presence in Canada would not be detrimental to the national interest. The Minister's reasons allow this Court to clearly understand why he made the decision he did.

The Minister's decision falls within a range of possible acceptable outcomes which are defensible in light of the facts and the law. The burden was on A to show that his continued presence in Canada would not be detrimental to the national interest. The Minister declined to provide discretionary relief to A, as he was not satisfied that this burden had been discharged. His conclusion was acceptable in light of the facts which had been submitted to him. Courts reviewing the reasonableness of a minister's exercise of discretion are not entitled to engage in a new weighing process. The Minister reviewed and considered (i.e. weighed) all the factors set out in A's application which were relevant to determining what was in the "national interest" in light of his reasonable interpretation of that term. Given that the Minister considered and weighed all the relevant factors as he saw fit, it is not open to the Court to set the decision aside on the basis that it is unreasonable.

The Minister's decision was not unfair, nor was there a failure to meet A's legitimate expectations or to discharge the duty of procedural fairness owed to him. In this case, the Guidelines created a clear, unambiguous and unqualified procedural framework for the handling of relief applications, and thus a legitimate expectation that that framework would be followed. The Guidelines were published by CIC, and, although CIC is not the Minister's department, it is clear that they are used by employees of both CIC and the Canada Border Services Agency for guidance in the exercise of their functions and in applying the legislation. The Guidelines are and

Les motifs du ministre étaient justifiables, transparents et intelligibles. Malgré leur brièveté, ils indiquaient clairement le processus décisionnel suivi relativement à la demande de dispense ministérielle de A. Le ministre a examiné toutes les pièces et les éléments de preuve qui lui ont été soumis. Il a particulièrement tenu compte du fait que A avait donné des récits contradictoires et incohérents au sujet de son association au FSNL, un groupe qui s'était livré au terrorisme; du fait que A était fort probablement au courant des activités antérieures du FSNL, et du fait que A avait entretenu des contacts suivis avec le FSNL. Il ressort des motifs du ministre que, en se fondant sur l'examen qu'il a fait des éléments de preuve et des observations dans leur ensemble, et de ces facteurs en particulier, il n'était pas convaincu que la présence continue de A au Canada ne serait nullement préjudiciable à l'intérêt national. Les motifs du ministre permettent à la Cour de saisir clairement pourquoi il est arrivé à cette décision.

La décision du ministre s'inscrit dans un éventail de solutions acceptables possibles qui peuvent se justifier au regard des faits et du droit. Il incombait à A de démontrer que sa présence continue au Canada ne serait pas préjudiciable à l'intérêt national. Le ministre a refusé d'accorder à A une dispense de nature discrétionnaire parce qu'il n'était pas convaincu que ce dernier s'était acquitté de ce fardeau de preuve. Sa conclusion était acceptable au regard des faits qui lui avaient été présentés. Dans le cadre d'un contrôle du caractère raisonnable de l'exercice ministériel d'un pouvoir discrétionnaire, les tribunaux ne sont pas autorisés à utiliser un nouveau processus d'évaluation. Le ministre a examiné et tenu compte de (c.-à-d. a évalué) tous les facteurs exposés dans la demande de A qui étaient pertinents pour décider ce qui était dans l'« intérêt national », selon son interprétation raisonnable de cette expression. Puisque le ministre a examiné et évalué tous les facteurs pertinents comme il l'a jugé à propos, il n'appartient pas à la Cour d'annuler sa décision parce qu'elle serait déraisonnable.

La décision du ministre n'était pas inéquitable et ne constituait pas une atteinte aux attentes légitimes de A; elle respectait l'obligation d'équité procédurale envers ce dernier. En l'espèce, le guide opérationnel a créé un cadre procédural clair, net et explicite pour le traitement des demandes de dispense et, de ce fait, une attente légitime quant à son application. Le guide a été publié par CIC, et bien que ce ministère ne relève pas du ministre, il est clair que ce guide est utilisé à la fois par les agents de CIC et les agents de l'Agence des services frontaliers du Canada dans l'exercice de leurs fonctions et pour l'application de la loi. Le guide opérationnel

were publicly available, and they constitute a relatively comprehensive procedural code for dealing with applications for ministerial relief. Thus, A could reasonably expect that his application would be dealt with in accordance with the process set out in them. A has not shown that his application was not dealt with in accordance with this process outlined in the Guidelines. If A had a legitimate expectation that the Minister would consider certain factors, including the Guidelines and humanitarian and compassionate factors, in determining his application for relief, this expectation was fulfilled.

était accessible au public et l'est encore, et il constitue un code de procédure relativement exhaustif concernant le traitement des demandes de dispense ministérielle. A pouvait donc raisonnablement s'attendre à ce que sa demande soit traitée conformément au processus qui y est prévu. A n'a pas démontré que ce processus prévu dans le guide opérationnel n'a pas été suivi lors du traitement de sa demande. Si A avait une attente légitime que le ministre tiendrait compte, pour trancher sa demande de dispense, de certains facteurs, dont le guide opérationnel et les facteurs d'ordre humanitaire, il a été satisfait à cette attente.

LeBel J. —

I. Introduction

[1] The appellant, Muhsen Ahmed Ramadan Agraira, a citizen of Libya, has been residing in Canada continuously since 1997, despite having been found to be inadmissible on security grounds in 2002. The finding of inadmissibility was based on the appellant's membership in the Libyan National Salvation Front ("LNSF") — a terrorist organization according to Citizenship and Immigration Canada ("CIC"). The appellant applied in 2002 under s. 34(2) of the *Immigration and Refugee Protection Act*, S.C. 2001, c. 27 ("*IRPA*"), for ministerial relief from the determination of inadmissibility, but his application was denied in 2009. The Minister of Public Safety and Emergency

Version française du jugement de la Cour rendu par

Le juge LeBel —

I. Introduction

[1] L'appelant, Muhsen Ahmed Ramadan Agraira, un citoyen de la Libye, réside au Canada sans interruption depuis 1997, même s'il a été déclaré interdit de territoire pour raison de sécurité en 2002. L'interdiction de territoire reposait sur son appartenance au Front du salut national libyen (« FSNL ») — une organisation terroriste selon Citoyenneté et Immigration Canada (« CIC »). En 2002, l'appelant a demandé, aux termes du par. 34(2) de la *Loi sur l'immigration et la protection des réfugiés*, L.C. 2001, ch. 27 (« *LIPR* »), une dispense ministérielle à l'égard du constat d'interdiction de territoire, mais sa demande a été rejetée en 2009. Le ministre de la Sécurité

new weighing process (para. 37; see also *Lake v. Canada (Minister of Justice)*, 2008 SCC 23, [2008] 1 S.C.R. 761, at para. 39). As the Minister stated in his reasons, he had "reviewed and considered" (i.e. weighed) all the factors set out in the appellant's application which were relevant to determining what was in the "national interest" in light of his reasonable interpretation of that term. He gave particular weight to certain factors pertaining to national security and public safety and emphasized them in his reasons, namely: the appellant's contradictory and inconsistent accounts of his involvement with the LNSF; the fact that the appellant was most likely aware of the LNSF's previous activity; and the fact that the appellant had had sustained contact with the LNSF. Given that the Minister considered and weighed all the relevant factors as he saw fit, it is not open to the Court to set the decision aside on the basis that it is unreasonable.

[92] In all the circumstances, it cannot be said that either the result or the Minister's decision as a whole was unreasonable. But a final issue remains: it relates to an allegation of a failure to meet the requirements of procedural fairness.

G. *Was the Decision Unfair, and Did It Fail to Meet the Appellant's Legitimate Expectations?*

[93] As this Court noted in *Dunsmuir*, at para. 79, "[p]rocedural fairness is a cornerstone of modern Canadian administrative law. Public decision makers are required to act fairly in coming to decisions that affect the rights, privileges or interests of an individual." The Court's comment that "[p]rocedural fairness has many faces" (*Dunsmuir*, at para. 77) is also relevant to this case.

[94] The particular face of procedural fairness at issue in this appeal is the doctrine of legitimate expectations. This doctrine was given a strong

les tribunaux ne sont pas autorisés à utiliser un nouveau processus d'évaluation (par. 37; voir également *Lake c. Canada (Ministre de la Justice)*, 2008 CSC 23, [2008] 1 R.C.S. 761, par. 39). Comme il l'a affirmé dans ses motifs, le ministre a [TRADUCTION] « examiné et [. . .] tenu compte [de] » (c.-à-d. a évalué) tous les facteurs exposés dans la demande de l'appelant qui étaient pertinents pour décider ce qui était dans l'« intérêt national », selon son interprétation raisonnable de cette expression. Le ministre a accordé une importance particulière à certains facteurs relatifs à la sécurité nationale et la sécurité publique et les a soulignés dans ses motifs, soit les contradictions et incohérences de l'appelant au sujet de son association au FSNL, le fait que l'appelant était fort probablement au courant des activités antérieures du FSNL, et le fait que l'appelant avait entretenu des contacts suivis avec le FSNL. Puisque le ministre a examiné et évalué tous les facteurs pertinents comme il l'a jugé à propos, il n'appartient pas à la Cour d'annuler sa décision parce qu'elle serait déraisonnable.

[92] Compte tenu de l'ensemble des circonstances, on ne saurait affirmer que l'issue, ou la décision du ministre dans son ensemble, étaient déraisonnables. Il reste toutefois à trancher une dernière question qui porte sur une allégation de manquement aux exigences de l'équité procédurale.

G. *La décision était-elle inéquitable, et constituait-elle une atteinte aux attentes légitimes de l'appelant?*

[93] Ainsi que l'a fait remarquer notre Cour dans l'arrêt *Dunsmuir*, par. 79, « [l]'équité procédurale est un fondement du droit administratif canadien moderne. Les décideurs publics sont tenus de faire preuve d'équité lorsqu'ils prennent des décisions touchant les droits, les privilèges ou les biens d'une personne ». L'observation de la Cour selon laquelle « [l]'équité procédurale comporte de nombreuses facettes » (*Dunsmuir*, par. 77) revêt également de l'importance en l'espèce.

[94] La théorie des attentes légitimes constitue la facette particulière de l'équité procédurale qui nous occupe dans le présent pourvoi. Cette doctrine

foundation in Canadian administrative law in *Baker*, in which it was held to be a factor to be applied in determining what is required by the common law duty of fairness. If a public authority has made representations about the procedure it will follow in making a particular decision, or if it has consistently adhered to certain procedural practices in the past in making such a decision, the scope of the duty of procedural fairness owed to the affected person will be broader than it otherwise would have been. Likewise, if representations with respect to a substantive result have been made to an individual, the duty owed to him by the public authority in terms of the procedures it must follow before making a contrary decision will be more onerous.

[95] The specific conditions which must be satisfied in order for the doctrine of legitimate expectations to apply are summarized succinctly in a leading authority entitled *Judicial Review of Administrative Action in Canada*:

> The distinguishing characteristic of a legitimate expectation is that it arises from some conduct of the decision-maker, or some other relevant actor. Thus, a legitimate expectation may result from an official practice or assurance that certain procedures will be followed as part of the decision-making process, or that a positive decision can be anticipated. As well, the existence of administrative rules of procedure, or a procedure on which the agency had voluntarily embarked in a particular instance, may give rise to a legitimate expectation that such procedures will be followed. Of course, the practice or conduct said to give rise to the reasonable expectation must be clear, unambiguous and unqualified. [Emphasis added.]

(D. J. M. Brown and J. M. Evans, *Judicial Review of Administrative Action in Canada* (loose-leaf), at §7:1710; see also *Mount Sinai Hospital Center v. Quebec (Minister of Health and Social Services)*, 2001 SCC 41, [2001] 2 S.C.R. 281, at para. 29; *Canada (Attorney General) v. Mavi*, 2011 SCC 30, [2011] 2 S.C.R. 504, at para. 68.)

a trouvé de solides assises en droit administratif canadien dans *Baker*, où la Cour a statué qu'il s'agit d'un facteur qu'il faut prendre en compte pour déterminer les exigences de l'obligation d'équité procédurale de la common law. Si un organisme public a fait des déclarations au sujet des procédures qu'il suivrait pour rendre une décision en particulier, ou s'il a constamment suivi dans le passé, en prenant des décisions du même genre, certaines pratiques procédurales, la portée de l'obligation d'équité procédurale envers la personne touchée sera plus étendue qu'elle ne l'aurait été autrement. De même, si un organisme a fait une représentation à une personne relativement à l'issue formelle d'une affaire, l'obligation de cet organisme envers cette personne quant à la procédure à suivre avant de rendre une décision en sens contraire sera plus rigoureuse.

[95] Les conditions précises à satisfaire pour que s'applique la théorie de l'attente légitime sont résumées succinctement comme suit dans un ouvrage qui fait autorité intitulé *Judicial Review of Administrative Action in Canada* :

> [TRADUCTION] La caractéristique qui distingue une attente légitime réside dans le fait que celle-ci découle de la conduite du décideur ou d'un autre acteur compétent. Une attente légitime peut donc découler d'une pratique officielle ou d'une assurance voulant que certaines procédures soient suivies dans le cadre du processus décisionnel, ou qu'il soit possible de prévoir une décision favorable. De même, l'existence des règles de procédure de nature administrative ou d'une procédure que l'organisme a adoptée de son plein gré dans un cas particulier, peut donner ouverture à une attente légitime que cette procédure sera suivie. Certes, la pratique ou la conduite qui auraient suscité une attente raisonnable doivent être claires, nettes et explicites. [Je souligne.]

(D. J. M. Brown et J. M. Evans, *Judicial Review of Administrative Action in Canada* (feuilles mobiles), §7:1710; voir également *Centre hospitalier Mont-Sinaï c. Québec (Ministre de la Santé et des Services sociaux)*, 2001 CSC 41, [2001] 2 R.C.S. 281, par. 29; *Canada (Procureur général) c. Mavi*, 2011 CSC 30, [2011] 2 R.C.S. 504, par. 68.)

[96] In *Mavi*, Binnie J. recently explained what is meant by "clear, unambiguous and unqualified" representations by drawing an analogy with the law of contract (at para. 69):

> Generally speaking, government representations will be considered sufficiently precise for purposes of the doctrine of legitimate expectations if, had they been made in the context of a private law contract, they would be sufficiently certain to be capable of enforcement.

[97] An important limit on the doctrine of legitimate expectations is that it cannot give rise to substantive rights (*Baker*, at para. 26; *Reference re Canada Assistance Plan (B.C.)*, [1991] 2 S.C.R. 525, at p. 557). In other words, "[w]here the conditions for its application are satisfied, the Court may [only] grant appropriate procedural remedies to respond to the 'legitimate' expectation" (*C.U.P.E. v. Ontario (Minister of Labour)*, 2003 SCC 29, [2003] 1 S.C.R. 539, at para. 131 (emphasis added)).

[98] In the case at bar, the Guidelines created a clear, unambiguous and unqualified procedural framework for the handling of relief applications, and thus a legitimate expectation that that framework would be followed. The Guidelines were published by CIC, and, although CIC is not the Minister's department, it is clear that they are "used by employees of [both] CIC and the CBSA for guidance in the exercise of their functions and in applying the legislation" (R.F., at para. 108). The Guidelines are and were publicly available, and, as Appendix 2 to these reasons illustrates, they constitute a relatively comprehensive procedural code for dealing with applications for ministerial relief. Thus, the appellant could reasonably expect that his application would be dealt with in accordance with the process set out in them. In brief, this process is as follows:

1. Following the receipt of an application for relief, the CIC officer provides the applicant with a copy of the "National Interest Information Sheet". The applicant is given 15 days to send his or her submission to the local CIC office.

[96] Récemment, dans l'arrêt *Mavi*, le juge Binnie a expliqué ce que l'on entend par des affirmations « claires, nettes et explicites » en établissant une analogie avec le droit contractuel (par. 69) :

> En général, on juge suffisamment précise pour les besoins de la théorie de l'attente légitime l'affirmation gouvernementale qui, si elle avait été faite dans le contexte du droit contractuel privé, serait suffisamment claire pour être susceptible d'exécution.

[97] L'impossibilité que la théorie de l'attente légitime constitue la source de droits matériels lui apporte une restriction importante (*Baker*, par. 26; *Renvoi relatif au Régime d'assistance publique du Canada (C.-B.)*, [1991] 2 R.C.S. 525, p. 557). En d'autres mots, « [l]orsque les conditions d'application de la règle sont remplies, la Cour peut [seulement] accorder une réparation procédurale convenable pour répondre à l'expectative "légitime" » (*S.C.F.P. c. Ontario (Ministre du Travail)*, 2003 CSC 29, [2003] 1 R.C.S. 539, par. 131 (je souligne)).

[98] En l'espèce, le guide opérationnel a créé un cadre procédural clair, net et explicite pour le traitement des demandes de dispense et, de ce fait, une attente légitime quant à son application. Le guide opérationnel a été publié par CIC, et bien que ce ministère ne relève pas du ministre, il est clair que le guide opérationnel est utilisé à la fois par [TRADUCTION] « les agents de CIC et les agents de l'ASFC dans l'exercice de leurs fonctions et pour l'application de la loi » (m.i., par. 108). Le guide opérationnel était accessible au public et l'est encore, et comme il ressort de l'annexe 2 aux présents motifs, il constitue un code de procédure relativement exhaustif concernant le traitement des demandes de dispense ministérielle. L'appelant pouvait donc raisonnablement s'attendre à ce que sa demande soit traitée conformément au processus qui y est prévu. Les étapes de ce processus peuvent être résumées comme suit :

1. Après réception d'une demande de dispense ministérielle, l'agent de CIC remet au demandeur une copie de la « Feuille de renseignements sur l'intérêt national ». Le demandeur dispose de 15 jours pour envoyer sa demande au bureau local de CIC.

Apotex Inc. v. Canada (Attorney General) (C.A.)

Federal Courts Reports

Federal Court of Canada - Court of Appeal

Décary, Sexton and Evans JJ.A.

Heard: Toronto, February 28 and 29, 2000.

Judgment: Ottawa, May 12, 2000.

Court File No. A-922-96

[2000] 4 F.C. 264 | *[2000] F.C.J. No. 634*

Apotex Inc. (Appellant) (Applicant) v. The Attorney General of Canada, The Minister of National Health and Welfare, Merck & Co., Inc. and Merck Frosst Canada Inc. (Respondents) (Respondents) and Eli Lilly Canada Inc., Pharmaceutical Manufacturers Association of Canada and Canadian Drug Manufacturers Association (Interveners) (Interveners)

Case Summary

Patents — Validity of Patented Medicines (NOC) Regulations upheld as not ultra vires Patent Act, s. 55.2(4) — Latter provision to be construed broadly, not limited to those who have availed themselves of benefits conferred by Act, s. 55.2(1) or (2) in connection with particular medicine in dispute — Within Governor in Council's authority conferred by Act, s. 55.2(4) to provide expressly Regulations apply to submissions made before they came into effect, but not yet decided by Minister.

Practice — Pleadings — Mootness, abuse of process — As Notice of Compliance (NOC) issued to Apotex for norfloxacin, request for order to issue NOC for same drug moot — Furthermore, as appellant had opportunity to challenge validity of Patented Medicines (NOC) Regulations in earlier prohibition proceedings with respect to same drug, Court could have applied res judicata and issue estoppel to refuse to permit Apotex to raise it herein — However, proceeding not dismissed as validity of Regulations remaining live issue (NOC issued on basis of single allegation), and declaration of legal status would still serve useful purpose — Furthermore, in view of uncertainty about Regulations when litigation started, obvious and continuing interest of Apotex in having validity of Regulations determined, and fact parties had prepared full argument on merits, Motions Judge properly exercised discretion not to dismiss proceeding on this ground without getting to merits.

[page265]

Administrative law — Judicial review — Doctrine of legitimate expectations — Minister's undertaking to consult Canadian Drug Manufacturers Association before Patented Medicines

(Notice of Compliance) Regulations enacted at best personal undertaking of political nature not enforceable by Court; in any event, not binding on decision maker, i.e. Governor in Council.

Construction of statutes — Retroactivity — Application of Patented Medicines (NOC) Regulations to new drug submissions in pipeline when 1993 Regulations came into effect did not engage presumption against retroactivity — No vested right abrogated: in absence of clear legislative indication to contrary, no legal right to have application for statutory benefit determined in accordance with eligibility criteria in place when application made.

Apotex sought a compulsory licence for the generic form of Merck Frosst Canada's patented drug norfloxacin, an antibiotic, under the system in effect before the Patented Medicines (Notice of Compliance) Regulations was enacted. In 1993, before Apotex could obtain the authorization to market the generic drug, the compulsory licence system was abolished. In the application for judicial review with which this appeal is concerned, Apotex sought an order directing the Minister of National Health and Welfare to issue a NOC for its version of norfloxacin and declaring that the Regulations were invalid because they were not authorized by subsection 55.2(4) of the Patent Act. The validity of the Regulations was also attacked on the ground that they were promulgated without prior consultation, in breach of a promise made by the Minister responsible for the statutory amendments that regulations would not be enacted until there had been consultation with the Canadian Drug Manufacturers Association (CDMA), a trade association representing primarily the interests of generic pharmaceutical manufacturers. This was an appeal from the Trial Division decision dismissing the application for judicial review.

Held, the appeal should be dismissed.

Per Décary J.A. (Sexton J.A. concurring): the reasons for judgment of Evans J.A. were agreed with except with respect to the issue of the breach of the undertaking to consult the CDMA before the enactment of regulations.

[page266]

The Patent Act did not contain provisions stating that regulations proposed to be made pursuant to the Act must be published prior to their coming into force. Regulations made by the Governor in Council under section 55.2 of the Act were therefore subject to the general provisions of the Statutory Instruments Act and not required by law to be published prior to their coming into force. And unlike some of the other provisions of the Patent Act, section 55.2 imposed no duty to consult.

Assuming that the doctrine of legitimate expectations may apply to the regulation-making power of the Governor in Council, it would not apply in the circumstances of this case because the alleged undertaking is at best a personal undertaking of a political nature that is not enforceable in a court of law. In any event, even it the alleged undertaking could have bound the Minister and be enforceable by a court, it would not, in the circumstances, have bound the Governor in Council, the decision maker. Absent statutory authority or authority expressly delegated to a minister by the Governor in Council, a minister cannot bind the Governor in Council in the exercise of its regulation-making power.

Serious reservations were expressed as to the applicability of the doctrine of legitimate expectations to Cabinet in the exercise of its regulation-making power. In any event, Evans J.A.'s comments on this point

were obiter dicta. The judiciary should be reluctant to move in and impose procedural restrictions of its own creation on the process leading to the making of regulations by the Governor in Council.

Per Evans J.A.: (1) Given the decision of the Supreme Court of Canada in Merck Frosst Canada Inc. v. Canada (Minister of National Health and Welfare), *[1998] 2 S.C.R. 193*, as a result of which Apotex was issued with a NOC for norfloxacin, the issue was moot. However, since the NOC was issued on the basis of a single allegation, the validity of the Regulations remained a live issue, and therefore the declaration of their legal status would still serve a useful purpose. Although Apotex had had an opportunity to challenge the validity of the NOC Regulations in the earlier prohibition proceeding brought by Merck Frosst with respect to norfloxacin, the Motions Judge properly exercised his discretion not to dismiss the proceeding on this ground without getting to the merits in view of the uncertainty about the Regulations when the litigation started, the obvious and continuing interest of Apotex in having the validity of the Regulations determined, and the fact that the parties had prepared full argument on the merits.

(2) Subsection 55.2(4) of the Patent Act was not limited to authorizing the making of Regulations that apply to [page267] persons who have taken advantage of subsection 55.2(1) or (2) in respect of new drug products that are the subject of prohibition proceeding. If Parliament had intended to limit the scope to the regulation-making power in that way, it would have used more precise, explicit language. The wording in the English and French versions support a broad interpretation. Furthermore, the nature and subjective definition of the purpose for which the power may be exercised supports a broad interpretation: "such regulations as the Governor in Council considers necessary for preventing the infringement of a patent". For these reasons, and in accordance with the general directive of section 12 of the Interpretation Act (enactments deemed remedial), subsection 55.2(4) should be construed broadly.

(3) The Regulations, which purport to apply to NOC submissions that had been made, but not decided, when the Regulations came into effect, did not engage the presumption against retroactivity.

No vested right was thereby abrogated: in the absence of clear legislative indication to the contrary, no one has a legal right to have an application for a statutory benefit determined in accordance with the eligibility criteria in place when the application was made. Applicants for statutory rights normally have no more than a hope that the granting authority will render a favourable decision. As the applicant's right herein was neither "accrued" nor "accruing", the paragraph 44(c) of the Interpretation Act presumption against retroactive operation of the repeal of an enactment did not apply.

(4) The fact that the Minister of Consumer and Corporate Affairs did not consult the CDMA before regulations were enacted under subsection 55.2(4) of the Patent Act in spite of an undertaking to do so did not make the Regulations invalid.

It is settled law in Canada that the duty of fairness does not apply to the exercise of powers of a legislative nature, which would include the Regulations herein. However, it does not necessarily follow that subordinate legislation can lawfully be made in breach of a categorical and specific assurance of prior consultation given to an individual by a responsible minister of the Crown in the course of discharging departmental business. Nor does the law so provide.

In Reference re Canada Assistance Plan (B.C.), *[1991] 2 S.C.R. 525*, the Supreme Court specifically said that the doctrine of legitimate expectations has no application to the exercise of legislative powers as it

would place a fetter on an essential feature of democracy. However, similar considerations do not apply to the exercise of delegated legislative [page268] powers which is not subject to the same level of scrutiny as primary legislation that must pass through the full legislative process. Moreover, the procedural rights created by the doctrine of legitimate expectations are always subject to proof that, in particular circumstances, the public interest requires that administrative action be taken promptly without complying with the promised procedures.

The legitimate expectations doctrine is not simply a branch of the duty of fairness, in the sense that it serves the same purposes as the participatory rights conferred by the duty of fairness. Hence, there is no reason to limit its reach to the exercise of statutory powers to which the duty applies. In the absence of binding authority to the contrary, the doctrine of legitimate expectations applies in principle to delegated legislative powers so as to create participatory rights when none would otherwise arise, provided that honouring the expectation would not breach some other legal duty, or unduly delay the enactment of regulations for which there was a demonstrably urgent need.

On the facts of this case, the words used were capable of creating a legitimate expectation that the Minister would consult the CDMA before any regulations made under subsection 55.2(4) came into effect. However an undertaking given by a minister that there will be consultation prior to the enactment of regulations cannot give rise to a legitimate expectation when the Governor in Council, not the minister, has the statutory authority to make the regulations in question. While there was no evidence that the Governor in Council expressly delegated to the Minister of Consumer and Corporate Affairs the authority to impose procedural restrictions on the exercise of the Cabinet's regulation-making power, when, as here, the promise of prior consultation is made by the minister with primary responsibility for developing regulations and bringing them before the Cabinet, it may be open to those to whom the promise was made to seek judicial review to prevent the minister from taking proposed regulations to Cabinet until the promised consultation has occurred.

However, when, as here, the Cabinet has already approved the regulations, their validity cannot be impugned because they were enacted in the absence of the consultation that the minister promised. Given the legal protection afforded by the law to the confidentiality of cabinet proceedings and the narrow grounds on which the courts review the exercise of powers by the Cabinet, it would be impermissible for a court to enquire into the state of knowledge possessed by members of the Cabinet about prior procedural assurances given by a minister in order to determine whether otherwise valid regulations were knowingly enacted in breach of a [page269] ministerial undertaking.

In any event, the extensive and effective consultation that occurred after 1993, and prior to the amendments of the Regulations in 1998 which ironed out many of the subsequently identified wrinkles, would make it inappropriate to declare invalid the original Regulations as amended.

Statutes and Regulations Judicially Considered

Canada Assistance Plan, R.S.C. 1970, c. C-1, s. 8.
Canada Labour Code, R.S.C., 1985, c. L-2, s. 159(2) (as enacted by S.C. 1996, c. 12, s. 3).
Canada Shipping Act, R.S.C., 1985, c. S-9, s. 95(1) (as am. by R.S.C., 1985 (3rd Supp.), c. 6, s. 5).
Canadian Human Rights Act, R.S.C., 1985, c. H-6, s. 15(4) (as am. by S.C. 1998, c. 9, s. 10).

Civil Air Navigation Services Commercialization Act, S.C. 1996, c. 20, s. 12(2).
Constitution Act, 1867, 30 & 31 Vict., c. 3 (U.K.) (as am. by Canada Act 1982, 1982, c. 11 (U.K.), Schedule to the Constitution Act, 1982, Item 1) [R.S.C., 1985, Appendix II, No. 5], ss. 11, 12, 13.
Copyright Act, R.S.C., 1985, c. C-42, s. 66.6(2) (as enacted by R.S.C., 1985 (4th Supp.), c. 10, s. 12).
